

Continued Academic Warning

12.3. Continued Warning

This status serves as a formal extension to the academic warning status for students demonstrating positive academic improvement. Students currently on Academic Warning who achieve a 3.00 semester GPA will transition to "Continued Academic Warning." This designation recognizes a student's adequate academic progress in cases where the cumulative GPA has not yet reached the 3.00 minimum.

- Students on continued warning remain eligible for graduate assistantships.
- A continued academic warning does not appear on the official academic transcript.
- Students are notified of their continued academic warning status via official NDSU email.
- Students on continued academic warning can take a leave of absence from their graduate studies; this will not change their academic standing.
