

Natural Resources Management

With increasing human pressure and a growing need to balance competing demands, our world needs new and better ways to manage society's impacts on the environment. The Natural Resources Management program prepares students for challenging careers requiring the sustainability perspective and global social perspective necessary for examining and solving complex natural resources management problems. Our goal is the highest and best societal uses of natural resources while maintaining the integrity of life-sustaining socio-ecological systems. Career opportunities abound in federal, state and local government, the private sector, non-profit conservation and environmental organizations, as well as higher education and research.

An interdisciplinary major in NRM leads to a Bachelor of Science (B.S.) degree. Students benefit from faculty engagement from the various colleges across the university in the coordination of the program, classroom teaching and advising.

During the first four semesters of the NRM program, students complete a broad foundation of core courses in the social, biological, and physical sciences. The second half of the program offers students the opportunity to focus on a specific area of interest (emphasis). NRM offers six emphasis areas, each allowing students the flexibility to select courses for specialized career preparation.

- **Biotic Resources Science:** deals with basic scientific principles that govern the interrelationship between biotic (e.g., plants, animals) and abiotic factors (e.g., climate, soils) in major ecosystems and the use of these principles for environmentally sound management of both natural and agro-ecosystems.
- **Environmental Communication:** is designed for environmentally oriented students preparing for careers in communication fields such as journalism, public relations, broadcast media and the internet.
- **Natural Resources Economics:** prepares students for management, administrative, regulatory, and policy positions that require a broad understanding of natural resources management and allocation.
- **Physical/Earth Resources Science:** leads to an understanding of the physical and chemical aspects of ecosystems. Topics of study include hydrology, water management and quality, waste management, soil properties, energy resources and land-use management.
- **Pollution Control:** focuses on the principles and practices of managing natural resources for pollution control. Topics include the technical aspects of pollution as they relate to water, air/solids, earth/soils, and the impact of environmental pollution on biotic factors. Students interested in this emphasis are strongly urged to complete College Algebra before entering the NRM program.
- **Social Sciences:** concentrates on human factors (social, political, anthropological) in environmental management and environmental disaster management, while recognizing constraints and opportunities presented by physical and biological factors.

Major Requirements

Major: Natural Resources Management

Degree Type: B.S.

Required Degree Credits to Graduate: 128

General Education Requirements

Code	Title	Credits
First Year Experience (F):		
AGRI 189	Skills for Academic Success (Students transferring in 24 or more credits do not need to take AGRI 189.)	1
Communication (C):		
ENGL 110	College Composition I	3
ENGL 120	College Composition II	3
One Course in Upper Level Writing: Select one of the following:		
ENGL 320	Business and Professional Writing	3
ENGL 321	Writing in the Technical Professions	3
ENGL 324	Writing in the Sciences	3
ENGL 358	Writing in the Humanities and Social Sciences	3
COMM 110	Fundamentals of Public Speaking	3
Quantitative Reasoning (R):		
STAT 330	Introductory Statistics	3
Science & Technology (S):		
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory	4
GEOL 105	Physical Geology	3
NRM 225	Natural Resources & Agrosystems	3

Humanities & Fine Arts (A): Select from current general education list	6
Social & Behavioral Sciences (B):	
ECON 201 Principles of Microeconomics	3
Select one of the following:	3
POLS 110 Introduction to Political Science	
SOC 110 Introduction to Sociology	
EMGT 101 Emergencies, Disasters, and Catastrophes	
ANTH 111 Introduction to Anthropology	
Wellness (W): Select from current general education list	2
Cultural Diversity (D): Select from current general education list	
Global Perspectives (G):	
GEOL 105 Physical Geology	3
Total Credits	40

SOC 431	Environmental Sociology	
POLS 360	Principles of Public Administration	
POLS 422	State and Local Politics	
POLS 442	Global Policy Issues	
ANTH 462	Anthropology and the Environment	
EMGT 261	Disaster Preparedness	
EMGT 262	Disaster Mitigation	
EMGT 263	Disaster Response	
EMGT 264	Disaster Recovery	
NRM Emphasis Area: Students must select one of the six NRM emphasis areas to complete the major. See below.		38
Degree Requirements: Potential of a minimum of 11 credits to reach 128.		11
Total Credits		128

Natural Resources Management Emphasis Areas

- Select and complete one emphasis area as part of the Natural Resources Management major.
- Declaring an Emphasis- Students should formally declare an emphasis area with the Office of Registration & Records (<https://www.ndsu.edu/registrar>) by the beginning of their junior year. The emphasis area is recorded on the academic transcript with the degree.

Biotic Resources Science

Code	Title	Credits
Required. Select two of the following:		6
CHEM 122	General Chemistry II	
CHEM 240	Survey of Organic Chemistry	
RNG 336	Introduction to Range Management	
RNG/NRM 453	Rangeland Resources Watershed Management	
Select a minimum of 32 credits from the approved electives list below for Biotic Resources:		32
BOT 314	Plant Systematics	
RNG 456	Range Habitat Management	
SOIL 217	Introduction to Meteorology & Climatology	
NRM 401	Urban-Ecosystem Management	
NRM 420	Scenarios in Natural Resources Management	
PLSC 219	Introduction to Prairie & Community Forestry	
ZOO 470	Limnology	
ZOO 476	Wildlife Ecology and Management	
PLSC/BOT/ZOO 315	Genetics	
PLSC/BOT/ZOO 315L	Genetics Laboratory
