

Business Analytics

Department Information

- **Program Coordinator:**
Fred Riggins, Ph.D.
- **Department Location:**
200 Barry Hall
- **Department Phone:**
701-231-5845
- **Department Web Site:**
www.ndsu.edu/business/programs/masters/msba/
- **Credential Offered:**
M.S.
- **Test Requirement:**
GMAT or GRE

The Master of Science in Business Analytics (MSBA) program at North Dakota State University is a non-thesis, professional program structured to serve qualified students with undergraduate degrees in a variety of fields. The program is particularly attractive to students with undergraduate degrees in business, computer science, engineering, and statistics. The program is designed to provide the student with advanced applied problem solving skills and an understanding of business analytics methodologies and tools mastery. Students get hands-on experience with the most up-to-date tools and methodologies for data management, data modeling, visualization, and data mining.

NDSU business analytics faculty use a variety of teaching methods including case studies, group and individual projects, computer applications, student presentations, and discussion. Many classes take place in the Barry Hall computer labs. The program has a significant capstone experience where students work with local companies analyzing real data and solving real-world problems with data. The program is designated as a STEM program reflecting the technical nature of current data analytics practices.

GMAT/GRE

In addition to the Graduate School application requirements, the GMAT/GRE is required. Individuals seeking admission to the MSBA program may request a waiver of the GMAT/GRE requirement if they meet one of the following requirements:

- The applicant holds a terminal degree (e.g., PhD, MD, JD).
- The applicant has a minimum of five (5) years of recent, post-bachelor's, full-time, professional work experience that is relevant to business analytics and data science.

Appropriate documentation (i.e. official transcript, Statement of Purpose, resume) is required to be uploaded to the application file. It does not, however, guarantee a waiver. Applicants should request the waiver in their Statement of Purpose and provide the rationale for the waiver request. Applicants are reviewed on a case-by-case basis, and waiver approval is determined at the discretion of the MBA program coordinator.

Code	Title	Credits
Data Analysis Foundation Courses		6
CSCI 765	Introduction To Database Systems	3
STAT 725	Applied Statistics	3
Business Analytics Courses		10
MBA 722	Marketing Analytics and Customer Intelligence	2
MBA 723	Digital Marketing	2
