# About the Bulletin

---

The **Undergraduate & Graduate Bulletins** contain information about academic programs and student services offered by North Dakota State University. It also contains general University and undergraduate and graduate academic policies and degree requirements. This bulletin (or catalog) is published online only. The bulletin is intended to complement other university information including specific materials supplied by schools, colleges, departments, and programs.

- The information in the Undergraduate Bulletin (p. 87) applies to all undergraduate and professional students at the university. Some academic policies also apply to graduate students. Additional information for graduate students is available in the Graduate Bulletin (<http://bulletin.ndsu.edu/graduate>). Information in the individual college sections applies to students enrolled in those specific degree programs of study.
- The academic policies and information contained within this bulletin are effective for the **2020-2021 academic year**, beginning on August 24, 2020 and ending on August 6, 2021.
- The undergraduate curricula within the bulletin are effective for students who entered NDSU or who declared a program of study during the **2020-2021 academic year**. Continuing and returning students follow the curriculum in place at the time their program of study was officially declared with the University.
- Questions about undergraduate academic policies and curriculum guides may be directed to the Office of Registration and Records. Questions about graduate programs and policies can be directed to the Graduate College.
- It is important for students to be familiar with all the information that applies to them, including policies and procedures related to registration, academic progress and degree requirements. Students are strongly encouraged, and may be required by the department to consult their advisers at least once each semester to ensure they are completing requirements applicable to their degree and major programs.
- All new, current and returning students should become well acquainted with the regulations regarding student academic (<https://www.ndsu.edu/fileadmin/policy/335.pdf>) and behavioral (<https://www.ndsu.edu/fileadmin/policy/601.pdf>) codes of conduct.
- Information about the Family Educational Rights and Privacy Act of 1974 (<https://www.ndsu.edu/registrar/records/ferpa>), as amended, is available online or in the Office of Registration and Records.

## State Board of Higher Education Policy - Section 450

In accordance with State Board of Higher Education policy, Section 450: Institutional Reports, Catalogs, Bulletins: "Institutions shall publish electronic and/or hard copies of catalogs and bulletins for the purpose of furnishing prospective students and other interested persons with information about the institutions. Announcements contained in such printed or electronic material are subject to change without notice, and may not be regarded in the nature of binding obligations on the institutions and the State."

## Reservation of Rights

Every effort has been made to provide accurate and current information; however, the right is reserved to change any of the rules and regulations of the university at any time, including those relating to admission, instruction, and graduation. The right to withdraw curricula and specific courses, change or discontinue programs, alter course content, change the calendar, and to impose or increase tuition and fees similarly is reserved. In some cases, requirements for programs and prerequisites for courses offered are effective even if they are not listed in this bulletin. All such changes are effective at such times as the proper authorities determine, and may apply not only to prospective students but also to those who already are enrolled in the university.

## Non-discrimination Policy

North Dakota State University does not discriminate on the basis of age, color, disability, expression/identity, gender, genetic information, marital status, national origin, public assistance status, race, religion, sex, sexual orientation, or status as a U.S. veteran. Direct inquiries to the Office of the Vice Provost and Title IX Coordinator (<https://www.ndsu.edu/equity>), Old Main 201, (701) 231-7708.

## Message from the President

North Dakota State University is a truly amazing place, a model for others in higher education to emulate. Our proud university is a shining example of a successful student-focused, land-grant, research institution—and that means NDSU commands a powerful niche.

The rest of the country and the world are noticing our accomplishments.

NDSU is listed at 94 among 408 public universities based on NDSU's research expenditures reported to the National Science Foundation. In addition, NDSU is listed in the National Science Foundation's top 100 in several areas, including: agricultural sciences; business management and business; communications; computer sciences; natural resources and conservation science; political science and government; social sciences; sociology, demography, and population studies; and visual and performing arts.

NDSU has more than 13,000 students in our undergraduate and graduate programs. We have almost 2,000 graduate and professional students. NDSU student-athletes compete and succeed in the ranks of NCAA Division I.

The level of interest in the university has risen dramatically among students, the public and colleagues around the globe. This institution has evolved and progressed—we have increased our productivity, visibility and contributions to a greater number of constituencies.

We have a strong sense of community and campus pride at NDSU. We are dedicated to the land-grant mission of quality education, leading research and outstanding service. NDSU clearly makes a difference in the lives of students and the vitality of our community, state, region and nation.

The future of the great state of North Dakota is at a point of awakening—and our imagination is the only limit to the future. We at NDSU are poised to help make that future a reality.

I urge you to use this catalog to explore the many educational opportunities offered by our university. Join us as NDSU moves forward. The best is yet to come.

**Dean L. Bresciani**  
President

## **NDSU Overview**

### **Mission**

With energy and momentum, North Dakota State University addresses the needs and aspirations of people in a changing world by building on our land-grant foundation.

### **Vision**

We envision a vibrant university that will be globally identified as a contemporary metropolitan land-grant institution.

### **Core Values**

NDSU is guided by the following key values and principles:

#### **Land-grant**

- We reflect and serve geographically and culturally diverse populations.
- We share institutional success across the university.
- We anticipate and welcome growth and service that will occur in ways yet to be conceived.
- We embrace our unique complexities as a land-grant university on the Northern Great Plains.
- We remain committed to serving people globally.

#### **People**

- We derive strength and vitality from each other and from the diverse communities we serve.
- We envision an academic and social environment that is conducive to intellectual and personal development by promoting the safety and welfare of all members of the university community.
- We promote excellence through individuals participating in decisions and value cooperation for the common good.

#### **Scholarship**

- We are an engaged university and acknowledge and pursue scholarship of all forms, including discovery, teaching, integration, and application.
- We uphold the rights and responsibilities of academic freedom.

#### **Teaching and Learning**

- We provide a superior teaching and learning environment within and outside of the traditional classroom.
- We promote and value liberal, graduate, and professional education in a collegial environment where divergent ideas can be shared.
- We foster an environment that promotes life-long learning with individually-defined goals.

#### **Ethics**

- We maintain our integrity through principled action and ethical decision-making.

#### **Culture**

- We will be the land-grant university that we want to be by welcoming and respecting differences in people and ideas.
- We support the goals of the North Dakota University System and value collaboration with colleges and universities around the world.
- We foster accessibility to our programs and services.

## Accountability

- We have a special relationship with, and are accountable to, the people of North Dakota.
- We actively strive to contribute to our region's economic prosperity and to improve the quality of life.

## A Vibrant Educational and Research Environment

NDSU is a highly regarded and often recognized student-focused, land-grant, research institution. With a land-grant mission to provide quality education, leading-edge research and excellent service, NDSU is acknowledged as a national leader among its peers, and seen by many as a model for success.

NDSU is listed at 94 among 408 public universities based on NDSU's research expenditures reported to the National Science Foundation. In addition, NDSU is listed in the National Science Foundation's top 100 in several areas, including: agricultural sciences; business management and business; communications; computer sciences; natural resources and conservation science; political science and government; social sciences; sociology, demography, and population studies; and visual and performing arts.

NDSU has enjoyed consistent growth with more than 13,000 students in its undergraduate and graduate programs. Annual research expenditures at the university surpass \$150 million.

NDSU's 55 acre Research and Technology Park is an award-winning example of success. It is a place where university researchers and private industry combine talents to develop and commercialize new technologies, methods and systems. The Research Park, founded in 1999, is host to nationally known companies John Deere Electronic Solutions and Appareo. The Park has a 50,000 square foot Incubator building that accelerates the success of startup companies. Successful Incubator graduates include Appareo, Intelligent InSites, Pedigree Technologies and Myriad Mobile.

NDSU President Dean L. Bresciani describes the university as a place where students can succeed academically and personally through learning, involvement, service and leadership. "NDSU is unique nationally in that it is a land-grant, research-based and student-focused university," he said. "That combination provides what few others institutions do, and our students are realizing the benefits."

## A Historical Perspective of NDSU

### A Bit of History

North Dakota had been a state less than a year when Governor John Miller signed a bill on March 8, 1890, designating a square mile of land adjoining Fargo as the site of the new campus and demonstration farm under the name North Dakota Agricultural College and Agricultural Experiment Station.

With President Horace E. Stockbridge and five faculty members, the university opened for its first collegiate year on September 8, 1891. A total of 30 students were listed in the 1891 Prospectus as being "matriculated in the Special Course."

Through its proud history, the campus has gained a strong reputation for outstanding education, research and service. An engaged university, NDSU is recognized as a leader among its peers. Acknowledged nationally, NDSU is among 108 institutions listed in the "Research University/Very High Research" category by the Carnegie Commission on Higher Education.

### The Land-Grant Heritage

Honoring the commitment of the Morrill Act of 1862, the land-grant universities were established to provide studies that were a blend of technical and academic subjects. Known as a "people's college," NDSU was part of the bold experiment to provide access to a college education for the common person.

NDSU, the state's first land-grant institution, is well positioned to prepare graduates for the global marketplace and technologically oriented economy. Through a statewide network of centers and electronic technology, NDSU provides a growing capability for delivering education, cultural activities and information to schools and homes throughout North Dakota. NDSU is a publicly supported comprehensive land-grant institution, with a strong agriculture and applied science tradition.

### The College of Graduate and Interdisciplinary Studies

Graduate students were first accepted in 1895, and a formal announcement of graduate studies has been carried in the bulletins since 1902.

The Graduate College was formalized July 1, 1954, by approval of the North Dakota Board of Higher Education. Graduate studies were administered by a Graduate Council from November 1949 to June 1954, and before that by a Graduate Committee.

The first Master of Science degree was awarded in 1899. Since then, graduate students have been in regular attendance and have participated in the scholarly activity of the campus. The number of degrees awarded increased noticeably after 1920 and again after 1950 in reflection of general trends in higher education in the United States.

In 1959, the North Dakota Board of Higher Education first authorized certain departments to offer the Doctor of Philosophy degree. The first Ph.D. degrees were awarded in 1963.

## **NDSU Today**

NDSU has experienced a remarkable period of growth and expanded academic opportunities, and it is recognized as a national model of the contemporary land-grant institution. NDSU has more than 13,000 students in its undergraduate and graduate programs, and its research expenditures surpass \$150 million annually.

NDSU is listed at 94 among 408 public universities based on NDSU's research expenditures reported to the National Science Foundation. In addition, NDSU is listed in the National Science Foundation's top 100 in several areas, including: agricultural sciences; business management and business; communications; computer sciences; natural resources and conservation science; political science and government; social sciences; sociology, demography, and population studies; and visual and performing arts.

An institution committed to progress, NDSU continues to advance in all areas because of the energy and dedication of faculty, staff, students, alumni, and friends.

## **NDSU Today**

### **Academic Programs**

NDSU offers more than 100 undergraduate and approximately 135 graduate degree programs of study in nine academic colleges. Degrees are awarded at the doctoral, master's, professional, and baccalaureate levels. Various undergraduate minors and certificate programs at the undergraduate and graduate levels also are available. Programs offered at the time of this publication are listed in the Programs of Study (p. 131) section of this bulletin or may be viewed online at [www.ndsu.edu/majors](http://www.ndsu.edu/majors).

### **The Faculty**

As of Fall 2015, NDSU has 836 ranked faculty, lecturers, and program administrators, as well as 152 part-time academic staff within Academic Affairs. Because of the nature of a land-grant university, many faculty hold joint appointments with affiliated research organizations on the campus.

### **Divisions**

- Office of the Provost (<https://www.ndsu.edu/provost>)
- Division of Agricultural Affairs (<https://www.ndsu.edu/vpag>)
- Division of Finance and Administration (<https://www.ndsu.edu/vpfa>)
- Division of Information Technology (<https://www.ndsu.edu/vpit>)
- Division of Research and Creative Activity (<https://www.ndsu.edu/research>)
- Division of University Relations (<https://www.ndsu.edu/vpur>)

### **The Campus**

The NDSU campus in Fargo includes more than 97 buildings on approximately 44 square blocks or 261 acres. Statewide, NDSU is located on 19,869.39 acres of North Dakota land, which includes the main Agricultural Experiment Station in Fargo and seven research centers throughout the state. With NDSU's campus growth into downtown Fargo, that area has been transformed structurally, strategically and socially with its presence there, invigorating both the university and the downtown community.

### **The Fargo-Moorhead Community**

The home of NDSU, Fargo is a bustling metropolitan area that is often listed as one of the best places to live in the country. Fargo is quietly earning a reputation as a perfect place to make a home. Nestled in the rich farmlands of the Red River Valley, the Fargo-Moorhead community has many qualities that contribute to this reputation, including a highly respected educational system; advanced medical technology; a progressive business community; numerous cultural and arts opportunities; clean air and water; and good-hearted, friendly people.

Fargo-Moorhead is among the largest metropolitan centers between Minneapolis and Seattle. More than 245,000 people make their home in Cass and Clay Counties. One of the reasons people choose NDSU as a place to get a good education is that the F-M community provides students access to part-time jobs, internships, parks and other recreational facilities, entertainment, and cultural amenities.

### **Continuing Education**

Continuing Education is an outreach unit of the university that makes the resources of the institution available in a variety of ways, including distance-based education. Courses, locations, and delivery systems are planned in response to requests and identified needs.

Continuing Education activities fall into three main categories: on- and off-campus credit courses, non-credit activities, and learning opportunities mediated via technology. Admission to NDSU is required to enroll in Continuing Education courses, which are numbered 2000 or above. Individuals interested in enrolling in degree eligible credit activities must complete application procedures through the Graduate School.

## University Resources

- Alumni Association (<https://www.ndsualumni.com>)
- Centers and Institutes ([https://www.ndsu.edu/research/about\\_rca/ndsu\\_centers\\_and\\_institutes](https://www.ndsu.edu/research/about_rca/ndsu_centers_and_institutes))
- Extension Service (<http://www.ag.ndsu.edu/extension>)
- Facilities Management (<https://www.ndsu.edu/facilities>)
- Information Technology Services (<https://www.ndsu.edu/its>)
- Institutional Research and Analysis (<https://www.ndsu.edu/oira>)
- NDSU Libraries (<http://www.ndsu.edu/library>)
- NDSU Research and Technology Park (<http://www.ndsuresearchpark.com>)
- Research Extension Centers (<http://www.ag.ndsu.edu/research/research-extension-centers>)

## NDSU Policy Manual

NDSU, the North Dakota University System, and the State Board of Higher Education have numerous policies and procedures that apply to students, faculty, and staff. The NDSU Policy Manual (<https://www.ndsu.edu/policy>) is available online and includes, among others, the following policies that pertain to students:

- Anti-Harassment Policy (<https://www.ndsu.edu/fileadmin/policy/163.pdf>)
- Campus Security ([https://www.ndsu.edu/police\\_safety/police/annualecurityreport](https://www.ndsu.edu/police_safety/police/annualecurityreport))
- Email Policy (<https://www.ndsu.edu/fileadmin/policy/609.pdf>)
- Equal Opportunity and Non Discrimination Policy (<https://www.ndsu.edu/fileadmin/policy/100.pdf>)
- Privacy of Student Records (<https://www.ndsu.edu/registrar/records/ferpa>)
- Sexual and Gender-Based Harassment, Sexual Misconduct, and Title IX Policy (<https://www.ndsu.edu/fileadmin/policy/162.pdf>)
- Sexual Misconduct and Title IX Compliance (<https://www.ndsu.edu/fileadmin/policy/603.pdf>)
- Use of Alcohol and Other Drugs (<https://www.ndsu.edu/fileadmin/policy/155.pdf>)

## Administration

- **Dean L. Bresciani, Ph.D., President**
  - Christopher S. Wilson, J.D., Chief of Staff
  - Matthew Larsen, Director of Athletics
  - Tom Claeys, State Forester
- **Margaret Fitzgerald, Ph.D., Interim Provost**
  - David Bertolini, Ph.D., Dean of the College of Arts, Humanities and Social Sciences
  - Scott Beaulier, Ph.D., Dean of the College of Business
  - David Buchanan, Ph.D., Associate Dean of the College of Agriculture, Food Systems, and Natural Resources
  - Benton Duncan, Ph.D., Interim Dean of the College of Science and Mathematics
  - Margaret Fitzgerald, Ph.D., Interim Provost and Dean of the College of Human Sciences and Education
  - Michael R. Kessler, Ph.D., Dean of the College of Engineering
  - Joe Mocnik, Ph.D., Dean of Libraries
  - Charles D. Peterson, Pharm.D., Dean of the College of Health Professions
  - Claudia Tomany, Ph.D., Dean of the College of Graduate and Interdisciplinary Studies
- **Greg Lardy, Ph.D., Vice President for Agricultural Affairs**, Director of the N.D. Agricultural Experiment Station
- **Bruce A. Bollinger, Vice President for Finance and Administration**
- **Marc Wallman, Vice President for Information Technology**
- **Jane Schuh, Ph.D., Vice President for Research and Creative Activity**
- **Laura McDaniel, M.S., Associate Vice President for University Relations**

## Accreditation

NDSU is accredited as an institution by the Higher Learning Commission (<https://www.hlcommission.org>) and inquiries may be directed to them at 230 South LaSalle St., Suite 7-500, Chicago, IL 60604-1411. In addition, many programs are accredited or approved by their respective professional organizations and agencies.

## Accrediting Agency Degrees and Programs

The following programs of study are accredited as listed below and in the college sections of this bulletin:

- Accreditation Commission for Programs in Hospitality Administration: Hospitality and Tourism Management (Bachelor of Arts and Bachelor of Science)
- Accreditation Council for Pharmacy Education (ACPE): Pharmacy Doctorate
- Accrediting Council for Education in Nutrition and Dietetics: Dietitian Education Program (Bachelor of Science); Didactic Program in Dietetics (Bachelor of Arts and Bachelor of Science)
- American Council for Construction Education: Construction Management
- American Society of Health-System Pharmacists: Pharmacy (Doctor of Pharmacy)<sup>1</sup>
- American Veterinary Medical Association Committee on Veterinary Technician Education and Activities (AVMA): Veterinary Technology (Bachelor of Science)
- Association to Advance Collegiate Schools of Business: Business (Bachelor Science and Master of Business Administration)
- Certified Financial Planner Board of Standards: Family Financial Planning (Master of Science and Graduate Certificate)
- Commission on Accreditation for Respiratory Care: Respiratory Care (Bachelor of Science)
- Commission on Accreditation of Allied Health Education Programs: Exercise Science (Bachelor or Arts and Bachelor of Science)
- Commission on Accreditation of Athletic Training Education (CAATE): Athletic Training (Master of Athletic Training)
- Commission on Collegiate Nursing Education (CCNE): Bachelor of Science in Nursing; Master of Science in Nursing; Doctor of Nursing Practice
- Council for Interior Design Accreditation: Interior Design (Bachelor of Arts and Bachelor of Science)
- Council on Education for Public Health (CEPH): Public Health (Master of Science)
- Engineering Accreditation Commission of ABET, <http://www.abet.org>: Bachelor of Science degrees in: Agricultural and Biosystems Engineering, Civil Engineering, Computer Engineering, Construction Engineering, Electrical Engineering, Industrial Engineering and Management, Manufacturing Engineering, Mechanical Engineering
- Institute of Food Technologists: Food Science (Bachelor of Science)
- Joint Review Committee for Education in Radiologic Technology: Radiologic Sciences (Bachelor of Science)<sup>2</sup>
- Landscape Architecture Accreditation Board: Bachelor of Landscape Architecture
- National Accrediting Agency for Clinical Laboratory Science: Medical Laboratory Science (Bachelor of Science)<sup>3</sup>
- National Architectural Accrediting Board: Bachelor of Science in Architecture and Master of Architecture
- National Association for the Education of Young Children: Center for Child Development
- National Association of Schools of Art and Design: Visual Arts (Bachelor of Fine Arts, Bachelor of Arts and Bachelor of Science) and Interior Design (Bachelor of Arts and Bachelor of Science)
- National Association of Schools of Music: Music (Bachelor of Arts, Bachelor of Science, Bachelor of Music, Master of Music, Master of Music in Music Education, Doctor of Musical Arts)
- National Association of Schools of Theatre: Theatre (Bachelor of Fine Arts, Bachelor of Arts and Bachelor of Science)
- National Council for Accreditation of Teacher Education (NCATE): Teacher Education (Bachelor of Arts, Bachelor of Science, Master of Education and Master of Science); Education Administration (Master of Education and Master of Science); Counselor Education (Master of Education and Master of Science)
- National Council for Accreditation of Counseling and Related: School and Clinical Mental Health (Master of Education and Master of Science); Counselor Education and Supervision (Doctor of Philosophy)

<sup>1</sup> NDSU affiliates with 5 ASHP accredited programs that hold primary responsibility for accreditation.

<sup>2</sup> NDSU affiliates with 10 JRCERT accredited hospital-based programs that hold primary responsibility for accreditation.

<sup>3</sup> NDSU affiliates with 6 NAACLS accredited hospital-based programs that hold primary responsibility for accreditation.

## Officers of Agencies Associated with the University

- Lynette Flage, Assistant Director, Family and Community Wellness (<https://www.ag.ndsu.edu/extension/directory/fcs>)
- John Glover, President and CEO, NDSU Foundation and Alumni Association (<https://www.ndsufoundation.com>)
- Jill Motschenacher, Ph.D., Acting Director, Office of Teaching and Learning (<https://www.ndsu.edu/otl>)
- Tom Claeys, State Forester, North Dakota Forest Service (<https://www.ag.ndsu.edu/ndfs>)
- Mark Jirik, Director, Northern Crops Institute (<http://www.northern-crops.com>)
- Brian Kalk, Ph.D., Executive Director, Research Technology Park (<https://www.ndsuresearchpark.com>)
- Kenneth Bertsch, B.S., Commissioner, State Seed Department (<http://www.nd.gov/seed>)
- Timothy Flakoll, M.S., Provost, Tri-College University (<https://www.tri-college.org>)
- Denver Tolliver, Ph.D., Director, Upper Great Plains Transportation Institute (<http://www.ugpti.org>)

## State Board of Higher Education

Created by constitutional amendment in 1939, the State Board of Higher Education (<https://www.ndus.edu/board>) is the governing body of North Dakota State University and all other state supported institutions of higher education in North Dakota. The nine-member State Board of Higher Education is the policy-setting body for the North Dakota University System and consists of seven citizen members who serve four-year terms and who are appointed by the governor, one student who is also appointed by the governor for a one-year term, and one faculty member who is selected by the Council of College Faculties. The board's chief executive officer is the chancellor of the North Dakota University System, with offices in the state capitol in Bismarck. More information regarding the State Board of Higher Education, including members, can be found on the website.

## [www.ag.ndsu.edu/academics/](http://www.ag.ndsu.edu/academics/)

Academic programs in the College of Agriculture, Food Systems, and Natural Resources open doors to exciting and rewarding career and professional opportunities. Agriculture is the foundation upon which NDSU was established in the late 1800s. Today, the college builds on that tradition with teaching, research, and outreach that serves the interests of students and the needs of employers, fuels an economic engine critical to the United States, and improves the lives of people throughout the region and the world.

## Mission and Values

The college provides relevant and challenging academic programs that prepare students to capitalize on current and future opportunities. Programs are based on fundamental sciences and technologies applied to agricultural life and environmental disciplines as well as related social and economic fields.

NDSU Agriculture, Food Systems and Natural Resources is taking its place as one of the nation's leaders. Our commitment to excellence has inspired new courses of study and has built ongoing partnerships with agricultural industries and government agencies.

Demand for graduates with expertise in the college's many disciplines continues to grow rapidly. Career opportunities for men and women are expanding into new areas made possible by new technologies and a more comprehensive global perspective.

Food safety and security, biotechnology and genetics, sustainable production and land stewardship, bio-energy and bio-products, and human/animal health are emerging national priorities. Our faculty are at the forefront of these and similar critical issues. Our students can engage their interests while gaining valuable hands-on learning experiences in the field, laboratories, and through interactions with business partners across the region.

## Agricultural Education

NDSU is designated by the State Board for Career and Technical Education as the recognized institution for preparing teachers of Agricultural Education. While the degree program in Agricultural Education is offered by the College of Human Development and Education, students may pursue their degree in Agricultural Education by doing a major in General Agriculture (College of Agriculture, Food Systems and Natural Resources) and a degree in Agricultural Education (College of Human Development and Education). Pursuit of both majors should not increase the total number of credits needed to obtain the degree. Generally, students will start with the major in General Agriculture and add the major in Agricultural Education prior to requesting admittance into the Teacher Education program. The adviser in Agricultural Education will generally serve as the academic adviser from matriculation to completion so there is not a need to change advisers when the major in Agricultural Education is added. See the School of Education (p. 1093) section in this Bulletin under Agricultural Education for more information.

## Interdisciplinary Studies and Affiliated Programs

The college contributes strongly to interdisciplinary studies in natural resources management, food safety, logistics management, and several graduate programs. A major in Agricultural and Biosystems Engineering is offered by the College of Engineering (p. 40). The College of Human Sciences and Education (p. 49) offers a major in Agricultural Education and the College of Arts, Humanities, and Social Sciences (p. 30) offers a major in Agricultural Communication. These majors rely on the expertise and resources from the College of Agriculture, Food Systems, and Natural Resources.

## Pre-Veterinary Medicine

NDSU offers excellent programs that prepare students for application to a college of veterinary medicine. All veterinary schools stress the importance of high scholastic standing and judge applicants on academic preparation, knowledge of the veterinary profession, experience and character.

Because the number of students admitted to veterinary schools is limited, prospective students should check the specific requirements of the college of their choice well in advance to make certain that preparatory work is appropriate.

Pre-veterinary medicine is not a specific major, and students are encouraged to pursue a major in their area of interest while at NDSU. In addition, students preparing for application to a veterinary school should consult with a pre-veterinary medicine advisor. Although a student may pursue a wide variety of majors while completing the pre-veterinary requirements, we recommend a major in Microbiology (p. 582) or Animal Science (p. 192) with the Animal Biomedical Sciences option.

Students who are admitted to and plan to enroll in a Veterinary Medical College prior to earning a baccalaureate degree from NDSU should consult with their academic adviser for options on transferring veterinary medicine credit back to NDSU to fulfill bachelor's degree requirements.

## Graduate and Professional Schools

The college's academic programs are excellent preparation for continued formal education in graduate school programs and in professional schools offering degrees in business, law, medicine or veterinary medicine. For more information on graduate school opportunities at NDSU see the Graduate School (<https://www.ndsu.edu/gradschool>) web site.

## Scholarships

Students in the college who have selected one of the college's majors may be eligible for scholarships through their major department and/or the dean's office. Scholarships are awarded to students who have demonstrated excellence in their courses. About one-third of students in the college receive scholarships. Students are encouraged to contact their major department or the college web site for scholarship opportunities (<http://www.ag.ndsu.edu/academics/scholarships>).

## Student Organizations

Nearly 30 agriculture-related clubs and organizations (<http://www.ag.ndsu.edu/academics/student-organizations>) provide opportunities for students to develop leadership, teamwork, interpersonal and communication skills.

## Field Experience, Internships, Cooperative Education

Students gain practical experience and credits by enrolling in a supervised field experience (internship) offered through individual departments. Another option, offered by the Career Center (<https://www.ndsu.edu/career>), provides undergraduate and graduate students with career-enhancing experiences and academic credits through the Cooperative Education program (<https://career.ndsu.edu/internship-program>). The number of cooperative education credits allowed for graduation varies by program, but should not exceed six for any program in the college.

## International Study

The college encourages students to gain international perspectives in their studies. Besides study abroad, students might consider adding the international studies major to their program in the college. Additional information is available from departmental offices or through the university's Office of International Student and Study Abroad Services (<https://www.ndsu.edu/international>).

## Faculty

- Akyuz, F. Adnan, Professor of Climatological Practices , Ph.D., 1994, University of Missouri-Columbia
- Backer, Leslie F., Emeritus Professor of Agricultural and Biosystems Engineering, M.S., 1972, North Dakota State University
- Bandillo, Nonoy B., Assistant Professor of Plant Sciences, Ph.D., 2016, University of Nebraska
- Banerjee, Samiran, Assistant Professor of Microbiological Sciences, Ph.D., 2012, University of Saskatchewan
- Bangsund, Dean, Research Scientist, M.S., 1987, North Dakota State University
- Barker, William T., Emeritus Professor of Range Science, Ph.D., 1968, University of Kansas
- Bauer, Marc L., Associate Professor of Animal Sciences; Interim Department Head, Ph.D., 1996, University of Kentucky
- Berg, Eric P., Professor of Animal Sciences, Ph.D., 1996, Purdue University
- Berg, Erika L., Associate Professor of Animal Sciences, Ph.D., 2006, University of Missouri
- Berg, Paul T., Emeritus Associate Professor of Animal Sciences, Ph.D., 1975, North Dakota State University
- Bergholz, Peter , Assistant Professor of Microbiological Sciences, Ph.D., 2007, Michigan State University
- Bergholz, Teresa , Associate Professor of Microbiological Sciences, Ph.D., 2007, Michigan State University
- Berglund, Duane R., Emeritus Professor of Plant Sciences, Ph.D., 1971, North Dakota State University
- Berry, Eugene , Emeritus Associate Professor of Microbiological Sciences, Ph.D., 1983, Northeastern University
- Berti, Marisol T., Professor of Plant Sciences, Ph.D., 2007, North Dakota State University
- Biondini, Mario E., Emeritus Professor of Range Science, Ph.D., 1983, Colorado State University

- Boe, Arthur A., Emeritus Professor of Plant Sciences, Ph.D., 1966, Utah State University
- Boetel, Mark A., Professor of Entomology, Ph.D., 1996, South Dakota State University
- Bon, Thomas A., Associate Professor of Practice of Agricultural and Biosystems Engineering, Ph.D., 2003, North Dakota State University
- Borowicz, Pawel P., Research Assistant Professor, Ph.D., 2007, North Dakota State University, DVM, 2001, University of Agriculture, Lublin, Poland
- Brun, Lynn J., Emeritus Professor of Soil Science, Ph.D., 1972, Kansas State University
- Buchanan, David S., Professor of Animal Sciences; Associate Dean for Academic Programs, Ph.D., 1979, University of Nebraska-Lincoln
- Bullock, David, Research Associate Professor of Agribusiness and Applied Economics, Ph.D., 1989, Iowa State University
- Byrd, Christopher J., Assistant Professor of Animal Science, Ph.D., 2018, Purdue University
- Cai, Xiwen, Professor of Plant Sciences, Ph.D., 1998, Washington State University
- Cannayen, Iqathinathane, Assistant Professor of Agricultural and Biosystems Engineering, Ph.D., 1997, Indian Institute of Technology
- Carlson, Robert B., Emeritus Professor of Entomology, Ph.D., 1965, Michigan State University
- Casey, Francis X.M., Professor of Soil Science; Director of the School of Natural Resource Sciences; Associate Director of the NDAES, Ph.D., 2000, Iowa State University
- Caton, James, Assistant Professor of Agribusiness and Applied Economics, Ph.D., 2016, George Mason University
- Caton, Joel S., Enberg Professor of Animal Sciences, Ph.D., 1987, New Mexico State University
- Chatterjee, Amitava, Associate Professor of Soil Science, Ph.D., 2007, University of Wyoming
- Chen, Bingcan, Assistant Professor of Plant Sciences, Ph.D., 2012, University of Massachusetts, Amherst
- Christenson, Lisa A., Associate Professor of Practice of Animal Sciences; Co-Director of Veterinary Technology Program;, D.V.M., 2003, University of Minnesota
- Christoffers, Michael J., Associate Professor of Plant Sciences, Ph.D., 1998, University of Missouri-Columbia
- Cihacek, Larry J., Professor of Soil Science, Ph.D., 1979, Iowa State University
- Condry, Danielle, Assistant Professor of Practice, Ph.D., 2013, University of North Dakota
- Cross, Harold Z., Emeritus Professor of Plant Sciences, Ph.D., 1971, University of Missouri
- Dahlen, Carl R., Associate Professor of Animal Sciences, Ph.D., 2009, University of Minnesota
- Dahnke, William C., Emeritus Professor of Soil Science, Ph.D., 1962, University of Wisconsin
- Dai, David W., Professor of Plant Sciences, Ph.D., 2001, North Dakota State University
- Daigh, Aaron, Assistant Professor of Soil Science, Ph.D., 2013, Iowa State University
- Danielson, Russell B., Emeritus Associate Professor of Animal Sciences, M.S., 1973, North Dakota State University
- D'Appolonia, Bert L., Emeritus Professor of Cereal Science, Ph.D., 1968, North Dakota State University
- Deckard, Edward L., Professor of Plant Sciences, Ph.D., 1970, University of Illinois
- Deibert, Edward J., Emeritus Professor of Soil Science, Ph.D., 1976, University of Nebraska
- DeKeyser, Shawn, Professor of Range Science; Director of Natural Resources Management Interdisciplinary Program; Program Leader of Natural Resource Management, Ph.D., 2000, North Dakota State University
- del Rio Mendoza, Luis, Professor of Plant Pathology, Ph.D., 1999, Iowa State University
- DeSutter, Thomas M., Professor of Soil Science; Program Leader of Soil Science, Ph.D., 2004, Kansas State University
- Dexter, Alan G., Emeritus Professor of Plant Sciences, Ph.D., 1969, University of Illinois
- Disrud, Lowell A., Emeritus Professor of Agricultural and Biosystems Engineering, M.S., 1969, Kansas State University
- Dodds, Duaine L., Emeritus Professor of Animal Sciences, M.S., 1966, North Dakota State University
- Dorsam, Glenn, Associate Professor of Microbiological Sciences, Ph.D., 1998, Virginia Commonwealth University
- Duysen, Murray E., Emeritus Professor of Plant Sciences, Ph.D., 1966, University of Nebraska
- Dyer, Neil W., Professor of Animal Sciences, D.V.M., 1991, Iowa State University
- Eck, Tate, Lecturer of Equine Science, B.S., 1996, North Dakota State University
- Elias, Elias M., University Distinguished Professor of Plant Sciences; J.F. Carter Durum Wheat Breeding/Genetics Endowed Professor, Ph.D., 1987, North Dakota State University
- Englund, David, Lecturer of Agribusiness and Applied Economics, M.S., 1997, South Dakota State University
- Enz, John W., Emeritus Professor of Soil Science, Ph.D., 1976, University of Minnesota
- Erickson, Duane O., Emeritus Professor of Animal Sciences, Ph.D., 1965, North Dakota State University
- Fanning, Carl D., Emeritus Professor of Soil Science, Ph.D., 1965, University of Wisconsin
- Flaskerud, George, Emeritus Professor of Agribusiness and Applied Economics, Ph.D., , Florida State University
- Flores, Paulo, Assistant Professor of Agricultural and Biosystems Engineering, Ph.D., 2008, Federal University of Rio Grande do Sul
- Foster, Stephen P., Professor of Entomology, Ph.D., 1983, University of Waikato-New Zealand
- Franckowiak, Jerome D., Emeritus Professor of Plant Sciences, Ph.D., 1970, University of Wisconsin-Madison
- Franzen, David W., Professor of Soil Science; Extension Soil Specialist, Ph.D., 1993, University of Illinois

- Freeman, Thomas P, Emeritus Professor of Plant Pathology, Ph.D., 1968, Arizona State University
- Friskop, Andrew J., Associate Professor of Plant Pathology, Ph.D., 2013, North Dakota State University
- Frohberg, Richard C., Emeritus Professor of Plant Sciences, Ph.D., 1964, Iowa State University
- Gasch, Caley, Assistant Professor of Soil Science, Ph.D., 2013, University of Wyoming
- Gibbs, Penelope , Associate Professor of Microbiological Sciences, Ph.D., 2001, Univeristy of Georgia
- Giles, Joseph F., Emeritus Professor of Soil Science, Ph.D., 1974, Colorado State University
- Gill, Upinder, Assistant Professor of Plant Pathology, Ph.D., 2012, Washington State University
- Goos, R. Jay, Professor of Soil Science, Ph.D., 1980, Colorado State University
- Gordon, Dennis, Emeritus Professor of Cereal Science, Ph.D., 1974, University of Connecticut
- Grafton, Kenneth F., Professor of Plant Sciences; , Ph.D., 1980, University of Missouri
- Gramig, Greta G., Associate Professor of Plant Sciences, Ph.D., 2006, University of Wisconsin-Madison
- Grazul-Bilska, Anna, Emeritus Professor of Animal Sciences, Ph.D., 1983, University of Agriculture and Technology, Olstyn, Poland
- Green, Andrew J., Assistant Professor of Plant Sciences, Ph.D., 2016, Kansas State University
- Grygiel, Carolyn E., Emeritus Professor of Practice of Range Science, Ph.D., 1983, Colorado State University
- Gudmestad, Neil C., University Distinguished Emeritus Professor of Plant Pathology , Ph.D., 1982, North Dakota State University
- Gustad, Thomas , Instructor; Microbiological Sciences, M.S., 1992, North Dakota State University
- Hammed, Ademola, Research Assistant Professor, Ph.D., 2014, International Islamic University Malaysia
- Hammer, Carolyn J., Professor of Animal Sciences; Director of Equine Science, D.V.M., 2002, Iowa State University, Ph.D., 2003, Iowa State University
- Hanna, Lauren L.H., Associate Professor of Animal Sciences, Ph.D., 2013, Texas A&M University
- Hanson, Erik, Assistant Professor of Agribusiness and Applied Economics, Ph.D., 2016, University of Minnesota
- Hargiss, Christina L., Associate Professor of Natural Resources Management , Ph.D., 2009, North Dakota State University
- Harmon, Jason P., Associate Professor of Entomology; Program Leader of Entomology, Ph.D., 2003, University of Minnesota
- Harris, Marion O., Professor of Entomology, Ph.D., 1986, Michigan State University
- Harrold, Robert L., Emeritus Professor of Animal Sciences, Ph.D., 1967, Purdue University
- Hatterman-Valenti, Harlene, Professor of Plant Sciences; Assistant Department Head , Ph.D., 1993, Iowa State University
- Haugen, Ronald, Extension Farm Management Specialist, M.S., 1989, North Dakota State University
- Haugse, Clayton N., Emeritus Professor of Animal Sciences, M.S., 1958, North Dakota State University
- Hearne, Robert, Professor of Agribusiness and Applied Economics, Ph.D., 1995, University of Minnesota
- Hellevang, Kenneth, Professor of Agricultural and Biosystems Engineering, Ph.D., 1989, North Dakota State University
- Helms, Theodore C., Professor of Plant Sciences, Ph.D., 1986, Iowa State University
- Herman, Dale E., Emeritus Professor of Plant Sciences, Ph.D., 1966, Purdue University
- Herren, R. Stanley, Emeritus Professor of Agribusiness and Applied Economics, Ph.D., 1975, Duke University
- Hirning, Harvey J., Emeritus Professor of Agricultural and Biosystems Engineering, Ph.D., 1970, Iowa State University
- Hoffman, Travis W., Assistant Professor of Animal Sciences, Ph.D., 2015, Colorado State University
- Hofman, Vernon L., Emeritus Professor of Agricultural and Biosystems Engineering, M.S., 1969, North Dakota State University
- Hopkins, David G., Associate Professor of Soil Science, Ph.D., 1997, North Dakota State University
- Horsley, Richard D., Professor of Plant Sciences; Department Head, Ph.D., 1988, North Dakota State University
- Hosford, Robert, Emeritus Professor of Plant Pathology, Ph.D., 1965, University of Arizona
- Hovick, Torre J., Assistant Professor of Range Science, Ph.D., 2014, Oklahoma State University
- Howatt, Kirk A., Associate Professor of Plant Sciences, Ph.D., 1999, Colorado State University
- Hughes, Harlan, Emeritus Professor of Agribusiness and Applied Economics, Ph.D., 1971, University of Missouri
- Ikley, Joseph T., Assistant Professor of Plant Sciences, Ph.D., 2018, Purdue University
- Jackson, Jeremy, Associate Professor of Agribusiness and Applied Economics, Ph.D., 2008, Washington University in St. Louis
- Jia, Xinhua, Professor of Agricultural and Biosystems Engineering, Ph.D., 2004, University of Arizona
- Johnson, Burton L., Professor of Plant Sciences, Ph.D., 1993, North Dakota State University
- Johnson, Carolyn R., Assistant Professor of Practice of Animal Science, D.V.M., 1986, Colorado State University
- Johnson, Robert L., Emeritus Professor of Animal Sciences, Ph.D., 1985, Iowa State University
- Johnson, Roger G., Emeritus Professor of Agribusiness and Applied Economics, Ph.D., 1962, University of Minnesota
- Kalb, II, Thomas J., Extension Horticulture Specialist, Ph.D., 1988, Virginia Polytechnic Institute and State University
- Kandel, Herman (Hans) J., Professor of Plant Sciences, Ph.D., 1995, North Dakota State University
- Khan, Khalil, Emeritus Professor of Cereal Science, Ph.D., 1977, University of Manitoba, Winnipeg, Canada

- Khan, Mohamed, Professor of Plant Pathology, Ph.D., 1998, Clemson University
- Knodel, Janet J., Professor of Plant Pathology, Ph.D., 2005, North Dakota State University
- Koo, Won W., Emeritus Professor of Agribusiness and Applied Economics, Ph.D., 1974, Iowa State University
- Kucera, Henry L., Emeritus Professor of Agricultural and Biosystems Engineering, M.S., 1959, North Dakota State University
- Lakkakula, Prithviraj, Research Assistant Professor of Agribusiness and Applied Economics, Ph.D., 2014, University of Florida
- Lardy, Gregory P., Professor of Animal Sciences; Vice President for Agricultural Affairs; Director of NDSU Extension; Director of ND Agricultural Experiment Station; Dean of College of Agriculture, Food Systems, and Natural Resources, Ph.D., 1997, University of Nebraska
- Lee, Chiwon W., Professor of Plant Sciences, Ph.D., 1977, Purdue University
- Leistriz, F. Larry, Emeritus Professor of Agribusiness and Applied Economics, Ph.D., 1970, University of Nebraska
- Leitch, Jay H., Emeritus Professor of Natural Resources Management, Ph.D., 1981, University of Minnesota
- Li, Deying M., Professor of Plant Sciences, Ph.D., 2001, Iowa State University
- Li, Xuehui, Assistant Professor of Plant Sciences, Ph.D., 2009, University of Georgia
- Lim, Siew Hoon, Associate Professor of Agribusiness and Applied Economics, Ph.D., 2005, University of Georgia
- Limb, Ryan, Associate Professor of Range Science, Ph.D., 2008, Oklahoma State University
- Lin, Zhulu, Assistant Professor of Agricultural and Biosystems Engineering, Ph.D., 2003, University of Georgia
- Lindgren, Jon G., Emeritus Professor of Agribusiness and Applied Economics, Ph.D., 1968, University of Missouri
- Lindley, James A., Emeritus Associate Professor of Agricultural and Biosystems Engineering, Ph.D., 1972, Purdue University
- Liu, Zhaohui, Associate Professor of Plant Pathology, Ph.D., 2006, North Dakota State University
- Lund, H. Roald, Emeritus Professor of Plant Sciences, Ph.D., 1965, Purdue University
- Lundstrom, Darnell R., Emeritus Professor of Agricultural and Biosystems Engineering, Ph.D., 1988, University of Minnesota
- Lym, Rodney G., Emeritus Professor of Plant Sciences, Ph.D., 1979, University of Wyoming
- Machunda, Zachary, Lecturer of Agribusiness and Applied Economics, Ph.D., 2014, Indiana University
- Maddock, Robert J., Associate Professor of Animal Sciences, Ph.D., 2000, Texas A&M University
- Maddock Carlin, Kasey R., Associate Professor of Animal Sciences, Ph.D., 2005, Iowa State University
- Manthey, Frank A., Professor of Plant Sciences, Ph.D., 1985, North Dakota State University
- Marais, G. Francois, Professor of Plant Sciences, Ph.D., 1979, North Dakota State University, Ph.D., 1992, University of Stellenbosch-South Africa
- March, Raymond, Assistant Professor of Agribusiness and Applied Economics, Ph.D., 2017, Texas Tech University
- Marchello, Martin J., Emeritus Professor of Animal Sciences, Ph.D., 1968, Virginia Polytechnic Institute and State University
- Markell, Samuel G., Professor of Plant Pathology, Ph.D., 2007, University of Arkansas
- McClean, Phillip E., Professor of Plant Sciences, Ph.D., 1982, Colorado State University
- McEvoy, John, Professor of Microbiological Sciences, Ph.D., 2002, University of Ulster
- McGinnis, Esther E., Associate Professor of Plant Sciences, Ph.D., 2013, University of Minnesota
- McGranahan, Devan, Assistant Professor of Range Science, Ph.D., 2011, Iowa State University
- McMullen, Marcia P., Emeritus Professor of Plant Pathology, Ph.D., 1983, North Dakota State University
- McMullen, Michael S., Professor of Plant Sciences, Ph.D., 1976, University of Minnesota
- Meehan, Miranda A., Assistant Professor of Animal Sciences, Ph.D., 2012, North Dakota State University
- Meinhardt, Steven, Associate Professor of Plant Pathology, Ph.D., 1984, University of Illinois-Urbana-Champaign
- Messersmith, Calvin G., Emeritus Professor of Plant Sciences, Ph.D., 1970, North Dakota State University
- Meyer, Dwain W., Emeritus Professor of Plant Sciences, Ph.D., 1970, Iowa State University
- Miljkovic, Dragan, Professor of Agribusiness and Applied Economics, Ph.D., 1996, University of Illinois
- Montanholi, Yuri R., Assistant Professor of Animal Science, Ph.D., 2009, University of Guelph
- Nahar, Nurun, Assistant Professor of Practice of Agricultural and Biosystems Engineering, Ph.D., 2017, North Dakota State University
- Nelson, Berlin D., Jr., Professor of Plant Pathology, Ph.D., 1979, Washington State University
- Nelson, Donald C., Emeritus Professor of Plant Sciences, Ph.D., 1961, University of Minnesota
- Nelson, William C., Emeritus Professor of Agribusiness and Applied Economics, Ph.D., 1971, Ohio State University
- Nganje, William, Professor of Agribusiness and Applied Economics; Department Chair, Ph.D., 1998, University of Illinois
- Norland, Jack, Associate Professor of Natural Resources Management, Ph.D., 2008, North Dakota State University
- Nowatzki, John F., Agricultural Machines Specialist, M.S., 1974, North Dakota State University
- Olhoft, Matt, Senior Lecturer of Agricultural and Biosystems Engineering, M.S., 1998, North Dakota State University
- Oliver, Rebekah E., Associate Professor of Practice in Plant Sciences, Ph.D., 2006, North Dakota State University
- Olson, Frayne, Associate Professor of Agribusiness and Applied Economics, Ph.D., 2007, University of Missouri
- O'Relley, Z. Edward, Emeritus Professor of Agribusiness and Applied Economics, Ph.D., 1972, University of Tennessee

- Osorno, Juan, M., Associate Professor of Plant Sciences, Ph.D., 2006, North Dakota State University
- Ostby, Stacey M., Lecturer of Veterinary Technology; Co-Director of Veterinary Technology Program; , M. Ed., 2018, North Dakota State University
- Parman, Bryon, Assistant Professor/Ag Finance Specialist of Agribusiness and Applied Economics, Ph.D., 2013, Kansas State University
- Pasche, Julie, Associate Professor of Plant Pathology & Neil C. Gudmestad Endowed Chair of Potato Pathology, Ph.D., 2012, North Dakota State University
- Peters, Thomas J., Assistant Professor of Plant Sciences, Ph.D., 1990, North Dakota State University
- Petry, Timothy A., Associate Professor of Agribusiness and Applied Economics; Livestock Marketing Economist, M.S., 1973, North Dakota State University
- Prischmann-Voldseth, Deirdre A., Associate Professor of Entomology, Ph.D., 2005, Washington State University
- Pruess, Birgit, Professor of Microbiological Sciences, Ph.D., 1991, Ruhr Universität Bochum Germany
- Pryor, Scott W., Professor of Agricultural and Biosystems Engineering, Associate Dean College of Engineering, Ph.D., 2005, Cornell University
- Rahman, Md. Mukhlesur, Associate Professor of Plant Sciences, Ph.D., 2007, University of Manitoba, Canada
- Rahman, Shafiqur, Associate Professor of Agricultural and Biosystems Engineering, Ph.D., 2004, University of Manitoba
- Ramamoorthy, Sheela, Associate Professor of Microbiological Sciences, Ph.D., 2006, Virginia Tech
- Ransom, Joel K., Professor of Plant Sciences, Ph.D., 1982, University of Minnesota
- Rao, Jiajia, Assistant Professor of Plant Sciences, Ph.D., 2013, University of Massachusetts, Amherst
- Rao, Xudong, Assistant Professor of Agribusiness and Applied Economics, Ph.D., 2015, University of Minnesota-Twin Cities
- Rasmussen, Jack B., Professor of Plant Pathology; Department Head, Ph.D., 1987, Michigan State University
- Rathge, Richard W., Emeritus Professor of Agribusiness and Applied Economics and Sociology, Ph.D., 1981, Michigan State University
- Rayamajhee, Veeshan, Assistant Professor of Agribusiness and Applied Economics, Ph.D., 2019, University of Mexico
- Redmer, Dale A., Emeritus Professor of Animal Sciences, Ph.D., 1983, University of Missouri-Columbia
- Reff, Tommy L., Emeritus Professor of Agribusiness and Applied Economics, M.S., 1968, North Dakota State University
- Reynolds, Lawrence P., University Distinguished Professor of Animal Sciences, Ph.D., 1983, Iowa State University
- Rice, Billy B., Emeritus Professor of Agribusiness and Applied Economics, M.S., 1965, North Dakota State University
- Richman, Rachel, Senior Lecturer of Microbiological Sciences, M.S., 2002, University of Minnesota
- Rider, David A., Professor of Entomology, Ph.D., 1988, Louisiana State University
- Ripplinger, David, Assistant Professor of Agribusiness and Applied Economics, Ph.D., 2012, North Dakota State University
- Roberts, David, Associate Professor of Agribusiness and Applied Economics, Ph.D., 2009, Oklahoma State University
- Robinson, Andrew P., Associate Professor of Plant Sciences, Ph.D., 2012, Purdue University
- Saxowsky, David M., Emeritus Professor of Agribusiness and Applied Economics, J.D., 1979, Ohio State University
- Scherer, Thomas, Associate Professor of Agricultural and Biosystems Engineering, Ph.D., 1986, University of Minnesota
- Schroeder, J.W., Emeritus Associate Professor of Animal Sciences, Ph.D., 1999, North Dakota State University
- Schrupp, Jordan L., Lecturer of Veterinary Technology; Department of Animal Sciences, B.S., 2003, North Dakota State University
- Schuh, Jane, Professor of Microbiological Sciences; Vice-President for Research and Creative Activities, Ph.D., 2000, North Dakota State University
- Schwarz, Paul B., Professor of Plant Sciences, Ph.D., 1987, North Dakota State University
- Sebesta, Steve, Foundation Seedstocks Director, M.S., 1982, Oklahoma State University
- Secor, Gary A., Professor of Plant Pathology, Ph.D., 1978, University of California-Davis
- Sedivec, Kevin K., Professor of Range Sciences; Interim Director of CGRECA, Ph.D., 1994, North Dakota State University
- Shaik, Saleem, Professor of Agribusiness and Applied Economics; Director of CAPTS, Ph.D., 1998, University of Nebraska-Lincoln
- Sharma, Anupa, Assistant Professor of Agribusiness and Applied Economics, Ph.D., 2016, Virginia Tech University
- Shetty, Kalidas, Professor of Plant Sciences; Associate VP for Global Outreach, Ph.D., 1989, University of Idaho
- Simsek, Halis, Assistant Professor of Agricultural and Biosystems Engineering, Ph.D., 2012, North Dakota State University
- Simsek, Senay, Professor; Bert L. D'Appolonia Cereal Science and Technology of Wheat Endowed Professorship, Ph.D., 2006, Purdue University
- Smith, Ronald C., Emeritus Professor of Plant Sciences, Ph.D., 1973, The Ohio State University
- Spilde, LeRoy A., Emeritus Associate Professor of Plant Sciences, Ph.D., 1975, North Dakota State University
- Stack, Robert W., Emeritus Professor of Plant Pathology, Ph.D., 1976, Cornell University
- Steele, Dean D., Associate Professor of Agricultural and Biosystems Engineering, Ph.D., 1991, University of Minnesota
- Stegman, Earl C., Emeritus Professor of Agricultural and Biosystems Engineering, Ph.D., 1965, Michigan State University
- Stokka, Gerald L., Associate Professor of Animal Sciences, D.V.M., 1982, Iowa State University
- Stoltenow, Charles L., Professor of Animal Sciences; Assistant Director and Agriculture and Natural Resources Program Leader for NDSU Extension Service, D.V.M., 1985, Iowa State University
- Sun, Xin (Rex), Assistant Professor of Agricultural and Biosystems Engineering, Ph.D., 2013, Nanjing Agricultural University
- Swanson, Kendall C., Professor of Animal Sciences, Ph.D., 2000, University of Kentucky

- Swanson, Tara J., Lecturer of Equine Science, M.S., 2014, North Dakota State University
- Thompson, Asunta (Susie) L., Associate Professor of Plant Sciences, Ph.D., 1998, University of Idaho
- Tilton, James E., Emeritus Professor of Animal Sciences, Ph.D., 1966, Oklahoma State University
- Vegi, Anuradha, Assistant Professor of Practice in Plant Sciences, Ph.D., 2008, North Dakota State University
- Venette, James R., Emeritus Professor of Plant Pathology, Ph.D., 1975, University of Minnesota
- Wachenheim, Cheryl, Professor of Agribusiness and Applied Economics, Ph.D., 1994, Michigan State University
- Wagner, Sarah A., Professor of Animal Sciences, D.V.M., 1994, Michigan State University, Ph.D., 2003, Iowa State University
- Wahl, Thomas I., Professor of Agribusiness and Applied Economics, Ph.D., 1989, Iowa State University
- Ward, Alison K., Assistant Professor of Animal Sciences, Ph.D., 2011, University of Saskatchewan
- West, Todd P., Professor of Plant Sciences; Assistant Dean, College of Agriculture, Food Systems and Natural Resources, Ph.D., 2004, Southern Illinois University
- Whited, Dean A., Emeritus Professor of Plant Sciences, Ph.D., 1967, North Dakota State University
- Wick, Abbey Foster, Associate Professor of Soil Science - Extension, Ph.D., 2007, University of Wyoming
- Wiesenborn, Dennis P., Emeritus Professor of Agricultural and Biosystems Engineering, Ph.D., 1988, Rice University
- Wilson, William W., University Distinguished Professor of Agribusiness and Applied Economics, Ph.D., 1980, University of Manitoba, Canada
- Wirt, Kelsey, Lecturer of Veterinary Technology, B.S., 2015, North Dakota State University
- Yan, Guiping, Assistant Professor of Plant Pathology, Ph.D., 2006, Washington State University
- Yonk, Ryan, Undergraduate Program Director, Ph.D., 2011, Georgia State University
- Youngs, Vernon L., Emeritus Professor of Cereal Science; USDA, Ph.D., 1965, North Dakota State University
- Zeleznik, Joseph, Extension Forestry Specialist, Ph.D., 2001, Michigan State University
- Zhang, Lei, Associate Professor of Agribusiness and Applied Economics, Ph.D., 2011, University of Texas at Dallas
- Zhang, Qi, Associate Professor of Plant Sciences, Ph.D., 2007, Kansas State University
- Zhang, Yu, Research Assistant Professor, Ph.D., 2014, Nanjing Agricultural University
- Zhang, Zhao, Research Assistant Professor, Ph.D., 2015, Pennsylvania State University
- Zhong, Shaobin, Professor of Plant Pathology, Ph.D., 2000, North Dakota State University
- Zollinger, Richard K., Emeritus Professor of Plant Sciences, Ph.D., 1989, Michigan State University
- Zuk, Alan J., Associate Professor of Plant Sciences, Ph.D., 2005, Kansas State University

# College of Arts, Humanities and Social Sciences

---

[www.ndsu.edu/ahss/](http://www.ndsu.edu/ahss/)

The College of Arts, Humanities and Social Sciences embraces the teaching, research, creative activities and service objectives of NDSU's land grant mission, and the needs of a diverse constituency. The college is committed to:

- Providing its students with the highest quality of preparation in an atmosphere that promotes intellectual rigor, critical inquiry, citizenship, and creative decision-making requisite for personal growth and professional success.
- Encouraging in its faculty exemplary scholarship of teaching, research, and service, leading to significant publications, creative work and performances.
- Invigorating the tradition of outreach through enriching performance, presentation, and cultural understanding. In its vision to realize human potential and achievements, the College of Arts, Humanities and Social Sciences is guided by the qualities of creativity, ethical integrity, and mutual respect.

## Degree Programs

### B.A. or B.S. Degree Programs

Students seeking a broad educational background may choose to complete requirements for either a Bachelor of Arts or Bachelor of Science degree. Majors available for either degree include the following:

- Agricultural Communication
- Anthropology
- Art
  - Art Education
- Criminal Justice
- Emergency Management
- English
- Environmental Design
- French
- History
- Journalism
- Management Communication
- Music
  - Music Education
- New Media and Web Design
- Philosophy-Humanities
- Political Science
  - Pre-Law
  - Public Service
- Public History
- Social Science
- Sociology
- Spanish
- Strategic Communication
- Theatre Arts
- Women and Gender Studies

### B.S.Arch. Degree

The Bachelor of Science in Architecture is granted after the fourth year of study in the Architecture program, and typically is earned by students in pursuit of the professional Master of Architecture.

### B.L.A. Degree

The Bachelor of Landscape Architecture is offered within the School of Architecture and Landscape Architecture.

## B.F.A. Degree

A Bachelor of Fine Arts degree is offered in the disciplines of Theatre Arts and Art.

## B.Mus. Degree

A Bachelor of Music degree is available within the Challey School of Music (p. 589).

## B.U.S. Degree

A Bachelor of University Studies degree is for students who are seeking a non-traditional, interdisciplinary education and wishing to tailor their own degree.

## Graduate Degrees

Master's degrees are offered in Anthropology, Architecture, Emergency Management, English, History, Landscape Architecture, Mass Communication, Music, Political Science, Social Science, Sociology and Speech Communication. Doctoral degrees are offered in Communication, Criminal Justice, Emergency Management, English, History, and Music. For more complete details, see the Graduate Bulletin (<http://bulletin.ndsu.edu/graduate>).

## Teacher Certification

Many of the majors available through the College of Arts, Humanities and Social Sciences lead to careers in teaching. Students who are interested in becoming professional educators should refer to the degree program offered through the School of Education. However, a Music Education option is offered under the B.Mus. degree in Music and an Art Education degree are both available within the College of Arts, Humanities and Social Sciences. K-12 certification is available in Music Education. Teacher certification at the secondary level is available in the following areas: English, French, History, Social Science, and Spanish.

Students interested in teacher education are encouraged to declare a double major in their discipline and in education (i.e. History and History Education). Such double majors may typically be earned by successful completion of a few additional credits. Students should contact their advisers or the Office of Registration and Records for details. Students are encouraged to declare their primary and secondary majors by submitting an online Major Change Form available on the Office of Registration and Records web site.

## Undergraduate Degree Requirements

All degree candidates must apply for graduation through the Office of Registration and Records (<https://www.ndsu.edu/registrar>) according to university procedures and deadlines. Students should refer to the degree and graduation requirements (p. 122) section of this bulletin.

Bachelor of Science degree requirements include completion of an approved minor. Bachelor of Arts degree requirements include proficiency of one foreign language at the second-year college level. For more information on how to fulfill a B.A. requirement using a second language (p. 124), refer to the Academic Policies (p. 66) section of this bulletin.

Students in the college may take courses under the pass/fail option for free elective credits only, with a limit of 16 hours.

See College Requirements (p. 32) for additional information on requirements that satisfy the college requirements.

## Field Experience Courses

Departments may adopt either pass/fail or letter grade options for Field Experience/ Internships.

- Where Field Experience/Internship credits are a requirement of a program, these credits may be graded pass/fail to satisfy requirements for a major.
- Where Field Experience/Internship credits are not a requirement of a program, up to three credits may be graded pass/fail to satisfy requirements for a major.

## Right of Petition

Students seeking deviation from any academic rules and regulations administered by the college may appeal in writing to the College's Committee on Student Progress. Pre-Professional Curricula Requirements for admission to most professional academic programs may be met at NDSU. The specific courses taken in a pre-professional program depend primarily upon the admission requirements of the program to which a student wishes to apply.

School of Architecture & Landscape Architecture (<http://bulletin.ndsu.edu/departments/architecture-landscape>)

Communication (p. 1088)

Criminal Justice (p. 1092)

Division of Performing Arts (<https://www.ndsu.edu/performingarts/music>)

- Challey School of Music (p. 1115)
- Theatre Arts (p. 1129)

Emergency Management (p. 1098)

English (p. 1099)

History, Philosophy & Religious Studies (p. 1103)

Modern Languages (p. 1113)

Political Science & Public Policy (p. 1125)

Sociology & Anthropology (p. 1127)

Visual Arts (p. 1131)

## Arts, Humanities and Social Sciences College Requirements

An additional 9 credits are required by the College of Arts, Humanities and Social Sciences for all Bachelor of Science and Bachelor of Arts degree programs of study, except the Bachelor of Fine Arts degree, the Bachelor of Music degree, the Bachelor of Science in Architecture degree, and the Bachelor of Science degree with a major in Environmental Design:

Code	Title	Credits
<b>AH&amp;SS College Requirements</b>		
Courses used to satisfy any general education requirement cannot be used to also count toward the AH&SS College Requirements. A minimum of three credits is required in each of the 3 following areas for a total of 9 credits. Choose only those courses with the prefixes listed for each area. A course with the WGS prefix can only be used in one area.		
<b>Area One: Humanities</b>		3
ARB, ENGL, FREN, GERM, HIST, HUM, PHIL, RELS, SPAN, or WGS		
<b>Area Two: Social Sciences</b>		3
ANTH, CJ, COMM, EMGT, POLS, SOC, or WGS		
<b>Area Three: Fine Arts</b>		3
ARCH, ART, ENVD, LA, MUSC, or THEA		
Total Credits		9

## Arts, Humanities, and Social Sciences

### Degree Requirements

**Bachelor of Science (B.S.) Degree** – The completion of a minor program of study, a second major, or a second degree is required.

**Bachelor of Arts (B.A.) Degree** – Second year language proficiency at college level required.

Requirements for specialized degrees are listed with each major:

#### Bachelor of Architecture (B.S.Arch)

**Bachelor of Fine Arts (B.F.A.)** - available in Art, Design and Tech Theatre, Musical Theatre, or Performance

#### Bachelor of Music (B.Mus.)

## Faculty

- Aly Ahmed, Bakr, Associate Professor of Architecture and Landscape Architecture, M.Arch., 1990, Minia University, Egypt, Ph.D., 2002, Virginia Tech
- Ambrosio, Thomas, Professor of Political Science, Ph.D., 2000, University of Virginia
- Anderson, Gerald D., Emeritus Professor of History, Ph.D., 1973, University of Iowa
- Andrianova, Anastasiya, Assistant Professor of English, Ph.D., 2011, The Graduate Center of the City University of New York
- Archbold, Carol A., Professor of Criminal Justice, Ph.D., 2002, University of Nebraska-Omaha
- Arnold, Lisa, Assistant Professor of English, Director of First-Year Writing, Ph.D., 2011, University of Louisville
- Baggett, Ashley, Assistant Professor of History, Ph.D., 2014, Louisiana State University
- Barnhouse, Mark, Associate Professor of Practice of Architecture and Landscape Architecture, M.Arch., 1988, Pratt Institute

- Barrett, Tracy C., Associate Professor of History, Ph.D., 2007, Cornell University
- Bauroth, Nicholas G., Associate Professor of Political Science, Ph.D., 2003, Loyola University
- Beck, Stephenson J., Associate Professor and Head of Communication, Ph.D., 2008, University of Kansas
- Bell, Thomas, Lecturer of German, Ph.D., 2017, University of Washington, Seattle.
- Benton, Bradley, Associate Professor of History, Ph.D., 2012, University of California, Los Angeles
- Bergeson, Brady, Senior Lecturer of English, M.F.A., 2006, Hamline University
- Bertolini, Alison Graham, Assistant Professor of English and Women and Gender Studies, Ph.D., 2009, Louisiana State University
- Bertolini, C. David, Dean and Professor of Architecture and Landscape Architecture, Ph.D., 2008, Temple University
- Bishop, Carol K., Lecturer and Coordinator of Intensive English Language Program, M.A., 1988, University of California, Los Angeles
- Blankenship, Anne, Assistant Professor of Religious Studies, Ph.D., 2012, University of North Carolina at Chapel Hill
- Bonfield, June P., Emerita Professor of English, Ph.D., 1969, University of Texas
- Booker, Darryl, Associate Professor of Architecture and Landscape Architecture, M.Arch., 1979, University of Colorado
- Boonstoppel, Sarah, Assistant Professor of Criminal Justice, Ph.D., 2014, University of Maryland, College Park
- Bovard, Richard W., Emeritus Professor of English, Ph.D., 1973, University of Denver
- Brekke, Jeremy, Associate Professor of Music, D.A., 2004, University of Northern Colorado
- Briggs, Steven, Associate Professor of Criminal Justice, Ph.D., 2007, University of Nebraska at Omaha
- Bromley, Kimble A., Professor of Visual Arts, M.F.A., 1986, Southern Illinois University
- Brown, Muriel J., Emerita Professor of English, Ph.D., 1971, University of Nebraska
- Brunton, Bill B., Emeritus Professor of Anthropology, Ph.D., 1974, Washington State University
- Bumgarner, Jeffrey, Professor of Criminal Justice and Head of the Department of Criminal Justice and Political Science, Ph.D., 2000, University of Minnesota
- Burnett, Ann, Professor of Communication; Director of Women and Gender Studies, Ph.D., 1986, University of Utah
- Burt, Sean, Assistant Professor of History and English, Ph.D., 2011, Texas Christian University
- Callens, Melissa Vosen, Assistant Professor of Practice of Communication, Ph.D., 2010, North Dakota State University
- Cameron, Kelly, Lecturer of English, Ph.D., 2011, Texas Christian University
- Carlson, Natalie Smith, Lecturer of English, M.A., 2010, North Dakota State University
- Cavins, Jo Wana, Senior Lecturer of English, B.A., 1979, University of Evansville, Indiana
- Christensen, Ryan, Lecturer of English, M.F.A., 2012, Minnesota State University-Moorhead
- Clark, Jeffrey T., Emeritus Professor of Anthropology; Ph.D., 1987, University of Illinois
- Collins, Ross F., Professor of Communication, Ph.D., 1992, University of Cambridge, Britain
- Cooley, Dennis R., Professor of Philosophy, Ph.D., 1995, University of Rochester
- Corwin, Patricia A., Senior Lecturer of Sociology, M.A., 1972, North Dakota State University
- Cosgrove, William E., Emeritus Professor of English, Ph.D., 1972, University of Iowa
- Cox, John K., Professor of History, Ph.D., 1995, Indiana University
- Crawford, Elizabeth Crisp, Associate Professor of Communication, Ph.D., 2007, University of Tennessee, Knoxville
- Creese, John, Assistant Professor of Anthropology, Ph.D., 2011, University of Toronto
- Crutchfield, David, Associate Professor of Architecture and Landscape Architecture, M.Arch., 2004, University of Texas
- Cwiak, Carol, Associate Professor of Emergency Management, J.D., 1995, Western State University
- Danbom, David B., Emeritus Professor of History, Ph.D., 1974, Stanford University
- Devine, Marc, Assistant Professor of Theatre Arts, M.F.A., 2013, Naropa University
- Disrud, Stephen, Lecturer of Intensive English Language Program, M.A., 2004, North Dakota State University
- Emanuelson, Pamela E., Associate Professor of Sociology, Ph.D., 2008, University of South Carolina
- Engler, Mark, Associate Professor and Head of Theatre Arts, M.F.A., 1998, University of Wisconsin-Madison
- Faulkner, Don C., Professor of Architecture and Landscape Architecture, M.Arch., 1975, University of Utah
- Fawcett, Erienne, Lecturer and Assistant Director of Women and Gender Studies, M.A., 2011, North Dakota State University
- Fellows, Kristen, Assistant Professor of Sociology and Anthropology, Ph.D., 2013, University of Pennsylvania
- Fier, Tiffany, Assistant Professor of Theatre Arts, M.F.A., 2007, Purdue University
- Fischer, Dominic, Assistant Professor of Architecture and Landscape Architecture, M.L.A., 2011, The Bernard and Anne Spitzer School of Architecture at the City College of New York
- Fischer, Heather, Lecturer of Architecture and Landscape Architecture, B.Arch., 2005, North Dakota State University
- Flood, Anthony, Associate Professor of Philosophy, Ph.D., 2003, University of Oklahoma
- Fricker, Linda M., Senior Lecturer of English; Director of Advising & Student Support, C.A.S., 1986, Northern Illinois University

- Froelich, Andrew I., Emeritus Professor of Music, D.M.A., 1988, Michigan State University
- Gleye, Paul, Professor of Architecture and Landscape Architecture, Ph.D., 1983, University of California-Los Angeles
- Goldwyn, Adam, Assistant Professor of English, Ph.D., 2010, Graduate Center of the City University of New York
- Goreham, Gary A., Professor of Sociology; Ph.D., 1985, South Dakota State University
- Groberg, Kristi A., Associate Professor of Visual Arts, Ph.D., 1999, University of Minnesota
- Groves, Robert W., Professor of Music, Ph.D., 1981, University of Iowa
- Grueb, Charlott, Assistant Professor of Architecture and Landscape Architecture, M. Arch., 1992, Kunstakademie, Dusseldorf
- Hageman, Jeanne K., Associate Professor of French, Director of International Studies; Ph.D., 1991, University of Wisconsin-Madison
- Hanson-Dittmer, Louise, Lecturer of English, M.Ed., 1998, North Dakota State University
- Harvey, Mark, Professor and Head of History, Philosophy and Religious Studies; Ph.D., 1986, University of Wyoming
- Hassel, Holly, Professor of English, Ph.D., 2002 University of Nebraska-Lincoln
- Hatlen, Vincen, Emeritus Professor of Architecture and Landscape Architecture, M. Arch, 1963, University of Michigan
- Hawley, D. Carlton, Associate Professor of Spanish, Ph.D., 1999, University of Iowa
- Helgeland, John A., Emeritus Professor of History and Religion, Ph.D., 1973, University of Chicago
- Helstern, Linda, Emerita Professor of English, Ph.D., 2001, Southern Illinois University
- Homan, Paul W., Emeritus Professor of French, Ph.D., 1988, University of Kansas
- Isern, Thomas D., Distinguished Professor of History, Ph.D., 1977, Oklahoma State University
- Jenkinson, Harold L., Emeritus Professor of Architecture and Landscape Architecture, M.Arch., 1972, University of Illinois
- Jensen, Jessica A., Associate Professor and Head of Emergency Management, Ph.D., 2010, North Dakota State University
- Johnson, Donald F., Assistant Professor of History, Ph.D., 2015, Northwestern University
- Johnson, Sigurd, Associate Professor of Music; Director of Sports Bands, D.M.A., 1999, University of Memphis
- Johnston, Eunice, Senior Lecturer of English; Academic Advisor for English, M.A., 1982, North Dakota State University
- Jones, Robert J., Professor of Music, D.M.A., 1991, University of Oklahoma
- Jung, Jessica, Assistant Professor of Theatre Arts, M.F.A., 2011, De Paul University
- Justitz, Gerritdina, Emerita Professor of History, Ph.D., 1996, University of California, San Diego
- Kapplinger, Kent, Professor of Visual Arts, M.F.A., 1991, University of Iowa
- Kelley, Suzzanne, Assistant Professor of Practice, Editor in Chief, North Dakota State University Press, Ph.D., 2010, North Dakota State University
- Keogh, Cassie, Assistant Professor of Music, D.M.A., 2015, University of Oklahoma
- Kirkpatrick, Sarah, Assistant Professor of Emergency Management, Ph.D., 2013, North Dakota State University
- Kirkwood, Matthew J., Landscape Architecture Program Director and Associate Professor of Architecture and Landscape Architecture, M.Des, 1993, Harvard University
- Kitch, Travis, Lecturer of Anthropology, M.A., 2003, North Dakota State University
- Klenow, Daniel J., Professor of Emergency Management, Ph.D., 1977, University of Notre Dame
- Kloberdanz, Timothy J., Emeritus Professor of Anthropology, Ph.D., 1986, Indiana University
- Koenig, Hardy, Associate Professor of Theatre Arts, M.F.A., 1994, University of North Carolina at Greensboro
- Krishnan, Ramakrishnan S., Emeritus Professor of English, Ph.D., 1981, University of Nebraska
- Kost, Jason, Lecturer of Landscape Architecture, M.U.D. and M.L.U., 2008, University of Colorado Denver
- Larew, Donald E., Emeritus Professor of Theatre Arts, M.F.A., 1969, University of Iowa
- Larson, Jamee, Lecturer of English, M.F.A., 2013, Minnesota State University Moorhead
- Law, Bill, Assistant Director, Fine Arts; Lecturer of Music, M.A., 1994, Minnesota State University Moorhead
- Lemieux-Wottrich, Marianne, Assistant Professor of Music, D.M.A., 2012, Stony Brook University
- Lifton, Paul, Professor Emeritus of Theatre Arts, Ph.D., 1985, University of California, Berkeley
- Lindgren, H. Elaine, Emerita Professor of Sociology, Ph.D., 1970, University of Missouri
- Littlefield, Robert S., Emeritus Professor of Communication, Ph.D., 1983, University of Minnesota
- Lyons, Michael J., Emeritus Professor of History, Ph.D., 1969, University of Minnesota
- Mack, Kyle D., Associate Professor of Music, D.A., 1992, Ball State University
- Mahalingam, Ganapathy, Professor of Architecture and Landscape Architecture, Ph.D., 1995, University of Florida
- Majdik, Zoltan P., Associate Professor of Communication, Ph.D., 2008, University of Southern California
- Martens, Steve C., Emeritus Professor of Architecture and Landscape Architecture, M.Arch., 1988, University of Minnesota
- Matchie, Thomas F., Emeritus Professor of English, Ph.D., 1974, University of Wisconsin

- Maylath, Bruce, Professor of English, Ph.D., 1994, University of Minnesota
- McCall, Mary, Assistant Professor of English, 2017, Purdue University
- McDonald, Thomas D., Professor Emeritus of Criminal Justice, Ph.D., 1972, Southern Illinois University
- McEnery, Deona, Senior Lecturer of English, M.A., 2001, North Dakota State University
- Meister, Mark A., Professor of Communication Ph.D., 1997, University of Nebraska
- Mejia, Robert, Assistant Professor of Communication, Ph.D., 2012, University of Illinois at Urbana-Champaign
- Melby, Benjamin, Lecturer in English, M.A., 2006, Indiana University
- Miller, E. John, Professor of Music; Director, Division of Fine Arts, Ph.D., 1992, Northwestern University
- Miller, Jo Ann, Distinguished Professor of Music; Director of Choral Activities, D.M.A., 1989, Conservatory of Music, University of Cincinnati
- Miller, Michael M., Assistant Professor of Library Science; Germans from Russia Bibliographer, M.Ed., 1967, University of North Dakota, M.S., 1969, University of North Dakota
- Moe, Charlette, Assistant Professor of Music, D.M.A., 2008, North Dakota State University
- Monzingo, John E., Emeritus Professor of Political Science, Ph.D., 1976, Claremont Graduate School
- Moore, Jason, Lecturer of Environmental Design, M.F.A., 2005, University of Iowa
- Morris, Bradley, Senior Lecturer of Philosophy, M.A., 1992, University of Iowa
- Myer, Andrew, Assistant Professor of Criminal Justice, Ph.D., 2010, University of Cincinnati
- Nelson, Kjersten R., Associate Professor of Political Science, Ph.D., 2009, University of Minnesota-Twin Cities
- Nelson, Paul E., Emeritus Professor of Communication, Ph.D., 1968, University of Minnesota
- Nichols, Cindy J., Senior Lecturer of English, M.F.A., 1981, University of Iowa
- O'Connor, Robert, Emeritus Professor of English, Ph.D., 1979, Bowling Green State University
- Okigbo, Charles, Professor of Communication, Ph.D., 1982, Southern Illinois University
- Olfert, Warren D., Professor of Music; Director of Bands, Ph.D., 1992, Florida State University
- Olson, Robert W., Emeritus Professor of Music, D.M.A., 1973, University of Illinois
- Patnode, Matthew A., Professor of Music, D.M.A., 2000, Arizona State University
- Pearson, Carol, Emeritus Professor of Spanish; Chair, Department of Modern Languages; Ph.D., 1998, University of New Mexico
- Pearson, Judy C., Emerita Professor of Communication, Ph.D., 1975, Indiana University
- Peet, Howard D., Emeritus Professor of English, M.S., 1965, Moorhead State University
- Pemstein, Daniel, Associate Professor of Political Science, Ph.D., 2010, University of Illinois at Champaign-Urbana
- Perett, Marcela, Assistant Professor of History, Ph.D., 2009, The Medieval Institute, University of Notre Dame
- Peterson, Michelene, Lecturer of Intensive English Program, M.S., 2006, Portland State University
- Peterson, Larry R., Emeritus Professor of History, Ph.D., 1978, University of Minnesota
- Platt, Carrie Anne, Associate Professor of Communication and Associate Dean, Ph.D., 2008, University of Southern California
- Pull, Mary E., Senior Lecturer of English; Director of Center for Writers, M.A., 2003, North Dakota State University
- Query, Joy M., Emerita Professor of Sociology and Psychology, Ph.D., 1960, University of Kentucky
- Ramsay, Ronald L.M., Associate Professor of Architecture and Landscape Architecture, M.Arch., 1992, University of Texas, Austin
- Rathge, Richard W., Emeritus Professor of Sociology and Agribusiness and Applied Economics; Ph.D., 1981, Michigan State University
- Richardson, B. Lou, Emerita Professor of Mass Communication, M.S., 1966, North Dakota State University
- Richardson, Gerald A., Emeritus Professor of Mass Communication, M.A., 1967, University of Washington
- Riley, Thomas J., Emeritus Professor of Anthropology, Ph.D., 1973, University of Hawaii
- Ryan, Anneli, Lecturer in English as a Second Language, M.S., 2012, Minnesota State University Moorhead
- Saar, Cynthia L., Senior Lecturer of French, M.A., 1980, Middlebury College
- Sandland, Julie A., Senior Lecturer of English, M.A., 1990, North Dakota State University
- Sassi, Enrico, Senior Lecturer of English, M.F.A., 1997, University of Alaska, Fairbanks
- Sassi, Kelly, Associate Professor of English, Ph.D., 2008, University of Michigan
- Schwaen, Regin, M.A.A., Associate Professor of Architecture and Landscape Architecture, M.Arch., 1992, Arkitektskolen i Aarhus, Denmark
- Shaw, Richard M., Emeritus Professor of English, Ph.D., 1985, Ball State University
- Sherman, William C., Emeritus Professor of Sociology, M.A., 1965, University of North Dakota
- Slobin, Kathleen, Emerita Professor of Sociology, Ph.D., 1991, University of California, San Francisco
- Smith, Angela, Associate Professor of History, Ph.D., 2011, Middle Tennessee State University
- Smith, Leretta, Lecturer of Sociology, Ph.D., 2006, South Dakota State University
- Stark, Andrew, Assistant Professor of Practice of Visual Arts, M.F.A., 2009, University of North Dakota
- Stichman, Amy J., Associate Professor of Practice in Criminal Justice, Ph.D., 2003, University of Cincinnati

- Stickney, Gwen, Associate Professor of Spanish, Chair of Department of Modern Languages; Ph.D., 2004, Indiana University, Bloomington
- Strand, Michael J., Professor and Department Head of Visual Arts, M.F.A, 1999, University of Nebraska, Lincoln
- Strandness, Jean, Emerita Professor of English, Ph.D., 1974, Michigan State University
- Sublett, Virginia, Professor of Music, D.M.A., 1997, University of California, San Diego
- Sullivan, Dale L., Emeritus Professor of English, Ph.D., 1988, Rensselaer Polytechnic Institute
- Swenson, David G., Associate Professor of Visual Arts, M.F.A., 1992, University of Minnesota
- Taylor, Adam P., Lecturer of Philosophy, Ph.D., 2013, SUNY at Buffalo
- Temanson, Kaye, Lecturer of English, M.A., 2001, North Dakota State University
- Theile, Verena, Associate Professor of English, Ph.D., 2006, Washington State University
- Thompson, Kevin M., Professor of Criminal Justice, Ph.D., 1986, University of Arizona
- Tollefson, Wayne E., Emeritus Professor of Art, M.A., 1962, Michigan State University
- Trautwein, Charlotte G., Emerita Professor of Music, M.S., 1968, University of Illinois
- Urness, Cindy, Associate Professor of Architecture and Landscape Architecture and Architecture Program Director, M.Arch., 1988, Pratt Institute
- Varland, Rooth, Professor of Theatre Arts, M.F.A., 1989, Northwestern University
- Visilia, Anna Maria, Assistant Professor of Landscape Architecture, Ph.D., 1996, University of Pennsylvania
- Walden, Justin, Assistant Professor of Communication, Ph.D., 2013, Pennsylvania State University
  
- Ward, Steve A., Emeritus Professor of English, M.A., 1964, North Dakota State University
- Weaver-Hightower, Rebecca, Professor and Chair of English, Ph.D., 2002, University of Kentucky
- Weber, Christina, Associate Professor of Sociology and Associate Dean, College of Arts, Humanities and Social Sciences, Ph.D., 2005, State University of New York-Buffalo
- Weber, Michael J., Professor of Music, A.Mus.D., 1990, University of Arizona
- Westerman, Catherine Kingsley, Associate Professor of Communication, Ph.D., 2008, Michigan State University
- Westerman, David, Associate Professor of Communication, Ph.D., 2007, Michigan State University
- Whitsel, Christopher, Associate Professor of Sociology and Chair of Sociology and Anthropology, Ph.D., 2009, Indiana University, Bloomington
- Wicktor, Emily, Assistant Professor of English, Ph.D., 2010, The University of Kansas, Lawrence
- Wing, Heath, Assistant Professor of Spanish, Ph.D., 2015, Texas Tech University
  
- Wischer, Stephen, Associate Professor of Architecture and Landscape Architecture, M.F.A.,M. Arch., 2004, University of Calgary
- Wood, Robert A., Emeritus Professor of Political Science, Ph.D., 1983, University of Missouri-Columbia
- Wottrich, Tyler, Assistant Professor of Music, D.M.A., 2013, Stony Brook University
- Yellow Bird, Michael, Professor of Sociology and Director of the Indigenous Tribal Studies Program, Ph.D., 1994, University of Wisconsin, Madison
- Youngs, George A., Emeritus Professor of Emergency Management, Ph.D., 1981, University of Iowa
- Zeng, Cheng, Assistant Professor of Communication, Ph.D., 2018, University of Jyvaskyla, Finland

# College of Business

---

## [www.ndsu.edu/business](http://www.ndsu.edu/business)

The College of Business is committed to providing students with a quality education in the functional areas of business, a systematic exposure to the global business issues they will face in their careers, and an introduction to applying the technologies that will be a part of their work life. In addition, students may choose elective courses that will help prepare them for careers in specific areas in which they have an interest.

Undergraduate majors offered are: Accounting, Business Administration, Finance, Management, Management Information Systems, Marketing, and Global Business (2nd major option - must be paired with a primary major). Academic minors are offered in Accounting, Business Administration, Entrepreneurship, Fraud Investigation, Logistics Management, and Management Information Systems. Undergraduate Certificates in Entrepreneurship, Finance, and Professional Selling are also available. The College of Business is accredited by AACSB International – The Association to Advance Collegiate Schools of Business.

## Admission Requirements

Students who wish to pursue a degree in the College of Business at NDSU enroll as pre-major students upon selecting one of the six primary majors available (i.e., Accounting, Business Administration, Finance, Management, Management Information Systems, and Marketing). Pre-major students are eligible for admission into the professional program following the successful completion of pre-admission courses (i.e., ENGL 120, COMM 110, ECON 201 or ECON 202, MATH 144, and PSYC 111 or SOC 110) with a grade of 'C' or better, and a 2.5 cumulative grade point average (GPA).

Students must be admitted into the major program prior to enrolling in the advanced 300-400-level accounting, business administration, finance, management, management information systems, and/or marketing courses offered by the College.

The College of Business has specific policies on transfer course evaluations. The transfer of business related courses into the professional program is limited to credit earned at business programs accredited by AACSB International. Contact a professional advisor ([https://www.ndsu.edu/business/current\\_students/advising](https://www.ndsu.edu/business/current_students/advising)) in the College of Business for more information.

## Degree Programs

The College of Business offers undergraduate majors leading to a Bachelor of Science degree. The Master of Business Administration, Master of Accountancy, Master of Science in Business Analytics, Master of Supply Chain Management, Master of Transportation and Urban Systems, and the Doctorate in Transportation and Logistics degrees, and all Graduate Certificates are described in the Graduate Bulletin (<http://bulletin.ndsu.edu/graduate>) online.

## Degree Requirements

Students are required to complete the course requirements of one of the majors in the College of Business. Students follow the published curricula for the major program of study from the semester/year of entrance into that major in the College of Business until graduation, provided enrollment at NDSU has not been discontinued for more than one year. Students who change their major program of study are subject to meeting the curricular requirements in effect at the time the new major is declared.

Students must be accepted into the major prior to the completion of the last 30 credits in required 300-400 level College of Business courses.

Graduation from the College of Business requires students to also earn a grade of 'C' or better in all pre-admission courses, lower-division courses, and upper-division course requirements in the professional program (including all required courses, elective requirements, and additional 300-400 level CoB electives or breadth electives), unless otherwise stated for respective majors.

Students in the College of Business are responsible for monitoring their individual progress toward degree completion. Full time, professional academic advisors and faculty advisors are available to provide guidance and answer questions. Advisors are assigned alphabetically by last name. You can contact them here ([https://www.ndsu.edu/business/current\\_students/advising](https://www.ndsu.edu/business/current_students/advising)).

## Course Requirements

Students must have a minimum cumulative grade point average of 2.5 and the successful completion of pre-admission courses with a grade of 'C' or better to enroll in 300-400 level courses in the College of Business. Students are required to earn a minimum grade of 'B' in ACCT 200, and ACCT 201, or the equivalent courses in transfer, to enroll in 300-400 level accounting courses.

## Cooperative Education/Internships

Cooperative Education (<https://career.ndsu.edu/internship-program>), a program of the Career Center (<https://www.ndsu.edu/career>), offers undergraduate and graduate students an opportunity to integrate classroom study with paid, career-related work experience for academic credit. Work may be full or part time. A cooperative education experience may substantially improve students' employment opportunities after graduation.

A cooperative education experience is one way to satisfy the practicum requirements described below for Accounting and Management Information Systems majors.

## General College Academic Policies

1. The College of Business may consider granting transfer credit for upper level business courses from colleges that are accredited by AACSB International. Business courses from programs that do not hold AACSB International accreditation cannot be used for a major or a minor in the College of Business; such courses may be eligible for use as a free elective. The College of Business accepts a maximum of nine credits of non-NDSU 300- and 400-level business courses from AACSB programs with the approval of the department.
2. **Pre-approval** from the department head or chair is required to enroll in 300- and 400-level business courses at another AACSB accredited university or Tri-College University. Transfer courses with grades of 'D' are not accepted for ACCT 200, ACCT 201, other pre-admission or lower division requirements, and 300- and 400-level major requirements.
3. Students must have a minimum 2.50 institutional grade point average and have successfully completed the pre-admission courses to enroll in 300- and 400-level courses in the College of Business.
4. Students are required to earn a minimum grade of 'B' in ACCT 200 and ACCT 201, or the equivalent courses in transfer, to enroll in 300 and 400-level accounting courses.
5. College of Business courses completed in previous semesters are considered valid for degree requirements if taken within the previous five years. College of Business coursework taken before the five-year limit may be reviewed by the College of Business Student Progress Committee to determine its appropriateness to the current major requirements.
6. Students majoring in the College of Business cannot minor in business administration.

## Pre-Professional Program Requirements

### College of Business Pre-Professional Requirements

Code	Title	Credits
The following courses must be completed with a grade of C or better and students must have a minimum cumulative GPA of 2.50 for admission into the professional program for all College of Business majors.		
COMM 110	Fundamentals of Public Speaking	3
ECON 201 or ECON 202	Principles of Microeconomics Principles of Macroeconomics	3
ENGL 120	College Composition II	3
MATH 144	Mathematics for Business *	4
PSYC 111 or SOC 110	Introduction to Psychology Introduction to Sociology	3

\* MATH 144 is recommended but MATH 146 or MATH 165 will also be accepted.

## Academic Departments

Accounting & Information Systems (p. 1074)

Management & Marketing (p. 1108)

Transportation, Logistics & Finance (p. 1130)

## Faculty

- Andersen, Margaret, Professor of Accounting, Ph.D., 1989, Indiana University
- Bahrami, Bahman, Emeritus Professor of Management, Ph.D., 1983, University of Nebraska, Lincoln
- Banerjee, Somnath, Assistant Professor of Marketing, Ph.D., 2015, University of Central Florida
- Bridgelall, Raj, Assistant Professor of Transportation and Logistics, Ph.D. North Dakota State University
- Brown, Paul R., CPA, Senior Lecturer of Management; Co-Director of the MBA Program, MBA, 1989, North Dakota State University
- Bowlin, William, Emeritus Professor of Accounting, Ph.D., 1984, University of Texas at Austin
- Chai, Linlin, Assistant Professor of Marketing, Iowa State University
- Chen, Jun (Jeff), Assistant Professor of Finance, Ph.D., 2014, University of North Carolina at Charlotte, NC
- Clifton, James W., CPA, CFE, Assistant Professor of Accounting Practice, M.Acc., 1988, University of North Dakota
- Dowdell, Thomas, Associate Professor of Accounting, Ph.D., 2004, Temple University
- Dybing, Alan, Assistant Professor of Transportation and Logistics, Ph.D. North Dakota State University
- Eisele, C. Frederick, Emeritus Professor of Business Administration, Ph.D., 1971, University of Iowa

- Emerson, Nancy, CPA, Lecturer of Accounting, MAS, 1991, Northern Illinois University
- Froelich, Karen A., Emeritus Professor of Management, Ph.D., 1994, University of Minnesota
- Ganesh-Pillai, Rajani, Associate Professor of Marketing, Ph.D., 2008, University of Central Florida
- Godavarthy, Ranjit Prasad, Assistant Professor of Transportation and Logistics, Ph.D., Kansas State University
- Hong, Michelle, Assistant Professor of Management, Ph.D., 2016, Virginia Tech
- Hong, Yongtao, Associate Professor of Accounting, Ph.D., 2008, Drexel University
- Hough, Jill, Associate Professor of Transportation and Logistics, Ph.D., University of California - Davis
- Huang, Huichi, Assistant Professor of Accounting, Ph.D., Syracuse University, NY
- Huseynov, Fariz, Associate Professor of Finance, Ph.D., 2009, University of Memphis
- Jaroszynski, Michal, Assistant Professor of Transportation and Logistics, Ph.D., Florida State University
- Jones, Joseph M., Associate Professor of Marketing, Ph.D., 1994, University of Missouri-Columbia
- Klamm, Bonnie K., CPA, Professor of Accounting, Ph.D., 1999, Virginia Commonwealth University
- Knoepfle, Terry W., Emeritus Associate Professor of Business Law, JD, 1981, University of North Dakota
- Krush, Michael, Director of the Center for Professional Selling and Sales Technology; Associate Professor of Marketing, Ph.D., 2009, University of Nebraska-Lincoln
- Lehmborg, Derek, Associate Professor of Management; Co-Director of the MBA Program, Ph.D., 2010, University of Western Ontario
- Li, Jin, Professor of Marketing, Ph.D., 2007, University of Alberta
- Lu, Pan, Associate Professor of Transportation and Logistics, Ph.D., North Dakota State University
- Macintosh, Gerrard, Professor of Marketing, Ph.D., 1992, University of Nebraska-Lincoln
- Marineau, Joshua, Associate Professor of Management, Ph.D., 2012, University of Kentucky
- Mattson, Jeremy, Assistant Professor of Transportation and Logistics, Ph.D., North Dakota State University
- Motuba, Diomo, Assistant Professor of Transportation and Logistics, Ph.D., North Dakota State University
- Nordstrom, Onnolee A., Assistant Professor of Management, Ph.D., University of Alberta
- Pengnate, Supavich (Fone), Assistant Professor of Management Information Systems, Ph.D., 2013, Oklahoma State University, Stillwater, OK
- Petersen, Michael, CMA, CFM, Assistant Professor of Accounting, Ph.D., 2002, University of Iowa
- Peterson, Tim, Professor of Management; Ph.D., 1988, Texas A&M University
- Riggins, Fred, Associate Professor of Management Information Systems, Ph.D., 1994, Carnegie Mellon University
- Schiebelhut, John H., Emeritus Professor of Business Administration, Ph.D., 1970, University of Oregon
- Smith, Andrea H., Lecturer of Business Law, JD, 1996, University of North Dakota School of Law
- Snyder, Herbert, CFE, Professor of Accounting; Department Chair, Ph.D., 1994, Syracuse University
- Stevens, Charles D., Professor of Management, Ph.D., 1998, University of Kansas
- Stockman, H. Donald, CPA, Emeritus Professor of Business Administration, M.S.B.A., 1965, University of North Dakota
- Szmerekovsky, Joseph, Department Chair; Professor of Transportation and Logistics, Ph.D., 2003, Case Western Reserve University
- Tangpong, Chanchai, Department Chair; Professor of Management, Ph.D., 2002, Southern Illinois University, Carbondale
- Tian, Ruilin, Assistant Professor of Finance, Ph.D., 2008, Georgia State University
- Tolliver, Denver, Director of Transportation and Logistics, Ph.D., Virginia Polytechnic Institute and State University
- Traub, Rodney D., Associate Professor of Management, Ph.D., 1994, Purdue University
- Uppala, Vishal, Assistant Professor of Management Information Systems, Ph.D., 2018, University of North Carolina at Greensboro
- Vachal, Kimberly, Associate Professor of Transportation and Logistics, Ph.D. George Mason University
- Wright, Newell D., Professor of Marketing, Ph.D., 1993 Virginia Tech
- Young, Alex, Assistant Professor of Accounting, Ph.D., 2015, Duke University
- Zhang, Wei, Professor of Finance, Ph.D., 2001, Syracuse University
- Zhang, Limin, Associate Professor of Management Information Systems, Ph.D., 2005, University of Arizona
- Zuber, Jill, CPA, Associate Professor of Accounting, Ph.D., 2007, University of Arkansas

# College of Engineering

---

[www.ndsu.edu/coe/](http://www.ndsu.edu/coe/)

## Vision

The College of Engineering will be the engineering college of choice for students, faculty and employers seeking to enhance society through leadership and innovation.

## Mission

We prepare innovative problem solvers and create new knowledge to improve lives in North Dakota and beyond.

## Departments

The departments include Agricultural and Biosystems Engineering, Civil and Environmental Engineering, Computer Science, Construction Management and Engineering, Electrical and Computer Engineering, Industrial and Manufacturing Engineering, and Mechanical Engineering. The departments of Aerospace Studies (Air Force ROTC) and Military Science (Army ROTC) report through the college for academic program requirements.

## Accreditation

The facilities and engineering curricula of college programs are reviewed periodically by the appropriate accrediting agencies. The programs leading to the Bachelor of Science degrees in the following disciplines are accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>: Agricultural and Biosystems Engineering, Civil Engineering, Computer Engineering, Construction Engineering, Electrical Engineering, Industrial Engineering and Management, Manufacturing Engineering, and Mechanical Engineering. The American Council for Construction Education (ACCE) reviews the facilities and curricula for the program leading to the Bachelor of Science in Construction Management. These organizations are recognized national accrediting agencies.

## Admission Requirements

Applicants for admission must satisfy the general admission requirements of the university.

## Selective Program Entry

Programs within the College of Engineering may have selective program entry requirements. Refer to the department program descriptions for respective selective criteria.

## Recommended Preparation

College of Engineering programs encourage high school preparation in addition to the minimum core curriculum requirements. Prospective students will be best prepared if they complete four units of high school mathematics including two units of algebra, one unit of geometry, and one-half unit of trigonometry. Science courses should include one unit of physics and one unit of chemistry. Students whose high school credentials or entrance examinations show deficiencies in these subjects will be required to enroll in courses designed to remove such deficiencies and cannot expect to complete a program of study in the number of semesters indicated in the printed curricula.

## Degree Programs

Undergraduate programs of study lead to the Bachelor of Science degree in the specific fields of agricultural and biosystems engineering, civil engineering, computer engineering, computer science, construction engineering, construction management, electrical engineering, environmental engineering, industrial engineering and management, manufacturing engineering, and mechanical engineering. The Computer Science department offers programs leading to either a Bachelor of Science or Bachelor of Arts degree. Some programs include a number of options for specialized study.

The college has developed its programs of study to provide an educational experience in keeping with the professions of engineering, computing, and construction management. The classrooms and laboratories are well equipped and every effort is made to keep them abreast of current technology. Engineering program graduates successfully apply for registration as professional engineers after required periods of professional experience. Examinations of the North Dakota State Board of Registration for Engineers and Land Surveyors are available on-line. The Level I - Associate Constructor Certification Exam for American Institute of Constructors Certification Commission is offered each semester. All students are encouraged to take appropriate licensure examinations in the senior year.

All College of Engineering departments also have programs that lead to Master of Science and Doctor of Philosophy degrees. The Department of Computer Science also offers Master of Science and Doctor of Philosophy degrees in Software Engineering as well as a Master of Software Engineering degree. The Department of Construction Management and Engineering offers a Master of Science in Construction Management or a professional Master of Construction Management degree. The Master of Construction Management and Master of Software Engineering degrees are also available online. The graduate degrees are administered by The Graduate School and the College of Engineering. A number of graduate

assistantships are available to students undertaking graduate study. For more complete details, see the Graduate Bulletin (<http://bulletin.ndsu.edu/graduate>).

## Degree Requirements

To earn a baccalaureate degree from any of the College of Engineering programs, a student must complete at least 60 semester credits of professional-level course work in his/her program while in residence and enrolled in the college. Students transferring into the college from programs with professional accreditation are exempt from the residence requirement, but are subject to NDSU's residence policy. Other exemptions must be approved by the college.

## Special Opportunities and Services

Special opportunities include the following:

- **General Program:** Students who are interested in engineering but have not chosen a specific program are advised within the College of Engineering until they declare a major. They will be advised to take basic courses in the first two semesters that will be generally appropriate to any engineering major. Students are encouraged to select a specific program as soon as possible before the end of their first year.
- **Interdisciplinary Program:** The Natural Resources Management program (<https://www.ndsu.edu/nrm>) is available through the College of Agriculture, Food Systems, and Natural Resources, the College of Engineering, and the College of Science and Mathematics. The College also collaborates with the Environmental & Conservation Science Program (<https://www.ndsu.edu/ecs>) (ECS).

## Student Societies and Organizations

All students are eligible to join one or more of these organizations which are actively supported for the benefit of students in the related curricula:

- American Indian Science and Engineering Society
- American Institute of Aeronautics and Astronautics
- American Society of Agricultural and Biological Engineers
- American Society of Civil Engineers
- American Society of Mechanical Engineers
- American Water Works Association/Water Environmental Federation
- Association for Computing Machinery
- Associated General Contractors
- Bison Robotics
- Cybersecurity Student Organization
- Engineers Without Borders
- Institute of Electrical and Electronic Engineers
- Institute of Industrial Engineers
- Institute of Transportation Engineers
- Materials Research Society
- National Association of Home Builders
- National Society of Black Engineers
- Society for the Advancement of Material and Process Engineering
- Society of Automotive Engineers
- Society of Manufacturing Engineers
- Society of Plastics Engineers, Inc.
- Society of Women Engineers
- Surface Mount Technology Association

Air Force ROTC sponsors the Bernard S. Bennison Squadron of the Arnold Air Society (AAS). This is a non-profit student service organization dedicated to furthering the purpose, traditions and concepts of the United States Air Force. These objectives are primarily met through community service projects.

Several national professional honor societies have chapters on the campus for which students with high academic attainments are eligible in their junior or senior years. Eligible students are selected for Tau Beta Pi from all engineering programs, Alpha Epsilon from agricultural and biosystems engineering, Eta Kappa Nu from electrical engineering, Alpha Pi Mu from industrial engineering, Sigma Lambda Chi from construction management and engineering, Pi Tau Sigma from mechanical engineering, and Upsilon Pi Epsilon from computer science. Membership in these societies is a coveted honor and highly regarded in the professions.

## Research

Research and development projects are administered by college staff responsible for general policies, publications, and cooperative relations with private and governmental agencies.

## Cooperative Education

Cooperative Education (<https://career.ndsu.edu/internship-program>), a program of the Career Center (<https://www.ndsu.edu/career>), offers undergraduate and graduate students an opportunity to integrate classroom study with paid, career-related work experience for academic credit. Work may be full or part time. A Cooperative Education experience may substantially improve students' employment opportunities after graduation.

## Faculty

- Asa, Eric, Associate Professor of Construction Management and Engineering, Ph.D., 2002, University of Alberta
- Azarmi, Fardad, Associate Professor of Mechanical Engineering, Ph.D., 2007, University of Toronto
- Bajwa, Dilpreet, Associate Professor of Mechanical Engineering, Ph.D., 2000, University of Illinois, Urbana-Champaign
- Bajwa, Sreekala, Professor of Agricultural and Biosystems Engineering; Department Chair, Ph.D., 2000, University of Illinois, Urbana-Champaign
- Bezbaruah, Achintya, Associate Professor of Civil Engineering, Ph.D., 2002, University of Nebraska-Lincoln
- Bilen-Green, Canan, Vice Provost for Faculty Affairs, Professor of Industrial and Manufacturing Engineering, Ph.D., 1998, University of Wyoming
- Bon, Thomas A., Associate Professor of Practice of Agricultural and Biosystems Engineering, Ph.D., 2003, North Dakota State University
- Braaten, Benjamin, Associate Professor of Electrical and Computer Engineering, Interim Department Chair, Ph.D., 2009, North Dakota State University
- Cannayen, Iqathinathane, Associate Professor of Agricultural and Biosystems Engineering, Ph.D., 1997, Indian Institute of Technology
- Cao, Dong, Assistant Professor of Electrical and Computer Engineering, Ph.D., 2012, Michigan State University
- Chu, Xuefeng, Associate Professor of Civil Engineering, Interim Department Chair, Ph.D., 2002, University of California-Davis
- Dawn, Debasis, Assistant Professor of Electrical and Computer Engineering, Ph.D., 1993, Georgia Institute of Technology
- Estevadeordal, Jordi, Associate Professor of Mechanical Engineering, Ph.D., 1996, University of Houston
- Farahmand, Kambiz, Professor of Industrial and Manufacturing Engineering, Ph.D., 1992, University of Texas-Arlington
- Gao, Zhili, Associate Professor of Construction Management and Engineering, Ph.D., 2004 Iowa State University
- Gladen, Adam, Assistant Professor of Mechanical Engineering, Ph.D., 2014, University of Minnesota
- Glower, Jacob, Associate Professor of Electrical and Computer Engineering; Ph.D., 1988, Ohio State University
- Gong, Na, Assistant Professor of Electrical and Computer Engineering, Ph.D., 2013, New York State University-Buffalo
- Green, Roger, Associate Professor of Electrical and Computer Engineering, Ph.D., 1998, University of Wyoming
- Hellevang, Kenneth J., Professor of Agricultural and Biosystems Engineering, Ph.D., 1989, North Dakota State University
- Huang, Ying, Assistant Professor of Civil Engineering, Ph.D., 2012, Missouri University of Science and Technology
- Jia, Xinhua, Associate Professor of Agricultural and Biosystems Engineering, Ph.D., 2004, University of Arizona
- Jiang, Long, Associate Professor of Mechanical Engineering; Ph.D., 2003, Nanyang Technological University
- Kallmeyer, Alan R., Professor of Mechanical Engineering; Department Chair, Ph.D., 1995, University of Iowa
- Karami, Ghodrattollah, Professor of Mechanical Engineering, Ph.D., 1984, Imperial College of Science and Technology, University of London
- Karmakar, Sanjay, Assistant Professor of Electrical and Computer Engineering, Ph.D., 2012, University of Colorado-Boulder
- Katti, Dinesh R., Professor of Civil Engineering; Ph.D., 1991, University of Arizona
- Katti, Kalpana, Distinguished Professor of Civil Engineering, Ph.D., 1996, University of Washington

- Kavasseri, Rajesh, Associate Professor of Electrical and Computer Engineering, Ph.D., 2002, Washington State University
- Kessler, Michael, Dean of the College of Engineering, Professor of Mechanical Engineering, Ph.D., 2002, University of Illinois
- Khan, Samee, Associate Professor of Electrical and Computer Engineering, Ph.D., 2007, University of Texas-Arlington
- Khoda, Bashir, Assistant Professor of Industrial and Manufacturing Engineering, Ph.D., 2012, New York State University-Buffalo
- Krishnan, Sumathy, Professor of Mechanical Engineering, Ph.D., 1995, Indian Institute of Technology-Madras, India
- Lima, Ivan, Associate Professor of Electrical and Computer Engineering, Ph.D., 2003, University of Maryland
- Lin, Wei, Associate Professor of Civil Engineering, Ph.D., 1992, New York State University-Buffalo
- Lin, Zhibin, Assistant Professor of Civil Engineering, Ph.D., 2010, University of Wisconsin-Milwaukee
- Lin, Zhulu, Assistant Professor of Agricultural and Biosystems Engineering, Ph.D., 2003, University of Georgia
- Maassel, Michael, Visiting Professor of Electrical and Computer Engineering, Ph.D., 2013, North Dakota State University
- Marinov, Val, Professor of Industrial and Manufacturing Engineering, Ph.D., 1992, Technical University of Sofia, Bulgaria
- Nawarathna, Dharmakeerthi, Assistant Professor of Electrical and Computer Engineering, Ph.D., 2005, University of Houston
- Nazari, G. H., Lecturer of Mechanical Engineering, Ph.D., 1977, Texas A&M University
- Pieri, Robert V., Professor of Mechanical Engineering, Ph.D., 1987, Carnegie-Mellon University
- Pryor, Scott W., Associate Dean for Undergraduate Programs, Associate Professor of Agricultural and Biosystems Engineering, Ph.D., 2005, Cornell University
- Rahman, Shafiqur, Associate Professor of Agricultural and Biosystems Engineering, Ph.D., 2004, University of Manitoba
- Rogers, David A., Professor of Electrical and Computer Engineering, Ph.D., 1971, University of Washington
- Scherer, Thomas F., Associate Professor of Agricultural and Biosystems Engineering, Ph.D., 1986, University of Minnesota
- Selekwa, Majura, Associate Professor of Mechanical Engineering, Ph.D., 2001, Texas A&M University
- Simsek, Halis, Assistant Professor of Agricultural and Biosystems Engineering, Ph.D., 2012, North Dakota State University
- Sirotiak, Todd, Associate Professor of Construction Management and Engineering, Ph.D., 2008, Iowa State University
- Smith, Gary, Professor of Construction Management and Engineering, Ph.D., 1986, Purdue University
- Smith, Scott, Professor of Electrical and Computer Engineering, Ph.D., 2001, University of Central Florida
- Srinivasan, Sudarshan, Associate Professor of Electrical and Computer Engineering, Ph.D., 2007, Georgia Institute of Technology
- Steele, Dean D., Associate Professor of Agricultural and Biosystems Engineering, Ph.D., 1991, University of Minnesota
- Stone, Matthew, Assistant Professor of Construction Management and Engineering, Ph.D., 2013, University of Alabama
- Suzen, Bora, Associate Professor of Mechanical Engineering, Ph.D., 1998, Wichita State University
- Tangpong, Annie, Associate Professor of Mechanical Engineering, Ph.D., 2006, Carnegie Mellon University
- Ulven, Chad, Associate Professor of Mechanical Engineering, Ph.D., 2005, University of Alabama-Birmingham
- Varma, Amiy, Associate Professor of Civil Engineering, Ph.D., 1993, Purdue University
- Wang, Danling, Assistant Professor of Electrical and Computer Engineering, Ph.D., 2014, 2003, University of Washington, Peking University
- Wang, Jinhui, Assistant Professor of Electrical and Computer Engineering, Ph.D., 2010, University of Rochester
- Wang, Xinnan, Associate Professor of Mechanical Engineering, Ph.D., 2008, University of South Carolina
- Wang, Yechun, Associate Professor of Mechanical Engineering, Ph.D., 2007, University of Maryland
- Wiesenborn, Dennis P., Professor of Agricultural and Biosystems Engineering, Ph.D., 1988, Rice University
- Wu, Di, Assistant Professor of Electrical and Computer Engineering, Ph.D., 2011, Polytechnic University of Turin, Italy
- Wu, Xiangfa, Associate Professor of Mechanical Engineering, Ph.D., 2003, University of Nebraska-Lincoln
- Xu, Yiwen, Assistant Professor of Industrial and Manufacturing Engineering, Ph.D., 2015, University of Arizona
- Yadav, Om P., Professor of Industrial and Manufacturing Engineering, Interim Department Chair, Ph.D., 2002, Wayne State University
- Yang, Huojun, Assistant Professor of Construction Management and Engineering, Ph.D., 2012, University of Nebraska-Lincoln
- Yang, Mijia, Associate Professor of Civil Engineering; Ph.D., 2005, University of Akron
- Yellavajjala, Ravi Kiran, Assistant Professor of Civil Engineering, Ph.D., 2014, University of Notre Dame
- Yodo, Nita, Assistant Professor of Industrial and Manufacturing Engineering, Ph.D., 2017, Wichita State University
- Yu, Yao, Assistant Professor of Construction Management and Engineering, Ph.D., 2014, North Carolina A&T State University
- Zhang, Yan, Assistant Professor of Mechanical Engineering, Ph.D., 2013, Iowa State University
- Zhang, Qifeng, Assistant Professor of Electrical and Computer Engineering, Ph.D., 2001, Peking University
- Ziejewski, Mariusz, Professor of Mechanical Engineering, Ph.D., 1986, North Dakota State University

## Emeritus

- Andersen, Donald A., Emeritus Professor of Civil Engineering, Eng.D., 1982, Texas A&M University
- Backer, Leslie, Emeritus Professor of Agricultural and Biosystems Engineering, M.S., 1972, North Dakota State University

- Bares, William A., Emeritus Professor of Electrical Engineering, Ph.D., 1968, University of Wyoming
- Disrud, Lowell, Emeritus Professor of Agricultural and Biosystems Engineering, M.S., 1969, Kansas State University
- Ewert, Dan, Professor of Electrical and Computer Engineering, Ph.D., 1989, University of North Dakota
- Goplen, Sherman P., Emeritus Associate Professor of Mechanical Engineering, Ph.D., 1977, Texas A&M University
- Henderson, Allen J., Emeritus Professor of Industrial and Manufacturing Engineering, Ph.D., 1968, Iowa State University
- Hirning, Harvey, Emeritus Professor of Agricultural and Biosystems Engineering, Ph.D., 1970, Iowa State University
- Hofman, Vernon, Emeritus Professor of Agricultural and Biosystems Engineering, M.S., 1969, North Dakota State University
- Isgrig, Elvin, Emeritus Professor of Industrial and Manufacturing Engineering, M.S., 1983, North Dakota State University
- Kirschenman, Merlin D., Emeritus Associate Professor of Construction Management and Engineering, M.S., 1976, University of California-Berkeley
- Krause, Daniel J., Emeritus Professor of Electrical and Computer Engineering, Ph.D., 1972, Colorado State University
- Kucera, Henry L., Emeritus Professor of Agricultural and Biosystems Engineering, M.S., 1959, North Dakota State University
- La Palm, George L., Emeritus Professor of Civil Engineering, Ph.D., 1968, Purdue University
- Li, Kam, Emeritus Professor of Mechanical Engineering, Ph.D., 1965, Oklahoma State University
- Lindley, James A., Emeritus Associate Professor of Agricultural and Biosystems Engineering, Ph.D., 1972, Purdue University
- Lundstrom, Darnell R., Emeritus Professor of Agricultural and Biosystems Engineering, Ph.D., 1988, University of Minnesota
- Maurer, Karl G., Emeritus Professor of Mechanical Engineering, Ph.D., 1966, University of KansasMaassel, Visiting Professor in ECE
- Padmanabhan, G., Emeritus Professor of Civil Engineering, Ph.D., 1980, Purdue University
- Pestes, Michael N., Emeritus Professor of Mechanical Engineering, M.S., 1959, North Dakota State University
- Peterson, Donald E., Emeritus Associate Professor of Electrical Engineering, M.S., 1958, North Dakota State University
- Rieder, William G., Emeritus Professor of Mechanical Engineering, Ph.D., 1971, University of Nebraska-Lincoln
- Stegman, Earl C., Emeritus Professor of Agricultural and Biosystems Engineering, Ph.D., 1966, Michigan State University
- Stanislaio, Joseph, Emeritus Professor of Industrial and Manufacturing Engineering, Eng.Sc.D., 1970, Columbia University
- Stuehm, Donald L., Emeritus Professor of Electrical and Computer Engineering, Ph.D., 1972, Colorado State University

# College of Health Professions

---

## [www.ndsu.edu/healthprofessions/](http://www.ndsu.edu/healthprofessions/)

*The core mission of the College is to prepare students to become competent, caring, ethical professionals and citizens committed to lifelong learning.*

The College of Health Professions (CHP) has been a center of excellence at North Dakota State University (NDSU) for more than 100 years. The College, a major academic unit of North Dakota State University, serves the state, region, and nation through its programs in pharmacy, nursing, medical lab science, respiratory care, radiologic science, health services, and public health. CHP provides education, research, patient care, public service, and is currently the largest health professions training program in North Dakota.

Through its mission, the NDSU College of CHP advances health care through research and scholarship and prepares students to become competent, caring, ethical, professionals and citizens, committed to lifelong learning. In addition, through its people and programs the College places an emphasis and value on people; quality; professionalism and ethics; knowledge, teaching, and learning; research and scholarship; patient-focused care; and interprofessional education.

### Academic Units

The College, established in 1902, consists of four academic units involving six health professions disciplines: (1) the NDSU School of Pharmacy which has two departments including pharmacy practice and pharmaceutical sciences which are the founding members of the College; (2) the School of Nursing joined the College in 1969 as an associate degree program, 1986 as a baccalaureate degree program, 2005 with a doctor of nursing practice, and 2014 NDSU Nursing at Sanford Health site in Bismarck; (3) the Department of Allied Sciences (Medical Laboratory Science, Respiratory Care, and Radiologic Sciences with three unique specializations including radiography, echocardiography, and diagnostic sonography) joined the College in 2006; and (4) the Department of Public Health which joined the College in 2012. The Bachelor of Science in Health Services is inter-professional in nature, and is coordinated through the Office of the Dean.

---

## Degree Programs

The College of Health Professions offers undergraduate academic programs in Pharmacy, Nursing, Medical Laboratory Science, Respiratory Care, and Radiologic Sciences. Admission requirements, curricula and degree titles differ for the programs.

The pharmacy curriculum consists of pre-pharmacy curriculum and then a four-year professional program leading to the Pharm.D. degree. Graduates are qualified to apply for licensure as pharmacists. In addition, Pharm.D./M.B.A., Pharm.D./MPH, and Pharm.D./Ph.D degree options of study are available. Graduate programs leading to Master of Public Health (MPH) and a Ph.D. in Pharmaceutical Sciences also are available.

NDSU's School of Nursing offers three tracks that lead to a Bachelor of Science in Nursing (BSN) degree and one that leads to a Doctor of Nursing Practice (DNP). The pre-licensure BSN track, both at NDSU Fargo campus and NDSU Nursing at Sanford Health in Bismarck, is a four-year course of study. The LPN to BSN track is a two-year course of study designed for licensed practical nurses (LPN) to obtain a BSN degree. Upon successful completion of the pre-licensure BSN and LPN to BSN programs, graduates are eligible to take the national council licensing examination (NCLEX) to become a registered nurse (RN). The RN to BSN track is a part-time, five semester course of study designed for Registered Nurses (RNs) to obtain a BSN degree. A graduate program leading to a Doctor of Nursing Practice (DNP) degree in the specialty area of Family Nurse Practitioner (FNP) is a full-time three-year course of study.

Plans of study leading to a four-year Bachelor of Science degree, major in Medical Laboratory Science (MLS), Respiratory Care (RC) or Radiologic Sciences (RS) include two to three years of academic course work on campus and a professional-level internship in an affiliated, hospital-based program. Required internships are 11-12 months in length for MLS, 15 months for RC, and two years for RS. Graduates are eligible to sit for national certifying examinations in their respective discipline.

The Bachelor of Sciences in Health Services is a flexible, inter-professional program designed to meet the educational needs of students who desire a career in health care not addressed by those described previously. Plans of study require both academic and a professional-level internship. However, the academic training and length of professional internship varies based on the career goals of the student.

## Academic Preparation

All students must complete all required courses with a grade of 'C' or above and maintain a semester GPA of 2.00 or above for each semester in the College. A student who fails to meet this standard for two successive or three non-successive semesters may be suspended from enrollment in the College of Health Professions.

The faculty of the College reserves the right to terminate the enrollment of any student at any time if, in the opinion of the faculty, the student demonstrates that he or she is unsuited for a professional health career and its inherent responsibilities and obligations. Circumstances that may lead to student termination will include, but not be limited to, academic misconduct, violation of campus, state or federal statutes or regulations.

## Admission

Selection committees will evaluate applicants for admission to the college professional programs and internships. NDSU coursework and transfer credits with grades of 'D' are not accepted for program requirements. Please contact the department for specific admission requirements.

## Pharmacy

Additional high school preparation for the Pharmacy major is recommended. Prospective Pharmacy majors should present strong preparation in mathematics, physical/biological sciences, and in communication skills.

Admission to the program is competitive. Evaluations will be based on academic achievement, college records, state residency, Pharmacy College Admission Test (PCAT) scores, and other pertinent information. In addition, students must comply with criminal background and student conduct requirements. A personal visit, which includes an interview and test are a part of the evaluation process. A minimum cumulative GPA of 3.00 in college course work is required for evaluation for admission, with completion of virtually all required prerequisite courses by the end of spring term prior to beginning the professional program. (All core pre-pharmacy course work, which is indicated by an asterisk, must be completed by the end of the fall term prior to application deadline.) Actual admission GPA is generally much higher than 3.00. Information on application for admission to the professional program can be found on the School of Pharmacy website (<https://www.ndsu.edu/pharmacy>).

## Nursing

Nursing admission requirements vary by educational track. Admission is based on academic achievement along with other required application materials. Please visit the School of Nursing website (<https://www.ndsu.edu/nursing>) for specific information including: deadlines, prerequisite requirements, and application materials.

## Medical Laboratory Science

NDSU maintains affiliation agreements with seven hospital-based medical laboratory science programs that provide the required professional-level internship. Pre-MLS students who have completed all academic courses on campus by start of the internship and meet residency credit and GPA requirements may be eligible to apply for the internships. Admission into the internship is selective and based upon academic achievement, references, related experience, compliance with essential functions, and an interview. In addition, student applicants must also comply with criminal background and student conduct requirements. Internship application occurs annually in early fall. Application information is available from the **Department of Allied Sciences**. It is highly recommended that interested students meet with the MLS advisor for internship admission information at least one year prior to anticipated internship application.

## Radiologic Sciences

Three specialized professional-level internships are available to NDSU RS majors: radiography, diagnostic medical sonography, and echocardiography. NDSU maintains affiliations with nine hospital-based radiologic technology programs that provide the internships in radiography. The echocardiography and diagnostic medical sonography internships are offered through an affiliation with Sanford Medical Center, Fargo, N.D. Pre-RS students who have completed the prerequisite courses on campus and meet residency credit and GPA requirements established by affiliated hospital programs may be eligible to apply for the two-year internship. Admission into the internship is competitive and based upon academic achievement, references, related experience, ability to meet program-designated technical standards, and an interview. In addition, students must comply with criminal background and student conduct requirements. Internship application occurs annually in the fall. Application information is available from the **Department of Allied Sciences**. It is highly recommended that interested students meet with their RS adviser for internship admission information at least one year prior to anticipated internship application.

## Respiratory Care

The professional-level respiratory care internship is offered through an affiliation with Sanford Medical Center, Fargo, N.D. Pre-RC students eligible for internship application will have completed all prerequisite courses by the start of the internship with a grade of 'C' or better, met the residency credit requirement, and earned the minimum cumulative and "core" course GPA of 2.50. Application deadline is March 1. Admission into the internship is selective and based upon successful completion of all internship prerequisites, GPA, references, interview, related experience, and ability to meet program-designated technical standards. In addition, students must comply with criminal background and student conduct requirements. Applications for the internship are available from the **Department of Allied Sciences**. It is highly recommended that interested students meet with the RC advisor for internship admissions information at least one year prior to anticipated internship application.

## Health Services

The Bachelor of Science in Health Services does not have specific admissions criteria. However, students must meet the academic, professional, and admissions requirements for any clinical site at which they complete their professional internships. Please visit the **Bachelor of Sciences in Health Services Bulletin Page** (<https://bulletin.ndsu.edu/programs-study/undergraduate/health-services>) for more specific information.

## Faculty

- Backes, Alyssa, Lecturer, Nursing, BSN, Medcenter One College of Nursing
- Barnacle, Mykell, Assistant Professor of Practice, Nursing, DNP, North Dakota State University
- Benning, Kerri, Assistant Professor of Practice, Nursing, FNP-C
- Berger, Sara, Assistant Professor of Practice, Nursing, MSN, University of Mary
- Biberdorf, Robert, Emeritus Professor, Pharmacy Practice, MS, North Dakota State University
- Brass, Doreen, Lecturer - Simulation Educator, Nursing, MSN, University of Minnesota – Twin Cities
- Brooks, Amanda, Assistant Professor, Pharmaceutical Sciences, PhD, University of Wyoming
- Brynjulson, Rebecca, Assistant Professor of Practice, Pharmacy Practice, PharmD, North Dakota State University
- Buettner-Schmidt, Kelly, Associate Professor, Nursing, PhD, University of New Mexico
- Carson, Paul, Professor of Practice, Public Health, MD, University of North Dakota
- Cernusca, Dan, Assistant Professor of Practice, Pharmacy Practice, PhD, University of Missouri-Columbia
- Danielson, Ramona, Research Associate Professor, Public Health, PhD, North Dakota State University
- Dewey, Mark, Associate Professor of Practice, Pharmacy Practice, PharmD, North Dakota State University
- Drummond, Amy, Lecturer, Pharmacy Practice, PharmD, North Dakota State University
- Eliason, Anne, Assistant Professor of Practice, Nursing, MSN, University of Mary
- Erickson, Stephanie, Lecturer, Nursing, MS, Rasmussen College
- Eukel, Heidi, Associate Professor, Pharmacy Practice, PharmD, North Dakota State University
- Falk, Kara, Assistant Professor of Practice, Nursing, MS, University of North Dakota
- Frenzel, Jeanne, Associate Professor, Pharmacy Practice, PharmD, North Dakota State University
- Friesner, Daniel, Professor, Pharmacy Practice; Associate Dean for Student Affairs and Faculty Development, PhD, Washington State University
- Gores, Gail, Simulation Educator, Nursing, MSN, University of Mary
- Grandbois, Donna M., Associate Professor, Nursing and Public Health, PhD, North Dakota State University
- Gross, Carla J., Associate Professor of Practice; Associate Dean of Nursing, PhD, North Dakota State University
- Gross, Dean, Assistant Professor of Practice, Nursing, DNSc, Rush University
- Guo, Ang, Assistant Professor, Pharmaceutical Sciences, PhD, Shanghai Institute of Health Sciences
- Guthmiller, Martha, Assistant Professor of Practice, Nursing, DNP, Augsburg College, Minneapolis, MN
- Hall, Susan, Assistant Professor of Practice, Nursing
- Harriger, Shannon, Assistant Professor of Practice, Nursing, DNP, Winona State University
- Harrington, Agnes E., Emeritus Professor, Pharmacy, MEd., North Dakota State University
- Haug, Karla, Assistant Professor of Practice, Nursing, MS, North Dakota State University
- Heuer, Loretta, Professor, Nursing, PhD, University of North Dakota
- Hohman, Adam, Assistant Professor of Practice, Nursing, DNP, North Dakota State University
- Hursman, Allison, Assistant Professor of Practice, Pharmacy Practice, PharmD, North Dakota State University
- Huseth-Zosel, Andrea, Assistant Professor, Public Health, PhD, North Dakota State University
- Jansen, Rick, Assistant Professor, Public Health, PhD, University of Minnesota, Minneapolis
- Jarajapu, Yagna PR, Assistant Professor, Pharmaceutical Sciences, PhD, Glasgow Caledonian University, UK
- Johnson, Jill, Assistant Professor of Practice, Nursing, MSN., University of Phoenix
- Keller, Hollie, Assistant Professor of Practice, Nursing,
- Kelsch, Michael, Associate Professor of Practice, Department Vice Chair, Pharmacy Practice, PharmD, North Dakota State University
- Kenzie, Daniel, Assistant Professor of Practice, Pharmacy Practice, PhD, Purdue University
- Ketterling, Julie, Assistant Professor of Practice, Nursing
- Kiser-Larson, Norma, Professor Emeritus, Nursing, PhD
- Kopp, Wendy, Director of Nursing - Bismarck, Associate Professor of Practice, Nursing, MSN., University of Mary
- Kunkel, Charys, Assistant Professor of Practice, Nursing, MSN., University of Mary
- Larson, Mary, Assistant Professor, Public Health, PhD, University of North Dakota
- Layek, Buddhadev, Assistant Professor, Pharmaceutical Sciences, PhD, North Dakota State University
- Leclerc, Estelle, Associate Professor, Pharmaceutical Sciences, PhD, University of Paris XI, France
- Lundeen, Tina, Assistant Professor of Practice, Nursing, DNP, North Dakota State University

- Maack, Brody, Associate Professor, Pharmacy Practice, PharmD, North Dakota State University
- MacAdams, Angela, Director, Allied Sciences, MEd, North Dakota State University
- Mackowick, Margaret S., Assistant Professor of Practice, Nursing, MS, University of North Dakota
- Mallik, Sanku, Professor, Pharmaceutical Sciences, PhD, Case Western Reserve University
- Marvanova, Marketa, Associate Professor, Chair, Pharmacy Practice, PharmD, Charles University, Prague
- Mathew, Sijo, Assistant Professor, Pharmaceutical Sciences, PhD
- McDaniel, Becky, Assistant Professor of Practice, Nursing, MSN., University of Mary
- Meyer, Stefanie, Assistant Professor of Practice, Public Health, PhD, North Dakota State University
- Miller, Donald R., Professor, Pharmacy Practice, PharmD, University of Michigan
- Mooney, Mary Margaret, Emeritus Professor, Nursing, D.N.Sc., Catholic University of America
- Muzzy Williamson, Julia, Assistant Professor of Practice, Pharmacy Practice, PharmD, Albany College of Pharmacy and Health Science
- Nadeau, Melanie, Assistant Professor of Practice, Public Health, MPH, University of Minnesota
- Naughton, Cynthia, Associate Professor, Pharmacy Practice; Senior Associate Dean, PharmD, North Dakota State University
- Nelson, Sharon, Assistant Professor of Practice, Nursing, PhD, University of North Dakota
- Obritsch, Christie, Assistant Professor of Practice, Nursing, MSN., University of Mary
- O'Rourke, Stephen T., Professor, Pharmaceutical Sciences, PhD, University of Wisconsin
- Patterson, Betty, Emeritus Professor, Pharmacy Practice, PhD, University of Iowa
- Peltier, Allison, Assistant Professor of Practice, Nursing, DNP, North Dakota State University
- Peterson, Charles D., Professor, Pharmacy Practice; Dean, College of Health Professions, PharmD, University of Minnesota
- Petry, Natasha, Assistant Professor of Practice, Pharmacy Practice, PharmD, North Dakota State University
- Richter, Lisa, Assistant Professor of Practice, Pharmacy Practice, PharmD, North Dakota State University
- Riggins, Janet, Lecturer, Nursing, MSN, Arizona State University
- Rose, Wanda, Associate Professor of Practice, Nursing, PhD, University of North Dakota
- Saarinen, Heidi, Assistant Professor of Practice, Nursing, DNP, North Dakota State University
- Sadowsky, Allison, Assistant Professor of Practice, Nursing, MSN., University of Mary
- Sandhurst, Holly, Assistant Professor of Practice, Nursing, EdD, College of St. Mary, Omaha, NE
- Schaeffer Fraase, Kolby, Lecturer, Nursing, MS, North Dakota State University
- Schnell, R. Craig, Professor Emeritus, Pharmaceutical Sciences, PhD, Purdue University
- Scott, David, Professor, Pharmacy Practice, PhD, University of Minnesota
- Secor-Turner, Molly, Associate Professor, Nursing, PhD, University of Minnesota
- Singh, Jagdish, Professor, Pharmaceutical Sciences; Department Chair, PhD, Banaras Hindu University, India
- Skoy, Elizabeth, Associate Professor, Pharmacy Practice, PharmD, North Dakota State University
- Slevin, Amber, Assistant Professor of Practice, Pharmacy Practice, PharmD, North Dakota State University
- Smith, Mary, Assistant Professor of Practice, Nursing, MSN, University of Mary
- Steffen, Kristine, Professor, Pharmaceutical Sciences, PhD, North Dakota State University
- Strand, Mark, Professor, Pharmacy Practice, PhD, University of Colorado at Denver
- Strom, Patricia, Assistant Professor of Practice, Nursing, MEd, North Dakota State University
- Sun, Chengwen, Associate Professor, Pharmaceutical Sciences, PhD, Norman Bethune University of Medical Sciences, China
- Swanson, Kathleen, Assistant Professor of Practice, Nursing, DNP
- Thompson, Sara, Assistant Professor of Practice, Pharmacy Practice, PharmD, Belmont University College of Pharmacy, Nashville, TN
- Thompson, Shila, Assistant Professor of Practice, Nursing, PhD, South Dakota State University
- Turrubiates, Nancy, Lecturer, Clinical Coordinator, Nursing, MSN, Walden University
- Udem, Teri, Lecturer, Pharmacy Practice, B.S., University of Kansas
- Unterseher, Lindsey, Assistant Professor of Practice, Nursing, MSN., University of North Dakota
- Venkatachalem, Sathish, Assistant Professor, Pharmaceutical Sciences, PhD, University of Madras, India
- Vetter, Abigail, Assistant Professor of Practice, Nursing, MSN
- Vetter, Stefan, Research Assistant Professor, Pharmaceutical Sciences, PhD, Swiss Federal Institute of Technology, Switzerland
- Viets, Joni, Assistant Professor of Practice, Pharmacy Practice, PharmD, North Dakota State University
- Werremeyer, Amy, Associate Professor of Practice, Pharmacy Practice, Pharm. D., North Dakota State University
- Wescott, Siobhan, Assistant Professor of Practice, Public Health, M.D., Harvard Medical School
- Wilhelm, Ross, Assistant Professor of Practice, Pharmacy Practice, PharmD, North Dakota State University
- Wynn, Cheryl, Assistant Professor of Practice, Nursing, MSN, University of North Dakota

# College of Human Sciences and Education

---

[www.ndsu.edu/hse/](http://www.ndsu.edu/hse/)

The College of Human Sciences and Education was established in July 1992. There are five units in the college. Apparel, Merchandising, Interior Design, and Hospitality Management; Human Development and Family Science; Education; and Health, Nutrition, and Exercise Sciences offer programs at the bachelor's, master's, specialist and doctoral levels. The Center for 4-H Youth Development offers Extension youth programming across the state. Students are prepared for careers in education, colleges and universities, business and industry, community services, hospitals and health care facilities, and public and private programs concerned with design, human welfare, fitness, and sport.

## Mission

The mission of the College of Human Sciences and Education is to provide nationally recognized educational programs and conduct research and other scholarly activities that focus on people as they interact in work, educational, and living environments.

Opportunities are provided to broaden the student's understanding and appreciation of the aesthetic, cultural, economic, physical, psychological, and social elements that influence individual and family well-being. Programs are designed to help each student develop professional competencies, attain a liberal education, and relate the basic disciplines to various applications.

## Accreditation

The Master of Athletic Training program (MATrg) is certified by the Commission on Accreditation of Athletic Training Education (CAATE). Education programs are accredited by the Council for the Accreditation of Educator Preparation (CAEP) and approved by the North Dakota Education and Standards and Practices Board (ESPB).

The School Counseling, Community Counseling, and Counselor Education and Supervision programs are accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP). The Dietetics program is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). The Interior Design program is accredited by the Council for Interior Design Accreditation (CIDA).

The Exercise Science Program is endorsed by the Commission of Accreditation of Allied Health Education programs (CAAHEP): Committee on Accreditation for Exercise Sciences. Family Financial Planning is approved by the Certified Financial Planner (CFP) Board of Standards. Hospitality and Tourism Management is accredited by the Accreditation Commission for Programs in Hospitality Administration (ACPHA).

## Degree Programs

Undergraduate programs in the college lead to a Bachelor of Science or a Bachelor of Arts degree. Recommendation of candidates for teacher certification also rests within this college through the School of Education (<https://www.ndsu.edu/education>).

Graduate study leading to a Master of Science degree is offered in Human Development and Family Science, Counseling, Merchandising, Educational Leadership, Athletic Training, Leadership in Physical Education and Sport, Exercise Science, Nutrition Science, Dietetics, and Teacher Education. A Master of Education degree may be earned through Health, Nutrition and Exercise Sciences and the School of Education. A Master of Athletic Training (MATrg) degree may be earned through Health, Nutrition, and Exercise Sciences. Doctoral programs also are offered by the college in Counselor Education and Supervision, Developmental Science, Education and Exercise Science and Nutrition. The doctoral program in Education (Ph.D. or Ed.D.) has a cross-disciplinary emphasis, which allows students a choice between three tracks: Adult & Community Education, Institutional Effectiveness, and Organizational Learning & Leadership. A dual major doctoral program in gerontology is offered in coordination with a doctoral degree from one of the following areas: Developmental Science, Education and Exercise Science and Nutrition. For more complete details, see the Graduate Bulletin (<http://bulletin.ndsu.edu/graduate>) online.

The College of Human Sciences and Education offers seven master's programs or program options online. Online programs make earning an advanced degree an option for anyone accepted into the college of Graduate and Interdisciplinary Studies. The programs are: Merchandising, Family Financial Planning, Gerontology, Youth Development, Family and Consumer Science Education, Dietetics and Leadership in Physical Education and Sport. For more information view the Graduate School (<https://www.ndsu.edu/gradschool>) web site.

## Degree Requirements

Students enrolled in major programs in the college are required to follow curriculum guidelines, available in the Academic Advising Office ([https://www.ndsu.edu/hde/academic\\_advising\\_center](https://www.ndsu.edu/hde/academic_advising_center)) of the college or department offices, for each of the program options and majors. Course requirements in each program fulfill university, college, and departmental requirements. Refer also to graduation requirements and related information listed earlier in the Academic Policies (p. 66) section.

Courses taken pass/fail will not be used to satisfy any requirements other than total credits. Departments may have additional restrictions. Approval must be obtained and processed during the first three weeks of the regular semester. Once processed, a course cannot be changed back to regular grading.

General college requirements for undergraduate degrees extend beyond the minimum university general education requirements. An adviser should be consulted for specific courses. Students also are encouraged to follow their own interests in choosing electives that go beyond the minimum requirements.

## Curriculum Majors and Options

- Apparel, Retail, Merchandising and Design
  - Apparel Studies Option
  - Retail Merchandising Option
- Dietetics
  - Didactic Program
  - Dietitian Education Program
- Exercise Science
  - Also available is a Master of Athletic Training degree in conjunction with a B.S. in Exercise Science, 5 year combined program
- Hospitality and Tourism Management
- Human Development and Family Science
  - Adult Development and Aging Option
  - Child Development Option
  - Family Science Option
  - Elementary Education\*
  - Social Work\*\*
- Interior Design
- Sport Management

\* Elementary Education  
An Elementary Education program is available through the cooperation of Valley City State University (<http://www.vcsu.edu>), the degree-granting institution for this program. This degree program must be completed concurrently with an HDFS major from NDSU. Upon completion of the Dual Degree Program, the graduate will have earned a Bachelor of Science degree from the College of Human Sciences and Education with a major in Human Development and Family Science from NDSU and a Bachelor of Science degree in Elementary Education from Valley City State University. The dual program is designed to be completed in four years on the campus of NDSU.

\*\* Social Work  
A Social Work program is available through the cooperation of Minot State University (<https://www.minotstateu.edu>), the degree-granting institution for this program. The degree program must be completed concurrently with a HDFS major from NDSU. Upon completion of the dual degree program, the graduate will have earned a Bachelor of Science degree from the College of Human Sciences and Education with a major in Human Development and Family Science from NDSU and a Bachelor of Science degree in Social Work from Minot State University. The dual program is designed to be completed in four years on the campus of NDSU.

## Secondary Education:

- Agricultural
- Art
- Biology
- Chemistry
- Comprehensive Science
- Earth Science
- English
  - Communication Option
- Family and Consumer Sciences
- French
- Health
  - School Health Option
- History
- Mathematics
- Music (Instrumental or Vocal)
- Physical Education (K-12)
- Physics

- Social Science
- Spanish

## Minors

A minor is a similar grouping of courses in which the university requires a minimum of 16 credits. (At least eight credits of the minor must be taken at NDSU.) Departments may require more credits for their minors. For the minors to be awarded, students must declare a minor using the *Major/Minor Change Form*. Information on specific minors may also be obtained in the Academic Advising Office ([https://www.ndsu.edu/hde/academic\\_advising\\_center](https://www.ndsu.edu/hde/academic_advising_center)). Minors offered in the college are:

- Apparel, Retail Merchandising and Design
- Extension Education
- Health Education
- Hospitality and Tourism Management
- Human Development and Family Science
- Interior Design
- Wellness

## Undergraduate Certifications

- Certified Family Life Education (CFLE)
- Coaching
- Food Sanitation
- Physical Best

## Interdisciplinary Programs

The College of Human Sciences and Education participates in two interdisciplinary programs on campus:

- Gerontology Minor
- Wellness Minor
- Women and Gender Studies Major and Minor

## Special Opportunities

Special opportunities available to students in the college include the following:

## Professional Organizations

Student chapters of professional organizations are available for membership in accordance with their respective bylaws.

- American Association of Family and Consumer Sciences (AAFCS)
- American Society of Interior Designers (ASID)
- Aspiring Teachers of Mathematics and Science (ATOMS)
- Association of Couple and Family Therapy Students
- Chi Sigma Iota
- Collegiate FFA/Postsecondary Agriculture Students (CFFA/PAS)
- Elementary Education Club
- Eta Sigma Delta (honorary)
- Exercise Science Club

- Fashion, Apparel, and Business Organization (FABO)
- HSE Ambassadors
- Hospitality Student Association (HSA)
- Human Development and Family Science Club
- Phi Upsilon Omicron (honorary)
- Social Work Organization (SWO)
- Sport Management Association (SMA)
- Student Association of Nutrition and Dietetics (SAND)
- Student North Dakota United (SNDU)

Additional information is available in the Dean's Office of the college.

## **HSE Ambassadors**

The HSE Ambassadors act as a liaison organization between the student body, the faculty, and the Dean of the College of Human Sciences and Education. The Ambassadors assist in the promotion of the college. Students supplement and complement the existing advisory system. Student selection is based on academics and a willingness to participate. Student members represent all units in the college. Applications for HSE Ambassadors are reviewed each year. Information is available in the Dean's Office ([https://www.ndsu.edu/hde/deans\\_welcome](https://www.ndsu.edu/hde/deans_welcome)) of the college (255 EML).

## **Cooperative Education**

Cooperative Education, a program of the Career Center, offers undergraduate and graduate students an opportunity to integrate classroom study with paid, career related work experience for academic credit. Work may be full or part time. See Career Center (<https://www.ndsu.edu/career>) for further information. A Cooperative Education experience may substantially improve students' employment opportunities after graduation.

Apparel, Merchandising, Interior Design & Hospitality Management (p. 1080)

Health, Nutrition & Exercise Sciences (p. 1102)

Human Development & Family Science (p. 1104)

School of Education (p. 1093)

## **College Requirements**

### **Bachelor of Science Degree (B.S.)**

Requirements include those outlined on the curriculum guide and include the university's general education, college and departmental requirements.

### **Bachelor of Arts Degree (B.A.)**

In addition to the Bachelor of Science degree, a Bachelor of Arts degree also includes the following:

- Six (6) additional credits of humanities and social behavioral sciences
- Two years of one modern foreign language at the college level or equivalent

Students should refer to the Bachelor of Arts Using a Second Language (p. 124) section within the Undergraduate Degree and Graduation Information (p. 122) page of this Bulletin.

## **Faculty**

- Aakre, Dean E., Extension Specialist, M.Ed., 1998, North Dakota State University
- Anderson, Earl A., Emeritus Professor, Education, Ed.D., 1962, Washington State University
- Anderson, Sharon D., Emeritus Professor, Human Development and Education, Ph.D., 1994, University of North Dakota
- Asperin, Amelia Estepa, Associate Professor, Apparel, Merchandising, Interior Design, and Hospitality Management, Ph.D., 2007, Kansas State University
- Bach, Annette S., Emeritus Professor, Extension, M.S., 1972, University of Southern California
- Baggett, Ashley, Assistant Professor, History, Philosophy, and Religious Studies and School of Education, Ph.D., 2014, Louisiana State University

- Bastow-Shoop, Holly E., Emeritus Professor, Apparel, Merchandising, Interior Design, and Hospitality Management; Ph.D., 1981, Oklahoma State University
- Beck, Patricia L., Emeritus Professor, Extension, M.S., 1965, Colorado State University
- Berglund, Patricia, Emeritus Professor, Health, Nutrition and Exercise Sciences, Ph.D., 1988, North Dakota State University
- Biewer, Adrian, Extension Specialist, M.S., 1981, North Dakota State University
- Blodgett Salafia, Elizabeth, Associate Professor, Human Development and Family Science, Ph.D., 2008, University of Notre Dame
- Borgen, Vernon A., Adjunct Professor, Health, Nutrition and Exercise Sciences, B.S., 1979, North Dakota State University
- Borr, Mari, Associate Professor, Education, Ph.D., 2005, University of North Dakota
- Braaten, Ann W., Associate Professor of Practice, Apparel, Merchandising, Interior Design, and Hospitality Management, Ph.D., 2005, University of Minnesota
- Brotherson, Sean, Extension Specialist and Professor, Human Development and Family Science, Ph.D., 1999, Oregon State University
- Brunt, Ardith R., Emeritus Professor, Health, Nutrition and Exercise Sciences, Ph.D., 1999, Iowa State University
- Buchholz Holland, Carol, Associate Professor, School of Education, Ph.D., 2005, Kansas State University
- Burkholder, Vel Rae, Emeritus Professor, Health, Nutrition and Exercise Sciences, M.S., 1968, North Dakota State University
- Carlson, Thomas Stone, Professor, Human Development and Family Science, Ph.D., 2000, Iowa State University
- Choi, Juwon, Assistant Professor, Apparel, Merchandising, Interior Design, and Hospitality Management, Ph.D., 2016, Kansas State University, Manhattan
- Christensen, Bryan K., Professor, Health, Nutrition and Exercise Sciences, Ph.D., 2000, University of Kansas
- Christensen, Warren M., Associate Professor, Physics and Education, Ph.D., 2007, Iowa State University
- Clapper, Ann, Associate Professor of Practice, Education, Ed.D., 1991, Drake University
- Cogdill, Bradley D., Chair, Center for 4-H Youth Development; M.S., 2005, North Dakota State University
- Crary, Sarah, Assistant Professor, Education, Ph.D., 2018, University of North Dakota
- Dahl, Laura, Assistant Professor, Education, Ph.D., 2019, The Ohio State University
- David, Shannon, Assistant Professor, Health, Nutrition, and Exercise Sciences, Ph.D., 2013, Ohio University
- Deal, James, Professor and Associate Dean, Human Development and Family Science; Ph.D., 1987, University of Georgia
- Ditterick, Megan, Extension Specialist and Coordinator, EFNEP, M.S., 2007, Colorado State University
- Deutsch, Michael Joseph, Jr., Associate Professor, Health, Nutrition, and Exercise Sciences, Ph.D., 2007, North Dakota State University
- Dittman, Jennette K., Emeritus Professor, Education, Ph.D., 1974, Pennsylvania State University
- Dobry, Alberta M., Emeritus Professor, Education, Ph.D., 1973, Michigan State University
- Douglas, Mary, Associate Professor of Practice, Health, Nutrition, and Exercise Sciences, Ph.D., 2009, Michigan State University
- Duffield, Stacy K., Professor, School of Education, Ph.D., 2003, University of North Dakota
- Erhardt, Marvin J., Adjunct Assistant Professor, Education, Ed.D., 1994, University of Wyoming
- Fitzgerald, Margaret A., Dean, College of Human Sciences and Education/Professor, Human Development and Family Science, Ph.D., 1997, Iowa State University
- Flage, Lynette, Assistant Director, Family and Community Wellness Extension, Ph.D., 2010, North Dakota State University
- Fragodt, Alvin L., Emeritus Professor, Extension, M.S., 1974, North Dakota State University
- Fuller, Heather R., Associate Professor, Human Development and Family Science, Ph.D., 2009, University of Michigan
- Gange, Kara, Associate Professor, Health, Nutrition, and Exercise Sciences, Ph.D., 2010, North Dakota State University
- Garden-Robinson, Julie A., Extension Specialist and Professor, Health, Nutrition, and Exercise Sciences, Ph.D., 1994, North Dakota State University
- German, Nicole, Associate Professor of Practice, Health, Nutrition, and Exercise Sciences, Ph.D., 2008, North Dakota State University
- Gilblom, Elizabeth, Assistant Professor, Education, Ph.D., 2017, Cleveland State University
- Gulbrandson, Ruth, Emeritus Professor, Extension, M.S., 1973, North Dakota State University
- Hackney, Kyle, Associate Professor, Health, Nutrition, and Exercise Sciences, Ph.D., 2013, Syracuse University
- Hall, Brenda S., Professor, Education, Ed.D., 1993, Virginia Polytechnic Institute and State University
- Hamre, Kellie, Senior Lecturer, Apparel, Merchandising, Interior Design and Hospitality Management, M.S., 2013, Colorado State University
- Hanson, Alan, Lecturer, Education, M.S., 1984, St. Cloud State University
- Hauser, Fredric J., Emeritus Professor, Extension, M.S., 1967, North Dakota State University
- Hektner, Joel, Professor, Human Development and Family Sciences, Department Head, Ph.D., 1996, University of Chicago
- Hill, Brent, Associate Professor, Education, Ph.D., 2011, Oklahoma State University
- Hilliard, Elizabeth, Associate Professor, Health, Nutrition, and Exercise Sciences, Ph.D., 2018, North Dakota State University
- Hoffman, Jeanette, Associate Professor of Practice, Education, Ed.D., 2006, University of St. Thomas
- Holbrook, Sandra, Adjunct Professor, Education, Ph.D., 1984, University of Minnesota
- Holm, Edna T., Emeritus Professor, Health, Nutrition, and Exercise Sciences, Ph.D., 1987, University of Minnesota

- Honrath, Kerrie, Lecturer, Health, Nutrition, and Exercise Sciences, M.S., 2013, North Dakota State University
- Horejsi, Roman J., Emeritus Professor, Health, Nutrition, and Exercise Sciences, Ed.D., 1991, University of North Dakota
- Johnson, Carrie, Extension Specialist and Associate Professor, Human Development and Family Science, Ph.D., 2012, Iowa State University
- Johnson, Nicole, Extension Specialist, Health, Nutrition, and Exercise Sciences, M.S., 2011, Nebraska Methodist College
- Johnson, Virginia Clark, Emeritus Dean and Professor, Human Development and Family Science, Ph.D., 1984, Pennsylvania State University
- Kaler, Nancy J., Senior Lecturer, Human Development and Family Science, M.S., 1981, University of North Dakota
- Kapplinger, Eunice, Associate Professor of Practice, Apparel, Merchandising, Interior Design, and Hospitality Management, M.S., 1988, Minnesota State University
- Korcuska, James S., Professor, Education, Ph.D., 2000, Kent State University
- Kota, Ryan., Assistant Professor, Health, Nutrition, and Exercise Sciences, Ph.D., 2018, Florida State University
- Kryjevskaja, Mila, Associate Professor, Physics and Education, Ph.D., 2008, University of Washington
- Lee, Jaeha, Associate Professor, Apparel, Merchandising, Interior Design and Hospitality Management, Ph.D., 2008, University of Minnesota
- Lewis, Todd, Professor, Education, Ph.D., 2002, Kent State University
- Light, Harriett E., Emeritus Professor, Human Development and Family Science, Ph.D., 1976, Michigan State University
- Linker, Jenny, Associate Professor, Health, Nutrition, and Exercise Sciences and Education, Ph.D., 2011, University of Illinois
- Lyman, Katie, Assistant Professor, Health, Nutrition, and Exercise Sciences, Ph.D., 2014, University of South Florida
- Mackey, Hollie, Associate Professor, Education, Ph.D., 2010, The Pennsylvania State University
- Manikowske, Linda J., Associate Professor, Apparel, Design, and Hospitality Management, Ph.D., 1993, Iowa State University
- Martin, William O., Professor, Education and Mathematics; Ph.D., 1993, University of Wisconsin-Madison
- Martindale, Thomas, Emeritus Professor, Extension, M.S., 1967, University of North Dakota
- Marx, Adam A., Assistant Professor, Education, Ph.D., 2014, The University of Missouri
- Maughan, Arthur W., Emeritus Professor, Health, Nutrition, and Exercise Sciences, M.S., 1966, North Dakota State University
- McAllister, Shirley E. Friend, Emeritus Professor, Apparel, Merchandising, Interior Design, and Hospitality Management, Ed.D., 1960, University of Arkansas
- McGeorge, Christine R., Professor, Human Development and Family Science, Ph.D., 2005, University of Minnesota
- McGrath, Ryan, Assistant Professor, Health, Nutrition, and Exercise Sciences, Ph.D., 2015, University of Idaho
- Montplaisir, Lisa, Professor, Biological Sciences and Education, Ph.D., 2003, University of Arizona
- Napoleon, Larry II, Assistant Professor, Education, Ph.D., 2009, Pennsylvania State University-University Park
- Narum, Gary A., Emeritus Associate Professor, Education, Ed.D., 1969, University of Wyoming
- Nass, Marillyn, Emeritus Professor, Health, Nutrition, and Exercise Sciences, M.S., 1955, Pennsylvania State University
- Nelson, Jill, Professor and Associate Dean, Education, Ph.D., 2005, Kent State University
- Nielsen, Robert C., Emeritus Professor, Education, Ed.D., 1973, University of Northern Colorado
- North, Barbara B., Emeritus Professor, Health, Nutrition, and Exercise Sciences, M.S., 1959, University of Minnesota
- Nyachwaya, James, Assistant Professor, Education and Chemistry, Ph.D., 2012, University of Minnesota, Minneapolis
- O'Connor, Melissa, Associate Professor, Human Development and Family Science, Ph.D., 2010, University of South Florida
- Overton, Kimberly A., Associate Professor of Practice, Education, Ph.D., 2008, North Dakota State University
- Pankow, Debra L., Associate Professor Emeritus and Extension Specialist, Human Development and Family Science, Ph.D., 2002, South Dakota State University
- Park, Jeongdoo, Assistant Professor, Apparel, Merchandising, Interior Design, and Hospitality Management, Ph.D., 2014, Washington State University
- Park, Kwangsoo, Associate Professor, Apparel, Merchandising, Interior Design, and Hospitality Management, Department Head and Stegner Endowed Professor, Ph.D., 2013, Temple State University
- Philbrick, Candace, Senior Lecturer, Human Development and Family Science, Ph.D., 2008, North Dakota State University
- Pieterick, Justin, Lecturer, Health, Nutrition, and Exercise Sciences, M.S., 2016, Minnesota State University Moorhead
- Quamme, Susan, Extension Specialist, 4-H Youth Development – Youth Leadership and Civic Engagement, M.S., North Dakota State University, 2011
- Query, Sharon, Associate Professor of Practice Emeritus, Human Development and Family Science, Ph.D., Iowa State University, 1997
- Ragan, Ann, Senior Lecturer, Apparel, Merchandising, Interior Design, and Hospitality Management, M.S., 2013, University of Nebraska-Lincoln
- Randall, Brandy A., Professor, Human Development and Family Science, Ph.D., 2002, University of Nebraska-Lincoln
- Ray, Chris M, Associate Professor, Education and Head of the School of Education, Ph.D., 2007, Oklahoma State University
- Ray-Degges, Susan, Professor, Apparel, Merchandising, Interior Design, and Hospitality Management, Ph.D., 1995, University of Missouri-Columbia
- Redenius, Nicklaus, Lecturer, Health, Nutrition, and Exercise Sciences, M.S., 2016, North Dakota State University
- Rhee, Yeong S., Professor, Health, Nutrition, and Exercise Sciences, Department Head, Ph.D., 1999, Oklahoma State University

- Roseno, Ashley, Assistant Professor, Health, Nutrition, and Exercise Sciences, Ph.D., 2019, North Carolina State University
- Salajan, Florin D., Associate Professor, Education, Ed.D., 2007, Columbia University
- Sanders, Gregory F., Emeritus Professor, Human Development and Family Science; Ph.D., 1983, University of Georgia
- Sassi, Kelly, Associate Professor, English and Education, Ph.D., 2008, University of Michigan
- Scoby, Donald R., Emeritus Professor, Botany/Biology and Education, Ph.D., 1968, North Dakota State University
- Hoffmann, Meagan, Assistant Professor/Extension 4H Youth Development Specialist, Ph.D., Oklahoma State University
- Shume, Teresa, Assistant Professor, Education, Ph.D., 2013, University of North Dakota
- Stastny, Sherri N., Professor, Health, Nutrition, and Exercise Sciences, Ph.D., 2007, North Dakota State University
- Strand, Bradford N., Professor, Health, Nutrition, and Exercise Sciences, Ph.D., 1988, University of New Mexico
- Strommen, Jane, Assistant Professor of Practice, Human Development and Family Sciences, Ph.D. 2013, North Dakota State University
- Sunderlin, Sara, Senior Lecturer, Apparel, Merchandising, Interior Design, and Hospitality Management, M.S., 2001, North Dakota State University
- Teigland, John J., Emeritus Professor, Education, Ph.D., 1964, University of North Dakota
- Tangen, Jodi, Assistant Professor, Education, Ph.D., 2015, University of North Carolina, Greensboro
- Terbizan, Donna J., Professor, Health, Nutrition, and Exercise Sciences, Ph.D., 1982, Ohio State University
- Tracy, Tyler, Lecturer, Health, Nutrition, and Exercise Sciences, M.S., 2013, North Dakota State University
- Trautwein, Charlotte G., Emeritus Professor, Music and Human Development and Family Science and Education, M.S., 1968, University of Illinois
- Vetter, Rachelle E., Associate Professor, Education; Extension Specialist, Ph.D., 2006, North Dakota State University
- Wageman, Justin, Professor, Education, Ph.D., 1999, University of North Dakota
- Wallman, George H., Emeritus Professor, Education, Ph.D., 1980, Michigan State University
- Werlinger, Ann, Senior Lecturer, Human Development and Family Science, M.S., 2005, North Dakota State University
- Wigtil, James V., Emeritus Professor, Education, Ed.D., 1966, Indiana University
- Wilcox, Heidi, Adjunct Professor, Apparel, Design, and Hospitality Management, MPA, 2002, University of Mary
- Winters, Lynette, Director Emeriti, Health, Nutrition, and Exercise Sciences, M.S., 1987, South Dakota State University
- Wood, Nathan, Associate Professor, Education, Ph.D., 2006, University of Minnesota
- Woods, Rebecca, Associate Professor, Human Development and Family Science, Ph.D., 2006, Texas A&M University
- Woods, William G., Emeritus Professor, Education, Ed.D., 1969, Washington State University
- Wyum, Dena, Senior Lecturer, Human Development and Family Science, M.S., 2008, North Dakota State University

# College of Science and Mathematics

---

Opportunities in the college reflect the belief that an understanding of the methods and findings of science is best achieved through first-hand experience in the process of conducting, analyzing, and reporting research. Students are encouraged to participate in this process by working closely with faculty and other students in laboratory and field research, thus gaining direct knowledge of the power, limits, and problems in scientific inquiry. These opportunities for direct experience with the tools of the scientist are liberally available to the interested and motivated student.

## Degree Programs

The College of Science and Mathematics provides undergraduate programs leading to a Bachelor of Science or Bachelor of Arts degree. Graduate programs at the master's and doctoral levels also are offered.

## Undergraduate Programs of Study

All majors are required to complete departmental and general education requirements. Available majors include the following:

- Behavioral Statistics
- Biochemistry and Molecular Biology
- Biological Sciences
- Biotechnology
- Chemistry
- Geology
- Mathematics
- Physics
- Psychology
- Statistics

Minors are also available in most departments.

## College Requirements

General college requirements for the two undergraduate degrees extend beyond the minimum university general education requirements (<https://www.ndsu.edu/registrar/academics/gened>). The college requires an additional six credits in humanities and/or social sciences for the Bachelor of Science degree and an additional 12 credits for the Bachelor of Arts degree. This requirement may be fulfilled by any degree-eligible course having the following prefix: ADHM, ANTH, ARCH, ART, CJ, CLAS, COMM, ECON, ENGL, FREN, GEOG, GERM, HDFS, HIST, LA, LANG, MUSC, PHIL, POLS, PSYC, RELS, SOC, SPAN, THEA, WGS, or any course from the approved list of general education courses in humanities and social sciences (general education categories A and B). These credits must come from outside the department of the student's major. An adviser should be consulted for specific courses. Students also are encouraged to follow their own interests in choosing electives that go beyond the minimum requirements.

## Pass/Fail Grading

Courses to fulfill the major requirements in the college may not be taken pass/fail with the exception of courses that are only offered pass/fail. Only elective courses outside the major may be taken pass/fail. Some departments require a grade of 'C' or higher in courses to count toward major requirements. This includes both NDSU and transferred coursework.

## Bachelor of Arts Degree

B.A. degree requirements are the same as the B.S. degree with an additional six credits of humanities or social and behavioral sciences and the addition of two years of a modern foreign language. This means completion of the second year of college-level language or the equivalent. Refer to the Bachelor of Arts Requirement using a Second Language (p. 124) section within the Academic Degree Information (p. 74) section of the Academic Policies (p. 66).

All degree candidates must apply for graduation through the Office of Registration and Records (<https://www.ndsu.edu/registrar>) according to university procedures and deadlines.

## Specializations

Specializations are provided for career preparation in a range of areas.

## Pre-Professional Programs

Pre-professional curricula are offered by a number of departments for students interested in preparing for careers in medicine, dentistry, mortuary science, chiropractic, optometry, osteopathy, and other health related fields. Most pre-professional programs are flexible and can be developed

around many different majors. Departments that advise pre-professional majors include biological sciences, chemistry and biochemistry, physics and psychology.

In addition to the preceding, a number of departments have developed other specializations to meet today's rapidly changing job markets. These may be found in the individual department sections as follows:

- **Biological Sciences:** environmental science, biotechnology, biological sciences education, comprehensive science education, wildlife and fisheries biology, cell biology/physiology, and zoology
- **Chemistry:** biochemistry, biotechnology, chemistry education, pre-professional chemistry, coatings and polymeric materials
- **Geosciences:** geochemistry
- **Psychology:** natural science, social sciences, behavioral neuroscience, industrial-organizational, human services, managerial psychology, and experimental

## Teacher Certification

Several of the majors available through the College of Science and Mathematics may lead to careers in teaching.

Students may complete the requirements for a major in the college, then apply for admission to the School of Education (<https://www.ndsu.edu/education>) in the College of Human Development and Education to undertake the additional requirements necessary to qualify for teacher certification. Alternatively, students may initially select a science and mathematics education curriculum offered through the School of Education.

Programs leading to teacher certification are available in the following areas: biological sciences, chemistry, comprehensive science, earth science, mathematics, and physics.

Students interested in teacher education are encouraged to declare a double major in their discipline and in education (i.e., chemistry education and chemistry). Such double majors may be earned by successful completion of a few additional credits. Students should contact their advisers for details, and are encouraged to declare their primary and secondary majors with the Office of Registration and Records, 110 Ceres Hall.

## Pre-Medicine and Pre-Dentistry Programs

While Pre-Medical Professions is not a declarable major or degree program at NDSU, the College of Science and Mathematics offers a variety of majors that will prepare students for entrance exams and acceptance to their medical profession program of choice. NDSU students who wish to pursue a medical program within medicine, dentistry, optometry, physician's assistant, mortuary science, or chiropractic while completing a baccalaureate degree must declare a major and complete all degree and university requirements in conjunction with fulfilling medical profession requirements.

Students preparing for application to a medical professional school should consult with a pre-medical professions advisor. We encourage you to visit the Pre-Medical Professions ([https://www.ndsu.edu/prehealth\\_programs](https://www.ndsu.edu/prehealth_programs)) website for more information and scheduling an advising appointment.

In order for NDSU students to be competitive for their intended graduate program, they must:

- Show strong academic performance in all required and recommended coursework.
- Participate in out of classroom experiences such as volunteering, peer mentoring or tutoring, research activities, health related work opportunities and job shadowing.
- Get involved with student organizations that offer guest speakers, community service opportunities and support. Pursue leadership opportunities.
- Make connections with faculty and medical professionals.
- Practice and prepare for required entrance exams.
- Attend seminars and information sessions that are offered to provide information and resources regarding application and interview processes.

Contact the Department of Biological Sciences (<https://www.ndsu.edu/biology>) for additional information (231-7087).

## Interdisciplinary Programs

The College of Science and Mathematics participates in the following undergraduate interdisciplinary programs.

### Biotechnology Major

Biotechnology is an interdisciplinary field based on a combination of biology and technology. It includes the application of science and technology to the design of new plants, animals, and microorganisms that have improved characteristics.

### Natural Resources Management Major

This interdisciplinary program is available through the College of Science and Mathematics' Biological Sciences Department (p. 1084) and the College of Agriculture, Food Systems and Natural Resources' School of Natural Resources (p. 1117) and the College of Engineering (<https://www.ndsu.edu/coe>).

## Cooperative Education

Cooperative Education, a program of the Career Center, offers undergraduate and graduate students an opportunity to integrate classroom study with paid, career-related work experience for academic credit. Work may be full or part time. A Cooperative Education experience may substantially improve students' employment opportunities after graduation. Students may obtain one or two semesters of professional work experience related to their studies; however, no more than a total of three credits may be applied to the minimum of 122 credits required for the degree. Each department has specific requirements for earning these credits. The student must have approval from the department chair prior to beginning the Cooperative Education (<https://career.ndsu.edu/internship-program>) program. See Career Center (<https://www.ndsu.edu/career>) for more information.

Biological Sciences (p. 1084)

Chemistry & Biochemistry (p. 1085)

Coatings & Polymeric Materials (p. 1087)

Geosciences (p. 1101)

Mathematics (p. 1109)

School of Natural Resource Sciences (p. 1117)

Physics (p. 1123)

Psychology (p. 1126)

Statistics (p. 1128)

## College Requirements

Code	Title	Credits
	<b>Bachelor of Arts (BA) Degree – An additional 12 credits Humanities and Social Sciences and proficiency at the second year level in a modern foreign language.*</b>	12
	<b>Bachelor of Science (BS) Degree – An additional 6 credits in Humanities or Social Sciences*</b>	6

\* Humanities and Social Sciences may be fulfilled by any course having the following prefix: ADHM, ANTH, ARCH, ART, CJ, CLAS, COMM, ECON, ENGL, FREN, GEOG, GERM, HDFS, HIST, LA, LANG, MUSC, PHIL, POLS, PSYC, RELS, SOC, SPAN, THEA, WGS, or any course from the approved list of general education courses in humanities and social sciences (general education categories A and B). These credits must come from outside the department of the student's major.

## Faculty

- Akhmedov, Azer, Associate Professor of Mathematics, Ph.D., 2004, Yale University
- Aldrich-Wolfe, Laura, Assistant Professor of Biological Sciences, Ph.D., 2006, Cornell University
- Alfonso, Maria, Associate Professor of Mathematics, Ph.D., 2003, Universidad Autonoma de Madrid, Spain
- Anteau, Michael J, Adjunct Professor of Biological Sciences, Ph.D., 2006, Louisiana State University
- Ashworth, Allan C., Emeritus University Distinguished Professor and James A. Meier Professor of Geology, Ph.D., 1969, University of Birmingham, England
- Balas, Benjamin, Associate Professor of Psychology, Ph.D., 2007, Massachusetts Institute of Technology
- Barabanov, Nikita, Professor of Mathematics, Ph.D., 1979, Leningrad University, Russia, Doctor of Science, 1990, Kiev Institute of Cybernetics
- Battocchi, Dante, Assistant Professor of Coatings and Polymeric Materials, Ph.D., 2002, University of Trento, Italy
- Bierwagen, Gordon, Emeritus Professor of Coatings and Polymeric Materials, Ph.D., 1968, Iowa State University
- Blakeslee, Barbara, Research Professor of Psychology, Ph.D., 1983, University of California, Santa Barbara
- Bleier, William J., Emeritus Distinguished Professor and Jordan Engberg Professor of Biological Sciences, Ph.D., 1975, Texas Tech University
- Booth, Kimberly, Assistant Professor of Practice in Biological Sciences, Ph.D., 2016, North Dakota State University
- Boudjouk, Philip, Distinguished Professor of Chemistry and Biochemistry, Ph.D., 1971, University of Wisconsin, Madison
- Bowsher, Julia H., Associate Professor of Biological Sciences, Ph.D., 2007, Duke University
- Boynton, Jason, Associate Professor of Mathematics, Ph.D., 2006, Florida Atlantic University
- Brammer, J.D., Emeritus Professor of Biological Sciences, Ph.D., 1968, Purdue University
- Brophy, John A., Emeritus Professor of Geology, Ph.D., 1958, University of Illinois
- Buckner, James S., Adjunct Professor of Chemistry and Biochemistry, Ph.D., 1971, North Dakota State University
- Buitron, Deborah, Adjunct Professor of Biological Sciences, Ph.D., 1982, University of Minnesota

- Buncher, John, Assistant Professor of Practice of Physics, Ph.D., 2010, Purdue University
- Burghaus, Uwe, Associate Professor of Chemistry and Biochemistry, Ph.D., 1995, Free University Berlin
- Butler, Malcolm G., Emeritus Professor of Biological Sciences, Ph.D., 1980, University of Michigan
- Calvo, Jorge, Adjunct Professor of Mathematics, Ph.D., 1998, University of California-Santa Barbara
- Choi, Bong-Jin, Assistant Professor of Statistics, Ph.D., 2014, University of South Florida
- Choi, Yongki, Assistant Professor of Physics, Ph.D., 2010, City University of New York
- Christensen, Warren, Associate Professor of Physics/School of Education, Ph.D., 2007, Iowa State University
- Ciuperca, Catalin, Associate Professor of Mathematics, Ph.D., 2001, University of Kansas
- Clambey, Gary K., Emeritus Associate Professor of Biological Sciences, Ph.D., 1975, Iowa State University
- Colbert, Christopher, Associate Professor of Chemistry and Biochemistry, Ph.D., 2000, Purdue University
- Coleman, Martin, Associate Professor of Psychology, Ph.D., 2005, University of Sussex
- Çömez, Doğan, Professor of Mathematics, Ph.D., 1983, University of Toronto, Canada
- Conwell, Erin, Associate Professor of Psychology, Ph.D., 2009, Brown University
- Cook, Gregory, Professor of Chemistry and Biochemistry; Department Chair, Ph.D., 1993, Michigan State University
- Coonce, Harry B., Adjunct Professor of Mathematics, Ph.D., 1969, University of Delaware
- Cope, Davis, Emeritus Associate Professor of Mathematics, Ph.D., 1980, Vanderbilt University
- Coykendall, James, Adjunct James A. Meier Professor of Mathematics, Ph.D., 1995, Cornell University
- Croll, Andrew, Associate Professor of Physics, Ph.D., 2009, McMaster University, Ontario
- Croll, Stuart G., Emeritus Professor of Coatings and Polymeric Materials, Adjunct Professor of Physics, Ph.D., 1974, University of Leeds, U.K.
- Crosby, Ross D., Adjunct Professor of Psychology, Ph.D., 1989, University of Nevada, Reno
- Day, Stephanie S., Associate Professor of Geology, Ph.D., 2012, University of Minnesota
- Degges, Ronald C., Professor of Practice of Statistics, , Ph.D., 2011, North Dakota State University
- Denton, Alan R., Professor of Physics, Ph.D., 1991, Cornell University
- Dochtermann, Ned A., Associate Professor of Biological Sciences, Ph.D., 2009, University of Nevada-Reno
- Dorfmeister, Josef, Associate Professor of Mathematics, Ph.D., 2009, University of Minnesota
- Duncan, Benton, Professor of Mathematics; Department Chair, Ph.D., 2004, University of Nebraska-Lincoln
- Duggan, Katherine A., Assistant Professor of Psychology, Ph.D., 2016, University of California, Riverside
- Duysen, Murray E., Emeritus Professor of Biological Sciences, Ph.D., 1966, University of Nebraska
- Egorov, Ivan, Assistant Professor of Mathematics, Ph.D., 2014, Lomonosov Moscow State University
- Esslinger, Theodore L., Emeritus Professor of Biological Sciences, Ph.D., 1974, Duke University
- Euliss, Ned, Adjunct Professor of Biological Sciences, Ph.D., 1989, Oregon State University
- Fawley, Karen, Adjunct Professor of Biological Sciences, Ph.D., 1998, North Dakota State University
- Fawley, Marvin W., Adjunct Professor of Biological Sciences, Ph.D., 1985, Miami University
- Fischer, Allan G., Emeritus Dean and Emeritus Professor of Biochemistry and Molecular Biology, Ph.D., 1966, Indiana University
- Fulton, Mark R., Adjunct Professor of Biological Sciences, Ph.D., 1991, Uppsala University
- Galitz, Donald S., Emeritus Professor of Biological Sciences, Ph.D., 1961, University of Illinois
- Garvey, Roy G., Emeritus Professor of Chemistry and Biochemistry, Ph.D., 1966, University of Utah
- Gelling, Victoria Johnston, Adjunct Professor of Coatings and Polymeric Materials, Ph.D., 2001, North Dakota State University
- Gephard, Matthew S., Adjunct Professor of Coatings and Polymeric Materials, Ph.D., 1990, Stanford University
- Gerst, Jeffery W., Emeritus Professor of Biological Sciences, Ph.D., 1973, University of Nebraska
- Gillam, Erin H., Associate Professor of Biological Sciences, Ph.D., 2007, University of Tennessee
- Glass, J. Edward, Adjunct Professor of Coatings and Polymeric Materials, Ph.D., 1964, Purdue University
- Greenlee, Kendra J., Professor and Chair of Biological Sciences, Ph.D., 2004, Arizona State University
- Greenwood, Torin, Assistant Professor of Mathematics, Ph.D., 2015, University of Pennsylvania
- Greives, Timothy J., Associate Professor of Biological Sciences, Ph.D., 2009, Indiana University-Bloomington
- Grier, James W., Emeritus Professor of Biological Sciences, Ph.D., 1975, Cornell University
- Hakk, Heldur, Adjunct Professor of Chemistry and Biochemistry, Ph.D., 1997, North Dakota State University
- Hamilton, Jill, Assistant Professor of Biological Sciences, Ph.D., 2012, University of British Columbia
- Hamm, Jeremy, Assistant Professor of Psychology, Ph.D., 2016, University of Manitoba
- Hammond, James J., Adjunct Professor of Statistics, Ph.D., 1969, University of Nebraska
- Hammond, Richard, Adjunct Professor of Physics, Ph.D., 1979, Rensselaer Polytechnic Institute
- Hanson, Mark A., Adjunct Professor of Biological Sciences, Ph.D., 1990, North Dakota State University

- Haring, Ferdinand, Emeritus Professor of Mathematics, M.S., 1962, Illinois Institute of Technology
- Haring, Stuart, Associate Professor of Chemistry and Biochemistry, Ph.D., 2004, University of Iowa
- Hass, Lonnie D., Emeritus Senior Lecturer of Mathematics, M.A., 1972, University of Illinois
- Hatzenbuehler, Elaine C., Emeritus Senior Lecturer of Geology, B.S., 1971, Kansas State University
- Heidinger, Britt J., Associate Professor of Biological Sciences, Ph.D., 2007, Indiana University
- Heilmann, Larry J., Adjunct Professor of Chemistry and Biochemistry, Ph.D., 1984, Wesleyan University
- Hershberger, John F., Professor of Chemistry and Biochemistry, Ph.D., 1986, Yale University
- Hill, Loren, Adjunct Professor of Coatings and Polymeric Materials, Ph.D., 1965, Pennsylvania State University
- Hilmert, Clayton J., Associate Professor of Psychology, Ph.D., 2003, University of California-San Diego
- Hinsz, Verlin B., Professor of Psychology, Ph.D., 1983, University of Illinois
- Hobbie, Erik K., Professor of Physics/Coatings and Polymeric Materials; Director of Materials and Nanotechnology Program, Ph.D., 1990, University of Minnesota
- Hodgson, Angela L., Associate Professor of Practice of Biological Sciences, Ph.D., 2010, University of Minnesota
- Irish, Leah A., Assistant Professor of Psychology, Ph.D., 2011, Kent State University
- Jacobson, Denley B., Associate Professor of Chemistry and Biochemistry, Ph.D., 1984, Purdue University
- Johnson, Douglas H., Adjunct Professor of Biological Sciences, Ph.D., 1986, North Dakota State University
- Johnson, Ivan M., Adjunct Professor of Biological Sciences, Ph.D., 1969, University of Montana
- Johnson, Jeffrey S., Associate Professor of Psychology, Ph.D., 2008, University of Iowa
- Johnson, Kenneth R., Emeritus Professor of Mathematics, Ph.D., 1980, University of Colorado
- Kaster, Jessica, Adjunct Professor of Psychology, Ph.D., 2004, University of North Dakota
- Kenyon, Mary Jo, Senior Lecturer of Biological Sciences, M.S., 1997, North Dakota State University
- Kilin, Dmitri, Assistant Professor Chemistry, Ph.D., 2000, Chemnitz University of Technology
- Kilina, Svetlana, Associate Professor of Chemistry and Biochemistry, Ph.D., 2007, University of Washington
- Killilea, S. Derek, Professor Emeritus of Chemistry and Biochemistry, Ph.D., 1972, National University of Ireland, Galway, Ireland
- Kim, Jiha, Assistant Professor of Biological Sciences, Ph.D., 2006, University of Georgia
- Kolka, Randall, Adjunct Professor of Biological Sciences, Ph.D., 1996, University of Minnesota
- Kornfeld, Isaac, Emeritus Professor of Mathematics, Ph.D., 1975, Tashkent State University, Uzbekistan
- Kroll, Daniel, Emeritus Professor of Physics, Ph.D., 1973, University of Chicago
- Kryjevskaja, Liudmila, Associate Professor of Physics and School of Education, Ph.D., 2008, University of Washington
- Kryjevski, Andrei, Assistant Professor of Physics, Ph.D., 2004, University of Washington
- Laabs, Benjamin C., Assistant Professor of Geology, Ph.D., 2004, University of Wisconsin-Madison
- Langley, Linda, Associate Professor of Psychology, Ph.D., 1998, University of Minnesota
- Larsen, Gerald L., Adjunct Professor of Chemistry and Biochemistry, Ph.D., 1980, North Dakota State University
- Leontyev, Alexey, Assistant Professor of Chemistry and Biochemistry, Ph.D., 2015, University of Northern Colorado
- Leopold, Roger A., Adjunct Professor of Biological Sciences, Ph.D., 1967, Montana State University
- Lepper, Kenneth, Professor of Geology, Ph.D., 2001, Oklahoma State University
- Lexvold, Andrew, Lecturer of Statistics, M.S., 2016, North Dakota State University
- Liu, Guodong, Associate Professor of Chemistry and Biochemistry, Ph.D., 2001, Hunan University, China
- Linz, George M., Adjunct Professor of Biological Sciences, Ph.D., 1981, North Dakota State University
- Littmann, Friedrich, Professor of Mathematics, Ph.D., 2003, University of Illinois at Urbana-Champaign
- Lukat-Rodgers, Gudrun, Research Professor of Chemistry and Biochemistry, Ph.D., 1985, Iowa State University
- Magel, Rhonda, Professor of Statistics; Department Chair, Ph.D., 1982, University of Missouri-Rolla
- Marry, Andrew M., Adjunct Professor of Biological Sciences, Ph.D., 1998, John Innes Centre
- Martin, William O., Professor of Mathematics, Ph.D., 1993, University of Wisconsin - Madison
- Mathsen, Ronald M., Emeritus Professor of Mathematics, Ph.D., 1965, University of Nebraska
- May, Sylvio, Professor and Chair of Physics, Ph.D., 1996, Friedrich Schiller University
- McCarthy, Gregory J., Distinguished Professor of Chemistry and Biochemistry, Adjunct Professor of Geology, Ph.D., 1969, Pennsylvania State University
- McCaul, Kevin D., Emeritus Dean, Emeritus Professor and Dale Hogoboom Professor of Psychology, Ph.D., 1978, University of Kansas
- McCourt, Mark, Dale Hogoboom Professor of Psychology, Ph.D., 1982, University of California, Santa Barbara
- McEwen, Daniel C., Adjunct Professor of Biological Sciences, Ph.D., 2008, North Dakota State University
- Meidinger, Alfred, Adjunct Professor of Physics, Ph.D., 2000, North Dakota State University

- Mitchell, James E., Adjunct Professor of Psychology, M.D., 1972, Northwestern University
- Momsen, Jennifer L., Associate Professor of Biological Sciences, Ph.D., 2007, Rutgers University
- Montplaisir, Lisa M., Professor of Biological Sciences, Ph.D., 2003, University of Arizona
- Morris, Melvin L., Emeritus Professor of Chemistry and Biochemistry, Ph.D., 1958, Ohio State University
- Munski, Douglas, Adjunct Professor of Geosciences, Ph.D., 1978, University of Illinois at Urbana-Champaign
- Nawrot, Mark, James A. Meier Professor of Psychology, Department Chair, Ph.D., 1991, Vanderbilt University
- Nelson, Carolyn C., Emeritus Senior Lecturer of Mathematics, M.S., 1960, North Dakota State University
- Nelson, Gilbert W., Emeritus Professor of Mathematics, M.S., 1958, North Dakota State University
- Nickell, Gary S., Adjunct Professor of Psychology, Ph.D., 1982, Oklahoma State University
- Novozhilov, Artem S., Associate Professor of Mathematics, Ph.D., 2002, Moscow State University of Railway Engineering
- Nuechterlein, Gary L., Emeritus Professor of Biological Sciences, Ph.D., 1980, University of Minnesota
- Nyachwaya, James, Associate Professor of Chemistry and Education, Ph.D., expected Spring 2012, University of Minnesota
- Oduor, Peter, Professor of Geology, Ph.D., 2004, University of Missouri - Rolla
- Oleson, Arland E., Emeritus Professor of Biochemistry and Biochemistry, Ph.D., 1963, University of Minnesota
- Olson, Lloyd D., Emeritus Professor of Mathematics, M.Ed., 1954, North Dakota State University
- O'Neill, George P., Adjunct Professor of Psychology, Ph.D., 1974, Georgia State University
- O'Neill, H.K., Adjunct Professor of Psychology, Ph.D., 1991, University of North Dakota
- Orr, Megan, Associate Professor of Statistics, Ph.D., expected Spring 2012, Iowa State University
- Otte, Marinus L., Professor of Biological Sciences, Ph.D., 1991, Vrije Universiteit of Amsterdam
- Parent, Alexander, Assistant Professor of Chemistry and Biochemistry, Ph.D., 2013, Yale University
- Park, Ernest, Adjunct Professor of Psychology, Ph.D., 2003, Michigan State University
- Peterka, John J., Emeritus Professor of Biological Sciences, Ph.D., 1964, University of Minnesota
- Pokhodnya, Konstantin, Adjunct Professor of Chemistry and Biochemistry and Physics, Ph.D., 1977, Moscow Institute of Physics and Technology
- Pourhashem FakharLangeroudi, Ghasideh, Assistant Professor of Coatings and Polymeric Materials, Ph.D., 2014, Drexel University,
- Provder, Theodore, Adjunct Professor of Coatings and Polymeric Materials, Ph.D., 1965, University of Wisconsin
- Puyear, Robert L., Emeritus Professor of Biological Sciences, Ph.D., 1964, Oregon State University
- Quadir, Mohiuddin, Assistant Professor of Coatings and Polymeric Materials, Ph.D., 2010, Free University Berlin, Berlin, Germany
- Rao, M. Bhaskara, Emeritus Professor of Statistics, Adjunct Professor of Mathematics, Ph.D., 1973, Indian Statistical Institute, India
- Rasmussen, Seth C., Professor of Chemistry and Biochemistry, Ph.D., 1994, Clemson University, South Carolina
- Rasulev, Bakhtiyor, Assistant Professor of Coatings and Polymeric Materials, Ph.D., 2002, Uzbek Academy of Science, Uzbekistan
- Reindl, Katie M., Associate Professor of Biological Sciences, Ph.D., 2006, North Dakota State University
- Reiser, Mary, Adjunct Professor of Biological Sciences, Ph.D., 1988, Arizona State University
- Richardson, J.L., Adjunct Professor of Geosciences, Ph.D., 1974, Iowa State University
- Robinson, Michael D., James A. Meier Professor of Psychology, Ph.D., 1996, University of California-Davis
- Rock, Jessie, Lecturer of Geology, M.S., 2009, North Dakota State University
- Rodgers, Kenton R., Professor of Chemistry and Biochemistry, Ph.D., 1988, University of Iowa
- Roesler, Richard R., Adjunct Professor of Coatings and Polymeric Materials, Ph.D., 1969, University of Washington
- Rokke, Paul D., Professor of Psychology, Ph.D., 1985, University of Houston
- Routledge, Clay, Professor of Psychology, Ph.D., 2005, University of Missouri-Columbia
- Rudesill, James T., Emeritus Professor of Chemistry and Biochemistry, Ph.D., 1957, Purdue University
- Saini-Eidukat, Bernhardt, Professor of Geology, Ph.D., 1991, University of Minnesota
- Sawicki, Charles A., Emeritus Associate Professor of Physics, Ph.D., 1975, Cornell University
- Schwert, Donald P., Emeritus Professor of Geology; Ph.D., 1978, University of Waterloo, Canada
- Scoby, Donald R., Emeritus Professor of Biological Sciences, Ph.D., 1968, North Dakota State University
- SenGupta, Indranil, Associate Professor of Mathematics, Ph.D., 2010, Texas A&M University
- Shappell, Nancy, Adjunct Professor of Biological Sciences, Ph.D., 1988, Virginia Polytechnic University
- Shen, Gang, Associate Professor of Statistics, Ph.D., 2009, Purdue University
- Shreve, Warren E., Emeritus Professor of Mathematics, Ph.D., 1967, University of Nebraska
- Sibi, Mukund P., Distinguished and James A. Meier Professor of Chemistry and Biochemistry, Ph.D., 1980, City University of New York
- Signor, Sarah, Assistant Professor Biological Sciences, Ph.D., 2013, University of California, Davis
- Sinha, Mahendra K., Emeritus Professor of Physics, Ph.D., 1961, Pennsylvania State University
- Sinha, Sangita, Professor of Chemistry and Biochemistry, Ph.D., 2000, Purdue University

- Skerry, Brian, Adjunct Professor of Coatings and Polymeric Materials, Ph.D., 1980, University of Manchester, U.K.
- Slanger, William D., Adjunct Professor of Statistics, Ph.D., 1975, Cornell University
- Smith, Matthew T., Associate Professor of Practice of Biological Sciences, Ph.D., 2012, University of Arkansas
- Sovada, Marsha A., Adjunct Professor of Biological Sciences, Ph.D., 1993, North Dakota State University
- Sparks, Robert B., Emeritus Associate Professor of Chemistry and Biochemistry, Ph.D., 1972, University of South Dakota
- Srivastava, D.K., Professor of Chemistry and Biochemistry, Ph.D., 1980, Banaras Hindu University, India
- Stockwell, Craig A., James A. Meier Professor of Biological Sciences, Ph.D., 1995, University of Nevada, Reno
- Striker, Jessica, Associate Professor of Mathematics, Ph.D., 2008, University of Minnesota
- Sun, Wenfang, Walter F. Verna Gehrts and James A. Meier Professor of Chemistry and Biochemistry, Ph.D., 1995, Institute of Photographic Chemistry, Chinese Academy of Science
- Suttle, Jeffrey C., Adjunct Professor of Biological Sciences, Ph.D., 1979, Michigan State University
- Sweetman, John, Assistant Professor of Biological Sciences, Ph.D., 2006, Queen's University
- Swenson, Rodney, Adjunct Professor of Psychology, Ph.D., 1985, University of North Dakota
- Swenson, Orven F., Emeritus Associate Professor of Physics, Ph.D., 1982, Air Force Institute of Technology
- Tackett, Lydia S., Assistant Professor of Geology, Ph.D., 2014, University of Southern California
- Tallman, Dennis E., Emeritus Professor of Chemistry and Biochemistry and Coatings and Polymeric Materials, Ph.D., 1968, Ohio State University
- Thomas, Laura E., Associate Professor of Psychology, Ph.D., 2008, University of Illinois
- Travers, Steven E., Associate Professor of Biological Sciences, Ph.D., 1998, University of California, Santa Barbara
- Tucker, Robert, Adjunct Professor of Chemistry and Biochemistry, Ph.D., 1967, Iowa State University
- Ungar, Abraham A., Professor of Mathematics, Ph.D., 1973, Tel Aviv University, Israel
- Vick, Brady A., Adjunct Professor of Chemistry and Biochemistry, Ph.D., 1975, North Dakota State University
- Vinograd, Robert E., Emeritus Professor of Mathematics, Ph.D., 1952, Moscow State University, D.Sc., 1960, Moscow State University, Russia
- Voronov, Andriy, Professor of Coatings and Polymeric Materials, Ph.D., 1994, Lviv Polytechnic Institute, Ukraine
- Wagner, Alexander, Associate Professor of Physics, Ph.D., 1997, Oxford University
- Wallin, Kimberly, Dean, Ph.D., 2002, University of Wisconsin-Madison
- Webster, Dean C., Professor of Coatings and Polymeric Materials, Department Chair, Ph.D., 1984, Virginia Polytechnic Institute and State University
- White, Alan R., Adjunct Professor of Biological Sciences, Ph.D., 1981, University of North Carolina
- Wilkinson, John C., Associate Professor of Chemistry and Biochemistry, Ph.D., 2001, Vanderbilt University
- Windels, Steve K., Adjunct Professor of Biological Sciences, Ph.D., 2008, Michigan Technological University
- Wisenden, Brian, Adjunct Professor of Biological Sciences, Ph.D., 1993, University of Western Ontario
- Wissman, Kathryn, Assistant Professor of Psychology, Ph.D., Kent State University
- Withnell, Gary D., Adjunct Professor of Physics, Ph.D., 1980, North Dakota State University
- Wittrock, David A., Professor of Psychology, Ph.D., 1990, State University of New York, Albany
- Wonderlich, Stephen A., Adjunct Professor of Psychology, Ph.D., 1985, University of Missouri
- Wood, Scott A., Professor of Geology, Ph.D., 1985, Princeton University
- Van Amburg, Gerald L., Adjunct Professor of Biological Sciences, Ph.D., 1969, Texas A&M University
- Yang, Zhongyu, Assistant Professor of Chemistry and Biochemistry, Ph.D., 2010, University of Pittsburgh
- Yuan, Mingao, Assistant Professor of Statistics, Ph.D., 2018, Purdue University
- Zhao, Pinjing, Associate Professor of Chemistry and Biochemistry, Ph.D., 2003, Cornell University

# Admission

---

Our diverse student body includes students from all backgrounds, each seeking an academically rigorous education within a supportive community. No matter what type of student you are, we want to make your application experience as seamless as possible.

For undergraduate admission, choose from the menu options on the right-hand side of the page to learn more about your specific application process and requirements. Perspective students can also log onto the Office of Admission ([https://www.ndsu.edu/admission/how\\_to\\_apply](https://www.ndsu.edu/admission/how_to_apply)) website for undergraduate domestic, permanent resident and international student application information.

Admission to the Graduate College is a selective process intended to identify applicants who are outstanding among recipients of baccalaureate degrees. The following minimum qualifications are required of all students seeking an advanced degree:

1. The applicant must have a baccalaureate degree from an educational institution of recognized standing.
2. The applicant must have adequate preparation in the chosen field of study and must show potential to undertake advanced study and research as evidenced by academic performance and experience.
3. At the baccalaureate level, the applicant must have earned a cumulative grade point average (GPA) of at least 3.0, or equivalent, to attain full standing in a graduate degree program. Applicants whose last degree completed is a graduate degree may be admitted in full standing if the final GPA of that degree is at least 3.0 or equivalent.
4. Each program may set higher qualifications and may require the submission of additional evidence of academic performance.

A student shall be permitted to register for graduate study only after formal admission. Programs make recommendations on all applications, but the final admission decision is the responsibility of the Dean of the Graduate College. Perspective students can view admission information in the Graduate Bulletin (p. 794) or log onto the Graduate College (<https://www.ndsu.edu/gradschool>) website for domestic and international student application information.

## Freshman Admission

Applications for Freshman Admission are evaluated on an individual basis. The university uses selective criteria in order to assure adequate preparation which will enable students to be successful in their academic pursuits. NDSU reviews the following criteria:

- High School GPA - It is recommended applicants have a cumulative high school grade point average of 2.75 (4.0 scale). Strong consideration is given to grades earned in the high school core courses listed below.
- Test Score(s) - An ACT composite score of 22 or higher or SAT score of 1100 or higher (evidence-based reading and writing + math combined score) is also recommended. If you have not achieved this score, you are strongly encouraged to re-test. The writing component of the ACT is not required.
- High School Core Coursework - Students should complete the following 14 high school core courses:
  - 4 units of English
  - 3 units of mathematics (at the level of algebra 1 and above)
  - 3 units of laboratory science
  - 3 units of social science
  - 1 unit from existing core subject area or world language (including foreign languages, Native American languages or American Sign Language)

Students who do not meet these minimum guidelines will still be considered if there is evidence in the student's academic record that demonstrates a high probability of success. Students with higher GPAs and lower test scores, or conversely, lower GPAs and higher test scores will also be given consideration.

NDSU will accept the General Education Development (GED) certificate from applicants 19 or older. For students testing in 2014 or later, a minimum score of 170 must be presented. Applicants with GED scores prior to 2014 must meet prior requirements for successful completion of a GED.

For full procedures, deadlines and to apply for Freshman Admission, follow the Freshman Admission Procedures ([https://www.ndsu.edu/admission/how\\_to\\_apply/first\\_year/requirements](https://www.ndsu.edu/admission/how_to_apply/first_year/requirements)) outlined online.

## Early Entry Admission

The Early Entry Program allows high school students to take courses at NDSU while completing their high school graduation requirements. Students who are in their junior year of high school and have earned a cumulative grade point average of 3.5 or higher are ideal candidates for the program.

College courses may or may not substitute for courses required for high school graduation. North Dakota students must initiate the Dual Credit Enrollment Application with a high school counselor to count college credit toward graduation requirements.

Early Entry students pay regular tuition and fees.

Students are encouraged to begin the application process at least one month prior to the semester they wish to take classes. See the Early Entry Admission Procedures ([https://www.ndsu.edu/admission/how\\_to\\_apply/early\\_entry\\_program](https://www.ndsu.edu/admission/how_to_apply/early_entry_program)) to ensure all necessary steps are completed. Some courses require ACT scores or AP/IB exam scores as prerequisites prior to registration. Students are required to participate in a brief orientation session with an admission representative following registration. To begin enrollment as an Early Entry student, contact the Office of Admission.

## Transfer Admission

NDSU considers a transfer applicant's overall academic performance when making an admission decision. An applicant's cumulative college grade point average (GPA) and high school preparation (if applicable) are taken into consideration when evaluating an applicant:

- Fewer than 24 transferrable college credits completed at the time of application - your high school record will be taken into consideration along with your college academic record.
- 24 or more transferrable college credits completed at the time of application - a decision will be based on your college academic record including coursework attempted, coursework completed and cumulative GPA from all previously attended post-secondary institutions.

In most cases, it is recommended that all applicants present at least a 2.0 GPA in all college course work to be considered for admission. If you have credits from more than one college or university, all credits will be combined to determine the cumulative GPA for admission consideration. When reviewing applications, particular attention is paid to students' most recent course work and the number of credits completed. If you have in-progress course work at the time of application, all course work must be completed with a 2.0 GPA or above. Students who have been suspended from other institutions will not be considered for admission to NDSU until the suspension has been lifted by that institution or until one year has elapsed.

For full procedures, deadlines and to apply for Transfer Admission, follow the Transfer Admission Procedures ([https://www.ndsu.edu/admission/how\\_to\\_apply/transfer](https://www.ndsu.edu/admission/how_to_apply/transfer)) outlined online.

## International Student Admission

All international undergraduate applicants must demonstrate English proficiency by providing official results from an approved proficiency exam such as the TOEFL, IELTS, Pearson's Academic, ACT, or SAT. There are exemptions to this requirement located here ([https://www.ndsu.edu/admission/how\\_to\\_apply/international/english\\_proficiency](https://www.ndsu.edu/admission/how_to_apply/international/english_proficiency)). Contact the Office of International Student & Study Abroad Services if you feel you qualify for this exemption. For full admission procedures, deadlines, and to apply, follow the steps outlined at on the International Admission ([https://www.ndsu.edu/admission/how\\_to\\_apply/international](https://www.ndsu.edu/admission/how_to_apply/international)) page. Students who have been suspended from other institutions will not be considered for admission to NDSU until the suspension has been lifted by that institution or until one year has elapsed.

### For First-Year international undergraduate admission, applicants must meet the following requirements:

- Applicants should have an educational background in the core curriculum of laboratory science, mathematics, social science, and English. A secondary or high school grade point average of at least 2.75 (4.0 scale) or the equivalent in core subjects is recommended. Students who do not meet these minimum guidelines will still be considered for admission if there is evidence in the student's academic record that demonstrates a high probability of success.

### FOR TRANSFER INTERNATIONAL UNDERGRADUATE ADMISSION, APPLICANTS MUST MEET THE FOLLOWING REQUIREMENTS:

- A student is considered a transfer applicant if they have 24 or more transferable college credits completed at the time of application. A decision will be based on your college academic record including coursework attempted, coursework completed and cumulative GPA from all previously attended post-secondary institutions. A post-secondary/university grade point average (GPA) of 2.0 (4.0 scale) or the equivalent, is recommended. Students who do not meet these minimum guidelines will still be considered for admission if there is evidence in the student's academic record that demonstrates a high probability of success.

### intensive english language program applicants

The Intensive English Language Program (IELP) at NDSU is designed to help non-native speakers achieve English proficiency. To be considered for admission, all applicants should have an educational background in the core curriculum of laboratory science, mathematics, social science, and English.

## Non-Degree Seeking Admission

Special status is reserved for non-degree seeking students who wish to enroll in a limited number of courses at NDSU. Students are permitted to register for up to 15 credits. Interested students must submit an *Application for Admission* to the Office of Admission. Official transcripts are required if coursework was attempted any time one year prior to application. To take additional courses or become degree-seeking, appropriate high school and/or college transcripts must be submitted to be considered for admission. **Non-degree seeking students are not eligible for financial aid.**

Students currently enrolled at another college or university and planning to take limited coursework at NDSU with intention of transferring NDSU credits to their home institution should follow application procedures for non-degree student status.

Some courses are limited to students in select programs of study, in specified classifications (i.e., junior or senior status), or are restricted by prerequisite/co requisite coursework. Such information is listed in the course descriptions (<https://bulletin.ndsu.edu/course-catalog/descriptions>) of the catalog or in the course search feature in the student information system, Campus Connection. If restrictions are placed on the courses in which you are interested in enrolling as a non-degree seeking student, permission to enroll may be sought through the academic department responsible for teaching the class.

## Selective and Limited Admission Programs

Admission to a number of academic programs is selective and/or limited. Admission to the university does not guarantee entrance to a specific major. Supplemental applications may be required for students seeking admission to professional-level programs. Some programs require that minimum standards be met and maintained for continuous enrollment and advancement in the program. Contact your respective department for further admission criteria.

## Undergraduate Readmission

Returning undergraduate students are those who have previously attended NDSU and are returning after a leave of absence of at least one full term, exclusive of summer session. Returning students must have a minimum cumulative GPA of 2.00 in all NDSU and transfer coursework to be considered for readmission. Undergraduate students requesting readmission should begin the reactivation process with the Office of Registration and Records (<http://www.ndsu.edu/registrar>) at least 30 business days prior to their expected return so that records may be updated to permit further registration. Refer to the Undergraduate Reactivation/Petition for Readmission (<https://dmsforms.ndus.edu/iFiller/iFiller.jsp?fref=1de6e037-8d8b-4cbc-a1d3-23c704553423>) form for further information. Returning graduate students should contact the Graduate College (<https://www.ndsu.edu/gradschool>) for information on returning from a leave of absence.

# Academic Calendar

---

## Academic Year

NDSU operates on a semester system consisting of two standard 15-week fall and spring semesters, plus a final examination week each semester. A 12-week summer session also is offered. Variable-length, short-session courses are available, and meet the same total contact (class) hours as in standard semesters. See definition of an academic credit (p. 69).

## Mid-Term

The mid-term point of a standard semester is approximately 40 class days after the standard semester start. See Examinations and Grading for mid-term grade information.

## Dead Week

Only one exam or quiz per course may be given during the last two weeks of the semester (prorated accordingly for variable length courses), which includes finals week. Exceptions include summer classes, self-paced/correspondence courses, make-up exams, courses in which laboratory is incorporated with a lecture, one-credit courses, and quizzes that account for less than 5% of the students' overall grade. If a professor chooses to give an exam during the last week of classes, he/she is expected to make some instructional use of the final examination time.

## Final Examinations

The schedule for final examinations is determined and published by the Office of Registration and Records.

Final examinations (<https://www.ndsu.edu/fileadmin/policy/336.pdf>) in one-credit or variable length short courses are usually given during the last regular class period. Final examinations for all other courses may not be rescheduled during the final examination period. According to State Board of Higher Education policy, the final examination period is instructional time and, if an examination is not given, some instructional use of this period is expected. Final examinations for summer school and distance and continuing education classes are arranged by the instructors.

No student shall be obligated to take more than three final examinations scheduled for the same calendar day. In the event that a student has four or more final examinations on the same calendar day, the student shall notify the instructor(s) from the highest numbered course(s) no later than two weeks before the last day of class to schedule a make-up examination to be administered at a mutually acceptable time.

## Summer Session

The 12-week summer session is designed to provide coursework within various time intervals. Classes typically are offered in either the full 12-week session, the standard four-week session that begins in May, or the standard eight-week session that begins in June. There are many other short or variable length courses throughout the summer. While the time interval of the individual sessions is different than that of the standard semester, each course carries full credit because classes meet the same number of contact hours as in the standard semester.

Each college or department determines its summer offerings, based upon previous enrollments, programmatic needs, and special requests. Special effort is made to offer courses approved for fulfilling general education requirements. For information on summer school, please refer to the summer session website (<https://www.ndsu.edu/summer>). Information concerning summer housing may be secured by contacting the Department of Residence Life (<https://www.ndsu.edu/reslife>), Dept. 3430, P.O. Box 6050, Fargo, ND 58108, or 231-7557 (toll-free 1-800-572-8840).

# Academic Credit

---

## Definition of a Credit Hour

In accordance with federal guidelines, academic credit hours for a course are determined by the amount of work represented in intended learning outcomes.

The NDSU established equivalency for courses bearing academic credit reasonably approximates and is not less than:

1. One semester hour of credit is awarded for 750 minutes of classroom or direct faculty instruction and a minimum of 1800 minutes of out-of-class student work; over a fifteen week semester this is equivalent to one 50 minute period of direct instruction and two hours of out-of-class work each week; or
2. At least an equivalent amount of work as required in paragraph (1) of this definition for other academic activities as established by the institution, including laboratory work, internships, practicum, studio work, and other academic work leading to the award of credit hours.
3. For laboratories, a minimum of 100 minutes per week for 15 weeks is equivalent to one credit.
4. One semester credit of field experience (courses numbered 196-496; 595-795) requires a minimum of 40 hours of direct experience. Students may earn up to 15 credits per semester with the number of credits to be determined in consultation with the student's academic adviser/department. Cooperative Education credits and limits are determined by the Career and Advising Center (<https://www.ndsu.edu/career>).
5. For undergraduate research experiences a minimum of 360 minutes per week for 15 weeks is equivalent to 1 credit.
6. For hybrid and online courses, which do not meet the faculty contact requirements, credit is awarded based on the equivalent face-to-face course or by assessing the amount of work required by the student.

# Academic Honesty and Integrity

---

The primary responsibility of the students, faculty, and administration is to create an atmosphere where the honesty of individuals will not be questioned.

Faculty members are responsible for providing guidelines concerning academic honesty and expectations at the beginning of each course.

Students are responsible for submitting their own work. Students who cooperate on oral or written examinations or work without authorization share the responsibility for violation of academic principles, and are subject to disciplinary action even when one of the students is not enrolled in the course where the violation occurred. Students have the right to be informed when they are suspected of violating academic principles and have the right to a fair opportunity to refute them.

Faculty have the prerogative of determining the penalty regarding prohibited academic conduct in their classes. Faculty members may, among other sanctions, fail the student for the particular assignment, test, or course involved. Penalties may be varied with the gravity of the offense and the circumstances of the particular case. In this situation, the student may not drop the course in question without the permission of the instructor.

Faculty have the prerogative of determining the penalty regarding prohibited academic conduct in their classes. Faculty members may, among other sanctions, fail the student for the particular assignment, test, or course involved. Penalties may be varied with the gravity of the offense and the circumstances of the particular case. In this situation, the student may not drop the course in question without the permission of the instructor.

Faculty members will report the incident via the Student Academic Misconduct Report (<https://www.ndsu.edu/academichonesty>) form. In cases of repeat offenses, higher sanctions, up to and including suspension or expulsion may be recommended to the Provost and Committee on Academic Standards.

For complete information regarding academic honesty and integrity, student expectations, disciplinary sanctions, appeal procedures, and hearing guidelines, refer to [www.ndsu.edu/academichonesty](http://www.ndsu.edu/academichonesty)

# Class Attendance

---

Per the NDSU Policy Manual, Policy 333 (<https://www.ndsu.edu/fileadmin/policy/333.pdf>), the following applies:

Attendance in classes is expected and important. (The term “class” includes class, online class, laboratory, field trips, group exercises, or other activities.) However, there are instances in which students are unable to attend class and in which those absences must be excused. These instances are described in the following sections. Absences not covered by this policy are excusable at the discretion of the instructor. Class attendance policies may not have discriminatory effect (intentional or unintentional) on members of a protected class (see NDSU Policy 100 (<https://www.ndsu.edu/fileadmin/policy/100.pdf>)). Students and instructors should note that the NDSU Student Health Service (<https://www.ndsu.edu/studenthealthservice/forms>) does not provide students with excuses for class absences or tardiness due to illness or injury.

Review Policy 333 (<https://www.ndsu.edu/fileadmin/policy/333.pdf>) for specific student and instructor responsibilities, as well as details regarding absences related to University sanctioned events, pregnant students, religious accommodations, and other excused absences.

NOTE: Students are responsible for all registration activity and must follow published dates and deadlines (<https://www.ndsu.edu/registrar/dates>). Non-attendance does not absolve students from course responsibilities and does not automatically remove courses from a student's academic record.

# Co-Curricular Activities

---

Student participation in co-curricular activities at NDSU is encouraged as an important aspect of college life and is viewed as helping fulfill social and general education needs as well as developing leadership ability. Students who are on academic or conduct probation may participate as members in campus co-curricular activities unless higher standards are set by the specific campus organization. However, such students should consult with their academic adviser to establish a reasonable balance between successful academic performance and co-curricular involvement.

## Students in Leadership Positions

Students holding elected or appointed leadership positions must meet the following academic and good conduct eligibility standards:

1. Must have attained and must maintain during the term of participation a minimal cumulative grade average of 2.0.
2. Must be an enrolled NDSU student.
3. Must be in good conduct standing with the Student Affairs and Enrollment Management office.

First semester new freshman, transfer students, and graduate students will be treated comparably according to available information.

Faculty, staff, or university representatives serving as organizations/activities advisers shall be responsible for and have the right to verify eligibility of students who hold leadership positions.

This policy will be administered by Student Affairs and Enrollment Management. Appeals may be delivered to Old Main 100.

Additional information on the eligibility for participation in co-curricular activities can be found on the Dean ([https://www.ndsu.edu/studentaffairs/policies\\_and\\_forms/eligibility\\_for\\_participation\\_in\\_co\\_curricular\\_activities](https://www.ndsu.edu/studentaffairs/policies_and_forms/eligibility_for_participation_in_co_curricular_activities)) or Students ([https://www.ndsu.edu/deanofstudents/student\\_rights\\_and\\_responsibilities/eligibility\\_for\\_participation\\_in\\_co\\_curricular\\_activities](https://www.ndsu.edu/deanofstudents/student_rights_and_responsibilities/eligibility_for_participation_in_co_curricular_activities)) website.

# Commencement

---

Commencement exercises are held at the close of fall and spring semesters.

Students who complete graduation requirements during the summer are eligible to participate in either May or December commencement ceremonies within the calendar year of their graduation. To participate in the May commencement exercises, students must be registered in the remaining graduation requirements for the summer session of the same year.

A student may participate in commencement only once for a particular degree. The date of degree conferral will be printed on the academic transcript and diploma according to the academic calendar of the university.

Reservations for commencement must be made by the date specified by the Office of Registration and Records. Orders for caps, gowns, and hoods are made by the date specified by the NDSU Bookstore (<http://www.ndsubookstore.com>). Commencement information is available at [www.ndsu.edu/commencement](http://www.ndsu.edu/commencement).

# Degree Types and Diploma Information

---

## Degrees Awarded at NDSU

A degree is the title of the credential that the university confers on a graduate who has completed all university requirements for graduation. Most undergraduate degree recipients at NDSU earn a Bachelor of Science (B.S.) degree, however, many programs of study result in a specialized degree. Students may also pursue a Bachelor of Arts (B.A.) degree, if available for their selected major, by completing the Bachelor of Arts Requirements Using a Second Language (p. 124) and/or requirements as specified by their academic college on the program curriculum guide.

NDSU confers the following degrees at the undergraduate level:

- Bachelor of Arts (B.A.)
- Bachelor of Fine Arts (B.F.A.)
- Bachelor of Landscape Architecture (B.L.A.)
- Bachelor of Music (B.Mus.)
- Bachelor of Science (B.S.)
- Bachelor of Science in Agricultural and Biosystems Engineering (B.S.A.B.En.)
- Bachelor of Science in Architecture (B.S.Arch.)
- Bachelor of Science in Civil Engineering (B.S.C.E.)
- Bachelor of Science in Computer Engineering (B.S.Cpr.E.)
- Bachelor of Science in Construction Engineering (B.S.Con.E.)
- Bachelor of Science in Construction Management (B.S.Cons.M.)
- Bachelor of Environmental Engineering (B.S.Env.E.)
- Bachelor of Science in Electrical Engineering (B.S.E.E.)
- Bachelor of Science in Industrial Engineering and Management (B.S.I.E.Mgt.)
- Bachelor of Science in Manufacturing Engineering (B.S.Mfg.E.)
- Bachelor of Science in Mechanical Engineering (B.S.M.E.)
- Bachelor of Science in Nursing (B.S.N.)
- Bachelor of University Studies (B.U.S.)

In addition, NDSU awards graduate degrees at the following levels:

- Doctor of Education (Ed.D.)
- Doctor of Musical Arts (D.M.A.)
- Doctor of Nursing Practice (D.N.P.)
- Doctor of Pharmacy (Pharm.D.)
- Doctor of Philosophy (Ph.D.)
- Education Specialist (Ed.S.)
- Master of Accountancy (M.Acc.)
- Master of Architecture (M.Arch.)
- Master of Arts (M.A.)
- Master of Athletic Training (M.A.Trng.)
- Master of Business Administration (M.B.A.)
- Master of Construction Management (M.Cons.M.)
- Master of Education (M.Ed.)
- Master of Engineering (M.Engr.)
- Master of Landscape Architecture (M.L.A.)
- Master of Music (M.M.)
- Master of Natural Resources Management (M.N.R.M.)
- Master of Public Health (M.P.H.)
- Master of Science (M.S.)
- Master of Software Engineering (M.S.E.)
- Master of Supply Chain Management (M.S.C.M.)
- Master of Transportation & Urban Systems (M.T.U.S.)

## **Degree Posting**

Students must declare their intent to graduate, identifying all programs of study, with the Office of Registration and Records or the Graduate College. Degrees are posted to academic records three times per academic year - at the close of each term. Conferral date is the last day of finals week/the last instructional day of the term. Degrees are posted to the academic record approximately three weeks following the close of the semester in which degree requirements were successfully completed.

## **Diplomas**

Diplomas are mailed approximately five weeks following the close of the academic term in which graduation requirements have been completed. Neither diplomas nor official transcripts will be released for students who have outstanding debts owed to the university or who have select other holds. Students are responsible for submitting name and address updates for diploma processing. Should a diploma be returned for an insufficient address, the Office of Registration and Records makes every attempt to obtain an updated address. When an updated address is not available, it is held in the Office of Registration and Records for one year, after which time a student will request a diploma replacement.

A diploma replacement (<https://www.ndsu.edu/registrar/records/diplomas>) service is provided by the Office of Registration and Records for those who have lost or damaged their original diploma.

# Grades, Grading and Repeated Courses

## Grades and Honor Points

NDSU has three grading periods per academic year: fall semester, spring semester, and summer session. The quality of student work and achievement of learning outcomes is indicated by a letter grade. In computing scholastic averages, each letter grade is assigned a specific number of honor points for each credit earned. Student work is reported in terms of grade-point average for the term and institutional grade-point average for the composite of work at NDSU. Calculations are based on the following:

### Grade Descriptions

#### Passing Grades

		Honor Points Per Credit
A	Excellent	4.0
B	Good	3.0
C	Average	2.0
D	Passing	1.0
P	Pass (D or better) - undergraduate	*
S	Satisfactory (C or better) - graduate	*
W	Withdrew	*
AU	Audit	*

#### Non-passing Grades

		Honor Points Per Credit
F	Failure	0.0
I	Incomplete	*
U	Unsatisfactory - graduate	*

\* Not calculated in grade-point average, but may be calculated in attempted credits for satisfactory academic progress (<https://www.ndsu.edu/registrar/academics/progress>) (SAP) used for financial aid eligibility.

### Grade Point Average (GPA) Calculation

Semester (or term) GPA refers to the grade-point average for any given grading period. Cumulative or institutional GPA refers to the composite grade-point average for all courses and grading periods completed at NDSU.

Institutional cumulative grade-point average is calculated by dividing the total number of honor points earned at NDSU by the total number of credit hours in which honor points were recorded, including grades of 'F'. NDSU GPA calculations do not include developmental coursework, which does not count toward the graduation requirements. Coursework/grades accepted in transfer by NDSU are not included in the institutional cumulative GPA, and are not used in calculations for determining academic standing with the University. Refer also to Pass/Fail Grading and Repeated Courses.

### Pass-Fail Grading

Pass-fail grading is available in any given course; however, the pass/fail option may not be used for courses taken to meet general education requirements, unless the course is only offered pass/fail. Students are advised to check degree-program restrictions regarding acceptance of pass/fail credits. Pass/Fail Option Request forms (<https://www.ndsu.edu/registrar/forms/passfail>) may be acquired online. Forms must be signed by the student's adviser. Pass/fail policies include the following:

1. Students are limited to a total of 16 credits under the pass/fail grading option. Courses that are offered only for pass/fail grading for all students who enroll are not included in the 16-credit limitation.
2. Approval for the pass/fail option must be filed in the Office of Registration and Records by the published pass/fail deadline of the semester (<https://www.ndsu.edu/registrar/dates>). Variable length and summer courses have prorated deadlines according to actual course length. Contact the Office of Registration and Records for specific information regarding variable length and summer course deadlines.
3. Once a pass/fail request has been approved and filed, it may not be changed back to a regular grade.
4. A grade of 'P' is without honor points and is not included in the grade-point computation; however, a grade of 'F' is included in the grade-point computation.
5. If a course is taken for a regular grade, it cannot be repeated on a pass/fail basis.

## Course Failures

A failing (F) grade may not be removed by special examination or transfer credit. When a failing grade has been assigned, credit for that course may be earned only by re-enrolling in it at NDSU, or via Tri-College, and completing the course satisfactorily. As with all repeated courses, the original grade will remain on the academic record, but only the latest attempt will be computed in grade-point average calculations. Review the complete Repeated Courses (p. 78) policy for full details.

## Mid-Term Grading

As an early intervention effort to improve retention and academic progress of students, faculty are encouraged to enter deficient mid-term grades of D and F, at minimum, in undergraduate courses. Notifications are sent to students with reported deficient mid-term grades and to academic departments/advisers. For all courses, mid-term progress updates shall be made available to students upon request. Mid-term grades are not considered official grades and do not appear on student academic transcripts.

## Final Grades

Grades for all students in all degree-eligible courses are entered by the grade loading deadline each term to allow important end-of-term academic and financial processes to run, and to ensure timely notifications may be sent to students. Final grades entered into Campus Connection by instructors are posted to student records approximately 2-3 business days after the close of final examination week.

## Grade Changes

With the exception of Incomplete grades, a course grade issued by an instructor and recorded on an academic record is considered final. For the student who has reason to believe the grade issued is incorrect, the student must initiate a request for a change of a grade with the instructor within fifteen (15) instructional days of the first day of the semester immediately following the semester in which the grade was assigned. For Spring Semester courses, the request may be made within fifteen (15) instructional days of the start of Fall Semester, if the student is not enrolled for the summer term. If deemed appropriate, the instructor may submit a change of grade to the Office of Registration and Records via a **Grade Reporting Form**. Grade changes may only be considered for students who have not yet earned a degree.

## Grade Appeals

If resolution is not reached through a standard grade change inquiry and within the time frame outlined in the Grade Changes section, a student may pursue a grade appeal. The Grade Change Appeals Board may be utilized only after the student has exhausted possible appeal routes within the academic department and college offering the course. A grade appeal is deemed formally initiated when the student presents the Grade Appeal Form (<https://www.ndsu.edu/fileadmin/registrar/forms/gradeappeal.pdf>) to the instructor. If there is an unsatisfactory decision, the student must consult the department head/chair, and the dean or a designated college committee, proceeding from one level to the next only after an unsatisfactory decision of the conflict at that level. In the event that the instructor is also the department head or dean, he or she need only be consulted in the capacity of instructor. In the event of an unsatisfactory decision within the college, the student may submit the formal written appeal to the Grade Appeals Board Chair. Such an appeal shall be made within fifteen (15) instructional days after conclusion of the college proceedings as stated above.

The full Grade Appeals policy (section 337) (<https://www.ndsu.edu/fileadmin/policy/337.pdf>), which includes hearing procedures, is available on the NDSU Policy (<https://www.ndsu.edu/policy>) web site. Grade appeals only may be considered for students who have not yet earned a degree. If a student is in their final semester of enrollment pending a degree completion, the student has fifteen (15) instructional days to initiate a grade request.

## Grades of Incomplete

Under extraordinary circumstances and at the discretion of the instructor, a student may be assigned a grade of Incomplete (I). The following policies apply to Incomplete grades:

1. The grade of Incomplete is assigned to indicate that satisfactory work has been completed up to within five weeks of the semester end, and that circumstances beyond the student's control prevented completion of the work. The time period is proportional for variable length courses and summer session.
2. The grade of Incomplete is not to be given in any instance where the student has a deficiency of more than five weeks (or equivalent) of work including final exam week.
3. Grades of Incomplete are initiated by student request. The student must contact the instructor, request an Incomplete grade, and, upon instructor approval, make arrangements to complete the work.
4. The grade of Incomplete (I) is an administrative grade that may only be entered by the Office of Registration and Records, except in courses designated as practicum, internship, individual study, field experience, or study abroad.
5. **FORM and DEADLINE:** An **Incomplete Grade Reporting Form** detailing the work to be completed, expected completion date, and grading standard is to be completed by the course instructor. This is an electronic form submitted to the Office of Registration and Records by the grade submission deadline for the semester in which the course was taken.
6. Grades of Incomplete, including those for most course types identified in #4, must be removed no later than the end of the seventh week of the next full semester (fall or spring). The time period is proportional for variable length courses and summer session.

7. Grades of Incomplete are removed when the student has completed all course requirements and the instructor of the course files a **Grade Reporting Form**.
8. All grades of Incomplete that are not removed within the specified time are automatically changed to 'F' grades by the Office of Registration and Records.
9. Instructors may specify completion deadlines for remaining work on the **Incomplete Grade Reporting Form** earlier than the standard deadlines.
10. Requests for extensions beyond the seventh week of the next full semester require approval by both the instructor and the chair of the department offering the course. The extended deadline must be indicated on the **Incomplete Grade Reporting Form** and may not exceed two Incomplete conversion/deadline cycles. If a grade is not submitted by the specified deadline, the Incomplete grade will convert to a grade of 'F'.
11. Grades of Incomplete, which convert to grades of 'F', earned in the last semester of attendance by a student who leaves the university for two or more years may be changed to Withdrawn ('W') upon re-enrollment. Requests for this privilege must be filed with the Office of Registration and Records during the first term of re-entry.
12. An Incomplete grade may be converted to a letter grade (or P/F, S/U) according to the above guidelines, but may not be expunged from the record.
13. Students may not register in courses in which they currently hold grades of Incomplete, except for courses that are repeatable for credit.
14. Students are not allowed to graduate with Incomplete grades on their academic records. Upon graduation, unconverted Incomplete grades will convert to grades of 'F'. If a course in which an Incomplete grade was assigned is required for graduation, the instructor may extend the deadline according to the above procedures and timelines, and graduation will be postponed.
15. Students who receive grades of Incomplete or converted grades of F may appeal disputed grades in accordance with NDSU Policy, Section 337: Grade Appeals Board (<https://www.ndsu.edu/fileadmin/policy/337.pdf>).

## Repeated Courses

At NDSU, repeating a course is defined as retaking the same course on a student's NDSU academic record in an attempt to improve a grade. The course repeat option to improve one's academic record is available to students who have not graduated. Repeats are processed at the end of a semester after grades have been posted to academic records. The following applies to repeated courses:

1. Credit earned in any given course (or equivalent course) is applicable to a degree requirement only once.
2. If a course is completed at NDSU first and an attempt is made to repeat that course at another institution, the credit is considered duplicate and is not eligible for transfer back to NDSU.
3. An NDSU student may register for a Tri-College course to repeat a course previously taken at NDSU (see Tri-College rules and restrictions (p. 100)).
4. All grade entries remain on the student's academic record, but only the credits, grades and related honor points for the most recent attempt will be calculated in the cumulative grade point average and credits for graduation. Previous attempts are excluded from cumulative totals and marked as *'Repeat Excluded'*.
5. Students forfeit the previous letter grade no matter what letter grade is earned when the course is repeated and the most recent course is marked *'Repeat Included'*.
6. There is no limit to the number of different courses that may be repeated unless otherwise restricted by an academic department.
7. A student is limited to a maximum of three attempts in any course. An "attempt" includes any instance in which the student earns a letter grade for the course (A - F; including transfer). The three-attempt limit does not apply to courses identified as "May be repeated" in the course description. A student can petition for exception to this limitation through established university procedures.
8. Courses taken for A-F grading may not be repeated under the pass-fail grading option.
9. Repeat attempts made in semesters following a degree posting will remain on the academic record along with the new grade, but will be excluded from GPA and credit calculations. The repeated course will be marked "Repeated: Post Degree-Not Included in Cum Totals."

NOTE: Repeating courses has impacts to financial aid eligibility and can effect a student's completion rate. For more information contact NDSU One Stop.

# Military and Veteran Information

---

In compliance with Title 38, United States Code, section 3679e, **Veterans Benefits and Transition Act of 2018**, North Dakota State University permits Covered Individuals to register, attend and participate in classes with a Certificate of Eligibility or VA Form 22-1905. Covered Individuals are defined as veteran students using chapter 31 (Vocational Rehabilitation and Employment) and chapter 33 (Post-9/11 GI Bill).

North Dakota State University does not impose any penalties or late fees, does not deny access to classes, libraries, or other institutional facilities, or require Covered Individuals to borrow additional funds to meet his/her financial obligations to the institution due to the delayed disbursement of funding from the VA.

For more information, visit the Military and Veterans Certification (<https://www.ndsu.edu/veterans>) website.

# Project 65

---

People aged 65 or over may audit one course per semester free of tuition and related fees, with the exception of a one-time \$35 application fee. Courses not eligible for Project 65 include those not covered by the tuition cap. Contact Registration and Records for questions regarding course eligibility.

Project 65 students are encouraged to purchase the textbooks for their courses. The transcript of a student auditing a course will show a grade of 'Audit' for the course, which will not count as credit toward a degree. By definition, an auditor may attend class only as a listener. Students wishing to earn credit toward a degree must be admitted and pay all tuition and fees and complete all assignments and tests.

Students are responsible for course selection and need to obtain a class permit from the academic department of the course the student would like to enroll in. The instructor/department staff will issue the permit with the audit authorization. Students should bring the permit and identify themselves as participants in the Project 65 program at the time of registration to the Office of Registration and Records (<https://www.ndsu.edu/registrar>), 110 Ceres (701-231-7981).

# Registration

---

Students must be properly admitted and fully enrolled to attend classes. Students ultimately are responsible for all course registration activity and they are expected to monitor their schedule of classes and drop courses that they do not intend to complete by the published deadlines; this includes dropping individual courses or withdrawing from a semester. Dates and deadlines for advising and registration are made available in the Dates and Deadlines Calendar (<https://www.ndsu.edu/registrar/dates>) posted online. Students are encouraged to visit with an academic adviser before registering for classes (see *Academic Advising* (p. 102)).

**Schedule of Classes:** The most current and complete listing of classes is made available in Campus Connection, NDSU's official student information system, approximately one month prior to the start of registration for a subsequent term.

**Online Registration:** Admitted students register online via Campus Connection (<https://studentadmin.connectnd.us/psp/NDCSPRD/EMPLOYEE/HRMS/?cmd=login&languageCd=ENG&>), NDSU's student information system. Registration instructions (<https://www.ndsu.edu/registrar/registration>) are posted online.

**On-site Registration:** On-site registration is provided for new students at the beginning of fall and spring semesters.

**Summer Registration:** Registration for summer session occurs during the previous spring at the same time as registration for fall semester.

For registration purposes, students are grouped into the following general categories:

- **Currently enrolled students:** Currently enrolled students or those who had registration in a prior standard semester (fall or spring) are assigned registration appointment times according to total credits earned. Registration appointments can be viewed on Campus Connection.
- **Returning students:** Returning students are those who have previously attended NDSU, but who have not been in attendance for at least one full semester (fall or spring). Returning students are assigned a registration appointment time according to total credits earned after the *Reactivation/Petition for Readmission* is received and processed in the Office of Registration and Records. Registration appointment times may be viewed on Campus Connection.
- **New students:** Detailed information regarding orientation and registration options is sent to all new students from Student Success Programs (<https://www.ndsu.edu/studentsuccess>). Incoming freshmen, including first year students with transfer credit, are expected to attend a new student orientation and registration session.
- **Transfer students:** Admitted transfer students may register on Campus Connection along with NDSU students, or may attend a transfer orientation and registration program. Transfer student registration appointment times are based on the total number of credits accepted in transfer to NDSU.

## Financial Obligation Agreement

The North Dakota University System Financial Obligation Agreement (<https://www.ndsu.edu/onestop/accounts/foa>) (FOA) is used to verify that a student has acknowledged their financial responsibility to the University when they register for courses. Students must access, review and accept the FOA prior to registration for each term of enrollment in Campus Connection.

## Classroom Instruction Mode

The university offers classroom instruction in a variety of methods. The course delivery method is assigned to each class and can be viewed when the student is enrolling for classes. Instruction modes include:

- **On Campus Face to Face** - Describes the traditional classroom setting where the instructor and students are physically located in the same place and may incorporate the use of multiple supportive technologies as appropriate.
- **Off Campus Face to Face** - Describes the traditional classroom setting where the instructor and student are physically located in the same place in an off campus location and may incorporate the use of multiple supportive technologies as appropriate.
- **Online Asynchronous** - Online instruction occurring independent of time or location
- **Online Synchronous** - Online instruction occurring independent of location, but at the same time (real time).
- **Interactive Video (IVN)** - A video and audio communications session between two or more remote sites with live, animated image transmissions and display. This connection allows for both the faculty and students to be seen and heard by each other.
- **Hybrid/Blended** - A form of instruction that includes students from different locations and/or environments (face-to-face, online, IVN, etc.) for synchronous and/or asynchronous instruction.
- **Independent Study** - Instruction is provided in a self-study, self-paced format where the instructor and student mutually establish method(s) of communication.

## Changes in Registration (Adding & Dropping)

Registration deadlines for standard fall and spring semester courses are posted in the online Dates and Deadlines calendar (<https://www.ndsu.edu/registrar/dates>). Deadlines for variable length and summer session courses are adjusted proportionately and are also available online (see Summer Registration information). Students ultimately are responsible for all course registration activity and they are expected to monitor their schedule of

classes and drop courses that they do not intend to complete by the published deadlines; this includes dropping individual courses or withdrawing from a semester.

## Adding Courses/Sections

Students may add courses to their schedules via Campus Connection until the published deadline to add online. After the deadline to add online, an authorized "Class Permit" for each course to be added must be acquired from the department offering the course and submitted to the Office of Registration and Records (<https://www.ndsu.edu/registrar>) or NDSU One Stop (<https://www.ndsu.edu/onestop>).

## Enrollment Add Deadline & Class Permits

All undergraduate and graduate students are expected to have added their courses via Campus Connection one week from the start of the semester. After one week, departments/instructors must provide student(s) with a course permit to add course(s). Class permits are accepted through the fourth week of a semester. Full semester course additions will not be processed after fourth week enrollment census, unless approved by the Graduate School Dean or the Registrar. Contact the Office of Registration and Records for course add deadline ([https://www.ndsu.edu/registrar/dates/course\\_add\\_deadline](https://www.ndsu.edu/registrar/dates/course_add_deadline)) information.

## Dropping Courses/Sections & Administrative Drops

Students are responsible for all course registration activity and should drop courses that they do not intend to complete. Student failure to drop courses by posted deadlines will result in failing grades and debt owed the university.

**No-record drops:** Students may drop a course from their schedule without it appearing on their academic record until the published *No Record Drop* deadline for standard and variable length courses.

**Record (W) drops:** Students may continue to drop courses after the no-record drop period until the published *Drop* deadline for standard and variable length courses. However, such drops are recorded on student transcripts with 'W'. Grades of W do not count as attempted credit for grade-point averages on the academic record, but are counted in attempted credits for financial aid satisfactory academic progress (<https://www.ndsu.edu/onestop/finaid/sap>) (SAP).

**Instructor Drop Procedure:** Instructors or departments have the option to administratively drop students who have not attended the first week (and in some cases, the first meeting) of a lecture or laboratory, or who do not meet all course requisites. Administrative course drop requests made by instructors/departments should be submitted to the Office of Registration and Records within the first week of a class meeting for processing. As indicated, students are responsible for all course registration activity; students should not rely on instructors or departments administratively dropping them.

## Cancellation of Registration (before classes start)

Students who register and then decide not to attend NDSU **before** the semester start date must cancel their registration by submitting a **Cancellation of Registration/Withdraw to Zero Credits** form. Forms must be submitted to NDSU One Stop. Cancellations are not accepted by telephone, and it is not possible to cancel registration or to drop an only or last course online using Campus Connection. Cancellations completed **prior to the semester start date** result in a full refund and no academic transcript.

## Withdrawal to Zero Credits (after classes have started)

Students who have registered and then wish to drop all courses **after the semester start date** must officially withdraw from the university. Failure to initiate the withdrawal process may result in 'F' grades and financial obligations that otherwise might be avoided. Refund (<https://www.ndsu.edu/onestop/accounts/refunds>) information may be reviewed on the One Stop website. Steps to withdraw from all courses include the following:

1. Read and complete the Cancellation of Registration/Withdraw to Zero Credits Form (<https://www.ndsu.edu/registrar/forms/withdraw>). Submit to NDSU One Stop.
2. Students are responsible for any unpaid bills at the time of withdrawal.
3. Withdrawal forms must be submitted by the published deadline of the semester. Withdrawals after this date will not be processed without evidence of a compelling reason or circumstance beyond the student's control. Courses already completed at the time of withdrawal from a term will be withdrawn as well.
4. Students should not attempt to drop all of their courses, their last course, or their only course on Campus Connection.
5. Unlike refunds for individual course drops, withdrawal refunds ([https://www.ndsu.edu/onestop/accounts/dropping\\_withdrawing](https://www.ndsu.edu/onestop/accounts/dropping_withdrawing)) are prorated and are based on complete withdrawals from all courses, course lengths, and withdrawal dates.

## Retroactive Withdrawals

Students seeking to withdraw after final grades have been posted may appeal for a retroactive withdrawal; selective course drops are not allowed. Appeals must include documented evidence of a circumstance beyond the student's control which prevented the student from withdrawing on or before the published deadline for the term. The formal appeal request must be submitted prior to three years after the term of the last date of attendance at NDSU.

## Auditing & Wait Listing Courses

### Auditing Courses

An auditor may attend classes only as a listener, without participation in regular class exercises, and may be admitted to classes only with a class permit and official registration as an auditor. No credit is received for audited courses, and 'AU' appears on the transcript. A student cannot fail an audit; however, an instructor may assign a 'WAU' (withdrawn) for non-attendance.

A student may drop a regularly registered course and add it as an audit course by submitting a Class Permit by the published deadline. Once the audit registration is processed, the decision cannot be reversed. An audit fee of one-half of the regular tuition rate, based on the student's residency, will be charged and included in the tuition cap. No student fees will be assessed.

### Wait Listed Classes

NDSU utilizes a wait list feature in Campus Connection for most classes. Students attempting to register for a class that has reached its enrollment capacity may add themselves to a wait list. Wait list processes run daily until the No Record Drop deadline for a class. Students should monitor their position on a wait list and may be automatically enrolled if a seat becomes available and no holds or course restrictions prevent enrollment. Students are notified via official NDSU email if enrolled in a class via the wait list process, but are ultimately responsible for any registration activity. Students no longer wishing to be enrolled in a wait listed class must drop it from their study list on Campus Connection. Students wishing to enroll in a class that does not utilize the wait list process should contact the academic department offering the course for enrollment options.

## Dual Career/Level Registration

Students are permitted to register for classes according to their classification level with the university.

- 1. Graduate students who wish to enroll in undergraduate coursework must follow the procedure below that most closely matches their academic intent:**
  - If undergraduate coursework is a prerequisite or condition of admission to a graduate program of study, obtain approval from the Graduate School (<https://www.ndsu.edu/gradschool>). This coursework will be billed at the undergraduate rate and will be recorded on an undergraduate academic record.
  - If undergraduate coursework is to be applied to an undergraduate program in which the student plans to enroll concurrent with a graduate program of study, submit either an Undergraduate Application for Admission ([https://www.ndsu.edu/admission/admission\\_information/application](https://www.ndsu.edu/admission/admission_information/application)) (if never enrolled as an undergraduate at NDSU) or a Reactivation Form (<https://www.ndsu.edu/registrar/forms/reactivation>) (if previously enrolled as an undergraduate at NDSU). This coursework will appear on an undergraduate academic record and be billed at the undergraduate rate. Graduate tuition waivers may not cover undergraduate coursework.
  - If undergraduate coursework is to be applied to a graduate program of study (select programs only), obtain approval from the Graduate School. This coursework will appear on a graduate academic record and be billed at the graduate rate.
- 2. Undergraduate students who wish to enroll in graduate coursework must follow the procedure below that most closely matches their academic intent:**
  - If graduate coursework is to be applied to a graduate program of study, the student must be admitted to the Graduate School. This coursework will appear on a graduate academic record and be billed at the graduate rate.
  - If graduate coursework is to be applied to an undergraduate program of study (such as in substitution for a degree requirement), departmental permission is required. This coursework will appear on an undergraduate record and will be charged at the undergraduate rate. Such credit may not be applied to a graduate degree program of study at NDSU.

Dual Career Registration forms (<https://www.ndsu.edu/registrar/forms>) and instructions for ensuring that undergraduate and graduate coursework are applied to the appropriate academic career records are available online.

## Collaborative Registration

A collaborative student is one who chooses to enroll at more than one North Dakota University System (NDUS) institution for a particular term. The institution from which the student is earning a degree is considered the "**home institution**". The institution(s) that supplies courses for a degree is considered the "**provider institution(s)**". The following guidelines pertain to courses taken collaboratively:

1. A student must be enrolled in at least one degree credit course at NDSU before enrolling in a collaborative course including the summer semester. Excluded from this requirement are students using the faculty/staff tuition waiver.
2. Only fully admitted undergraduate and graduate students in good academic standing (GPA of 2.0 or higher) are allowed to enroll collaboratively. Students requiring ASC 86 or ASC 87 are exempt from the academic standing requirement.
3. The collaborative process allows NDSU to combine credit from more than one NDUS institution for the purpose of financial aid (for courses added through the seventh business day from the start of the term).
4. Collaborative courses are not subject to the NDSU tuition cap.
5. The student pays provider campus tuition/fees for collaborative course(s). This additional amount is included in the student's accounts receivable balance at NDSU.

6. Not all scholarships/tuition waivers cover collaborative tuition and fees. Please check with your funding agency.
7. Students must be in good financial standing to be eligible for collaborative coursework registration.
8. The student cannot exceed a total of 20 credits between NDSU and the provider institution(s) without special permission from the Registrar at home and provider campuses.
9. The student must follow NDSU's academic dates and deadlines for adding/dropping collaborative courses.
10. Drop/adds must be administered by submitting an updated collaborative registration form to the home institution. NDSU students may submit the form to the Office of Registration and Records, 110 Ceres Hall.
11. Courses will be posted to the NDSU academic record as transfer credit once NDSU receives an official transcript from the provider institution. **Note:** *Grades earned in collaborative courses may be used in determining financial aid satisfactory progress.*
12. Completion of the Collaborative Student Contract and Registration Form (<https://www.ndsu.edu/registrar/forms/collaborative>) does not guarantee registration into the requested course(s). However, if the request(s) cannot be processed, the student will be notified via their NDSU e-mail address.
13. Collaborative registration is not an option for repeating courses previously taken at NDSU. If students wish to take advantage of the repeated course opportunity to improve a grade, that course must be repeated at NDSU.
14. Due to federal compliance, course repeats via collaborative registration will be prohibited to prevent significant federal financial aid impacts which could result in overpayment of federal financial aid funds.

## Summer Registration

The 12-week summer session is designed to provide instruction within various time intervals throughout the summer. Classes are offered in one of three standard sessions - the full 12-week session, a standard four-week session that begins in May, or a standard eight-week session that begins in June - as well as other short or variable length sessions throughout the summer. While the time interval of the individual sessions is different than that of the standard semester (16 weeks), each course carries full credit because classes meet the same number of contact hours as in the standard fall or spring semesters. In addition, deadlines for variable length and summer session courses are adjusted proportionately. Students are responsible for making changes to their registration according to published summer deadlines (<https://www.ndsu.edu/registrar/dates>).

Each college or department determines its summer offerings, based upon previous enrollments, programmatic needs, and special requests. Special effort is made to offer courses approved for fulfilling general education requirements. The summer session course offerings schedule (<https://www.ndsu.edu/summer>) is available online.

## Fees and Housing

Summer tuition and fees are available online (<https://www.ndsu.edu/onestop/accounts/tuition>). Information concerning summer housing may be secured by contacting the Department of Residence Life (<https://www.ndsu.edu/reslife>), Dept. 5310, P.O. Box 6050, Fargo, ND 58108, or 231-7557 (toll-free 1-800-572-8840).

## Graduate Work

A range of opportunities is available for graduate work during the summer session as evidenced by the traditionally high enrollment of graduate students. A considerable number of graduate courses are offered, but generally the summer serves as an important term for students to work on their research requirements, especially if field work is involved. Work on disquisitions and individual study arrangements frequently are facilitated during summers. Courses scheduled to begin at different times and for varying periods provide a high level of flexibility. Thus, those who may have only a portion of a given summer available are likely to find courses that meet their scheduling limitations. In addition, workshops, internships, and other special programs are offered. Teachers generally find the summer school designed to offer attractive selections as components of a degree program, as well as courses directed toward improvement of professional skills. Persons interested in graduate programs of study are encouraged to contact the Graduate School (<https://www.ndsu.edu/gradschool>) for further information.

# Student Credit Load

---

The recommended credit load for undergraduate students is 15-18 hours per semester during a standard academic term (fall/spring). Undergraduate and professional student full time status is 12 or more credits per semester (9 credits in the summer\*). Half time is 6 credits per semester (5 credits in the summer\*).

Undergraduate students are limited to 20 credits per semester (15 credits in the summer). Students who find it necessary to exceed this credit limit must have an NDSU minimum institutional grade-point average of 3.0 to be eligible to petition for an overload. The Over 20 Credits Petition Form (<https://www.ndsu.edu/registrar/forms>) is available online.

Graduate student full time status is 9 or more credits per semester (6 credits in the summer\*). Half time is 5 credits per semester (3 credits in the summer\*). Graduate students may enroll in up to 15 credits per semester and must obtain approval from the Graduate School (<https://www.ndsu.edu/gradschool>) to exceed this maximum.

\*Please be aware that the credit requirements for financial aid purposes (<https://www.ndsu.edu/onestop/finaid/application>) are different from those set by the Office of Registration and Records, Customer Account Services and the College of Graduate and Interdisciplinary Studies.

# Student Records

---

## Transcripts

Official transcripts may be requested online through Campus Connection (<https://studentadmin.connectnd.us/psp/NDCSPRD/EMPLOYEE/HRMS/h/?tab=GUEST>) (current students) (Academic Records Tile > Official Transcript Request) or through Parchment (former students). Online ordering provides 24/7 access and additional tracking information. According to federal law, telephone requests and requests from others on behalf of the student cannot be honored. There is a charge for an official transcript. See Official Transcript Requests (<https://www.ndsu.edu/registrar/records/transcripts>) for detailed transcript fee information. An official transcript request by a student who is in debt to the university will not be honored until the indebtedness has been paid. The transcript only includes detailed work completed at NDSU. Requests for transcripts of work completed elsewhere must be made directly with the respective institution.

Current students may obtain unofficial transcripts (<https://www.ndsu.edu/onestop/connect/unofficial>), any time, free of charge, on Campus Connection.

## Correction of Transcript Errors

If a student believes there is an error in the recording of a course grade on the transcript, the student should first contact the instructor to verify the grade. Other transcript questions or concerns should be directed to the Office of Registration and Records (<https://www.ndsu.edu/registrar>). See also the sections on Grade Changes and Appeals.

# Career and Advising Center

---

Students often choose to enter college without a declared major but with the goal of exploring various academic and career opportunities. At NDSU those students are served through the Career and Advising Center, whose mission is to guide academic exploration, provide academic advising services to undeclared/exploratory students, and support academic and career exploration.

Working one-on-one with an academic advisor in the Center, students choose one of five Exploratory Areas to guide their academic choices. Exploratory Areas are collections of majors at NDSU that can lead to careers in related fields. The five Exploratory Areas (<https://career-advising.ndsu.edu/exploratory-areas>) are listed below:

- Science, Technology, Engineering & Math (<https://career-advising.ndsu.edu/stem-and-applied-sciences-exploratory-area>) – an area for students interested in how and why things work or who enjoy using facts and figures to create innovative solutions to issues in fields like science, engineering and agriculture.
- Health & Life Sciences (<https://career-advising.ndsu.edu/health-and-life-science-exploratory-area>) – an area for students fascinated by science and medicine, who enjoy solving problems and investigating the unknown. Ideal for students interested in a health field by becoming a practitioner or researching, creating and promoting health-related products and information.
- Social Science, Human Services & Education (<https://career-advising.ndsu.edu/social-science-human-service-and-education-exploratory-area>) – an area for students who want to work in education and other people-oriented, helping fields. Teaching, counseling and advising are just some of the common traits.
- Liberal Arts, Communication & Design (<https://career-advising.ndsu.edu/liberal-arts-communication-design-exploratory-area>) – an area for students interested in the arts, theory, history and design. Fits well with those who enjoy designing something new and being creative with music, art and language.
- Business Studies (<https://career-advising.ndsu.edu/business-studies-exploratory-area>) – an area for students interested in working within a variety of settings like corporate offices or non-profit organizations. Leadership, analysis, marketing and persuasion are just a few characteristics common to this area.

Advising staff will confirm a student's choice of Exploratory Area during summer orientation and use it to help build the most appropriate course schedule, incorporating academic interests and goals. Students are encouraged to take 15-16 credits each semester that include general education requirements as well as a course to explore a major of interest. Advisors maintain a list of courses that can either serve as an introduction to a particular major or as a foundational course in that major's curriculum and work with students to select exploratory options.

Students may declare a major – or change their current major to undeclared so they can broadly explore their academic options – whenever they feel confident in doing so. Most students declare a major by the time they have completed approximately 45 credits or about three semesters of classwork.

## Location & Contact Information:

**306 Ceres Hall**

**<https://career-advising.ndsu.edu/>**

## General Education

The purpose of general education at NDSU is to ensure that students acquire knowledge, perspectives, and skills basic to a university education. The program is designed so that students will be able to adapt to and anticipate changes in their profession and in society. Students also will be able to integrate and use the knowledge and perspectives they have gained to live productive, intellectually rewarding and meaningful lives.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		<b>12</b>
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		<b>3</b>
<b>Science and Technology (S) <sup>†</sup></b>		<b>10</b>

Humanities and Fine Arts (A) <sup>†</sup>	6
Social and Behavioral Sciences (B) <sup>†</sup>	6
Wellness (W) <sup>†</sup>	2
Cultural Diversity (D) <sup>**†</sup>	
Global Perspectives (G) <sup>**†</sup>	
Total Credits	39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## General Education Category Descriptions

The following descriptions are elaborations of the general education categories approved by the Faculty Senate.

- **Communication (C)** is the clear, precise, and purposeful exchange of information in a variety of contexts, using either written or oral means.
- **Cultural diversity (D)** focuses on the social, personal, and interpersonal effects of variety and differences among cultures.
- **Fine arts (A)**, as an integral component of the humanities, promote the appreciation of aesthetics and the expression of creativity.
- **Global perspectives (G)** focus on analysis of worldwide issues illustrating the interdependence of the world and its people.
- **Humanities (A)** systematically explore cultural and intellectual forces shaping events, individual expression, and social values.
- **Quantitative reasoning (R)** is an organized set of quantitative methods used to solve problems or extend knowledge. Quantitative methods are a set of principles and procedures that could be used to manipulate numerical data.
- **Science (S)** is an organized body of knowledge, including principles and procedures based on scientific methods, used to explain physical or biological phenomena.
- **Social and behavioral sciences (B)** use scientific methods to analyze the behaviors, structures, and processes of individuals and groups.
- **Wellness (W)** is a dynamic and integrative process of becoming aware of healthy lifestyles, of learning to make informed choices, and of developing a balanced approach to living.

## General Education Program Assessment

General education assessment has three basic purposes:

1. To improve student learning and development by identifying the intended student outcomes for the program.
2. To provide feedback on the progress toward the intended student outcomes.
3. To use the feedback to modify aspects of the program to ensure that the outcomes are being achieved and that student learning is improved.

Assessment activities are valued at NDSU and include the participation of students. Results will not be used to penalize students or faculty. Student performance on assessment of the general education program will not become part of the transcript.

## General Education Transfer

Students transferring lower-division general education credits within the North Dakota University System need to consult with advisers in their academic programs at NDSU for two reasons. First, degree requirements of individual programs and colleges at NDSU may exceed the university-wide general education requirements. Second, meeting the university-wide lower-division general education requirements by transfer credits may not necessarily prepare students for advanced, upper-division study in an academic major at NDSU. See also the NDUS GERTA Agreement.

## Using NDSU Global Seminar and Global Practicum: Study Abroad for General Education Cultural Diversity or Global Perspectives

**(Prefix) 292, 392, 492, 692: Global Practicum: Study Abroad** – A student who studies abroad for one or more semesters and who successfully completes a minimum of three credits may qualify for either Cultural Diversity or Global Perspectives. Six or more study abroad credits may qualify for both Cultural Diversity and Global Perspectives categories. A student must arrange to have an official transcript sent to NDSU from the study abroad institution for official evaluation and credit determination. In addition, a student must complete a Student Appeal for Exception to General Education Requirements (<https://www.ndsu.edu/fileadmin/registrar/forms/genedappeal.pdf>) for consideration.

**(Prefix) 179, 279, 379, 479, 679: Global Seminar** – Global Seminar experiences do not automatically qualify for NDSU general education. An NDSU global seminar instructor must apply for general education course approval in the appropriate category that pertains to the course content (including cultural diversity and global perspectives). Approval requires the instructor to submit a course syllabus and a one-page rationale addressing how the

seminar experience will meet the outcome being sought. Syllabus and rationale are to be submitted to the University Curriculum Committee well in advance of the seminar departure.

## General Education Learning Outcomes

The intended learning outcomes resulting from the various general education categories include the following:

### Communication (C) - students will

- effectively communicate analysis, knowledge, understanding, expression and/or conclusions in a range of contexts
- skillfully use high-quality, credible, relevant sources
- demonstrate appropriate conventions in a variety of communication situations

### Quantitative Reasoning (R) - student will

- apply quantitative and qualitative methods to collect and analyze data, in order to:
  - explain the nature of evidence used for analysis
  - evaluate the assumptions, evidence, and logic of competing views and explanations

### Science & Technology (S)

Technology Learning Outcome- students will

- understand, use, and apply technology to demonstrate creativity and solve problems
- identify the social, aesthetic, and ethical implications of technological decisions
- analyze how technology shapes, limits, and augments our experiences and understandings

Natural and Physical Sciences Learning Outcome - students will

- analyze components and dynamics of natural and physical worlds
- develop models to explain phenomena within the natural and physical worlds
- apply methods of scientific inquiry to enhance their understanding of the natural and physical world

### Humanities & Fine Arts (A) - students will

- identify the nature and impact of aesthetic and creative activities in human experience
- analyze the components and dynamics of human societies in their artistic, cultural, and historical contexts

### Social & Behavioral Sciences (B) - students will

- analyze the interplay of self and society, particularly how social structures shape human experiences and how humans shape social structures
- apply theories or research methods to understand human events, identities, artifacts, or social structures
- Examine their own values, biases, and conclusions within larger social or theoretical contexts

### Social & Behavioral Sciences - Wellness (W) - students will

- examine how social ecological contexts relate to their personal wellness values, biases, and conclusions
- articulate how their personal, professional, or civic goals reflect their core wellness values
- explore, identify and evaluate sources of information related to personal wellness

### Cultural Diversity (D) - students will

- identify how diverse societies shape individual experiences, expressions and identities
- identify how diversity influences cultural values

### Global Perspectives (G) - students will

- apply theories or research methods to develop strategies and solutions that address global challenges
- identify potential benefits and explore the implications of global citizenship
- evaluate global phenomena using perspectives, attitudes and beliefs of communities with cultural backgrounds different from their own

## General Education Administrative Policies

1. General education courses may be used to satisfy requirements for both general education requirements and the major, minor, and program emphases, where applicable.
2. Departments or colleges may preclude their students from double counting general education courses with major courses.
3. Except for courses that meet the cultural diversity or global perspectives requirements, no course can fulfill the requirements for more than one general education category.
4. General education requirements can be met through credit by exam, departmental examinations, or equivalents.
5. General education requirements can be met by successful completion of a course for which an approved general education course in the same department is a prerequisite or by successful completion of an advanced course in the same department with comparable course content.
6. Except for courses offered only on a pass/fail basis, no courses taken to meet the general education requirements may be taken for pass/fail grades. (Exception for Spring 2020: Students were allowed to complete general education requirements with a pass grade.)
7. The general education minimum requirements apply to all baccalaureate degree programs.
8. Transfer students who have only partially fulfilled general education category requirements by transfer-approved courses must complete the requirements in approved courses within the NDSU deficient categories. No category credit requirement may be deficient by more than a partial semester credit. However, in the communication category, if the transfer course(s) have been evaluated as equivalent to ENGL 110 College Composition I, ENGL 120 College Composition II, and COMM 110 Fundamentals of Public Speaking and total no less than eight semester credits, the lower-division category requirement has been met.
9. Students may receive placement credit for ENGL 110 College Composition I based on a minimum English ACT score (or SAT equivalent) and satisfactory performance (grade of 'C' or better) in ENGL 120 College Composition II or equivalent.
10. A student who has completed an associate of arts or an associate of science degree in the United States or Canada at a regionally accredited institution and who transfers to NDSU or who pursues a second baccalaureate degree at NDSU is considered to have completed his or her lower-division general education requirements at NDSU. Transfer student coursework from outside the United States and Canada will be evaluated on a course-by-course basis.
11. General education courses at other accredited institutions, which do not have equivalent courses or general education status at NDSU, may be accepted in transfer as part of the general education requirements at NDSU.
12. All general education course syllabi and course web sites must identify the course as having been approved for meeting general education requirements and include the general education outcomes for which each course is approved. (See Syllabus Requirements (<https://www.ndsu.edu/facultysenate/acadaffairs/syllabi>))
13. Students who have completed basic military training (which is the commitment for enlistment) will receive a waiver for the Wellness category. Military record documentation is required for the waiver; documentation is to be submitted to the Office of Registration and Records with a completed Appeal for Exception to General Education Requirements form. The waiver for the training will not lead to course credit, and all other minimum graduation requirements apply.
14. Students must complete at least four credits of natural and physical sciences in the Science and Technology category. Also in this category, a student must complete a one-credit lab taken as a co-requisite with an approved general education science and technology lecture course, unless the approved science and technology course has an embedded lab experience equivalent to one-credit (ex. BIOL 111 and BIOL 111L; PLSC 110).

## General Education Courses

The following is representative of the courses approved in each general education category for the specific catalog year. The general education component requires a minimum of 39 total credits with a minimum credit requirement in each of the seven categories. Cultural diversity and global perspectives may be satisfied by completing courses in another category.

### Category C: Communications - 12 credits

- 3 of the 12 credits at the upper-level (300-400):

Code	Title	Credits
ENGL 110 or ENGL 112	College Composition I ESL College Composition I	4
ENGL 120 or ENGL 121 or ENGL 122	College Composition II Honors Composition II ESL College Composition II	3
COMM 110 or COMM 111	Fundamentals of Public Speaking Honors Public Speaking	3
ECON 356	History of Economic Thought	3
ENGL 320	Business and Professional Writing	3
ENGL 321	Writing in the Technical Professions	3
ENGL 322	Writing and the Creative Process	3

ENGL 324	Writing in the Sciences	3
ENGL 325	Writing in the Health Professions	3
ENGL 326	Writing in the Design Professions	3
ENGL 357	Visual Culture and Language	3
ENGL 358	Writing in the Humanities and Social Sciences	3
ENGL 459	Researching and Writing Grants and Proposal	3
FREN 360	Studies in Language and Style	3
HIST 390	Historical Research and Writing	3
MICR 354	Scientific Writing	3
PHIL 450	Metaphysics	3
PHIL 451	Epistemology	3
PHRM 324	Writing and Professionalization in Pharmacy	3
SPAN 401	Advanced Spanish Grammar and Writing	3

### Category R: Quantitative Reasoning - 3 credits

Code	Title	Credits
CSCI 122	Visual BASIC	3
CSCI 159	Computer Science Problem Solving	3
EMGT 445	Understanding Vulnerable Populations in Disasters	3
MATH 104	Finite Mathematics	3
MATH 146	Applied Calculus I	4
MATH 165	Calculus I	4
PHIL 257	Traditional Logic	3
STAT 330	Introductory Statistics	3

### CATEGORY S: Science & Technology - 10 Credits

- At least four credits must be in natural or physical sciences.
- A one-credit lab must be taken as a co-requisite with a general education science/technology course unless the course includes an embedded lab experience equivalent to a one-credit course.

### Natural Science (Sn):

Code	Title	Credits
AGRI 115	Wonders of Weather	3
BIOL 100L	Non-Majors Biology Lab *	1
BIOL 111	Concepts of Biology	3
BIOL 124	Environmental Science	3
BIOL 126	Human Biology	3
BIOL 220	Human Anatomy and Physiology I	3
BIOL 220L	Human Anatomy and Physiology I Laboratory	1
BIOL 315	Genetics	3
or PLSC 315	Genetics	
BIOL 315L	Genetics Laboratory	1
or PLSC 315L	Genetics Laboratory	
CFS 210	Introduction to Food Science and Technology	3
ENT 210	Insects, Humans and the Environment	3
GEOL 201	The Geology of Climate Change and Energy	3
HON 342	Colloquium in the Sciences	3
MICR 202	Introductory Microbiology	2
MICR 202L	Introductory Microbiology Lab	1
NRM/RNG 225	Natural Resources & Agrosystems	3
PLSC 110	World Food Crops	3
PLSC 111	Genetics and You	2

PLSC 210	Horticulture Science	3
PLSC 211	Horticulture Science Lab	1
SOIL 217	Introduction to Meteorology & Climatology	3

\* Beginning Fall 2020, BIOL 100L replaces the previously offered BIOL 111L, BIOL 124L and BIOL 126L as the co-requisite lab for the lecture classes BIOL 111, BIOL 124, and BIOL 126. BIOL 100L is also considered the repeated course equivalent for any of these three lab courses.

### Physical Science (Sp):

Code	Title	Credits
CHEM 117	Chemical Concepts and Applications	3

## North Dakota University System General Education Requirements Transfer Agreement

The North Dakota University System (NDUS) General Education Requirements Transfer Agreement (GERTA) (<https://ndus.edu/lets-get-started/transfer-to-a-different-campus/gerta>) was established by the State Board of Higher Education to ease student transfers within the system. Although subject to revision by the board, the policies at the time of this printing were as follows:

- If students have completed the lower-division general education course requirements (36 credits or more) at one NDUS institution and transfer to another NDUS institution, then the lower-division general education requirements will have been met.

If the lower-division general education requirements have not been completed before transferring, the general education courses from the indicated areas are applicable to an appropriate general education requirement of the institution to which they are transferred. In these cases, the number of credits required to complete the general education requirement in each area is determined by the policies of the institution to which the courses are transferred.

Students transferring lower-division general education credits within the North Dakota University System need to consult with advisers in their academic programs at NDSU for two reasons. First, degree requirements of individual programs and colleges at NDSU may exceed the university-wide general education requirements. Second, meeting the university-wide lower-division general education requirements by transfer credits may not necessarily prepare students for advanced, upper-division study in an academic major at NDSU.

Students transferring from non-ND University System institutions will have their general education requirements evaluated on a course-by-course basis when they enter NDSU.

# Student Financial Information

---

The resources linked below are aimed at providing students with the most current financial information.

- Financial Aid and Scholarships (<https://www.ndsu.edu/onestop/finaid>)
- Residency and Tuition Reciprocity (<https://www.ndsu.edu/registrar/records/residency>)
- Tuition and Fees (<https://www.ndsu.edu/onestop/accounts>)
- Veteran's Affairs Education Benefits (<https://www.ndsu.edu/veterans>)

# Tri-College University

---

Tri-College University (<https://www.tri-college.org>) (TCU) is a consortium of five regional institutions of higher education: NDSU, Concordia College (<https://www.concordiacollege.edu>), Minnesota State University Moorhead (<https://www.mnstate.edu>), Minnesota State Community and Technical College (<http://www.minnesota.edu>), and North Dakota State College of Science (<https://www.ndscs.edu>). Students at the five schools may benefit from what each institution offers individually and cooperatively through the consortium.

Through the Tri-College course exchange, students enrolled at one campus may take courses at the other institutions at no extra cost and without going through separate admission procedures. Tri-College expands discipline offerings and course availability for students beyond their home campus.

## Tuition and Fees

Tuition is paid to the home campus. Courses not eligible for Tri-College registration are those off-campus or weekend courses offered through MSUM's Continuing Education program, most workshops, most graduate courses, independent study courses at Concordia College, private music instruction at Concordia, and international travel programs.

Students enrolling in classes that require special fees (lab/course fees, lessons, supplies, etc.) beyond the home-campus tuition and fees assessed at the time of registration will be responsible for remittance of payment to the provider institution.

## Course Limits

The TCU Course Exchange is limited to one course per student per semester per participating campus, and only if the course is not catalogued or offered on the student's home campus in a given semester. Exceptions to the one course/semester limit among campuses are detailed, along with other TCU registration information, on the TCU Registration Information Guide (<https://www.ndsu.edu/fileadmin/registrar/forms/tcu-info.pdf>). All students must be registered at their home campus before being eligible to enroll in Tri-College courses (excludes summer for MSUM and NDSU). Concordia students—and NDSU students wanting to take a course at Concordia—may take only one course per term and then, only if they are full-time students and only if that course is not available on their home campus during that academic term. Concordia does not participate in the TCU course exchange during the summer.

## Credits and Grades

Courses taken through TCU course exchange will appear on a student's home campus transcript within the respective term and may be applied toward graduation requirements. Credits and grades are calculated into home campus grade point averages and cumulative totals.

## Course Substitutions

Students need to obtain advanced approval to substitute TCU courses for required courses in a major or minor, unless otherwise stipulated in the major/minor requirements.

## Course Repeats

Students taking a TCU course to repeat a course previously taken at the home campus must indicate this on the Tri-College Registration Form (<https://www.ndsu.edu/fileadmin/registrar/forms/tcu-registration.pdf>). Duplication of credit is not permitted.

## Policies and Deadlines

Students must observe all registration and academic policies and deadlines of their home campus, including arrangements for withdrawals, drops/adds, pass/fail options, audits, and incomplete grades.

## Registration

NDSU students register by submitting the Tri-College Registration Form (<https://www.ndsu.edu/fileadmin/registrar/forms/tcu-registration.pdf>) to the Office of Registration and Records, 110 Ceres Hall.

## Tri-College Minors

The Tri-College partners recognize minors earned through the TCU course exchange. Minors are available to students at Concordia, MSUM, and NDSU. Students receive recognition on their academic transcript for minors completed on one of the other TCU campuses. This policy applies only to minors earned in programs not available on a student's home-campus. The Tri-College Minor Form (<http://www.ndsu.edu/fileadmin/registrar/forms/tcu-minor.pdf>) is available online.

## Majors

Majors may be earned only at the school from which a student earns a degree. Most students enroll initially at the school from which they intend to graduate. However, the TCU course exchange agreement between MSUM and NDSU allows a student to begin their studies at one of the schools prior to transferring to the other school to complete their degree. Tri-college students typically are restricted to pre-professional coursework at a campus

that offers a professional program of study. Students should work with the chair of the department in which they intend to major to make sure their program includes all requirements for the major and for graduation.

## Library Services

Students, faculty, and staff of the TCU institutions may use all of the libraries in the consortia. Circulating materials from TCU libraries are available free of charge for direct checkout or through inter-library loan.

A regional computer-based catalog shows availability of materials at the TCU and other libraries.

## Bus and Parking Services

A Tri-College bus schedule provides inter-campus transportation to Concordia, MSUM, and NDSU every half hour. The bus is operated weekdays by the City of Fargo during the academic year; it is not available during the summer. Bus schedules are available at MATBUS (<http://www.matbus.com>).

A separate parking permit is not issued for Tri College University parking. If vehicles have a current home-campus permit, they may be parked in the following lots on other campuses.

- **Concordia:** TCU students, faculty, and staff can park in the O parking lots (<https://www.concordiacollege.edu/directories/offices-departments-directory/facilities-management/parking-services>).
- **MState:** Apply for free parking at the Moorhead ([https://www.minnesota.edu/about/campuses/moorhead/#Directions\\_to\\_Campus](https://www.minnesota.edu/about/campuses/moorhead/#Directions_to_Campus)) campus.
- **MSUM:** TCU students can park in the G parking lots (<https://www.mnstate.edu/parking>).
- **NDSU:** contact Campus Police in the Student Center (<https://www.ndscs.edu/current-students/campus-buildings-services/parking>) for parking permit information.
- **NDSU:** Parking Lots R, TA and Fargo Dome lots B, C, D and E ([https://www.ndsu.edu/fileadmin/parking/docs/NDSU\\_Parking\\_Lots\\_map.pdf](https://www.ndsu.edu/fileadmin/parking/docs/NDSU_Parking_Lots_map.pdf)) . Faculty/staff permits are honored in AE and TA lots. Individuals with state-issued mobility-impaired permits may park in any mobility-impaired space on campus provided the Tri-College institution permit and the state-issued mobility-impaired permit are clearly displayed in conjunction with one another. Free parking is not available at NDSU, for Tri-College faculty and staff possessing a retiree parking permit, not issued by NDSU.

All drivers are subject to traffic regulations of the respective institutions. Lot restrictions are eased after 5 p.m., and there is no overnight parking.

# Undergraduate Policies

- Evaluation of Transfer Credit from Military Courses

Scholastic Standing (p. 126)

- Academic Progress
- Dean's List
- Academic Forgiveness

## Academic Planning

Students are advised to prepare short- and long-range plans according to curricular guidelines for the degree program selected. Attention to such details as semester credit loads and course sequences are recommended for optimum experiences.

## Academic Advising

The academic advising program at NDSU is designed to facilitate the student's intellectual and personal growth, to assist students in using university resources, and to guide students in making informed choices regarding academic and career plans. Following admission to NDSU, each student is assigned an adviser from the college or department in which the student is majoring. If a major has not been declared, an assignment is made with an adviser in the Career and Advising Center (<https://career-advising.ndsu.edu>). Advisers assist students in selecting courses to ensure a balanced education and they help interpret university and college policies and requirements. However, students are responsible for their academic decisions including the selection of courses, meeting course requisites (co-requisites/prerequisites), and adhering to policies, procedures, and deadlines.

Students are encouraged to see their adviser prior to registration. Students with adviser holds are required to meet with their advisers before the hold is lifted. Adviser assignments and holds can be viewed on Campus Connection.

Degree Map (<https://www.ndsu.edu/registrar/degreemap>) is an interactive planning tool for students and advisors to plan a path to graduation. Degree Map works alongside the Academic Requirements Report (<https://www.ndsu.edu/registrar/academics/advising/advisement>) within Campus Connection, so students can plan their class schedules, remaining requirements, and set academic and career goals to discuss with their academic adviser.

Advisers also assist students with campus resources, referrals, career planning, and campus policies and procedures. NDSU delivers services to support student academics and meet special needs. Refer to the Career and Advising Center for additional information and services.

Each of the academic colleges has a Degree and Records Analyst (<https://www.ndsu.edu/registrar/office/liaisons>) within the Office of Registration and Records who serves as a central point of contact to support and facilitate academic advising activities for faculty and professional advisers working with undergraduate (including pharmacy programs) student degree progress.

## Credit By Examination

Students may demonstrate evidence of college-level achievement through the use of nationally standardized tests. Competency to take these examinations may have been gained through intensive preparation in high school, extensive reading in a particular field, or other types of formal or informal preparation. A student may not use credit by examination to repeat a course that has been previously completed at NDSU or another regionally accredited institution. Score reports must be sent directly to NDSU from the awarding agency/board. High school transcripts and student-issued grade reports are not considered official for purposes of awarding credit by examination. Credit by examination is not counted towards the university residence credit requirement for graduation.

## Advanced Placement Examination (AP)

Students from high schools that participate in the Advanced Placement Program may earn credit through examinations provided by the College Entrance Examination Board (CEEB). The examinations are administered at the conclusion of a college-level course taught in participating high schools. AP Score Reports are sent to the colleges or universities designated on your exam answer sheet. Students who do not designate NDSU on their answer sheet may contact AP Services (see below) to have scores sent to NDSU. The code for NDSU is **6474**.

In accordance with North Dakota University System policy, a minimum score of three is required to receive credit for Advanced Placement (AP) examinations. If NDSU does not have an equivalent course, free elective credit may be awarded. Credit earned through AP is not residence credit and may not be used to satisfy residence-credit requirements for graduation. A listing of AP exams and current NDSU equivalent courses are listed below.

Examination	Score	Equivalent NDSU Course	Credit Hours	Gen Ed Category

## College Level Examination Program (CLEP)

CLEP is a national testing program sponsored by the College Entrance Examination Board (CEEB).

According to North Dakota University System policy, a minimum score of 50 is required to receive credit for CLEP subject examinations. If NDSU does not have an equivalent course, free elective credit may be awarded.

### The following CLEP policies apply at NDSU

1. The examination should be taken prior to enrollment in the equivalent or more advanced college-level course.
2. Scores from an examination may not be used to establish credit for a course previously taken and failed or for a course in which the student is currently enrolled.
3. Three months must elapse before an examination may be repeated.
4. Credit earned through CLEP is not residence credit and may not be used to satisfy residence-credit requirements for graduation.

### CLEP Examinations

A listing of CLEP exams and current NDSU equivalent courses are listed below.

Examination	Score	Equivalent NDSU Course	Credit Hours	Gen Ed Category
American Government	50	POLS 115	3	B

## DSST Examinations

NDSU recognizes the DSST (Dantes) examination, which was originally designed for the military as a way to provide individuals an opportunity to obtain college level credit for what they have learned in nontraditional ways. Now available for civilian use, the DSST Test Control Officer (TCO) administers the exams on more than 560 military installations and official DSST test centers. The main users of the exams include adult education programs, U.S. Department of Defense, and two- and four-year colleges and universities. NDSU's DSST location site code is: DSST-9366.

In accordance with North Dakota University System policy, students must receive a minimum score on the examinations to qualify for possible awarding of credit and advanced placement, which is determined by the appropriate academic department on campus. If NDSU does not have an equivalent course, elective credit may be awarded. Credit earned through DSST may not be used to satisfy residence credit requirement for graduation. A listing of DSST exams and current NDSU equivalent courses are listed below.

Examination	Score	Equivalent NDSU Course	Credit Hours	Gen Ed Category
A History of the Vietnam War	44	Free Elective (HIST 1XX)*	3

## International Baccalaureate (IB)

NDSU recognizes the International Baccalaureate program, offered at many high schools in the United States and abroad, which allows students to take examinations for credit. The examinations are offered at the standard (SL) and higher (HL) levels. **However, according to state policy, NDSU will only grant credit for applicable HL examinations.**

In accordance with North Dakota University System policy, students must receive a predetermined minimum score on higher-level (HL) examinations to qualify for possible awarding of credit and advanced placement, which is determined by the appropriate academic department on campus. Credit earned through IB may not be used to satisfy residence-credit requirements for graduation. Scores received in IB examinations not included in the table below may be considered for credits. Contact the Office of Registration and Records (<https://www.ndsu.edu/registrar/contact>) for information.

Examination	Score	Equivalent NDSU Course	Credit Hours	Gen Ed Category
HL Biology	4	BIOL 150, BIOL 150L, BIOL 151, BIOL 151L	8	S/L, S/L, S/L, S/L

## Course Challenge

A student who is currently registered may seek credit by challenging a course. A course challenge usually consists of a special comprehensive examination; however, additional types of performance may be required for some courses. A course challenge is only permitted for courses in which the student has no previous record (prior registrations allowable if course was dropped by the No Record Drop deadline in a given term). Further, credits earned by course challenge may not satisfy requirements toward a graduate degree.

### Procedures for pursuing a course challenge include the following

1. Obtain a Petition for Course Challenge Form (<https://www.ndsu.edu/registrar/forms/challenge>), available online.
2. Obtain approval from the academic adviser, the instructor of the course, and the chair of the department offering the course. Clarify expectations of the challenge, e.g., examination only or examination plus other performance. Based on the nature of the course and content area, some courses may not be approved for challenge by the department.
3. Pay the course challenge fee at the Customer Account Services (<https://www.ndsu.edu/cas>), 302 Ceres Hall, after receiving approval for the challenge (50% of the regular credit tuition charge; not subject to tuition cap).
4. Arrange a mutually convenient date and time for the challenge with the instructor or department.
5. Upon receipt of the signed Petition for Course Challenge form from the department, courses and credits successfully challenged are listed on the student's academic transcript with a passing (P) grade. Unsuccessful challenges are not recorded.

### Project Lead the Way (PLTW) Eligibility:

Secondary school students successfully completing Project Lead the Way (PLTW) courses may apply for transcribed college credit from North Dakota State University. The student will receive 3 semester credits per course, subject to the following conditions:

- The high school must be certified by PLTW.
- All requirements for the PLTW course must be satisfied, and the student must achieve an average of 85% or better for the course
- The PLTW End of Course Assessment must be taken and passed with a stanine\* score of 6.
- Correct payment amount and completed application must be post marked by the deadline. Any application post marked after the deadline will not be processed and will be returned.

\*This assessment (Administered by PLTW) is based on a norm-reference stanine scores which ranges from one (1) to nine (9) with one (1) being the lowest possible score and nine (9) being the highest possible score.

NDSU will accept transcribed credit for PLTW courses from other affiliate universities with equivalent credit requirements. Up to 6 credits may be used as general electives towards a degree at the NDSU. Possible substitution of PLTW credits for meeting specific programmatic requirements at the University is at the discretion of the individual academic programs. Currently, at NDSU, PLTW courses do not have specific program equivalents.

The PLTW courses for which NDSU credit may be received are the following:

- ENGR: 120 PLTW IED: Introduction to Engineering Design
- ENGR: 121 PLTW POE: Principles of Engineering
- ENGR: 122 PLTW DE: Digital Electronics
- ENGR: 123 PLTW CEA: Overview of Civil Engineering and Architecture
- ENGR: 124 PLTW ES: Biotechnical Engineering or Environmental Engineering
- ENGR: 125 PLTW CIM: Computer Integrated Manufacturing
- ENGR: 126 PLTW AE: Aerospace Engineering
- ENGR: 128 PLTW CSE: Computer Science and Software Engineering

Once approved students see a Pass (P) appear on the NDSU transcript.

For additional information on PLTW, contact NDSU's College of Engineering (<https://www.ndsu.edu/coe>) or Office of Admission (<https://www.ndsu.edu/admission>).

*Project Lead The Way is a United States 501 non-profit organization that develops STEM curricula for use by elementary, middle, and high schools.*

## English and Mathematics Placement

In accordance with North Dakota University System Policy and Procedure 402.1.2 (<http://www.ndus.nodak.edu/makers/procedures/sbhe/default.asp?PID=217&SID=5>) students are placed into Math and English courses based on qualifying exam scores. The intent is to appropriately place students into courses that are both challenging and for which they are adequately prepared.

### English Placement for U.S. Students, Canadian Students, and U.S. Permanent Residents

- All students are required to successfully earn credit for ENGL 110 and 120 or equivalent as part of the NDSU general education requirements.
- For students who have multiple placement exam scores, the highest placement may be used.
- Eligible students with disabilities may seek reasonable accommodations to take the placement test. Please submit disability documentation to NDSU Disability Services at least two weeks prior to the time in which the accommodations are needed. Documentation will be reviewed and students will be notified if additional documentation is needed to make an eligibility decision. Please submit the request and documentation to: **NDSU Disability Services** (<https://www.ndsu.edu/disabilityservices>); Dept. 2860; P.O. Box 6050; Fargo, ND 58108-6050; (701) 231-8463.
- Students who have not submitted any of the approved English placement examinations are required to take the Accuplacer WritePlacer exam to determine English placement. The Accuplacer WritePlacer is offered through North Dakota State College of Science (<https://www.ndscs.edu/current-students/student-success/test-center>) (NDSCS) by contacting the NDSCS Test Center (701-231-6919 or [ndscs.fargotest@ndscs.edu](mailto:ndscs.fargotest@ndscs.edu)).
- Students who have submitted placement scores, may elect to take the NDSU Accuplacer WritePlacer to attempt to place into a higher English course. ENGL 120 is the highest placement attainable.
- Students who place into ASC 86 or ASC 87 developmental English courses are required to enroll through the collaborative student registration (<https://currbulletin.ndsu.edu/academic-policies/registration/#collaborativeregistrationtext>) process delivered by North Dakota State College of Science (<https://www.ndscs.edu/current-students/student-success/test-center>) (NDSCS).
- ASC 86 will be delivered by NDSCS on the NDSCS Fargo campus.
- ASC 87 will be delivered by NDSCS on the NDSU campus. Course textbooks for ASC 87 may be purchased through the NDSU bookstore (<http://www.ndsubookstore.com>).
- Upon completion of ENGL 120 with a 'C' grade or higher, students will be awarded placement credit (4) for ENGL 110.
- Students who transfer ENGL 120 to NDSU will be awarded placement credit (4) for ENGL 110 after successfully completing their upper division writing course with a grade of 'C' or higher.
- Students with a MELAB score should contact the IELP coordinator ([http://www.ndsu.edu/modernlanguages/department\\_directory](http://www.ndsu.edu/modernlanguages/department_directory)) for information on English placement.

The table below lists exam scores and corresponding English course placement at NDSU:

English ACT Subtest Score	SAT Writing	ACT Aspire	Smarter Balanced 11/12 Grade (ELA)	Accuplacer WritePlacer Test Score	Accuplacer Next-Generation Writing	MyFoundationsLab Pearson (CREAM CLEM & Others)	NDSU Course Placement
-	Evidence-Based Reading & Writing: 400 or lower	425 or lower	2 or lower	-	-	69.9% or lower	Accuplacer WritePlacer Required
11 or lower	-	-	-	0-2	200-236	-	ASC 86: College Writing Prep I (NDSCS Collaborative)
12-13	-	-	-	3-4	237-249	-	ASC 087: College Writing Prep II (NDSCS Collaborative)
14-17	Evidence-Based Reading & Writing: 410-470	426 or higher	3 or higher	5	250-255	70% or higher	ENGL 110: College Composition I
18 or higher	Evidence-Based Writing & Reading: 480	-	-	6-8	256 or higher	-	ENGL 120: College Composition II

#### English Placement for International Students

- All students are required to successfully earn credit for ENGL 112 and 122 (or 110 and 120 for native English speakers) or equivalent as part of the NDSU general education requirements.
- Students who are required to begin in LANG 109 must successfully complete the course with a 'C' grade or higher before they may enroll in ENGL 112 or equivalent.
- For students who have multiple exam scores, the highest placement may be used.
- Students with qualifying exam scores, who are advised to enroll in ENGL 122, will be awarded placement credit (4) for ENGL 112 upon completion of ENGL 122 with a 'C' grade or higher.

The table below lists ACT and SAT exam scores and corresponding course Placement:

Exam Type	LANG 109: Language Use in Writing ESL II	ENGL 112: ESL College Composition I	ENGL 122: ESL College Composition II
ACT English sub-test	13 or lower	14-17	18 or higher
SAT Writing	400 or lower	410-470	480

The table below lists placement exams for International students and corresponding course placement:

Exam Type	LANG 109: Language Use in Writing ESL II	ENGL 112: ESL College Composition I	ENGL 122: ESL English Composition II
IELTS (Overall)	5.5 or lower	6.0 or 6.5	7.0 or higher
TOEFL (Composite)	70 or lower	71-89	90 or higher
Pearson (Overall)	49 or lower	50 or higher	-
ELS Center	ELS 109 or lower	ELS 112 Certificate/Completion	-

## NDSU Math Placement Procedures

A variety of approved placement examinations are used (see table below) to determine placement of students into entry-level math courses. The following guidelines apply to math placement practices:

- For students who have scores from multiple exams, the highest placement will be used.
- Eligible students with disabilities may seek reasonable accommodations to take the placement test. Please submit disability documentation to NDSU Disability Services at least two weeks prior to the time in which the accommodations are needed. Documentation will be reviewed and students will be notified if additional documentation is needed to make an eligibility decision. Please submit the request and documentation to: **NDSU Disability Services** (<https://www.ndsu.edu/disabilityservices>); Dept. 2860; P.O. Box 6050; Fargo, ND 58108-6050; (701) 231-8463.
- Current, incoming or returning NDSU students who do not have prior college-level mathematics *OR* have not taken an approved placement examination must take the NDSU Pearson Placement exam to determine course placement.
- Students who meet the minimum score requirement of any approved placement examination may elect to take the NDSU Pearson Placement exam to attempt to place into a course above MATH 103 or MATH 104. Please note that the NDSU Pearson Placement exam should be completed prior to a student enrolling in either MATH 98 or MATH 103/104. If the Pearson Placement exam is taken after enrollment in MATH 98 or MATH 103/104, the student must drop this course either on or before the no-record drop deadline for the Pearson Placement to take effect.
- Students that do not meet the minimum score requirement on any approved placement examination will place into Math 98, however, students may elect to take the NDSU Pearson Placement exam offered through NDSU to attempt to place into a course above MATH 98.
- Students have the option to retake the NDSU Pearson Placement exam one time and must be completed before the last day to add classes in Campus Connection.
- Questions about the NDSU Pearson Placement exam can be directed to NDSU One Stop (<https://www.ndsu.edu/onestop>).

Exam scores and corresponding course placement possibilities are listed in the table below:

The table below lists NDSU approved placement examinations and minimum exam scores for placement into MATH 103 or Math 104:

Test	Test Component	Minimum Score
ACT	Math Subtest	21
SAT	MATH	530
SAT (prior to 2/05/2016)	Math + Reading	990
Accuplacer	Elementary Algebra	76
Accuplacer	College Level Math	50
Accuplacer Next-Generation	Quantitative Reasoning, Algebra, and Statistics	255
ACT Aspire	Math Subtest	431
ALEKS	Mathematics PPL	46
MyFoundationsLab Pearson (CREAM, CLEM & Others)	Math	70%
EdReady (NROC)	Math Placement	75
MAA Maplesoft	Algebra	12
Smarter Balanced	Grade 11-12 Math	3

The Table below lists NDSU Pearson Placement exam scores and corresponding Math course placement at NDSU:

Pearson	Course Placement
Intermediate Algebra < 70%	Math 098
Intermediate Algebra ≥ 70%	Math 103 or Math 104
Algebra < 60%	Math 103 or Math 104
Algebra 45%-59.9% AND Trigonometry ≥ 30%	Math 107
Algebra ≥ 60% AND Trigonometry < 50%	Math 105 or Math 144* or Math 146
Algebra ≥ 65% AND Trigonometry 40%-64.9%	Math 165 with Math 105
Algebra ≥ 65% AND Trigonometry ≥ 65%	Math 165

\*MATH 144, "Mathematics for Business", is only available for College of Business majors.

## Students with College Transfer Coursework or Credit by Examination Placement

Students with prior college coursework, Advance Placement (AP) or other credit-by-examination (CLEP, IB, DSST) will follow NDSU's Credit by Examination (<https://bulletin.ndsu.edu/academic-policies/undergraduate-policies/credit-by-examination>) guidelines for placement into mathematics and English coursework.

### Sequence of NDSU math courses as a reference or guide:

START: MATH 98\* > MATH 103 > MATH 105 > MATH 165 > MATH 166 or

MATH 98\* > MATH 103 > MATH 146 > Math 147 or

MATH 98\* > MATH 104

START: Math Placement Test > MATH 107 > MATH 165 > MATH 166

\*Students who begin in Math 98 must successfully complete the course with a 'C' grade or higher before they may continue to Math 103 or 104.

## General Education

The purpose of general education at NDSU is to ensure that students acquire knowledge, perspectives, and skills basic to a university education. The program is designed so that students will be able to adapt to and anticipate changes in their profession and in society. Students also will be able to integrate and use the knowledge and perspectives they have gained to live productive, intellectually rewarding and meaningful lives.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		6
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		6
<b>Wellness (W) <sup>†</sup></b>		2
<b>Cultural Diversity (D) <sup>*†</sup></b>		
<b>Global Perspectives (G) <sup>*†</sup></b>		
Total Credits		39

\* May be satisfied by completing courses in another General Education category.

<sup>†</sup> General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## General Education Category Descriptions

The following descriptions are elaborations of the general education categories approved by the Faculty Senate.

- **Communication (C)** is the clear, precise, and purposeful exchange of information in a variety of contexts, using either written or oral means.
- **Cultural diversity (D)** focuses on the social, personal, and interpersonal effects of variety and differences among cultures.
- **Fine arts (A)**, as an integral component of the humanities, promote the appreciation of aesthetics and the expression of creativity.
- **Global perspectives (G)** focus on analysis of worldwide issues illustrating the interdependence of the world and its people.
- **Humanities (A)** systematically explore cultural and intellectual forces shaping events, individual expression, and social values.
- **Quantitative reasoning (R)** is an organized set of quantitative methods used to solve problems or extend knowledge. Quantitative methods are a set of principles and procedures that could be used to manipulate numerical data.
- **Science (S)** is an organized body of knowledge, including principles and procedures based on scientific methods, used to explain physical or biological phenomena.
- **Social and behavioral sciences (B)** use scientific methods to analyze the behaviors, structures, and processes of individuals and groups.
- **Wellness (W)** is a dynamic and integrative process of becoming aware of healthy lifestyles, of learning to make informed choices, and of developing a balanced approach to living.

## General Education Program Assessment

General education assessment has three basic purposes:

1. To improve student learning and development by identifying the intended student outcomes for the program.
2. To provide feedback on the progress toward the intended student outcomes.
3. To use the feedback to modify aspects of the program to ensure that the outcomes are being achieved and that student learning is improved.

Assessment activities are valued at NDSU and include the participation of students. Results will not be used to penalize students or faculty. Student performance on assessment of the general education program will not become part of the transcript.

## General Education Transfer

Students transferring lower-division general education credits within the North Dakota University System need to consult with advisers in their academic programs at NDSU for two reasons. First, degree requirements of individual programs and colleges at NDSU may exceed the university-wide general education requirements. Second, meeting the university-wide lower-division general education requirements by transfer credits may not necessarily prepare students for advanced, upper-division study in an academic major at NDSU. See also the NDUS GERTA Agreement.

## Using NDSU Global Seminar and Global Practicum: Study Abroad for General Education Cultural Diversity or Global Perspectives

**(Prefix) 292, 392, 492, 692: Global Practicum: Study Abroad** – A student who studies abroad for one or more semesters and who successfully completes a minimum of three credits may qualify for either Cultural Diversity or Global Perspectives. Six or more study abroad credits may qualify for both Cultural Diversity and Global Perspectives categories. A student must arrange to have an official transcript sent to NDSU from the study abroad institution for official evaluation and credit determination. In addition, a student must complete a Student Appeal for Exception to General Education Requirements (<https://www.ndsu.edu/fileadmin/registrar/forms/genedappeal.pdf>) for consideration.

**(Prefix) 179, 279, 379, 479, 679: Global Seminar** – Global Seminar experiences do not automatically qualify for NDSU general education. An NDSU global seminar instructor must apply for general education course approval in the appropriate category that pertains to the course content (including cultural diversity and global perspectives). Approval requires the instructor to submit a course syllabus and a one-page rationale addressing how the seminar experience will meet the outcome being sought. Syllabus and rationale are to be submitted to the University Curriculum Committee well in advance of the seminar departure.

## General Education Learning Outcomes

The intended learning outcomes resulting from the various general education categories include the following:

**Communication (C)** - students will

- effectively communicate analysis, knowledge, understanding, expression and/or conclusions in a range of contexts
- skillfully use high-quality, credible, relevant sources
- demonstrate appropriate conventions in a variety of communication situations

**Quantitative Reasoning (R)** - student will

- apply quantitative and qualitative methods to collect and analyze data, in order to:
  - explain the nature of evidence used for analysis
  - evaluate the assumptions, evidence, and logic of competing views and explanations

### **Science & Technology (S)**

Technology Learning Outcome- students will

- understand, use, and apply technology to demonstrate creativity and solve problems
- identify the social, aesthetic, and ethical implications of technological decisions
- analyze how technology shapes, limits, and augments our experiences and understandings

Natural and Physical Sciences Learning Outcome - students will

- analyze components and dynamics of natural and physical worlds
- develop models to explain phenomena within the natural and physical worlds
- apply methods of scientific inquiry to enhance their understanding of the natural and physical world

### **Humanities & Fine Arts (A)** - students will

- identify the nature and impact of aesthetic and creative activities in human experience
- analyze the components and dynamics of human societies in their artistic, cultural, and historical contexts

### **Social & Behavioral Sciences (B)** - students will

- analyze the interplay of self and society, particularly how social structures shape human experiences and how humans shape social structures
- apply theories or research methods to understand human events, identities, artifacts, or social structures
- Examine their own values, biases, and conclusions within larger social or theoretical contexts

### **Social & Behavioral Sciences - Wellness (W)** - students will

- examine how social ecological contexts relate to their personal wellness values, biases, and conclusions
- articulate how their personal, professional, or civic goals reflect their core wellness values
- explore, identify and evaluate sources of information related to personal wellness

### **Cultural Diversity (D)** - students will

- identify how diverse societies shape individual experiences, expressions and identities
- identify how diversity influences cultural values

### **Global Perspectives (G)** - students will

- apply theories or research methods to develop strategies and solutions that address global challenges
- identify potential benefits and explore the implications of global citizenship
- evaluate global phenomena using perspectives, attitudes and beliefs of communities with cultural backgrounds different from their own

## **General Education Administrative Policies**

1. General education courses may be used to satisfy requirements for both general education requirements and the major, minor, and program emphases, where applicable.
2. Departments or colleges may preclude their students from double counting general education courses with major courses.
3. Except for courses that meet the cultural diversity or global perspectives requirements, no course can fulfill the requirements for more than one general education category.
4. General education requirements can be met through credit by exam, departmental examinations, or equivalents.
5. General education requirements can be met by successful completion of a course for which an approved general education course in the same department is a prerequisite or by successful completion of an advanced course in the same department with comparable course content.
6. Except for courses offered only on a pass/fail basis, no courses taken to meet the general education requirements may be taken for pass/fail grades. (Exception for Spring 2020: Students were allowed to complete general education requirements with a pass grade.)
7. The general education minimum requirements apply to all baccalaureate degree programs.
8. Transfer students who have only partially fulfilled general education category requirements by transfer-approved courses must complete the requirements in approved courses within the NDSU deficient categories. No category credit requirement may be deficient by more than a partial

semester credit. However, in the communication category, if the transfer course(s) have been evaluated as equivalent to ENGL 110 College Composition I, ENGL 120 College Composition II, and COMM 110 Fundamentals of Public Speaking and total no less than eight semester credits, the lower-division category requirement has been met.

9. Students may receive placement credit for ENGL 110 College Composition I based on a minimum English ACT score (or SAT equivalent) and satisfactory performance (grade of 'C' or better) in ENGL 120 College Composition II or equivalent.
10. A student who has completed an associate of arts or an associate of science degree in the United States or Canada at a regionally accredited institution and who transfers to NDSU or who pursues a second baccalaureate degree at NDSU is considered to have completed his or her lower-division general education requirements at NDSU. Transfer student coursework from outside the United States and Canada will be evaluated on a course-by-course basis.
11. General education courses at other accredited institutions, which do not have equivalent courses or general education status at NDSU, may be accepted in transfer as part of the general education requirements at NDSU.
12. All general education course syllabi and course web sites must identify the course as having been approved for meeting general education requirements and include the general education outcomes for which each course is approved. (See Syllabus Requirements (<https://www.ndsu.edu/facultysenate/acadaffairs/syllabi>))
13. Students who have completed basic military training (which is the commitment for enlistment) will receive a waiver for the Wellness category. Military record documentation is required for the waiver; documentation is to be submitted to the Office of Registration and Records with a completed Appeal for Exception to General Education Requirements form. The waiver for the training will not lead to course credit, and all other minimum graduation requirements apply.
14. Students must complete at least four credits of natural and physical sciences in the Science and Technology category. Also in this category, a student must complete a one-credit lab taken as a co-requisite with an approved general education science and technology lecture course, unless the approved science and technology course has an embedded lab experience equivalent to one-credit (ex. BIOL 111 and BIOL 111L; PLSC 110).

## General Education Courses

The following is representative of the courses approved in each general education category for the specific catalog year. The general education component requires a minimum of 39 total credits with a minimum credit requirement in each of the seven categories. Cultural diversity and global perspectives may be satisfied by completing courses in another category.

### Category C: Communications - 12 credits

- 3 of the 12 credits at the upper-level (300-400):

Code	Title	Credits
ENGL 110 or ENGL 112	College Composition I ESL College Composition I	4
ENGL 120 or ENGL 121 or ENGL 122	College Composition II Honors Composition II ESL College Composition II	3
COMM 110 or COMM 111	Fundamentals of Public Speaking Honors Public Speaking	3
ECON 356	History of Economic Thought	3
ENGL 320	Business and Professional Writing	3
ENGL 321	Writing in the Technical Professions	3
ENGL 322	Writing and the Creative Process	3
ENGL 324	Writing in the Sciences	3
ENGL 325	Writing in the Health Professions	3
ENGL 326	Writing in the Design Professions	3
ENGL 357	Visual Culture and Language	3
ENGL 358	Writing in the Humanities and Social Sciences	3
ENGL 459	Researching and Writing Grants and Proposal	3
FREN 360	Studies in Language and Style	3
HIST 390	Historical Research and Writing	3
MICR 354	Scientific Writing	3
PHIL 450	Metaphysics	3
PHIL 451	Epistemology	3
PHRM 324	Writing and Professionalization in Pharmacy	3
SPAN 401	Advanced Spanish Grammar and Writing	3

**Category R: Quantitative Reasoning - 3 credits**

Code	Title	Credits
CSCI 122	Visual BASIC	3
CSCI 159	Computer Science Problem Solving	3
EMGT 445	Understanding Vulnerable Populations in Disasters	3
MATH 104	Finite Mathematics	3
MATH 146	Applied Calculus I	4
MATH 165	Calculus I	4
PHIL 257	Traditional Logic	3
STAT 330	Introductory Statistics	3

**CATEGORY S: Science & Technology - 10 Credits**

- At least four credits must be in natural or physical sciences.
- A one-credit lab must be taken as a co-requisite with a general education science/technology course unless the course includes an embedded lab experience equivalent to a one-credit course.

**Natural Science (Sn):**

Code	Title	Credits
AGRI 115	Wonders of Weather	3
BIOL 100L	Non-Majors Biology Lab *	1
BIOL 111	Concepts of Biology	3
BIOL 124	Environmental Science	3
BIOL 126	Human Biology	3
BIOL 220	Human Anatomy and Physiology I	3
BIOL 220L	Human Anatomy and Physiology I Laboratory	1
BIOL 315	Genetics	3
or PLSC 315	Genetics	
BIOL 315L	Genetics Laboratory	1
or PLSC 315L	Genetics Laboratory	
CFS 210	Introduction to Food Science and Technology	3
ENT 210	Insects, Humans and the Environment	3
GEOL 201	The Geology of Climate Change and Energy	3
HON 342	Colloquium in the Sciences	3
MICR 202	Introductory Microbiology	2
MICR 202L	Introductory Microbiology Lab	1
NRM/RNG 225	Natural Resources & Agrosystems	3
PLSC 110	World Food Crops	3
PLSC 111	Genetics and You	2
PLSC 210	Horticulture Science	3
PLSC 211	Horticulture Science Lab	1
SOIL 217	Introduction to Meteorology & Climatology	3

\* Beginning Fall 2020, BIOL 100L replaces the previously offered BIOL 111L, BIOL 124L and BIOL 126L as the co-requisite lab for the lecture classes BIOL 111, BIOL 124, and BIOL 126. BIOL 100L is also considered the repeated course equivalent for any of these three lab courses.

**Physical Science (Sp):**

Code	Title	Credits
CHEM 117	Chemical Concepts and Applications	3
CHEM 117L	Chem Concepts and Applications Lab	1
CHEM 121	General Chemistry I	3
CHEM 121L	General Chemistry I Laboratory	1

## North Dakota University System General Education Requirements Transfer Agreement

The North Dakota University System (NDUS) General Education Requirements Transfer Agreement (GERTA) (<https://ndus.edu/lets-get-started/transfer-to-a-different-campus/gerta>) was established by the State Board of Higher Education to ease student transfers within the system. Although subject to revision by the board, the policies at the time of this printing were as follows:

- If students have completed the lower-division general education course requirements (36 credits or more) at one NDUS institution and transfer to another NDUS institution, then the lower-division general education requirements will have been met.

If the lower-division general education requirements have not been completed before transferring, the general education courses from the indicated areas are applicable to an appropriate general education requirement of the institution to which they are transferred. In these cases, the number of credits required to complete the general education requirement in each area is determined by the policies of the institution to which the courses are transferred.

Students transferring lower-division general education credits within the North Dakota University System need to consult with advisers in their academic programs at NDSU for two reasons. First, degree requirements of individual programs and colleges at NDSU may exceed the university-wide general education requirements. Second, meeting the university-wide lower-division general education requirements by transfer credits may not necessarily prepare students for advanced, upper-division study in an academic major at NDSU.

Students transferring from non-ND University System institutions will have their general education requirements evaluated on a course-by-course basis when they enter NDSU.

## Undergraduate Classification

Undergraduate degree-seeking students are classified according to the total number of credits earned. Classification or standing in a declared plan of study may vary from the classification used by the university in determining academic standing, financial aid award levels, etc.

Classification	Completed Credits
Freshman	0 - 26
Sophomore	27 - 59
Junior	60 - 89
Senior	90 or more

Credit limitations may be placed on students who have not been fully admitted to a degree program at NDSU.

**Undergraduate non-degree student:** One who is not seeking a degree or who has not completed the formal application process for admission. A maximum of 15 undergraduate credits may be completed in a non-degree student status. Non-degree students are not eligible for financial aid.

## Undergraduate Degree and Graduation Information

### Baccalaureate Degrees

To receive a baccalaureate degree from NDSU, students must complete all of the requirements listed in this section as well as those specified for the particular degree program by a college within the university. Students should consult the curriculum guide (<https://www.ndsu.edu/registrar/academics/curricula>) or contact the academic department for further information on degree requirements. Degree candidates must satisfactorily complete one of the degree curricula offered at NDSU in accordance with the requirements listed below.

## Degree and Graduation Requirements

Students must satisfactorily complete two sets of requirements: a) university-wide requirements including general education and b) college- or department-level requirements, which include requirements for completing majors and minors. Official college- and department-level requirements for majors and minors are available in the curriculum section (<http://bulletin.ndsu.edu/undergraduate/program-curriculum>) of this bulletin and in curriculum guides (<https://www.ndsu.edu/registrar/academics/curricula>) available online. Minimum degree/graduation requirements are as follows:

1. **Total degree credits:** Students must earn a minimum total of 120 credits in approved coursework. Requirements for some academic programs may exceed this degree credit minimum.
2. **Academic major requirements:** Satisfactory completion of all requirements of the major curriculum in which one is enrolled. Requirements for some academic majors exceed this minimum.
  - a. Because curricula are subject to change, intended degrees and majors, as well as second majors and minors, must be declared to be official. This may be done at the point of admission or readmission to the University or by submission of a Major Change form (<https://www.ndsu.edu/registrar/forms/majorchange>) to the Office of Registration and Records.
  - b. Students follow the published curricula in place when a major/minor is declared or from the year of admission to a limited- or selective-enrollment program, whichever applies, to graduation provided enrollment at NDSU has not been discontinued for more than one calendar year.
  - c. Students who advance into limited- or selective-enrollment programs will have their academic degree/plan status changed accordingly based on information provided to Registration and Records by the respective academic department.
  - d. Students who discontinue enrollment at NDSU for more than one calendar year are subject to meet the curricular requirements in effect during the term of readmission.
  - e. Each program of study presented by a candidate for the baccalaureate degree is audited for meeting the degree requirements by the Office of Registration and Records.
3. **General education requirements:** Satisfactory completion of the general education requirements as specified by the University.
4. **Scholastic standing requirement:** A minimum institutional grade-point average of 2.00 based on work taken at NDSU is required for graduation. When a course is taken and repeated at NDSU, only the most recent grade and credits earned will be used in computing the cumulative grade-point average. Some academic programs require higher minimum grade-point requirements.
5. **Upper-level credit requirements:** At least 36 of the credits presented for graduation must be in courses taken at the 300 and 400 level.
6. **Transfer Students:** Students with transfer credit from another institution must earn a minimum of 60 semester credits from a baccalaureate-degree granting or professional institution. Of these, at least 36 must be NDSU residence credits as defined below. Within these 36 resident credits, minimum requirements include 15 semester credits in courses numbered 300 or above (36 upper-level credits must still be earned in total) and 15 semester credits in the major field of study.
7. **Residence requirements:** Residence credits include credits registered and paid for at NDSU. These may include courses offered on the NDSU campus or Tri-College (p. 100). At least 36 credits must be NDSU resident credits.
8. **Financial obligations:** Satisfy all financial obligations owed to the university.
9. **Application for degree:** All candidates for a baccalaureate or Pharmacy Doctorate degree must indicate their intent to graduate when registering for their last semester. The application form (<https://www.ndsu.edu/registrar/forms/degreeapp>) is available online. Failure to apply by the published graduation application deadline of the planned semester of graduation may delay the awarding of the degree until the following semester. If a student fails to complete the required courses by the intended graduation term, the student must reapply for graduation in a following term.

## Undergraduate Majors and Minors

Majors and minors are integral parts of baccalaureate degree curricula. Specific curriculum requirements for majors may be acquired from the appropriate departmental office or from Registration and Records. Minimum credit requirements for degrees are outlined in NDUS SBHE Policy 409 (<https://www.ndus.edu/makers/procedures/sbhe/default.asp?PID=102&SID=5>). Students are responsible for following the requirements in place at the time a major or minor is officially declared with the university.

**Major:** A major is a planned grouping of related courses that totals a minimum of 32 credits.

**Minor:** A minor is a similar grouping of courses that totals a minimum of 16 credits. A minimum of eight credits must be earned in residence at NDSU.

**Second or Multiple Majors:** One or more majors may be earned under the same baccalaureate degree. All requirements for the majors must be completed and at least 15 unique credits must exist between majors.

Multiple majors or minors may be completed and recorded on the student's academic record after the degree for the first major has been awarded. These subsequent majors/minors will appear as a milestone statement following the term for which the requirements were completed. When majors under different degrees are involved, the requirements for a second degree apply (See next section).

## Second Degree

A second baccalaureate degree type may be earned at NDSU with all of the following provisions:

1. All curriculum requirements must be satisfactorily completed.
2. Each baccalaureate degree must be different (ex. B.S. & B.A. or B.S. & B.S.E.E.). However, students may complete requirements for more than one major within a given degree, if available (see second or multiple majors).

## Combined/Accelerated Degree Programs of Study

NDSU offers combined/accelerated programs of study in a variety of academic disciplines. These programs provide an opportunity for highly-qualified students to earn both a bachelor's and master's degree in a cost-effective, high-quality and timely manner. Students interested in a combined/accelerated program should consult with the academic department offering the majors. Students must have a cumulative GPA of 3.50 at NDSU and may use a maximum of 15 graduate credits (or fewer as determined by the academic department) toward the undergraduate degree. The following majors/disciplines are available as combined/accelerated programs:

UNDERGRADUATE DEGREE PROGRAM	GRADUATE DEGREE PROGRAM
Agribusiness (B.S.)	Agribusiness & Applied Economics (M.S.)
Agricultural Economics (B.S.)	Agribusiness & Applied Economics (M.S.)
Biological Sciences (B.A. or B.S.)	Biology (M.S.)
Coatings & Polymeric Materials (minor)	Coatings & Polymeric Materials (M.S.)
Computer Engineering (B.S.Cpr.E.)	Electrical & Computer Engineering (M.Engr. or M.S.)
Computer Science (B.S.)	Computer Science (M.S.)
Criminal Justice (B.A. or B.S.)	Criminal Justice (M.S.)
Dietetics (B.S.)	Health, Nutrition & Exercise Science - Exercise/Nutrition Science Option (M.S.)
Dietetics (B.S.)	Public Health (M.P.H.)
Economics (B.A. or B.S.)	Agribusiness & Applied Economics (M.S.)
Electrical Engineering (B.S.E.E.)	Electrical & Computer Engineering (M.Engr. or M.S.)
Food Science (B.S.)	Cereal Science (M.S.)
Human Development & Family Science (B.S.)	Human Development & Family Science (M.S.)
Mechanical Engineering (B.S.M.E.)	Mechanical Engineering (M.S.)
Physics (B.A. or B.S.)	Physics (M.S.)

## Undergraduate Certificates

A certificate program is a specialized course of study requiring at least 9 credit hours at the undergraduate level or eight credit hours at the graduate level, per NDUS SBHE policy & procedure 409. Certificates may be earned while in pursuit of a degree or as standalone programs of study. Prospective students interested in certificate programs, but not seeking a degree, must be accepted to the university. Contact the Office of Admission (<https://www.ndsu.edu/admission>) or the Graduate College (<https://www.ndsu.edu/gradschool>) for further information. Curricular requirements and verification forms are available in academic departments offering certificates. Completed forms must be signed by the appropriate department chair (and Graduate College, if applicable) and submitted to Registration and Records in order for the certificate to be posted to a student's academic record and official documentation issued.

## Exceptions to Academic Program Requirements

Academic policies and curricular requirements are designed to ensure that programs at NDSU are consistently of high quality. Students are expected to complete all curricular requirements, which includes the overall University requirements (includes general education), any college or department requirements if applicable, and major program of study requirements. Students may request substitutions or waivers for college or departmental requirements when extenuating circumstances prevail. Depending on the nature of the requested exception, departmental or college level approval is required.

## Bachelor of Arts Requirement Using a Second Language

The Bachelor of Arts (B.A.) degree may be conferred upon students who complete the major requirements for their chosen field of study and have functional proficiency in at least one language other than English. The B.A. degree recognizes these students as having acquired the foundation for enhancing their ability to communicate, work, and study in an internationalized world. The B.A. signifies that these students have chosen to develop, through the equivalent of at least four semesters of coursework, both practical language skills and a comparative perspective on their own language and culture. The B.A. second language requirement fosters an awareness of the culturally conditioned nature of the students' assumptions about the world, and it better equips them with the mental agility needed to understand ways of thinking different from their own as they encounter the diversity of professional and personal relationships, as well as the intellectual and practical challenges of their future careers.

The second language requirement of the B.A. degree involves student demonstration of functional language proficiency over a sustained period of time, typically 14 credits of coursework. Given the sequential nature of language courses, the assessment of their abilities across the range of skills in speaking, reading, writing and listening comprehension is continuous and demanding. For this reason, NDSU requires that those students who have

prior language-learning experience or who present language examination scores (CLEP, etc.) take, at minimum, the exit-level (202) course in order to verify their broad functional ability and basic cultural competence. It is important to note that the language requirement is not defined in credits but in terms of proficiency or communicative competence in all four skills of speaking, reading, writing and listening comprehension.

To fulfill the B.A. language requirement a student must demonstrate competence equivalent to that normally attained after four semesters of college study (NDSU level 202). Competency may be demonstrated in the following ways:

1. Completion in any second language of coursework at the NDSU 202 level or its equivalent with a grade of 'C' or better. Note that this requirement cannot be fulfilled by coursework taken pass/fail.
2. Successful completion of any second language course with a grade of 'C' or better that has the equivalent of NDSU 202 or higher as a prerequisite.
3. For students having previously passed the CLEP Examination (p. 105) in French, German or Spanish with a CLEP score high enough for second-year college credit (59 in French, 60 in German and 63 in Spanish) or the AP exam (p. 103) with a minimum score of 4 in French, German or Spanish, taking one additional college-level language class at the 202 level or higher in order to demonstrate competency in all four skill levels. Students must complete this course with a 'C' or better.
4. English satisfies the B.A. language requirement for students whose official, certified transcripts demonstrate that their secondary or higher education was completed in a language other than English. It is the responsibility of the student to provide all necessary untranslated, official documentation to the Department of Modern Languages (<https://www.ndsu.edu/modernlanguages>) for verification. No credit will be awarded.
5. Students who are unable to provide the above mentioned certified documentation but who are native speakers of languages other than English may fulfill the second language requirement through proficiency in English by successful completion of the three-semester General Education English composition sequence and by passing an additional English (ENGL) course with a 'C' or better. Students having completed this sequence may apply to the Department of Modern Languages (<https://www.ndsu.edu/modernlanguages>) for a waiver of the Second Language requirement.
6. Requests for determination of proficiency in languages not taught at NDSU are considered by the Department of Modern Languages (<https://www.ndsu.edu/modernlanguages>). If a student would like to demonstrate proficiency through testing in a language that is not taught at NDSU, it is his/her responsibility to arrange for such testing. The proficiency test must be completed by a faculty or staff member at a college or university; the evaluator must hold at least a master's degree (in any discipline). The test must evaluate reading, writing, listening and speaking through the fourth semester (intermediate NDSU 202) college level. The student must provide documentation from the evaluator which includes a copy of the test, a letter from the evaluator assessing the level of proficiency, and a statement of the evaluator's credentials, including an explanation of his/her expertise in the language being tested, if the evaluator does not teach that language at the college level. No credit is awarded but proficiency requirement is fulfilled.

## Graduation with Honor

Graduation with honor applies only to baccalaureate degrees. Candidates who have earned a minimum of 60 credits in residence at NDSU and a minimum institutional grade point average of 3.50 will graduate with honor. All final grades on the NDSU academic record will be included in grade point average calculations for graduating with honor. Students who meet these academic criteria will graduate according to one of the following honor levels:

Honor	Criteria
Summa Cum Laude	equal to or greater than 3.90
Magna Cum Laude	equal to or greater than 3.70 and less than 3.90
Cum Laude	equal to or greater than 3.50 and less than 3.70

## Degree Audits

Each program of study presented by a candidate for the baccalaureate degree is audited for meeting the degree requirements by the Office of Registration and Records. Degree candidates are certified by the Office of Registration and Records according to total credits earned, institutional grade-point average, and other university requirements (See Degree and Graduation Requirements).

A degree audit is an official review of graduation requirements to determine a student's graduation eligibility. Undergraduate students who have completed a minimum of 75 credits are notified and asked to complete the degree audit request (<https://www.ndsu.edu/registrar/forms/degreeaudit>). Degree audits are not automatically completed as student educational and degree goals vary (multiple degree, majors, minors, etc.). An official degree audit is completed by the Office of Registration and Records typically two semesters prior to the student's reported graduation on the audit request.

At any time, however, undergraduate students and their advisers may track degree progress using the Academic Requirements Report (<https://www.ndsu.edu/registrar/academics/advising/advisement>) (automated degree audit) feature on Campus Connection. This functionality is interactive and also allows the student to plan for upcoming semesters within the advisement report. Instructions and information on how to access and read an Academic Requirements Report are available to students and advisers.

## Scholastic Standing

Academic progress is measured by grades and credits earned. Students receive acknowledgment for high academic achievement and are given warning at the end of each semester via NDSU email when they become academically deficient.

To be eligible to register continuously without conditions, an undergraduate or professional student must maintain good academic standing, which is defined as a minimum cumulative institutional grade point average of 2.00 (4.00 scale).

Some programs of study have academic standards higher than the University minimum. Students should consult with their adviser or academic department for program specific requirements.

Records of all students are examined at the end of each grading period. Academic standing relates to the following:

### Good Standing

Good standing reflects when a student's term GPA and cumulative GPA are both at or above 2.00.

### Academic Warning

An academic warning is to alert a student that his/her term GPA is below the minimum required for good standing, even though the institutional cumulative GPA is at or above 2.00. An academic warning does not appear on the official academic transcript but does appear on the unofficial transcript. Students are notified of their academic warning status via official NDSU email.

### Academic Probation

An academic probation is issued when a student who entered the grading period on good standing or academic warning earns an institutional cumulative GPA below the minimum 2.00 for good standing. An academic probation does not appear on the student's official academic transcript, but does appear on the unofficial transcript. Students are notified of their academic probation status via official NDSU email.

### Continued Probation

Continued probation is a formal extension of the academic probation status. It is issued when a student enters the grading period on academic probation or continued probation, shows adequate progress by attaining a minimum term GPA of 2.00, but his/her cumulative institutional GPA is still below the minimum 2.00 for good standing. Continued probation does not appear on the student's official academic transcript, but does appear on the unofficial transcript. Students are notified of their continued probation status via official NDSU email.

### Academic Suspension

Academic suspension is issued when a student enters the term on either probation or continued probation and earns both a term GPA and institutional cumulative GPA below the minimum 2.00 for good standing. This includes students admitted on probation for their first semester at NDSU or readmitted on probation following an academic suspension. A student may not be considered for readmission for two grading periods following an academic suspension (includes summer). An academic suspension appears on the student's official academic transcript. A suspension hold is placed on the student's record by the Office of Registration and Record which prevents all future registration. If a student has pre-registered for classes in a future semester, these courses will be administratively removed by the Office of Registration and Records. Students who are suspended are notified of their suspension status via official NDSU email.

### Filing a Suspension Appeal Based on Extenuating Circumstances

A student who has been suspended may appeal the suspension **but only if there are extraordinary circumstances beyond the student's control that can be supported with documentation**. An Appeal Academic Suspension (<https://www.ndsu.edu/fileadmin/registrar/forms/suspappeal.pdf>) form is available online and must be submitted to the Office of Registration and Records by the deadline published on the appeal form. If approved, the student must make satisfactory academic progress in the subsequent term according to the published academic standards of the University (see above).

### Readmission After Serving an Academic Suspension

To be considered for readmission after serving an academic suspension, students must sit out a minimum of two grading periods (includes summer) and file a Undergraduate Reactivation/Petition for Readmission Form (<https://dmsforms.ndsu.edu/iFiller/iFiller.jsp?fref=1de6e037-8d8b-4cbc-a1d3-23c704553423>) to the Office of Registration and Records a minimum of 30 business days prior to the beginning of the semester in which the student is eligible for readmission or for when readmission is sought. The petition is reviewed by a college committee and if approved, the student will be readmitted on academic probation and may register for classes. Students who enrolled in courses at another institution while serving the terms of an NDSU academic suspension must arrange for an official transcript to be sent to the Office of Registration and Records **before** readmission will be considered. Students re-entering NDSU from an academic suspension who attended courses elsewhere must earn a minimum cumulative GPA of 2.00 in those classes. NDSU reserves the right to revoke readmission if official transcripts are not received or the final cumulative GPA from a sending institution is below 2.00.

## An Academic Suspension from Another Institution

NDSU honors suspensions of other institutions. Transfer and returning students who have been suspended from another institution may not be considered for admission or readmission until one year has lapsed or the suspension has been lifted. Students who fail to report all previous college work are subject to dismissal or loss of credit or both. Courses previously completed at NDSU may only be repeated at NDSU for grade and GPA improvement on the NDSU academic record, with the exception of Tri-College courses (see Repeated Courses (p. 78) section for more details).

## Dean's List

To be eligible for inclusion on the Dean's List for any given semester, a student must have earned a minimum grade-point average of 3.50 during that term while completing at least 12 semester hours (nine semester hours during the summer) in graded coursework. Graded coursework includes the developmental course MATH 098. MATH 098 does not satisfy graduation requirements and does not calculate into the cumulative grade-point average on the academic record, but it is factored into the overall attempted credits and honor points for Dean's List consideration.

The Dean's List is only maintained for undergraduate students and professional (Pharm.D.) students. Credits taken simultaneously via transfer, accelerated graduate coursework, and collaborative or consortium registration are not included in the NDSU Dean's List calculation and do not count toward the NDSU minimum credit requirement. These courses are considered transfer credit (see transfer credit).

**Notification:** The Office of Registration and Record notifies University News of Dean's List honorees.

## Academic Forgiveness

A former NDSU student who has not completed a baccalaureate degree and has not been in attendance at NDSU for six (6) or more years\*, but who is presently enrolled at NDSU, may request to exclude from grade-point-average calculations all grades earned in selected full terms (quarters or semesters) completed at NDSU prior to the six-year interval.

The courses and grades for the terms selected will remain on the student's academic record, but credits, honor points, and grades will be excluded from grade-point average calculations. Excluded courses cannot be used to satisfy any academic requirements. A student may exercise this option only once by submitting a written request to the Office of Registration and Records (<https://www.ndsu.edu/registrar>).

A qualifying student wishing to take advantage of academic forgiveness should submit a memo to the Office of Registration and Records, 110 Ceres Hall, NDSU Dept. 2801, PO Box 6050, Fargo, ND 58108-6050 (or by fax to 701-231-8959 or email to [ndsu.registrar@ndsu.edu](mailto:ndsu.registrar@ndsu.edu)). In the memo reference 'academic forgiveness', including your full name, NDSU student ID number, and the prior full semesters you would like to be considered for forgiveness.

\* Exception: Students who qualify for the Bachelor of University Studies general studies option (p. 778) and have not attended NDSU for a minimum of 2 years are eligible to apply for forgiveness.

## Transfer and Test Credit

Transfer credit evaluations are conducted in the Office of Registration and Records (<https://www.ndsu.edu/registrar>). The evaluation process begins after a student is admitted to the university by the Office of Admission (<https://www.ndsu.edu/admission>) or has completed the reactivation process with the Office of Registration and Records if a returning NDSU student. The evaluation process takes 2-3 weeks on average.

## Administrative Policy for the Evaluation of Transfer Credit from U.S. Institutions

The Office of Registration and Records administers the NDSU policies governing the acceptance of college credit from outside institutions. These requirements apply to returning students who have attended other institutions, as well as new NDSU students. Before credits may be evaluated for specific NDSU course equivalencies or application to programs of study, transfer courses will be accepted for university credit according to the following criteria:

1. College-level coursework from regionally accredited colleges or universities (or equivalent for international institutions), including Credit By Examination (p. 103) and the Joint Services transcripts, are eligible for acceptance in transfer with receipt of official transcript or score report.
2. Course repeats
  - a. Courses repeated elsewhere prior to attending NDSU will be accepted in transfer as indicated on the transferring institution's official transcript. Transfer courses taken from multiple institutions that have the same NDSU equivalent will be considered as a repeated course, and only the most recent attempted course will be accepted for transfer.
  - b. Courses will not be accepted in transfer to replace any grades or credits earned at NDSU. If a course is completed at NDSU, and an attempt is made to repeat that course elsewhere, the course is considered duplicate and is not eligible for transfer. (See also Repeated Courses (p. 78) policy.)
3. Credit for a remedial course is not accepted for transfer if the course is remedial by definition of the transferring institution or if it is equivalent to a remedial course at NDSU. Remedial courses may, however, fulfill prerequisite requirements, if applicable.
4. Credit awarded by an institution through examination, placement or prior learning credit will not be accepted.

5. The Office of Registration and Records determines the applicability of transfer credit toward NDSU general education requirements (p. 88) according to institutional and North Dakota University System guidelines. (See also General Education Administrative Policies (p. 90).)
6. College-level credits that do not have course equivalents at NDSU will be accepted as electives and may count only toward total credits. An academic department may determine whether these electives satisfy specific curricular requirements through the course substitution process.
7. NDSU requires that a minimum of 36 credits toward a baccalaureate degree be earned at the junior or senior (300- and 400-level) level. Therefore, while a freshman- or sophomore-level (100- or 200-level) course transferred from another institution may satisfy a specific upper-level program requirement at NDSU, that course will not be counted toward the 36-credit upper-division degree requirement.
8. Transfer grades are recorded but not computed in the institutional cumulative GPA. Transfer grades are used only for purposes of admission to the University, admission to certain programs, and for some scholarships and financial aid.
9. All letter grades will be accepted by the university; however, many colleges and departments have standards to determine course applicability toward their respective degree programs.
10. The name of transfer institutions and total credits accepted by NDSU will be indicated on the official transcript. Individual transfer courses are not detailed on the official transcript but are provided in the academic requirements report (<https://www.ndsu.edu/registrar/academics/advising/advisement>) after admission to the university.
11. Transfer credits are converted to semester credits, if applicable.

## Evaluation of Transfer Credit from International Institutions

According to North Dakota University System policy (402.9) effective January 2013, international transcripts must be submitted to an approved external credential evaluation service. Obtaining an evaluation is the sole responsibility of the student. Evaluations must be submitted according to the guidelines listed below. The policies for the evaluation of transfer credit listed for Domestic/US Institutions also apply to international transfer credit. NDSU students participating in an approved study-abroad program and international students transferring from a North Dakota State University partnership institution are exempt from submitting an external credential evaluation.

- Students must submit official transcripts to an evaluation service that has been approved by the National Association of Credential Evaluation Services (NACES) (<https://www.naces.org/members>) or the Association of International Credential Evaluators (AICE) (<http://aice-eval.org/endorsed-members>).
- Official transcript(s) issued in English must be submitted to NDSU in addition to the evaluation unless the evaluation service provides certification of student documents and sends copies of transcript(s) to NDSU.
- The evaluation must contain a **course by course** evaluation.
- New international students should send evaluations directly to the Office of International student and Study Abroad Services ([https://www.ndsu.edu/admission/how\\_to\\_apply/international/transfer](https://www.ndsu.edu/admission/how_to_apply/international/transfer)).
- New domestic students or United States permanent resident students should send evaluations directly to the NDSU Office of Admission ([https://www.ndsu.edu/admission/how\\_to\\_apply/transfer/requirements](https://www.ndsu.edu/admission/how_to_apply/transfer/requirements)).
- Students must submit course descriptions or syllabi for all completed coursework directly from the international institution to the NDSU Office of Registration and Records (<https://www.ndsu.edu/registrar>).
- Effective January 2015, all international transfer English coursework listed as English as a foreign language or from non-native English speaking countries will not be accepted. English Coursework will transfer as remedial coursework and will be listed as equivalent to ENGL DEV at NDSU.

## North Dakota University System Common Course Numbers

Institutions in the North Dakota University System have established common course numbers (CCN) (<https://ndus.edu/lets-get-started/transfer-to-a-different-campus/common-course-numbering-ccn>) to facilitate transfer within the University System. Under the CCN agreement, transfer students who have successfully completed CCN courses will not be required to retake them at NDSU unless their degree program requires a higher grade. However, CCN courses will not fulfill residence requirements nor will 100- and 200-level courses fulfill the upper-division requirement for graduation.

## Evaluation of Military Credit

North Dakota State University accepts military courses recognized by the American Council on Education (ACE). Students who have completed military courses may receive transfer credit from NDSU. When evaluating military courses, the Office of Registration and Records will follow the criteria illustrated below:

1. Only Joint Services Transcripts that are sent electronically from the American Council on Education will be considered official and will be accepted.
2. Courses listed under "Military Courses" will be accepted for credit. Courses listed under "Military Occupations", "College Level Test Scores", and "Other Learning Experiences" on the Joint Services Transcript will not be accepted for credit.
3. Basic Military Training courses will transfer as an elective but will earn credit towards the General Education Category: Wellness (W).
4. Each course listed under Military Courses will be awarded the number of credits recommended by the American Council on Education.

5. Courses that do not have an NDSU equivalency will be set as electives. These courses will be evaluated per the American Council of Education's recommendations.
6. Courses that are recommended as vocational or graduate level will not be accepted for transfer.

Joint Services Transcript Order Information:

A program of study provides a summary overview of the major and a sample 4-year plan of study (or 5-year or 6-year depending on program). The plan of study is an informal curriculum offering a suggested sequence of courses by semester. Plans of study are intended to be flexible based on a number of individual student factors. A link to the official curriculum is included in each overview.

## A

\* NDSU offers combined/accelerated degree programs for highly-qualified students to earn both a bachelor's and master's degree in a cost-effective, quality, and timely manner with department approval. These disciplines are currently available as combined/accelerated programs.

## Accounting

### Department Information

- **Department Location:**  
Richard H. Barry Hall
- **Department Phone:**  
701-231-8651
- **Department Web Site:**  
[www.ndsu.edu/business/programs/undergraduate/majors/](http://www.ndsu.edu/business/programs/undergraduate/majors/)
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/accounting/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/accounting/)

Accounting is the analysis, interpretation and communication of financial information about the resources of an organization and the use of those resources. Accountants help others make business decisions and provide auditing and tax services, as well as fraud examination (forensic accounting services).

### The Program

The accounting major offered by the College of Business prepares students for entry-level positions in public accounting, corporate accounting, government accounting and forensic (fraud) accounting. The accounting curriculum includes accounting and business courses with a wide range of other courses selected to help develop well-rounded, well-educated graduates. Computer and information systems courses give students the ability to apply accounting knowledge using computers—a very important skill in today's business environment. Courses in other areas of business help students understand how their work relates to marketing, management and finance.

North Dakota law requires that persons who sit for the Certified Public Accountant (CPA) professional examination must have completed 150 semester hours of college education. Students are expected to meet this requirement through a combination of the undergraduate accounting major and the Master of Accountancy (MAcc.) degree offered at North Dakota State University.

To succeed in the accounting profession, an individual should have a solid mathematical background and be able to interpret information. Good communication skills are essential to be able to present information to others. Interpersonal skills and the ability to work with others are also important.

## Career Opportunities

An accountant could find a position in public accounting, management, private industry, governmental or other not-for-profit accounting, academia or forensic accounting. Therefore, the employment opportunities for an accountant are many and varied. In addition, some students use accounting as a pre-law program.

The most familiar professional designation in accounting is the CPA. Achieving this certification involves passing a comprehensive examination and meeting other requirements set by each state. CPAs provide auditing, tax and advisory services to businesses, other organizations and the general public.

Management accountants are employed by a single enterprise to perform services such as measuring and controlling costs or budgeting. These specialists may earn the Certified Management Accountant (CMA) certificate.

Internal auditors are concerned with determining whether the auditee is following prescribed organizational policies and procedures along with safeguarding organizational assets. The Certified Internal Auditor (CIA) is the professional designation of these accountants.

An accountant may also work in the area of governmental or not-for-profit accounting. Governmental accountants work for federal, state or local government agencies. The duties of governmental accountants include the control of tax revenues and expenditures. Not-for-profit organizations, such as charities and universities, also need the services of an accountant.

Forensic accounting is a rapidly growing area of accounting concerned with the detection, investigation and prevention of fraud and white-collar crimes. A Certified Fraud Examiner (CFE) is a specialist in the detection and/or deterrence of a wide variety of fraudulent conduct—from discovering employees or executives who misappropriate company assets to assisting investors who are defrauded in the course of commercial transactions.

Accountants also are employed in the academic sector to teach accounting courses, conduct research and write educational materials such as textbooks.

## Cooperative Education Program

Accounting majors are able to gain experience at professional level jobs through the Cooperative Education Program. Co-op experiences are most commonly taken during the final two years of the program. The experience can include employment during the summer, during the school year or both. Students' salaries vary with the career field and job complexity.

Three credits of cooperative education can be used to fulfill the practicum requirement. Three credits are typical for a semester-long, full-time work placement. Students make these credit arrangements with NDSU's Career Center.

## Selective Admission

Students who wish to study accounting at NDSU enroll as pre-accounting majors in the College of Business for the first semester of their freshman year. Pre-accounting majors are then admitted into the professional program after completing the pre-professional courses required for professional program admission (i.e., ENGL 120, COMM 110, MATH 144, ECON 201 or 202, and PSYC 111 or SOC 110) and earning a minimum 2.5 cumulative GPA. Transfer students with appropriate course work may be admitted directly into the professional program. Please see a College of Business professional advisor for more information.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

### Degree Requirements

#### Major: Accounting

Degree Type: Bachelor of Science (B.S.)

Minimum Degree Credits to Graduate: 120

## University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Accounting Requirements

Code	Title	Credits
All courses taken for the Accounting Major require a grade of C or better. The only exception is ACCT 200 Elements of Accounting I and ACCT 201 Elements of Accounting II, which require grades of 'B' or better. A minimum 2.5 cumulative GPA is required for admission to the professional program, to enroll in 300 - 400 level courses, and to graduate.		
<b>Admission to the Professional Program Requirements</b>		
COMM 110	Fundamentals of Public Speaking (May satisfy general education category C)	3
ECON 201 or ECON 202	Principles of Microeconomics (May satisfy general education category B and G) Principles of Macroeconomics	3
ENGL 120	College Composition II (May satisfy general education category C)	3
MATH 144	Mathematics for Business	4
PSYC 111 or SOC 110	Introduction to Psychology (May satisfy general education category B) Introduction to Sociology	3
<b>Accounting Major Requirements</b>		
ACCT 200	Elements of Accounting I (Requires a grade of B or better)	3
ACCT 201	Elements of Accounting II (Requires a grade of B or better)	3
PHIL 216	Business Ethics (May satisfy general education category A)	3
MIS 116	Business Use of Computers (May satisfy general education category S)	3

STAT 330	Introductory Statistics (May satisfy general education category R)	3
STAT 331	Regression Analysis	2
ECON 201	Principles of Microeconomics <sup>1</sup>	3
or ECON 202	Principles of Macroeconomics	
ENGL 320	Business and Professional Writing (May satisfy general education category C)	3
Admission to the Professional Program is required prior to taking the following courses:		
FIN 320	Principles of Finance <sup>2</sup>	3
MGMT 320	Foundations of Management <sup>2</sup>	3
MRKT 320	Foundations of Marketing <sup>2</sup>	3
BUSN 430	Legal and Social Environment of Business <sup>2</sup>	3
BUSN 489	Strategic Management (Capstone Course) <sup>2</sup>	3
MIS 320	Management Information Systems <sup>2</sup>	3
ACCT 311	Intermediate Accounting I	4
ACCT 312	Intermediate Accounting II	4
ACCT 318	Taxation in Management Decisions	3
or ACCT 418	Tax Accounting I	
ACCT 320	Cost Management Systems	3
ACCT 420	Accounting Information Systems	3
ACCT 421	Auditing I	3
<b>Accounting Elective (ACCT Prefix) 300-400 Level</b>		<b>3</b>
Select courses from current ACCT curriculum.		
<b>Accounting Elective Courses 300-400 Level</b>		<b>9</b>
Select courses from within the CoB prefixes of BUSN, FIN, MIS, MGMT, MRKT; excludes BUSN 318. Courses numbered 394/494 require departmental approval. Includes courses cross-listed with CoB courses.		
<b>Accounting Practicum</b>		<b>3</b>
Students must complete one of the following options:		
ACCT 397	Fe/Coop Ed/Internship	
ACCT 413	Accounting Internship	
AGEC 371	Export Management	
UNIV 492	Study Abroad	
Total Credits		92

<sup>1</sup> Take course not taken prior to admission to professional program.

<sup>2</sup> Denotes Common Body of Knowledge (CBK) course.

## Degree Requirements and Notes

- Students follow the published curricula for the accounting program of study from the semester/year of entrance in the College of Business to graduation provided enrollment at NDSU has not been discontinued for more than one year. Students who change their major are subject to meeting the curricular requirements in effect at the time the new major is declared.
- Business courses from programs that do not hold AACSB International accreditation cannot be used for major or minor requirements in the College of Business (CoB); such courses may be eligible for use as free electives.
- The CoB accepts a maximum of nine credits of non-NDSU 300-400 level business courses from AACSB programs with approval of the department.
- Admission to the Accounting major is required to enroll in advanced 300- 400 level CoB courses.
- A grade of 'C' or better is required in transfer courses accepted for all accounting, business administration, finance, management, management information systems, and marketing courses.
- A letter grade must be earned in any course that fulfills a major requirement (with the exception of some practicum options).
- Students must earn a 2.50 institutional GPA to graduate.
- Students must be accepted to the accounting major prior to the completion of the last 30 credits in 300 and 400 level CoB courses.
- Of the credits completed in residence at least 30 credits must be in 300-400 level CoB courses.
- A Business Administration minor is NOT offered with this major.
- For multiple majors within the CoB, at least 15 unique credits of 300-400 level CoB courses must exist between the majors.
- Prerequisite for Accounting Practicum: ACCT 311 with a grade of C or better.

## Minor: Accounting

Required Credits: 19

Code	Title	Credits
<b>Requirements</b>		
ACCT 200	Elements of Accounting I *	3
ACCT 201	Elements of Accounting II *	3
ACCT 311	Intermediate Accounting I	4
ACCT 320	Cost Management Systems	3
<b>ACCT 300-400 Level Courses</b>		<b>6</b>
Courses may be chosen from any 300-400 level accounting course with the exception of ACCT 397 and ACCT 413.		
Total Credits		19

\* Requires a grade of 'B' or better in order to enroll in 300-400 level ACCT courses.

### Minor Requirements and Notes

- To be accepted into the minor program, students must have a 2.50 institutional cumulative GPA.
- To complete a minor, students must earn at least a 2.50 GPA that is based on the courses used to satisfy the minor requirements. Courses may not be taken pass/fail. Students must also earn a grade of 'C' or better in all courses required for the minor; the only exception is ACCT 200 and ACCT 201, which require grades of 'B' or better.
- If the cumulative GPA falls below the 2.50 after acceptance into the program, the student will not be allowed to register for the College of Business courses until the cumulative GPA returns to 2.50 or above.
- Students are subject to the minor requirements in effect during the year in which the minor was approved.
- Minors must satisfy all course prerequisites.
- Approval for a minor does not guarantee enrollment in specific courses.

# Advertising and Design Certificate

---

## Department Information

- **Department Location:**  
Minard 338
- **Department Phone:**  
701-231-7705
- **Department Web Site:**

## Program Notes:

- Students are required to take at least 6 credits outside of their major if their major is represented in the course offerings; at this time communication students are the only students affected by this requirement.

- The target market majors for this certificate are in Communication, Visual Art/Design, Business, English and Apparel Retail Merchandising and Design.

## Aerospace Studies

### Department Information

- **Department Location:**  
Bentson/Bunker Field House
- **Department Phone:**  
701-231-8186
- **Department Web Site:**  
[www.ndsu.edu/afrotc/](http://www.ndsu.edu/afrotc/)
- **Credential Offered:**  
Minor
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/aerospace-studies/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/aerospace-studies/)

Air Force Reserve Officer Training Corps (AFROTC) is a program that prepares you to become an Air Force Officer. It's a challenge. It's an opportunity. It's a head start on a lifetime of success within the Air Force and everything you choose to do. AFROTC provides you with a challenging program to hone your time management, physical fitness and analytical skills - and helps you push yourself to achieve your goals.

### What is the Purpose of Air Force ROTC?

The AFROTC mission is to commission second lieutenants through the campus program offered at NDSU. Additionally, NDSU's Department of Aerospace Studies offers this program for students at Concordia College, Mayville State University, Minnesota State University Moorhead, University of Minnesota Crookston, University of North Dakota, Park University and students at the Grand Forks Air Force Base. Students enrolled in AFROTC earn college credits that can be used to fulfill elective requirements or to obtain a minor in aerospace studies. All full-time students (including graduate students) can pursue an Air Force commission.

### What is an Air Force Commission?

An Air Force commission is your ticket to work in top professional and management jobs in the United States Air Force. Only college graduates can obtain an Air Force commission, which is granted by the President of the United States.

### Are You Interested in Flying?

The Air Force owns the most modern aircraft in the world. Those who meet the demanding physical, medical and academic qualifications and are selected as pilot candidates will attend Air Force pilot training as their first active duty assignment.

### Does a Technical or Management Career Interest You?

AFROTC graduates have opportunities in more than 250 specialized fields in which their education and training can be utilized. These specialties include physicists, space scientists, journalists, doctors, dentists, meteorologists, engineers, security and intelligence specialists, nurses and many others.

### The General Military Course

The first two years of this four-year program begins with the General Military Course (GMC). It takes a time commitment of about five to six hours a week. Here, you'll learn the mission and structure of the Air Force and take a look at what military life is like. You will study the strategies, doctrine and missions of aerospace power from early ballooning to today's use of space vehicles. You will learn about Air Force career opportunities, educational benefits and the life and work of an Air Force officer.

### The Professional Officer Course

The Professional Officer Course (POC) is the second half of our four-year program and is taken during your junior and senior years. You will begin this course with an in-depth look at leadership styles and their applications. You will examine a broad range of American domestic and international military relationships and the environmental context in which American national security policy is developed and carried out. This class, combined with Leadership Laboratory, is where your leadership and management theories are applied. This is a competitive course and not all cadet who apply get in. Your performance during the GMC program is the driving factor of your selection into the POC program.

## Scholarship Money?

AFROTC college scholarships are awarded to the best-qualified students and range in length from one to five years. These grants cover the cadet's tuition, incidental lab fees and up to \$900 a year for textbooks. In addition, cadets receive a tiered monthly allowance. For example, cadets enrolled in the Professional Officer Corps (POC) receive \$450 per month during their junior academic year and \$500 per month during their senior academic year.

## Obligation?

If you are not on an AFROTC scholarship, you incur *no obligation* to the Air Force during your freshman and sophomore years of school. You are able to keep all your options open while you take an in-depth look at the Air Force and the opportunities it has to offer. The length of your commitment upon graduation is dependent on the career you pick when entering active duty. Those service obligations are typically 4 years for non-flying officers and longer for those who chose to serve in an aircrew career field.

## Guaranteed Job/Salary/Benefits

Students who successfully commission into the Air Force can expect the following as soon as they enter the Active Duty work force:

- Highly competitive salary, starting at \$55,000/year with guaranteed raises every two years
- Tax-free housing and food allowance
- 30 days of paid vacation a year
- unlimited, full pay sick leave
- full medical, dental and vision coverage at no cost

For more information on Air Force ROTC admission requirements and career opportunities, please contact the Unit Admissions Officer at 701-231-8186.

## Agribusiness

### Department Information

- **Department Location:**  
Richard H. Barry Hall Room 500
- **Department Phone:**  
701-231-7441
- **Department Email:**  
ndsu.agribusiness@ndsu.edu
- **Department Web Site:**  
www.ag.ndsu.edu/agecon
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/agribusiness/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/agribusiness/)

The agribusiness industry accounts for nearly one-fifth of the U.S. gross national product and employs close to one-fourth of the U.S. labor force. There is a continuing strong demand by agribusiness firms, ranging from large multinational corporations to emerging food manufacturing and input supply firms, for highly qualified and better trained employees in both management and the agricultural sciences. Students who have mastered economic and business concepts along with agricultural sciences do extremely well in finding rewarding careers following graduation.

## The Program

The agribusiness program at North Dakota State University recognizes the importance of agribusiness to the nation's economy and the long tradition of the department in training the industry's leaders. The agribusiness major has several main components.

Students are exposed to a range of concepts and methods useful in agribusiness decision-making in each of three areas of specialization: finance, management and marketing. Equally important, agribusiness graduates will master problem solving and effective communication skills to face challenges encountered in their professional careers.

Agribusiness students are required to participate in an internship during their studies. Employers continue to place high importance on work-related experience when they evaluate potential employees. Employers know that all NDSU agribusiness graduates have gained valuable work experience through the required internship.

Collaboration with the College of Business leads to concurrent satisfaction of a minor in one of the business fields. Minors in either accounting or business administration are encouraged.

The Department of Agribusiness and Applied Economics also offers an agricultural economics major. Students should refer to the Agricultural Economics fact sheet. Students in other majors may earn a minor in agribusiness.

## Career Opportunities

Agribusiness graduates find career openings in many areas of specialization, including positions as international and domestic grain traders; elevator managers; sales representatives with chemical, seed, feed and fertilizer companies; analysts for railroads, transport and renewable energy companies; logistics managers; finance and credit officers; food company managers; experts with the foreign agriculture service; and analyst positions in market development organizations. In addition to a rewarding set of career opportunities following graduation, many students choose to continue with graduate studies to further develop their analytical and management skills. Although many graduates find successful careers in North Dakota and Minnesota, others pursue careers throughout the nation and the world.

## The Faculty

The department enjoys a growing international reputation for its excellent staff in agribusiness research and teaching. Faculty specialties include sales, finance, food marketing, food safety, industrial strategy, and commodity trading.

Agribusiness faculty expertise is complemented by other departmental faculty specializing in farm management, natural resource and environmental economics, and economic development. The quality of the faculty has been recognized by numerous awards for teaching and research excellence at both the state and national levels.

## Financial Aid and Scholarships

Several \$500 scholarships are available to outstanding freshmen entering the program each fall semester. Scholarships also are available to transfer students and students already in the agribusiness program at NDSU.

The department annually awards over \$100,000 in scholarships (ranging from \$500 to \$10,000) to agribusiness and agricultural economics majors.

The College of Agriculture, Food Systems, and Natural Resources awards scholarships each year. For more information on scholarships, go to: <https://www.ndsu.edu/admission/scholarships/>.

Student loan, grant and work-study information is available from the Office of Financial Aid and Scholarships or One Stop.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>Freshman</b>

BUSN or ACCT electives for Minor	3	
	14	12

Total Credits: 120

\* Area of specialization requires one core course plus one other course from the specialization.

<sup>1</sup> ECON 189 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take ECON 189

## Agribusiness

### Department Information

- **Department Location:**  
Richard H. Barry Hall
- **Department Phone:**  
701-231-7441
- **Department Web Site:**  
[www.ag.ndsu.edu/agecon](http://www.ag.ndsu.edu/agecon)
- **Credential Offered:**  
B.S.
- **Plan Of Study Sample:**  
[bulletin.ndsu.edu/programs-study/undergraduate/agribusiness/#planofstudytext](http://bulletin.ndsu.edu/programs-study/undergraduate/agribusiness/#planofstudytext)

## Degree Requirements

### Major: Agribusiness

**Degree Type:** Bachelor of Science (B.S.)

**Minimum Degree Credits to Graduate:** 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II

<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		6
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		6
<b>Wellness (W) <sup>†</sup></b>		2
<b>Cultural Diversity (D) <sup>*†</sup></b>		

**Global Perspectives (G) <sup>\*\*†</sup>**

Total Credits	39
---------------	----

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

**Major Requirements**

Code	Title	Credits
<b>Core Courses for Agribusiness:</b>		
AGEC 242	Introduction to Agricultural Management	3
AGEC 244	Agricultural Marketing	3
AGEC 246	Introduction to Agricultural Finance	3
AGEC 339	Quantitative Methods & Decision Making	3
AGEC 344	Agricultural Price Analysis	3
AGEC 346	Applied Risk Analysis	3
AGEC 397	Fe/Coop Ed/Internship	1-3
AGEC 445	Agribusiness Industrial Strategy (capstone)	3
ECON 201	Principles of Microeconomics (May satisfy general education category B)	3
ECON 202	Principles of Macroeconomics (May satisfy general education category B)	3
ECON 341	Intermediate Microeconomics	3
ECON 343	Intermediate Macroeconomics	3
<b>Accounting:</b>		
ACCT 200	Elements of Accounting I	3
ACCT 201	Elements of Accounting II	3
<b>Agriculture Science &amp; Technology:</b>		
Complete nine (9) credits from two (2) areas in the College of AFSNR other than Agribusiness & Applied Economics. (Includes: ASM, ANSC, ABEN, CFS, ENT, MICR, NRM, PPTH, PLSC, RNG, SOIL & VETS.) EXCEPTION - All 9 credits may be in the same area if a student completes a minor from within the College of AFSNR.		
<b>Areas of Specialization: Select one of the Areas of Specialization listed below.</b>		
		6
<b>Additional Requirements for Agribusiness</b>		
AGRI 150	Agriculture Orientation	1
ECON 189	Skills for Academic Success	1
MIS 116	Business Use of Computers (May satisfy general education category S)	3
<b>Communication Requirement: Select one of the following:</b>		
COMM 212	Interpersonal Communication	
COMM 216	Intercultural Communication (Gen Ed B/D)	
COMM 308	Business and Professional Speaking	
COMM 315	Small Group Communication	
COMM 383	Organizational Communication I	
<b>Math Requirement:</b>		
MATH 144	Mathematics for Business (or any higher math)	4
STAT 330	Introductory Statistics (May satisfy general education category R)	3
STAT 331	Regression Analysis	2 or 3
or ECON 410	Econometrics	
<b>Minor Requirement</b>		19-24
In addition to the requirements for the major in Agribusiness, students must complete a minor in Accounting (19 cr), Business Administration (24 cr), Entrepreneurship (16 cr), or Logistics Management (19 cr).		
Total Credits		91-99

**Areas of Specialization: Select one**

Code	Title	Credits
<b>Finance - 6 Credits</b>		
AGEC 446	Agribusiness Finance	3
Select one of the following:		3
AGEC 347	Principles of Real Estate	
AGEC 356	Advanced Agricultural Lending	
AGEC 474	Cooperatives	
ECON 324	Money and Banking	
ECON 402	Economics of Entrepreneurship	
ECON 470	Public Economics	
Total Credits		6

Code	Title	Credits
<b>Management - 6 Credits</b>		
MGMT 320	Foundations of Management	3
Select one of the following:		3
AGEC 474	Cooperatives	
AGEC 375	Applied Agricultural Law	
AGEC 378	Introduction to Transportation & Logistics	
AGEC 472	Advanced Logistical Analysis	
ECON 402	Economics of Entrepreneurship	
ECON 472	International Trade	
Total Credits		6

Code	Title	Credits
<b>Marketing - 6 Credits</b>		
AGEC 444	Advanced Commodity Trading	3
Select one of the following:		3
AGEC 343	Introduction to Commodity Trading	
AGEC 350	Agrisales	
AGEC 474	Cooperatives	
AGEC 450 & AGECE 451	National AgriMarketing Association (NAMA) I and National AgriMarketing Association (NAMA) II	
ECON 402	Economics of Entrepreneurship	
ECON 472	International Trade	
Total Credits		6

<sup>1</sup> AGRI189 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take AGRI 189.

**Degree Requirements and Notes**

- Students must earn, at least, a 2.00 cumulative GPA that is based on the courses that satisfy major requirements.

**Minor Requirements****Agribusiness Minor****Minor Requirements**

Required Credits: 18

Code	Title	Credits
<b>Required Courses</b>		
ECON 201	Principles of Microeconomics	3

Select two of the following:	6
AGEC 242	Introduction to Agricultural Management
AGEC 244	Agricultural Marketing
AGEC 246	Introduction to Agricultural Finance
<b>Elective Courses: A minimum of 9 credits from the following:</b>	9
ECON 341	Intermediate Microeconomics
AGEC	Any AGECE prefix courses numbered 242 or higher (excluding AGECE 397 and AGECE 496)
<b>Total Credits</b>	<b>18</b>

- A minimum of 8 credits must be taken at NDSU.
- Students must earn a minimum 2.00 GPA for the minor requirements.
- Minor requirements are to be met with didactic courses only.
- This minor is not available to Agricultural Economics majors.

## Agricultural and Biosystems Engineering

### Department Information

- **Department Location:**  
Agricultural and Biosystems Engineering
- **Department Phone:**  
701-231-7261
- **Department Email:**  
ndsu.aben@ndsu.edu
- **Department Web Site:**  
www.ndsu.edu/aben/
- **Credential Offered:**  
B.S.A.B.En.
- **Official Program Curriculum:**  
bulletin.ndsu.edu/undergraduate/program-curriculum/agricultural-biosystems-engineering/

The agricultural and biosystems engineering (ABEN) program prepares students for careers in:

- Machine Systems
- Processing Systems for food, biofuels, and other biproducts
- Natural Resources and Environmental Systems

Graduates design systems and solve problems requiring mathematics and the application of physical, biological, and engineering sciences involving biological systems. Agricultural and biosystems engineers address society's grand challenges in food, energy, and water.

### The Program

Agricultural and biosystems engineers are uniquely qualified to use their knowledge of mathematics, biological and physical sciences, and engineering principles to solve problems relating to the production, handling and processing of biological materials for food, feed, fiber and fuel; the preservation of natural resources and environment quality; and the design and production of machine systems. A major in agricultural and biosystems engineering can serve a broad range of career interests and can provide excellent career opportunities for men and women from diverse backgrounds.

The Bachelor of Science degree in Agricultural and Biosystems Engineering is accredited by the Engineering Accreditation Commission of ABET, [www.abet.org](http://www.abet.org). Agricultural and biosystems engineering students are well qualified for and encouraged to take the national Fundamentals of Engineering examination. This is the first step in the process of registration as a professional engineer.

Agricultural and biosystems engineering integrates engineering topics, engineering design, and biological sciences in a single program with two concentrations: agricultural engineering and biosystems engineering.

### Internships

Although not required by the curriculum, students are strongly encouraged to take advantage of co-operative education experiences (paid internships). These experiences allow students to spend a summer or, more typically, a summer and a semester doing engineering work for an employer of program graduates. Students gain hands-on experience in engineering for the first time. This experience allows students to make an informed decision on their major, to make better selections of elective courses, and to open doors for employment upon graduation.

## Career Opportunities

Position titles of graduates for both concentrations may include design engineer, test engineer, project engineer, plant engineer, quality control engineer, process engineer, energy adviser, consulting engineer and environmental engineer. Starting salaries are among the highest paid for college graduates and are comparable to those in other fields of engineering. Recent starting salaries range from \$55,000 to \$75,000 per year with an average of \$60,000 per year. Placement of graduates has been at or near 100 percent for many years.

## Biosystems Engineering Concentration

Graduates in biosystems engineering integrate engineering, biology and chemistry in a variety of applications. Graduates may work in careers with the following goals: develop innovative green products and industries; convert bio-based resources to food, fuel and other renewable products; design new generations of devices or systems for biological systems; and control biological systems for natural resource protection, waste remediation and ecosystem restoration. Graduates may work with industries to create new and improved processes through the innovative use of microorganisms, plant and animal cells and enzymes, or they may develop sensors, control systems and computer models to monitor and control biological processes occurring in industry or the environment. Graduates with a biosystems engineering concentration may also pursue a professional or graduate degree in a number of fields including engineering, medicine, veterinary medicine, management or law.

## Agricultural Engineering Concentration

Career opportunities for graduates in agricultural engineering are many and diverse. Graduates may work for companies and agencies that design, develop, test and manufacture agricultural power and machine systems; handle, store, process and enhance or protect the quality of agricultural commodities and processed products; design environment control and housing systems for plant and animal production; design equipment and systems for processing, manufacturing, distribution and quality protection of food products; manage air, land and water resources; design and manage crop irrigation systems; and develop electrical and electronic applications for agricultural problems. Graduates with an agricultural engineering concentration may also pursue graduate degrees in areas such as engineering, business or law.

## Scholarships

A number of departmental and College of Engineering scholarships are competitively awarded to students in the ABEN program each spring. These scholarships range in value from about \$500 to \$4,000. Scholastic achievement, financial need and extracurricular activities are considered. Scholarships are provided by industry, faculty and alumni. The department provides an opportunity to apply for these scholarships early in spring semester.

## Extra-Curricular Activities

Varied extra-curricular programs are available to students majoring in agricultural and biosystems engineering. One professional student organization is the North Dakota Student Engineering Branch of the American Society of Agricultural and Biological Engineers (ASABE), the society for engineering in agricultural, food and biological systems. The honorary societies are Alpha Epsilon (agricultural and biosystems engineering), Tau Beta Pi (engineering) and Phi Kappa Phi (general university). Members of the Student Engineering Branch of ASABE take an active part in the annual Agricultural Technology Exposition, interact with speakers, go on field trips, participate in departmental picnics, compete in the annual AEM Report national competition, compete in the international quarter-scale tractor pull and design competition, and are involved in public service and social activities.

## A Well-Equipped Teaching Facility

The agricultural and biosystems engineering department is housed in its own building. Laboratories are furnished with equipment typically used in industry and research, such as personal computers that are networked to the University's computing facilities and to the Internet, ANSYS, Pro-E and AutoCAD software, data acquisition systems, biomaterials handling and processing equipment, environmental measurement equipment, controllers, and analog and digital test equipment. The ABEN building is also home to the Bio-Imaging and Sensing Center. This is a state-of-the-art lab with imaging and sensing equipment to solve multidisciplinary problems associated with biological systems. The department also occupies the North Dakota State University Pilot Plant with facilities and equipment for producing and analyzing biofuels, food products and other renewable products. ABEN class size is usually fewer than 25 students, which allows for close faculty-student interaction.

## Plans of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

Freshman

## Major Requirements

### Major: Agricultural & Biosystems Engineering Option: Agricultural

Degree Type: B.S.A.B.En

Minimum Degree Credits to Graduate: 133

#### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

#### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		<b>12</b>
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		<b>3</b>
<b>Science and Technology (S) <sup>†</sup></b>		<b>10</b>

<b>Wellness (W) <sup>†</sup></b>		<b>2</b>
<b>Cultural Diversity (D) <sup>*†</sup></b>		
<b>Global Perspectives (G) <sup>*†</sup></b>		
Total Credits		<b>39</b>

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

#### Major Requirements - Agricultural Option

Code	Title	Credits
<b>ABEN Core Courses:</b>		
ABEN 110	Introduction to Agricultural and Biosystems Engineering	3
ABEN 255	Computer Aided Analysis & Design	3
ABEN 263	Biological Materials Processing	3
ABEN 377	Numerical Modeling in Agricultural and Biosystems Engineering	3
ABEN 391	Seminar	1
ABEN 482	Instrumentation & Measurements	3
ABEN 486	Design Project I	2
ABEN 487	Design Project II	2
ABEN 496	Field Experience	1

ABEN 300-400 Electives: Select 9 credits from the following:		9
ABEN 358	Electric Energy Application in Agriculture	
ABEN 383	Structural Design for Biosystems	
ABEN 444	Transport Processes	
ABEN 450	Bioprocess Engineering	
ABEN 452	Bioenvironmental Systems Design	
ABEN 456	Biobased Energy	
ABEN 458	Process Engineering for Food, Biofuels and Bioproducts	
ABEN 464	Resource Conservation and Irrigation Engineering	
ABEN 473	Agricultural Power	
ABEN 478	Machinery Analysis & Design	
ABEN 479	Fluid Power Systems Design	
ABEN 484	Drainage and Wetland Engineering	
MATH 128	Introduction to Linear Algebra	1
MATH 165	Calculus I (May satisfy general education category R)	4
MATH 166	Calculus II	4
MATH 259	Multivariate Calculus	3
MATH 266	Introduction to Differential Equations	3
ME 212	Fundamentals of Visual Communication for Engineers	3
ME 221	Engineering Mechanics I	3
ME 222	Engineering Mechanics II	3
ME 223	Mechanics of Materials	3
ME 350	Thermodynamics and Heat Transfer	3
CE 309	Fluid Mechanics	3
or ME 352	Fluid Dynamics	
CHEM 121	General Chemistry I (May satisfy general education category S)	3
CHEM 122	General Chemistry II (May satisfy general education category S)	3
ECE 301	Electrical Engineering I	3
Select one from the following:		3
ENGL 321	Writing in the Technical Professions	
ENGL 324	Writing in the Sciences	
ENGL 459	Researching and Writing Grants and Proposal	
ENGR 402	Engineering Ethics and Social Responsibility	1
IME 440	Engineering Economy	2
IME 460	Evaluation of Engineering Data	3
or STAT 330	Introductory Statistics	
PHYS 252 & 252L	University Physics II and University Physics II Laboratory (May satisfy general education category S)	5
<b>Program Electives:</b>		<b>23</b>
Select the following program electives in each category from courses listed in the corresponding Program Electives Tab. Minimum credit in each category below will apply. A minimum of 9 Adv. Bioscience credits (at least 3 credits non-ABEN) are required as part of these 23 program electives.		
Computer Electives	Select a minimum of 3 credits from the Program Electives Tab.	
Business or Communication Elective	Select a minimum of 3 credits from the following prefix options: BUSN, COMM, ACCT, AGECE, ECON, MGT, MIS, MRKT <sup>2</sup>	
Chemistry/Biological Science Electives	Select a minimum of 9 credits from the Program Electives Tab.	
Technical Electives	Select a minimum of 8 credits from the Program Electives Tab.	
<b>Total Credits</b>		<b>109</b>

<sup>2</sup> The course used for this business or communication elective cannot double-count as General Education.

**SUGGESTED EMPHASIS AREA for the Agricultural Engineering Option:** Consult with adviser when making selections.

- **Agricultural Systems** - Select electives with emphasis on machine, power, structural, and electrical/electronic systems to solve problems involving engineering aspects of food, feed, and fiber production.
- **Environmental Systems** - Select electives with emphasis on areas that contribute to solving problems in environmental engineering, natural resources management, hydrology, irrigation, watershed management, and waste management.
- **Biomaterial Systems** - Select electives with emphasis on combining engineering, biological, and physical sciences in the application of engineering principles to handling and processing of biomaterials for food and non-food products.

## Degree Requirements and Notes

A student must complete at least 60 semester credits of professional level course work in his/her program while in residence and enrolled in the college. Students transferring into the college from programs with professional accreditation are exempt from this residency requirement but are subject to the residency requirement of NDSU.

## Major Requirements

### Major: Agricultural & Biosystems Engineering Option: Biosystems

Degree Type: B.S.A.B.En

Minimum Degree Credits to Graduate: 133

## University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Major Requirements - Biosystems Option

Code	Title	Credits
<b>ABEN Core Requirements:</b>		
ABEN 110	Introduction to Agricultural and Biosystems Engineering	3
ABEN 255	Computer Aided Analysis & Design	3
ABEN 263	Biological Materials Processing	3
ABEN 391	Seminar	1
ABEN 444	Transport Processes	3
ABEN 482	Instrumentation & Measurements	3
ABEN 486	Design Project I	2
ABEN 487	Design Project II	2
ABEN 496	Field Experience	1
ABEN 300-400 Electives: Select 9 credits from the following:		9
ABEN 358	Electric Energy Application in Agriculture	
ABEN 377	Numerical Modeling in Agricultural and Biosystems Engineering	
ABEN 450	Bioprocess Engineering	
ABEN 452	Bioenvironmental Systems Design	
ABEN 456	Biobased Energy	
ABEN 458	Process Engineering for Food, Biofuels and Bioproducts	
ABEN 464	Resource Conservation and Irrigation Engineering	
ABEN 473	Agricultural Power	
ABEN 478	Machinery Analysis & Design	
ABEN/ME 479	Fluid Power Systems Design	
ABEN 484	Drainage and Wetland Engineering	
MATH 128	Introduction to Linear Algebra	1
MATH 165	Calculus I (May satisfy general education category R)	4
MATH 166	Calculus II	4
MATH 259	Multivariate Calculus	3
MATH 266	Introduction to Differential Equations	3
ME 221	Engineering Mechanics I	3
ME 222	Engineering Mechanics II	3
ME 350	Thermodynamics and Heat Transfer	3
BIOL 150	General Biology I	3
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory (May satisfy general education category S)	4
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory (May satisfy general education category S)	4
CHEM 240	Survey of Organic Chemistry	3
CE 309	Fluid Mechanics	3
Select one from the following:		3
ENGL 321	Writing in the Technical Professions	
ENGL 324	Writing in the Sciences	
ENGL 459	Researching and Writing Grants and Proposal	
ENGR 402	Engineering Ethics and Social Responsibility	1
IME 440	Engineering Economy	2
IME 460 or STAT 330	Evaluation of Engineering Data Introductory Statistics	3
PHYS 252 & 252L	University Physics II and University Physics II Laboratory (May satisfy general education category S)	5
<b>Program Electives:</b>		<b>24</b>

Select the following program electives in each category from courses listed in the corresponding Program Electives Tab. Minimum credit in each category below will apply. A minimum of 9 Adv. Bioscience credits (at least 3 credits non-ABEN) are required as part of these 24 program electives.

Engineering Electives	Select a minimum of 9 credits from the Program Electives Tab.	
Chemistry/Biological Science Electives	Select a minimum of 6 credits from the Program Electives Tab.	
Technical Electives	Select a minimum of 6 elective courses from the Program Electives Tab.	
Computer Elective	Select a minimum of 3 credits from the Program Electives Tab.	
Total Credits		109

## Degree Requirements and Notes

A student must complete at least 60 semester credits of professional level course work in his/her program while in residence and enrolled in the college. Students transferring into the college from programs with professional accreditation are exempt from this residency requirement but are subject to the residency requirement of NDSU.

## Program Electives for the Agricultural and Biosystems Engineering - Agricultural Option

Code	Title	Credits
<b>Computer Electives: Select one course from the following:</b>		
		3
CE 212	Civil Engineering Graphic Communications	
CSCI 122	Visual BASIC	
CSCI 160	Computer Science I	
ECE 173	Introduction to Computing	
GEOG 105	Fundamentals of Geographic Information Systems	
GEOG 455	Introduction to Geographic Information Systems	
IME 380	CAD/CAM for Manufacturing	
ME 213	Modeling of Engineering Systems	

Code	Title	Credits
<b>Business or Communication Electives: Choose one of the following courses or a course from the following prefix options:</b>		
		3
BUSN, COMM, ACCT, AGECE, ECON, MGT, MIS, MRKT (The course used for this elective cannot double-count as General Education)		
ACCT 102	Fundamentals of Accounting	
ACCT 200	Elements of Accounting I	
AGECE 242	Introduction to Agricultural Management	
AGECE 244	Agricultural Marketing	
AGECE 246	Introduction to Agricultural Finance	
COMM 212	Interpersonal Communication	
COMM 216	Intercultural Communication	
COMM 260	Introduction to Web Design	
ECON 201	Principles of Microeconomics	
ECON 202	Principles of Macroeconomics	

Code	Title	Credits
<b>Chemistry/Biological/Environmental Science Electives: Select 9 credits from the following:</b>		
		9
ASM 264	Natural Resource Management Systems	
ANSC 220	Livestock Production	
BIOL 100L	Non-Majors Biology Lab	
BIOL 111	Concepts of Biology	
BIOL 124	Environmental Science	
BIOL 150	General Biology I	
BIOL 150L	General Biology I Laboratory	
BIOL 151	General Biology II	
BIOL 151L	General Biology II Laboratory	
CFS 210	Introduction to Food Science and Technology	
CFS 370	Food Processing I	
CFS 450	Cereal Technology	
CHEM 121L	General Chemistry I Laboratory	
CHEM 122L	General Chemistry II Laboratory	

CHEM 240	Survey of Organic Chemistry
ENT 210	Insects, Humans and the Environment
MICR 202	Introductory Microbiology
MICR 202L	Introductory Microbiology Lab
MICR 350	General Microbiology
MICR 350L	General Microbiology Lab
NRM 322	Environmental Law and Policy
PLSC 110	World Food Crops
PLSC 215	Weed Identification
PLSC 225	Principles of Crop Production
PLSC 315	Genetics
PLSC 320	Principles of Forage Production
PLSC 323	Principles of Weed Science
PLSC 335	Seed Technology & Production
RNG 225	Natural Resource & Agro-Ecosystems
SOIL 210	Introduction to Soil Science
SOIL 217	Introduction to Meteorology & Climatology
SOIL 410	Soils and Land Use

Code	Title	Credits
<b>Technical Electives: May choose from the ABEN section, Chemistry/Biological Science electives, Computer electives, or the Engineering electives listed below:</b>		<b>8</b>

ABEN 496 - Ag Tech Expo (1 add'l cr.) may be used as a Technical Elective. ABEN 496 - Field Exp./Internship, 1 cr., may be used as an ABEN Elective or as a Technical Elective. A maximum of two credits of ABEN 496 FE/Internship may be counted towards degree requirements.

ASM 323	Post-Harvest Technology
ASM 373	Tractors & Power Units
ASM 374	Power Units Laboratory
ASM 378	Machinery Principles and Management
ASM 429	Hydraulic Power Principles and Applications
ASM 454	Principles and Application of Precision Agriculture
CE 204	Surveying
CE 310	Fluid Mechanics Laboratory
CE 343	Structural Engineering and Analysis
CE 370	Introduction to Environmental Engineering
CE 371	Environmental Engineering Laboratory
CE 404	Reinforced Concrete
CE 408	Water Resources and Supply
CE 410	Water and Wastewater Engineering
CE 421	Open Channel Flow
CE 473	Air Pollution
CE 477	Applied Hydrology
CE 478	Water Quality Management
CE 479	Advanced Water and Wastewater Treatment
CE 483	Contracts and Specifications
ECE 275	Digital Design
ECE 303	Electrical Engineering II
ECE 376	Embedded Systems
GEOG 455	Introduction to Geographic Information Systems
GEOG 456	Advanced Geographic Information Systems
IME 330	Manufacturing Processes
IME 335	Welding Technology
IME 380	CAD/CAM for Manufacturing
IME 430	Process Engineering

IME 431	Production Engineering
IME 450	Systems Engineering and Management
IME 456	Program and Project Management
IME 461	Quality Assurance and Control
ME 331	Materials Science and Engineering
ME 353	Thermodynamics II
ME 421	Theory of Vibrations
ME 442	Machine Design I
ME 454	Heat and Mass Transfer
ME 471	Experimental Stress Analysis
ME 473	Engineering with Polymeric Materials
ME 474	Mechanics of Composite Materials
ME 475	Automatic Controls
ME 487	Internal Combustion Engines
STAT 461	Applied Regression Models
STAT 462	Introduction to Experimental Design

Total Credits

8

**SUGGESTED EMPHASIS AREA for the Agricultural & Biosystems Engineering Option: Consult with adviser when making selections.**

- Agricultural Systems - Select electives with emphasis on machine, power, structural and electrical/electronic systems to solve problems involving engineering aspects of food, feed, and fiber production.
- Environmental Systems - Select electives with emphasis on areas that contribute to solving problems in environmental engineering, natural resources management, hydrology, irrigation, watershed management, and waste management.
- Biomaterial Systems - Select electives with emphasis on combining engineering, biological, and physical sciences in the application of engineering principles to handling and processing of biomaterials for food and non-food products.
- Advance Biosciences Electives - 9 credits required. Double Count with electives above. A minimum of 3 credits must be from non-ABEN prefix courses in the Advanced Biosciences tab.

## Agricultural Communication

### Department Information

- **Department Location:**  
Minard Hall 338
- **Department Phone:**  
701-231-7705
- **Department Web Site:**  
[www.ndsu.edu/communication/](http://www.ndsu.edu/communication/)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/agricultural-communication/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/agricultural-communication/)

Agricultural Communication is one of four programs in the Department of Communication. This course of study is for students who have strong interest in both agriculture and communication. Our graduates work as communication specialists for a variety of agribusinesses. Students might work for a livestock or grain association, as an editor of a specialized publication, or as the advocate for a farming or ranching organization.

### Why Choose a Major in the Department of Communication?

Our programs are designed to meet the needs and interests of today's students. We provide:

- **More time to explore your interests.** The introductory courses are the same for all four of our majors, making it possible to switch between our programs without extending your graduation timeline.
- **Personalized guidance on choosing a career.** Our Majors and Careers in Communication course helps you meet others in your major, learn more about possible careers, and navigate the program with your professional goals in mind.
- **Hands-on learning.** You'll have multiple ways to apply what you are learning through course projects, consulting for local organizations, and participating in national competitions.
- **Built-in communities.** You can connect with other students by joining any of the eight student organizations affiliated with our majors.
- **Field experience.** Our internship coordinator helps you acquire professional experience and a stronger sense of your future career.

## Agricultural Communication Major

The agricultural communication major combines the resources and expertise of two units, communication and agriculture, to produce trained communicators who can explain science, technologies, and complex agricultural issues to diverse audiences. Students will complete an applied capstone course in their final semester. Students majoring in agricultural communication may earn a Bachelor of Science degree (includes an approved minor in an agriculture program) or a Bachelor of Arts degree (includes a modern language proficiency).

### Admission to the Major

Students complete 18 credits of Pre-Communication courses with a minimum 3.00 GPA to be admitted to the professional program in agricultural communication. These courses include COMM 110, COMM 112, COMM 114, COMM 212, COMM 220, and ENGL 120.

### Internship Requirement

Internships offer practical experience for agricultural communication students. Three credits (120 hours) of field experience are required for the major, and many students complete more than one internship. Students have interned with agricultural administrators, private agencies and firms, and governmental officials, among others. Internships often lead to jobs.

### Career Opportunities

Coursework in the agricultural communication major prepares students for careers in agricultural and scientific industries, agencies and operations that include scientific writing, agricultural promotion and consulting, and agricultural planning and assessment. The coursework emphasizes written and oral communication skills and prepares students to communicate in meaningful and effective ways to a variety of audiences.

### Extra-Curricular Activities

Students majoring in agricultural communication are encouraged to be active members of Agricultural Communicators of Tomorrow and/or the Saddle and Sirloin Club. They may also be interested in joining Advertising Club or the department's chapter of the Public Relations Student Society of America (PRSSA). NDSU has two honoraries for top students majoring in a degree program offered by the Department of Communication. Pi Kappa Delta is a national honor fraternity for students involved in human communication activities. Lambda Pi Eta is a national honorary for communication majors with high academic achievement.

### High School Preparation

A well-rounded high school education with experiences in high school music, forensics, theatre, journalism, FFA, or scouting serves as good preparation for the major in agricultural communication. Students with interests in science and art, business and service, and publicity and promotion will find a major in this department to be a good fit.

### Scholarships

The Department of Communication awards a number of scholarships to students who excel in academics and who have demonstrated career potential. Applications are due by March 1. Visit the department website (<https://www.ndsu.edu/communication/scholarships>) for details.

### The Faculty

Faculty members in the Department of Communication are dedicated teachers, scholars, and practitioners who are committed to providing high-quality courses, hands-on learning experiences, and opportunities for undergraduate research. We encourage students who want to learn more about Agricultural Communication to reach out via email or schedule an appointment via Navigate (<https://www.ndsu.edu/enrollmentmanagement/navigate/login>).

### Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

First Year

## Major Requirements

### Major: Agricultural Communication

**Degree Type:** B.A. or B.S.

**Minimum Degree Credits to Graduate:** 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.

3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3

<b>Wellness (W) <sup>†</sup></b>		2
<b>Cultural Diversity (D) <sup>**†</sup></b>		
<b>Global Perspectives (G) <sup>**†</sup></b>		
Total Credits		39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Arts, Humanities, and Social Sciences

### Degree Requirements

**Bachelor of Science (B.S.) Degree** – The completion of a minor program of study, a second major, or a second degree is required.

**Bachelor of Arts (B.A.) Degree** – Second year language proficiency at college level required.

### Arts, Humanities and Social Sciences College Requirements

An additional 9 credits are required by the College of Arts, Humanities and Social Sciences for all Bachelor of Science and Bachelor of Arts degree programs of study, except the Bachelor of Fine Arts degree, the Bachelor of Music degree, the Bachelor of Science in Architecture degree, and the Bachelor of Science degree with a major in Environmental Design:

Code	Title	Credits
<b>AH&amp;SS College Requirements</b>		
Courses used to satisfy any general education requirement cannot be used to also count toward the AH&SS College Requirements. A minimum of three credits is required in each of the 3 following areas for a total of 9 credits. Choose only those courses with the prefixes listed for each area. A course with the WGS prefix can only be used in one area.		
<b>Area One: Humanities</b>		3
ARB, ENGL, FREN, GERM, HIST, HUM, PHIL, RELS, SPAN, or WGS		
<b>Area Two: Social Sciences</b>		3
ANTH, CJ, COMM, EMGT, POLS, SOC, or WGS		
<b>Area Three: Fine Arts</b>		3

ARCH, ART, ENVD, LA, MUSC, or THEA

- Student enrollment is limited to one degree program offered by the Department of Communication.
- A minimum of 9 credits must be taken at NDSU.

## Agricultural Economics

#### Department Information

- **Department Location:**  
Richard H. Barry Hall 500
- **Department Phone:**  
701-231-7441
- **Department Email:**  
ndsu.agribusiness@ndsu.edu
- **Department Web Site:**  
www.ag.ndsu.edu/agecon
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
bulletin.ndsu.edu/undergraduate/program-curriculum/agricultural-economics/

Agricultural economics combines the technical aspects of agriculture with the business aspects of management, marketing, and finance. Students are prepared for a wide variety of exciting careers in the marketing of commodities sold and inputs purchased by agricultural producers; agricultural finance; and management of agribusinesses, farms and ranches. In addition, many graduates pursue successful careers in government service, economic development, commodity promotion and agricultural policy analysis.

## The Program

The agricultural economics program emphasizes decision making, technical expertise and communication with a focus on agriculture and the food industry. Students are trained to be decision makers through course work and practical experience in agriculture, analytical and communication skills, team building, economic theory and agricultural policy.

The agricultural economics program is flexible. Students may complement required courses with classes from within the Department of Agribusiness and Applied Economics, as well as from other programs across campus. Students planning careers in production agriculture are encouraged to enroll in courses in crop and livestock sciences, agricultural systems or other production-oriented courses within the college. Students wanting careers in the food industry may select courses in food science and food safety, transportation or business. Students wishing to work in agricultural education, communication or extension can add courses in production agriculture, education or communication to their programs. By working with their academic advisor, agricultural economics students can identify courses that allow them to pursue interests in renewable energy, risk management, rural economic development, finance and natural resource management. Regardless of student selection of elective courses, the agricultural economics program contains a common core of classes introducing students to economic theory, farm management, agricultural finance, crop and livestock marketing, quantitative methods, and laws and policies important to agriculture.

The Department of Agribusiness and Applied Economics also offers majors in agribusiness and in economics and offers minors in agribusiness and economics.

## The Faculty

The department has 20 faculty members involved in teaching, research and extension. Our faculty have received numerous prestigious teaching and research awards, including the Burlington Northern Foundation Faculty Achievement Award; the Fargo Chamber of Commerce Distinguished Professorship Award; the Chancellor's Award for Academic Leadership; the Western Agricultural Economics Association's Outstanding Educator Award; the Premier Forecaster Award; the Eugene R. Dahl Excellence in Research Award, Senior Faculty; and the Teaching Award of Merit from the National Association of Colleges and Teachers of Agriculture. Faculty expertise varies across a wide range of specialties, including agricultural marketing, production, natural resource management, economic development, trade, finance, cooperatives and agricultural law.

## Career Opportunities

Agricultural economics graduates have become loan officers; managers of farm supply, equipment firms and grain elevators; sales representatives with chemical, seed, feed and fertilizer companies; economists with state and federal agencies; and commodity merchandisers. About 30 percent of the graduates choose to farm and ranch. While many graduates remain in North Dakota or Minnesota, others begin careers throughout the nation and the world.

## Financial Aid and Scholarships

Several \$500 scholarships are available to outstanding freshmen entering the program each fall semester. Scholarships also are available to transfer students and students already in the agribusiness program at North Dakota State University.

The department annually awards over \$100,000 in scholarships (ranging from \$500 to \$10,500) to students majoring in agribusiness and agricultural economics.

The College of Agriculture, Food Systems, and Natural Resources awards scholarships each year. For more information on scholarships, go to: <https://www.ndsu.edu/admission/scholarships/>.

Student loan, grant and work-study information is available from the Office of Financial Aid and Scholarships or One Stop.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Major Requirements

### Major: Agricultural Economics

Degree Type: B.S.

Minimum Degree Credits to Graduate: 120

#### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

<b>Core Courses for Agricultural Economics</b>		
AGEC 242	Introduction to Agricultural Management	3
AGEC 244	Agricultural Marketing	3
AGEC 246	Introduction to Agricultural Finance	3
AGEC 339	Quantitative Methods & Decision Making	3
AGEC 375	Applied Agricultural Law	3
or AGEC 484	Agricultural Policy	
Select one of the following:		3
AGEC 342	Farm and Agribusiness Management II	
AGEC 344	Agricultural Price Analysis	
AGEC 346	Applied Risk Analysis	

<b>Agribusiness &amp; Applied Economics Electives: A minimum of 9 credits of 300-400 AGEC or ECON electives</b>	9
<b>Agriculture Science &amp; Technology:</b>	9
Complete nine (9) credits from two (2) areas in the College of AFSNR other than Agribusiness & Applied Economics. (Includes: ASM, ANSC, ABEN, CFS, ENT, MICR, NRM, PPTH, PLSC, RNG, SOIL & VETS.) EXCEPTION - All 9 credits may be in the same area if a student completes a minor from the College of AFSNR.	
<b>Capstone Experience: Select one of the following:</b> <sup>1</sup>	3
AGEC 420 Integrated Farm and Ranch Management	
AGEC 444 Advanced Commodity Trading	
AGEC 445 Agribusiness Industrial Strategy	
AGEC 446 Agribusiness Finance	
<b>Support Area:</b>	
ECON 201 Principles of Microeconomics (May satisfy general education category B)	3
ECON 202 Principles of Macroeconomics (May satisfy general education category B)	3
ECON 341 Intermediate Microeconomics	3
ECON 343 Intermediate Macroeconomics	3
Select one of the following:	3-6
ACCT 102 Fundamentals of Accounting	
ACCT 200 & ACCT 201 Elements of Accounting I and Elements of Accounting II	
<b>Additional Requirements for Ag Econ</b>	
AGRI 150 Agriculture Orientation (Students transferring in 24 or more credits do not need to take 150.)	1
ECON 189 Skills for Academic Success	1
MIS 116 Business Use of Computers (May satisfy general education category S)	3
Select one communication course from the following:	3
COMM 212 Interpersonal Communication	
COMM 216 Intercultural Communication (May satisfy general education category B/D)	
COMM 308 Business and Professional Speaking	
COMM 315 Small Group Communication	
COMM 383 Organizational Communication I	
MATH 144 Mathematics for Business (or any higher math)	4
STAT 330 Introductory Statistics (May satisfy general education category R)	3
STAT 331 Regression Analysis	2-3
or ECON 410 Econometrics	
<b>Total Credits</b>	<b>71-75</b>

<sup>1</sup> Students are advised to consider which capstone course they will take by the end of their second year. This planning allows time to complete the required prerequisites for the capstone prior to the senior year.

<sup>2</sup> AGRI150 is only required for first-time, first-year students—A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take AGRI 150.

## Degree Requirements and Notes

- Students must earn, at least, a 2.00 cumulative GPA that is based on the courses that satisfy major requirements.
- Students majoring in Agricultural Economics may not pursue minors in either agribusiness or economics.

## Agricultural Education

### Department Information

- **Department Location:**  
Katherine Kilbourne Burgum Family Life, 4-H Center 210
- **Department Phone:**  
701-231-7439
- **Department Web Site:**  
[www.ndsu.edu/ted/](http://www.ndsu.edu/ted/)

- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/agricultural-education/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/agricultural-education/)

The agricultural education major prepares students to teach at the secondary, post-secondary and adult levels in agricultural education programs. North Dakota State University is designated by the State Board of Career and Technical Education as the recognized institution for preparing teachers of agricultural education.

Agricultural education students begin their preparatory work in the pre-agricultural education program offered through the College of Agriculture, Food Systems, and Natural Resources. After completing their introductory education course (usually during the sophomore year), students may apply to the School of Education to pursue agricultural education.

## The Program

The agricultural education major is designed to combine general studies, preparation for effective teaching, and a broad background in the various disciplines in agriculture. Those preparing to become teachers of agriculture are expected to possess a broad general education necessary for them to function as citizens and educators in our dynamic society. Courses in natural sciences, mathematics, social sciences, humanities, English, communication and speech will help provide a general education and the skills needed for more advanced courses in agriculture and other areas. Courses in agricultural economics, agricultural systems management, animal and range science, plant sciences, horticulture and soil science provide the necessary background in agriculture. Electives also are available in entomology, veterinary science, plant pathology and cereal science. Skills in organizing, planning, communicating and teaching are developed by taking courses in psychology, sociology, education and a series of other courses in various aspects of agricultural education.

## Professional Education Courses

Students may enroll in the 300-level professional education courses before being formally admitted to the School of Education (SOE). Prior to enrolling in the 400-level courses, students must complete the application for admission to the SOE; attain a minimum of a 2.75 grade point average overall in their course work and education courses; and pass the Praxis Core Academic Skills for Educators exam(s). Requirements for admission can be found at the School of Education website (<https://www.ndsu.edu/education>).

## Student Teaching

Student teaching is a highlight of the teaching program. Students will have an opportunity to apply skills acquired in college courses and to learn with the direction and assistance of a successful teacher of agricultural education.

## Occupational Experience

An appropriate background of work experience in agriculture is essential for those planning to teach agriculture. Students lacking this experience will need to seek such experience through internships, employment and other means. Cooperative Education experiences are available. A background in high school agriculture and FFA is also helpful, although not required.

## Student Advisement

Students are assigned to the faculty member in agricultural education who will work closely in program planning and in other ways to advise and assist them. Students are encouraged to seek their advisors' help whenever needed.

## Certification

Upon completing this program, students are eligible for certification to teach agricultural education in most states. The program is accredited by the Council for the Accreditation of Educator Preparation (CAEP).

## Career Opportunities

For several years, there have been favorable employment opportunities for those prepared to teach agricultural education. Starting salary depends on employer, location and contract length. Most agricultural education teachers in North Dakota are on extended contracts and receive stipends for serving as an FFA advisor. Typical starting salaries range from \$35,000 to \$40,000. Other graduates seek employment in Cooperative Extension, farming, agricultural finance, agribusiness, and government agencies in agriculture, or continue their studies at the graduate level.

## Collegiate FFA Chapter

The primary purpose of the Collegiate FFA Chapter is to prepare graduates in agricultural education to serve as advisors of secondary FFA chapters. Students majoring in agricultural education are encouraged to participate actively in the activities of the NDSU Collegiate FFA Chapter.

## Financial Aid and Scholarships

Students seeking financial aid should contact the Office of Financial Aid and Scholarships or One Stop. To inquire about scholarship opportunities, contact the Office of Admission. The College of Agriculture, Food Systems, and Natural Resources; the College of Human Development and Education, and the North Dakota FFA Foundation offer scholarships ranging from \$500-\$1,000.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Major Requirements

### Major: Agriculture Education

Degree Type: B.S.

Minimum Degree Credits to Graduate: 130

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## Degree Requirements and Notes

- See School of Education website for admission requirements
- Courses taken P/F may not be used to satisfy any requirements
- A grade of 'C' or better is required in all professional education courses.
- To be placed in student teaching, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework are required.
- To exit the program, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework are required, as well as completing the Praxis Subject test and the Principles of Learning and Teaching Test.

# Agricultural Systems Management

## Department Information

- **Department Location:**  
Agricultural and Biosystems Engineering
- **Department Phone:**  
701-231-7261
- **Department Email:**  
nds.u.asm@nds.u.edu
- **Department Web Site:**  
[www.ndsu.edu/aben/](http://www.ndsu.edu/aben/)
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/agricultural-systems-management/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/agricultural-systems-management/)

The agricultural systems management (ASM) program combines an understanding of the agricultural, biological and physical sciences with economics, managerial and technical skills. This understanding of science, systems management and applications of engineering can be applied to a career in the production and processing of food, feed, fiber and fuel, and the marketing, sales and distribution of agricultural products and services.

## The Program

The ASM major in the College of Agriculture, Food Systems, and Natural Resources is administered by the Department of Agricultural and Biosystems Engineering. The ASM program leads to a Bachelor of Science degree and includes core requirements in mathematics, communications, sciences, humanities and social sciences. In the major, students complete technical systems courses in machine principles, power systems, computer applications, materials handling, site specific agriculture, environmental resources management, electrical systems and electronics, and information/decision support technology. The curriculum balances hands-on knowledge of technology with instruction in agricultural sciences and agribusiness principles. A degree is awarded after completion of a minimum of 120 credits.

The ASM curriculum has the flexibility to permit individuals from both rural and urban backgrounds to develop a program to meet personal career objectives. Minors may be developed in related fields of production agriculture, agribusiness or in fields that add curriculum diversity, e.g., international studies, communication, natural resources management, business administration, accounting, or industrial management.

ASM students are encouraged to consider practical work experience during their college program. Cooperative Education provides opportunities for students to gain valuable career related experience.

## Career Opportunities

The opportunities for ASM graduates are many and diverse. Graduates may, for example:

1. Be employed by companies and agencies providing inputs and technical services for agricultural production:
  - Business Manager, Titan Machinery
  - Loan Officer, National Bank of Harvey
  - Territory After Market Manager, Deere and Company

- Irrigation Sales and Service, Reinke Manufacturing Co.
- Parts Manager, RDO Equipment
- Precision Ag Specialist, Precision Partners
- District Sales Manager, Interstate Seed Co.

2. Work with agribusiness companies and agencies that handle, store, process and distribute agricultural products and foods:

- Station Manager, Pioneer Hi-Bred International
- Petroleum Sales Specialist, Cenex/Land O'Lakes
- Elevator Manager, ADM
- Production Management, Black Gold Farms
- Crop Consultant, Triangle Agronomy

3. Work with companies and agencies providing inputs and technical services to rural and urban communities and the general society:

- CEO, Cass County Electric
- Ag Science Teacher, North Central Schools
- Soil Conservationist, USDA or
- Natural Resources Conservation Service
- Farm Appraiser, Farm Credit Services
- Energy Use Advisor, Verendrye Electric Cooperative
- Water Quality Specialist, USDA or Extension Service

4. Be self-employed, performing services as consultants, or as owners or operators of businesses:

- Owner, Credit Management Consulting
- Owner, Lynnes Bison Farms
- Owner, Hoffman Irrigation
- Owner, Rust Sales

## Scholarships

Several scholarships are available through the department. These scholarships range from \$300 to \$4,000. Students also may be eligible for scholarships from the College of Agriculture, Food Systems, and Natural Resources.

## Extra-Curricular Opportunities

The ASM Club offers students opportunities to participate in professional and social activities with other students at the local, regional and national levels. ASM Club members take an active part in the annual Agricultural Technology Expo, go on field trips and are involved in public service activities.

Being an active participant in student organizations helps students develop leadership, teamwork, organization and communication skills. These skills are highly sought by those industries that hire ASM graduates.

## A Well-Equipped Teaching Facility

The ASM degree program is housed in the Agricultural and Biosystems Engineering building which includes offices, classrooms and laboratories. Laboratories are furnished with equipment typical of that used in industry and research, such as personal computers that are networked to the University's computer facilities, tractors, engines, surveying equipment, etc. Department faculty have received recognition for outstanding teaching and research on the state and national levels. Faculty expertise varies across a wide and diverse range of specialties related to agricultural and biological systems.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Agricultural Systems Management

### Department Information

- **Department Location:**  
Agricultural and Biosystems Engineering
- **Department Phone:**  
701-231-7261
- **Department Email:**  
nds.u.asm@nds.u.edu
- **Department Web Site:**  
[www.ndsu.edu/aben/](http://www.ndsu.edu/aben/)
- **Credential Offered:**  
B.S.
- **Plan Of Study Sample:**  
[bulletin.ndsu.edu/programs-study/undergraduate/agricultural-systems-management/#planofstudytext](http://bulletin.ndsu.edu/programs-study/undergraduate/agricultural-systems-management/#planofstudytext)

## Major Requirements

### Major: Agricultural Systems Management

Degree Type: B.S.

Minimum Degree Credits to Graduate: 120

#### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

#### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		<b>12</b>
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		<b>3</b>
<b>Science and Technology (S) <sup>†</sup></b>		<b>10</b>
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		<b>6</b>
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		<b>6</b>
<b>Wellness (W) <sup>†</sup></b>		<b>2</b>
<b>Cultural Diversity (D) <sup>*†</sup></b>		
<b>Global Perspectives (G) <sup>*†</sup></b>		
Total Credits		<b>39</b>

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

### ASM Major Requirements

Students must maintain a 2.25 GPA in ASM prefix courses.

Code	Title	Credits
<b>Agricultural Systems Management Core Requirements</b>		
ASM 115	Fundamentals of Agricultural Systems Management (Students transferring in or changing major to ASM with 32+ credits do not need to take ASM 115)	3
ASM 125	Fabrication & Construction Technology (Students transferring in or changing major to ASM with 32+ credits do not need to take ASM 125)	3
ASM 225	Computer Applications in Agricultural Systems Management	3
ASM 264	Natural Resource Management Systems	3
ASM 264L	Natural Resource Management Systems Laboratory	1
ASM 323	Post-Harvest Technology	3
ASM 354	Electricity and Electronic Applications	3

ASM 373	Tractors & Power Units	3
ASM 374	Power Units Laboratory	1
ASM 378	Machinery Principles and Management	3
ASM 429	Hydraulic Power Principles and Applications	3
ASM 475	Management of Agricultural Systems (Capstone Course)	2
ASM 496	Field Experience (Expo)	1

**Supporting Courses**

CHEM 121	General Chemistry I (May satisfy general education category S)	3
CHEM 122	General Chemistry II (May satisfy general education category S)	3
CSCI 114	Microcomputer Packages (May satisfy general education category S)	3
or MIS 116	Business Use of Computers	
ECON 201	Principles of Microeconomics (May satisfy general education category B)	3
ECON 202	Principles of Macroeconomics (May satisfy general education category B)	3
MATH 105	Trigonometry (or higher)	3
PAG 115	Introduction to Precision Agriculture	2
PHYS 211	College Physics I (May satisfy general education category S)	3
PHYS 211L	College Physics I Laboratory (Either course may satisfy general education category S)	1
or CHEM 121L	General Chemistry I Laboratory	
STAT 330	Introductory Statistics (May satisfy general education category R)	3
Select one of the following:		3 or 6
ACCT 102	Fundamentals of Accounting	
ACCT 200 & ACCT 201	Elements of Accounting I and Elements of Accounting II	

**Specialized Options - Select from one of the specialized options listed below. A minor program of study may be completed in place of an option.** 30-38

Total Credits 92-103

<sup>1</sup> AGRI189 is only required for first-time, first-year students—A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take AGRI 189.

**specialized options**

Code	Title	Credits
------	-------	---------

**Applied Business Option: Minimum 30 Credits**

This is the standard option for this major; students can declare another option or the minor option with the Office of Registration and Records.

Complete any course from the College of Ag, including Ag Econ as well as the BIO dept, and those listed under Program/Option Electives.

Select courses in agriculture science or supporting areas to enhance careers in Agribusiness. Select courses in consultation with an advisor.

Courses not on the list will require a substitution form to be submitted to the Office of Registration and Records.

Code	Title	Credits
------	-------	---------

**Production Agriculture Option: Minimum of 30 Credits**

Complete any course from the College of Ag, including Ag Econ as well as the BIO dept, and those listed under Program/Option Electives

Select courses in consultation with an advisor. Courses not on the list will require substitution form to be submitted to the Office of Registration and Records.

Code	Title	Credits
------	-------	---------

**Dealership Management Option: Minimum 32-38**

Minor in either Business Administration (24 credits) or Agribusiness (18 credits) required. 18-24

ACCT 200 & ACCT 201	Elements of Accounting I and Elements of Accounting II	6
------------------------	---	---

ASM 496	Field Experience	2
---------	------------------	---

Elective	Complete any course from the College of Ag, including Ag Econ as well as the BIO dept, and those listed under Program/Option Electives	3
----------	--	---

Select one of the following:		3
------------------------------	--	---

COMM 214	Persuasive Speaking	
----------	---------------------	--

COMM 308	Business and Professional Speaking	
COMM 315	Small Group Communication	
Total Credits		32-38

**Degree Requirements and Notes:**

- Students must register for an ASM internship in the semester it is to be completed. This includes internships arranged with the NDSU Career Center.
- Transfer grades must be 'C' or higher to count towards major requirements.
- The completion of a minor program of study is suggested but not required. Viable minor options include: Accounting, Agribusiness, Animal Sciences, Business Administration, Construction Management, Crop & Weed Sciences, Industrial Engineering & Management, Public Relations & Advertising, or Range Science.

**Minor Requirements****Agricultural Systems Management****Minor Requirements**

Required Credits: 16

Code	Title	Credits
<b>Required Courses</b>		
ASM 264	Natural Resource Management Systems	3
ASM 354	Electricity and Electronic Applications	3
ASM 373 or ASM 378	Tractors & Power Units Machinery Principles and Management	3
<b>Remaining Credits: Select 7 credits from the following:</b>		7
ASM 225	Computer Applications in Agricultural Systems Management	
ASM 323	Post-Harvest Technology	
ASM 374	Power Units Laboratory	
ASM 429	Hydraulic Power Principles and Applications	
ASM 454	Principles and Application of Precision Agriculture	
ASM 475	Management of Agricultural Systems (Capstone)	
ASM 491	Seminar	
ASM 496	Field Experience (Expo)	
ASM 496	Field Experience	
Total Credits		16

**Minor Requirements and Notes:**

- A minimum of 8 credits must be taken at NDSU.
- Students must earn a minimum 2.00 GPA for the minor requirements.

Code	Title	Credits
<b>Option Electives</b>		
<b>May select any courses offered in the College of Ag, including Ag Econ, as well as the Biology department, and those courses listed here.</b>		
<b>ASM 496 – Ag Tech Expo (1 add'l cr.) may be used as an Option Elective for all Specialized Options. ASM 496 – Field Exp/Internship, 1cr., may also be used as an Option Elective (maximum two credits) in the Applied Business and Production Agriculture Specialized Options only.</b>

## Animal Science

### Department Information

- **Department Location:**  
Hultz Hall
- **Department Phone:**  
701-231-7641
- **Department Email:**  
ndsu.ansc@ndsu.edu
- **Department Web Site:**  
[www.ag.ndsu.edu/ansc/](http://www.ag.ndsu.edu/ansc/)
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/animal-science/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/animal-science/)

The animal science major at North Dakota State University encompasses physiology, nutrition, genetics, reproduction, marketing, management and husbandry of livestock and companion animals; the important scientific understanding for the utilization of animal products; and experiences necessary for leadership in, and advocacy for, industries providing animals and animal products that benefit humans.

### The Program

The Department of Animal Sciences offers degree programs in animal science, equine science, and veterinary technology. The faculty and staff conduct teaching, research and extension programs to support production and utilization of many types of animals, including beef and dairy cattle, sheep, swine, horses and poultry, as well as those providing other types of food and fiber, companion animals and animals in zoos.

## The Curriculum

Five study options are available for the animal science major.

**Animal Production, Management and Husbandry** – This option is designed for students wanting a background in the principles of animal management and husbandry. It includes broad training in animal husbandry, production and management. Employment opportunities include careers in livestock production, allied and technical support fields, including agricultural positions within Extension.

**Animal Biomedical Science** – This option offers students a more scientific approach to animal science, preparing them for veterinary medicine, graduate research in animal science, teaching, food technology and the biotechnology industry. Students receive an animal science degree while meeting academic requirements for application to veterinary schools.

**Animal Agribusiness** – This option is designed for students desiring a background in the business and economic principles as they apply to the livestock industry. It leads to broad training in animal husbandry, production, business and management. Employment opportunities include careers in agribusiness, sales and marketing of livestock and products for the livestock industry, and a variety of public and private institutions which serve the business of animal agriculture.

**Livestock Media** – This option offers students an opportunity to acquire skills in journalism, advertising and public relations in addition to the fundamentals of animal science. Employment opportunities include working for a variety of media outlets such as print and virtual media, TV, radio, magazines, breed associations, or commodity organizations, as well as positions involved in public relations in the livestock industry.

**Meat Science** – This option provides the opportunity to emphasize knowledge about the science concerning muscle biology and evaluation and processing of red meat. This option prepares students for a broad variety of career opportunities in the meat industry, including management, sales, meat inspection and meat marketing.

## High School Preparation

High school preparation should include course work in biology, chemistry, English and algebra.

## Career Opportunities

Animal science students qualify for many varied occupations that involve animal and agriculture business, livestock products and land management. Graduates find employment with colleges and universities, private industry and foreign assignments, as well as federal and state land management agencies. Specific employment opportunities are available in the areas of Extension; financial lending; the promotion, management and sale of livestock and meat; feed sales; and farm, ranch and natural resource management. The need for research in animal science has encouraged many students (14% according to the 2018 NDSU First Destination Survey) to continue their education in graduate school.

## Extra-Curricular Activities

Animal science students belong to a variety of clubs including Saddle and Sirloin, Dairy Club, Rodeo Club, Horseman's Association, Collegiate Cattlewomen, Range Club, Anthrozoology Club, and Collegiate FFA. The Saddle and Sirloin club is the largest club on campus, and sponsors events such as the Little International Livestock Show, the Hall of Fame Banquet, and Kiddie Days. In addition to clubs, students participate in intercollegiate contests including livestock, meat, and dairy evaluation teams; equestrian event teams; and academic quadrathlon.

## Financial Aid and Scholarships

Part-time work and work-study programs in the seven livestock units, as well as the animal science laboratories, are available through the department. Information about scholarships can be found at [www.ag.ndsu.edu/academics/scholarships](http://www.ag.ndsu.edu/academics/scholarships), or by contacting the Office of the Dean, College of Agriculture, Food Systems, and Natural Resources, NDSU, Dept 2200, PO Box 6050, Fargo, ND 58108-6050, (701) 231-8790. All of our students, from incoming freshmen to graduate students, have the opportunity to apply for more than 30 scholarships and awards through the department. Scholarships are generally announced in the spring semester and awarded fall semester.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

**This sample plan of study applies to the Animal Production, Management, and Husbandry study option (Option 1). For other study options, see examples on the departmental website (<https://www.ag.ndsu.edu/ansc/undergraduate-programs-1/undergraduate-programs>).**

## Major Requirements

### Major: Animal Science

**Degree Type:** B.S.

**Minimum Degree Credits to Graduate:** 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		6
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		6
<b>Wellness (W) <sup>†</sup></b>		2
<b>Cultural Diversity (D) <sup>*†</sup></b>

Total Credits		39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

### Major Requirements

Code	Title	Credits
<b>Required Core Courses for Animal Science</b>		
ANSC 114	Introduction to Animal Sciences	3
ECON 201	Principles of Microeconomics (May satisfy general education category B and G)	3
MATH 103	College Algebra	3
or MATH 105	Trigonometry	

or MATH 107	Precalculus	
or MATH 146	Applied Calculus I	
STAT 330	Introductory Statistics (May satisfy general education category R)	3
VETS 135	Anatomy and Physiology of Domestic Animals	3
Select one of the following:		1
ANSC 101	Student Success Techniques - Animal and Equine Science	
ANSC 102	Student Success Techniques - Animal Sciences with Pre-Veterinary Medicine Emphasis	
ANSC 201	Student Success Techniques - Nontraditional & Transfer Students	
VETS 150	Introduction to the Veterinary Profession	
ANSC 240	Meat Animal Evaluation and Marketing	3
ANSC 300	Domestic Animal Behavior and Management	3
ANSC 323	Fundamentals of Nutrition	3
ANSC 324	Applied Animal Nutrition	3
ANSC 463 & 463L	Physiology of Reproduction and Physiology of Reproduction Laboratory	4
ANSC 478	Research and Issues in Animal Agriculture	3
Select one of the following:		2
ANSC 379	Study Tour Abroad	
ANSC 393	Undergraduate Research (research experience)	
ANSC 396	Field Experience (internship experience)	
Select one of the following:		3
ANSC 480	Equine Industry and Production Systems	
ANSC 482	Sheep Industry and Production Systems	
ANSC 484	Swine Production/Pork Industry Systems	
ANSC 485	Poultry Industry and Production Systems	
ANSC 486	Beef Industry and Production Systems	
ANSC 488	Dairy Industry and Production Systems	
<b>Options: Select one of the five options listed below.</b>		<b>44-48</b>
Students must select one option of interest. The standard option for this major is the Animal Production, Management and Husbandry. Students who wish to declare an option other than the standard option must officially declare that option with the Office of Registration and Records.		

Total Credits 84-88

### Option 1: Animal Production, Management, & Husbandry Option

Code	Title	Credits
AGEC 242	Introduction to Agricultural Management	3
AGEC 244	Agricultural Marketing	3
BIOC 260	Elements of Biochemistry	4
MICR 202 & 202L	Introductory Microbiology and Introductory Microbiology Lab (May satisfy general education category S)	3
PLSC 315	Genetics (May satisfy general education category S)	3
Select one from the following:		4
BIOL 111 & BIOL 100L	Concepts of Biology and Non-Majors Biology Lab (May satisfy general education category S)	
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	
Select one from the following:		4
CHEM 117 & 117L	Chemical Concepts and Applications and Chem Concepts and Applications Lab (May satisfy general education category S)	
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory (May satisfy general education category S)	
Select one the following evaluation courses:		2
ANSC 230	Meat Grading and Evaluation	
ANSC 231	Livestock Evaluation	

ANSC 232	Dairy Cattle Evaluation	
ANSC 235	Equine Evaluation	
ANSC 340	Principles of Meat Science	3
ANSC 357	Animal Genetics	3
ANSC 370	Fundamentals/Animal Disease	3
ANSC 380	Livestock Sales and Marketing	2
ANSC 480	Equine Industry and Production Systems	3
or ANSC 482	Sheep Industry and Production Systems	
or ANSC 484	Swine Production/Pork Industry Systems	
or ANSC 485	Poultry Industry and Production Systems	
or ANSC 486	Beef Industry and Production Systems	
or ANSC 488	Dairy Industry and Production Systems	
Animal Production, Management, and Husbandry Elective (choose from any level PLSC, NRM, RNG, or SOIL)		6
Total Credits		46

### Option 2: Animal Agribusiness Option

Code	Title	Credits
ACCT 102	Fundamentals of Accounting	3
AGEC 242	Introduction to Agricultural Management	3
AGEC 244	Agricultural Marketing	3
AGEC 246	Introduction to Agricultural Finance	3
Select one from the following:		4
BIOL 111 & BIOL 100L	Concepts of Biology and Non-Majors Biology Lab (May satisfy general education category S)	
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	
Select one from the following:		4
CHEM 117 & 117L	Chemical Concepts and Applications and Chem Concepts and Applications Lab (May satisfy general education category S)	
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory (May satisfy general education category S)	
Select one of the following evaluation courses:		2
ANSC 230	Meat Grading and Evaluation	
ANSC 231	Livestock Evaluation	
ANSC 232	Dairy Cattle Evaluation	
ANSC 235	Equine Evaluation	
ANSC 357	Animal Genetics	3
ANSC 380	Livestock Sales and Marketing	2
ECON 202	Principles of Macroeconomics (May satisfy general education category B)	3
PLSC 315	Genetics (May satisfy general education category S)	3
AGEC elective	300-400 level	6
Animal Agribusiness Electives (choose from 300+ level ANSC, AGECE, ECON, PLSC or RNG)		9
Total Credits		48

### Option 3: Biomedical Science Option

Students interested in veterinary school should consider this option. The option meets most veterinary school prerequisites. Consultation with an adviser is recommended.

Code	Title	Credits
ANSC 357 or ANSC 314	Animal Genetics Animal Biotechnology	3
ANSC 444	Livestock Muscle Physiology	3
BIOC 260	Elements of Biochemistry	4

BIOL 150 & 150L	General Biology I and General Biology I Laboratory	4
BIOL 151 & 151L	General Biology II and General Biology II Laboratory	4
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory (May satisfy general education category S)	4
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory (May satisfy general education category S)	4
CHEM 240 or CHEM 341	Survey of Organic Chemistry Organic Chemistry I	3
MICR 350 & 350L	General Microbiology and General Microbiology Lab	5
PLSC 315	Genetics (May satisfy general education category S)	3
Select one from the following:		4
PHYS 120 & 120L	Fundamentals of Physics and Fundamentals of Physics Laboratory (May satisfy general education category S)	
PHYS 211 & 211L	College Physics I and College Physics I Laboratory (May satisfy general education category S)	
Biomedical Science Elective (choose from 300+ level ANSC, BIOC, BIOL, CHEM, MICR, PHYS OR ZOO)		3
Total Credits		44

**Option 4: Livestock Media Option**

Code	Title	Credits
AGEC 242	Introduction to Agricultural Management	3
AGEC 244	Agricultural Marketing	3
ANSC 357	Animal Genetics	3
ANSC 380	Livestock Sales and Marketing	2
PLSC 315	Genetics (May satisfy general education category S)	3
Select one of the following evaluation courses:		2
ANSC 230	Meat Grading and Evaluation	
ANSC 231	Livestock Evaluation	
ANSC 232	Dairy Cattle Evaluation	
ANSC 235	Equine Evaluation	
Select one from the following:		4
BIOL 111 & BIOL 100L	Concepts of Biology and Non-Majors Biology Lab (May satisfy general education category S)	
BIOL 150 & 150L	General Biology I and General Biology I Laboratory (May satisfy general education category S)	
Select one from the following:		4
CHEM 117 & 117L	Chemical Concepts and Applications and Chem Concepts and Applications Lab (May satisfy general education category S)	
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory (May satisfy general education category S)	
Complete any minor offered by the Department of Communications		21
Total Credits		45

**Option 5: Meat Science Option**

Code	Title	Credits
AGEC 244	Agricultural Marketing	3
ANSC 230	Meat Grading and Evaluation	2
ANSC 340	Principles of Meat Science	3
ANSC 344	Fundamentals of Meat Processing	2
ANSC 357	Animal Genetics	3
ANSC 444	Livestock Muscle Physiology	3

BIOC 260	Elements of Biochemistry	4
CFS 210	Introduction to Food Science and Technology	3
MICR 202 & 202L	Introductory Microbiology and Introductory Microbiology Lab (May satisfy general education category S)	3
PLSC 315	Genetics (May satisfy general education category S)	3
CFS elective	300-400 Level	3
Select one from the following:		4
BIOL 111 & BIOL 100L	Concepts of Biology and Non-Majors Biology Lab (May satisfy general education category S)	
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	
Select one from the following:		4
CHEM 117 & 117L	Chemical Concepts and Applications and Chem Concepts and Applications Lab (May satisfy general education category S)	
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory (May satisfy general education category S)	
Meat Science Electives (choose from 300+ level ANSC, BIOC, CFS, CHEM, MICR OR SAFE)		6
Total Credits		46

**Degree Requirements and Notes:**

- Students must earn a minimum 2.00 cumulative GPA for courses that satisfy major requirements.
- Transfer grades must be 'C' or higher to count toward major requirements.

**Minor Requirements****Animal Science Minor****Minor Requirements****Required Credits: 16**

Code	Title	Credits
<b>Required Courses</b>		
ANSC 114	Introduction to Animal Sciences	3
ANSC 223	Introduction to Animal Nutrition	2
ANSC 220	Livestock Production	3
ANSC 240	Meat Animal Evaluation and Marketing	3
<b>Elective Courses *</b>		5
Must include one of the following courses:		
ANSC 300	Domestic Animal Behavior and Management	
ANSC 314	Animal Biotechnology	
ANSC 323	Fundamentals of Nutrition	
ANSC 324	Applied Animal Nutrition	
ANSC 340	Principles of Meat Science	
ANSC 357	Animal Genetics	
ANSC 370	Fundamentals/Animal Disease	
ANSC 444	Livestock Muscle Physiology	
ANSC 463	Physiology of Reproduction	
ANSC 487	Growing and Finishing Cattle Management	
Remaining credits may come from those listed above or the following courses:		
ANSC 230	Meat Grading and Evaluation	
ANSC 231	Livestock Evaluation	
ANSC 232	Dairy Cattle Evaluation	
ANSC 344	Fundamentals of Meat Processing	
ANSC 380	Livestock Sales and Marketing	

\* Enrolling in two 2-credit courses will not fulfill elective requirements.

#### Minor Requirements and Notes:

- A minimum of 8 credits must be taken at NDSU.
- Students must earn a minimum 2.00 GPA for the minor requirements.

## Anthropology

### Department Information

- **Department Location:**  
Minard Hall
- **Department Phone:**  
701-231-8657
- **Department Email:**  
ndsu.socanth@ndsu.edu
- **Department Web Site:**  
www.ndsu.edu/soc.anth/
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
bulletin.ndsu.edu/undergraduate/program-curriculum/anthropology/

Anthropology is the study of human beings over time and space. It seeks to understand humans by exploring the differences and similarities between humans and the human experience in all parts of the world and throughout humanity's existence.

### The Mission

The mission of the anthropology major and minor degrees is twofold: (1) the promotion of cross-cultural and international understanding and (2) the advancement of knowledge about the human condition. Across subdisciplines and geographical areas, we take a cultural approach to understanding human variation past, present and future. Our mission goals are met by way of teaching, research and service to the university, state, region and profession of anthropology.

### Faculty

The anthropology program has three faculty members with varying research interests and areas of specialization. The anthropology faculty provide expertise in gender, race, indigeneity, postcolonial studies, the African Diaspora, household and landscape archaeology, medical anthropology, and psychological anthropology across cultures. They employ GIS, ethnohistoric, and ethnographic methods. They cover regional studies in North America, the Caribbean, and East Asia.

The research efforts of the anthropology faculty are constantly integrated with the teaching process to bring new information and approaches to the classroom. This integration makes the classroom experience of majors and graduate students vibrant and dynamic. Faculty research activities also can provide students with valuable pre-professional experience as research assistants.

### Laboratories

Students can pursue opportunities to work in the Archaeology Materials Lab as part of their course work, or in some cases, as paid research assistants. Materials from archaeological field studies are processed and analyzed in the lab. Students may also work with GIS data as part of Archaeological research projects.

### Field Schools/Internships

The department encourages students to pursue field school opportunities where they can gain hands-on experience in archaeology or cultural anthropology while also earning course credit. Faculty periodically offer archaeological field schools in North America and the Caribbean. In addition, faculty advise students on selecting other field experiences abroad and nationally. In recent years students have completed field experiences in Wisconsin, Jamaica, Ireland, Greece, Mexico, and Poland. Faculty work with students on internship opportunities as pre-professional experience and have placed students in internships with numerous businesses, heritage organizations, and museums.

## Career Opportunities

As with other fields of study that form the core of a solid liberal arts education, anthropology prepares students for many life and career challenges. An undergraduate degree in anthropology prepares students to think critically and analytically. It fosters a deep appreciation and understanding of cultural diversity and cross-cultural relations. Common areas of employment include advertising and public relations, community development, contract archaeology, corporate business and industry, cultural resource management, government agencies, non-profit organizations, policy research, and social services. For more information on anthropology employment, refer to the North Dakota State University Anthropology website or visit the American Anthropological Association website at [www.aaanet.org](http://www.aaanet.org).

## The Curriculum

The course requirements in anthropology are designed to provide students with a solid grounding in the discipline as a whole and training in research and analysis methods. The curriculum covers the multiple subdisciplines in anthropology. Anthropology faculty advisors work very closely with students on the specific plan of study that best suits their needs and interests.

## Anthropology Club

The Anthropology Club is a student directed organization with sponsorship and advising provided by the anthropology faculty. The club provides a forum for learning more about anthropology and related careers, for engaging in community service, and for interacting with students with different interests, levels of experience and education in anthropology.

## Major/Minor Requirements

The 37-credit major includes ANTH 111, SOC 110, two courses at the 200-Level; a theory course and a methods course; two of the following: ANTH 204, 205, 206; 18 credit hours of 300-400 level anthropology courses; and ANTH 489 Senior Capstone.

The 18-credit minor includes ANTH 111; SOC 110; two of the following: ANTH 204, 205, 206; and two additional anthropology courses from the 300 or 400 level offerings.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Major Requirements

### Major: Anthropology

**Degree Type:** B.A. or B.S.

**Minimum Degree Credits to Graduate:** 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking

<b>Quantitative Reasoning (R) <sup>†</sup></b>	<b>3</b>
<b>Science and Technology (S) <sup>†</sup></b>	<b>10</b>
<b>Humanities and Fine Arts (A) <sup>†</sup></b>	<b>6</b>
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>	<b>6</b>
<b>Wellness (W) <sup>†</sup></b>	<b>2</b>
<b>Cultural Diversity (D) <sup>*†</sup></b>	
<b>Global Perspectives (G) <sup>*†</sup></b>	
Total Credits	39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Arts, Humanities, and Social Sciences

### Degree Requirements

**Bachelor of Science (B.S.) Degree** – The completion of a minor program of study, a second major, or a second degree is required.

**Bachelor of Arts (B.A.) Degree** – Second year language proficiency at college level required.

### Arts, Humanities and Social Sciences College Requirements

An additional 9 credits are required by the College of Arts, Humanities and Social Sciences for all Bachelor of Science and Bachelor of Arts degree programs of study, except the Bachelor of Fine Arts degree, the Bachelor of Music degree, the Bachelor of Science in Architecture degree, and the Bachelor of Science degree with a major in Environmental Design:

Code	Title	Credits
<b>AH&amp;SS College Requirements</b>		
Courses used to satisfy any general education requirement cannot be used to also count toward the AH&SS College Requirements. A minimum of three credits is required in each of the 3 following areas for a total of 9 credits. Choose only those courses with the prefixes listed for each area. A course with the WGS prefix can only be used in one area.		
<b>Area One: Humanities</b>		<b>3</b>
ARB, ENGL, FREN, GERM, HIST, HUM, PHIL, RELS, SPAN, or WGS		
<b>Area Two: Social Sciences</b>		<b>3</b>
ANTH, CJ, COMM, EMGT, POLS, SOC, or WGS		
<b>Area Three: Fine Arts</b>		<b>3</b>
ARCH, ART, ENVD, LA, MUSC, or THEA		
Total Credits		9

### Major Requirements

Code	Title	Credits
<b>Anthropology Core Requirements</b>		
SOC 110	Introduction to Sociology (May satisfy general education category B) <sup>1</sup>	3
ANTH 111	Introduction to Anthropology (May satisfy general education category B and D) <sup>1</sup>	3
ANTH 204	Archaeology and Prehistory <sup>1</sup>	3
ANTH 205	Human Origins <sup>1</sup>	3
ANTH 206	Introduction to Cultural Anthropology: Peoples of the World	3
ANTH 470	Theory in Archaeology <sup>1,2</sup>	3
or ANTH 480	Development of Anthropological Theory	
ANTH 471	Archaeological Research Methods <sup>1,2</sup>	3
or ANTH 481	Ethnographic Research Methods	
ANTH 489	Senior Capstone In Anthropology <sup>1</sup>	1
<b>Major Electives 300-400 Level:</b>		<b>15</b>

Other courses may qualify to substitute for the 300-400 level courses. Substitutions must be approved by the adviser and department chairperson prior to course enrollment. These include internships, field schools, archaeology lab credits, etc.

---

Total Credits

37

<sup>1</sup> Students must earn a 'C' or better in each of the Core Requirements courses to successfully complete their major requirements.

<sup>2</sup> Other courses may qualify to substitute for the Theory and Methods courses. Substitutions must be approved by the adviser and department chairperson prior to course enrollment and paperwork must be filed with the Office of Registration and Records.

## Minor Requirements

ANTH 204	Archaeology and Prehistory	
ANTH 205	Human Origins	
ANTH 206	Introduction to Cultural Anthropology: Peoples of the World	
<b>Additional Electives</b>		
Two anthropology courses at the 300-400 level		6
Total Credits		18

#### Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.

## Apparel, Retail Merchandising and Design

### Department Information

- **Department Location:**  
E. Morrow Lebedeff Hall
- **Department Phone:**  
701-231-8604
- **Department Web Site:**  
[www.ndsu.edu/adhm/apparel\\_retail\\_merchandising\\_design/](http://www.ndsu.edu/adhm/apparel_retail_merchandising_design/)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/apparel-retail-merchandising-design/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/apparel-retail-merchandising-design/)

If you are looking for a career in a fast-paced environment that provides new opportunities each day, then a degree in Apparel, Retail Merchandising and Design (ARMD) is just for you. The global textile and apparel industry is made up of companies that produce fibers, yarns, and textile and apparel products for consumers around the world. National and global retailers provide goods and services to consumers everywhere, via multi-channel retailing involving traditional stores, catalogs, online venues, including social networking sites.

The undergraduate program in ARMD offers students opportunities to develop new approaches for dealing with challenges facing all areas of the global textile, apparel, and retail industry. Students are involved in designing new solutions for an ever-evolving global industry. Because of the size and scope of the industry, there are a variety of career opportunities available worldwide.

Students gain aesthetic, technical, practical, and professional skills in four option areas - *fashion product development*, *fashion entrepreneurship*, *retail merchandising and interior merchandising*. Retail merchandising and fashion entrepreneurship options provide students with a firm grasp of business strategy. The fashion product development option focuses on developing, designing, and marketing materials and products within this global industry. Students develop a trained eye and skills to showcase and sell products to a fashion-conscious consumer.

**POSSIBLE CAREER PATHS:**

- Apparel buyers
- Product developers
- Visual merchandisers
- Technical designers
- E-commerce developers
- Fashion entrepreneurs
- Social media specialists
- Retail managers
- Fashion forecasters
- Interior merchandisers

**Accelerated Programs in ARMD**

- A 3-year plan is available for each option.

- The accelerated/combined program allows high-achieving students to complete both a bachelor's and master's degree within five years. An online Master's degree in Merchandising is offered.

**Plans of Study**

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

- **Plan Of Study Sample:**  
[bulletin.ndsu.edu/programs-study/undergraduate/apparel-retail-mechandising-design/](http://bulletin.ndsu.edu/programs-study/undergraduate/apparel-retail-mechandising-design/)

## Major Requirements

### Major: Apparel, Retail Merchandising & Design

Degree Type: B.A. or B.S.

Minimum Degree Credits to Graduate: 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		

Quantitative Reasoning (R) <sup>†</sup>	3
Science and Technology (S) <sup>†</sup>	10
Humanities and Fine Arts (A) <sup>†</sup>	6

Total Credits		23

## Degree Requirements and Notes

- Transfer courses from other institutions must have grades of 'C' or better to be accepted for the program.
- Business minor requires an application to the College of Business and a minimum 2.5 GPA in courses used for the minor.

## ACCELERATED PROGRAM IN Apparel, Retail MERchandising and DESIGN (ARMD)

- A combined/accelerated program will allow high-achieving students to complete both a bachelor's in ARMD and master's degree in Merchandising in five years.
- Only students with a cumulative undergraduate GPA of at least 3.50 and who have completed at least 60 credits are eligible to apply. Interested students should speak with an ARMD advisor about how to proceed.
- 15 credits at the master's level may be used to meet the requirements for a bachelor's degree.

## Minor Requirements

### Minor: Apparel, Retail Merchandising & Design

#### Required Credits: 16

Code	Title	Credits
<b>Required Courses</b>

## Architecture

### Department Information

- **Department Location:**  
Renaissance Hall
- **Department Phone:**  
701-231-6151
- **Department Email:**  
nds.u.ala@nds.u.edu
- **Department Web Site:**  
[www.ndsu.edu/ala/](http://www.ndsu.edu/ala/)
- **Credential Offered:**  
B.S.Arch.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/architecture/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/architecture/)

Architecture is a fine art devoted to the design of the human environment. The architect is concerned with the aesthetic, social, environmental, technological and psychological factors that influence the design of a building. Architects are involved in the success, quality and appearance of a building within the context of a community and the city. Architecture is a dynamic profession that ranges from residential houses to large-scale urban buildings. An architect can design houses, commercial buildings, museums, college science buildings, and resorts, as well as many other building types.

### BACKGROUND INFORMATION

To become an architect, you must learn to make use of science and technology, and develop sensitivity for beauty in the design of space and form with material. You must develop a deep understanding of people and their surroundings. Because this work encompasses so many different fields of interest, the architect is best thought of as a professional who bridges different areas of study and blends them into a single, significant activity.

### CAREER OPPORTUNITIES

Architects work in architectural firms or accept positions with government, corporations or institutions. Some architects become highly specialized; others remain generalists in the profession, working on all facets of a project. Whichever path your career may follow, it is necessary to first build a firm background that includes essential architectural knowledge and skills. Architecture provides a variety of interesting positions within the discipline. One can either work for an established architecture firm or create their own business. There are three typical areas in architecture which one can focus on (or one can do all three) once they begin working. These three areas are: the design or aesthetic aspects of a project, the technical or material aspects of a project, or as the construction liaison when a project is being built. Further, architecture is a scalable profession depending on one's interests. For example, the possible areas one can work in range from small-scale residential houses to large-scale skyscrapers.

### ACCREDITATION

The five-year Master of Architecture degree is fully accredited by the National Architectural Accreditation Board (NAAB). For more information see, [www.naab.org/home](http://www.naab.org/home). To become a licensed architect requires an accredited professional degree, completion of the Architectural Experience Program (AXP) and passing your state's licensing examination.

### THE PROGRAM

The architecture program is a five-year professional course of study leading to a Master of Architecture degree. This degree is nationally accredited and recognized by all state architectural licensing boards. Students receive a Bachelor of Science in Architecture, a pre-professional degree, at the

end of four years. During the first year of pre-architectural studies, the curriculum addresses the understanding of the environment and our impact on nature. In addition to meeting general education and departmental requirements students take five environmental design courses (ENVD) comprised of lecture courses, a drawing course and a design fundamentals course. Beginning at the sophomore level, there is a selective admissions process where admitted students become architecture majors. We limit our studio courses to a maximum of 16 students to maintain a high level of student faculty contact. The program is a studio based model of education where students have high contact hours with their professors and learn problem solving techniques and design methodologies. The primary focus is on design thinking where students engage in individual and group projects that represent a vast array of design problems that require real-world solutions. Our primary focus is for students to learn to be great designers and leaders who engage the dynamic and emerging problems of the world with beautiful and thoughtful designs. Students will learn how to communicate their ideas through writing and public speaking in addition to traditional and new ways of thinking and communicating such as physical models, drawings, computer animation and renderings and virtual reality. The program has required field trips, a lecture series and invited outside professionals that help students focus on their own interests in architecture and create a project based on those interests.

## ACTIVITIES AND FACILITIES

Activities within the department include:

- Student chapters of the American Institute of Architecture Students; Tau Sigma Delta; Freedom by Design; U.S. Green Building Council; National Organization of Minority Architects
- Yearly career fair
- Student-run Beaux Arts Ball with a guest speaker
- Interaction with community projects such as eFargo
- Studio field trips to U.S. cities
- Visiting lecturers who speak on architecture and related topics
- Joint studio projects with the landscape architecture program
- Semester-long term abroad
- Summer study opportunities in Europe and North America and an International Student Exchange Program
- Summer internship opportunities

Our facilities include:

- Two remarkable buildings located in downtown Fargo: Klai Hall and Renaissance Hall
- 3-D prototyping and printing
- 3-D computing rendering and server farm
- State-of-the-art computing labs
- Computer aided laser cutters and CNC
- Large document printers and scanners
- Software such as GIS, CAD and 3-D rendering and modeling
- An Architecture and Landscape Architecture Library of about 18,000 books, 70 magazine subscriptions and 36,000 slides
- Photographic and graphic reproduction equipment
- Individual studio spaces in the second through fifth years

## HIGH SCHOOL PREPARATION

We suggest that students take high school courses in digital drawing and animation, an art class, such as drawing from life, and math and science courses such as calculus, trigonometry and physics. If possible, we encourage high school students to take advance placement or college credit courses that could be substitutes for North Dakota State University General Education requirements.

## TRANSFER STUDENTS

Transfer applicants are required to enter the architecture program at the first-year level. Five years of study are required for completion of the degree. Advanced standing is possible through a portfolio and transcript review process.

## SELECTIVE ADMISSION

Approximately 64 architecture majors are selected for admission into the second year of the program. A student's eligibility is based on their overall grade point average (GPA) and their GPA for pre-architecture courses with the ENVD prefix. It is important to apply early, complete all freshman courses in the first year and maintain a solid academic record. Students must have a minimum 3.0 GPA to apply to the graduate school during the third or fourth year of the program.

## SPECIAL NOTICE

Students in the second year of the program will be required to purchase a laptop computer. Information on type of computer, software, purchase, and financing arrangements will be distributed to students prior to purchase.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Major Requirements

### Major: Architecture

**Degree Type:** B.S.Arch

**Minimum Degree Credits to Graduate:** 138

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

Total Credits		105

## Degree Requirements and Notes

- A grade of C or higher is required in all courses with an ARCH and ENVD prefix.
- If a student receives a grade of "D" or "F" in studio, he/she will be required to repeat the studio class the following year, before advancing to the next studio course.

## Art

### Department Information

- **Department Location:**  
Renaissance Hall
- **Department Phone:**  
701-231-8818
- **Department Web Site:**  
[www.ndsu.edu/visualarts/](http://www.ndsu.edu/visualarts/)
- **Credential Offered:**  
B.S.; B.A.; B.F.A.

- **Official Program Curriculum:**  
bulletin.ndsu.edu/undergraduate/program-curriculum/art/

The visual arts program at North Dakota State University offers a broad range of degree programs from art emphasis areas in graphic design, painting, printmaking, ceramics, drawing, sculpture and photography to a degree in Art Education. It provides a wide range of courses with the philosophy that a strong foundation in the development of creative strategy, digital literacy, design ability, critical thinking and art/design historical awareness will prepare our students for the art and design world today.

## The Program

With a vibrant major and minor program, the Visual Arts Department brings together students from every college in the University. As a primary career specialization, or as a supplement to some other major field, art and design is one of the most versatile areas of study. Housing in one of the finest facilities in the upper Midwest for art and design, the department is home to eight professional artists who teach every class we offer. We are an undergraduate program only, and are focused on the individual attention, modest class sizes and high quality advising for our undergraduate students.

## The Facilities

Renaissance Hall, a multi-million dollar, state-of-the-art facility, houses the Department of Visual Arts. The building provides well-equipped studio facilities for graphic design, drawing, painting, printmaking, photography, sculpture and ceramics. Our new digital media lab has been equipped with the most current output devices and the program has access to A second digital media studio, LAAVA Lab, provides a design thinking gathering space with high tech tools including 3D printing, laser cutting and virtual reality. The print shop houses several etching and litho presses as well as facilities for letterpress and silkscreen printing. The ceramic student is well equipped with three gas kilns and a wood burning kiln, clay mixing facilities and 25 throwing wheels. The large sculpture studio houses various types of welders, a plasma cutter and other tools for metal work, woodworking and carving in stone. A high-tech classroom for art history seats 75 and is also available for smaller classes. The department has its own gallery in the Renaissance Hall and has a partnership with the Memorial Union Gallery on main campus. A wide range of exhibitions, including national traveling exhibitions, and student and faculty shows are always available on and off campus. In close proximity to the Plains Art Museum, the department and the Plains work closely together, enhancing art experiences for the entire region.

## The Faculty

The faculty is composed of Department Head, Michael Strand, Kimble Bromley, Kent Kapplinger, Kristi Groberg, David Swenson, Meghan Duda and Andrew Stark. These faculty members are professional artists and academics active at regional, national and international levels in art exhibitions, art research, art organizations and critical writing. The art faculty prides itself in being very accessible to students at all times for individual consultation and critique.

## PEARS Program

The Printmaking Education and Research Studio (PEARS) is housed in the Department of Visual Arts. This specialized program broadens student exposure to artists working in the printmaking medium by facilitating collaborations to create editions of prints. The program provides classes and workshops for students, instructors and artists seeking both traditional and the latest in technological information. The program offers artist residencies, internships and studio rentals to qualified artists and promotes sales and exhibition of artwork produced in the studio.

## Career Opportunities

Art and Design students develop a range of skills from creative strategy to technical proficiency. These skills are broadly applicable to careers in many different disciplines. Potential careers include marketing, advertising, illustration, graphic design, user experience specialist, animation, arts marketing, art historian, commercial photography, museum and gallery work, exhibition design, art therapy, professional studio artist, municipal art programs, art criticism, independent art instruction, industrial design, art media research, arts organizations, university instruction and K-12 education.

## The Curriculum

With an early emphasis on technology and skills relevant in the 21st century, all students graduating from Visual Arts have a background in design. From this foundation, students select tracks including: K-12 education, graphic design/illustration, printmaking, painting, photography, ceramics, sculpture and drawing. The program offers a highly flexible and personal approach to each student's development. The middle of the program focuses on developing a portfolio strong enough to apply for the capstone experience which is either a three-credit or six-credit baccalaureate project and thesis exhibition during the senior year. The Tri-College University, which includes Concordia College, Minnesota State Community and Technical College, Minnesota State University Moorhead and North Dakota State College of Science offers students access to specialized courses not offered in the NDSU art curriculum.

## The Degrees

Students majoring in art have several degree options. The Bachelor of Fine Arts (BFA) is the professional degree requiring 75 hours in art with an emphasis in one or a combination of the following: graphic design, painting, ceramics, printmaking, sculpture, photography or drawing.

The Bachelor of Arts (BA) and the Bachelor of Science (BS) requires 57 hours in art with an emphasis in one of the following: graphic design, painting, ceramics, printmaking, sculpture, photography or drawing.

The BA also requires a competency in a foreign language through the intermediate level and the BS degree requires a minor in another discipline.

Art Education is offered as a BS degree in collaboration with the NDSU School of Education. A minimum of 120 credit hours are needed for graduation.

## Scholarships

The new multi-million dollar James Falck Endowment for Visual Arts is part of a new suite of scholarships for incoming freshman and existing visual arts majors. Scholarships are awarded based on academic excellence and portfolio review. For more information contact the NDSU Department of Visual Arts at (701) 231-8818 or email Kelly.Todd@ndsu.edu.

## Art Minor

The art minor has been recently updated to be completely flexible and serve as a unique “compliment” to any existing major. By being flexible, you can choose a path that suits your educational goals. For instance, a graphic design emphasis in your minor program would be an ideal compliment to many fields, including marketing, advertising, business, architecture and engineering.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Major Requirements

### Major: Art

Degree Type: B.A. or B.S.

Minimum Degree Credits to Graduate: 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12

- \* May be satisfied by completing courses in another General Education category.
- † General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Arts, Humanities, and Social Sciences

### Degree Requirements

**Bachelor of Science (B.S.) Degree** – The completion of a minor program of study, a second major, or a second degree is required.

**Bachelor of Arts (B.A.) Degree** – Second year language proficiency at college level required.

### Arts, Humanities and Social Sciences College Requirements

An additional 9 credits are required by the College of Arts, Humanities and Social Sciences for all Bachelor of Science and Bachelor of Arts degree programs of study, except the Bachelor of Fine Arts degree, the Bachelor of Music degree, the Bachelor of Science in Architecture degree, and the Bachelor of Science degree with a major in Environmental Design:

Code	Title	Credits
<b>AH&amp;SS College Requirements</b>		
Courses used to satisfy any general education requirement cannot be used to also count toward the AH&SS College Requirements. A minimum of three credits is required in each of the 3 following areas for a total of 9 credits. Choose only those courses with the prefixes listed for each area. A course with the WGS prefix can only be used in one area.		
<b>Area One: Humanities</b>		3
ARB, ENGL, FREN, GERM, HIST, HUM, PHIL, RELS, SPAN, or WGS		
<b>Area Two: Social Sciences</b>		3

[www.ndsu.edu/business/](http://www.ndsu.edu/business/)
- **Credential Offered:**  
Minor

Banks are the lifeblood of the economy. Today's commercial banks are more diverse than ever. Therefore there is a tremendous range of employment opportunities in this sector, starting at the branch level as a bank teller to a wide variety of other positions such as the credit analyst, personal banker, loan officer, mortgage originator, and so forth. As of January 2019, a total of 68,593 nationwide banking jobs are available on indeed.com (993 jobs in Minneapolis and 173 jobs in ND). Banks are actively recruiting management talent- especially in small and mid-sized towns.

B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/behavioral-statistics/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/behavioral-statistics/)

This degree is a joint effort between the Department of Statistics (p. 1128) and the Department of Psychology (p. 1126). It is recommended that a student wishing to obtain a degree in Behavioral Statistics consult with an advisor in both departments. This major prepares students for careers involving collecting and analyzing data on human behavior, for example, in Medicare, insurance, market research, or health, educational and social services. Graduates of this program are expected to have good quantitative reasoning skills and to have strong people skills. **Note:** *this curriculum also fulfills requirements for the major in Psychology.*

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

Minimum Degree Credits to Graduate: 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		6
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		6
<b>Wellness (W) <sup>†</sup></b>		2
<b>Cultural Diversity (D) <sup>*†</sup></b>		
<b>Global Perspectives (G) <sup>*†</sup></b>		
Total Credits		39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## College Requirements

Code	Title	Credits
<b>Bachelor of Arts (BA) Degree – An additional 12 credits Humanities and Social Sciences and proficiency at the second year level in a modern foreign language.*</b>		<b>12</b>
<b>Bachelor of Science (BS) Degree – An additional 6 credits in Humanities or Social Sciences *</b>		<b>6</b>

\* Humanities and Social Sciences may be fulfilled by any course having the following prefix: ADHM, ANTH, ARCH, ART, CJ, CLAS, COMM, ECON, ENGL, FREN, GEOG, GERM, HDFS, HIST, LA, LANG, MUSC, PHIL, POLS, PSYC, RELS, SOC, SPAN, THEA, WGS, or any course from the approved list of general education courses in humanities and social sciences (general education categories A and B). These credits must come from outside the department of the student's major.

## Major Requirements

Code	Title	Credits
<b>Behavioral Statistics Requirements</b>		
PSYC 111	Introduction to Psychology	3
PSYC Elective	200-400 Level Psychology Electives	6
PSYC 350	Research Methods I	3
PSYC 351	Research Methods II	3
PSYC Elective	400 Level Psychology Elective	3
STAT 330	Introductory Statistics (May satisfy general education category R)	3
STAT 331	Regression Analysis	2
STAT 462	Introduction to Experimental Design (Capstone)	3
STAT 470	Statistical SAS Programming	3
or STAT 471	Introduction to the R Language	
Select two courses from the following:		6
STAT 460	Applied Survey Sampling	
STAT 463	Nonparametric Statistics	
STAT 469	Introduction to Biostatistics	
STAT 472	Time Series	
<b>Select one course from 3 of the following 4 groups (A-D)</b>		
Group A - Social/Personality:		3
PSYC 453	Organizational Psychology	
PSYC 468	Personality	
PSYC 470	Experimental Social Psychology	
Group B - Perception/Cognition:		3
PSYC 460	Sensation & Perception	
PSYC 461	Memory And Knowledge	
PSYC 464	Attention & Thinking	
Group C - Biological Bases of Behavior:		3
PSYC 465	Psychobiology	
PSYC 481	Health Psychology	
PSYC 486	Neuropsychology	
Group D - Individual Differences:		3
PSYC 463	Experimental Developmental Psychology	
PSYC 471	The Psychology Of Aging	
PSYC 472	Advanced Psychopathology	
PSYC 473	Child Psychopathology and Therapy	
Capstone Experience: Select one of the following courses or have completed one course from each of the 4 groups (A-D):		2-3
PSYC 480	History & Systems	
PSYC 489	Honors Thesis	
<b>Related Courses Required</b>		
ANTH 111	Introduction to Anthropology (May satisfy general education category B and D)	3
BIOL 126	Human Biology (May satisfy general education category S)	3

CSCI 114 or MIS 116	Microcomputer Packages (May satisfy general education category S) Business Use of Computers	3
MATH 103	College Algebra (or higher level if needed as a prerequisite)	3
SOC 110	Introduction to Sociology (May satisfy general education category B)	3
Total Credits		64-65

### Program notes

- Except for courses offered only as pass/fail grading, no course may be taken Pass/Fail.

## Biochemistry and Molecular Biology

### Department Information

- **Department Location:**  
Ladd Hall
- **Department Phone:**  
701-231-8694
- **Department Email:**  
ndsu.chemistry@ndsu.edu
- **Department Web Site:**  
www.ndsu.edu/chemistry/
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
bulletin.ndsu.edu/undergraduate/program-curriculum/biochemistry-molecular-biology/

Biochemistry is concerned with the chemistry of the materials fundamental to life and contributes toward the understanding of the structure and functioning of all organisms. Because of the rapid advances in the areas of biotechnology, molecular biology and genetic engineering, biochemistry is an exciting area for study and research.

### Background Information

The undergraduate program in biochemistry at North Dakota State University is planned for students who are seeking careers in the life sciences, agriculture, medicine or health related fields. The program is also suited for students who are contemplating advanced graduate degrees in biochemistry, botany, zoology and microbiology, or professional degrees in dentistry and medicine.

The biochemistry program is offered by the Department of Chemistry and Biochemistry.

### The Program

Students with an interest in biochemistry earn the Bachelor of Science degree in biochemistry and molecular biology. This provides flexibility in the selection of courses for those students who plan to seek employment in areas related to biochemistry, enter graduate or medical school, or teach in high schools or higher education institutions. The program provides training in biochemistry, botany, microbiology, zoology or in applied areas according to the student's interest. In addition to the courses in chemistry, physics and mathematics, an additional 16 credits in biological sciences, 18 credits of electives in the humanities and social sciences, nine credits in English, three credits in speech and two credits in wellness are required. The pre-medical student is encouraged to take a year of upper-level zoology.

All undergraduates in biochemistry and molecular biology receive assistance in planning and scheduling classes from faculty advisors. In addition to course work and laboratory courses, students also have the opportunity to learn by conducting research in various areas of biochemistry under faculty guidance.

### Faculty and Facilities

The Department of Chemistry and Biochemistry is well staffed with 17 faculty members. All of the faculty have doctorate degrees from well-known universities. Most of them have considerable experience in postdoctoral or industrial research.

The research and teaching facilities for the department are housed in four buildings— A. Glenn Hill Center, Ladd Hall, Dunbar Laboratories, and the Quentin Burdick Building.

Advanced instruments and facilities are readily available. These include ultracentrifuges; gene synthesizer; nuclear magnetic, infrared, ultraviolet and mass spectrometers; gas and liquid chromatographs; computers; recombinant DNA and cell and tissue culture laboratories; and an advanced electron microscope facility.

## Career Opportunities

Employment opportunities for biochemists are found at higher education institutions within the chemistry, biochemistry and biological sciences departments; in medical schools, hospitals, research institutes and government research laboratories; and in other health, energy, environment and agricultural research programs. Biochemists are employed at all levels in industries concerned with food processing, manufacturing, genetic engineering and marketing of drugs, cosmetics and pesticides, as well as in the petroleum and allied industrial complexes.

Earnings of persons trained in biochemistry vary, and the salary level depends largely upon the amount of formal training a person has received. Entry-level salaries for biochemists average \$44,100 per year, based on 2016 data from [www.payscale.com](http://www.payscale.com). For biochemists who have an advanced degree, salaries and opportunities are much greater.

## High School Preparation

A strong high school background in English, mathematics (through trigonometry, if possible), biology, chemistry and physics is recommended.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>Freshman</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>

bulletin.ndsu.edu/programs-study/undergraduate/biochemistry-molecular-biology/#planofstudytext

### Major Requirements

#### Major: Biochemistry & Molecular Biology

**Degree Type:** B.A. or B.S.

**Minimum Degree Credits to Graduate:** 120

#### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## University General Education Requirements

\* May be satisfied by completing courses in another General Education category.

<sup>†</sup> General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## College Requirements

Code	Title	Credits
<b>Bachelor of Arts (BA) Degree – An additional 12 credits Humanities and Social Sciences and proficiency at the second year level in a modern foreign language. *</b>		12
<b>Bachelor of Science (BS) Degree – An additional 6 credits in Humanities or Social Sciences *</b>		6

\* Humanities and Social Sciences may be fulfilled by any course having the following prefix: ADHM, ANTH, ARCH, ART, CJ, CLAS, COMM, ECON, ENGL, FREN, GEOG, GERM, HDFS, HIST, LA, LANG, MUSC, PHIL, POLS, PSYC, RELS, SOC, SPAN, THEA, WGS, or any course from the approved list of general education courses in humanities and social sciences (general education categories A and B). These credits must come from outside the department of the student's major.

## Major Requirements

Code	Title	Credits
<b>Biochem &amp; Molecular Biology Requirements</b>		
BIOC 460	Foundations of Biochemistry and Molecular Biology I	3
BIOC 460L	Foundations of Biochemistry I Laboratory	1
BIOC 461	Foundations of Biochemistry and Molecular Biology II	3
BIOC 473	Methods of Biochemical Research	3
BIOC 474	Methods of Recombinant DNA Technology	3
BIOC 483	Cellular Signal Transduction Processes and Metabolic Regulations	3
BIOC 487	Molecular Biology of Gene Expression	3
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	4
Select one of the following:		4
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory	
CHEM 150 & CHEM 160	Principles of Chemistry I and Principles of Chemistry Laboratory I	
Select one of the following:		4
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory	

CHEM 151 & CHEM 161	Principles of Chemistry II and Principles of Chemistry Laboratory II	
CHEM 341	Organic Chemistry I	3
CHEM 342	Organic Chemistry II	3
CHEM 353	Majors Organic Chemistry Laboratory I	1
CHEM 354	Majors Organic Chemistry Laboratory II	2
CHEM 465	Survey of Physical Chemistry	4
CHEM 380	Chemistry Junior Seminar	1
CHEM 431	Analytical Chemistry I	3
CHEM 491	Seminar	2
ENGL 321 or ENGL 324	Writing in the Technical Professions (May satisfy general education category C) Writing in the Sciences	3
MATH 165	Calculus I (May satisfy general education category R)	4
MATH 166	Calculus II	4
MICR 350 & 350L	General Microbiology and General Microbiology Lab	5
PHYS 251 & 251L	University Physics I and University Physics I Laboratory (May satisfy general education category S)	5
PHYS 252 & 252L	University Physics II and University Physics II Laboratory (May satisfy general education category S)	5
STAT 330	Introductory Statistics (May satisfy general education category R)	3
BIOL 315 or PLSC 315	Genetics Genetics	3
<b>Upper-Level Science Electives</b>		
300-400 level courses in BIOL, BIOC, BOT, ZOO, CHEM, CSCI, MICR, PSCI, PHYS, PPTH, or STAT. No more than 6 credits from one prefix may apply. Research credits (CHEM 494/BIOC 494; CHEM 493/BIOC 493) may count towards 3 of these credits.		9
Total Credits		91

\* CHEM 364 Physical Chemistry I & CHEM 365 Physical Chemistry II will satisfy this requirement and 2 credits of upper-level science electives.

### Degree Notes:

- Except for courses offered only as pass/fail grading, no course may be taken Pass/Fail.

## Minor Requirements

### Biochemistry Minor

#### Minor Requirements

Required Credits: 16

Code	Title	Credits
<b>Required Courses</b>		
All minor courses must be selected in consultation with a Biochemistry adviser.		16
Total Credits		16

#### Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- The student and adviser will complete a substitution form with the courses to be used for the biochemistry minor. This form will also require the signature of the department chairperson before being submitted to the Office of Registration and Records for verification of minor program completion.
- Note: This minor will not be available for view in the Student Advisement/Requirement Report in Campus Connection.

## Biological Sciences

Department Information

- **Department Location:**  
Stevens Hall
- **Department Phone:**  
701-231-7087
- **Department Web Site:**  
[www.ndsu.edu/biology/](http://www.ndsu.edu/biology/)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/biological-sciences/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/biological-sciences/)

Biological sciences is a comprehensive field that prepares students for a variety of careers. Growing human populations and the increasing impacts associated with human activities and heightened expectations of health and environmental quality are resulting in new career opportunities in the Biological Sciences. These fields are growing, and our students finish their degrees well prepared to excel in these careers. The program provides hands-on experience in biological research and focuses on student experience and interests. This represents an exciting, rewarding area of science, which requires an especially strong academic background and an ability to think both analytically and comprehensively.

## CAREER Opportunities

This option provides an excellent foundation for a variety of careers. Our students continue on for careers as medical doctors, optometrists, dentists, genetic counselors, state and federal wildlife biologists, naturalists, wildlife rehabilitators, directors of zoological parks, conservation biologists, environmental consultants, teachers, and researchers. Students leave well-prepared to continue in graduate degree programs that require a solid background in the biological sciences. In fact, most professional scientists can anticipate graduate education as being essential for career advancement.

## High School Preparation

High school students should take year-long courses in biology, chemistry, physics, algebra, advanced algebra, geometry and trigonometry. If available, an advanced science course and pre-calculus are encouraged. There should be an above-average performance in such course work, as well as in the student's overall high school program. An ACT composite score of 24 or higher also is suggested.

## The Program

With its many areas of emphasis, the program integrates studies in zoology, botany, and biological sciences and offers students the flexibility to customize their field of study to align course selection with educational and professional goals. The program integrates broad-based biology foundation classes with specializations, such as biomedical science or conservation biology, in later years. With appropriate course selection, the biological sciences degree provides a broad understanding of the complex relationship between the living and nonliving world. Students choose a research-based course in biology that focuses on antibiotics, wild-life ecology and conservation, STEM education, or genomics. Students also have the option to choose an emphasis in Biomedical Science, Ecology and Conservation Science, or Environmental Science. Students planning to enter a health-professional program, such as medical school, should refer to the plan of study for pre-professional programs.

## Related Experiences

Career opportunities are enhanced by work experiences and extra-curricular involvement. Part-time, science-related work experiences are available in several North Dakota State University departments, as well as at the nearby U.S. Department of Agriculture laboratories. Off-campus work, such as summer employment with public agencies or private organizations, is especially valuable and has sometimes been the entry point for a first permanent position after graduation. NDSU offers many extra-curricular activities, including science-related organizations such as the Natural Resources Management Club, the Pre-Med Club, the Student Chapter of the Wildlife Society, and the Range Science Club.

## Accelerated Program

The Department of Biological Sciences now offers an Accelerated Bachelor and Master of Science program. The program allows students to begin thesis research during their junior year and simultaneously pursue their Bachelor of Science and Master of Science degrees in biological sciences. Students will work closely with a faculty member in our department who will serve as a mentor. The program is designed to produce a research-based master's degree. Students must be at junior standing with a minimum cumulative GPA of 3.5.

## Emphases Available

A Biological Sciences degree is available in a traditional broad-based sequence or with an emphasis on Biomedical Science, Ecology and Conservation Science, or Environmental Science. There are also minors available in biological sciences, zoology, and botany.

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>First Year</b>

# Biological Sciences

## Department Information

- **Department Location:**  
Stevens Hall
- **Department Phone:**  
701-231-7087
- **Department Web Site:**  
[www.ndsu.edu/biology/](http://www.ndsu.edu/biology/)
- **Credential Offered:**  
B.S.; B.A.
- **Plan Of Study Sample:**  
[bulletin.ndsu.edu/programs-study/undergraduate/biological-science/](http://bulletin.ndsu.edu/programs-study/undergraduate/biological-science/)

## Major Requirements

### Major: Biological Sciences - Standard

**Degree Type:** B.A. or B.S.

**Minimum Degree Credits to Graduate:** 120

#### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

#### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

#### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10

<b>Humanities and Fine Arts (A) †</b>	6
<b>Social and Behavioral Sciences (B) †</b>	6
<b>Wellness (W) †</b>	2
<b>Cultural Diversity (D) **†</b>	
<b>Global Perspectives (G) **†</b>	
Total Credits	39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## College Requirements

Code	Title	Credits
<b>Bachelor of Arts (BA) Degree – An additional 12 credits Humanities and Social Sciences and proficiency at the second year level in a modern foreign language.*</b>		12
<b>Bachelor of Science (BS) Degree – An additional 6 credits in Humanities or Social Sciences *</b>		6

\* Humanities and Social Sciences may be fulfilled by any course having the following prefix: ADHM, ANTH, ARCH, ART, CJ, CLAS, COMM, ECON, ENGL, FREN, GEOG, GERM, HDFS, HIST, LA, LANG, MUSC, PHIL, POLS, PSYC, RELS, SOC, SPAN, THEA, WGS, or any course from the approved list of general education courses in humanities and social sciences (general education categories A and B). These credits must come from outside the department of the student's major.

## Major Requirements

Except for courses offered only as pass/fail grading, no course may be taken Pass/Fail

Code	Title	Credits
<b>Biological Sciences Core Requirements</b>		
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	4
BIOL 151 & 151L	General Biology II and General Biology II Laboratory	4
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory (May satisfy general education category S)	4
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory (May satisfy general education category S)	4
MATH 146 or MATH 165	Applied Calculus I (May satisfy general education category R) Calculus I	4
STAT 330	Introductory Statistics	3
BIOL 189	Skills for Academic Success <sup>1</sup>	1
BIOL 270 or BIOL 271 or BIOL 272 or BIOL 273	Undergraduate Research Experience: Antibiotic Drug Discovery Wildlife Ecology and Conservation: An undergraduate research course Research Experience: Learning in Biology Undergraduate Research Course: Genomic Analysis	3
BIOL 315 & 315L	Genetics and Genetics Laboratory	4
BIOL 359	Evolution	3
<b>Select one of the emphasis areas listed below to complete the major requirements</b>		12-51
Total Credits		46-85

<sup>1</sup> BIOL 189 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take BIOL 189.

**Standard emphasis**

<b>Code</b>	<b>Title</b>	<b>Credits</b>

CHEM 431 & 431L	Analytical Chemistry I and Analytical Chemistry I Laboratory (or)	
GEOL 428	Geochemistry	
BIOL Courses	Choose an additional 12 credits of 300 - 400 level BIOL courses offered by the department	12
Total Credits		53-63

## Department NOTES

- Students may not minor in biology with this major.

## Minor Requirements

### Biological Sciences Minor

#### Minor Requirements

Required Credits: 17

Code	Title	Credits
<b>Required Courses</b>		
BIOL 150	General Biology I	3
BIOL 150L	General Biology I Laboratory	1
BIOL 151	General Biology II	3
BIOL 151L	General Biology II Laboratory	1
Select one of the following:		3-4
BIOL 414	Plant Systematics	
BIOL 461	Plant Ecology	
BIOL 472	Structure and Diversity of Plants and Fungi	
PLSC 380	Principles of Plant Physiology	
Electives	Department approved 300-400 level courses	6
Total Credits		17

#### Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- Botany and Zoology majors may not minor in Biological Sciences.

## Biological Sciences Education

#### Department Information

- **Department Location:**  
Katherine Kilbourne Burgum Family Life, 4-H Center
- **Department Phone:**  
701-231-7921
- **Department Web Site:**  
[www.ndsu.edu/education/](http://www.ndsu.edu/education/)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/biological-sciences-education/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/biological-sciences-education/)

Biological sciences, in the broadest sense, is the study of life. As such, it is a subject of great diversity and requires a background in many academic disciplines.

#### The Program

Candidates in the Biological Sciences education major are prepared to teach a diverse curriculum to a diverse student population. The Biological Sciences education student should work closely with their advisor to be sure that the general education courses taken will provide a strong foundation for advanced courses in the major.

#### Professional Education Courses

Students have to enroll in the 300-level professional education courses before applying to be formally admitted to the School of Education (SOE). Prior to enrolling in the 400-level courses, students must complete the application for admission to the SOE; attain a minimum of a 2.75 grade point average overall in their course work and education courses, and pass the Praxis Core Academic Skills for Educators exam(s). Requirements for admission can be found on the School of Education website (<https://www.ndsu.edu/education>).

#### STUDENT TEACHING

Student teaching is the culmination of the teacher preparation program. Students have the opportunity to apply knowledge and skills acquired in college courses under the supervision of an experienced biological sciences educator.

## STUDENT ADVISEMENT

Students will be assigned individual advisors who will work with them closely in program planning and in other ways to advise and assist them. Students are encouraged to seek their advisor's help whenever needed.

## CERTIFICATION

Upon completing this program, graduates are eligible for teacher licensure from the North Dakota Education Standards and Practices Board (ESPB). The program is accredited by the Council for the Accreditation of Educator Preparation (CAEP).

## Career Opportunities

Students who major in Biological Sciences education get hired to teach biological science courses at the middle and high school level. To expand their choices, students can take the General Science licensure exam to become eligible to teach multiple science disciplines at the middle or high school levels, or can elect to double major in Biological Sciences Education and Biological Sciences or add coursework in other fields of science to increase teacher licensure areas. One can also work in a variety of employment positions with the Biological Sciences major.

<b>First Year</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>

## Major Requirements

### Major: Biological Sciences Education

Degree Type: B.A. or B.S.

Minimum Degree Credits to Graduate: 122

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>

Total Credits

100-101

## Degree Requirements and Notes

- See School of Education (<https://www.ndsu.edu/education>) for admission requirements.
- Courses taken P/F may not be used to satisfy any requirements.
- A grade of 'C' or better is required in all professional education courses.
- To be placed in student teaching, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required.
- To exit the program, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required as well as completing the Praxis Subject test and the Principles of Learning and Teaching test.

## Biomedical Engineering

### Department Information

- **Department Phone:**  
701-231-8839
- **Department Web Site:**  
[www.ndsu.edu/coe/bme](http://www.ndsu.edu/coe/bme)

Minor
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/biomedical-engineering/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/biomedical-engineering/)

Biomedical engineering is highly relevant to the 21<sup>st</sup> century research and education needs of the citizens of North Dakota and providing opportunity to students in one of the highest demand fields today. The current high quality education received by engineering students at NDSU will be augmented with the biomedical engineering minor allowing graduates to more readily be able to contribute to the global demand for medical technologies and innovations. Employers are supportive and encouraging the addition of biomedical minor at NDSU.

ME 331	Materials Science and Engineering	
ME 468	Introduction to Biomechanics	
ME 480	Biofluid Mechanics	
ME 486	Nanotechnology and Nanomaterials	
MICR 445	Animal Cell Culture Techniques	
Undergraduate Research: ENGR 193, 293, 393, 493, 194, 294, 394 or 494		
<b>Total Credits</b>		<b>21</b>

### Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- Course pre-requisites apply.
- At least 12 credits that apply to this minor must be unique from courses that apply to the student's major.

## Biotechnology

### Department Information

- **Department Location:**  
Van Es Hall
- **Department Phone:**  
701-231-8892
- **Department Web Site:**  
[www.ndsu.edu/majors/biotech/](http://www.ndsu.edu/majors/biotech/)
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/biotechnology/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/biotechnology/)

Biotechnology is an interdisciplinary field that uses a combination of biology and technology to design and produce new molecules, plants, animals and microorganisms with improved characteristics. Biotechnology offers seemingly unlimited opportunities to combine genes from related or unrelated species to produce useful organisms with desirable properties that were not previously found in nature.

## Background

Biotechnology may be thought of as a collection of technologies using animal and/or plant cells, biological molecules, molecular biology processes and genetic engineering for applications in medicine, agriculture and the pharmaceutical industry. The technologies include the use of recombinant DNA for gene cloning and gene transfers between organisms; culture of plant and animal cells and tissues; fusion of animal cells or plant protoplast; the regeneration of whole plants from single cells and the large-scale fermentation processes that use some of these novel organisms for the production of pharmaceuticals, diagnostic tests for diseases, feed additives, enzymes and hormones.

Examples of successful biotechnology include the development of crop plants that are resistant to herbicides or insects, the production of human growth hormone and insulin by genetically engineered bacteria and the development of unique vaccines.

## The Program and Curriculum

The biotechnology program is offered through both the College of Agriculture, Food Systems, and Natural Resources and the College of Science and Mathematics and leads to a Bachelor of Science degree.

The recommended course of study includes both the education in science and mathematics, as well as introduction to the special skills that are needed to enter the rapidly expanding and changing field of biotechnology. In addition to the required courses, students may select from a variety of specialized elective science courses to help develop a particular area of interest. Students majoring in biotechnology are required to perform a research project in the laboratory of a faculty advisor. The results of the research project are incorporated into a senior thesis and presented at the Biotechnology Seminar.

## The Faculty and Facilities

A faculty advisor is assigned to each student to assist in scheduling, registration and career development. Faculty in each of the cooperating life-science departments have been identified to serve as academic and research advisors for students who select the biotechnology major. The faculty advisor and the director of the biotechnology program regularly review the progress of each student.

The faculty who advise, teach and serve as research mentors for the biotechnology program are spread among several academic departments in the College of Agriculture, Food Systems, and Natural Resources, the College of Science and Mathematics and the College of Health Professions. The departments include plant sciences; biological sciences, biology, chemistry, biochemistry and molecular biology; animal and range sciences; plant pathology; veterinary and microbiological sciences; and pharmaceutical sciences. Several scientists at the North Dakota State University Center for Nanoscale Science and Engineering and at the on-campus USDA facilities also serve as research mentors.

Laboratory facilities and specialized equipment are used for instruction and research. These include animal and plant tissue culture facilities, small animal housing, electron and confocal microscopes, automated DNA sequencing equipment, equipment for performing microarray experiments, and NDSU Core Labs. The Core Labs are shared cutting-edge research facilities and include the Advanced Imaging and Microscopy Core, Core Biology Facility, Core Synthesis and Analytical Services and the Electron Microscopy Core Laboratory, among many other state-of-the-art facilities and equipment.

## Career Opportunities

Biotechnology continues to rapidly develop into new research areas. Surveys indicate there will be a continuing high demand for well-educated personnel. Job opportunities are found in life science departments in colleges and universities; private and government research institutes; food production, pharmaceutical and agri-chemical industries; and in the biotechnology industries. Graduates of this program have the educational background and laboratory experience to take advantage of any of these job opportunities. Graduates of the biotechnology program are now successful and productive scientists at pharmaceutical, agri-chemical and biotechnology companies, and at government and private research institutions throughout the country.

The majority (approximately 60 percent) of graduates from the biotechnology program choose to continue their education in graduate or professional schools. Graduates of the biotechnology program have earned master's and doctoral degrees in many diverse areas, including cellular and molecular biology, biology, microbiology, plant sciences, animal physiology, cancer biology and virology at many of the most respected universities in the United States. Graduates of our program are now established and productive professors, physicians and veterinarians.

## High School Preparation

Students entering the biotechnology program should have a strong background in mathematics, including trigonometry, biology, chemistry, physics, writing and computer courses. A composite ACT score of 26 or higher is recommended.

First Year			
Fall	Credits	Spring	Credits
MICR 189	1	BIOL 151	3

## Major Requirements

### Major: Biotechnology

**Degree Type:** B.S.

**Minimum Degree Credits to Graduate:** 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking

<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		6
<b>Wellness (W) <sup>†</sup></b>		2
<b>Cultural Diversity (D) <sup>*†</sup></b>		
<b>Global Perspectives (G) <sup>*†</sup></b>		
Total Credits		39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

**Major requirements**

<b>Code</b>	<b>Title</b>	<b>Credits</b>
<b>Biotechnology Requirements</b>		
BIOC 460	Foundations of Biochemistry and Molecular Biology I	3
BIOC 461	Foundations of Biochemistry and Molecular Biology II	3
BIOC 474	Methods of Recombinant DNA Technology	3
CHEM 465	Survey of Physical Chemistry	4
MICR 350 & 350L	General Microbiology and General Microbiology Lab	5
MICR 470	Basic Immunology	3
MICR 471	Immunology and Serology Laboratory	2
MICR 482	Microbial Genetics	3
MICR 491	Seminar (Biotechnology)	1-5
Choose one of the following:		3
MICR 493 & MICR 494	Undergraduate Research and Individual Study (2-4 cr. of 493 (research) and 1 cr. of 494 (thesis))	
MICR 497	FE/Coop Ed/Internship	
<b>Supporting Requirements</b>		
MICR 189	Skills for Academic Success <sup>1</sup>	1
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	4
BIOL 151 & 151L	General Biology II and General Biology II Laboratory	4
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory (May satisfy general education category S)	4
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory (May satisfy general education category S)	4
CHEM 341 & 341L	Organic Chemistry I and Organic Chemistry I Laboratory	4
CHEM 342	Organic Chemistry II	3
CSCI 114 or CSCI 122	Microcomputer Packages Visual BASIC	3
Select one from the following: (May satisfy general education category R)		8
MATH 146 & MATH 147	Applied Calculus I and Applied Calculus II	
MATH 165 & MATH 166	Calculus I and Calculus II	
Select one from the following: (May satisfy general education category S)		4 or 5
PHYS 211 & 211L	College Physics I and College Physics I Laboratory	
PHYS 251 & 251L	University Physics I and University Physics I Laboratory	
Select one from the following: (May satisfy general education category S)		4 or 5
PHYS 212 & 212L	College Physics II and College Physics II Laboratory	
PHYS 252 & 252L	University Physics II and University Physics II Laboratory	
PLSC 315 & 315L	Genetics and Genetics Laboratory (May satisfy general education category S)	4
STAT 330	Introductory Statistics (May satisfy general education category R)	3
<b>Major Elective in Physiology: Select 3 credits from the following:</b>		3
BOT 380	Plant Physiology	
ZOO 460	Animal Physiology	
MICR 480	Microbial Physiology	

**Major Elective in Biotechnology Technique: Select 4-6 credits from the following:** 4-6

BIOC 473	Methods of Biochemical Research
BIOC 487	Molecular Biology of Gene Expression
MICR 445	Animal Cell Culture Techniques
PLSC 411	Genomics
PLSC 484	Plant Tissue Culture and Biotechnology

**Additional Humanities & Fine Arts or Social & Behavioral Sciences Credits** 6

An additional 6 credits from these General Education categories is required for earning a B.S. degree from either the College of Agriculture, Food Systems, and Natural Resources or the College of Science and Mathematics.

Total Credits 93-101

<sup>1</sup> MICR 189 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take AGRI 189.

**Degree Notes:**

- The Bachelors of Science degree is the default degree type for this program of study. However, a Bachelor of Arts degree is available if the degree is being earned from the College of Science & Mathematics.
- Bachelor of Arts (B.A.) Degree Requirements: An additional 12 credits of Humanities and/or Social Sciences courses and proficiency of a modern foreign language at the second year level (example: SPAN 201 & 202). Courses for the Humanities and/or Social Sciences may be fulfilled by any course having the following prefix: ADHM, ANTH, ARCH, ART, CJ, CLAS, COMM, ECON, ENGL, FREN GEOG, GERM, HDFS, HIST, LA, LANG, MUSC, PHIL, POLS, PSYC, RELS, SOC, SPAN, THEA, WGS, or any course from the current Humanities & Fine Arts (A) and/or Social & Behavioral Sciences (B) General Education list.

**Minor Requirements****Biotechnology Minor****Required Credits: 21**

Code	Title	Credits
BIOC 460 & 460L	Foundations of Biochemistry and Molecular Biology I and Foundations of Biochemistry I Laboratory	4
BIOC 461	Foundations of Biochemistry and Molecular Biology II	3
PLSC 315 & 315L	Genetics and Genetics Laboratory	4

**Biotechnology Technique Electives: Select 4 credits from the following:** 4

BIOC 473	Methods of Biochemical Research
BIOC 474	Methods of Recombinant DNA Technology
MICR 445	Animal Cell Culture Techniques
PLSC 484	Plant Tissue Culture and Biotechnology

**Specialized Electives: Select 6 credits from the following:** 6

MICR 470	Basic Immunology
MICR 471	Immunology and Serology Laboratory
MICR 482	Microbial Genetics
PPTH 324	Introductory Plant Pathology
PLSC 380	Principles of Plant Physiology
ZOO 370	Cell Biology
ZOO 460	Animal Physiology

Total Credits 21

**Minor Requirements and Notes**

- A minimum of 8 credits must be taken at NDSU.

# Botany

## Department Information

- **Department Location:**  
Stevens Hall
- **Department Phone:**  
701-231-7087
- **Department Web Site:**  
[www.ndsu.edu/biology/](http://www.ndsu.edu/biology/)
- **Credential Offered:**  
Minor
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/botany/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/botany/)

The botany minor is the study of plants including plant structure, function, systematics and ecology. Students study a wide variety of activities such as the relationship of plants to each other and their environment, plant growth and metabolism, classification and identification of plants, plant cell composition and plant heredity.

# Botany

300-400 Elective: Select from the following:		3
BIOL 364	General Ecology	
BIOL 414	Plant Systematics	
BIOL 461	Plant Ecology	
BIOL 472	Structure and Diversity of Plants and Fungi	
BIOL 475	Conservation Biology	

## Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- Botany majors may not minor in Botany or Biology.

## Business Administration

### Department Information

- **Department Location:**  
Richard H. Barry Hall
- **Department Phone:**  
701-231-8651
- **Department Web Site:**  
[www.ndsu.edu/business/](http://www.ndsu.edu/business/)
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/business-administration/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/business-administration/)

The global economy offers a vast array of career opportunities for professionals with a collegiate education in business. Businesses need individuals who not only understand the fundamentals of business practice, but who are adaptable in rapidly changing business environments. The business administration program has evolved to meet the needs of business firms and students by providing our students with a broad knowledge base in accounting, finance, management, marketing, entrepreneurship, management information systems, and business law – with a blend of theory and practice. A broad understanding of business is particularly of value for individuals who operate in entrepreneurial firms, smaller enterprises, and organizations that need flexibility and multi-functional knowledge from their employees. Individuals who aspire to own their businesses or go on to graduate studies (e.g., law school) would also benefit from such broad business knowledge base. A success measure of this program is the successful placement of our graduates in business and non-profit organizations, the pursuit of their own businesses and graduate studies, and their enhanced abilities to manage business operations, analyze business opportunities/challenges, work as a team, and make sound decisions.

### Background Information

The Association to Advance Collegiate Schools of Business (AACSB International) accredits the undergraduate and graduate programs in the College of Business at North Dakota State University. Our College of Business is one of only two AACSB-accredited schools of business in North Dakota.

AACSB International is one of higher education's most prestigious and rigorous accrediting bodies, emphasizing a commitment to continuous improvement, innovation, engagement, and impact in business education. Less than 10 percent of business programs worldwide have this accreditation, highlighting the academic excellence of our College of Business at NDSU.

### The Program

The Business Administration major is a four-year program with a curricular blend of general education, pre-professional course work, fundamental business knowledge (accounting, finance, management, marketing, and information systems), international business, and business elective courses.

The curriculum of this major is also designed with a 21-credit business elective block plus 3 credits of 300/400 level free electives built into the program. These electives allow students to pursue their personal or professional interest in certain business domains, which can be in forms of a specific track (e.g., Supply Chain Management), certificate/minor (e.g., Professional Selling and Sales, Entrepreneurship, and Finance), and/or topic-based courses fitting the business knowledge/skills they want to develop. The program nurtures important business skills and administrative competencies including managing/overseeing business enterprises, ability to analyze business opportunities/challenges, legal and international awareness, interpersonal skills, and teamwork. Business Administration students are thus prepared to perform and manage various administrative and functional activities in business enterprises and non-profit organizations.

### ONLINE OPTION

The Business Administration major is also available in an online delivery. For more information, see here (<https://www.ndsu.edu/business/programs/undergraduate/majors/online>).

### Selective Admission

Students who wish to study business administration at NDSU enroll as pre-business students in the College of Business for their first semester of their freshman year. Admission to the professional program requires the successful completion of the pre-professional course requirements (ENGL 120,

COMM 110, MATH 144, ECON 201 or 202, and PSYC 111 or SOC 110) and a minimum cumulative grade point average (GPA) of 2.5. Transfer students may also be eligible for immediate admission in the professional program. Contact a College of Business professional advisor for more information.

## The Faculty

To provide a rigorous and relevant educational experience to our students, faculty in our program are highly qualified in their respective areas of expertise. Our faculty have been recognized for their teaching excellence by their students and colleagues and for their outstanding research by their peers. They employ a wide variety of instructional techniques and embed both classical and cutting-edge knowledge into their classes. They remain current in their fields by actively engaging in research and/or with firms and business professionals regarding their business practice, challenges, and issues.

## The Practicum

Business administration majors are encouraged to complete practicum experiences, ideally at the end of sophomore and junior years. The practicum is designed to enable our students to connect business concepts learned in the classroom with live business situations and to broaden their horizons beyond the classroom setting. The practicum also gives students a competitive edge in job placement.

## Career Opportunities

Graduates with a business administration major have career opportunities in business, industry, government service and the non-profit sector, both regionally and globally. Employment opportunities for business administration majors are significant as business-related activities and administrative functions are needed in every type of business and organization, whether for-profit or not-for-profit. Major job categories include business operations, business analyst, human resource management, product/service management, retail management, small business owner, and entrepreneurship venture.

## Minor in Business Administration

A minor in business administration can be a perfect choice for students with non-business majors who want to enhance their marketability through business knowledge and skills. The curricular details are available at <https://www.ndsu.edu/business/programs/>. This minor is not available to students with majors in the College of Business.

## The College

In addition to the business administration major, the College of Business offers undergraduate majors in accounting, finance, global business (second major only), management, marketing and management information systems. The College of Business also offers five graduate programs including Master of Business Administration, Master of Accountancy, Master of Managerial Logistics, Master of Transportation and Urban Systems, and Doctorate in Transportation and Logistics.

## High School Preparation

It is recommended that high school students interested in studying business administration at the university level take mathematics courses at least through pre-calculus. High school electives in the social sciences, communication, and English also would be of benefit. Students who have satisfactorily completed Advanced Placement courses in Calculus, Economics, English, Communication, and Psychology or Sociology may directly apply for admission to the professional program. Please speak with a professional advisor in the College of Business for more information.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Major Requirements

### Major: Business Administration

Degree Type: B.S.

Minimum Credits Required for Degree: 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.

3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		<b>12</b>

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Major Requirements

Code	Title	Credits
All courses taken for the Business Administration Major require a grade of C or better. A minimum 2.5 cumulative GPA is required for admission to the professional program, to enroll in 300-400 level courses and to graduate.		
<b>Admission to the Professional Program Requirements</b>		
COMM 110	Fundamentals of Public Speaking (May satisfy general education category C)	3
ECON 201	Principles of Microeconomics (May satisfy general education category B and G)	3
or ECON 202	Principles of Macroeconomics	
ENGL 120	College Composition II (May satisfy general education category C)	3
MATH 144	Mathematics for Business	4
PSYC 111	Introduction to Psychology (May satisfy general education category B)	3
or SOC 110	Introduction to Sociology	
<b>Business Administration Major Requirements</b>		
ACCT 200	Elements of Accounting I	3
ACCT 201	Elements of Accounting II	3
MIS 116	Business Use of Computers (May satisfy general education category S)	3
PHIL 216	Business Ethics (May satisfy general education category A)	3
STAT 330	Introductory Statistics (May satisfy general education category R)	3
STAT 331	Regression Analysis	2
ECON 201	Principles of Microeconomics <sup>1</sup>	3
or ECON 202	Principles of Macroeconomics	
PSYC 111	Introduction to Psychology <sup>1</sup>	3

or SOC 110	Introduction to Sociology	
ENGL 320	Business and Professional Writing (May satisfy general education category C)	3
Admission to the Professional Program required prior to taking the following courses:		
FIN 320	Principles of Finance <sup>2</sup>	3
MGMT 320	Foundations of Management <sup>2</sup>	3
MRKT 320	Foundations of Marketing <sup>2</sup>	3
MIS 320	Management Information Systems <sup>2</sup>	3
BUSN 430	Legal and Social Environment of Business <sup>2</sup>	3
BUSN 489	Strategic Management <sup>2</sup>	3
BUSN 340	International Business	3
BUSN 431	Business Law I-Contracts, Property and Torts	3
MGMT 470	Entrepreneurship/Small Business Management	3
<b>Business Administration Electives (300 - 400 level)</b>		<b>21</b>
These 21 credits must include at least three different CoB prefixes: BUSN, MGMT, MRKT, ACCT, FIN, MIS, ENTR (includes courses cross-listed with CoB courses).		
<b>Business Administration Elective (300 - 400 level)</b>		<b>3</b>
This 300 - 400 level elective can be external to the CoB and must be satisfied with a single 3-credit 300 - 400 level course. It cannot be used to satisfy other requirements (includes courses cross-listed with CoB courses).		
Total Credits		93

<sup>1</sup> Take the second course of the pair, which was not taken for admission to the professional program.

<sup>2</sup> Denotes Common Body of Knowledge (CBK) course.

## Degree Requirements and Notes

- Students follow the published curricula for the business administration program of study from the semester/year of entrance in the College of Business (CoB) to graduation, provided enrollment at NDSU has not been discontinued for more than one year. Students who change their major are subject to meeting the curricular requirements in effect at the time the new major is declared.
- Business courses from programs that do not hold AACSB International accreditation cannot be used for major or minor requirements in the CoB; such courses may be eligible for use as free electives.
- The CoB accepts a maximum of nine credits of non-NDSU 300-400 level business courses from AACSB programs with approval of the department.
- Admission to the business administration major is required to enroll in advanced 300 or 400 level CoB courses.
- A grade of 'C' or better is required in transfer courses accepted for all accounting, business administration, finance, management, management information systems, and marketing courses.
- No courses for the major may be taken with Pass/Fail grading.
- Of the credits completed in residence at least 30 credits must be in 300-400 level CoB courses.
- Students must be accepted to the Business Administration major prior to the completion of the last 30 credits in 300 and 400 level CoB courses.
- For multiple majors within CoB, at least 15 unique credits of 300-400 level CoB courses must exist between the majors.
- Internship and cooperative education credits may be applied toward the total credits required for graduation as non-major electives.
- Student may choose to take the Supply Chain Management Track within the Business Administration major.

Code	Title	Credits
MGMT 461	Supply Chain Management (Required)	3
MGMT 462	Modeling the Supply Chain (Required)	3
Select two of the following:		6
MGMT 360	Operations Management	
MGMT 451	Negotiation and Alternative Dispute Resolution	
MRKT 430	Sales and Personal Selling	
MRKT 438	Customer Relationship Management (CRM) and Sales Technology	
MRKT 460	Marketing Strategy	
AGEC 378	Introduction to Transportation & Logistics	

## Minor Requirements

### Business Administration Minor

#### Minor Requirements

Minimum Credits: 24

Code	Title	Credits
<b>Requirements</b>		
Select one of the following:		3-6
ACCT 102	Fundamentals of Accounting	
ACCT 200 & ACCT 201	Elements of Accounting I and Elements of Accounting II	
Select one of the following:		3-6
ECON 105	Elements of Economics	
ECON 201 & ECON 202	Principles of Microeconomics and Principles of Macroeconomics	
Select two of the following:		6
FIN 320	Principles of Finance	
MGMT 320	Foundations of Management	
MRKT 320	Foundations of Marketing	
<b>Elective Courses</b> <sup>1</sup>		12
BUSN 300-400 Level		
FIN 300-400 Level		
MGMT 300-400 Level		
MRKT 300-400 Level		
ENTR 300-400 Level		
MIS 320	Management Information Systems	
May also include courses cross-listed with College of Business course at the 300-400 level		
Total Credits		24-30

<sup>1</sup> The following courses are excluded from the 300-400 level electives: BUSN 413, BUSN 415 and ENTR 496.

### Minor Requirements and Notes

- This minor is not available to students with majors in the College of Business.
- To enroll in 300/400 level college of business courses, students must have 2.5 minimum institutional cumulative GPA.
- Departmental approval is required for any course (including Tri-College) NOT completed at NDSU and used to satisfy the minor requirements (6 credits maximum).
- Students must earn a 2.50 minimum GPA, which is based upon the courses used to satisfy the minor requirements. Minors must satisfy all course prerequisites.

# Business Education

---

## Department Information

- **Department Location:**  
Katherine Kilbourne Burgum Family Life
- **Department Phone:**  
701-231-7921
- **Department Web Site:**  
[www.ndsu.edu/education](http://www.ndsu.edu/education)
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/business-education/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/business-education/)

Business education is a multi-discipline program that will prepare students to be licensed as a business education teacher. The plan of study encompasses coursework from Teacher Education, Business, Computer Sciences, and Communication departments. The Business Education major includes a broad range of content and professional education courses so that pre-service teachers fully understand (a) the discipline of Business Education, (b) current theories of adolescent development, and (c) current best practices in secondary instruction. Students also apply their knowledge and build their teaching skills during multiple field experiences in local schools.

## THE PROGRAM

Candidates in the Business Education major are prepared to teach students in grades 7-12 with creativity and confidence. Students will gain knowledge and skills in business, management, marketing, accounting, computing, software development, web design, and database systems. Our Professional Education courses prepare pre-service teachers to incorporate active learning strategies, to create effective methods for assessment, and to adjust instruction to accommodate diverse learners.

## PROFESSIONAL EDUCATION COURSES

Students may enroll in the 300-level professional education courses before their acceptance into the School of Education (SOE). Prior to enrolling in the 400-level courses, students must complete the application for admission to the SOE; attain at least a 2.75 grade point average in their general course work and in their education courses. Students must also pass the Praxis Core Academic Skills for Educators exam(s). Additional requirements for admission are available on the **School of Education website**.

## STUDENT TEACHING

Student teaching is the culmination of the teaching program. In the semester before graduation, students apply the knowledge and skills acquired in their college courses to real-world classrooms under the supervision of experienced business teachers in middle-level or secondary schools. Faculty members from NDSU conduct regular on-site visits to support, encourage, and evaluate student teachers so that they gain the confidence and ability to join the teaching profession after graduation.

## STUDENT ADVISEMENT

An academic advisor works individually with Business Education majors to plan their programs of study and to advise and assist them as they progress to degree completion. Students are encouraged to seek their advisor's help whenever needed. Appointments with advisors can be scheduled through the Navigate online system found on the Student Affairs web page, <https://www.ndsu.edu/enrollmentmanagement/studentssuccess/>

## CERTIFICATION

Upon completing this program, students are eligible for certification to teach Business in most states. Our program is accredited by the Council for the Accreditation of Educator Preparation (CAEP) and approved by the North Dakota Education Standards and Practices Board.

## CAREER OPPORTUNITIES

Secondary Business teachers are in high demand across the country, so our graduates usually obtain full-time employment in school districts shortly after graduation. In addition to teaching careers, Business Education graduates can choose to seek advanced degrees in business or obtain careers as corporate trainers, managers, entrepreneurs, or in business. Many options are available because a Business Education degree effectively teaches students to think critically, to synthesize information, to write and speak clearly and concisely, and to work effectively on teams.

## Major: Business Education

**Degree Type: B.S.**

**Minimum Degree Credits to Graduate: 120**

## University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>

MRKT 420	Advertising and Integrated Marketing Communication	
MRKT 465	Digital Marketing	
MGMT 330	Foundations of Organizational Behavior	
MGMT 430	Leadership in Organizations	
MGMT 451	Negotiation and Alternative Dispute Resolution	
MGMT 453	Understanding and Managing Diversity in Organizations	
MGMT 472	Managing Family Enterprises	
Additional 300-400 Business Elective - choose one course from:		3
MRKT 410	Consumer Behavior	
MRKT 420	Advertising and Integrated Marketing Communication	
MRKT 465	Digital Marketing	
MGMT 330	Foundations of Organizational Behavior	
MGMT 430	Leadership in Organizations	
MGMT 451	Negotiation and Alternative Dispute Resolution	
MGMT 453	Understanding and Managing Diversity in Organizations	
MGMT 472	Managing Family Enterprises	
<b>Teaching Specialty Requirements</b>		
EDUC 321	Introduction to Teaching	3
EDUC 322	Educational Psychology	3
EDUC 451	Instructional Planning, Methods and Assessment	3
EDUC 481	Classroom Practice Methods of Teaching I:	3
EDUC 485	Student Teaching Seminar	1
EDUC 486	Classroom Management for Diverse Learners	3
EDUC 487	Student Teaching	9
EDUC 488	Applied Student Teaching	3
EDUC 489	Teaching Students of Diverse Backgrounds	3
Total Credits		94

**Degree Notes:**

- This degree plan will allow students to earn a Business Administration minor by completing the following courses totaling 24 credits: ACCT 102, ECON 105, MRKT 320, MGMT 320, MGMT 470, BUSN 340, BUSN 430, BUSN Elective. This minor requires a minimum GPA of 2.5 in the courses that make up the minor. Students must officially declare this minor through the Office of Registration and Records to ensure the credential is posted to record.

## Chemistry

**Department Information**

- **Department Location:**  
Ladd Hall
- **Department Phone:**  
701-231-8694
- **Department Email:**  
ndsu.chemistry@ndsu.edu
- **Department Web Site:**  
www.ndsu.edu/chemistry/
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
bulletin.ndsu.edu/undergraduate/program-curriculum/chemistry/

The chemistry undergraduate major and its specialized options at North Dakota State University provides opportunities for personal achievement and professional training that are typically not available at many universities. Faculty teach all major courses. Students use state-of-the-art instrumentation in their laboratory courses. Many students get involved in fundamental and applied research with faculty research groups and have growth experiences commonly available only to graduate students. Future secondary chemistry and science teachers can participate in supervised laboratory teaching and peer mentoring programs.

**Background Information**

Industry and graduate schools are well aware of the quality of the undergraduate education at NDSU and actively seek out our graduates. Scholarships, fellowships and employment in research groups or in supervised teaching activities can cut the already modest cost of an NDSU education by one-half or more.

**The Program**

The Department of Chemistry and Biochemistry is fully accredited by the American Chemical Society (ACS) and offers programs leading to an ACS-certified Bachelor of Science degree. Options in biochemistry or coatings and polymeric materials can be added to the curriculum. A pre-professional option for those planning on medical, dental and other professional schools is also available. A chemistry major may be combined with secondary school teacher certification with as little as one additional semester for student teaching.

The prescribed curriculum provides a solid grounding through classroom and laboratory work in all of the main areas of chemistry. Major laboratory courses are designed to utilize the latest synthesis and characterization methods and employ advanced, computer-interfaced instrumentation.

Our pre-professional option includes the course work in biological and biochemical sciences that easily meets the requirements of medical, dental and other health-related professional schools. A chemistry major offers rigorous pre-professional education, as well as a back-up option in case career plans change in the future.

**Research Opportunities**

Almost every chemistry faculty member is heavily involved in forefront research, and undergraduates are encouraged to participate in that research. Students gain important skills and are exposed to the excitement of the hunt for new knowledge. This research experience often helps students define career goals more sharply.

**Career Opportunities**

People often think of the professional chemist as one who stands at a workbench in an industrial laboratory carefully manipulating chemicals or instruments. A lot of chemists are employed this way. This is often quite satisfying since many people are drawn to chemistry because they enjoy laboratory work. There are, however, many other tasks besides laboratory research in which a chemist may engage, and many different careers for which he or she can prepare for a degree in chemistry. A chemist may be employed in government, business, industry or education. Besides basic and applied research (the lab bench), an industrial chemist may be involved in production, technical service (assisting people who use products), national

and international marketing and sales, or management and corporate planning. Some chemists prefer self-employment through small business or consulting firms.

Analytical chemists are in demand for services to other departments within a chemical company, for quality control in large and small concerns, and for environmental monitoring by industrial, governmental and private organizations. Organic chemists, also in great demand, study new pharmaceuticals, polymers and other compounds. Materials chemists are needed by all high-tech industries for their synthesis and characterization skills. Inorganic chemists work on the full range of synthesis, characterization and application of chemical compounds. Physical chemists model chemical structures and reactions, and design experiments and equipment to study them. The Department of Chemistry and Biochemistry offers specialized education and training in each of these fields.

A degree in chemistry can serve as excellent preparation for careers in medicine, dentistry and other health professions. A chemistry degree also can lead to law school, and perhaps a career in patent law, a very demanding and in-demand technical profession. About half of NDSU's chemistry graduates go on to graduate or professional schools. Almost all the rest go directly into industry. Average entry-level salaries for chemistry graduates is \$45,300 to \$81,400, based on 2016 data from [www.payscale.com](http://www.payscale.com) (<http://www.payscale.com>). For chemists who have advanced degrees, salary and opportunities are often much greater.

## Faculty and Facilities

The Department of Chemistry and Biochemistry has 17 faculty members. All of the faculty have doctorate degrees from leading universities.

The Department of Chemistry and Biochemistry's teaching and research facilities are located in two connected buildings—Ladd and Dunbar Halls. Some additional laboratories are located in the A. Glenn Hill Center, and Quentin Burdick Building. Students are trained in the use of state-of-the-art equipment, some of which is duplicated at only a few sites in the world. Some undergraduate students are trained to use several powerful and sophisticated laser systems, and some have even built lasers that were put directly to work on research projects. Nuclear magnetic resonance spectrometry, X-ray diffraction and fluorescence are as up-to-date as one would expect to find at any major research university. Theoretical chemistry researchers use some of the most powerful computers on the NDSU campus.

## High School Preparation

Ideal high school preparation for a chemistry major includes four years each of English and mathematics, and a year each of biology, chemistry and physics. Experience with personal computers is also desirable. Strong writing and communication skills are as important to success in chemistry as they are in any technical field.

## Financial Support

A number of endowed scholarships and fellowships are available to highly qualified applicants. The Department of Coatings and Polymeric Materials offers industry-funded scholarships and fellowships to chemistry majors interested in taking the coatings and polymeric materials option. In addition, more than half of the students majoring in chemistry are engaged in research and earning substantial portions of their living expenses. Financial support for research experiences is provided principally by grants and contracts of faculty researchers, various summer Research Experiences for Undergraduates (SURE) programs, and national scholarship and fellowship programs, such as the Goldwater Foundation. Since 1992, nine students in the department have been awarded Goldwater Fellowships, which cover all educational expenses. Students interested in secondary school teaching have additional funding opportunities as laboratory teaching assistants and discussion leaders in a peer-tutoring program known as Supplemental Instruction. These positions not only provide an opportunity for help toward meeting expenses but also in adding relevant experience to resumes.

## Plan of Study

B.S. Chemistry, ACS Certified

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Major Requirements

### Major: Chemistry

Degree Type: B.A. or B.S.

Minimum Degree Credits to Graduate: 122

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## Recommended for Education Option

BIOL 151 & 151L	General Biology II and General Biology II Laboratory	4
GEOL 105 & 105L	Physical Geology and Physical Geology Lab	4
Total Credits		27

**Minor Requirements****Chemistry Minor****Minor Requirements**

Required Credits: 19

Code	Title	Credits
<b>Required Courses</b>		
CHEM 121	General Chemistry I	3
CHEM 121L	General Chemistry I Laboratory	1
CHEM 122	General Chemistry II	3
CHEM 122L	General Chemistry II Laboratory	1
<b>Electives</b>		11
300-400 level courses in chemistry, biochemistry, or coatings & polymeric materials; one lab course required.		
Total Credits		19

**Minor Requirements and Notes**

- A minimum of 8 credits must be taken at NDSU.

**Chemistry Education**

## Department Information

- **Department Location:**  
Katherine Kilbourne Burgum Family Life, 4-H Center
- **Department Phone:**  
701-231-7921
- **Department Web Site:**  
[www.ndsu.edu/education/](http://www.ndsu.edu/education/)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/chemistry-education/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/chemistry-education/)

Chemistry involves the study of the composition, structure, properties and interactions of matter. Chemistry is often considered a central or enabling science, because it is foundational to understanding other scientific disciplines.

**The Program**

Candidates in the chemistry education major are prepared to teach a diverse curriculum to a diverse student population. The chemistry education student should work closely with their advisor to be sure that the general education courses taken will provide a strong foundation for advanced courses in the major.

**Professional Education Courses**

Students have to enroll in the 300-level professional education courses before applying to be formally admitted to the School of Education (SOE). Prior to enrolling in the 400-level courses, students must complete the application for admission to the SOE; attain a minimum of a 2.75 grade point average overall in their course work and education courses; and pass the Praxis Core Academic Skills for Educators exam(s). Requirements for admission can be found on the School of Education website (<https://www.ndsu.edu/education>).

## Student Teaching

Student teaching is the culmination of the teacher preparation program. Students have the opportunity to apply knowledge and skills acquired in college courses under the supervision of an experienced chemistry educator.

## Student Advisement

Students will be assigned individual advisors who will work with them closely in program planning and in other ways to advise and assist them. Students are encouraged to seek their advisor's help whenever needed.

## Certification

Upon completing this program, graduates are eligible for teacher licensure from the North Dakota Education Standards and Practices Board (ESPB). The program is accredited by the Council for the Accreditation of Educator Preparation (CAEP).

## Career OPPORTUNITIES

Students who major in chemistry education get hired to teach physical science and chemistry at the high school level. To expand their choices, students can elect to double major in chemistry education and chemistry or add coursework in other science disciplines to increase teacher licensure areas. One can also work in industry with the chemistry major.

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>First Year</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>

## Major Requirements

### Major: Chemistry Education

**Degree Type: B.A. or B.S.**

**Minimum Degree Credits to Graduate: 136**

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## University General Education Requirements

EDUC 485	Student Teaching Seminar	1
EDUC 486	Classroom Management for Diverse Learners	3
EDUC 487	Student Teaching	9
EDUC 488	Applied Student Teaching	3
EDUC 489	Teaching Students of Diverse Backgrounds	3
Total Credits		108-109

## Degree Requirements and Notes

- See School of Education (<https://www.ndsu.edu/education>) for admission requirements.
- Courses taken P/F may not be used to satisfy any requirements.
- A grade of 'C' or better is required in all professional education courses.
- To be placed in student teaching, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required.
- To exit the program, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required as well as completing the Praxis Subject test and the Principles of Learning and Teaching test.

# Civil Engineering

## Department Information

- **Department Location:**  
Civil & Industrial Engineering 201
- **Department Phone:**  
701-231-7244
- **Department Web Site:**  
[www.ndsu.edu/cee/](http://www.ndsu.edu/cee/)
- **Credential Offered:**  
B.S.C.E.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/civil-engineering/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/civil-engineering/)

Would you like to make this world a better place to live, and improve the quality of life for all of us? You could do just that by choosing a career in civil engineering. We design sustainable solutions to societal challenges today and into the future.

Civil engineers play an enviable role in enhancing the quality of life and positively impacting the everyday life of people everywhere. We design solutions for the infrastructure of society and the environment in which we live. Civil engineering projects may include designing structures such as buildings, bridges and sports stadiums; transportation infrastructure such as highways, railroads, pipelines, waterways, ports and airports; water infrastructure like pipes, dams and drainage; safe drinking water supply and waste systems; and averting damage from earthquakes, landslides and floods. The profession embraces new technologies such as nanotechnology, smart materials, sensors, robotics, etc. that are introduced into civil engineering projects to improve reliability, cost effectiveness and quality of life.

## The Program

Civil engineers are professionals who have broad technical knowledge, possess strong problem solving skills and enjoy working with people. Our work is directly related to the public wellbeing and safety, and has a significant impact on decision making and planning processes.

The graduates from North Dakota State University's Department of Civil and Environmental Engineering apply their skills in all fields of the profession domestically and abroad. NDSU civil engineering graduates are sought by companies from all over the country at competitive salaries. They have most certainly put their education to good use, bettering themselves and the world in which they live. The department offers the B.S., M.S. and Ph.D. degrees in Civil Engineering and M.S. degree in Environmental Engineering, and participates in interdisciplinary graduate programs such as Ph.D. degree in Materials and Nanotechnology, M.S. and Ph.D. degrees in Environmental Conservation Sciences, Ph.D. degree in Transportation and Logistics, and M.S. and Ph.D. degrees in Biomedical Engineering. A B.S. degree in Environmental Engineering is planned to begin fall 2020.

## Mission

The mission of the Department of Civil and Environmental Engineering is to:

1. Provide quality education to prepare nationally competitive undergraduate students for a successful career in civil and environmental engineering;
2. Provide advanced skills and knowledge in state-of-the-art research and design in sub-areas of civil and environmental engineering for graduate students; and
3. Provide service to the university, engineering profession and the public.

## Program Educational Objectives

The following program educational objectives are consistent with the university, college and department missions. Graduates of our B.S. in Civil Engineering program are expected within a few years of graduation to:

1. Solve current and emerging problems in civil and environmental infrastructure.
2. Conduct sustainable engineering design incorporating diverse perspectives to improve quality of life.
3. Engage in ethical and professional practices, realizing the broader societal implications of civil engineering.
4. Serve the profession through collaborative work, leadership roles, professional licensure, advanced degrees, and lifelong learning.

## A Flexible Curriculum

First year civil engineering students at NDSU begin their education with fundamental courses in English, chemistry, math and an introduction to the engineering sciences. Second year courses become more specific with an emphasis in surveying, math, physics and engineering science courses. The third year student previews the specialization areas of civil engineering. These are (1) geotechnical, (2) structural, (3) transportation, (4) water resources and (5) environmental engineering. The senior year continues to require certain courses but also provides for 12 hours of technical electives and a senior design project. The technical electives allow the student to take additional courses in those areas of civil engineering in which he or she intends to practice professionally. Currently, there are 42 civil engineering courses from which the student may choose.

## Faculty

The department has well-qualified and dedicated faculty members. They are nationally and internationally recognized experts, with the knowledge and experience to prepare graduates for successful careers. All faculty members in the department have a doctoral degree. All classes are taught/assessed by full-time professors, and supplemented by lectures from leaders from industry.

## Modern, Well-Equipped Facilities

The department has excellent laboratory facilities for undergraduate education and research, including the new undergraduate laboratories for water resources and environmental engineering, laboratories for geotechnical engineering, structural engineering and civil engineering materials, and several state-of-the-art research laboratories.

## Student Organizations

Students participate in several professional student organizations in the department, which helps them develop leadership skills and the ability to work in teams. The NDSU American Society of Civil Engineers (ASCE) Steel Bridge Team has won six national championships, more than any school in the country. The NDSU American Water Works Association (AWWA) and the Water Environment Federation (WEF) student chapter has won 2 national design competitions and a number of regional and state competitions. Other organizations have also won national and regional awards.

## Preparation

High school students who wish to prepare for some phase of engineering at the college level should attempt to complete the following high school credits: one unit of physics, four units of mathematics and one unit of chemistry. Incoming freshmen prepared to enroll in calculus frequently complete their civil engineering degree in four years. Students who have studied two years of pre-engineering at another institution can normally complete the civil engineering degree in two additional years.

## Scholarships and Financial Aid

The Department of Civil and Environmental Engineering awards Solien, Vernon L. and Ruth Scholarship Endowment, Dr. Edwin Wetterstrom Scholarship, Moore Engineering Inc. Scholarship Endowment, Nelson, Donald Memorial Scholarship, Traynor, Duane Civil Engineering Scholarship, and many other scholarships. The scholarship awards range from \$500 to \$10,000. The Institute of Transportation Engineers (ITE) and ASCE student chapters recognize students who are active in their respective organizations. Other forms of financial aid are available through the Office of Financial Aid and Scholarships.

## Career Opportunities

NDSU civil engineers are widely regarded as hands-on, can-do, project-ready graduates, who are very successful in finding excellent jobs. Our students are highly sought for internships and coops, with most students having completed multiple work experiences. Most have selected a job before graduation and others within a few weeks of graduation. The work varies in regard to type of activity and location. Civil engineers can work in the office, in the field or a combination of the two. They can work primarily with a number of intricate designs or with people in management or sales.

Job placement of recent NDSU civil engineering graduates indicates a variety of work experience. About 40 percent of the graduates have gone to work for consulting engineering firms and another 40 percent with city, state and federal government. The remainder are employed by industry, contractors and the military or have gone to graduate school at NDSU or other universities. Most graduates are involved in more than one type of civil engineering activity. Some students accept jobs in which they are not involved in a specific civil engineering activity, but use their engineering background in other activities. Job placement of graduates seeking employment has recently been 100 percent. The starting annual salaries accepted by recent civil engineering graduates were between \$53,000 and \$75,000 (average salary around \$60-65,000).

Graduate programs leading to Master of Science and Doctor of Philosophy degrees are available in specialized fields. For more complete details, see the [Graduate Bulletin](http://bulletin.ndsu.edu/graduate) (<http://bulletin.ndsu.edu/graduate>) online.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

CE 473	Air Pollution (Design Credits 1.5)
CE 478	Water Quality Management (Design Credits 1.5)
CE 479	Advanced Water and Wastewater Treatment (Design Credits 1.5)
CE 499	Special Topics (Design Credits 1.5)

**Transportation:**

CE 419	Pavement Design (Design Credits 1.5)
CE 454	Geometric Highway Design (Design Credits 2.0)
CE 455	Airport Planning and Design (Design Credits 1.0)
CE 456	Railroad Planning and Design (Design Credits 1.5)
CE 457	Pavement Management Systems (Design Credits 1.0)
CE 458	Bituminous Materials and Mix (Design Credits 1.5)
CE 499	Special Topics (Design Credits 1.0)

**Geotechnical:**

CE 417	Slope Stability and Retaining Walls (Design Credits 1.5)
CE 461	Foundation Engineering (Design Credits 1.5)
CE 462	Designing with Geosynthetics (Design Credits 1.0)
CE 463	Geotechnical Earthquake Engineering (Design Credits 1.5)
CE 464	Advanced Soil Mechanics (Design Credits 1.0)

**Advanced Materials:**

- 1 No grades less than a "C" are accepted in any of the math courses, as well as ME 221 Engineering Mechanics I, ME 222 Engineering Mechanics II, and ME 223 Mechanics of Materials for this curriculum.
- 2 Use ME 351 as an alternate when ME 350 is not available for students due to scheduling.

### Degree Requirements and Notes

- A student must complete at least 60 semester credits of professional level course work in his/her program while in residence and enrolled in the college. Students transferring into the college from programs with professional accreditation are exempt from this residency requirement but are subject to the residency requirement of NDSU.
- **Students must complete courses in a minimum of three technical areas with a minimum of 6 credits in design for a minimum total of 12 technical electives.**
- Transfer students are required to take ENGR 311 History of Technology in America or ENGR 312 Impact of Technology on Society regardless of General Education completion.

*Note: Department permission required for graduate level courses. Credit may be earned only at the undergraduate level. Department permission is also required for some undergraduate courses. There are specific prerequisites and grade requirements to be allowed to take certain courses.*

- **Credential Offered:**  
Minor
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/coatings-polymeric-materials/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/coatings-polymeric-materials/)

Everybody uses products that are painted or coated in everyday life, but often take coatings for granted. However, a \$100 billion industry exists to supply paints and coatings worldwide that decorate, protect and provide function to automobiles, building, furniture, aircraft, ships, appliances, bridges, medical devices, electronic devices and countless other objects. The performance of these coatings depends critically on specially tailored polymers, which form coating films. Thus, coatings scientists must also be good polymer scientists. Other scientific disciplines are also important to the coatings scientist, such as organic chemistry, electrochemistry, rheology, surface chemistry, chemical analysis, photochemistry, mathematics, physics and several branches of engineering and materials science.

North Dakota State University started offering polymer and coatings chemistry courses in 1905. Of the few universities offering training that focuses on the technology of paints and coatings, NDSU has the longest and most extensive experience. Over the decades, the Department of Coatings and Polymeric Materials has established a worldwide reputation for education and research. Today, there is a high demand for coatings and polymer scientists at all degree levels, providing coatings and polymer materials graduates with abundant job opportunities. NDSU graduates are especially sought after by companies in the paint, coatings, and polymer industries. Graduates of the program are employed by major paint, coatings, polymer, and chemical companies with many graduates attaining upper management positions. At the undergraduate level, Bachelor of Science degrees in science and engineering with a coatings and polymeric materials minor are offered. Master's and doctoral degrees are available at the graduate level. A 4+1 accelerated B.S./M.S degree program is also available.

## Coatings and Polymeric Materials

## Minor Requirements

### Coatings & Polymeric Materials Minor

#### Minor Requirements

Required Credits: 16

Code	Title	Credits
<b>Required Courses:</b>		
CPM 475	Coatings' Materials Science	3
CPM 474	Applied Polymer Science	3
Select one lab course from the following:		1-2
CPM 483	Polymer Practicum	
CPM 484	Coatings I Laboratory	
CPM 485	Coatings II Laboratory	
CPM 487	Corrosion and Materials Laboratory	
<b>Elective Courses: Select 9 credits from the following (if CPM 487 was completed, select 8 credits)</b>		9
CHEM 240	Survey of Organic Chemistry <sup>2†</sup>	
CHEM 341	Organic Chemistry I <sup>1†</sup>	
CHEM 341L	Organic Chemistry I Laboratory <sup>1*</sup>	
CHEM 342	Organic Chemistry II <sup>1†</sup>	
CHEM 342L	Organic Chemistry II Laboratory <sup>1*</sup>	
CPM 436	Biopolymers and Biocomposites	
CPM 451	Laboratory, Chemical, Radiation, and Biological Safety	
CPM 472	Environment and Chemical Industries	
CPM 473	Polymer Synthesis <sup>3</sup>	
CPM 483	Polymer Practicum	
CPM 484	Coatings I Laboratory	
CPM 485	Coatings II Laboratory	
CPM 486	Corrosion and Materials	
CPM 487	Corrosion and Materials Laboratory	
Total Credits		16-17

<sup>1</sup> If CHEM 341 & 341L and CHEM 342 & CHEM 342L are required for a student's major program of study, these credits cannot count toward the CPM minor.

<sup>2</sup> If CHEM 240 is required for the student's major degree, the credits cannot also count for the CPM minor.

<sup>3</sup> Chemistry and Biochemistry & Molecular Biology majors are required to have CPM 473.

\* CHEM 353 & CHEM 354 can be substituted for CHEM 341L & CHEM 342L.

† For the CPM minor a student cannot get credit for both CHEM 240 and CHEM 341/342.

#### Minor Requirements and Notes:

- A minimum of 8 credits must be taken at NDSU.

## Community Development

#### Department Information

- **Department Location:**  
Minard Hall
- **Department Phone:**  
701-231-8657

- **Department Web Site:**  
www.ndsu.edu/socanth/
- **Credential Offered:**  
Minor
- **Official Program Curriculum:**  
bulletin.ndsu.edu/undergraduate/program-curriculum/community-development/

The Community Development minor is an applied, multidisciplinary minor. The purpose of the minor is to prepare students to integrate community development concepts into their own occupations; to recognize the relationships of social, economic, and development change on community viability and sustainability; and to take a more active role in the affairs of their own communities. The minor consists of 18 credits that includes coursework and an experiential component. Requirements include SOC 404 Community Assessment and SOC 405 Community Development and a minimum of three credits in each of the following areas: economics, business, and social science.

<b>Select one additional course from the above categories</b>		<b>3</b>
Total Credits		<b>18</b>

## Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.

# Comprehensive Science Education

## Department Information

- **Department Location:**  
Katherine Kilbourne Burgum Family Life, 4-H Center
- **Department Phone:**  
701-231-7921
- **Department Web Site:**  
[www.ndsu.edu/education/](http://www.ndsu.edu/education/)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/comprehensive-science-education/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/comprehensive-science-education/)

The comprehensive science education degree requires coursework in biological sciences, chemistry, physics and earth science, as well as mathematics.

## The Program

Candidates in the comprehensive science education major are prepared to teach a diverse curriculum to a diverse student population. The comprehensive science education student should work closely with an advisor to be sure that the general education courses taken will provide a strong foundation for the advanced courses in the major.

## Professional Education Courses

Students have to enroll in the 300-level professional education courses before applying to be formally admitted to the School of Education (SOE). Prior to enrolling in the 400-level courses, students must complete the application for admission to the SOE; attain a minimum of a 2.75 grade point average

overall in their course work and education courses; and pass the Praxis Core Academic Skills for Educators exam(s). Requirements for admission can be found on the School of Education website (<https://www.ndsu.edu/education>).

## Student Teaching

Student teaching is the culmination of the teacher preparation program. Students have the opportunity to apply knowledge and skills acquired in college courses under the supervision of an experienced science educator.

## Student Advisement

Students will be assigned individual advisors who will work with them closely in program planning and in other ways to advise and assist them. Students are encouraged to seek their advisor's help whenever needed.

## Certification

Upon completing this program, graduates are eligible for teacher licensure from the North Dakota Education Standards and Practices Board (ESPB). The program is accredited by the Council for the Accreditation of Educator Preparation (CAEP).

## Career Opportunities

Candidates in the comprehensive science education major can be hired to teach more than one science subject area taught in North Dakota. This degree will transfer toward teacher licensure in some other states, but not all states have a licensure option for composite or general science. Graduates who wish to teach out of state with the comprehensive science education degree should work with their advisor to determine requirements for licensure in other states.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>First Year</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>

## Major Requirements

### Major: Comprehensive Science Education

**Degree Type:** B.A. or B.S.

**Minimum Degree Credits to Graduate:** 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.

4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		6
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		6
<b>Wellness (W) <sup>†</sup></b>		2
<b>Cultural Diversity (D) <sup>**†</sup></b>		
<b>Global Perspectives (G) <sup>**†</sup></b>		
Total Credits		39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Major Requirements

Code	Title	Credits
<b>Comprehensive Science Education Requirements</b>		
BIOL 124 & 124L	Environmental Science and Environmental Science Laboratory (May satisfy general education category S and G)	4
ENGL 324	Writing in the Sciences (May satisfy general education category C)	3
STAT 330	Introductory Statistics (May satisfy general education category R)	3
<b>Teaching Specialty Requirements</b>		
Primary Concentration - Select one primary concentration from biology, chemistry, earth science, physics. Concentrations listed below.		24-25
Secondary Concentration - Two secondary concentrations from the science area not selected for the primary concentration.		24-28
Tertiary Concentration - One tertiary concentration from the science area not selected for the primary or secondary areas.		8
<b>Math Requirements</b>		
Select the math requirement based on choice of primary concentration. See math requirement section below.		3-18
<b>Professional Education Requirements</b>		
EDUC 321	Introduction to Teaching	3
EDUC 322	Educational Psychology	3
EDUC 451	Instructional Planning, Methods and Assessment	3
EDUC 481	Classroom Practice Methods of Teaching I:	2-3
EDUC 482	Classroom Practice/Methods of Teaching II:	2-3
EDUC 485	Student Teaching Seminar	1
EDUC 486	Classroom Management for Diverse Learners	3
EDUC 487	Student Teaching	9
EDUC 488	Applied Student Teaching	3

EDUC 489	Teaching Students of Diverse Backgrounds	3
Total Credits		101-123

Code	Title	Credits
<b>Primary Concentration</b>		
Select one primary concentration from biology, chemistry, earth science, or physics.		
<b>Biology (24 credits)</b>		
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	4
BIOL 151 & 151L	General Biology II and General Biology II Laboratory	4
BIOL 252	Plant and Animal Diversity	3
BIOL 315 & 315L	Genetics and Genetics Laboratory	4
BIOL 359	Evolution	3
BIOL 364	General Ecology	3
MICR 202 & 202L	Introductory Microbiology and Introductory Microbiology Lab	3
<b>Chemistry (24 credits)</b>		
Select one introductory chemistry sequence (A or B)		
Sequence A:		
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory	8
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory	
Sequence B:		
CHEM 150 & CHEM 160	Principles of Chemistry I and Principles of Chemistry Laboratory I	8
CHEM 151 & CHEM 161	Principles of Chemistry II and Principles of Chemistry Laboratory II	
CHEM 341 & 341L	Organic Chemistry I and Organic Chemistry I Laboratory	4
CHEM 342 & 342L	Organic Chemistry II and Organic Chemistry II Laboratory	4
CHEM 425	Inorganic Chemistry I	3
CHEM 431 & 431L	Analytical Chemistry I and Analytical Chemistry I Laboratory	5
<b>Earth Science (25 credits)</b>		
GEOL 105 & 105L	Physical Geology and Physical Geology Lab	4
GEOL 106 & 106L	The Earth Through Time and The Earth Through Time Lab	4
GEOL 350	Invertebrate Paleontology	3
GEOL 303	Paleontology Field Course	1
GEOL 412	Geomorphology	3
GEOL 420 & GEOL 421	Mineralogy and Mineralogy Laboratory	4
PHYS 110	Introductory Astronomy	3
SOIL 217	Introduction to Meteorology & Climatology	3
<b>Physics (24 credits)</b>		
PHYS 171	Introductory Projects in Physics	1
PHYS 215	Research For Undergraduates	1-3
PHYS 251 & 251L & 251R	University Physics I and University Physics I Laboratory and University Physics I Recitation	6

PHYS 252 & 252L & 252R	University Physics II and University Physics II Laboratory and University Physics II Recitation	6
PHYS 350	Modern Physics	3
PHYS 355	Classical Mechanics	3
PHYS 361	Electromagnetic Theory	3

Code	Title	Credits
------	-------	---------

**Secondary Concentration**

Select two secondary concentrations not selected as the primary.

**Biology (14 credits)**

BIOL 150 & 150L	General Biology I and General Biology I Laboratory	4
BIOL 151 & 151L	General Biology II and General Biology II Laboratory	4
BIOL 252	Plant and Animal Diversity	3
BIOL 359	Evolution	3

**Chemistry (12 credits)**

Select one introductory chemistry sequence (A or B)

Sequence A:		8
-------------	--	---

CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory	
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory	

Sequence B:

CHEM 150 & CHEM 160	Principles of Chemistry I and Principles of Chemistry Laboratory I	
CHEM 151 & CHEM 161	Principles of Chemistry II and Principles of Chemistry Laboratory II	
CHEM 341 & 341L	Organic Chemistry I and Organic Chemistry I Laboratory	4

**Earth Science (14 credits)**

GEOL 105 & 105L	Physical Geology and Physical Geology Lab	4
GEOL 106 & 106L	The Earth Through Time and The Earth Through Time Lab	4
PHYS 110	Introductory Astronomy	3
SOIL 217	Introduction to Meteorology & Climatology	3

**Physics (12 credits)**

PHYS 110 & 110L	Introductory Astronomy and Introductory Astronomy Lab	4
PHYS 211 & 211L	College Physics I and College Physics I Laboratory	4
PHYS 212 & 212L	College Physics II and College Physics II Laboratory	4

Code	Title	Credits
------	-------	---------

**Tertiary Concentration**

Select one tertiary concentration not selected as the primary or secondary concentrations.

**Biology (8 credits)**

BIOL 150 & 150L	General Biology I and General Biology I Laboratory	4
BIOL 151 & 151L	General Biology II and General Biology II Laboratory	4

**Chemistry (8 credits)**

Select one introductory chemistry sequence (A or B) 8

Sequence A:

CHEM 121  
& 121L General Chemistry I  
and General Chemistry I Laboratory

CHEM 122  
& 122L General Chemistry II  
and General Chemistry II Laboratory

Sequence B:

CHEM 150  
& CHEM 160 Principles of Chemistry I  
and Principles of Chemistry Laboratory I

CHEM 151  
& CHEM 161 Principles of Chemistry II  
and Principles of Chemistry Laboratory II

**Earth Science (8 credits)**

GEOL 105  
& 105L Physical Geology  
and Physical Geology Lab 4

GEOL 106  
& 106L The Earth Through Time  
and The Earth Through Time Lab 4

**Physics (8 credits)**

PHYS 211  
& 211L College Physics I  
and College Physics I Laboratory 4

PHYS 212  
& 212L College Physics II  
and College Physics II Laboratory 4

Code	Title	Credits
------	-------	---------

**Math Requirements**

Select the math requirement based on the choice of primary concentration.

**Biology or Earth Science (3-4 credits)**

MATH 105 or MATH 146	Trigonometry Applied Calculus I	3 or 4
-------------------------	------------------------------------	--------

**Chemistry (8 credits)**

MATH 165	Calculus I	4
----------	------------	---

MATH 166	Calculus II	4
----------	-------------	---

**Physics (18 credits)**

MATH 165	Calculus I	4
----------	------------	---

MATH 166	Calculus II	4
----------	-------------	---

MATH 265	Calculus III	4
----------	--------------	---

MATH 266	Introduction to Differential Equations	3
----------	--	---

MATH 129	Basic Linear Algebra	3
----------	----------------------	---

or MATH 329	Intermediate Linear Algebra	
-------------	-----------------------------	--

## Degree Requirements and Notes

- See School of Education (<https://www.ndsu.edu/education>) for admission requirements.
- Courses taken P/F may not be used to satisfy any requirements.
- A grade of 'C' or better is required in all professional education courses.
- To be placed in student teaching, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required.
- To exit the program, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required as well as completing the Praxis Subject test and the Principles of Learning and Teaching test.

## Computer Engineering

### Department Information

- **Department Location:**  
Electrical and Computer Engineering
- **Department Phone:**  
701-231-7019
- **Department Web Site:**

[www.ndsu.edu/ece/](http://www.ndsu.edu/ece/)

- **Credential Offered:**  
B.S.Cpr.E.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/computer-engineering/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/computer-engineering/)

Computer engineering deals with both hardware and software aspects of computer systems. Students take essential electrical engineering classes along with specialized classes in computer engineering and computer science. Demand for computer engineers is strong due to the growing use of computers in all sorts of products and the need for engineers competent with computers in both hardware and software areas.

## The Program

Computer engineering is a degree program in the College of Engineering. The Computer Engineering program provides a background in three broad areas: computer hardware, software, and hardware-software integration. Fundamental topics included in the program are embedded systems, computer architecture, digital systems, software engineering, computer networks, and operating systems. In addition, the program includes core subjects that are common to all engineering disciplines and basic university studies in humanities and social science. The Bachelor of Science degree in Computer Engineering is accredited by the Engineering Accreditation Commission of ABET, [www.abet.org](http://www.abet.org).

## Areas of Specialization

The Computer Engineering program allows students to tailor their studies within broad parameters. Students are encouraged to develop an individual program of study in close consultation with their advisers. Examples are available to illustrate how specialization may be obtained in a number of different technical areas. Students may mix and match from the examples to suit their particular interests.

Technical areas include the following:

**Computer Architecture/Digital VLSI** – VLSI designers and computer architects design computer system hardware, including how the CPU communicates with various types of memory and high-performance multi-processor systems. VLSI design focusses on the lower levels of abstraction: transistor-level and physical-level design; whereas computer architecture focuses on the higher levels of abstraction: architecture and gate-level designs.

**Cyber Physical Systems** – deals with the interaction of computing elements monitoring/controlling physical entities, often in a large network.

**Embedded Systems** – deals with the design of a dedicated computer system to perform a specific task, often requiring real-time constraints. An example is a smartphone.

**Computer Systems** – deals with the close interaction between a system's hardware and software.

## The Facilities

The Electrical and Computer Engineering building is part of an eight building engineering complex. The building contains specialized laboratories and equipment. Numerous grants and donations from the National Science Foundation and private industry have provided valuable equipment. Laboratories along with department and University computer capabilities support education and research. Students also have full access to computer clusters located in the ECE building and throughout the campus. These and other major computer resources are tied to local, regional, national and international computer networks, and remote access is provided for all ECE software.

## Selective Admission

Transfer students from international institutions must have a 3.00 GPA.

Further, the department policy is that transfer credits with grades less than 'C' in biology, chemistry, computer science, any field of engineering class, mathematics and physics are not accepted for the Electrical and Computer Engineering curricula.

## High School Preparation

High school students should attempt to complete one unit of physics, four units of mathematics and one unit of chemistry.

## Career Opportunities

Graduates may find work as design engineers (computer hardware, software and systems), computer consultants, sales and customer support engineers or as engineers involved with computer-aided manufacturing and testing.

## Research and Graduate Study

Graduate studies leading to a master's degree or doctoral degree are offered in the department. Further details are available in the *Graduate Bulletin*.

## Cooperative Education Program

The Cooperative Education Program allows students to alternate classroom study with a series of paid professional work experiences related to electrical and computer engineering. These experiences increase in complexity as the student's background increases. The program provides

opportunities for pre-graduation experience in the profession, exploration of several career opportunities, money for education, an enriched degree and enhanced opportunities for employment following graduation.

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

Humanities/Fine Arts Gen Ed Elective <sup>3</sup>	3	Tech Elective	3
Social/Behavioral Sci. Gen Ed Elective <sup>4</sup>	3		
	17		15

Total Credits: 128

<sup>1</sup> Students must take ECE 111 prior to enrolling in ECE courses listed above in the Junior or Senior years; otherwise, students must take an additional ECE Elective in lieu of ECE 111.

- 2 Select from ENGL 320, 321, 324 or 459 to satisfy the Upper Level Writing for General Education.
- 3 Suggested to take ENGR 311.
- 4 Suggested to take ENGR 312, ECON 105, ECON 201 or ECON 202..

**PROGRAM NOTES:**

**ECE Elective:** any didactic ECE 4xx course (not x93, 494, 496).

**Tech Elective:** any didactic 4xx course from ECE or CSCI, or any of the following: CSCI 336, CSCI 366, CSCI 372, ECE 311, ECE 321, ECE 351, ECE x93, ECE 494, ECE 496 (max 3 credits), ENGR 310, PHYS 252, IME 440, IME 456, IME 460 and IME 470.

Students must earn a "C" or better in ECE 173, ECE 275, EE 206 and all required MATH courses, before enrolling in ECE courses listed above in the Junior or Senior years.

## Computer Engineering

### Department Information

- **Department Location:**  
Electrical and Computer Engineering
- **Department Phone:**  
701-231-7019
- **Department Web Site:**  
[www.ndsu.edu/ece/](http://www.ndsu.edu/ece/)
- **Credential Offered:**  
B.S.Cpr.E.
- **Plan Of Study Sample:**  
[bulletin.ndsu.edu/programs-study/undergraduate/computer-engineering/#planofstudytext](http://bulletin.ndsu.edu/programs-study/undergraduate/computer-engineering/#planofstudytext)

## Major Requirements

### Major: Computer Engineering

**Degree Type:** B.S.Cpr.E.

**Minimum Degree Credits to Graduate:** 128

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		6

<b>Social and Behavioral Sciences (B)</b> <sup>†</sup>	6
<b>Wellness (W)</b> <sup>†</sup>	2
<b>Cultural Diversity (D)</b> <sup>*†</sup>	
<b>Global Perspectives (G)</b> <sup>*†</sup>	
Total Credits	39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Major Requirements

Code	Title	Credits
<b>Computer Engineering Core Requirements</b>		
ECE 111	Introduction to Electrical and Computer Engineering	3
ECE 173	Introduction to Computing <sup>*</sup>	4
ECE 275	Digital Design <sup>*</sup>	4
ECE 320	Electronics I	3
ECE 341	Random Processes	3
ECE 343	Signals & Systems	4
ECE 374	Computer Organization	4
ECE 376	Embedded Systems	4
ECE 401	Design I (capstone)	1
ECE 403	Design II (capstone)	2
ECE 405	Design III (capstone)	3
ECE 474	Computer Architecture	3
ECE 475	Advanced Digital Design	4
<b>Math Courses Required</b>		
MATH 129	Basic Linear Algebra <sup>*</sup>	3
MATH 165	Calculus I (May satisfy general education category R)	4
MATH 166	Calculus II <sup>*</sup>	4
MATH 265	Calculus III (w/ vectors) <sup>*</sup>	4
MATH 266	Introduction to Differential Equations <sup>*</sup>	3
<b>CSCI Courses Required</b>		
CSCI 161	Computer Science II (May satisfy general education category S for Computer Engineering majors only))	4
CSCI 222	Discrete Mathematics	3
CSCI 413	Principles of Software Engineering	3
CSCI 459	Foundations of Computer Networks	3
CSCI 474	Operating Systems Concepts	3
<b>Other Courses Required</b>		
CHEM 121	General Chemistry I (May satisfy general education category S)	3
CHEM 121L or PHYS 251L	General Chemistry I Laboratory (May satisfy general education category S) University Physics I Laboratory	1
EE 206	Circuit Analysis I <sup>*</sup>	4
Select one of the following: (May satisfy general education category C)		3
ENGL 320	Business and Professional Writing	
ENGL 321	Writing in the Technical Professions	
ENGL 324	Writing in the Sciences	
ENGL 459	Researching and Writing Grants and Proposal	
ENGR 402	Engineering Ethics and Social Responsibility	1
PHYS 251	University Physics I (May satisfy general education category S)	4

<b>ECE Electives</b>	<b>Select 6 cr. of ECE 400 level electives (excluding 494 and 496); may include CSCI 467</b>	6
Includes the cross listed courses of ECE/IME 427; ECE/IME 429; ECE/PHYS 411; & ECE/PHYS 411L		
<b>Tech Electives: Select 6 credits from the following:</b>		6
CSCI 336	Theoretical Computer Science	
CSCI 366	Database Systems	
CSCI 372	Comparative Programming Languages	
CSCI 4XX	Any CSCI 400 level didactic course	
ECE 311	Circuit Analysis II	
ECE 321	Electronics II <sup>†</sup>	
ECE 351	Applied Electromagnetics	
ECE 4XX	Any ECE 400 level didactic course	
ECE 494	Individual Study	
ECE 496	Field Experience (max. of 3 cr.)	
ENGR 310	Entrepreneurship for Engineers and Scientists	
IME 440	Engineering Economy	
IME 456	Program and Project Management	
IME 460	Evaluation of Engineering Data	
IME 470	Operations Research I	
PHYS 252	University Physics II	
<b>Total Credits</b>		<b>100</b>

\* No grade less than a C accepted in these courses.

## Degree Requirements and Notes

- A student must complete at least 60 semester credits of professional level course work in his/her program while in residence and enrolled in the college. Students transferring into the college from programs with professional accreditation are exempt from this residency requirement but are subject to the residency requirement of NDSU.
- Transfer Students – Transfer courses with grades less than 'C' in Biology, Chemistry, Computer Science, Mathematics, Physics, and any type of engineering class will not be accepted as a major requirement.
- In order to graduate, an ECE student must have at least a 2.0 GPA in all required EE and ECE courses taken at NDSU. Elective ECE courses are not included in this GPA requirement.
- All Students – Students are required to attain a grade of 'C' or better in ECE 173 Introduction to Computing, ECE 275 Digital Design, EE 206 Circuit Analysis I, and all required MATH courses.

## Computer Science

### Department Information

- **Department Location:**  
Quentin Burdick Building 258
- **Department Phone:**  
701-231-8562
- **Department Web Site:**  
[www.ndsu.edu/cs/](http://www.ndsu.edu/cs/)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/computer-science/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/computer-science/)

The Department of Computer Science at North Dakota State University offers course work leading to bachelor's, master's and doctoral degrees in computer science and, at the graduate level, in software engineering. Options in cybersecurity are available within the computer science and software engineering M.S. and Ph.D. programs. The department is a designated Center for Academic Excellence in cybersecurity research (CAE-R) by the National Security Agency (NSA) and the Department of Homeland Security (DHS).

### Background Information

As an undergraduate student, an advisor is assigned to help in choosing electives in their particular area of interest. For students with no or very limited computer experience, we offer introductory courses in the standard curriculum for majors. Advanced undergraduate students may have the

opportunity to take graduate courses while completing their undergraduate program. An extensive and varied set of elective courses in every aspect of computer science is available as well.

## The Program

Both a B.A. and a B.S. in Computer Science are offered. We also offer several double majors, including Math and Computer Science, Physics and Computer Science, and Statistics and Computer Science. A 4+1 program is available for undergraduates with a 3.5 grade point average or better to complete a B.S. and an M.S. in as little as five years. In the 4+1 program, graduate courses taken while an undergraduate student are used for both the B.S. and M.S. degree requirements.

We offer the most comprehensive and varied computer science programs in the region. In the core courses required of all majors, students are offered an opportunity to study concepts, applications and implementation techniques which provide a broad and practical base both for a satisfying, well-paying career in computer science, and for advanced study. The curriculum offers an opportunity for an in-depth study of topics such as artificial intelligence, software engineering, cybersecurity, machine learning, data science, cybersecurity, system simulation, computer communication networks, multimedia, operating systems and database management systems. A departmental recognition in cybersecurity is offered within the B.S. degree program. The department is expanding offerings in software engineering, data mining, and bioinformatics. Students are encouraged to choose courses from related areas, such as business, economics, engineering, mathematics, operations research and statistics to broaden their program of study. A senior capstone experience that provides a semester long project for industry is required and provides an opportunity to add maturity to the computer science skill set before graduation. Starting with the junior year, students may pursue co-op and internship opportunities.

## Career Opportunities

Computer scientists choose jobs in government, industry, teaching, research, agriculture, energy and other areas. A 2019 study showed that four of the eleven jobs with the most potential for growth are in areas taught by the Department. Graduates in computer science might choose a job any of these areas: artificial intelligence, systems analysis, software development/engineering, security, information assurance, cybersecurity, bioinformatics, data science, web development, networking, information system development, database management, technical support, automatic systems, robotics, simulation models and internet of things.

According to the Federal Bureau of Labor Statistics, software engineers, cybersecurity analysts, network systems and data communication analysts, computer scientists and database administrators are expected to be among the fastest growing occupations. Employment of these computer specialists is expected to increase much faster than average. Our programs provide excellent foundations for successful careers in these areas. As an undergraduate student, you will find many opportunities to work part-time as a research assistant on campus, or as a paid intern with a local or regional business.

Graduates of our department have recently accepted employment in major national businesses, including Hewlett-Packard, IBM, AT&T, Apple, CISCO Systems, Google, Adesto, Cargill, SGI, FAST Enterprises, Medtronic, Microsoft, Bobcat, Facebook, Digi-Key, John Deere, Amazon, Intel, Raytheon, Target Corp. and Thomson Reuters. Many have chosen positions in North Dakota and adjoining states. There is a large and growing need for computer professionals in North Dakota.

During the final semester of their senior year, students take part in a capstone program. The objective of the capstone program is to provide the students with an experience that brings together the technical knowledge they have acquired while fostering valuable teamwork skills. This is accomplished by working in small teams on real-life projects. Capstone projects are done in conjunction with corporate, industrial or government clients/sponsors. Recent sponsors include Adventium, Aeritae Consulting, Appareo, ATC, Barglnns, BCBSND, Border States Electric, Botlink, Bushel, Capturis, Collins Aerospace, Fjorge, IBM, Inwerken, John Deere, Marvin Windows, Microsoft, NAU Country, Noridian, OpenStack, Pedigree Technologies, Scheels, and UGPTI.

## The Facilities

The department is located in the Quentin Burdick Building along with Information Technology Services. Students have free access to a wide range of computer systems.

Equipment includes running a cluster of Linux workstations, cyber range, drones, microcomputers, and 3D printers; running virtual machines, Windows, Macs, and peripheral equipment including visualization systems. The department and the University have assumed a leadership role in computer networking through the acquisition and implementation of high-bandwidth network switches on campus. The University also has entered into a six-state consortium for extremely high level networking in the Upper Midwest. The high-performance Center for Computationally Assisted Science and Technology (CCAST) is available. We are also a charter member of Internet2 and have connectivity to the national vBNS research network. The department maintains several Web servers with class assignments and other information which are accessed by thousands of users each day. The University provides more than 600 computers for student use. Internet usage is unlimited for students.

## High School Preparation

You should have the basic college preparatory courses in high school. Courses that develop the ability to think logically, to organize and to analyze are especially recommended (e.g., algebra, geometry, trigonometry, statistics and calculus).

## Plans of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

### Major Requirements

#### Major: Computer Science

**Degree Type:** B.S.

**Minimum Degree Credits to Graduate:** 120

## University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		6
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		6
<b>Wellness (W) <sup>†</sup></b>		2
<b>Cultural Diversity (D) <sup>*†</sup></b>		
<b>Global Perspectives (G) <sup>*†</sup></b>		
Total Credits		39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Major Requirements

A Grade of 'C' or better is required for all CSCI prefix courses.

Code	Title	Credits
<b>B.S. Computer Science Core Requirements</b>		
CSCI 160	Computer Science I	4
CSCI 161	Computer Science II	4
CSCI 213	Modern Software Development	3
CSCI 222	Discrete Mathematics	3
CSCI 313	Advanced Software Development	3
CSCI 336	Theoretical Computer Science	3
CSCI 366	Database Systems	3
CSCI 372	Comparative Programming Languages	3
CSCI 374	Computer Organization and Architecture	3
CSCI 415	Networking and Parallel Computation	3
CSCI 445	Software Projects Capstone <sup>1</sup>	3
CSCI 467	Algorithm Analysis	3
CSCI 474	Operating Systems Concepts	3
CSCI 489	Social Implications of Computers <sup>1</sup>	3

MATH 165	Calculus I (May satisfy general education category R)	4
MATH 166	Calculus II	4
STAT 367	Probability	3
STAT 368	Statistics	3
<b>Computer Science Electives</b>		<b>9</b>
Electives can be any 300-400 level CSCI prefix courses that are not part of the core requirement or the two MIS courses listed. Note: Students seeking recognition of cyber-security skills should follow the cyber-security section below.		
MIS 412	Computer Crime, Forensics, and Investigation	
MIS 415	Managing Information Technology Security	
Total Credits		67

## Cyber-security

Cyber-security is optional - students interested in pursuing recognition of their achievement in cyber-security core concepts should take the B.S. Core Requirements as indicated above, as well as the additional courses listed here. This sequence satisfies the Computer Science elective courses required for the B.S. degree.

Code	Title	Credits
CSCI 491	Seminar (Cyber-Security Focus)	3
MIS 415	Managing Information Technology Security	3
One of the following:		3
CSCI 473	Foundations of the Digital Enterprise	
CSCI 345	Topics on Personal Computers (Cyber-Security Focus)	
CSCI 499	Special Topics (Cyber-Security Focus)	
MIS 412	Computer Crime, Forensics, and Investigation	
Total Credits		9

<sup>1</sup> Department Capstone: CSCI 445 Software Projects Capstone (typically taken during the last spring semester prior to degree completion) & CSCI 489 Social Implications of Computers (typically taken during the last fall semester prior to degree completion)

Engineering (cannot be ENGR 311 or ENGR 312)		
Math (a course with a number higher than MATH 147, but not MATH 165)		
Statistics (cannot be STAT 330 or STAT 331)		
<b>Proficiency at the second year level in a modern foreign language.</b>		
Total Credits		60

<sup>1</sup> CSCI 445 Software Projects Capstone & CSCI 489 Social Implications of Computers form the department capstone. CSCI 445 is typically taken during the last spring semester and CSCI 489 is typically taken during the last fall semester prior to degree completion.

## Minor Requirements

### Computer Science Minor

#### Minor Requirements

Minimum Required Credits: 17

Code	Title	Credits
<b>Required Courses</b>		
CSCI 213	Modern Software Development	3
Choose one of the following two sequences:		7-8
CSCI 160 & CSCI 161	Computer Science I and Computer Science II	
CSCI 227 & CSCI 161	Computing Fundamentals I and Computer Science II	
Additional Electives: Select 6 or 7 credits to reach minor minimum (at least 3 credits must be CSCI 300-400 level).		6-7
<b>Total Credits</b>		<b>17</b>

### Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- A grade of 'C' or better is required in all courses applied to the computer science minor.

## Computer Science and Mathematics

### Department Information

- **Department Location:**  
Quentin Burdick Building or Minard Hall
- **Department Web Site:**  
[www.ndsu.edu/cs/](http://www.ndsu.edu/cs/)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/computer-science-mathematics/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/computer-science-mathematics/)

This option is available for students who wish to take advantage of the close connections between Computer Science and Mathematics.

### Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>First Year</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>
CSCI 160	4	CSCI 161	4
MATH 129	3	MATH 166	4
MATH 165	4	COMM 110	3
ENGL 110	4	Gen Ed Science/Tech and Lab	4
		Gen Ed Wellness	2-3
			17-18
15			
<b>Second Year</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>
CSCI 213	3	CSCI 313	3
MATH 265	4	MATH 266	3
MATH 270	3	MATH 329	3

STAT 367	3	STAT 368	3
Gen Ed Science/Tech	3	Gen Ed Science/Tech	3
		16	15

<b>Third Year</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>
CSCI 366	3	CSCI 336	3
CSCI 372	3	CSCI 467	3
CSCI 374	3	MATH 300-400 level	3
MATH 420	3	Gen Ed Upper Division Writing	3
Gen Ed Humanities/Fine Art and Cult Diversity	3	Gen Ed Social/Behavioral Sci and Glob Perspective	3
		15	15

<b>Fourth Year</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>
CSCI 489	3	CSCI 445	3
MATH 491	1-5	Additional CSCI (418 or 453) or any 400 Level MATH course	3
MATH 300-400 level	3	Gen Ed Social/Behavioral Science	3
Gen Ed Humanities/Fine Art	3	Elective	4
Elective	3		
		13-17	13

Total Credits: 119-124

## Computer Science and Mathematics

### Department Information

- **Department Location:**  
Quentin Burdick Building or Minard Hall
- **Department Web Site:**  
[www.ndsu.edu/cs/](http://www.ndsu.edu/cs/)
- **Credential Offered:**  
B.S.; B.A.
- **Plan Of Study Sample:**  
[bulletin.ndsu.edu/programs-study/undergraduate/computer-science-mathematics/#planofstudytext](http://bulletin.ndsu.edu/programs-study/undergraduate/computer-science-mathematics/#planofstudytext)

### Major Requirements

#### Major: Computer Science & Mathematics

**Degree Type:** B.A. or B.S.

**Minimum Degree Credits to Graduate:** 120

#### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.

- a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		6
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		6
<b>Wellness (W) <sup>†</sup></b>		2
<b>Cultural Diversity (D) <sup>*†</sup></b>		
<b>Global Perspectives (G) <sup>*†</sup></b>		
Total Credits		39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Major Requirements

A grade of 'C' or better is required in MATH & CSCI prefix courses used toward the major.

Code	Title	Credits
<b>Mathematics Major Requirements</b>		
MATH 129	Basic Linear Algebra	3
MATH 165	Calculus I (May satisfy general education category R)	4
MATH 166	Calculus II	4
MATH 265	Calculus III	4
MATH 266	Introduction to Differential Equations	3
MATH 270	Introduction to Abstract Mathematics	3
MATH 329	Intermediate Linear Algebra	3
MATH 420	Abstract Algebra I	3
Choose 6 credits of 300-400 level Math courses (we recommend two of the following):		6
MATH 421	Abstract Algebra II	
MATH 430	Graph Theory	
MATH 436	Combinatorics	
MATH 488	Numerical Analysis I	
MATH 491	Seminar	2
<b>Computer Science Major Requirements</b>		
CSCI 160	Computer Science I	4
CSCI 161	Computer Science II	4
CSCI 189	Skills for Academic Success <sup>1</sup>	1
CSCI 213	Modern Software Development	3
CSCI 313	Advanced Software Development	3
CSCI 336	Theoretical Computer Science	3

CSCI 366	Database Systems	3
CSCI 372	Comparative Programming Languages	3
CSCI 374	Computer Organization and Architecture	3
CSCI 445	Software Projects Capstone	3
CSCI 467	Algorithm Analysis	3
CSCI 489	Social Implications of Computers	3

**Related Required Courses**

STAT 367	Probability	3
STAT 368	Statistics	3

Select one from the following: 3

CSCI 418	Simulation Models	
CSCI 453	Linear Programming and Network Flows	
Any 400 level Mathematics Course not used to satisfy a requirement above		

Total Credits 80

<sup>1</sup> CSCI 189 is only required for first-time, first-year students—A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take CSCI 189.

**Program Notes**

- Except for courses offered only as pass/fail grading, no course may be taken Pass/Fail.

**Computer Science and Physics**

## Department Information

- **Department Location:**  
Quentin Burdick Building or South Engineering
- **Department Web Site:**  
[www.ndsu.edu/cs/](http://www.ndsu.edu/cs/)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/computer-science-physics/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/computer-science-physics/)

Since the dawn of the computer age, Computer Science and Physics have been closely intertwined disciplines. Computational physics is now an established branch of physics, complementing experiment and theory, that develops and applies computer modeling approaches to the solution of a wide range of physical problems. At the same time, software development (e.g., for graphics and data mining applications) is increasingly inspired by physics. Computer modeling, including simulation and numerical analysis, is an essential component of modern research and development. Correspondingly, the demand is growing for scientists with multidisciplinary training that combines fundamental knowledge of physics and computer science with practical skills in programming and computation. The Computer Science and Physics double major program is designed to allow students to complete the core requirements of both majors in a four-year degree. Graduates of the program will have a unique background qualifying them to work in industry or to pursue graduate studies in physics, computer science, engineering, or other technical fields.

**Plan of Study**

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

Freshman			
Fall	Credits	Spring	Credits

Physics Electives: Select from the following:		6
PHYS 215	Research For Undergraduates	
PHYS 411	Optics for Scientists & Engineers	
PHYS 413	Lasers for Scientists and Engineers	
PHYS 415	Elements of Photonics	
PHYS 463	Statistical Mechanics	
PHYS 481	Condensed Matter Physics	
PHYS 488	Senior Project I (If not used to satisfy project requirement)	
PHYS 489	Senior Project II (If not used to satisfy project requirement)	
MSUM AST	Astronomy courses (300/400-level) with departmental permission.	
<b>Related Required Courses</b>		
MATH 129 or MATH 329	Basic Linear Algebra Intermediate Linear Algebra	3
MATH 165	Calculus I (May satisfy general education category R)	4
MATH 166	Calculus II	4
MATH 265	Calculus III	4
MATH 266	Introduction to Differential Equations	3
MATH 270	Introduction to Abstract Mathematics	3
CSCI 445 or PHYS 488 & PHYS 489	Software Projects Capstone Senior Project I and Senior Project II	3
Total Credits		103

<sup>1</sup> CSCI 189 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take CSCI 189.

## Program Notes

- Except for courses offered only as pass/fail grading, no course may be taken Pass/Fail.

# Construction Engineering

## Department Information

- **Department Location:**  
Engineering Bldg 106

- **Department Phone:**  
701-231-6202
- **Department Web Site:**  
[www.ndsu.edu/construction/](http://www.ndsu.edu/construction/)
- **Credential Offered:**  
B.S.Cons.E.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/construction-engineering/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/construction-engineering/)

The construction industry is one of the largest industries in the United States. It accounts for nearly 8 percent of the nation's gross national product and employs millions of people. The industry is divided into four sectors: residential building construction, industrial construction, commercial building construction, and heavy civil construction. The Department of Construction Management and Engineering provides quality educational programs that prepare nationally competitive undergraduate and graduate students for successful careers in the construction engineering and management professions.

## The Program

Construction Engineering involves the planning, design, and management of construction facilities, such as highways, bridges, airports, railroads, buildings, dams, and reservoirs. The construction of such projects requires the knowledge of engineering, management, economics, and business. Construction Engineering is differentiated from Construction Management from the standpoint of the use of math, science, and engineering to design projects and processes and analyze problems. Construction Engineering is involved in a variety of construction disciplines, including: commercial, residential, transportation, and infrastructure systems. Construction Engineers are also involved in the engineering design of temporary structures, cost estimating, planning and scheduling, material procurement, selection of equipment, and cost control. Due to their diverse skills, there is a very high demand for Construction Engineers.

The Department of Construction Management and Engineering offers a Bachelor of Science in Construction Engineering degree which offers a blend of engineering and construction courses. The program is designed for those who want to work in the construction industry and enjoy the status of a professional engineer. A thorough knowledge of the physical sciences, math, and engineering is developed during the first two years followed by construction management and engineering courses. The technical side of the program is balanced with requirements in writing, humanities, social science, and communications. The program leading to the Bachelor of Science in Construction Engineering degree is accredited by the Engineering Accreditation Commission of ABET, [www.abet.org](http://www.abet.org) (<https://www.abet.org>).

## Program Educational Objectives (PEO)

Program educational objectives (PEO's) are broad statements that describe what graduates are expected to attain within a few years after graduation. Program educational objectives are based on the needs of the program's constituencies. Graduates from the Bachelor of Science in Construction Engineering program are expected to be productive construction engineers who, within the first few years after graduation:

1. Begin to serve in a middle-level project leadership role in their construction engineering career.
2. Acquire and use new knowledge and skills in the construction engineering field.
3. Be respected construction engineers who are valued by their peers, customers, and the general public for their technical expertise and ethical conduct.

## Student Outcomes (SO)

The Program Educational Objectives are further connected to seven Student Outcomes (SO), developed by the Engineering Accreditation Commission of ABET, [www.abet.org](http://www.abet.org), (<https://www.abet.org>) which describe what students are expected to know and be able to do by the time of graduation. These outcomes relate to the skills, knowledge, and behaviors that students acquire in their matriculation through the program. The Student Outcomes are listed below:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

## Faculty and Staff

The Department of Construction Management and Engineering has a group of faculty and staff members dedicated to teaching, advising and career consultation. All full-time faculty members have doctoral degrees. Many of them have professional licenses such as the Professional Engineer (PE) and/or the Certified Professional Constructor (CPC), and have construction related working experiences both in the United States and overseas. Additionally, the department has many Adjunct professors who are currently working in the construction industry in supervisory roles.

## Facilities

The Department of Construction Management and Engineering has well equipped classrooms, computer labs and teaching and research labs for its students. Classrooms used by the department are equipped with a computer, a Blackboard course management system, Internet access, a projector, a document camera, and an apple TV/AirMedia system. In addition, the department maintains a computer lab, a virtual reality lab, a concrete lab and a soils lab and shares laboratory space with the Department of Civil Engineering for the structural, geotechnical and surveying labs. The department has the most updated modern teaching and research equipment such as GPS units, robotic total stations, drones, etc.

## Career Opportunities

Construction engineering graduates are in high demand after graduation by contractors in all types of construction, from design-construction firms to large owners who have continuing construction projects. Positions available include field engineer, office engineer, project engineer, project controls engineer, superintendent and project manager. Starting salary has been between \$50,000 and \$80,000 in the recent years. Summer internships or employment in the construction industry is also available to construction engineering students.

## Industry advisory council

The Industry Advisory Council (IAC) consists of 35 members who specialize in different sectors throughout the construction industry. The IAC helps the program develop the professional body of knowledge appropriate to construction management and engineering. They serve as a liaison between the construction industry and the Department. They advance and support the highest quality faculty, and educational facilities for the student enrolled in the programs. Through active participation, the IAC offers advice, counsel, and provides industry's vision for the program.

## Student Organizations

There are four student organizations in the Department of Construction Management and Engineering: Associated General Contractors of America (AGC), National Association of Home Builders (NAHB), Sigma Lambda Chi (SLC), and Student Advisory Board (SAB). AGC Student Chapter competes each year at the Associated Schools of Construction Competition and the Midwest Construction Quiz Bowl. NAHB Student Chapter competes each year at the Residential Construction Management Competition. SLC is an international construction honor society. SAB provides advising and best practices to first year freshmen, and provides student feedback to the program.

## Scholarship Opportunities

The AGC of North Dakota, the Home Builders Care Foundation (a charitable arm of the Home Builders Association of Fargo-Moorhead), and the NAHB offer annual scholarships to outstanding freshmen and upper class students. In addition, many other scholarships, such as Interstates Construction Management and Engineering Scholarship and J.L. McCormick Memorial Trust Scholarship, are available to students. Students can contact the Office of Admission for more information or check the department website at [https://www.ndsu.edu/construction/current\\_students/scholarships/](https://www.ndsu.edu/construction/current_students/scholarships/).

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

### Major: Construction Engineering

Degree Type: B.S.Cons.E.

Minimum Degree Credits to Graduate: 131

#### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

ME 221	Engineering Mechanics I	3
ME 222	Engineering Mechanics II	3
ME 223	Mechanics of Materials	3
Math Courses Required:		
MATH 128	Introduction to Linear Algebra	1
MATH 165	Calculus I (May satisfy general education category R)	4
MATH 166	Calculus II	4
MATH 259	Multivariate Calculus	3
MATH 266	Introduction to Differential Equations	3
Additional Courses:		
BUSN 431	Business Law I-Contracts, Property and Torts	3
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory (May satisfy general education category S)	4
CHEM 122	General Chemistry II (May satisfy general education category S)	3
ENGR 402	Engineering Ethics and Social Responsibility	1
ENGL 320 or ENGL 321	Business and Professional Writing (May satisfy general education category C) Writing in the Technical Professions	3
GEOL 105 or GEOL 106	Physical Geology (May satisfy general education category S) The Earth Through Time	3
PHYS 252	University Physics II (May satisfy general education category S)	4
STAT 330	Introductory Statistics (May satisfy general education category R)	3
Select one from the following (May satisfy general education category B & G):		3 or 6
ECON 105	Elements of Economics	
ECON 201 & ECON 202	Principles of Microeconomics and Principles of Macroeconomics	

Total Credits

110-113

## Degree Requirements and Notes

- A student must complete at least 60 semester credits of professional level course work in his/her program while in residence and enrolled in the college. Students transferring into the college from programs with professional accreditation are exempt from this residency requirement but are subject to the residency requirement of NDSU.
- A minimum 2.50 cumulative GPA is required for transfer students to be admitted to the B.S. in construction engineering program.
- To satisfy the Gen Ed Category B requirements, a student can choose between two options: ECON 105 plus an additional course within Category B OR ECON 201 and ECON 202. Both options satisfy the Gen Ed Category G requirement.

# Construction Management

## Department Information

- **Department Location:**  
Engineering Bldg 106
- **Department Phone:**  
701-231-6202
- **Department Web Site:**  
[www.ndsu.edu/construction/](http://www.ndsu.edu/construction/)
- **Credential Offered:**  
B.S.Cons.M.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/construction-management/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/construction-management/)

The construction industry is one of the largest industries in the United States. It accounts for nearly 8 percent of the nation's gross national product and employs millions of people. The industry is divided into four sectors including residential building construction, industrial construction, commercial building construction, and heavy civil construction. The Department of Construction Management and Engineering provides quality educational programs that prepare nationally competitive undergraduate and graduate students for successful careers in the construction engineering and management professions.

## The Program

Construction management is a combination of technology, construction techniques, and management to meet the needs of the rapidly growing construction industry. Construction management studies less math and engineering concepts than construction engineering, but focuses more on business related courses. The program is designed to prepare students for the art of achieving maximum profit by efficient use of people, machines, materials and other resources to complete a construction project on time and to the satisfaction of the owner. A meld of engineering, construction, management and business gives the student a background and understanding of a management point of view in the construction industry. The program leading to Bachelor of Science in Construction Management degree is accredited by the American Council for Construction Education (ACCE), <http://www.acce-hq.org>.

A minor in Business Administration offered by the College of Business is required for all B.S. in Construction Management students. Students are required to have a minimum cumulative GPA of 2.50 to be admitted into the minor program. A minor in Business Administration requires a minimum GPA of 2.50 in the courses that satisfy the minor. In addition, a cumulative GPA of 2.50 overall is required to graduate with a Bachelor of Science in Construction Management degree.

## Program Objectives

1. Provide construction students the basic skills necessary to plan, organize, and control resources to manage the overall construction process.
2. Provide construction students the technical knowledge and problem solving skills for a career in construction.
3. Provide construction students the knowledge and skills necessary to identify, define, and compare design alternatives.
4. Provide construction students necessary communication skills for the successful practice of the construction profession.
5. Provide construction students the professional opportunities and skills to pursue lifelong learning within the broader societal context of the construction profession.

The Program Objectives support the department goals defined in the strategic plan that relates to the undergraduate program, and are further connected to the Program Learning Outcomes.

## STUDENT Learning Outcomes

The Construction Management program has adopted the 20 Student Learning Outcomes (SLOs) defined by ACCE as its Student Learning Outcomes. Upon graduation from the Construction Management program, graduates shall be able to:

1. Create written communications appropriate to the construction discipline.
2. Create oral presentations appropriate to the construction discipline.

3. Create a construction project safety plan.
4. Create construction project cost estimates.
5. Create construction project schedules.
6. Analyze professional decisions based on ethical principles.
7. Analyze construction documents for planning and management of construction processes.
8. Analyze methods, materials, and equipment used to construct projects.
9. Apply construction management skills as a member of a multi-disciplinary team.
10. Apply electronic-based technology to manage the construction process.
11. Apply basic surveying techniques for construction layout and control.
12. Understand different methods of project delivery and the roles and responsibilities of all constituencies involved in the design and construction process.
13. Understand construction risk management.
14. Understand construction accounting and cost control.
15. Understand construction quality assurance and control.
16. Understand construction project control processes.
17. Understand the legal implications of contract, common, and regulatory law to manage a construction project.
18. Understand the basic principles of sustainable construction.
19. Understand the basic principles of structural behavior.
20. Understand the basic principles of mechanical, electrical and piping systems.

## **FACULTY AND STAFF**

The Department of Construction Management and Engineering has a group of faculty and staff members dedicated to teaching, advising and career consultation. All full-time faculty members have doctoral degrees. Many of them have professional licenses such as the Professional Engineer (PE) and/or the Certified Professional Constructor (CPC), and have construction related working experiences both in the United States and overseas. Additionally, the department has many Adjunct professors who are currently working in the construction industry in supervisory roles.

## **FACILITIES**

The Department of Construction Management and Engineering has well equipped classrooms, computer labs and teaching and research labs for its students. Classrooms used by the department are equipped with a computer, a Blackboard course management system, Internet access, a projector, a document camera, and an apple TV/AirMedia system. In addition, the department maintains a computer lab, a virtual reality lab, a concrete lab and a soils lab and shares laboratory space with the Department of Civil Engineering for the structural, geotechnical and surveying labs. The department has the most updated modern teaching and research equipment such as GPS units, robotic total stations, drones, etc.

## **CAREER OPPORTUNITIES**

Construction management graduates are in high demand after graduation by contractors in all types of construction, from general contractors to specialty contractors. Positions available include superintendent, project manager, and construction executive. Starting salary has been between \$50,000 and \$80,000 in the recent years. Summer internships or employment in the construction industry is also available to construction management students.

## **INDUSTRY ADVISORY COUNCIL**

The Industry Advisory Council (IAC) consists of 35 members who specialize in different sectors throughout the construction industry. The IAC helps the program develop the professional body of knowledge appropriate to construction management and engineering. They serve as a liaison between the construction industry and the Department. They advance and support the highest quality faculty, and educational facilities for the student enrolled in the programs. Through active participation, the IAC offers advice, counsel, and provides industry's vision for the program.

## **STUDENT ORGANIZATIONS**

There are four student organizations in the Department of Construction Management and Engineering: Associated General Contractors of America (AGC), National Association of Home Builders (NAHB), Sigma Lambda Chi (SLC), and Student Advisory Board (SAB). AGC Student Chapter competes each year at the Associated Schools of Construction Competition and the Midwest Construction Quiz Bowl. NAHB Student Chapter competes each year at the Residential Construction Management Competition. SLC is an international construction honor society. SAB provides advising and best practices to first year freshmen, and provides student feedback to the program.

## **SCHOLARSHIP OPPORTUNITIES**

The AGC of North Dakota, the Home Builders Care Foundation (a charitable arm of the Home Builders Association of Fargo-Moorhead), and the NAHB offer annual scholarships to outstanding freshmen and upper class students. In addition, many other scholarships, such as Interstates Construction Management and Engineering Scholarship and J.L. McCormick Memorial Trust Scholarship, are available to students. Students can contact the Office of Admission for more information or check the department website at [https://www.ndsu.edu/construction/current\\_students/scholarships/](https://www.ndsu.edu/construction/current_students/scholarships/).

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>Freshman</b>

Total Credits: 124

An overall minimum CGPA of 2.50 and a minor in Business Administration with a minor GPA of 2.50 are required to graduate with a B.S. in Construction Management.

\*All science courses require the companion lab with the exception of geology.

\*\*To be eligible for enrollment into 300/400 level courses offered by the College of Business requires application for a minor in Business Administration(BA).

\*\*\* To satisfy the Gen Ed Category B, a student can choose between two options: ECON 105 plus an additional course within Category B OR ECON 201 and ECON 202. Both options satisfy the Gen Ed Category G requirements and the requirements for the Business Administration minor.

Gen Ed Category description can be found on the General Education page (p. 88).

## Major Requirements

### Major: Construction Management

**Degree Type:** B.S.Cons.M.

**Minimum Credits Required for Degree:** 124

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I

BA Minor 300/400 Elec. II		3
BA Minor 300/400 Elec. III		3
Students must apply for the minor through the College of Business and maintain a minimum 2.50 cumulative GPA to be eligible to enroll in all 300/400 level courses offered by the College of Business		
Total Credits		103-106

## Degree Requirements and Notes

- A student must complete at least 60 semester credits of professional level course work in his/her program while in residence and enrolled in the College of Engineering. Students transferring into the College of Engineering from programs with professional accreditation are exempt from this residency requirement but are subject to the University residency requirement.
- An overall minimum cumulative GPA of 2.50 in all courses and a minor in Business Administration with a minor GPA of 2.50 are required to graduate with a B.S. in Construction Management.
- A cumulative GPA of 2.50 is required for both internal and external transfer students into this program.
- To satisfy the Gen Ed Category B requirements, a student can choose between two options: ECON 105 plus an additional course within Category B OR ECON 201 and ECON 202. Both options satisfy the Gen Ed Category G requirement and the requirements for the BA minor.

# Creative Writing

---

## Department Information

- **Department Location:**  
Minard Hall
- **Department Phone:**  
701-231-7143
- **Department Web Site:**  
[www.ndsu.edu/english/](http://www.ndsu.edu/english/)
- **Credential Offered:**  
Minor
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/creative-writing/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/creative-writing/)

The Creative Writing minor develops flexible and innovative thinkers who can apply their ideas and communication abilities in whatever career they choose. A Creative Writing minor offers students a rigorous practice in the craft of multiple poetic and storytelling genres, as well as opportunities to develop research skills, and skills in close reading and analysis of literary texts. Students pursuing this minor take a sequence of seven courses designed to develop design thinking, project management skills, analytic abilities, writing skills, and an understanding of creative processes. These skills are essential to the success of businesses and organizations in our region's fast-changing economy. The minor pairs well with majors in English Studies, Communication, Visual Arts, Theatre, Music, and other fields that value design thinking and creativity.

## Criminal Justice

### Department Information

- **Department Location:**  
Putnam Hall
- **Department Phone:**  
701-231-8567
- **Department Web Site:**  
[www.ndsu.edu/cjps/](http://www.ndsu.edu/cjps/)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/criminal-justice/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/criminal-justice/)

Criminal justice as a discipline is concerned with the broad areas of law enforcement, courts and corrections, as well as criminological and legal theories which inform practice in these areas. The work of criminal justice practitioners may include police patrol, criminal investigations, supervising juveniles on probation, counseling and correctional work in institutions, group homes, or halfway houses, and other rewarding careers. Within these and other career fields, criminal justice practitioners enjoy exciting professional challenges and opportunities for serving society and helping people.

### The Program

During the past few years, the demand for professionals in criminal justice-related careers has increased. Many criminal justice agencies and program administrators see a continuing need for qualified professionals. The criminal justice program at North Dakota State University has graduated students who have pursued criminal justice careers in local, state and federal agencies throughout the United States. The program is designed so our graduates will succeed in both beginning and advancing their criminal justice careers.

## Faculty and Facilities

The criminal justice program is administered by the Department of Criminal Justice and Political Science. Faculty in the program provides teaching, research and practical expertise related to many issues in criminal justice. The Fargo-Moorhead community provides a rich source of criminal justice education through a wide variety of criminal justice agencies that work with student interns. The department is located in Putnam Hall 102.

## PEACE OFFICER TRAINING AND LICENSURE

The Department of Criminal Justice and Political Science has a relationship with Alexandria Community and Technical College in Alexandria, MN, which permits our students to attend the peace officer skills program there and ultimately obtain eligibility for peace officer licensure in Minnesota.

NDSU criminal justice students are able to complete the skills training during the summer after their junior or senior year. Students interested in local law enforcement careers in North Dakota may complete the Alexandria skills training, or may take Lake Region State College's peace officer skills training program in Fargo or in Devils Lake, ND. More information about both skills training program options, and the career opportunities that follow, can be obtained from the Department of Criminal Justice and Political Science.

## Career Opportunities

Students graduating from this program have experienced much success in pursuing their career goals. Our alumni work in law enforcement, courts, correctional agencies, probation and parole departments and do so at the local, state and federal level. These jobs typically come with good salaries and benefits, although they vary from agency to agency. Types of agencies that have employed our graduates include police departments, sheriff's departments, planning agencies, group homes, juvenile courts, family courts, probation and parole departments, juvenile and adult correctional institutions, halfway houses, and many federal agencies (e.g. U.S. Marshals Service, Secret Service, and federal probation).

## The Curriculum

The criminal justice curriculum is an interdisciplinary program drawing on the social sciences, behavioral sciences, humanities, and the law. Course requirements are based on the idea that our students should work through a curriculum that equips them with broad knowledge of the criminal justice system and criminological theory, and prepares them for a wide range of duties and professional responsibilities. The department also offers a minor in criminal justice and partners with the Department of Accounting and Information Systems on a fraud investigation minor.

## Internship Program

Many students elect to complete an internship. This is usually done during their junior or senior year. Internship opportunities exist in many agencies in North Dakota and Minnesota and can be done at any time during the calendar year. By completing an internship, the student is able to combine the theoretical and applied aspects of professional preparation. Internship experience is an important element of successful job placement.

## Criminal Justice Club

Students may expand their knowledge of criminal justice and career opportunities through the Criminal Justice Club. This student association allows participants to increase their knowledge and clarify career interests through field trips and meetings with professionals.

## Accelerated Master's Program

Exceptional undergraduate students interested in pursuing a master's degree in criminal justice may apply in their junior year for admission into the department's accelerated master's program. This program allows students to complete certain courses which will count for both their bachelor's and master's degrees in criminal justice, thereby shortening the time it takes to complete the master's degree. Students interested in this option should consult with the department's graduate program coordinator or with their adviser.

## The Faculty

Jeffrey Bumgarner, Professor and Department Head, Ph.D., 2000, University of Minnesota

Carol Archbold, Professor, Ph.D., 2002, University of Nebraska - Omaha

Sarah Boonstoppel, Assistant Professor, Ph.D., 2014, University of Maryland, College Park

Steven Briggs, Associate Professor, Ph.D., 2007, University of Nebraska - Omaha

Andrew Myer, Assistant Professor, Ph.D., 2010, University of Cincinnati

Amy Stichman, Associate Professor, Ph.D., 2003, University of Cincinnati

Kevin Thompson, Professor, Ph.D., 1986, University of Arizona

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>First Year</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>
CJ 201	3	CJ 230	3
MATH 104 or 103	3	CJ 210 or 270	3
ENGL 110	4	ENGL 120	3
ANTH 111 (Cultural Diversity)	3	COMM 110	3
PSYC 111	3	SOC 110	3
	16		15
<b>Second Year</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>
CJ 270 or 210	3	CJ 325 or POLS 325	3
POLS 230	3	AHSS Requirement	3
STAT 330	3	Humanities / Fine Arts Gen Ed	3
Science Gen Ed w/ Lab	4	Science/Tech Gen Ed (Global Perspectives)	3
Minor	3	Minor	3
	16		15
<b>Third Year</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>
CJ 406 or 407	3	CJ 460	3
CJ 330 or POLS 431	3	CJ 410 or 461	3
ENGL 320 or 358	3	Science/Tech Gen Ed	3
Humanities / Fine Arts Gen Ed	3	AHSS Requirement	3
Wellness Gen Ed	2	Minor	3
	14		15
<b>Fourth Year</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>
CJ 465	3	CJ elective	3
CJ 407 or 406	3	CJ elective	3
CJ 489	1	Minor	3
Minor	3	Minor	3
Minor	3	Minor or 300-400 level elective	3

Total Credits: 119

## Criminal Justice

### Department Information

- **Department Location:**  
Putnam Hall
- **Department Phone:**  
701-231-8567
- **Department Web Site:**  
[www.ndsu.edu/cjps/](http://www.ndsu.edu/cjps/)
- **Credential Offered:**  
B.S.; B.A.

- **Plan Of Study Sample:**  
bulletin.ndsu.edu/programs-study/undergraduate/criminal-justice/#planofstudytext

## Major Requirements

### Major: Criminal Justice

**Degree Type:** B.A. or B.S.

**Minimum Degree Credits to Graduate:** 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		6
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		6
<b>Wellness (W) <sup>†</sup></b>		2
<b>Cultural Diversity (D) <sup>*†</sup></b>		
<b>Global Perspectives (G) <sup>*†</sup></b>		
Total Credits		39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Arts, Humanities, and Social Sciences

### Degree Requirements

**Bachelor of Science (B.S.) Degree** – The completion of a minor program of study, a second major, or a second degree is required.

**Bachelor of Arts (B.A.) Degree** – Second year language proficiency at college level required.

### Arts, Humanities and Social Sciences College Requirements

An additional 9 credits are required by the College of Arts, Humanities and Social Sciences for all Bachelor of Science and Bachelor of Arts degree programs of study, except the Bachelor of Fine Arts degree, the Bachelor of Music degree, the Bachelor of Science in Architecture degree, and the Bachelor of Science degree with a major in Environmental Design:

Code	Title	Credits
<b>AH&amp;SS College Requirements</b>		
Courses used to satisfy any general education requirement cannot be used to also count toward the AH&SS College Requirements. A minimum of three credits is required in each of the 3 following areas for a total of 9 credits. Choose only those courses with the prefixes listed for each area. A course with the WGS prefix can only be used in one area.		
<b>Area One: Humanities</b>		3
ARB, ENGL, FREN, GERM, HIST, HUM, PHIL, RELS, SPAN, or WGS		
<b>Area Two: Social Sciences</b>		3
ANTH, CJ, COMM, EMGT, POLS, SOC, or WGS		
<b>Area Three: Fine Arts</b>		3
ARCH, ART, ENVD, LA, MUSC, or THEA		
Total Credits		9

## Major Requirements

Code	Title	Credits
CJ 201	Introduction to Criminal Justice	3
CJ 210	Introduction to Policing	3
CJ 230	Criminology	3
CJ 270	Introduction to Corrections	3
CJ 325	Applied Research Methods	3
or POLS 325	Applied Research Methods	
CJ 330	Criminal Law and Procedure	3
CJ 406	Crime and Delinquency	3
CJ 407	Deviant Behavior	3
CJ 460	Criminal Court System	3
CJ 461	Corrections	3
or CJ 410	Police & Society	
CJ 465	Women and Minorities in Criminal Justice	3
CJ 489	Senior Capstone in Criminal Justice	1
<b>Criminal Justice Elective: Select 3 additional CJ prefix credits.</b>		3
Using CJ 494 or CJ 496 to fulfill these electives requires permission from the department chairperson.		
Additional requirements:		
PSYC 111	Introduction to Psychology (May satisfy general education category B)	3
SOC 110	Introduction to Sociology (May satisfy general education category B)	3
STAT 330	Introductory Statistics (May satisfy general education category R)	3
Total Credits		46

## Degree Requirements and Notes

- To graduate with a Criminal Justice major, a student must have a minimum GPA of 2.75 in CJ prefix courses and an overall cumulative GPA of 2.5.
- Only one re-take per Criminal Justice (CJ) course is allowed.

## Minor Requirements

### Criminal Justice Minor

#### Minor Requirements

Required Credits: 18

Code	Title	Credits
<b>Required Courses</b>		
CJ 201	Introduction to Criminal Justice	3
CJ 210	Introduction to Policing	3
CJ 230	Criminology	3
CJ 270	Introduction to Corrections	3

CJ 300-400 Level	6 credits of CJ credits at the 300-400 level required. Using CJ 494 and CJ 496 to fulfill these electives requires permission from the department chairperson.	6
Total Credits		18

- \* Students who do not complete a Research Methods course in their major program of study will be required to complete CJ 325 Applied Research Methods as part of their minor requirement.

### Minor Requirements and Notes

- To graduate with Criminal Justice minor, a student must have a minimum GPA of 2.75 in CJ prefix courses and a cumulative GPA of 2.5.
- Only one re-take per CJ course is allowed.

## Crop and Weed Science

### Department Information

- **Department Location:**  
Loftsgard Hall
- **Department Phone:**  
701-231-7971
- **Department Email:**  
ndsu.plantsciences@ndsu.edu
- **Department Web Site:**  
[www.ag.ndsu.edu/plantsciences/undergraduate/crop-weed](http://www.ag.ndsu.edu/plantsciences/undergraduate/crop-weed)
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/crop-weed-science/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/crop-weed-science/)

The Crop and Weed Sciences (CWS) major in the Department of Plant Sciences is the study of grain and forage crop production, weed science, genetics, plant breeding, crop physiology and plant biotechnology. North Dakota is consistently the nation's leader for production of hard red spring wheat, durum wheat, barley, flax, dry edible beans, canola, dry peas, lentils and sunflower. North Dakota also ranks in the top 10 states for production of several other agronomic crops, including oat, rye, sugarbeet, and grass hay, and usually ranks third in total acreage of crops harvested. Income from sales of crops accounts for more than half of the North Dakota farmers' annual cash income. Crops utilized as livestock feed account for much of the cash income credited to livestock sales. Thus, North Dakota State University offers a setting well-suited for the study of crop and weed sciences.

### Career Opportunities

Usually, more employment opportunities are available in CWS than there are qualified graduates. Producers require annual inputs such as seed, fertilizers and herbicides, so they seek assistance in sales or service areas such as crop consulting, chemical application and soil testing each year. Therefore, opportunities for CWS graduates usually have been more stable than in employment areas where inputs can be deferred when income is low. Also, salaries for CWS graduates are at or near the top among all graduates in agriculture due to the high demand for agronomists by many companies.

The employment opportunities in CWS can best be summarized by the jobs that our graduates have accepted. Our graduates have been employed as crop production consultants (agronomists); marketing experts for herbicides, fertilizers and other agricultural chemicals; managers of farm service centers for cooperatives and elevators; agents in the production and marketing of certified seeds; research technicians for private companies and universities; natural resources conservationists and agents for other governmental agencies; county agricultural extension agents; field representatives for sugarbeet or food processing companies; farm managers; farm insurance agents; research associates with private plant breeding companies; and persons involved in the reclamation of strip-mined land.

Typically 10 to 15 percent of the CWS graduates at NDSU return to farming or ranching and about 15 percent continue their studies to receive graduate degrees. The median starting salary for a CWS graduate with a bachelor's degree was \$45,000 with \$4,000 median bonus in 2018. In addition, many employers provide health and retirement benefits, and some provide a vehicle and cell phone.

Many employers hire undergraduate students as interns for the summer months, and some hire for spring-summer semester or summer-fall semester periods. Several faculty hire students to help with research activities, and the Department of Plant Sciences also sponsors summer interns with an expressed interest in graduate school. The opportunities for summer interns, beginning with students between their freshman and sophomore years, have exceeded the supply of students for several years. The salary for interns often exceeds the income for alternative summer jobs. An internship provides excellent work experience and often results in a graduating senior being hired earlier and with a higher salary than students without comparable experience.

## Financial Aid and Scholarships

Loans, scholarships, grants and the work-study program are available through Financial Aid and Scholarships. Students requiring assistance may contact the Office of Financial Aid and Scholarships or One Stop.

The Department of Plant Sciences awards several scholarships for use during the freshman, sophomore, junior and senior years. Additionally, scholarships are awarded to freshmen students by the College of Agriculture, Food Systems, and Natural Resources prior to enrollment. Applications for all college and departmental scholarships may be applied for online between December 1 and March 1, annually. Also, many undergraduate students are employed part-time during the school year and full-time during the summer months to assist with research or teaching activities.

## Extra-Curricular Opportunities

The department sponsors the NDSU Agronomy Club. The Agronomy Club invites industry and academic experts to speak about professional opportunities and activities at club meetings. The club also arranges trips to local agriculture businesses and arranges community outreach activities. The Agronomy Club participates in regional and national contests that involve crop production and weed science. And the club annually attends conventions to learn about several aspects of agriculture in the North Central region.

## curriculum Options

The department offers four options: agronomy, biotechnology, science and weed science. All students majoring or double majoring in CWS must meet the listed requirements. Students interested in a specific option will replace several of the elective courses listed in the sample curriculum with specific courses appropriate for that option.

- **Agronomy** – This option is the most popular. It deals with the technical aspects of agricultural production and management. It provides the most elective credits, which allows students to select courses that complement special interests in farming, marketing, business management, county extension work, etc.
- **Biotechnology** – This option is intended for students who wish to work as a technician or pursue graduate study in the crop biotechnology area.
- **Science** – This option deals with application of chemistry, botany, mathematics and physics to CWS. It is an excellent curriculum option for students intending to pursue a graduate degree in CWS.
- **Weed Science** – This option, which emphasizes proper use of herbicides and other agricultural chemicals, meets the demand for qualified personnel in marketing and application of agricultural chemicals. Also, this option provides a good background for crop production consultants (agronomists) and plant protection careers. The greatest emphasis is placed on weed control, but additional courses in entomology, plant pathology and soil science are required.

In addition, some faculty in plant sciences advise students interested in the Biotechnology and General Agriculture majors. The Biotechnology major is an interdisciplinary program that stresses basic and applied science courses and lab experience to prepare students for employment in the biotechnology industry or for graduate study. The General Agriculture program exposes students to disciplines within agriculture for careers with diverse course needs. This exposure is strengthened through selection of pertinent coursework in a minimum of four discipline areas.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>First Year</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Major Requirements

Code	Title	Credits
<b>Required Courses for Crop &amp; Weed Sciences</b>		
PLSC 189	Skills for Academic Success	1
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	4
BIOL 151 & 151L	General Biology II and General Biology II Laboratory	4
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory (May satisfy general education category S)	4
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory (May satisfy general education category S)	4
ECON 201	Principles of Microeconomics (May satisfy general education category B and G)	3
ENT 350	General Entomology	3
PLSC 110	World Food Crops (May satisfy general education category S)	3
PLSC 215	Weed Identification	1
PLSC 225	Principles of Crop Production	3
PLSC 312	Expanding the Boundaries of Learning with Service	1
PLSC 315 & 315L	Genetics and Genetics Laboratory (May satisfy general education category S)	4
PLSC 320	Principles of Forage Production	3
PLSC 323	Principles of Weed Science	3
PLSC 444	Applied Plant Breeding and Research Methods	3
PLSC 455	Cropping Systems:An Integrated Approach	3

PLSC 491	Seminar	1
PPTH 324	Introductory Plant Pathology	3
SOIL 210	Introduction to Soil Science	3
STAT 330	Introductory Statistics (May satisfy general education category R)	3
<b>Options: Select one of four options listed below.</b>		<b>19-30</b>
The standard option for this major is Agronomy. Students who wish to declare a specific option must officially declare that option with the Office of Registration and Records.		
Total Credits		76

<sup>1</sup> AGRI189 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take AGRI 189.

### Agronomy Option - 19-20 Credits

For students interested in production agriculture; this option provides the most flexibility in course selection.

Code	Title	Credits
MICR 202 & 202L	Introductory Microbiology and Introductory Microbiology Lab	3
PLSC 380	Principles of Plant Physiology	3
CHEM 240 or BIOC 260 or BIOL 461	Survey of Organic Chemistry Elements of Biochemistry Plant Ecology	3-4
MATH 103	College Algebra (or higher)	3
PLSC 300-400	(no more than 2 credits of co-op)	4
SOIL 322	Soil Fertility and Fertilizers	3
Total Credits		19-20

### Biotechnology Option - 19-21 Credits

For students who wish to work in the biotechnology industry or pursue graduate study in crop biotechnology.

Code	Title	Credits
BIOC 460	Foundations of Biochemistry and Molecular Biology I	3
PLSC 380	Principles of Plant Physiology	3
MATH 105 or MATH 146	Trigonometry Applied Calculus I	3-4
MICR 350 & 350L	General Microbiology and General Microbiology Lab	5
PLSC 453 or PLSC 431	Advanced Weed Science Intermediate Genetics	2-3
PLSC 484	Plant Tissue Culture and Biotechnology	3
Total Credits		19-21

### Science Option - 30 Credits

For students interested in advanced study and want more foundation studies.

Code	Title	Credits
MICR 202 & 202L	Introductory Microbiology and Introductory Microbiology Lab	3
PLSC 380	Principles of Plant Physiology	3
CHEM 341 & 341L	Organic Chemistry I and Organic Chemistry I Laboratory	4
MATH 146	Applied Calculus I	4
PLSC 300-400	(No more than 2 credits of co-op may be used)	4

Science and Math Electives	12
Total Credits	30

### Weed Science Option - 27-28 Credits

For students interested in crop consulting, weed science, and plant protection areas.

Code	Title	Credits
MICR 202 & 202L	Introductory Microbiology and Introductory Microbiology Lab	3
PLSC 380	Principles of Plant Physiology	3
CHEM 240 or BIOC 260	Survey of Organic Chemistry Elements of Biochemistry	3-4
MATH 103	College Algebra (or higher level)	3
PLSC 433	Weed Biology and Ecology	2
PLSC 453	Advanced Weed Science	2
ENT 431	Principles of Insect Pest Management	3
PPTH 454	Diseases Of Field and Forage Crops	3
SOIL 322	Soil Fertility and Fertilizers	3
Total Credits		25-26

### Degree Requirements and Notes

- The program of study allows no more than 6 credits of cooperative education (co-op) to be counted toward degree requirements.

## Minor Requirements

### Crop & Weed Science Minor

#### Minor Requirements

Required Credits: 18

Code	Title	Credits
<b>Required</b>		
PLSC 110	World Food Crops	3
PLSC 225	Principles of Crop Production	3
<b>Elective Courses: Select two of the following:</b>		6-7
PLSC 315 & 315L	Genetics and Genetics Laboratory (both must be taken to count as one selection)	
PLSC 320	Principles of Forage Production	
PLSC 323	Principles of Weed Science	
<b>Elective Courses:</b>		5-6
Other courses approved by the department:		
PLSC 215	Weed Identification	
SOIL 210	Introduction to Soil Science	
ENT 350	General Entomology	
PPTH 324	Introductory Plant Pathology	
PLSC 300-400	Level Course	
Total Credits		18-19

### Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- Students must earn a minimum 2.00 GPA for the minor requirements.

## Dietetics

Department Information

- **Department Location:**  
E. Morrow Lebedeff Hall
- **Department Phone:**  
701-231-7474
- **Department Web Site:**  
[www.ndsu.edu/hnes/undergraduate\\_programs/dietetics/](http://www.ndsu.edu/hnes/undergraduate_programs/dietetics/)
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/dietetics/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/dietetics/)

## Background Information

North Dakota State University has enjoyed a long-standing reputation in food and nutrition. Since 1925, NDSU has educated dietitians who are active nationwide in the profession of dietetics and leaders in professional organizations. The undergraduate program in dietetics is one of the finest in the nation. There are two undergraduate dietetics options at NDSU—the dietitian education program (DEP) with a concentration in community and sports nutrition, and the didactic program in dietetics (DPD).

A registered dietitian is a dietetic practitioner who has completed at least four years of college and earned a Bachelor of Science degree from an accredited program, as well as completing 1200 hours of supervised practice. To become registered, a dietitian must pass a national registration examination. Dietitians are required to update their knowledge in continuing education during their careers. Beginning in 2024, all new dietitians entering the workforce will also be required to hold a master's degree.

## Dietitian Education Program Option - Selective Admission

### BS in Dietetics and Nutrition

The DEP option coordinates the required 1,200 hours of supervised practice with academic courses during the professional program. The junior and senior years of study form the full-time professional program with a concentration in community nutrition. Acceptance into the DEP is limited. Transfer students are encouraged to contact the department early on for information if they intend to transfer to NDSU and enter the DEP. The application deadline is January 1 of the sophomore year. Applicants must have a minimum grade point average (GPA) of 3.0 with a 2.75 science GPA. Students graduate at the end of four years with the necessary preparation to take the Commission on Dietetic Registration exam. The DEP is accredited by the Academy of Nutrition and Dietetics Accreditation Council for Education in Nutrition and Dietetics (ACEND). This program is being phased out due to changes for entry-level requirements that will take effect in 2024. To be eligible for this option, students will need to apply to the professional program on or before spring of 2021.

### Accelerated BS/MS in Dietetics and Nutrition

Due to the upcoming change in educational requirements for entry-level dietitians, NDSU developed an accelerated, coordinated training program for dietitians. The Accelerated BS/MS in Dietetics and Nutrition combines the required 1200 hours of supervised practice with a Bachelor of Science in Dietetics and a Master of Science in Exercise Science and Nutrition. The accelerated program offers the community nutrition concentration as well as an additional, optional concentration of sports nutrition. Students graduate at the end of five years with the necessary preparation to take the Commission on Dietetic Registration exam based on the 2024 standards. Acceptance to the program is limited. Transfer students are highly encouraged to contact the department early on for information if they intend to transfer to NDSU and enter the accelerated program. Students will complete a 3-phase application for this program. Students apply to the dietetics option by January 1 of year 2 (sophomore year), petition the graduate school the summer after year 2 (sophomore year) to apply to the accelerated option, and complete a graduate school application in the fall of year 3 (junior year). The Graduate Registration Exam (GRE) is NOT required for application. Students begin the program during the spring of year 3 (junior year). Applicants must have a minimum grade point average (GPA) of 3.5 with a 2.75 science GPA. The Accelerated BS/MS in Dietetics and Nutrition is accredited by the Academy of Nutrition and Dietetics Accreditation Council for Education in Nutrition and Dietetics (ACEND).

## Didactic Program in Dietetics - Selective Admission

The DPD includes all academic course requirements of the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Graduates earn a Bachelor of Science degree in dietetics. The application deadline is January 1 of the sophomore year. Applicants must have a minimum GPA of 3.0 with a 2.75 science GPA. Students accepted in the DPD should be aware that in order to become a Registered Dietitian they must complete an internship (DI), and should have a minimum 3.25 cumulative GPA. If the GPA is lower than that, it is less likely a student will be accepted into a DI. Work experience, volunteer or paid, in healthcare food service, or some other type of nutrition or community experience will enhance a student's chance to receive a DI. A student is eligible to take the registration examination to become a registered dietitian following successful completion of a DI. Dietetic internships are available across the United States and range in length from six to 12 months. Beginning in 2024, all new dietitians entering the workforce will also be required to hold a master's degree in addition to completing the DPD and DI. This program is also accredited by ACEND.

## Additional Information

### Career Opportunities

Dietitians are employed in facilities such as hospitals, clinics and long-term care, providing nutrition therapy as well as foodservice administration. Dietitians work in various fields including high school, college, and professional sports as sports dietitians, in business as sales or educational professionals, for commercial and government establishments, or as dietetic practitioners in community settings and public health. Some registered dietitians work for food commodity groups such as the Dairy Council or Wheat Commission. Dietitians work in education by teaching dietetics, nutrition and foodservice management in colleges, universities, medical schools and public school systems. In community settings, dietitians provide counseling and nutritional services for city and county health departments, older American feeding programs, child care centers, school foodservice programs and in retail settings like grocery stores. Dietitians also work in wellness centers, hospitals and consulting positions as part of the health promotion team.

The practice of dietetics is continuously changing as more research is conducted on foods and on the role of food in human health. Many dietitians work in hospital settings, either in clinical management or nutrition therapy as clinical dietitians. Clinical dietitians who work in nutrition therapy assess the nutritional needs of patients, plan menus, recommend or prescribe diets and nutritional support for patients, consult with physicians and direct educational programs on nutrition and special diets. They are members of the interdisciplinary team both in healthcare and wellness facilities.

### Career Outlook

Placement surveys conducted in the Department of Health, Nutrition, and Exercise Sciences at NDSU show that more than 90 percent of the dietetics graduates obtain employment in their field within four months of graduation. It should be pointed out that employment is most favorable outside of Fargo. In recent study, it was projected there will be a continued demand for dietitians in both traditional and nontraditional areas for years to come. During college, many opportunities are available for students to obtain experience in the field. Some of those opportunities are offered through multiple healthcare facilities such as acute care hospitals and nursing homes, foodservice in a variety of venues, and public health service.

### Academic Advisement

The Department of Health, Nutrition, and Exercise Sciences prides itself on giving individual attention and advisement to each student. A faculty advisor is assigned to each dietetics major. The academic advisor helps students set goals for their college work, helps them choose courses and encourages them to seek community work experience during their college career. In addition to the academic advisor, each incoming freshman and transfer student is assigned a student advisor to help with routine questions and to give assistance in adjusting to college life.

### High School Preparation

Students interested in dietetics should have a background in the natural sciences and mathematics. Strong communication skills, both oral and written, is an advantage to students considering dietetics.

### Scholarships

Numerous scholarships are available through the College of Human Sciences and Education and the Academy of Nutrition and Dietetics. Contact the department for more information or visit: [https://www.ndsu.edu/hse/student\\_resources/hde\\_scholarships/](https://www.ndsu.edu/hse/student_resources/hde_scholarships/)

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<sup>1</sup> Accelerated BS/MS in Dietetics and Nutrition Students will take HNES 658 Advanced Medical Nutrition Therapy in place of HNES 458 and HNES 660 Leadership and Communication in Dietetics in place of HNES 460.

<sup>2</sup> These courses are taken by Accelerated BS/MS in Dietetics and Nutrition students. Undergraduate DEP students do not take these.

## Accelerated BS/MS in Dietetics and Nutrition Degree Requirements

- If a student is interested in this option, they should speak with the Undergraduate Advisor for Dietetics in the College of Human Development & Education Academic Advising Center located in EML 270.
- Students intending to pursue the Accelerated option will need a 3.5 overall GPA and a 2.75 science GPA by the end of their 4th and 5th semesters to be eligible for the program.
- Students will also be required to complete a Combined/Accelerated Degree Program Declaration Form during the summer after semester 4 and then apply to the Graduate School during semester 5.
- GRE is not required.

## Dietetics

### Department Information

- **Department Location:**  
E. Morrow Lebedeff Hall
- **Department Phone:**  
701-231-7487
- **Department Web Site:**

[www.ndsu.edu/undergraduate\\_programs/dietetics/](http://www.ndsu.edu/undergraduate_programs/dietetics/)

- **Credential Offered:**  
B.S.; B.A.
- **Plan Of Study Sample:**  
[bulletin.ndsu.edu/programs-study/undergraduate/dietetics/](http://bulletin.ndsu.edu/programs-study/undergraduate/dietetics/)

## Major Requirements

### Major: Dietetics

Option: Dietitian Education Program with Gerontology Concentration (DEP)

Option: Didactic Program in Dietetics (DPD)

**Degree Type: B.S.**

**Minimum Degree Credits to Graduate: 120**

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		<b>12</b>

## Degree Requirements and Notes

- A grade of 'C' or better is required for transfer courses in dietetics and food and nutrition.
- Minimum GPA requirements must be met (3.0 overall and 2.75 in sciences including BIOC 260, BIOL 220/L, BIOL 221/L, CHEM 117, HNES 250, and MICR 202/L)

- A grade of 'C' or better is required for all required science courses (BIOC 260, BIOL 220/L, BIOL 221/L, CHEM 117, MICR 202/L)
- A grade of 'B' or better is required for HNES 250 - Nutrition Science

Code	Title	Credits
<b>Accelerate BS/MS in Dietetics and Nutrition</b>		
HNES 658	Advanced Medical Nutrition Therapy *	3-4
HNES 660	Leadership and Communication in Dietetics *	3

\* Students approved to participate in the accelerated program (bachelors to masters program) will complete HNES 658 Advanced Medical Nutrition Therapy and HNES 660 Leadership and Communication in Dietetics in place of these 400 level courses.

### Accelerate BS/MS in Dietetics and Nutrition Degree Requirements and Notes

- If a student is interested in this option, they should speak with the Undergraduate Advisor for Dietetics in the College of Human Development & Education Academic Advising Center located in EML 270.
- Students intending to pursue the Accelerated option will need a 3.5 overall GPA and a 2.75 science GPA by the end of their 4th and 5th semesters to be eligible for the program.
- Students will also be required to complete a Combined/Accelerated Degree Program Declaration Form during the summer after semester 4 and then apply to the Graduate School during semester 5.
- GRE is not required.

## Earth Science Education

### Department Information

- **Department Location:**  
Katherine Kilbourne Burgum Family Life, 4-H Center
- **Department Phone:**  
701-231-7921
- **Department Web Site:**  
[www.ndsu.edu/education/](http://www.ndsu.edu/education/)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/earth-science-education/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/earth-science-education/)

Earth Science involves the study of earth and space systems, including areas such as astronomy, geology, meteorology and oceanography.

### The Program

Candidates in the Earth Science Education major are prepared to teach a diverse curriculum to a diverse student population. The Earth Science Education student should work closely with an advisor to be sure that the general education courses taken will provide a strong foundation for the advanced courses in the major.

### Professional Education Courses

Students have to enroll in the 300-level professional education courses before applying to be formally admitted to the School of Education (SOE). Prior to enrolling in the 400-level courses, students must complete the application for admission to the SOE; attain a minimum of a 2.75 grade point average overall in their course work and education courses; and pass the Praxis Core Academic Skills for Educators exam(s). Requirements for admission can be found on the School of Education website (<https://www.ndsu.edu/education>).

### Student Teaching

Student teaching is the culmination of the teacher preparation program. Students have the opportunity to apply knowledge and skills acquired in college courses under the supervision of an experienced science educator.

### Student Advisement

Students will be assigned individual advisors who will work with them closely in program planning and in other ways to advise and assist them. Students are encouraged to seek their advisor's help whenever needed.

## Certification

Upon completing this program, graduates are eligible for teacher licensure from the North Dakota Education Standards and Practices Board (ESPB). The program is accredited by the Council for the Accreditation of Educator Preparation (CAEP).

## Career Opportunities

In many states, including North Dakota, Earth Science is typically taught in middle school. This can limit the number of opportunities for candidates.

Candidates are encouraged to consider taking the General Science licensure exam to become eligible to teach multiple science disciplines in middle and high school levels. Students may also choose to add a Geology/Geosciences major to increase options after graduation.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

First Year			
Fall	Credits	Spring	Credits
CHEM 121 or 150 (Must be matching lecture and lab)	3	CHEM 122 or 151 (Must be matching lecture and lab)	3

## Major Requirements

### Major: Earth Science Education

**Degree Type:** B.A. or B.S.

**Minimum Degree Credits to Graduate:** 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## Degree Requirements and Notes

- See School of Education (<https://www.ndsu.edu/education>) for admission requirements.
- Courses taken P/F may not be used to satisfy any requirements.
- A grade of 'C' or better is required in all professional education courses.
- To be placed in student teaching, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required.
- To exit the program, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required as well as completing the Praxis Subject test and the Principles of Learning and Teaching test.

## Economics

### Department Information

- **Department Location:**  
Richard H. Barry Hall
- **Department Phone:**  
701-231-7441
- **Department Email:**  
[ndsu.agribusiness@ndsu.edu](mailto:ndsu.agribusiness@ndsu.edu)
- **Department Web Site:**  
[www.ag.ndsu.edu/agecon](http://www.ag.ndsu.edu/agecon)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/economics/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/economics/)

Economics is the social science that deals with problems of choice and decision making. It does so through a systematic and logical framework for analyzing how society and individuals solve such problems as what goods and services to produce, how to organize production and for whom goods and services are to be produced. Knowledge of economics is necessary for understanding and dealing intelligently with topics such as domestic and global economic development, environmental and natural resource management, renewable energy policy, international trade, government finance and market failure.

### Background Information

Besides being important for understanding contemporary social issues, economics is useful in developing career skills for business, law, teaching, public administration and research. If you enjoy the challenge of understanding how the economy works and how economic concepts are used in making decisions, economics offers a stimulating and rewarding career.

### The Program

The study of economics has a long tradition at North Dakota State University. A student pursuing an economics major at NDSU has the advantage of receiving instruction from a well-established and strong faculty. Economics courses are taken by students in all colleges on campus, so classes provide an opportunity to broaden one's understanding through interaction with other students.

The Department offers two tracks of economics for all economics majors: a general economics track and a quantitative economics track. The general economics track offers students more flexibility in terms of economics field course selection – 15 credits of economics electives, three credits of which may be in agricultural economics, finance, or business administration. The quantitative economics track is designed for students who desire to pursue a graduate degree in economics after college, or for students who desire a quantitative approach to economics. Students with strong quantitative and/or statistical backgrounds are highly encouraged to select the quantitative economics track.

During the freshman and sophomore years, the program requires basic college courses such as English, mathematics, science, communication and information technology. The introduction to economics includes 1) microeconomics, the study of relative prices and the consequences of different market forms, and 2) macroeconomics, the study of such topics as the general level of prices, employment and output.

Economics majors take a one-year sequence in intermediate economic theory. Students enhance their ability to explain and use fundamental microeconomics and macroeconomics concepts and are further exposed to relationships between governments and markets. These concepts and relationships establish the foundation a student needs to deal with current economic issues.

Economics students take elective courses to develop areas of emphasis such as development economics, international economics, industrial organization, public economics, natural resource and environmental economics. The historical development of economic ideas receives more attention in these economic electives. A representative program for the major in economics is summarized on the back of this page. A major in economics also can be combined with a variety of minors and other majors and still be completed in four years. The concepts of economics can be applied to many fields. A minor in economics may be selected in combination with most other majors on campus, including business.

## Career Opportunities

Graduates with degrees in economics are in high demand, with economics consistently being among the top five majors wanted by employers. Business, industry, government service and teaching are some of the possible areas of employment for the economist. The study of economics also provides excellent preparation for graduate education in areas such as business, economics and law.

## High School Preparation

It is recommended that high school students interested in studying economics at the university level concentrate on developing their mathematical and writing skills.

## The Faculty

The economics faculty within the Department of Agribusiness and Applied Economics is student and academic oriented. The low student to faculty ratio in upper division economic courses provides close relationships and an interactive learning environment.

## Financial Aid and Scholarships

A number of scholarships are available to outstanding agribusiness and applied economics majors. The College of Agriculture, Food Systems, and Natural Resources awards scholarships each year. For more information on scholarships, go to: <https://www.ndsu.edu/admission/scholarships/>.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>Freshman</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>
ECON 189 <sup>1</sup>	1	ECON 201 (May satisfy gen ed category B)	3

Free Electives	6		
	15		16

Total Credits: 120

<sup>1</sup> ECON 189 is only required for first-time, first-year students—A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take ECON 189

## Economics

### Department Information

- **Department Location:**  
Richard H. Barry Hall
- **Department Phone:**  
701-231-7441
- **Department Web Site:**  
[www.ag.ndsu.edu/agecon](http://www.ag.ndsu.edu/agecon)
- **Credential Offered:**  
B.S.; B.A.
- **Plan Of Study Sample:**  
[bulletin.ndsu.edu/programs-study/undergraduate/economics/#planofstudytext](http://bulletin.ndsu.edu/programs-study/undergraduate/economics/#planofstudytext)

## Major Requirements

### Major: Economics

**Degree Type:** B.A. or B.S.

**Minimum Degree Credits to Graduate:** 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.

5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		<b>12</b>
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		<b>3</b>
<b>Science and Technology (S) <sup>†</sup></b>		<b>10</b>
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		<b>6</b>
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		<b>6</b>
<b>Wellness (W) <sup>†</sup></b>		<b>2</b>
<b>Cultural Diversity (D) <sup>*†</sup></b>		
<b>Global Perspectives (G) <sup>*†</sup></b>		
Total Credits		<b>39</b>

\* May be satisfied by completing courses in another General Education category.

<sup>†</sup> General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Major Core Requirements for all options

Code	Title	Credits
<b>Core Requirement</b>		
ECON 189	Skills for Academic Success <sup>1</sup>	1
ECON 201	Principles of Microeconomics	3
ECON 202	Principles of Macroeconomics	3
ECON 341	Intermediate Microeconomics	3
ECON 343	Intermediate Macroeconomics	3
MIS 116	Business Use of Computers	3
<b>Program Option</b>		<b>36-43</b>
Select one of three options: 1) Standard, 2) Quantitative, or 3) Business Economics		
Total Credits		<b>52-59</b>

<sup>1</sup> ECON 189 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take AGRI 189.

## Program Notes:

- Students selecting economics must complete the courses in the Core Requirement area (16 cr.) and the requirements outlined within one of the identified option areas listed below: 1] Standard Option (47-50 cr.), 2] Quantitative Economics Option (37-39 cr.), or 3] Business Economics Option (40 cr.).
- Students must earn a minimum 2.00 cumulative GPA in courses that satisfy the core requirement and option requirements.

## Standard Option

Students selecting the Standard Option may complete either a Bachelor of Science or a Bachelor of Arts degree.

Code	Title	Credits
<b>Economics Electives: Select 15 credits from the list below. At least 3 credits must be from the courses identified as "Approved as Capstone" and no more than 3 credits from the bottom selection.</b>		
ECON 402	Economics of Entrepreneurship	
ECON 410	Econometrics <sup>2</sup>	
ECON 411	Computational Economics	
ECON 440	Game Theory and Strategy (Approved as Capstone)	
ECON 461	Economic Development (Approved as Capstone)	
ECON 465	Labor Economics	
ECON 470	Public Economics (Approved as Capstone)	
ECON 472	International Trade	
ECON 475	Health Economics (Approved as Capstone)	
ECON 476	Monetary Theory and Policy	
ECON 480	Industrial Organization (Approved as Capstone)	
ECON 481	Natural Resource Economics	
ECON 482	Environmental Economics	
Select no more than 3 credits from the following as part of the 15 economics electives:		
AGEC 339	Quantitative Methods & Decision Making	
AGEC 344	Agricultural Price Analysis	
AGEC 346	Applied Risk Analysis	
AGEC 347	Principles of Real Estate	
AGEC 445	Agribusiness Industrial Strategy	
AGEC 446	Agribusiness Finance	
ECON 324	Money and Banking	
ECON 356	History of Economic Thought	
FIN 410	Investment Analysis and Management	
FIN 420	Options, Futures, and Other Derivatives	
<b>Other Requirements</b>		
MATH 144	Mathematics for Business	4
STAT 330	Introductory Statistics	3
or STAT 367	Probability	
STAT 331	Regression Analysis <sup>1</sup>	2-3
or ECON 410	Econometrics	
<b>Additional Requirements: 9 credits of Humanities &amp; Fine Arts and Social &amp; Behavioral Sciences</b>		
Humanities & Fine Arts: Select 3 credits from the current general education list or any course with the prefix of: ART, CLAS, ENGL, FREN, GERM, HIST, HUM, MUSC, PHIL, SPAN, or THEA		3
Social & Behavioral Sciences: Select a total of 6 credits - 3 credits must be selected from the current general education list while the remaining 3 credits may be any course with a prefix of: ANTH, CJ, GEOG, POLS, PSYC, or SOC		6
<b>Bachelor of Science or Bachelor of Arts Degree Requirement: A student must select either a BS or BA degree. The following requirements apply to the specific degree type selected.</b>		3-17
Bachelor of Science: Completion of a minor program of study. This minor must be officially declared through the Office of Registration and Records. (Minimum 16 credits)		
Bachelor of Arts: Completion of the BA Language Proficiency requirements and 3 credits of 300-400 level humanities, social sciences or a study abroad experience. (Credits for language proficiency will vary depending on placement; 3-14 credits)		
Total Credits		36-51

<sup>1</sup> STAT 331 is waived if ECON 410 is taken.

## Quantitative Economics option

Students selecting the Quantitative Economics Option complete a Bachelor of Science degree only.

Code	Title	Credits
<b>Economics Electives: Select 6 credits from the following. At least 3 credits must be from the courses identified as "Approved as Capstone".</b>		<b>6</b>
ECON 402	Economics of Entrepreneurship	
ECON 411	Computational Economics	
ECON 440	Game Theory and Strategy (Approved as Capstone)	
ECON 461	Economic Development (Approved as Capstone)	
ECON 465	Labor Economics	
ECON 470	Public Economics (Approved as Capstone)	
ECON 472	International Trade	
ECON 475	Health Economics (Approved as Capstone)	
ECON 476	Monetary Theory and Policy	
ECON 480	Industrial Organization (Approved as Capstone)	
ECON 481	Natural Resource Economics	
ECON 482	Environmental Economics	
<b>Other Requirements</b>		
CSCI 122	Visual BASIC	3
or CSCI 159	Computer Science Problem Solving	
ECON 410	Econometrics	3
MATH 165	Calculus I	4
MATH 166	Calculus II	4
MATH 259	Multivariate Calculus	3-4
or MATH 265	Calculus III	
MATH 266	Introduction to Differential Equations	3
or STAT 368	Statistics	
STAT 367	Probability	3
or STAT 467	Probability and Mathematical Statistics I	
<b>Additional Requirements: 3 credits of Humanities &amp; Fine Arts</b>		<b>3</b>
Humanities & Fine Arts: Select 3 credits from the current general education list or any course with the prefix of: ART, CLAS, ENGL, FREN, GERM, HIST, HUM, MUSC, PHIL, SPAN, or THEA		
<b>Minor in Mathematics or Statistics Required</b>		<b>8-9</b>
This option requires the completion of either the mathematics or statistics minor. Approximately 8-9 credits for either of these minors remains after the completion of the Other Requirements for this option. The minor must be officially declared through the Office of Registration and Records.		
Total Credits		40-42

## Business Economics option

Students selecting the Business Economics Option complete a Bachelor of Science degree only.

Code	Title	Credits
<b>Economics Electives: Select 12 credits from the following. At least 3 credits must be from the courses identified as "Approved as Capstone".</b>		<b>12</b>
ECON 402	Economics of Entrepreneurship	
ECON 411	Computational Economics	
ECON 440	Game Theory and Strategy (Approved as Capstone)	
ECON 461	Economic Development (Approved as Capstone)	
ECON 465	Labor Economics	
ECON 470	Public Economics (Approved as Capstone)	
ECON 472	International Trade	
ECON 475	Health Economics (Approved as Capstone)	
ECON 476	Monetary Theory and Policy	
ECON 480	Industrial Organization (Approved as Capstone)	
ECON 481	Natural Resource Economics	
ECON 482	Environmental Economics	
<b>Other Requirements</b>		

ECON 410	Econometrics	3
ACCT 200	Elements of Accounting I	3
ACCT 201	Elements of Accounting II	3
CSCI 122	Visual BASIC	3
<b>Additional Electives: Select 3 credits from the following</b>		<b>3</b>
BUSN 340	International Business	
BUSN 341	Global Business Environment	
ECON 472	International Trade	
FIN 440	International Finance	
MGMT 440	International Management	
MRKT 440	International Marketing	
<b>Quantitative Tools: Select 3 credits from the following</b>		<b>3</b>
ACCT 420	Accounting Information Systems	
AGEC 339	Quantitative Methods & Decision Making	
MGMT 360	Operations Management	
<b>Additional Requirements: 3 credits of Humanities &amp; Fine Arts</b>		<b>3</b>
Humanities & Fine Arts: Select 3 credits from the current general education list or any course with the prefix of: ART, CLAS, ENGL, FREN, GERM, HIST, HUM, MUSC, PHIL, SPAN, or THEA		
<b>Minor in Business Administration or Accounting Required</b>		<b>10</b>
This option requires the completion of either the business administration or accounting minor. Approximately 10+ credits for either of these minors remains after the completion of the Other Requirements for this option. The minor must be officially declared through the Office of Registration and Records.		
Total Credits		43

## Minor Requirements

### Economics Minor

#### Minor Requirements

Required Credits: 18

Code	Title	Credits
<b>Required Courses</b>		
ECON 201	Principles of Microeconomics	3
ECON 202	Principles of Macroeconomics	3
ECON 341	Intermediate Microeconomics	3
or BUSN 487	Managerial Economics	
ECON 343	Intermediate Macroeconomics	3
<b>Elective Courses</b>		
ECON 300-400	Elective	3
ECON 400	Elective	3
Total Credits		18

### Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- Students must earn a minimum 2.00 GPA for the minor requirements.
- This minor is not available to Agricultural Economics majors.

## Electrical Engineering

### Department Information

- **Department Location:**  
Electrical and Computer Engineering
- **Department Phone:**  
701-231-7019

- **Department Email:**  
info@venus.ece.nodak.edu
- **Department Web Site:**  
www.ndsu.edu/ece/
- **Credential Offered:**  
B.S.E.E.
- **Official Program Curriculum:**  
bulletin.ndsu.edu/undergraduate/program-curriculum/electrical-engineering/

Electrical engineers create products and services for society out of materials that exist in nature using principles of science and common sense. The profession is broad, encompassing products valued by society in many technical specialties from electric power and energy utilization to our current information age.

## The Program

The Bachelor of Science degree in Electrical Engineering is accredited by the Engineering Accreditation Commission of ABET, [www.abet.org](http://www.abet.org). It has the largest enrollment in the Dakotas. The department faculty, many of whom have years of experience in industry and teaching, give considerable attention to the individual student. Major components of the undergraduate program are basic science and mathematics, humanities and social sciences, communication, engineering science, engineering design and ethics, and both breadth and depth in electrical and computer engineering.

## Areas Of Specialization

The Electrical Engineering program is designed to reflect the broad nature of the field, and students may tailor their studies within broad parameters. Students are encouraged to develop an individual program of study in close consultation with their advisers. Examples are available to illustrate how specialization may be obtained in a number of different technical areas. Students may mix and match from the examples to suit their particular interests. Technical areas include the following:

- **Biomedical Engineering** is firmly based in engineering and the life sciences. The integration of medicine and engineering serves to provide appropriate products, tool, and techniques for research diagnosis and treatment by health care professionals. Some important products are artificial hearts, medical imaging (MRI, ultrasound, CT scans), prosthetic devices, and computer aids for diagnosis. Biomedical engineers help identify the problems and needs that can be solved using engineering technology and systems methodology to provide high-quality health care at reasonable cost.
- **Communication and Signal Processing** are closely related fields within electrical engineering. Communication is the process of transferring information from one point in time and space to another point. Signal processing involves signal representation, as well as signal design and filtering. Students with this specialization find challenging opportunities worldwide to meet the need for more convenient, inexpensive, and reliable communication and signal processing.
- **Computer Engineering** involves both hardware and software for small and large computers and for all products that include dedicated computers within, such as smart phones, game consoles and automobiles.
- **Control Engineering** deals with the design and implementation of algorithms for controlling physical systems. Examples include active suspension for cars, autopilots for aircraft, and robot motion control.
- **Electromagnetics** includes electromagnetic compatibility, fiber optics, antennas, microwave devices, radar, sonar, satellite systems, power and communication transmission lines, grounding, shielding and propagation.
- **Electronics and Microelectronics** deal with integrated circuits, VLSI, transistors, lasers, consumer electronics, defense electronics, power electronics, and electronic materials.
- **Nanotechnology** deals with the study of electric materials at the nanoscale level for applications such as solar cells and sensors.
- **Optical Engineering**, developed jointly with the Department of Physic, prepares future engineers in such areas as quantum theory; coherent/incoherent polarized/non-polarized light; geometric, physical, and Fourier optics; holography; and image processing and acquisition.
- **Power Systems** deals with generation, transmission, distribution and utilization of electric energy subject to safety, environmental and economic concerns.

## Cooperative Education Program

The Cooperative Education Program allows students to alternate classroom study with a series of paid professional work experiences related to electrical and computer engineering. These experiences increase in complexity as the student's background increases. The program provides opportunity for pre-graduation experience in the profession, exploration of several career opportunities, money for education, an enriched degree and enhanced opportunities for employment following graduation.

## High School Preparation

High school students should attempt to complete one unit of physics, four units of mathematics and one unit of chemistry.

## The Facilities

The Electrical and Computer Engineering building is part of an eight building engineering complex. The building contains specialized laboratories and equipment. Numerous grants and donations from the National Science Foundation and private industry have provided valuable equipment. Laboratories along with department and university computer capabilities support education and research.

## Career Opportunities

NDSU electrical engineering graduates are working all over the world in a variety of exciting jobs at excellent salaries. They work in research, design, sales, manufacturing, testing, installation, development and teaching. Many graduates find an engineering education provides excellent training for fields other than engineering such as business, medicine or law. Since engineers are problem solvers, there is a constant demand for engineers to solve problems outside typical engineering fields.

## Research and Graduate Study

Departmental faculty members are currently active in several areas of research including biomedical, nanotechnology, communication and signal processing, computers, controls, electromagnetics, electronics and power engineering. Graduate studies leading to the master's and doctoral degrees are offered in the department. Further details are available in the *Graduate Bulletin*.

## Selective Admission

Transfer students from international institutions must have a 3.00 GPA.

Further, the department policy is that transfer credits with grades less than 'C' in biology, chemistry, computer science, any field of engineering class, mathematics and physics are not accepted for the Electrical and Computer Engineering curricula.

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>Freshman</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>

	15		15

Total Credits: 128

- <sup>1</sup> Students must take ECE 111 prior to enrolling in ECE courses listed above in the Junior and Senior year; otherwise, students must take an additional ECE Elective in lieu of ECE 111.
- <sup>2</sup> Suggested to take ENGR 311.
- <sup>3</sup> Select from ENGL 320, 321, 324 or 459 to satisfy the Upper Level Writing for General Education.
- <sup>4</sup> Suggested to take either ENGR 312, ECON 105, ECON 201, or ECON 202.

#### **PROGRAM NOTES:**

**ECE Elective:** any didactic ECE 4xx course (not x93, 494, 496).

**Tech Elective:** ECE 374, any didactic ECE 4xx course, ECE x93 or 494 (max 6 credits total between x93 and 494), ECE 496 (max 3 credits), or any course from accompanying list.

Students must earn a "C" or better in ECE 173, ECE 275, EE 206 and all required MATH courses, before enrolling in ECE courses listed above in the Junior or Senior years.

## Electrical Engineering

## Major Requirements

### Major: Electrical Engineering

**Degree Type:** B.S.E.E.

**Minimum Degree Credits to Graduate:** 128

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.

- a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.  
 b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.  
 7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking

<b>Global Perspectives (G) <sup>*†</sup></b>		
Total Credits		39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Major Requirements

Code	Title	Credits
<b>Electrical Engineering Core Requirements</b>		
ECE 111	Introduction to Electrical and Computer Engineering	3
ECE 173	Introduction to Computing <sup>*</sup>	4
ECE 275	Digital Design <sup>*</sup>	4
ECE 311	Circuit Analysis II	4
ECE 320	Electronics I	3
ECE 321	Electronics II	2
ECE 331	Energy Conversion	4
ECE 341	Random Processes	3
ECE 343	Signals & Systems	4
ECE 351	Applied Electromagnetics	4
ECE 376	Embedded Systems	4
ECE 401	Design I (capstone)	1
ECE 403	Design II (capstone)	2
ECE 405	Design III (capstone)	3
<b>MATH Courses Required</b>		
MATH 129	Basic Linear Algebra <sup>*</sup>	3
MATH 165	Calculus I (May satisfy general education category R)	4
MATH 166	Calculus II <sup>*</sup>	4
MATH 265	Calculus III (w/ vectors) <sup>*</sup>	4
MATH 266	Introduction to Differential Equations <sup>*</sup>	3
<b>Other Courses Required</b>		
CHEM 121	General Chemistry I (May satisfy general education category S)	3

EE 206	Circuit Analysis I *	4
Select one of the following: (May satisfy general education category C)		3
ENGL 320	Business and Professional Writing	
ENGL 321	Writing in the Technical Professions	
ENGL 324	Writing in the Sciences	
ENGL 459	Researching and Writing Grants and Proposal	
ENGR 402	Engineering Ethics and Social Responsibility	1
PHYS 251	University Physics I (May satisfy general education category S)	4
PHYS 252	University Physics II (May satisfy general education category S)	4
Select one of the following lab courses (May satisfy general education category S):		1
CHEM 121L	General Chemistry I Laboratory	
PHYS 251L	University Physics I Laboratory	
PHYS 252L	University Physics II Laboratory	
<b>ECE Electives</b>	<b>Select 9 credits of ECE 400 level electives (excluding 494 and 496)</b>	<b>9</b>
Includes the cross listed courses of ECE 427/IME 427; ECE 429/IME 429; ECE 411/PHYS 411; & ECE 411L/PHYS 411L		
<b>Tech Electives: Select 12 credits from the following:</b>		<b>12</b>
ABEN 456	Biobased Energy	
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	
BIOL 220 & 220L	Human Anatomy and Physiology I and Human Anatomy and Physiology I Laboratory	
BIOL 221 & 221L	Human Anatomy and Physiology II and Human Anatomy and Physiology II Laboratory	
BIOL 315 & 315L	Genetics and Genetics Laboratory	
CE 309 & CE 310	Fluid Mechanics and Fluid Mechanics Laboratory	
CE/ME 486	Nanotechnology and Nanomaterials	
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory	
CHEM 341 & 341L	Organic Chemistry I and Organic Chemistry I Laboratory	
CHEM 342 & 342L	Organic Chemistry II and Organic Chemistry II Laboratory	
CHEM 364	Physical Chemistry I	
CHEM 365 & CHEM 471	Physical Chemistry II and Physical Chemistry Laboratory	
CHEM 425 & CHEM 429	Inorganic Chemistry I and Inorganic Chemistry Laboratory	
CSCI 161	Computer Science II	
CSCI 222	Discrete Mathematics

Total Credits

104

\* No grade less than a C accepted in these courses and before enrolling in ECE 300 level courses, excluding ECE 311.

## Degree Requirements and Notes

- A student must complete at least 60 semester credits of professional level course work in his/her program while in residence and enrolled in the college. Students transferring into the college from programs with professional accreditation are exempt from this residency requirement but are subject to the residency requirement of NDSU.
- In order to graduate, an ECE student must have at least a 2.0 GPA in all required EE and ECE courses taken at NDSU. Elective ECE courses are not included in this GPA requirement.
- Transfer Students – Transfer courses with grades less than 'C' in Biology, Chemistry, Computer Science, Mathematics, Physics, and any type of engineering class will not be accepted as a major requirement.
- All Students – Students are required to attain a grade of 'C' or better in ECE 173 Introduction to Computing, ECE 275 Digital Design, EE 206 Circuit Analysis I, and all required MATH courses.

**Note:** For students interested in pursuing one of the areas of specialization, lists of recommendations for specific electives are available from the ECE Department (<https://www.ndsu.edu/ece>).

# Electrical Engineering and Physics

## Department Information

- **Department Location:**  
Electrical and Computer Engineering or South Engineering
- **Department Phone:**  
7701-231-7019
- **Department Web Site:**  
[www.ndsu.edu/ece/](http://www.ndsu.edu/ece/) or [www.ndsu.edu/physics/](http://www.ndsu.edu/physics/)
- **Credential Offered:**  
B.S.E.E.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/electrical-engineering-physics/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/electrical-engineering-physics/)

This double major will appeal to students with broad interests in both fundamental physical sciences and applied engineering methods. Graduates, equipped with analytical problem-solving skills and technical knowledge, will be well prepared to pursue careers in a wide range of fields within industry, government, and higher education.

## Major Requirements

### Double Major: Electrical Engineering & Physics

Degree Type: B.S.E.E.

Minimum Degree Credits to Graduate: 136

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

MATH 166	Calculus II *	4
MATH 265	Calculus III *	4
MATH 266	Introduction to Differential Equations *	3
<b>Other Required Courses</b>		
EE 206	Circuit Analysis I *	4
ENGR 402	Engineering Ethics and Social Responsibility	1
<b>Select one upper division writing course from the following:</b>		3
ENGL 320	Business and Professional Writing	
ENGL 321	Writing in the Technical Professions	
ENGL 324	Writing in the Sciences	
ENGL 459	Researching and Writing Grants and Proposal	
Total Credits		114-115

\* No grade less than a 'C' accepted in these courses and before enrolling in ECE 300 level courses, excluding ECE 311.

#### Degree Requirements and Notes:

- A student must complete at least 60 semester credits of professional level course work in his/her program while in residence and enrolled in the College of Engineering. Students transferring into the College of Engineering from programs with professional accreditation are exempt from this residency requirement but are subject to the residency requirement of NDSU.
- In order to graduate, an EE/PHYS student must have at least a 2.00 GPA in all required EE, ECE, and PHYS courses taken at NDSU. Elective ECE and PHYS courses are not included in this GPA requirement.
- Transfer Students: Transfer courses with grades less than a 'C' in Biology, Chemistry, Computer Science, Mathematics, Physics, and any type of engineering class will not be accepted as a major in this program.
- All Students: See footnote regarding a grade of 'C' required in identified courses.

## Elementary Education & Human Development and Family Science

### Department Information

- **Department Location:**  
E. Morrow Lebedeff Hall
- **Department Phone:**  
701-231-8268
- **Department Web Site:**  
[www.ndsu.edu/hdfs/](http://www.ndsu.edu/hdfs/)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/elementary-education-human-development-family-science/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/elementary-education-human-development-family-science/)

The human development and family science/elementary education dual degree program is designed to provide additional knowledge in all aspects of child development to prepare elementary teachers to be advocates for young children and extend their knowledge about how children learn, what they learn, and the techniques that facilitate such learning.

## The Program

Through this curriculum, students are concurrently enrolled in the human development and family science (HDFS) major (child development option) through North Dakota State University and the elementary education major through Valley City State University (VCSU). The culmination of these requirements leads to a bachelor's degree from NDSU (human development and family science major/child development option) as well as a bachelor's degree from VCSU (elementary education major).

Under a cooperative agreement, students remain on the NDSU campus to complete all coursework for the dual degree. The courses specific to the elementary education major (VCSU) are offered on the NDSU campus by VCSU faculty. Students are certified to teach elementary education in public schools and may, with additional course work and an additional student teaching experience, be certified to teach kindergarten as well.

The HDFS degree complements and strengthens the elementary education curriculum with coursework in child development, family issues and cross-cultural diversity.

Children are very diverse in all aspects of their development—physical, cognitive, social and emotional. It is more accurate to view “normal” development as a range of possible outcomes rather than a single life course. Ultimately, these developmental factors have a strong influence on children's performance and behavior in school. A degree in HDFS will help future teachers understand development and its diversity, making them more effective teachers and helping them work with children from a wide variety of backgrounds.

## Selective Admission

Admission to the dual degree program consists of two separate university applications:

1. Application for admission to NDSU for the human development and family science/elementary education dual degree prior to beginning the program, and
2. Application for admission to VCSU and admission to the teacher education program, which occurs at the end of the sophomore year.

During or immediately following the introductory professional education course, students must meet additional requirements to be admitted into teacher education:

1. Sophomore standing or better with a minimum cumulative grade point average of 2.75,
2. Satisfactory academic performance in English 110 and 120 (grades of C or higher) and successful completion of a speech screening test,
3. Achievement of minimum scores on the Pre-Professional Skills Test (PPST), and
4. Qualification for teacher certification in the state of North Dakota upon VCSU program completion, as outlined in the latest issue of the Educator's Professional Certificate Regulation booklet published by the North Dakota Department of Public Instruction.

## Student Teaching

Student teaching is the culmination of the teaching program. Students have the opportunity to apply skills acquired in college courses under the supervision of an experienced educator.

## Certification

Upon completing this program, students are eligible for certification to teach grades 1 through 6. The program is accredited by the National Council for Accreditation of Teacher Education.

## Financial Aid and Scholarships

The Office of Financial Aid and Scholarships at NDSU makes available grants, loans, scholarships and work-study employment. Scholarships also are available through the College of Human Development and Education. For more information visit: <https://www.ndsu.edu/onestop/finaid/scholarships/>

## The Facilities

Facilities for the dual degree program are housed in Evelyn Morrow Lebedeff Hall and the Family Life Center. Included in these buildings are classrooms, conference rooms and a child development center serving young children and their families.

## Extra-Curricular Opportunities

Students may enhance their involvement by participating in groups such as the HDFS Club, the Elementary Education Club, the North Dakota Association for the Education of Young Children, the North Dakota Family and Consumer Sciences Association and the North Dakota Education Association.

## Community Setting

The Fargo-Moorhead metropolitan area offers a conducive setting for study. Students have the opportunity to work in a number of community institutions serving children and families.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>Freshman</b>					
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>

## Major Requirements

### Dual Degree Program

**Major at NDSU: Human Development & Family Science**

**Major at VCSU: Elementary Education**

**Degree Type at: B.A. or B.S.**

**Minimum Degree Credits to Graduate: 126**

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

PSYC 111	Introduction to Psychology (May satisfy general education category B)	3
Select one from the following: (May satisfy general education category C)		3
ENGL 320	Business and Professional Writing	

ENGL 325	Writing in the Health Professions	
ENGL 358	Writing in the Humanities and Social Sciences	
ENGL 459	Researching and Writing Grants and Proposal	
<b>HDFS Electives: (Cannot take HDFS 230 or HDFS 496)</b>		
HDFS	Elective	3
HDFS	300-400 level	6
<b>Other Elementary Education Requirements</b>		
Biology Elective		3
Chemistry or Physics Elective or STEM ED 160		3
CSCI 114	Microcomputer Packages (May satisfy general education category S)	3
or MIS 116	Business Use of Computers	
GEOG 111	Survey of Geography	2
MATH 277	Math for Elementary Teachers I	3
MATH 278	Math for Elementary Teachers II	2
EDUC 491	Seminar (Senior Portfolio)	1
<b>College Requirement</b>		
HSE 320	Professional Issues	1
Total Credits		113

<sup>1</sup> HSE 189 is required only for first-time, first-year students. A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students who are not first-time, first-year students who either transfer into the university or change their major are not required to take HSE 189.

## NDSU HDFS Degree Requirements and Notes

- A grade of C or better is required for all HDFS courses, regardless of whether they are used for the major core, major electives, general education, or free electives.
- A 2.50 cumulative GPA is required in major courses for graduation.
- Course taken *Pass/Fail* will not be used to satisfy any requirements other than total credits.

## VCSU Elementary Education Degree Requirements and Notes

- Though not required, many majors pursue a Reading or STEM credential or an endorsement in Kindergarten, Middle School, English Language Learners (ELL), or as a Special Education Strategist.
- A 2.75 cumulative GPA is required for admission to teacher education.
- A 2.5 cumulative GPA is required to begin coursework in elementary education program.
- Students will need to take Praxis CORE I sophomore year and Praxis II subject matter and pedagogy exams senior year .

# Emergency Management

## Department Information

- **Department Location:**  
Minard Hall
- **Department Phone:**  
701-231-5595
- **Department Email:**  
nds.u.emgt@nds.u.edu
- **Department Web Site:**  
www.ndsu.edu/emgt/
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
bulletin.ndsu.edu/undergraduate/program-curriculum/emergency-management/

The emergency management major incorporates course diversity that provides the theoretical and practical knowledge essential to the effective practice of emergency management in the public, private and non-profit sectors. Emergency management is "a managerial function charged with creating the framework within which communities reduce vulnerabilities to hazards and cope with disasters. Emergency management protects

communities by coordinating and integrating all activities necessary to build, sustain, and improve the capability to mitigate against, prepare for, respond to, and recover from threatened or actual natural disasters, acts of terrorism, or other man-made disasters” (Principles of Emergency Management, 2007).

## The Program

The major prepares students for success as practitioners in emergency management as well as related fields. The rigor of the major also prepares students for graduate work. The major is ideally-suited for students seeking emergency management as a career of first choice. Student career success is built upon the following four program attributes:

1. Provide an educational foundation that supports graduates’ entry into different settings where emergency management is practiced (e.g., government at all levels; businesses; schools and colleges; healthcare industry; non-profit organizations; humanitarian efforts; etc.);
2. Support effective practice by providing an evidence-based focus on the research and science critical to the field;
3. Promote and foster experiential opportunities through focused class activities and required internships;
4. Develop skills necessary to the effective practice of emergency management (e.g., communication; collaboration; teamwork; leadership; critical thinking; problem-solving, etc.).

## The Faculty

The Department of Emergency Management has five faculty members. Each faculty member possesses broad-based expertise in emergency management, as well as specialized expertise in their areas of practice and scholarly activity. The diversity in faculty interests, experience and expertise create a rich environment for students to learn, build relationships, and be mentored.

## Curriculum Planning

Beyond the major, students are encouraged to plan a curriculum that provides them a broad general education. Emergency management is an interdisciplinary field that draws on the social, behavioral, natural and applied sciences. As such, students are encouraged in both general education course selection and in the selection of a minor (Bachelor of Science degree) or language (Bachelor of Arts degree) to select courses that help them to develop and advance their career goals. The Department provides a list of recommended general education courses that are complimentary to the major to support student choices.

## Internship Program

An internship is required for the major. Internships are typically completed in a student’s junior or senior year. The internship experience allows students to combine theoretical and applied aspects of emergency management. Internships are designed to meet each student’s career goals. As such, internship opportunities are as varied as students’ career goals and can include working in a variety of local, national or international settings. Internships are essential for student development and are a key factor in successful job placement.

## Career Opportunities

An emergency management degree prepares students for career opportunities across all sectors, all industries and all locations. The emergency management function, while structured in a variety of ways in different government, private sector, and non-profit organizations, plays an essential role in maintaining safe and secure operations that protect the entity’s interests. Career opportunities in emergency management exist at all levels of government, across all government agencies, in all developing countries; private sector companies as both a site-based and corporate function; public schools and higher education institutions; hospital and healthcare facilities; non-profit organizations as part of a primary disaster mission or general operational mission; critical infrastructure industries; museums, malls, stadiums, and event centers; and other organizations or entities that manage facilities or services subject to hazards or operational interruptions that can result in harm to individuals, property or the organization.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Major Requirements

### Major: Emergency Management

**Degree Type:** B.A. or B.S.

**Minimum Degree Credits to Graduate:** 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		6
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		6
<b>Wellness (W) <sup>†</sup></b>		2
<b>Cultural Diversity (D) <sup>*†</sup></b>		
<b>Global Perspectives (G) <sup>*†</sup></b>		
Total Credits		39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Arts, Humanities, and Social Sciences

### Degree Requirements

**Bachelor of Science (B.S.) Degree** – The completion of a minor program of study, a second major, or a second degree is required.

**Bachelor of Arts (B.A.) Degree** – Second year language proficiency at college level required.

### Arts, Humanities and Social Sciences College Requirements

An additional 9 credits are required by the College of Arts, Humanities and Social Sciences for all Bachelor of Science and Bachelor of Arts degree programs of study, except the Bachelor of Fine Arts degree, the Bachelor of Music degree, the Bachelor of Science in Architecture degree, and the Bachelor of Science degree with a major in Environmental Design:

Code	Title	Credits
<b>AH&amp;SS College Requirements</b>		
Courses used to satisfy any general education requirement cannot be used to also count toward the AH&SS College Requirements. A minimum of three credits is required in each of the 3 following areas for a total of 9 credits. Choose only those courses with the prefixes listed for each area. A course with the WGS prefix can only be used in one area.		
<b>Area One: Humanities</b>		3
ARB, ENGL, FREN, GERM, HIST, HUM, PHIL, RELS, SPAN, or WGS		
<b>Area Two: Social Sciences</b>		3
ANTH, CJ, COMM, EMGT, POLS, SOC, or WGS		
<b>Area Three: Fine Arts</b>		3
ARCH, ART, ENVD, LA, MUSC, or THEA		
Total Credits		9

## Major Requirements

Any EMGT prefixed course in which a grade of D or F is earned may not be used to fulfill a major requirement.

Code	Title	Credits
<b>Emergency Management Core Courses:</b>		
EMGT 101	Emergencies, Disasters, and Catastrophes	3
EMGT 291	Seminar	3
EMGT 281	Disaster Analysis	3
EMGT 362	Disaster Mitigation	3
EMGT 361	Disaster Preparedness	3
EMGT 364	Disaster Recovery	3
EMGT 410	Comprehensive Emergency Management Planning (Capstone)	3
EMGT 496	Field Experience	6
Emergency Management Electives: Select 5 courses from the following:		15
EMGT 150	Dealing with Terrorism, Cybersecurity and Other Emerging Threats	
EMGT 414	Spatial Analysis in Emergency Management	
EMGT 420	Hazard, Risk, and Vulnerability Assessments	
EMGT 425	World Disasters	
EMGT 435	Issues in Homeland Security and Emergency Management	
EMGT 445	Understanding Vulnerable Populations in Disasters	
EMGT 461	Business Continuity and Crisis Management	
EMGT 463	Voluntary Agency Disaster Services	
EMGT 491	Seminar (Only 3 credits of seminar may allowed to count toward the major elective category. More than one seminar may be taken, however.)	
Total Credits		42

Recommended minors: Business Administration, Communication, Community Development, Criminal Justice, Environmental Science, Food Safety, Geography, Logistics Management, Political Science, Psychology, or Sociology.

## Minor Requirements

### Emergency Management Minor

#### Minor Requirements

Required Credits: 18

Students complete one of the four options listed below for the minor.

#### Option One: Comprehensive Emergency Management

Code	Title	Credits
<b>Emergency Management Core</b>		
EMGT 101	Emergencies, Disasters, and Catastrophes	3
EMGT 261	Disaster Preparedness	3

EMGT 262	Disaster Mitigation	3
EMGT 263	Disaster Response	3
EMGT 264	Disaster Recovery	3
<b>Emergency Management Elective: Select one from the following</b>		<b>3</b>
EMGT 150	Dealing with Terrorism, Cybersecurity and Other Emerging Threats	
EMGT 410	Comprehensive Emergency Management Planning	
EMGT 414	Spatial Analysis in Emergency Management	
EMGT 420	Hazard, Risk, and Vulnerability Assessments	
EMGT 425	World Disasters	
EMGT 435	Issues in Homeland Security and Emergency Management	
EMGT 445	Understanding Vulnerable Populations in Disasters	
EMGT 461	Business Continuity and Crisis Management	
EMGT 463	Voluntary Agency Disaster Services	
EMGT 496	Field Experience	
Total Credits		18

### Option Two: Homeland security

Code	Title	Credits
<b>Emergency Management Core</b>		
EMGT 101	Emergencies, Disasters, and Catastrophes	3
EMGT 150	Dealing with Terrorism, Cybersecurity and Other Emerging Threats	3
EMGT 435	Issues in Homeland Security and Emergency Management	3
<b>Emergency Management Elective: Select one from the following</b>		<b>3</b>
EMGT 261	Disaster Preparedness	
EMGT 263	Disaster Response	
EMGT 425	World Disasters	
Expanded Electives: Select two from the following *		6
CJ 315	Federal Law Enforcement and Crime Policy	
COMM 434	Communication Law	
COMM 485	Risk and Crisis Communication	
EMGT 261	Disaster Preparedness	
EMGT 263	Disaster Response	
EMGT 425	World Disasters	
POLS 120	Terrorism	
POLS 220	International Politics	
POLS 225	Comparative Politics	
Total Credits		18

\* Cannot count an EMGT elective core course taken toward the required 6 elective credits in this category.

### Option Three: Risk and Resilience Management

Code	Title	Credits
<b>Emergency Management Core</b>		
EMGT 101	Emergencies, Disasters, and Catastrophes	3
EMGT 262	Disaster Mitigation	3
EMGT 264	Disaster Recovery	3
<b>Emergency Management Elective: Select one from the following</b>		<b>3</b>
EMGT 410	Comprehensive Emergency Management Planning	
EMGT 414	Spatial Analysis in Emergency Management	
EMGT 420	Hazard, Risk, and Vulnerability Assessments	
EMGT 445	Understanding Vulnerable Populations in Disasters	
EMGT 463	Voluntary Agency Disaster Services	
Expanded Electives: Select two from the following *		6

COMM 484	Organizational Advocacy and Issue Management
COMM 487	Organizational Power and Leadership
COMM 488	Social Influence and Organizational Change
EMGT 410	Comprehensive Emergency Management Planning
EMGT 414	Spatial Analysis in Emergency Management
EMGT 420	Hazard, Risk, and Vulnerability Assessments
EMGT 445	Understanding Vulnerable Populations in Disasters
EMGT 461	Business Continuity and Crisis Management
EMGT 463	Voluntary Agency Disaster Services
HDFS 310	Citizenship & Social Activism
SOC 404	Community Assessment
SOC 405	Community Development

Total Credits 18

\* Cannot count an EMGT elective core course taken toward the required 6 elective credits in this category.

### Option Four: Vulnerability and Capacity building

Code	Title	Credits
<b>Emergency Management Core</b>		
EMGT 101	Emergencies, Disasters, and Catastrophes	3
EMGT 445	Understanding Vulnerable Populations in Disasters	3
EMGT 463	Voluntary Agency Disaster Services	3
<b>Emergency Management Electives: Select one from the following</b>		3
EMGT 263	Disaster Response	
EMGT 264	Disaster Recovery	
EMGT 420	Hazard, Risk, and Vulnerability Assessments	
EMGT 435	Issues in Homeland Security and Emergency Management	
<b>Expanded Electives: Select two from the following *</b>		6
COMM 216	Intercultural Communication	
COMM 488	Social Influence and Organizational Change	
EMGT 261	Disaster Preparedness	
EMGT 263	Disaster Response	
EMGT 264	Disaster Recovery	
EMGT 420	Hazard, Risk, and Vulnerability Assessments	
EMGT 435	Issues in Homeland Security and Emergency Management	
EMGT 461	Business Continuity and Crisis Management	
HDFS 182	Wellness and Aging	
HDFS 275	Diversity and Multiculturalism in Individual and Family Life	
HDFS 310	Citizenship & Social Activism	
SOC 235	Cultural Diversity	
SOC 410	Social Inequality	
SOC 412	Sociology of Gender	
SOC 440	Sociology of Aging	

Total Credits 18

\* Cannot count an EMGT elective core course taken toward the required 6 elective credits in this category.

### Minor Requirements and Notes

- A minimum of 9 credits must be taken at NDSU.

## English

Department Information

- **Department Location:**  
Minard Hall
- **Department Phone:**  
701-231-7143
- **Department Web Site:**  
[www.ndsu.edu/english/](http://www.ndsu.edu/english/)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/english/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/english/)

The English studies major offers students the flexibility to follow interests in literature, linguistics, and creative, technical, and professional writing. The curriculum joins the strengths of a traditional humanities education with the career outcomes today's students seek. English majors develop strong communication skills, multiple research strategies, flexibility in responding to complex situations, and effective project-management skills. Career success is tied to the ability to understand, restate, and analyze complex ideas and texts for multiple audiences. Such success requires habits of investigation, the ability to critically analyze sources of information, and the self-assurance to handle unfamiliar materials and situations. The department offers multiple opportunities to develop these skills both in the classroom and outside the university, while working with and for authentic clients.

## The Program

The English department offers a Bachelor of Arts (B.A.) and a Bachelor of Science (B.S.) in English as well as a B.A. and a B.S. in English education. Departmental offerings include:

**B.A. and B.S. in English** – These degrees require 45 credits in English courses beyond first-year composition. The B.A. degree requires functional proficiency in at least one language other than English, typically 14 credits of course work in that language. The B.S. degree requires a minor. The flexibility of the single major in English studies means that students can emphasize course work in literature, linguistics, writing studies, or a balance of these.

**B.A. and B.S. in English Education** – These degrees require 39 credits in English courses beyond first-year composition and 34 credits in education courses. The B.A. degree requires functional proficiency in at least one language other than English, typically 14 credits of course work in that language. The B.S. degree in English education with a communication option requires 20 credits in communication courses and leads to certification in both English and speech. English education majors should contact the School of Education or the English education advisor for additional requirements.

**English Minors** – Minor sequences are available for literature, creative writing, and writing studies. The minors require a minimum of 21 credits in English beyond first-year composition.

**Creative Writing** – This minor offers students the opportunity to take seven courses in a sequence designed to develop analytic abilities, writing skills, and an understanding of the student's own creative process.

**English - Literature option** – This minor gives students the opportunity to read widely in literature, develop analytical skills, and hone writing skills. Courses include Literary Analysis, literature survey courses, elective literature and film courses, and one writing course.

**English - Writing Studies option** – This minor provides students with the opportunity to write creatively and professionally, and to explore emerging communication technologies. Courses include Introduction to Writing Studies, elective writing courses, and one upper-level literature or linguistics course.

## The English Studies Major

The Department of English offers a five-course core curriculum focusing on professionalization. These courses provide every student the opportunity to: devise a career compass to guide them through their English major; to develop skills in textual analysis, and academic, professional, and civic writing; to prepare for the work world with interview skills and job packets; and to pursue an undergraduate research project that explores an authentic research question with a faculty member's guidance. In addition, this flexible degree encourages students to choose courses in areas that meet their interests and support their career goals.

**Graduate Study** – The Department of English offers a doctorate in Rhetoric, Writing, and Culture, and a Master of Arts degree in English.

## Community/Student Involvement Opportunities

The Department of English offers many options for co-curricular activities that add value and dimension to English majors and minors. Students develop leadership and planning skills by taking part in English Club and the English Honor Society, Sigma Tau Delta. They practice spoken English with international students through Conversational English Circles, and they create and edit an annual literary magazine, *Northern Eclecta*. The department office suite includes a collaboration and creativity space for undergraduate students, where students can meet to study or work on projects, or share lunch and conversation with other majors. English classes often work with a range of local non-profits, and English majors are

encouraged to pursue internships, co-ops, and field experiences, and regularly find opportunities in local industries, non-profits, and government offices.

## Career Opportunities

Traditional careers in English studies, such as teaching, and professional and technical writing, are currently in high demand in our region, and the abilities to think critically, to synthesize information, and to write and speak with precision, clarity, and effectiveness are valuable in any career. Thus, many companies look for employees with English majors or minors. The demand for technical and professional writers has been growing, and many companies, non-profit organizations, and government agencies hire English majors. English majors also acquire project management skills and the ability to work as members of a team, which make them desirable employees. Former and current students are employed in writing intensive and/or training positions; some start their own businesses. Some English graduates seek professional degrees (law, library science, ministry, or medicine) or graduate degrees in English immediately after earning a B.A. or B.S.; some choose these options as career changes later in life.

## High School Preparation

Beyond the core curriculum requirements necessary for admission to the University, students should have an English preparation that includes both frequent reading from most literary genres and extensive writing experience.

## Scholarships

The Department of English awards more than \$8,000 in scholarships each year. English students regularly are awarded Fulbright fellowships, and participate in the university Honors Program in higher than average numbers. Contact the department for details.

- *Hal and Alice Dickey Memorial Scholarship* – awarded to a sophomore, junior, or senior.
- *Professor Ralph Engel Scholarship* – awarded to a major who has completed at least 21 credits at North Dakota State University.
- *Marjory Archer Haggart Memorial Scholarship* – awarded biennially to a sophomore or junior.
- *G. Wilson Hunter and Phyllis Krantz Hunter Scholarship* – awarded to a sophomore, junior or senior.
- *Madeline S. Gittings Endowed Scholarship* – awarded to two or three students each year.
- *Mart and Lois Vogel Award for Excellence* – awarded to one or two upper-class students.
- *Richard L. Johnson Scholarship* – awarded to a graduate student pursuing literary studies.
- *Rooney Scholarship* – awarded to a graduate student.
- *English Faculty Award* – awarded to one or two students with 15 to 45 credits.

## The Faculty

The Department of English faculty is dedicated and versatile. Professors have doctorates from diverse and well-respected universities, including Connecticut, Louisville, CUNY, Kansas, Michigan, Minnesota, Washington State, Nebraska, Kentucky, and Purdue. Non-tenured faculty and staff have advanced degrees from universities such as Texas Christian, Iowa, Minnesota State, Northern Illinois, North Dakota State, and South Dakota. Faculty members publish regularly by writing books, journal articles, and book chapters; and they deliver papers at national and international professional meetings. Many faculty members have won awards for their teaching, service, research, and publications – regional, national, and international awards, as well as those from North Dakota State University.

The English department offers a gateway course, Introduction to English Studies (ENGL 167), and two general categories of courses throughout the curriculum.

### Writing Studies

Introduction to Writing Studies (ENGL 275) introduces students to creative, academic, and professional writing. Students can then choose courses in these areas that meet their interests. Upper division classes offer students the opportunity to create web sites, make videos, and explore other communication technologies. Classes include the reading of literature, of scholarly and popular essays, and of professional documents in print and on the web.

### Literary Studies

These classes include lively discussion of literary texts, historical periods, and contemporary issues as illuminated by, or represented in, the course material. Literary studies courses involve frequent reading and writing assignments and the opportunity to present orally. Classes include Literary Analysis (ENGL 272), survey courses, period courses, multicultural courses, interdisciplinary courses, major figures courses, genre courses, film courses and topics courses.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>First Year</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>

## Major Requirements

### Major: English

**Degree Type:** B.A. or B.S.

**Minimum Degree Credits to Graduate:** 122

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.

3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## University General Education Requirements

ARCH, ART, ENVD, LA, MUSC, or THEA

Total Credits 9

**Major requirements**

Students must earn a grade of 'C' or better in all courses used to fulfill requirements for the English major. These courses may only be repeated once.

Code	Title	Credits
<b>Major Requirements</b>		
ENGL 167	Introduction to English Studies	3
ENGL 272	Literary Analysis	3
ENGL 275	Introduction to Writing Studies	3
ENGL 358	Writing in the Humanities and Social Sciences (May satisfy general education category C)	3
ENGL 467	English Studies Capstone Experience	3
Lower Division Elective Courses - Select one of the following:		3
ENGL 209	Introduction to Linguistics	
ENGL 220	Introduction to Literature	
ENGL 222	Introduction to Poetry	
ENGL 229	Introduction to Creative Writing	
Literature Survey Courses - Select one of the following:		3
ENGL 240	World Literature Masterpieces	
ENGL 315	British Literature I	
ENGL 317	American Literature I	
Select one of the following:		3
ENGL 316	British Literature II	
ENGL 318	American Literature II	
Cultural Diversity Courses - Select two of the following:		6
ENGL 231	The Bible as Literature	
ENGL 330	Women's Writing	
ENGL 331	Contemporary Women Writers	
ENGL 335	Multicultural Writers	
ENGL 336	Literature and The Environment	
ENGL 340	19th Century American Fiction	
ENGL 341	Contemporary American Fiction	
ENGL 345	Themes in American Culture	
ENGL 379	Study Tour Abroad	
ENGL 385	British Fiction	
ENGL 435	Young Adult Literature in a Multicultural World	
ENGL 453	Social and Regional Varieties of English	
ENGL 454	Language Bias	
ENGL 455	International Technical Writing	
ENGL 456	Literacy, Culture and Identity	
ENGL 474	Native American Literature	
Upper Division Elective Courses: 300-400 level courses		
ENGL	300-400 Level Courses	6
ENGL	400 Level Courses	9
Total Credits		45

## Degree Notes:

- Students who major in English and declare a minor in English-Writing option or English-Studies option must have 12 unique credits in the minor that were not taken as part of the major requirements.

## Minor Requirements

### Minor: English - Literature Option

Required Credits: 21

Code	Title	Credits
<b>Required Course</b>		
ENGL 272	Literary Analysis	3
Early Period Literature Survey Course: Select one		3
ENGL 240	World Literature Masterpieces	
ENGL 315	British Literature I

- Students who major in English and declare a minor in English-Writing option must have 12 unique credits in the minor that were not taken as part of the major requirements.

## English Education

### Department Information

- **Department Location:**  
Katherine Kilbourne Burgum Family Life, 4-H Center
- **Department Phone:**  
701-231-7921
- **Department Web Site:**  
[www.ndsu.edu/education/](http://www.ndsu.edu/education/)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/english-education/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/english-education/)

English Education encompasses the four Language Arts of reading, writing, speaking, and listening. Accordingly, the English education major includes a broad range of English and professional education courses so that pre-service teachers fully understand (a) each of the arts, (b) current theories of adolescent development, and (c) current best practices in secondary instruction. Students also apply their knowledge and build their teaching skills during multiple field experiences in local schools.

### The Program

Candidates in the English education major are prepared to teach the Language Arts to students in grades 7-12 with creativity and confidence. Our curriculum comprises a variety of courses in language/linguistics, composition/rhetoric, and literature. Students in our British, American, World, and Young Adult literature courses explore, fiction, poetry, and non-fiction written by men, women, and minorities. Our Professional Education courses prepare pre-service teachers to incorporate active learning strategies, to create effective methods for assessment, and to adjust instruction to accommodate multiple learning styles.

### Professional Education Courses

Students may enroll in the 300-level professional education courses before their acceptance into the School of Education (SOE). Prior to enrolling in the 400-level courses, students must complete the application for admission to the SOE; attain at least a 2.75 grade point average in their general course work and in their education courses. Students must also pass the PraxisCore Academic Skills for Educators exam(s). Additional requirements for admission are available on the School of Education website (<https://www.ndsu.edu/education>).

### Student Teaching

Student teaching is the culmination of the teaching program. In the semester before graduation, students apply the knowledge and skills acquired in their college courses to real-world classrooms under the supervision of experienced English teachers in middle-level or secondary schools. Faculty members from NDSU conduct monthly on-site visits to support, encourage, and evaluate student teachers so that they gain the confidence and ability to join the teaching profession after graduation.

### Student Advisement

An academic advisor works individually with English Education majors to plan their programs of study and to advise and assist them as they progress to degree completion. Students are encouraged to seek their advisor's help whenever needed. Appointments with advisors can be scheduled through the Navigate online system found on the Student Affairs web page, <https://www.ndsu.edu/enrollmentmanagement/studentsuccess/>

## Certification

Upon completing this program, students are eligible for certification to teach English in most states. Our program is accredited by the Council for the Accreditation of Educator Preparation (CAEP).

## Career Opportunities

Secondary English teachers are in high demand across the country, so our graduates usually obtain full-time employment in school districts shortly after graduation. In addition to teaching careers, some English Education graduates choose to teach English abroad or seek advanced degrees in English, law, library science, and counseling. Others obtain careers as corporate trainers or technical writers. Many options are available because an English Education degree effectively teaches students to think critically, to synthesize information, to write and speak clearly and concisely, and to work effectively on teams.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>First Year</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>

## Major Requirements

### Major: English Education Standard Option

**Degree Type:** B.S. or B.A.

**Minimum Degree Credits to Graduate:** 122

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

## Department Information

- **Department Location:**  
Richard H. Barry Hall
- **Department Phone:**  
701-231-8651
- **Department Web Site:**  
[www.ndsu.edu/centers/nice/](http://www.ndsu.edu/centers/nice/)
- **Credential Offered:**  
Minor; Certificate
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/entrepreneurship/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/entrepreneurship/)

The entrepreneurship programs serve the needs and is accessible to all NDSU students, regardless of major. The minor and certificate provides students with tools and capabilities that would allow them to address the intricacies of starting and managing a new venture, whether that venture be a new startup or a spinoff from an existing company.

Having both a baccalaureate degree and an entrepreneurship minor would provide students with credentials demonstrating their capabilities. The certificate would provide a mechanism by which individuals who may be working with a new venture or who are considering starting a new venture to obtain tools and capabilities to enhance their likelihood of success.

## Department Information

- **Department Location:**  
Renaissance Hall
- **Department Phone:**  
701-231-6151
- **Department Email:**  
nds.ala@nds.edu
- **Department Web Site:**  
[www.ndsu.edu/ala/](http://www.ndsu.edu/ala/)
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/environmental-design/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/environmental-design/)

Environmental Design is broad-spectrum profession that incorporates many disciplines. The bachelor of science in environmental design is preparation for the Master of Landscape Architecture graduate program. Students begin by completing the Bachelor of Science degree with a major in environmental design. Successful performance in the coursework leads to placement in the Master of Landscape Architecture program. A successful student may complete the undergraduate degree in years 1-4 and begin the first professional Master of Landscape Architecture degree in year 5.

Environmental Design for today and tomorrow, is a primer for architecture and landscape architecture and planning is covered in the following topics: introduction to environmental design, relationship to the environment: climate, land, water, communication with design, spatial relationships, color theories in design, form and geometries, materials and sustainability, natural materials/sustainable materials, design process, space articulation, historical relationships, social aspects of design, style and individuality, and client's concerns. How does conservation, remediation and sustainability play a role? Does technology change our thinking? How do we accommodate the world's growing population; carrying capacity beyond limits? Questions as these are explored in our educational process.

## Career Opportunities

The majority of environmental designers continue on with their education to become landscape architects. Many work for landscape architecture services and firms, engineering, architecture and planning companies. Within all these job possibilities exists the opportunity to apply the ethical imperatives of conservation, remediation and sustainability to increasing challenges of energy requirements.

## High School Preparation

We suggest that students take high school courses in digital drawing and animation, art, perhaps drawing from life, math and science courses such as calculus, trigonometry, physics and biology. And, if possible, we encourage high school students to take advanced placement or college credit courses that fulfill NDSU General Education requirements.

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

First Year			
Fall	Credits	Spring	Credits
ENVD 101	3	ENVD 104	1
ENVD 102	1	ENVD 172	3

## Major Requirements

### Major: Environmental Design

**Degree Type:** B.S.

**Minimum Degree Credits to Graduate:** 130

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.

4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		6

## Department Information

- **Department Location:**  
Civil & Industrial Engineering 201
- **Department Phone:**  
701-231-7244
- **Department Web Site:**  
[www.ndsu.edu/cee/](http://www.ndsu.edu/cee/)
- **Credential Offered:**  
B.S.

Would you like to make this world a better place to live by focusing on the interactions between humans and the environment? You could make a difference by choosing a career in environmental engineering. In general, environmental engineers integrate and apply biological, chemical, and engineering principles to improve and sustain the environment for the protection of its ecosystems, human health, and environmentally-related enhancement of the quality of life. The discipline focuses on water and wastewater treatment system design and public health protection; traditional and emerging contaminant mitigation in water, soil, and air; ecological principles in the design process; green manufacturing; and, sustainable design. Environmental engineers will play a crucial role in numerous 21<sup>st</sup> century challenges, including: sustainably supplying food, water, and energy; designing a future without pollution and waste; creating efficient, healthy, and resilient cities; fostering informed decisions and actions; and, curbing climate change and adapting to its impacts.[1] (p. )

## The Program

Environmental engineers are professionals who have broad scientific and technical knowledge, possess strong problem-solving and design skills, and enjoy working with people. Our work is directly related to the public and environmental health and well-being, which has a significant impact on decision making and planning processes.

NDSU's B.S. in Environmental Engineering degree program, housed in the Department of Civil and Environmental Engineering, is beginning in fall 2020. Its graduates will be sought by companies nationally at competitive salaries, and they will apply their skills in all fields of the profession domestically and abroad. The graduates will most certainly put their education to good use, bettering themselves and the world in which they live. In addition to the B.S. in Environmental Engineering, the department offers the M.S. degree in Environmental Engineering; the B.S., M.S., and Ph.D. degrees in Civil Engineering; and, participates in interdisciplinary graduate programs such as a Ph.D. degree in Materials and Nanotechnology, M.S. and Ph.D. degrees in Natural Resources Management, M.S. and Ph.D. degrees in Environmental Conservation Sciences, a Ph.D. degree in Transportation and Logistics, and M.S. and Ph.D. degrees in Biomedical Engineering.

## Mission

The mission of the Department of Civil and Environmental Engineering is to:

1. Provide quality education to prepare nationally competitive undergraduate students for successful careers in civil and environmental engineering;
2. Provide advanced skills and knowledge in state-of-the-art research and design in sub-areas of civil and environmental engineering for graduate students; and,
3. Provide service to the university, engineering profession, and the public.

## Program Educational Objectives

The program educational objectives will be consistent with the university, college, and department missions and be reflective of what is expected of the graduates of our B.S. in Environmental Engineering within a few years of graduation.

## A Flexible Curriculum

First year environmental engineering students at NDSU begin their education with fundamental courses in English, chemistry, math, introduction to environmental engineering and design and analysis methods and tools, and engineering science. Second-year courses emphasize environmental engineering fundamentals, microbiological principles, graphic communications, math and statistical analyses, and engineering science courses. During the third year, students gain exposure and knowledge in sustainable design, unit operations and processes, fate and transport of pollutants, soil mechanics, environmental chemistry, ethics, water resources, physics, and three hours of technical electives. The senior year focuses on specialized courses in air pollution, solid and hazardous waste management, water and wastewater treatment and design, and hydrology; a one-year capstone senior design experiences, and six hours of technical electives. The technical electives allow the student to take additional courses in those areas of environmental engineering/science in which she or he intends to practice professionally.

## Faculty

The department has well-qualified and dedicated faculty members. They are nationally and internationally recognized experts, with the knowledge and experience to prepare graduates for successful careers. All faculty members in the department have a doctoral degree. All classes are taught/assessed by full-time professors, and supplemented by lectures from leaders from the industry.

### Modern, Well-Equipped Facilities

The department has excellent laboratory facilities for undergraduate education and research, including the new undergraduate laboratories for water resources and environmental engineering, laboratories, and several state-of-the-art research laboratories.

### Student Organizations

Students participate in several professional departmental student organizations, which helps them develop leadership and teamwork skills. The NDSU American Water Works Association (AWWA) and the Water Environment Federation (WEF) student chapter has won 2 national design competitions. Students may also participate in a number of student organizations within the College of Engineering, including Engineers Without Borders (EWB), Society of Women Engineers (SWE), National Society of Black Engineers (NSBE), and American Indian Science and Engineering Society (AISES).

### Preparation

High school students who wish to prepare for college engineering should attempt to complete the following high school credits: one unit of physics, four units of math, and one unit of chemistry. Nationally, incoming freshmen prepared to enroll in calculus frequently complete their environmental engineering degree in four years. Students who have studied two years of pre-engineering at another institution can normally complete the environmental engineering degree in two additional years beginning with the 2022-2023 academic year.

### Scholarships and Financial Aid

The Department of Civil and Environmental Engineering awards numerous scholarships each year, which range from \$500 - \$10,000. Students should check with the department for more information.

### Career Opportunities

NDSU environmental engineering students will be highly sought for internships and co-ops, with most students having completed multiple work experiences. Graduates from the program will be widely regarded as hands-on, can-do, project-ready professionals, who will be very successful in finding excellent jobs. Most students will have selected a job before graduation and others within a few weeks of graduation. The work varies in regard to the type of activity and location. Environmental engineers can work in the office, in the field, or a combination of the two. They can work primarily with a number of intricate designs or with people in management or sales. Environmental engineering graduates normally go to work at consulting firms, governmental (state and federal) agencies, NGOs, or industry. The academic curriculum also prepares environmental engineering graduates for graduate school, law school, and/or an MBA program.

Since this degree program begins in fall 2020, there currently are no job placement data available.

Minor
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/environmental-geology/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/environmental-geology/)

As environmental stewardship becomes an increasingly important aspect of all career paths, the "Environmental Geology" minor complements and enhances a wide range of majors. Students interested in the Earth and the environment are invited to consider this rewarding and challenging minor.

The "Environmental Geology" minor is open to undergraduate students within all majors (except full Geology majors). The curriculum requires 19 - 20 semester hours within the courses listed below. Note that some of these courses also have chemistry and math prerequisites.

## Environmental Geology

BIOL 221	Human Anatomy and Physiology II	
<b>First Aid &amp; CPR Certification *</b>		<b>0</b>
American Heart Association or American Red Cross First Aid and CPR Certification		
Total Credits		18

\* Students must earn their First Aid and CPR certification and present their current cards to the department of Animal Science for verification of this certification. The student will submit copies of the front and back of their First Aid and CPR cards to the Office of Registration and Records as proof of completion.

#### Minor Requirements and Notes:

- A minimum of 8 credits must be taken at NDSU.
- Students must earn a 2.0 minimum GPA for the minor requirements.

## Equine Science

#### Department Information

- **Department Location:**  
Hultz Hall
- **Department Phone:**  
701-231-7641
- **Department Email:**  
ndsu.equinescience@ndsu.edu
- **Department Web Site:**  
[www.ag.ndsu.edu/equinescience/](http://www.ag.ndsu.edu/equinescience/)
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/equine-science/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/equine-science/)

#### EQUINE SCIENCE

The depth and reach of the U.S. equine industry is far greater than many people realize. There are 7.2 million horses in the United States and the industry contributes \$122 billion to the gross domestic product. Over 1.3 million people own horses, and an additional 38 million people who don't own horses identify as a horse enthusiast. Careers in the U.S. horse industry support the equivalent of approximately 454,000 full-time jobs working directly with horses and 988,000 indirect jobs that provide support to the equine industry.

#### THE PROGRAM

The Equine Science program provides a well-rounded, science-based education encompassing both classroom and experiential learning opportunities. For individuals interested in pursuing their education beyond a Bachelor of Science degree, the Equine Science curriculum can be tailored to meet the requirements for veterinary schools and graduate programs.

#### THE CURRICULUM

The Equine Science major is designed to provide a strong overall background with supporting course work in the sciences, humanities and general education. Classes include anatomy, physiology, nutrition, health, production management, horsemanship and equitation. Hands-on learning opportunities are a priority with 70% of the equine courses providing students this type of experience. The curriculum requires students to complete an internship, study abroad or research experience. These unique opportunities allow students to put what they learn into practice, and offers the chance to gain valuable experiential education in the horse industry.

An Equine Science minor through North Dakota State University allows students to explore several equine-related courses and gain general horse industry knowledge. Students can also receive a minor in Equine Assisted Activities & Therapies which focuses on coursework in equine science, human development, and psychology. Both minors pair well with essentially any major offered at NDSU.

### THE FACULTY

The Equine Science Program has outstanding faculty members with diverse backgrounds in the equine industry who are ready to help students learn and thrive at NDSU. Our faculty have taught internationally, earned multiple teaching and advising awards, and maintain active research programs.

Equine Science faculty expertise is complemented by other faculty within the Department of Animal Sciences and across the university. The overall quality of the faculty at North Dakota State University has been recognized through numerous awards for teaching and research excellence.

### CAREER OPPORTUNITIES

Our graduates find exciting careers in diverse areas including sales representatives for nutrition, pharmaceutical and equipment products; marketing specialists; barn and facility managers; equine event and show managers; working with breed and industry associations; equine reproduction; horse training and sales preparation; and riding instructors. In addition to career opportunities following graduation, many students have chosen to continue their education in veterinary schools or graduate programs.

### EXTRA-CURRICULAR ACTIVITIES

The NDSU Horsemen's Association supports a variety of equine-related activities. The club supports the Intercollegiate Horse Show teams, sponsors a western IHSA show, and conducts several youth camps.

The NDSU Rodeo Club provides students the opportunity to gain experience and knowledge of the sport of rodeo. The club supports the Intercollegiate Rodeo Team and also sponsors the Bison Stampede Rodeo each fall.

### FINANCIAL AID AND SCHOLARSHIPS

Part-time work and work-study programs are available at the equine center, in several different livestock units, and in animal science laboratories within the department. Over \$50,000 in departmental scholarships are awarded to Equine Science, Animal Science and Veterinary Technology students annually. In addition, the College of Agriculture, Food Systems, and Natural Resources awards scholarships each year to incoming freshman and current NDSU students. Contact the Office of the Dean, College of Agriculture, Food Systems, and Natural Resources, for more information on college scholarships <https://www.ag.ndsu.edu/academics/scholarships>

Student loan, grant and work-study information is available from the Office of Financial Aid and Scholarships, and One Stop <https://www.ndsu.edu/onestop/finaid/>

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>First Year</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>
ANSC 101	1	ANSC 223	2
ANSC 218	3	BIOL 111	3

- **Department Location:**  
Hultz Hall
- **Department Phone:**  
701-231-7641
- **Department Email:**  
ndsu.ansc@ndsu.edu
- **Department Web Site:**  
[www.ag.ndsu.edu/ansc/](http://www.ag.ndsu.edu/ansc/)
- **Credential Offered:**  
B.S.
- **Plan Of Study Sample:**  
[bulletin.ndsu.edu/programs-study/undergraduate/equine-science/#planofstudytext](http://bulletin.ndsu.edu/programs-study/undergraduate/equine-science/#planofstudytext)

## Major Requirements

### Major: Equine Science

**Degree Type: B.S.****Minimum Degree Credits to Graduate: 120**

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.

- a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.  
 b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.  
 7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		6
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		6
<b>Wellness (W) <sup>†</sup></b>		2
<b>Cultural Diversity (D) <sup>*†</sup></b>		
<b>Global Perspectives (G) <sup>*†</sup></b>		
Total Credits		39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Major Requirements

Code	Title	Credits
<b>Required Core Courses for Equine Science</b>		
ANSC 223	Introduction to Animal Nutrition	2
ANSC 235	Equine Evaluation	2
ANSC 260	Introduction to Equine Studies	2
ANSC 260L	Equine Care and Management Practicum	1
ANSC 261	Basic Equitation & Horsemanship	1
ANSC 357	Animal Genetics	3
or ANSC 358	Equine Genetics	
ANSC 360	Equine Nutrition	3
ANSC 364	Equine Anatomy and Physiology	3
ANSC 370	Fundamentals/Animal Disease	3
or ANSC 371	Fundamentals of Animal Disease II	
ANSC 480	Equine Industry and Production Systems	3
ANSC 478	Research and Issues in Animal Agriculture	3
ANSC 393	Undergraduate Research	2
or ANSC 396	Field Experience	
ANSC 463	Physiology of Reproduction	3
ANSC 463L	Physiology of Reproduction Laboratory	1
Animal Science Electives	Select 9 credits of ANSC prefix courses	9
Select one of the following:		1
ANSC 101	Student Success Techniques - Animal and Equine Science	
ANSC 102	Student Success Techniques - Animal Sciences with Pre-Veterinary Medicine Emphasis	
ANSC 201	Student Success Techniques - Nontraditional & Transfer Students	

VETS 150	Introduction to the Veterinary Profession	
Select one pair from the following:		4
BIOL 111 & BIOL 100L	Concepts of Biology and Non-Majors Biology Lab	
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	
Select one of the following:		3
MATH 103	College Algebra	
MATH 105	Trigonometry	
MATH 107	Precalculus	
MATH 146	Applied Calculus I	
AGEC 242	Introduction to Agricultural Management	3
AGEC 244	Agricultural Marketing	3
BIOC 260	Elements of Biochemistry	4
CHEM 117 & 117L	Chemical Concepts and Applications and Chem Concepts and Applications Lab (May satisfy general education category S)	4
ECON 201	Principles of Microeconomics (May satisfy general education category B)	3
MICR 202 & 202L	Introductory Microbiology and Introductory Microbiology Lab (May satisfy general education category S)	3
PLSC 315	Genetics (May satisfy general education category S)	3
STAT 330	Introductory Statistics (May satisfy general education category R)	3
VETS 135	Anatomy and Physiology of Domestic Animals	3
Choose from any level PLSC, NRM, or RNG		3
Total Credits		81

### Degree Requirements and Notes:

- Students must earn at least a 2.00 GPA that is based on the courses that are used to satisfy major requirements.
- Transfer grades of 'C' or better to count towards major requirements.

## Minor Requirements

### Equine Science Minor

#### Minor Requirements

Required Credits: 16

Code	Title	Credits
<b>Required Courses</b>		
ANSC 223	Introduction to Animal Nutrition	2
ANSC 260	Introduction to Equine Studies	2
ANSC 260L or ANSC 261	Equine Care and Management Practicum Basic Equitation & Horsemanship	1
ANSC 360 or ANSC 364	Equine Nutrition Equine Anatomy and Physiology	3
<b>Elective Courses: Select a minimum of 8 credits from the following:</b>		8
ANSC 235	Equine Evaluation	
ANSC 300	Domestic Animal Behavior and Management	
ANSC 357 or ANSC 358	Animal Genetics Equine Genetics	
ANSC 361	Intermediate Horsemanship	
ANSC 362	Colts in Training	
ANSC 375	Methods of Horsemanship Instruction	
ANSC 461	Advanced Horsemanship and Equitation	
ANSC 463	Physiology of Reproduction	
ANSC 480	Equine Industry and Production Systems	

**Minor Requirements and Notes:**

- A minimum of 8 credits must be taken at NDSU.
- Students must earn a minimum 2.00 GPA for the minor requirements.

## Exercise Science

**Department Information**

- **Department Location:**  
Bentson Bunker Fieldhouse
- **Department Phone:**  
701-231-6385
- **Department Web Site:**  
[www.ndsu.edu/hnes/exercise\\_science](http://www.ndsu.edu/hnes/exercise_science)
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/exercise-science/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/exercise-science/)

Large corporations, hospitals, colleges, small businesses, resorts and hotels are incorporating more health promotion services than ever before. The exercise science (ES) major at North Dakota State University prepares students to meet this growing demand. The exercise science major is accredited by the Commission on Accreditation of Allied Health Education Programs through the American College of Sports Medicine (ACSM). This curriculum covers the knowledge, skills and abilities expected of an ACSM Health/Fitness Specialist.

### Exercise Science Major

The ES major is designed to prepare students for entry-level positions in any of the four health-fitness settings: commercial, community, corporate or clinical. Completion of the ES major may act as a stepping stone to prepare the exceptional student for graduate education in exercise physiology/science, cardiac rehabilitation, physical therapy, sports nutrition, sports medicine, biomechanics or other allied health disciplines.

The ES major includes everything from the study of physical activity and the associated acute and chronic physiological responses and adaptations resulting from it, to health-fitness business management principles found in facilities worldwide. Students are strongly encouraged to select a minor in business or other appropriate area depending on their interests. Several field experience courses during the four-year program, as well as a capstone experience involving a semester-long internship required at the end of the ES major, afford students the opportunity to select an area of specialization in the field at sites available throughout the country.

### Career Options

The following list is not all-inclusive, but does identify some of the most common career and job opportunities in the four health-fitness settings. Exercise science graduates from NDSU (approximately 40 to 50 per year) are employed in these different settings across the country, especially in metropolitan areas. In the past few years, over 90% of exercise science students have either been enrolled in graduate school or have a professional job arranged at the time of graduation.

**Commercial Setting** – The greatest proportion of jobs can be found in for-profit, commercially run health-fitness facilities. The commercial environment is for someone interested in the marketing and sales of health-fitness services and products. This is also a good place for broad exposure to management in the health-fitness industry.

**Community Setting** – Many organizations and agencies serve clients in community settings, including voluntary, not-for-profit entities, as well as public parks and recreation agencies, schools and universities, hotels, country clubs and residential health-fitness developments. Many community-based facilities and programs offer exposure to health-fitness programming coupled with a social and recreational focus.

**Corporate Setting** – In-house health-fitness facilities and services found in large and small-scale businesses are expanding rapidly. The objectives of these facilities may include reductions in employee absenteeism, turnover rates and health care costs, while improving employee wellness, morale and enthusiasm in the workplace.

**Clinical Setting** – Hospital-based health-fitness facilities can be found in one out of every four hospitals, with a forecasted growth to almost one out of every two hospitals expected within the next decade. Most of these facilities are closely associated with outpatient services, such as physical therapy, sports medicine and cardiac rehabilitation, and frequently provide both types of programs in the same facility.

With an undergraduate degree and no experience, a starting salary averages \$38,000 to \$48,000 per year. However, the starting salary for health-fitness professionals is difficult to predict because of such factors as experience, geographic location, employment setting and market demand. It also may depend on licensure and certification. An advanced degree may pay more.

## Pre-Professional and Professional Tracks

Admission to the pre-professional emphasis in ES occurs when the student applies to NDSU and declares an ES major. The pre-professional emphasis encompasses the first three semesters; transfer students are placed in the pre-professional emphasis upon acceptance. Entrance into the professional emphasis occurs through application at the end of the first semester of sophomore year or as transfer students complete the requirements below. The following requirements must be met before beginning the professional course of study:

1. Successful completion of courses with a grade of B or better:
  - a. BIOL 220/220 L
  - b. CHEM 121/121L
  - c. HNES 170
  - d. MATH 103,104 or higher
2. Minimum grade point average of 3.0
3. Completion of application to professional emphasis

Application guidelines are provided during classes (HNES 170) and advising sessions, and are also available on the department website.

## High School Preparation

While in high school, a student should choose courses that provide a solid background in science, mathematics, business and communication. Individual commitment to lifetime fitness and personal health and well-being is very important. Volunteer work at a health-fitness facility and participation in local health fairs may provide valuable experiences in health-fitness programming.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

Freshman

Electives	7		
	16		12

Total Credits: 120-121

\*\* Students apply for Exercise Science Professional Status during fall semester of sophomore year. Application guidelines are provided during HNES 170 Introduction to Exercise Science and during advising sessions with freshmen, as well as on the Exercise Science ([https://www.ndsu.edu/hnes/exercise\\_science](https://www.ndsu.edu/hnes/exercise_science)) web site. The following requirements must be met before beginning the professional course (sophomore, junior and senior level courses with prefix HNES) of study:

1. Successful completion of HNES 170 Introduction to Exercise Science with a grade of 'B' or better
2. Successful completion of BIOL 220 Human Anatomy and Physiology I/BIOL 220L Human Anatomy and Physiology I Laboratory with a grade of 'B' or better
3. Successful completion of MATH 103 College Algebra or MATH 104 Finite Mathematics or higher with a grade of 'B' or better
4. Successful completion of CHEM 121 General Chemistry I/CHEM 121L General Chemistry I Laboratory with a grade of 'B' or better
5. Minimum NDSU cumulative GPA of 3.00 or higher

† Consult your advisor for suggested electives for certain Graduate and Professional programs.

PSYC 211	Introduction To Behavior Modification (May satisfy general education category B)	3
STAT 330	Introductory Statistics (May satisfy general education category R)	3
Total Credits		78

\* Requires a grade of 'B' or better.

## Degree Requirements and Notes

- A cumulative GPA of 3.00 is required for graduation. No grades of 'D' or 'F' may be used to satisfy Exercise Science major courses.
- With the exception of field experiences, seminar, and internship, courses under the Exercise Science requirements may not be taken Pass/Fail.
- Department Requirements:BIOL 220 Human Anatomy and Physiology I, BIOL 220L Human Anatomy and Physiology I Laboratory, CHEM 121 General Chemistry I, PSYC 111 Introduction to Psychology and PSYC 211 Introduction To Behavior Modification, and HNES 250 Nutrition Science are listed within the General Education categories of Science & Technology, Social & Behavioral Sciences, and Wellness.

## Extension Education

### Department Information

- **Department Location:**  
Katherine Kilbourne Burgum Family Life, 4-H Center
- **Department Phone:**  
701-231-7921
- **Department Web Site:**  
[www.ndsu.edu/education/](http://www.ndsu.edu/education/)
- **Credential Offered:**  
Minor
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/extension-education/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/extension-education/)

The Extension Education minor provides educational background and presentation skills for individuals who seek careers associated with the Cooperative Extension Service. This minor is offered through the Agricultural Education and the Family and Consumer Sciences Education programs. The minor is appropriate for many majors across the University including Human Development and Education and the College of Agriculture, Food Systems, and Natural Resources.

## Extension Education

## Minor Requirements

### Extension Education Minor

#### Minor Requirements

Required Credits: 16-17

Code	Title	Credits
<b>Required Courses</b>		
H&CE 446	Extension Education (Required)	2
EDUC 322	Educational Psychology	3
or HDFS 230	Life Span Development	
NRM 421	Environmental Outreach Methods <sup>(H&amp;CE 481 limited to Ag Ed majors only)</sup>	3
or H&CE 468	Methods of Teaching Family and Consumer Sciences I: Techniques	
or H&CE 481	Methods of Teaching Agriculture	
Select one from the following:		3
H&CE 480	Science, Technology, Engineering & Mathematics Teaching Methods in Agricultural Education	
HDFS 462	Methods of Family Life Education	
ENGL 459	Researching and Writing Grants and Proposal	
PLSC 312	Expanding the Boundaries of Learning with Service	
H&CE 496	Field Experience (Internship) *	5-6
Total Credits		16-17

\* Additional Field Experience credit may be warranted if additional time in the internship experience is required.

### Minor Requirements and Notes

Coursework within the Extension Minor should total at least 11 credit hours, internship will fulfill the balance of minor credit hours

A minimum of 8 credits must be taken at NDSU.

Discuss options of courses with either Dr. Mari Borr or Dr. Adam Marx depending upon your intended Extension direction.

## Family and Consumer Sciences Education

### Department Information

- **Department Location:**  
Katherine Kilbourne Burgum Family Life, 4-H Center
- **Department Phone:**  
701-231-7921
- **Department Web Site:**  
[www.ndsu.edu/ted/](http://www.ndsu.edu/ted/)
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/family-consumer-sciences-education/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/family-consumer-sciences-education/)

The family and consumer sciences education (FCSE) program at North Dakota State University has been approved by the State Board for Career and Technical Education for the preparation of family and consumer sciences teachers. The FCSE program is a versatile major due to the preparation of the student as both an educator and a family and consumer scientist.

### The Program

As an educator, the FCSE graduate is prepared to guide a variety of teaching-learning situations. Since education is a people-centered profession, the program focuses on characteristics of various learners or clients, learning principles and different applications of the teaching-learning process. A wide range of strategies for working with individuals or groups is included. Hands-on experience is provided throughout the program to develop the teaching skills learned in classes.

As a family and consumer sciences educator, the FCSE student is prepared with a comprehensive subject matter background. Courses from all areas of family and consumer sciences are included in the program. This contributes to the versatility of the major since the broad range of knowledge may be applied to a wide variety of settings.

A graduate of the FCSE program is qualified to teach family and consumer sciences classes in occupational or non-occupational programs, adult programs, or to serve as an extension educator.

The FCSE program meets the standards set by the Council for the Accreditation of Educator Preparation (CAEP). Thus, graduates are readily employable throughout the United States.

### professional education courses

Students may enroll in the 300-level professional education courses before being formally admitted to the School of Education (SOE). Prior to enrolling in the 400-level courses, students must complete the application for admission to the SOE; attain a minimum of a 2.75 grade point average overall in their course work and education courses; and pass the Praxis Core Academic Skills for Educators exam(s). Requirements for admission can be found on the School of Education website (<https://www.ndsu.edu/education>).

### Student Teaching

Student teaching is the culmination of the teaching program. Students have the opportunity to apply knowledge and skills acquired in college courses under the supervision of an experienced family and consumer sciences educator.

### Career Opportunities

Since the FCSE education major has preparation across all areas of family and consumer sciences, a wide variety of career opportunities in the field is possible. Graduates pursuing a career in teaching become employed in both traditional and nontraditional teaching situations. Settings include teaching in middle, junior and senior high schools and secondary vocational centers. Other career options include employment as consultants in teaching family and consumer sciences at the elementary school level or serving as family and consumer sciences teachers for special education students. Teachers of adult programs work with various agencies and local school districts offering adult enrichment, continuing education, evening and summer classes, and programs for special groups such as parents, senior citizens and migrant workers. Graduates also are employed by the Cooperative Extension Service, utility companies, health and human service agencies and retail establishments.

In addition, graduates are employed in business, industry, government service and public agencies. The capacity in which our graduates serve in these fields varies. Some are employed as family and consumer scientists to contribute specific knowledge, while others are employed to provide educational services and information dissemination to consumers about products, services or facilities of different companies and agencies.

Career opportunities may be enhanced through careful selection of elective courses. Another major or minor offered through the College of Human Sciences and Education or a major from another teaching field is encouraged.

### Financial Aid and Scholarships

Information about various loans, grants, general scholarships and employment is available through the Office of Financial Aid and Scholarships or One Stop. Scholarships ranging from \$300 to \$1,000 are offered to outstanding freshmen with financial need through the College of Human Sciences and Education. Additional academic scholarships also are available each year for returning students.

### Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Family and Consumer Sciences Education

### Department Information

- **Department Location:**  
Katherine Kilbourne Burgum Family Life, 4-H Center
- **Department Phone:**  
701-231-7921
- **Department Web Site:**  
[www.ndsu.edu/education/](http://www.ndsu.edu/education/)
- **Credential Offered:**  
B.S.
- **Plan Of Study Sample:**  
[bulletin.ndsu.edu/programs-study/undergraduate/family-consumer-sciences-education/#planofstudytext](http://bulletin.ndsu.edu/programs-study/undergraduate/family-consumer-sciences-education/#planofstudytext)

### Major Requirements

#### Major: Family & Consumer Sciences Education

Degree Type: B.S.

**Minimum Degree Credits to Graduate: 124****University Degree Requirements**

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

**University General Education Requirements**

Code	Title	Credits
<b>Communication (C)</b>		<b>12</b>
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		<b>3</b>
<b>Science and Technology (S) <sup>†</sup></b>		<b>10</b>

H&CE 488	Applied Student Teaching	3
Total Credits		105

## Degree Requirements and Notes

- The following courses are recommended but not required for the program: ADHM 151 Design Fundamentals AND ADHM 367 Textiles Laboratory.
- GPA of 2.75 or better in the teaching specialty is required for placement in student teaching and exit from the program.
- A grade of 'C' or better is required in all Professional Education Requirement courses.
- A GPA of 2.75 or better in professional education as well as passing the appropriate Praxis II exam are required to exit the program.
- See School of Education (<https://www.ndsu.edu/education>) for admission requirements.

## Finance

### Department Information

- **Department Location:**  
Richard H. Barry Hall
- **Department Phone:**  
701-231-5845
- **Department Web Site:**  
[www.ndsu.edu/business/programs/undergraduate/majors/](http://www.ndsu.edu/business/programs/undergraduate/majors/)
- **Credential Offered:**  
B.S.

- **Official Program Curriculum:**  
bulletin.ndsu.edu/undergraduate/program-curriculum/finance/

As a finance major, you will learn the fundamental concepts and tools to make informed and responsible financial decisions using data and creativity. Finance students know how to estimate economic value and evaluate the riskiness of a project or a financial asset, to advise firms about paying for projects, and to appraise a firm's performance on the stock market. We successfully place our graduates in business, industry and non-profit organizations.

## Background Information

AACSB International-The Association to Advance Collegiate Schools of Business accredits the undergraduate and graduate programs in the College of Business at North Dakota State University. The College of Business is one of only two accredited schools of business in North Dakota.

AACSB International is one of higher education's most prestigious and rigorous accrediting bodies, stressing academic excellence and a commitment to continuous improvement. Less than 10 percent of business programs worldwide have this accreditation.

## The Program

Business students take core courses that cover all of the functional areas of a business, from marketing to management and accounting. Finance courses build on this foundation to help students understand the way that businesses operate in a global economy. Courses cover corporate finance, international finance, investments, portfolio management and more. The finance program is approved as a CFA Institute University Affiliation Program which positions students well to obtain the Chartered Financial Analyst® designation, the most respected and recognized investment credential in the world. Your assignments might be project-driven or include group presentations so that you can practice what you learn in class. In addition to a thorough knowledge of finance, you'll learn teamwork, effective written and oral communication skills, and leadership.

## HANDS-ON EXPERIENCE

Business students can join the Bison Fund (Student Managed Investment Fund) to get a chance to manage a real-money investment fund worth more than \$1.2 million using state-of-the-art Bloomberg terminals in the Commodities Trading Lab. The Bison Fund brings financial theory and investment practice together while providing students access to the same data used by Wall Street analysts.

## Selective Admission

Students who wish to study finance at NDSU enroll as pre-finance majors in the College of Business for the first semester of their freshman year. Pre-finance majors then apply for admission to the professional program after completing the pre-professional courses required for professional program admission, including ENGL 120, COMM 110, MATH 144, ECON 201 or 202, and PSYC 111 or SOC 110. Transfer students with appropriate course work also may apply.

Admission to the professional program is based upon the successful completion of the pre-professional course requirements and a minimum cumulative grade point average (GPA) of 2.5.

## The Faculty

In order to provide a rigorous and timely educational experience, we have recruited and attracted faculty who are highly qualified to teach finance. Dedicated to student learning, our faculty have often been recognized for their teaching excellence by students and colleagues. The faculty employ a wide variety of instructional techniques and are considered especially strong in approaches to the study of organizations and management decision making. They remain current in their sub-fields of finance by actively engaging in research and constantly assisting firms in identifying and solving business problems.

## The Practicum

Finance majors are encouraged to complete a three-credit practicum. The practicum is designed to enable students to relate finance concepts learned in the classroom to actual business situations and to give them a competitive edge in job placement.

## Career Opportunities

Graduates with a finance major have opportunities in business, industry, government service, and the non-profit sector, both regionally and globally. Job opportunities for finance majors are found in corporate finance and the financial services industries, such as banking, insurance, brokerage, investment banking and financial planning.

## The College

The College of Business also offers majors in accounting, business administration, management, marketing, management information systems, and global business (second major only), as well as Master of Business Administration and Master of Accountancy degrees.

## High School Preparation

It is recommended that high school students interested in studying finance at the university level take mathematics courses at least through pre-calculus. High school electives in the social sciences, English and communication also would be of benefit. Please speak with a professional advisor for more information.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Major Requirements

### Major: Finance

**Degree Type:** B.S.

**Minimum Credits Required for Degree:** 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

<b>Total Credits</b>		<b>97</b>

<sup>1</sup> Denotes Common Body of Knowledge (CBK) course.

- Students follow the published curricula for the finance program of study from the semester/year of entrance in the College of Business to graduation provided enrollment at NDSU has not been discontinued for more than one year. Students who change their major are subject to meeting the curricular requirements in effect at the time the new major is declared.
- Business courses from programs that do not hold AACSB International accreditation cannot be used for major or minor requirements in the College of Business (CoB); such courses may be eligible for use as free electives.
- The CoB accepts a maximum of nine credits of non-NDSU 300-400 level business courses from AACSB programs with approval of the department.
- Admission into the finance major: Students must submit an online application to the CoB.
- Admission to the finance major is required to enroll in the advanced 300 or 400 level courses in the CoB.
- A letter grade must be earned in any course that fulfills a major requirement (with the exception of some practicum options).
- Of the credits completed in residence at least 30 credits must be in 300-400 level CoB courses.

- Students must be accepted to the finance major prior to the completion of the last 30 credits in 300 and 400 level CoB courses.
- A Business Administration minor is NOT offered with this major.
- For multiple majors within the CoB, at least 15 unique credits of 300-400 level CoB courses must exist between the majors.

## Certificate Requirements

### Certificate: Finance

Minimum Required Credits: 9

Code	Title	Credits
FIN 320	Principles of Finance	3
Select 2 courses from the following:		6
FIN 410	Investment Analysis and Management	
FIN 420	Options, Futures, and Other Derivatives	
FIN 430	Management of Financial Institutions	
FIN 440	International Finance	
FIN 450	Advanced Bank Management	
FIN 460	Corporate Finance	
FIN 470	Analysis of Fixed-Income Securities	
Total Credits		9

Degree Notes:

- Students must earn a 2.50 cumulative GPA in the courses used to satisfy the certificate requirements.
- Courses may not be taken Pass/Fail.
- Required courses for the certificate may require prerequisites.

## Food Safety

Department Information

- **Department Location:**  
Morrill Hall 311
- **Department Phone:**  
701-231-8944
- **Department Web Site:**  
[www.ag.ndsu.edu/foodsafety](http://www.ag.ndsu.edu/foodsafety)
- **Credential Offered:**  
Minor
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/food-safety/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/food-safety/)

Food Safety is a key component of global challenges to both health and resources and is becoming increasingly complex given the global dimensions of food supply, the need to reduce food waste, and the growing importance of the efficient use of natural resources. Food safety impacts all areas of the chain from production, transportation and storage, processing, distribution, marketing and regulation.

Food safety is the current target of tremendous interest, effort, and spending worldwide, but yet, is an area in which shortages of expertise are manifest. Individuals with this knowledge and training are often heavily recruited for employment. The food safety minor was developed by an interdisciplinary team of faculty with expertise in food safety from several NDSU Colleges and Departments.

The minor in Food Safety (SAFE) requires completion of a total of 16 credits. Eight of these credits are the SAFE core courses, which are completed on-line. The remaining 8 credits are electives which may be selected from a wide range of disciplines including Agribusiness and Applied Economics, Animal Sciences, Emergency Management, Food Safety, Food Science, Microbiology, Plant Sciences and Plant Pathology. A minimum of eight credits must be taken at NDSU.

## Food Science

### Department Information

- **Department Location:**  
Harris Hall
- **Department Phone:**  
701-231-7971
- **Department Email:**  
ndsu.plantsciences@ndsu.edu
- **Department Web Site:**  
[www.ag.ndsu.edu/foodscience/](http://www.ag.ndsu.edu/foodscience/)
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/food-science/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/food-science/)

Food science deals with the transformation of raw agricultural goods into food products acceptable for human consumption. This field of applied science involves studying diverse scientific disciplines such as chemistry, engineering, microbiology, biochemistry, toxicology and management as they relate to food, and effectively applying the industrial and practical aspects to product development, food processing, preservation and marketing.

### The Faculty and Facilities

Food science is a four-year curriculum offered by the College of Agriculture, Food Systems, and Natural Resources through the Department of Plant Sciences. The program draws on the expertise of faculty members in several departments at North Dakota State University who have expertise in both teaching and research. Many have industry experience with numerous connections in the food industry.

The Quentin Burdick Building (QBB) and Harris Hall at NDSU house laboratories and teaching facilities where many of the food science courses are taught. Extensive facilities are available for teaching and food processing research.

### The Curriculum

The program includes courses in food chemistry, food analysis, food microbiology, food processing, food engineering, meat science, nutrition science and cereal technology, in addition to basic courses in mathematics, the sciences, humanities and social sciences. Most of the applied courses in food science are taken after the basic courses have laid the groundwork for the student.

The program allows flexibility in selecting suitable electives to direct one's career goal. Areas of emphasis include food safety, microbiology, sciences, business and management, engineering, nutrition and processing.

The curriculum for food science is approved by the Institute of Food Technologists (IFT). The four-year undergraduate program leads to a Bachelor of Science degree in food science. The program enables graduates to recognize, critically analyze and solve problems realistically in both industrial and academic environments. It provides the opportunity to gain industrial experience during undergraduate study by means of industry internships.

### Career Opportunities

Challenging and rewarding entry-level positions in the food industry are plentiful for food science graduates. Potential employers include large and small food corporations and government agencies. Career opportunities include positions in food science and technology, food chemistry, food

microbiology, product development, quality control, food production and processing, food inspection, packaging, sales and marketing. The average starting salary for an individual with a B.S. degree in food science is \$57,000 according to the Institute of Food Technologists' Salary Survey.

Food scientists study food to improve existing products or create new ones. They also analyze the structure and composition of food and the changes that occur during processing and storage. They determine how processing affects flavor, texture, appearance and nutritional value, and explore new ways to protect and stabilize food through packaging.

The food industry is the largest industry in the world. The challenges of food scientists are to provide wholesome, tasty and nutritious foods for the consumer.

## Industry Internships

Internships offered through NDSU's food science department and Cooperative Education programs provide opportunities for industry experience at companies such as Cargill, Hormel, Dakota Growers Pasta Co., Jennie-O and others.

## Financial Aid and Scholarships

Loans, grants and work-study are made available through the Office of Financial Aid and Scholarships. A number of scholarships are awarded each year to students enrolled in the College of Agriculture, Food Systems, and Natural Resources. Departmental scholarships also are available. Information may be obtained by contacting the coordinator of the food science program. A number of laboratory assistant jobs are available for students majoring in food science.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Major Requirements

### Major: Food Science

**Degree Type:** B.S.

**Minimum Degree Credits to Graduate:** 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I

CFS 470	Food Processing II	3
CFS 471	Food Processing Laboratory	1
CFS 474	Sensory Science of Foods	3
CFS 480	Food Product Development (Capstone)	3
SAFE/CFS/AGEC 452	Food Laws and Regulations	3
<b>Supporting Courses</b>		
Select one of the following:		3-4
BIOC 260	Elements of Biochemistry	
BIOC 460 & 460L	Foundations of Biochemistry and Molecular Biology I and Foundations of Biochemistry I Laboratory	
BIOL 150	General Biology I	3
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory (May satisfy general education category S)	4
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory (May satisfy general education category S)	4
CHEM 341 & 341L	Organic Chemistry I and Organic Chemistry I Laboratory	4

CSCI 114 or MIS 116	Microcomputer Packages (May satisfy general education category S) Business Use of Computers	3
ECON 201	Principles of Microeconomics (May satisfy general education category B and G)	3
HNES 250	Nutrition Science (May satisfy general education category W)	3
MATH 146 or MATH 165	Applied Calculus I (May satisfy general education category R) Calculus I	4
MICR 350 & 350L	General Microbiology and General Microbiology Lab	5
PHYS 211 & 211L	College Physics I and College Physics I Laboratory (May satisfy general education category S)	4
STAT 330	Introductory Statistics (May satisfy general education category R)	3
<hr/> Total Credits		81-83

<sup>1</sup> PLSC189 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take PLSC189.

### Degree Requirements and Notes:

- A 2.00 cumulative GPA is required for graduation and to remain in program.

- **Credential Offered:**  
Minor
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/fraud-investigation/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/fraud-investigation/)

## Fraud Investigation

The Department of Accounting and Information Systems, in collaboration with the Department of Criminal Justice, offers a minor in Fraud Investigation. Students will study the causes of fraud, as well as the detection, investigation, and prevention of fraud. Students learn about the criminal justice system including law making, criminality, and prosecution of fraud and other types of crime. This minor will prepare students for possible careers in crime investigation, litigation support, or forensic accounting.

The Fraud Investigation minor has minimum entrance and completion requirements. See the Minor Requirements guide or contact the Department of Accounting and Information Systems (<https://www.ndsu.edu/business/programs/undergraduate/majors/>) or the Department of Criminal Justice (<https://www.ndsu.edu/cjps/>) for further information on requirements.

<sup>1</sup> ACCT 200 and ACCT 201 require a grade of 'B' or better to enroll in 300-400 level accounting courses.

<sup>2</sup> ACCT 410 Fraud Examination may be waived if the student has taken ACCT 610 Fraud Examination

<sup>3</sup> ACCT 411 Advanced Fraud Examination may be waived if the student has taken ACCT 611 Advanced Fraud Examination

### Minor Requirements and Notes

- This minor must be declared with the College of Business.
- Acceptance into this minor program requires students to earn a grade of 'C' or better in all courses and maintain a minimum institutional cumulative GPA of 2.50. Students must be junior standing (60 credits). **Courses may not be taken pass/fail.**
- If the cumulative GPA falls below the 2.50 after acceptance into the program, the student will not be allowed to register for the College of Business courses until his/her cumulative GPA returns to 2.50 or better.
- Approval for a minor does not guarantee enrollment in specific courses.
- A minimum of 8 credits must be taken at NDSU.

## French

701-231-7887
- **Department Email:**  
ndsu.modernlanguages@ndsu.edu
- **Department Web Site:**  
www.ndsu.edu/modernlanguages/
- **Credential Offered:**  
B.A.; B.S.
- **Official Program Curriculum:**  
bulletin.ndsu.edu/undergraduate/program-curriculum/french/

Today's interconnected world generates the need to be able to communicate in more than one language. As networks of international cooperation and exchange grow in complexity, particularly among governments and businesses, those who possess foreign language competence become increasingly valuable. Moreover, it has been shown that learning a second language can improve one's overall writing and speaking ability.

## Career Directions

Experience has shown that many students, with or without declared modern language majors or minors, find a second language background especially useful when combined with preparation in another professional field. Examples include health care, public relations, journalism, TV and radio broadcasting, hotel management, publishing and editing, government service, banking, and management.

One of the more promising occupational fields for language students has been international business. Individuals with foreign language skills are finding increased opportunities with multinational corporations, especially in management and marketing. Many companies with international ties recruit candidates possessing linguistic training because they recognize its correlation with effective verbal and written communication. Regardless of their specific majors, students are encouraged to contact the department for information and advice on career application of foreign language skills.

Students wishing to prepare for high school teaching should make this intention known to the School of Education and to the Department of Modern Languages to make certain that the requirements for state certification are met. Competitiveness and flexibility in the job market tend to be greater if certification can be obtained in two or more different areas.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>First Year</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>

\* May be satisfied by completing courses in another General Education category.

<sup>†</sup> General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Arts, Humanities, and Social Sciences

### Degree Requirements

**Bachelor of Science (B.S.) Degree** – The completion of a minor program of study, a second major, or a second degree is required.

**Bachelor of Arts (B.A.) Degree** – Second year language proficiency at college level required.

### Arts, Humanities and Social Sciences College Requirements

An additional 9 credits are required by the College of Arts, Humanities and Social Sciences for all Bachelor of Science and Bachelor of Arts degree programs of study, except the Bachelor of Fine Arts degree, the Bachelor of Music degree, the Bachelor of Science in Architecture degree, and the Bachelor of Science degree with a major in Environmental Design:

Code	Title	Credits
<b>AH&amp;SS College Requirements</b>		
Courses used to satisfy any general education requirement cannot be used to also count toward the AH&SS College Requirements. A minimum of three credits is required in each of the 3 following areas for a total of 9 credits. Choose only those courses with the prefixes listed for each area. A course with the WGS prefix can only be used in one area.		
<b>Area One: Humanities</b>		3
ARB, ENGL, FREN, GERM, HIST, HUM, PHIL, RELS, SPAN, or WGS		
<b>Area Two: Social Sciences</b>		3
ANTH, CJ, COMM, EMGT, POLS, SOC, or WGS		
<b>Area Three: Fine Arts</b>		3
ARCH, ART, ENVD, LA, MUSC, or THEA		
Total Credits		9

### Major Requirements

- A minimum grade of "B" is required for all FREN courses counted toward the major.

Code	Title	Credits
<b>French Major Requirements</b>		
Of the 28 credits required for the French major, 15 must be NDSU resident credits in addition to the capstone (i.e. cannot be taken Tri-College or study abroad). Note: Other University-wide residency requirements will apply.		
<b>Required Core Courses:</b>		
FREN 311	French Conversation and Composition I	3

FREN 312	French Conversation and Composition II	3
FREN 315	Contemporary France	3
FREN 350	Introduction to French Linguistics and Pronunciation	3
<b>Elective Courses: Select 15 credits from the following:</b>		<b>15</b>
FREN 340	The French-Speaking World	
FREN 345	Women in French Literature	
FREN 360	Studies in Language and Style	
FREN 365	Advanced Conversation Through Contemporary Culture	
FREN 370	Translation: Practice and Theory	
FREN 401	Approaches to Literature	
FREN 410	French Literature & Culture before 1800	
FREN 412	French Literature & Culture since 1800	
FREN 420	Themes & Topics in French Literature & Culture	
FREN 422	Genres in French Literature	
<b>One Year of a Second Language</b>		
A minimum of one year of a second foreign language is required, with grades of 'C' or better in both semesters.		
<b>Ancillary Courses:</b>		<b>6</b>
Choose at least two courses. Consult department or adviser for other courses that may count. Courses selected from current General Education course list may also count here.		
ANTH 206	Introduction to Cultural Anthropology: Peoples of the World	
ARCH 321	History and Theory of Architecture I	
ARCH 322	History and Theory of Architecture II	
ART 111	Introduction to Art History	
ART 210	Art History I	
ART 211	Art History II	
COMM 216	Intercultural Communication	
ENGL 209	Introduction to Linguistics	
ENGL 240	World Literature Masterpieces	
HIST 457	Europe Since 1914	
HIST 435	World Environmental History	
POLS 220	International Politics	
POLS 225	Comparative Politics	
POLS 444	International Law	
SOC 116	Global Social Problems	
GEOG 151	Human Geography	
GEOG 161	World Regional Geography	
<b>Study Abroad &amp; Capstone Experience:</b>		
FREN 492	Study Abroad (Requires a minimum of one semester-14 weeks at 300+ level in a program pre-approved by the Modern Languages Dept.) <sup>1</sup>	1-12
FREN 489	Senior Thesis (Consult dept/adviser semester before enrolling)	1
Total Credits		35-46

<sup>1</sup> Students may choose to participate in the TAPIF (Teaching Assistant Program in France), sponsored by the French government. The students spend a full 9 months immersed in a French school teaching Conversational English (12 hours/week). This experience does not carry any credit but does provide students an immersion into the culture.

## Minor Requirements

### French Minor

#### Minor Requirements

Required Credits: 18

- A minimum grade of B is required for all courses used for the French minor.

Code	Title	Credits
<b>Core Requirements</b>

FREN 422	Genres in French Literature	
Total Credits		18

## Minor Requirements and Notes

- A minimum of 9 credits must be taken at NDSU. Courses may not be taken Tri-College or study abroad.

# French Education

## Department Information

- **Department Location:**  
Katherine Kilbourne Burgum Family Life, 4-H Center
- **Department Phone:**  
701-231-7921
- **Department Web Site:**  
[www.ndsu.edu/education/](http://www.ndsu.edu/education/)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/french-education/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/french-education/)

French Education involves learning about French language and culture, while simultaneously developing knowledge and skills related to teaching. Your classes will be a blend of content courses related to the language, as well as pedagogy (teaching) courses. Meeting all of the program's requirements prepares you for teacher certification.

## The Program

Candidates in the French education major are prepared for a language teaching career by getting the best of both worlds: content courses with faculty in the Department of Modern Languages and professional education courses from faculty in the School of Education (SOE). In addition to required courses, French education students need to study abroad where the target language is spoken.

## Professional Education Courses

Students may enroll in the 300-level professional education courses before being formally admitted to the SOE. Prior to enrolling in the 400-level courses, students must complete the application for admission to the SOE; attain a minimum of a 2.75 grade point average overall in their course work and education courses; and pass the Praxis Core Academic Skills for Educators exam(s). A minimum grade of "B" is required in the FREN teaching specialty courses. Requirements for admission can be found on the School of Education website (<https://www.ndsu.edu/education>).

## Student Teaching

Student teaching is the culmination of the teaching program. Students have the opportunity to apply knowledge and skills acquired in college courses under the supervision of an experienced French educator.

## Student Advisement

Students will be assigned individual advisors who will work closely in program planning and in other ways to advise and assist them. Students are encouraged to seek advising from both Modern Languages and the School of Education whenever needed.

## Certification

Upon completing the program, students are eligible for certification to teach French in most states. The program is accredited by the Council for the Accreditation of Educator Preparation (CAEP).

## Career Opportunities

A degree in French Education will prepare you to teach French at the 7-12 level. The demand for language teachers continues to be great. In general, "employment of high school teachers is projected to grow 8 percent from 2016 to 2026, about as fast as the average for all occupations. Rising student enrollment should increase demand for high school teachers, but employment growth will vary by region" (<https://www.bls.gov/ooh/education-training-and-library/high-school-teachers.htm>)

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

First Year

## Major Requirements

### Major: French Education

**Degree Type:** B.A. or B.S.

**Minimum Degree Credits to Graduate:** 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking

Total Credits		39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Major Requirements

Code	Title	Credits
<b>Teaching Specialty Requirements</b>		
A GPA of 2.75 or better in the teaching specialty is required for placement in student teaching and exit from the program.		
A minimum grade of 'B' is required in the teaching specialty courses.		
FREN 311	French Conversation and Composition I	3
FREN 312	French Conversation and Composition II	3
FREN 315	Contemporary France	3
FREN 350	Introduction to French Linguistics and Pronunciation	3
FREN 360	Studies in Language and Style (May satisfy general education category C)	3
FREN 401	Approaches to Literature	3
Select four of the following:		12
FREN 340	The French-Speaking World	
FREN 345	Women in French Literature	
FREN 365	Advanced Conversation Through Contemporary Culture	
FREN 370	Translation: Practice and Theory	
FREN 410	French Literature & Culture before 1800	
FREN 412	French Literature & Culture since 1800	
FREN 420	Themes & Topics in French Literature & Culture	
FREN 422	Genres in French Literature	
<b>Study Abroad &amp; Capstone Experience</b>		
FREN 492	Study Abroad (min 1 semester-14 weeks-at 300+ level in a program pre-approved by Modern Languages Dept.)	1-15
FREN 489	Senior Thesis (Consult department/adviser semester before enrolling)	1
<b>Foreign Language</b>		8
A minimum of one year of a second foreign language is required with grades of 'C' or better in both courses.		
<b>Ancillary Electives</b>		6
Choose at least two courses from the following areas: Western Civilization, History of Europe or Africa, World Literature or Mythology, or any area of linguistics. Consult department or adviser for approved list. May count towards general education requirements.		
<b>Professional Education Requirements</b>		

A grade of 'C' or better is required in the following courses.

EDUC 321	Introduction to Teaching	3
EDUC 322	Educational Psychology	3
EDUC 451	Instructional Planning, Methods and Assessment	3
EDUC 481	Classroom Practice Methods of Teaching I: (Lang)	3
EDUC 485	Student Teaching Seminar	1
EDUC 486	Classroom Management for Diverse Learners	3
EDUC 487	Student Teaching	9
EDUC 488	Applied Student Teaching	3
EDUC 489	Teaching Students of Diverse Backgrounds	3

Total Credits

77-91

## Degree Requirements and Notes

- A GPA of 2.75 or better in professional education as well as passing the appropriate Praxis II exam are required to exit the program.
- Of the 28 required credits of French, a minimum of 15, in addition to the capstone, must be resident credit (i.e. taken at NDSU, cannot be Tri-College nor study abroad).
- Courses taken *Pass/Fail* will not be used to satisfy any requirements other than total credits.
- See School of Education (<https://www.ndsu.edu/education>) for admission requirements

**Bachelor of Arts (BA) Degree** – An additional 6 credits of Humanities and Social Sciences and two years of one modern foreign language at the college level or equivalent are required.

## French Studies

### Department Information

- **Department Location:**  
Minard Hall
- **Department Phone:**  
701-231-7887
- **Department Email:**  
[ndsu.modernlanguages@ndsu.edu](mailto:ndsu.modernlanguages@ndsu.edu)
- **Department Web Site:**  
[www.ndsu.edu/modernlanguages/](http://www.ndsu.edu/modernlanguages/)
- **Credential Offered:**  
Minor
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/french-studies/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/french-studies/)

Broader in scope than the traditional minor which emphasizes linguistic competence, the French Studies minor combines systematic language study with courses in geography, history, civilization, and politics to enhance students' understanding of the global context of the language they have chosen to study. A languages studies minor requires 18 approved semester credits, including nine credits of language and civilization study beyond the intermediate level (FREN 311, FREN 312 and a civilization course in the language), a six-credit sequence in history, and an approved three-credit elective in Anthropology, Geography, or Political Science; study abroad is strongly encouraged.

### Minor Requirements and Notes

- A minimum of 9 credits must be taken at NDSU.

## General Agriculture

### Department Information

- **Department Location:**  
Morrill Hall 315
- **Department Phone:**  
701-231-8790
- **Department Web Site:**  
[www.ag.ndsu.edu/academics/](http://www.ag.ndsu.edu/academics/)
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/general-agriculture/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/general-agriculture/)

The general agriculture program is designed to serve students who wish to pursue a college education in the broad area of agriculture. Traditionally, students who have been undecided about their future plans have selected this major to explore the various career options available to them in agriculture before selecting a major. Some students desiring to tailor a degree to meet their career objectives in production agriculture have majored in general agriculture. In addition, some transfer students from two-year institutions find the greater flexibility of the general agriculture major useful in obtaining a bachelor's degree.

### The Program

General agriculture provides a broad based program in agriculture for students who wish to have a diversified program of study that emphasizes several agricultural disciplines. In addition, general agriculture provides for an exploratory program in agriculture for students undecided about which of the 19 majors available in the College of Agriculture, Food Systems, and Natural Resources is best for their individual plans. General agriculture also provides the opportunity for students to pursue an agricultural major and to complete the requirements to be able to teach high school agriculture.

Students receive broad exposure to four or more disciplines and have a large number of unrestricted electives that may be utilized to prepare for specific careers. The flexibility of the curriculum is a point of interest for many students. Several students transferring from two-year institutions have found that they could complete the requirements for a bachelor's degree in general agriculture more quickly than other majors. However, transfer students are still encouraged to consider majors in the specific disciplines if that is their career objective.

## **Agriculture Disciplines**

In addition to a broad set of general education courses, students complete course work in four agricultural disciplines. This is somewhat similar to completing partial minors in four of the academic programs in the College of Agriculture, Food Systems, and Natural Resources. Students must complete 15 credits in one of the disciplines, 12 credits in one discipline, and nine credits in two other disciplines. A capstone course must be completed in one of the disciplines. In addition, students take several electives in agriculture. Some students choose this option at the beginning of their university career while waiting to decide to have a major in one of the disciplinary areas.

## **Agricultural Education**

NDSU offers the opportunity for a student to prepare for a career as an agriculture teacher in the public school system, in addition to a broad range of careers in the agricultural industry. The degree in agricultural education may be completed in the College of Human Development and Education. Students who wish to pursue agricultural education also have the option to have a major in general agriculture and choose agricultural education as a second major. The general agriculture degree program is sufficiently flexible that both majors may be completed without an increase in the total number of credits required for completion.

In addition, students pursuing this approach will be eligible for scholarships and all activities in the College of Agriculture, Food Systems, and Natural Resources.

## **Faculty and Facilities**

General agriculture does not have its own faculty since the faculty in the College of Agriculture, Food Systems, and Natural Resources are housed in academic departments. General agriculture relies on departments to teach basic and advanced courses within their disciplines. A coordinating committee with faculty representing several areas of agricultural sciences administers the general agriculture program. Advisors for students are selected within various disciplines. These faculty members work with students in developing an appropriate plan of study and assist students in exploring various career opportunities.

## **Financial Aid and Scholarships**

Loans, scholarships, grants, and work-study are available through the Office of Financial Aid and Scholarships. Students requiring financial assistance should contact the Office of Financial Aid and Scholarships or One Stop directly. In addition, the College of Agriculture, Food Systems, and Natural Resources has several scholarships available for outstanding students based primarily on academic performance. Contact the Office of the Associate Dean, College of Agriculture, Food Systems, and Natural Resources for information and application forms.

## **Extra-Curricular Activities**

Students are highly encouraged to become active members in at least one student organization, several of which are sponsored by the academic departments in the College of Agriculture, Food Systems, and Natural Resources.

## **Career Opportunities**

Employment opportunities for students in general agriculture remain strong and are similar to those of other production agriculture majors. Generally, the demand for graduates from the College of Agriculture, Food Systems, and Natural Resources exceeds the number of available graduates. Students can greatly enhance their employability by obtaining at least one summer internship during their formal education.

Employers indicate that the most important characteristics desired in graduates include excellent oral and written communication skills, ability to meet and work with people under a variety of conditions, initiative, and work ethic. Most recent general agriculture majors have returned to the farm; therefore, we do not have a reliable sample for typical starting salaries. The Career Center reported the average starting salary for general agriculture graduates in 2013 was \$48,000 per year.

## **General Agriculture Minor**

A minor in general agriculture may be obtained by satisfactorily completing 24 credits with at least six credits in each of any four disciplines offered by the College of Agriculture, Food Systems, and Natural Resources.

## **Plan of Study**

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

Total Credits: 128

CAFSNR - College of Agriculture, Food Systems and Natural Resources - Prefixes include AGECE (Agricultural Economics), ABEN (Agricultural and Biosystems Engineering), ASM (Agricultural Systems Management), AGRI (Agriculture), ANSC (Animal Science), ECON (Economics), ENT (Entomology), SAFE (Food Safety), MICR (Microbiology), PPTH (Plant Pathology), PLSC (Plant Sciences), RNG (Range Science), SOIL (Soil Science), VETS (Veterinary Science).

"Category" refers to the General Education categories (<https://bulletin.ndsu.edu/academic-policies/undergraduate-policies/general-education/#genedcoursestext>)

"Discipline" refers to the four CAFSNR disciplines which must be included in a General Agriculture curriculum. A discipline may be thought of as a prefix. Some prefixes can be combined to form a discipline. If a student chooses to have Agricultural Education as a second major, one of the disciplines may include the required education courses in the College of Human Development and Education.

## Major Requirements

### General Agriculture Major

Degree Type: B.S.

Minimum Degree Credits to Graduate: 128

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Major Requirements

Code	Title	Credits
<b>Major Requirements for General Agriculture</b>		
AGRI 189	Skills for Academic Success (or other Freshman Experience class in a CAFSNR department) <sup>3</sup>	1
CSCI 114	Microcomputer Packages (May satisfy a general education category S)	3
or MIS 116	Business Use of Computers	
MATH 103	College Algebra (or higher level mathematics)	3
PLSC 315	Genetics (May satisfy a general education category S)	3
STAT 330	Introductory Statistics (May satisfy a general education category R)	3
Select one of the following	(May satisfy a general education category S)	3
CHEM 117	Chemical Concepts and Applications	
CHEM 121	General Chemistry I	
BIOL 111	Concepts of Biology	
<b>Required Discipline Courses for General Agriculture</b> <sup>1,2</sup>		
Discipline One: Must include a minimum of 5 credits of 300-400 level		15
Discipline Two: Must include a minimum of 5 credits of 300-400 level		12
Discipline Three: Must include a minimum of 3 credits of 300-400 level		9
Discipline Four		9
<b>Additional Agriculture Electives: 18 credits required; at least 5 credits must be at 300-400 level</b> <sup>2</sup>		18
Total Credits		79

<sup>1</sup>

- Four (4) agriculture disciplines are required. Two disciplines require a minimum of 9 credits, a third discipline requires a minimum of 12 credits and the fourth discipline requires a minimum of 15 credits.
- A capstone experience is required in one of the disciplines.
- Disciplines which may be combined are: (AGEC, ECON); (ANSC, VETS); (NRM, PLSC, RNG); (ASM, ABEN); (NRM, RNG, SOIL); (CFS, SAFE); (ANSC, RNG); ( PLSC, PPTH, SOIL)

<sup>2</sup>

The student and adviser will complete a *General Agriculture Plan of Study* with the courses to be used for the discipline groups and agriculture electives. This form will also require the signature of the department chairperson before being submitted to the Office of Registration and Records for verification of major program completion.

<sup>3</sup>

AGRI189 is only required for first-time, first-year students—A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take AGRI 189.

## Degree and Major Notes

- If a course is used to fulfill General Education or Major Requirements it cannot be used towards the disciplines. This includes; PLSC 315 Genetics, ECON 201 Principles of Microeconomics and STAT 330 Introductory Statistics.
- A *General Agriculture Plan of Study* must be completed with the student's assigned academic adviser prior to the completion of 75 credits. See department for this process. The *Plan of Study*, with signatures, must be filed with the Office of Registration and Records once complete.
- This major will not be available for view in the Student Advisement/Requirement Report in Campus Connection.
- The total number of credits for this degree program is 128.

## Minor Requirements

### General Agriculture Minor

## Geography Minor

Emphases in the Geography minor program are:

1. gaining an understanding of the geographic perspective, and
2. acquiring skills in the use of spatial analysis tools (such as geographic information systems (GIS), computer mapping, and other computer applications).

A Geography minor may be taken in conjunction with a variety of majors such as social science and secondary education. Minor requirements are 18 credits selected in consultation with a geography adviser in the Department of Geosciences. Students preparing for teaching geography in the secondary schools should follow the School of Education (<https://www.ndsu.edu/education>) curricula.

[bulletin.ndsu.edu/undergraduate/program-curriculum/geology/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/geology/)

Today is the ideal time for students to choose a career as a geoscientist. Students with a solid high school background in the sciences and mathematics, liking the outdoors and field studies, and those that are challenged by a rigorous program of classroom, laboratory and field courses, should consider North Dakota State University's program in geosciences. Geoscientists are presently in demand for energy and mineral exploration, and for solving environmental problems.

## Career Opportunities

Geologists who studied at NDSU are currently employed in such diverse fields as environmental geology, groundwater resources, education, community planning, cartography, solid-state geochemistry, engineering geology, petroleum and gas exploration, precious-metals mining, and land reclamation.

## The Department

The geosciences faculty and instructional staff are dedicated to providing the best possible undergraduate education. Faculty members have earned consistently high ratings for their teaching. They also are active in research and bring the benefits of their research activities to students. Many geoscience undergraduates find part-time employment in faculty research or as laboratory teaching assistants. Courses are taught by a variety of techniques including lectures, labs, active learning, report writing and applied field studies. Field studies have included Black Hills, Death Valley, Washington, Hawaii, Iceland and southern Italy. The department's excellent instructional facilities include computers, X-ray diffraction, petrographic microscopes, GPS and surveying equipment, and a continuously-upgraded collection of rocks, minerals, air photos and maps. Training in geographic information systems is provided through the Warren D. Kress Advanced Geography Laboratory. The Optical Dating and Dosimetry Laboratory is used to determine the depositional age of sediments. The Quaternary Entomology Laboratory and the Cosmogenic Nuclide Preparation Laboratory are used for studies of climate change. The Environmental Geomechanics Laboratory is used for studies of water quality.

A core of geology courses, along with training in mathematics, physics, chemistry, soils, geography, computer science and technical writing will prepare students to handle the diverse challenges encountered in this professional career.

## High School Preparation

A solid background in English, mathematics (through trigonometry), biology, chemistry and physics is strongly recommended.

## The Faculty and Staff

S.S. Day, Ph.D., University of Minnesota, 2012, Fluvial Geomorphology, Slope Stability, Geospatial Sciences

B.J.C. Laabs, Ph.D., University of Madison, Wisconsin, 2004, Quaternary Geology, Paleoclimate, Geochronology

K. Lepper, Ph.D., Oklahoma State University, 2001, Glacial Geology, Hydrogeology, Geophysics

P. Oduor, Ph.D., University of Missouri, Rolla, 2004, Geochemistry, Geographic Information Systems

J.L. Rock, M.S., North Dakota State University, 2009

B. Saini-Eidukat, Ph.D., University of Minnesota, 1991, Mineralogy, Petrology, Geochemistry

L.S. Tackett, Ph.D., University of Southern California, 2014, Paleontology, Stratigraphy

S.A. Wood, Ph.D., Princeton University, 1985, Aqueous Geochemistry, Mineral Deposits

A.C. Ashworth, Ph.D., University of Birmingham, England, 1969, Earth History, Paleontology, Paleoecology (Emeritus)

D.P. Schwert, Ph.D., University of Waterloo, Canada, 1978, Quaternary Geology, Land Use (Emeritus)

## Special Note

Students in the geosciences program are encouraged to use their elective credits in courses that will enhance their professional skills (i.e., foreign languages, geography, archaeology, soils, etc.). In addition, the Department of Geosciences offers elective courses in environmental geology, glacial geology, geochemistry, hydrogeology, geophysics and remote sensing.

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

First Year			
Fall	Credits	Spring	Credits
GEOL 105 & 105L (Gen Ed Category S)	4	GEOL 106 & 106L (Gen Ed Category S)	4

## Geology

### Department Information

- **Department Location:**  
Stevens Hall
- **Department Phone:**  
701-231-8455
- **Department Web Site:**  
[www.ndsu.edu/geosci/](http://www.ndsu.edu/geosci/)
- **Credential Offered:**  
B.S.; B.A.
- **Plan Of Study Sample:**  
[bulletin.ndsu.edu/programs-study/undergraduate/geology/#planofstudytext](http://bulletin.ndsu.edu/programs-study/undergraduate/geology/#planofstudytext)

## Major Requirements

### Major: Geology

Degree Type: B.A. or B.S.

**Minimum Degree Credits to Graduate: 122****University Degree Requirements**

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

**University General Education Requirements**

Code	Title	Credits
<b>Communication (C)</b>		<b>12</b>
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		<b>3</b>
<b>Science and Technology (S) <sup>†</sup></b>		<b>10</b>
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		<b>6</b>
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		<b>6</b>
<b>Wellness (W) <sup>†</sup></b>		<b>2</b>
<b>Cultural Diversity (D) <sup>**†</sup></b>		
<b>Global Perspectives (G) <sup>**†</sup></b>		
Total Credits		39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

**College Requirements**

Code	Title	Credits
<b>Bachelor of Arts (BA) Degree – An additional 12 credits Humanities and Social Sciences and proficiency at the second year level in a modern foreign language.*</b>		<b>12</b>
<b>Bachelor of Science (BS) Degree – An additional 6 credits in Humanities or Social Sciences*</b>		<b>6</b>

\* Humanities and Social Sciences may be fulfilled by any course having the following prefix: ADHM, ANTH, ARCH, ART, CJ, CLAS, COMM, ECON, ENGL, FREN, GEOG, GERM, HDFS, HIST, LA, LANG, MUSC, PHIL, POLS, PSYC, RELS, SOC, SPAN, THEA, WGS, or any course from the approved list of general education courses in humanities and social sciences (general education categories A and B). These credits must come from outside the department of the student's major.

**Major Requirements**

Code	Title	Credits
<b>Geology Core Requirements</b>		
Students must have at least a 2.0 cumulative GPA in the geology core requirements.		
GEOG 455	Introduction to Geographic Information Systems	4
GEOG 105 & 105L	Physical Geology and Physical Geology Lab (May satisfy general education category S)	4

GEOL 106 & 106L	The Earth Through Time and The Earth Through Time Lab	4
Select one of the following:		2
GEOL 301	Lake Superior Field Course	
GEOL 302	Black Hills Field Course	
GEOL 496	Field Experience	
GEOL 350 & GEOL 303	Invertebrate Paleontology and Paleontology Field Course	4
GEOL 410	Sedimentology/Stratigraphy	4
GEOL 412	Geomorphology	3
GEOL 420 & GEOL 421	Mineralogy and Mineralogy Laboratory	4
GEOL 422	Petrology	3
GEOL 423	Petrography	1
GEOL 450	Field Geology	3
GEOL 457	Structural Geology	4
GEOL 491	Seminar (Junior Year)	1
GEOL 491	Seminar (Senior Year)	1
SOIL 444	Soil Genesis and Survey	3

**Related Required Courses**

Select one of the following chemistry sequences :		8
Sequence A:		
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory	
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory	
Sequence B:		
CHEM 150 & CHEM 160	Principles of Chemistry I and Principles of Chemistry Laboratory I	
CHEM 151 & CHEM 161	Principles of Chemistry II and Principles of Chemistry Laboratory II	
ENGL 324	Writing in the Sciences	3
MATH 165	Calculus I (May satisfy general education category S)	4
MATH 166	Calculus II	4
Select one of the following physics sequences:		8-10
Sequence A:		
PHYS 211 & 211L	College Physics I and College Physics I Laboratory	
PHYS 212 & 212L	College Physics II and College Physics II Laboratory	
Sequence B:		
PHYS 251 & 251L	University Physics I and University Physics I Laboratory	
PHYS 252 & 252L	University Physics II and University Physics II Laboratory	
Select one of the following:		3-4
CSCI 122	Visual BASIC	
CSCI 160	Computer Science I	
CSCI 227	Computing Fundamentals I	

Total Credits

75-78

## Program notes

- Except for courses offered only as pass/fail grading, no course may be taken Pass/Fail.
- Majors planning on graduate studies should be aware that a summer field camp course may be required for graduate admission. This course is recommended to be taken during the summer following the junior or senior year. Information on field camp courses and a small departmental scholarship to support these studies may be obtained from an adviser.

## Geology Minor

### Minor Requirements

Required Credits: 18

Code	Title	Credits
<b>Required Courses</b>		
All minor courses must be selected in consultation with a Department of Geosciences adviser.		18
Total Credits		18

### Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- Select geography and soil science courses may be substituted for geology courses. A substitution form must be submitted to the Office of Registration and Records for approved substitutions.
- The student and adviser will complete a substitution form with the courses to be used for the geology minor. This form will also require the signature of the department chairperson before being submitted to the Office of Registration and Records for verification of minor program completion.
- Note: This minor will not be available for view in the Student Advisement/Requirement Report in Campus Connection until the substitution form has been received and processed.

## German Studies

## Minor Requirements

### German Studies Minor

#### Minor Requirements

Required Credits: 18

Code	Title	Credits
<b>German Studies Core Requirements</b>		
GERM 220	German Culture & Society (may be completed through study abroad)	3
GERM 311	German Conversation and Composition I	3
GERM 312	German Conversation and Composition II	3
<b>History Electives</b>		
Must be a sequence. Or a history sequence appropriate to student's area of study		
HIST 101	Western Civilization I	3

HIST 102	Western Civilization II	3
<b>Additional Electives: Select one of the following:</b>		3
ANTH 206	Introduction to Cultural Anthropology: Peoples of the World	
GEOG 151	Human Geography	
GEOG 161	World Regional Geography	
POLS 220	International Politics	
GERM 492	Global Practicum: Study Abroad	
Total Credits		18

## Minor Requirements and Notes

- A minimum of 9 credits must be taken at NDSU.

## German Studies

### Department Information

- **Department Location:**  
Minard Hall
- **Department Phone:**  
701-231-7887
- **Department Email:**  
ndsu.modernlanguages@ndsu.edu
- **Department Web Site:**  
[www.ndsu.edu/modernlanguages/](http://www.ndsu.edu/modernlanguages/)
- **Credential Offered:**  
Minor
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/german-studies/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/german-studies/)

Broader in scope than the traditional minor which emphasizes linguistic competence, the German Studies minor combines systematic language study with courses in geography, history, civilization, and politics to enhance students' understanding of the global context of the language they have chosen to study. A languages studies minor requires 18 approved semester credits, including nine credits of language and culture studies beyond the intermediate level (German 311, 312 and a culture course), a six-credit sequence in history, and an approved three-credit elective in Anthropology, Geography, or Political Science; study abroad is strongly encouraged.

## Gerontology

### Department Information

- **Department Location:**  
E. Morrow Lebedeff Hall 255
- **Department Phone:**  
701-231-8211
- **Department Web Site:**  
[www.ndsu.edu/socanth/undergraduate/gerontology\\_minor/](http://www.ndsu.edu/socanth/undergraduate/gerontology_minor/)
- **Credential Offered:**  
Minor
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/gerontology/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/gerontology/)

A minor in Gerontology is sponsored through the College of Human Sciences and Education (<https://www.ndsu.edu/hse>) and the College of Arts, Humanities and Social Sciences (<https://www.ndsu.edu/ahss>). It provides students with an integrated understanding of the process of aging, aging services, and the aged in America.

A minor in gerontology at North Dakota State University provides a program of study for students interested in a variety of careers that involve work with the elderly population. Students from a variety of majors such as human development and family science, sociology, psychology, nursing, interior design and education can benefit from training in gerontology.

### Career Opportunities

Career interests available would depend on the major or other training but include designer/architect of housing facilities, adult day services, elderly volunteer services, mental health services for elderly persons, geriatric nursing, social service programs for elderly persons, long-term care administration, corporate health planning or market research.

### High School Preparation

Prior to coming to college, volunteer community service activities such as 4-H, scouting, and work with church youth groups can help students gain valuable experience working with people in the community. High school courses in behavioral and social sciences (e.g., social studies, economics, psychology, family life education, child development) are helpful in preparing for study in gerontology.

### The Curriculum

This program is sponsored through the College of Human Sciences and Education and the College of Arts, Humanities and Social Sciences at NDSU. It makes use of the resources of the Tri-College University to provide students an integrated understanding of the process of aging, aging services and the aged in America. There are six basic areas of study. Students should follow the directions provided for each of the areas.

## Gerontology

### Department Information

SOC 441	Death and Dying	

## Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.

# Global Business

## Department Information

- **Department Location:**  
Richard H. Barry Hall
- **Department Phone:**  
701-231-8651
- **Department Web Site:**  
[www.ndsu.edu/business/](http://www.ndsu.edu/business/)
- **Credential Offered:**  
Offered as a second major only
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/global-business/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/global-business/)

Global Business is offered as a second major program of study only. This second major combines global business courses with language training and a study abroad experience to qualify students for management positions in the diverse, multicultural, and global environment they will encounter in the future. A second major in Global Business serves as a competence and skill amplifier for business students, complimenting their primary business major (i.e., accounting, business administration, finance, management, marketing, and management information systems). Students with this second major distinguish themselves in ways that they develop functional competencies from their primary business major and are prepared to lead and perform in multicultural and global business contexts through their second major. The Global Business major enhances students' ability to operate in global business environments, appreciation for different cultures, and business knowledge pertaining to international arenas.

## Background Information

The Association to Advance Collegiate Schools of Business (AACSB International) accredits the undergraduate and graduate programs in the College of Business at North Dakota State University. Our College of Business is one of only two AACSB-accredited schools of business in North Dakota.

AACSB International is one of higher education's most prestigious and rigorous accrediting bodies, emphasizing a commitment to continuous improvement, innovation, engagement, and impact in business education. Less than 10 percent of business programs worldwide have this accreditation, highlighting the academic excellence of our College of Business at NDSU.

## The Program

Global Business is a second major, which may only be added to a primary major from the College of Business (i.e., accounting, business administration, finance, management, marketing, or management information systems). The curriculum of this major is designed to prepare students to survive and thrive in today's global and multicultural work environment. This is achieved through global learning, both in the domestic classroom and through study abroad opportunities around the world. The focus is to help develop more globally minded students who can communicate effectively across cultures, who are more open to diversity, who become more inter-culturally proficient, and who are aware of business issues in the international arena. The global business second major requires students to have at least 3 credits of study abroad and 2<sup>nd</sup>-year language proficiency in addition to a group of internationally oriented business electives. To complete the program requirements of Global Business as a second major, students need to complete the requirements of both the global business major and their primary business major.

## Selective Admission

Students who wish to study global business at NDSU enroll as pre-professional students of their primary major in the College of Business for the first semester of their freshman year. Admission to the professional program requires the successful completion of the pre-professional course requirements (ENGL 120, COMM 110, MATH 144, ECON 201 or 202, and PSYC 111 or SOC 110) and a minimum cumulative grade point average (GPA) of 2.5, and declare Global Business as their second major. Transfer students may also be eligible for immediate admission in the professional program. Contact a College of Business professional advisor for more information.

## The Faculty

To provide a rigorous and relevant educational experience to our students, faculty in our program are highly qualified to teach in their respective areas of expertise. Our faculty have been recognized for their teaching excellence by their students and colleagues and for their outstanding research by their peers. They employ a wide variety of instructional techniques and embed both classical and cutting-edge knowledge into their classes.

They remain current in their fields by actively engaging in research and/or with firms and business professionals regarding their business practice, challenges, and issues.

## The Practicum

Students are encouraged to complete practicum experiences, ideally at the end of sophomore and junior years. The practicum is designed to enable our students to connect business concepts learned in the classroom with live business situations and to broaden their horizons beyond the classroom setting. The practicum also gives students a competitive edge in job placement.

## Career Opportunities

Graduates with a second major in global business in addition to their primary business major (i.e., accounting, business administration, finance, management, marketing, or management information systems) have career opportunities in business, industry, government service, and the non-profit sector, both regionally and globally. Initial employment opportunities are likely tied to their primary business major with global business competencies serving as their distinctive career enhancer.

## The College

In addition to global business major, the College of Business offers undergraduate majors in accounting, business administration, finance, management, marketing, and management information systems. The College of Business also offers five graduate programs including Master of Business Administration, Master of Accountancy, Master of Managerial Logistics, Master of Transportation and Urban Systems, and Doctorate in Transportation and Logistics.

## High School Preparation

It is recommended that high school students interested in studying global business at the university level take mathematics courses at least through pre-calculus. High school electives in the social sciences, communication, and English also would be of benefit. Students who have satisfactorily completed Advanced Placement courses in Calculus, Economics, English, Communication, and Psychology or Sociology may directly apply for admission to the professional program. Please speak with a professional advisor in the College of Business for more information.

# Global Business

- **Department Location:**  
Richard H. Barry Hall
- **Department Phone:**  
701-231-8651
- **Department Web Site:**  
[www.ndsu.edu/business/](http://www.ndsu.edu/business/)
- **Credential Offered:**  
Offered as a second major only
- **Program Overview:**  
[bulletin.ndsu.edu/programs-study/undergraduate/global-business/](http://bulletin.ndsu.edu/programs-study/undergraduate/global-business/)

## Second Major Requirements

### Major: Global Business

**Required Credits: 40**

#### I. Primary Major Requirement

Global Business is offered as a second major only. Students may pursue Global Business after declaring and being admitted into one of the College of Business' primary professional programs of Accounting, Business Administration, Finance, Management, Management Information Systems, or Marketing (see admission requirements (<https://www.ndsu.edu/business>) for *all* College of Business majors).

#### II. Core Requirement

Code	Title	Credits
<b>I. Core Requirement</b>		
FIN 320	Principles of Finance	3
MGMT 320	Foundations of Management	3
MRKT 320	Foundations of Marketing	3
MIS 320	Management Information Systems	3

BUSN 430	Legal and Social Environment of Business	3
BUSN 340	International Business	3
BUSN 341	Global Business Environment (or a UNIV 492 study abroad course) *	3
BUSN 489	Strategic Management	3
Complete 3 courses from the following:		9
MRKT 372	Global Retailing	
MGMT 440	International Management	
FIN 440	International Finance	
MRKT 440	International Marketing	
BUSN 440	International Business Law	
AGEC 371	Export Management	
II. Language Proficiency Requirement **		3-14
III. Study Abroad Requirement ***		3
Total Credits		39-50

\* The intent of BUSN 341 is to ensure that students participate in a study abroad experience that includes an academic component related to the country where the study abroad takes place. In addition to BUSN 341, BUSN 394: Individual Study (Global Business Environment) may also fulfill this requirement. Univ 492 (Study Abroad), NDSU Study Tour (Prefix 379) courses from across campus (faculty directed experience or field study in a foreign country) or other study abroad transfer courses approved by the department chair may also fulfill this requirement.

\*\* A second year language proficiency at the college-level is required. Completion of any 300 or 400 level language course with a grade of B or higher will also fulfill this requirement. For non-native English speakers, completion of any 300 or 400 level ENGL course (this includes ENGL 320) with a grade of B or higher will fulfill this requirement.

Second Year Language Proficiency includes:

(Prefix) 101: First Year Language I

(Prefix) 102: First Year Language II

(Prefix) 201: Second Year Language I

(Prefix) 202: Second Year Language II

\*\*\* International students who are enrolled at NDSU will not be required to complete a study abroad experience. Instead, students must complete one of the following North American history courses: HIST 382, 421, 422, 423, 424, 425, 429, 431, 434, 436, 437, or 476. This history course will substitute for the BUSN 341 "European Business Environment or equivalent study abroad course" from course requirement group A.

## Degree notes:

*Pre-Business Core Suggestions:* While not required, students are encouraged to take either ANTH 111 (Introduction to Anthropology) or COMM 216 (Intercultural Communication) as a general education cultural diversity requirement option. Students will also benefit from taking GEOG 161 (World Regional Geography) as an elective.

## Health Education

### Department Information

- **Department Location:**  
Katherine Kilbourne Burgum Family Life, 4-H Center
- **Department Phone:**  
701-231-7921
- **Department Web Site:**  
[www.ndsu.edu/education/](http://www.ndsu.edu/education/)
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/health-education/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/health-education/)

The health education major is designed to prepare students for careers in the field of school health education through the development of dispositions, knowledge and skills. The program integrates classroom and experiential community-based learning throughout its courses.

## The Program

The health education program emphasizes a student-centered approach to teaching health, emphasizing skills based learning to promote health literacy for all individual students.

Upon completion of the health education major, students will be knowledgeable with planning, implementing, administering all ten components of the Whole School, Whole Community, Whole Child Model. Health education majors will learn how to evaluate and assess needs for health education, plan and implement quality curriculum and lessons and communicate and advocate for health and health education through all ten content components.

## Professional Education Courses

Students may enroll in the 300-level professional education courses before being formally admitted to the School of Education (SOE). Prior to enrolling in the 400-level courses, students must complete the application for admission to the SOE; attain a minimum of a 2.75 grade point average overall in their course work and education courses; and pass the Praxis Core Academic Skills for Educators exam(s). Requirements for admission can be found on the School of Education website (<https://www.ndsu.edu/education>).

## Student Teaching

Student teaching is the culmination of the teaching program. Students have the opportunity to apply skills acquired in college courses under the supervision of an experienced health educator.

## Student Advisement

Students will be assigned individual advisors who will work closely in program planning and in other ways to advise and assist them. Students are encouraged to seek their advisors' help whenever needed.

## Certification

Upon completing this program, students are eligible for certification to teach health in most states. The program is accredited by the Council for the Accreditation of Educator Preparation (CAEP).

## Career Opportunities

Graduates in health education find career opportunities teaching in public or private educational settings, teaching health education in a variety of settings, including community programming, nonprofit organizations and private businesses.

**Double Major** – It is recommended that health education students obtain a degree enhancement through a minor or double major. The health education curriculum has been structured to allow students to obtain a physical education major during the same four year time frame. Advisors can provide additional information about other complementary majors or minors.

**Physical Education Major** – For further information about the physical education major, please refer to the Physical Education fact sheet.

## Plan of Study - Health Education

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Major Requirements

### Major: Health Education

Degree Type: B.S.

**Minimum Degree Credits to Graduate: 120****University Degree Requirements**

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

**University General Education Requirements**

Code	Title	Credits
<b>Communication (C)</b>		12

\*\* Students must earn a grade of 'C' or better in these courses.

### Degree Requirements and Notes

- A GPA of 2.75 or better in the teaching specialty is required to stay in full standing in the program, for placement in student teaching, and to exit from the program.
- A GPA of 2.75 or better in professional education requirements and completion of Praxis II and PLT exams, are required to exit the program.
- Courses taken *Pass/Fail* will not be used to satisfy any requirements other than total credits.
- See School of Education (<https://www.ndsu.edu/education>) for admission requirements.

# Health Services

---

## Department Information

- **Department Location:**  
Sudro Hall
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/health-services/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/health-services/)

The Bachelor of Sciences in Health Services (BSHS) is a degree offered by the College of Health Professions. The BSHS degree includes a mix of academic and technical training that meets the needs of regional health care employers. The degree is designed to provide an efficient, flexible, and technically relevant path to a four-year degree, which allows students to pursue entry-level employment in a health care setting and/or prepare for graduate/advanced professional-level training programs. Individuals who hold an associate degree, technical degree, or professional certification, and who currently work in a health care setting will also find the program to be a flexible degree completion program that facilitates career advancement.

## The Program

The BSHS program has broad requirements, and allows students tremendous flexibility to tailor their plan of study to meet their unique career interests. To earn the degree, students must complete:

- 120 or more credits (125-130 credits is strongly encouraged)
- 37 or more credits at the 300 level and higher
- All NDSU General Education Requirements
- All NDSU Residency Requirements (Applicable to Transfer Students)

Additionally, students must complete the following courses:

- CHP 190, Critical Thinking and Academic Success (2 credits)
- CHP 300, Introduction to the U.S. Healthcare System (3 credits)
- CHP 301, Research Methods in Health Services (3 credits)
- CHP 391, Catholic Healthcare Ethics (3 credits)
- CHP 489, Health Services Capstone (1 credit)
- PH 101, Introduction to Public Health (3 credits)
- Select one course from the following (3 credits)\*
  - CHP 400, Interprofessional Health Care Practice
  - PH 474, Epidemiology
  - CHP 450, Complementary and Alternative Therapies
  - CHP 460, Advanced Writing for Health Professionals
  - CHP 479, Global Seminar (must be 3 or more credits)
  - CHP 491, Seminar on Catholic Health Care Ethics II

\*Students must meet existing prerequisites to enroll in any of these courses.

- 15 or more credits of coursework emphasizing clinical, research, or internship experiences. Students must complete at least 6 of the 15 clinical, research, or internship credits at the 200 level (or lower).

Students are required to meet with their academic advisor to create a plan of study that addresses all program requirements. The plan must be approved by the student's advisor and the College of Health Professions' Dean's Office at least one semester prior to graduating with the BSHS degree.

## Experiential Training

A core element of the BSHS degree is that students gain hands on learning experiences that prepare them for their own, unique health care career.

Students must complete at least 15 credits of approved experiential training, although students are highly encouraged to complete additional experiential credits. As previously noted, those experiences may be based in research, clinical work, or general internship experiences.

Students may complete experiential credits offered by the College of Health Professions, other departments at NDSU, other colleges and universities in the Tri-College system (i.e., NDSU, Minnesota State University Moorhead, Concordia College, North Dakota State College of Science, and Minnesota State Community and Technical College), and other North Dakota University System campuses. Experiential credits offered through the College of

Health Professions will include both research opportunities, as well as opportunities to complete clinical experience credits at hospitals and health systems within the region.

While students have tremendous flexibility in selecting their experiential training, each college/university, academic department, and clinical site may have additional requirements (or assess tuition that differs from NDSU) to complete those experiences. Students are strongly encouraged to meet with their academic advisor to ensure that all academic prerequisites and professional requirements necessary to enroll in their intended experiential education courses are met.

Students who hold an associate degree, technical degree, or professional certification in a health-related field may, upon approval from the student's advisor and the College of Health Professions' Dean's Office, use those previously earned credits to satisfy BSHS experiential training requirements.

### Career Opportunities

Regional and national workforce estimates indicate an increased need for qualified physicians, physician assistants, medical records and health information management personnel, as well as a variety of technically oriented health care workers between now and 2026. North Dakota job growth percentages for different areas (2014-2024) compared to national (2016-2026) suggest similar workforce needs (U.S. Department of Labor's projections (<https://projectionscentral.com/Projections/Download>) and US Bureau of Labor Statistics Healthcare Occupation Outlook (<https://www.bls.gov/ooh/healthcare/home.htm>)):

- Physicians: North Dakota 8%; National 15%
- Physician Assistants North Dakota 31%; National 37%
- Cardiovascular Technologists/Technicians: North Dakota 34%; National 10%
- Surgical Technologists: North Dakota 24%; National 12%
- Medical Laboratory Technologists: North Dakota 25%, National 12%
- Medical Records and Health Information Technologists: North Dakota 23%, National 13%

Many entry-level health care careers require a unique mix of traditional academic and professional/technical education, which are not included in any current degree offerings at NDSU. Students may obtain this training in graduate and/or professional programs (pharmaceutical sciences, public health, etc.) or at community and technical colleges (surgical technology, health information technology, etc.). The BSHS degree provides students flexibility in planning to meet the unique academic requirements of their professional/graduate/technical program of interest while completing a well-rounded bachelor degree.

### Transferring Credits

View NDSU equivalencies of transfer courses at: [www.ndsu.edu/transfer/equivalencies](http://www.ndsu.edu/transfer/equivalencies)

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

**History**

## Department Information

- **Department Location:**  
Minard Hall 422
- **Department Phone:**  
701-231-8654
- **Department Web Site:**  
[ndsuhprs.org/](http://ndsuhprs.org/) (<http://ndsuhprs.org/>)
- **Credential Offered:**  
B.A.; B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/history/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/history/)

History is the key to the present. This important fact is sometimes overlooked by some members of America's present-minded society. If one is to understand the present and approach the future intelligently, it is necessary to have a clear understanding of the past. Indeed, the present is the direct result of the past, and the great issues of the day can be dealt with competently only by use of the perspective provided by the past.

**Background Information**

History is the keystone to a liberal arts education because everything is intimately related to history. It acts as a unifying agent that helps link other liberal arts courses together in a meaningful whole. But for many students who have an intense interest in history, the crucial question remains, "What is the job outlook for a history major?"

**Career Opportunities**

The skills and attitudes fostered by a history-oriented education can lead to careers in business, law, industry, government or teaching. These skills and attitudes include the ability to analyze, communicate effectively, reason and think critically. They help provide insight into the complexity of human behavior.

Many students who major in history at North Dakota State University combine their history courses with an approved minor and pursue the Bachelor of Science (B.S.) degree. Graduates have found jobs in such business fields as insurance and retailing. Opportunities also exist in banking, health services, and local and state government.

A second option is the Bachelor of Arts (B.A.) degree, which includes foreign language study. This degree program is recommended for students desiring a rich liberal arts education or planning to attend graduate school or law school. Recent graduates have entered graduate programs at the Universities of Florida, Nebraska and Texas. Many history majors go on to earn a law degree and practice law in North Dakota and other states.

About 60 percent of our students are in history education. Currently, the U.S. Department of Labor predicts that "job opportunities for teachers over the next 10 years will vary from good to excellent." Students interested in teaching in secondary schools are advised to double major in history and history education with history as their primary major.

Additional career options are outlined on the "Career Information" link on the history department website. More information on career opportunities in history can be found in the Occupational Outlook Handbook published by the U.S. Department of Labor.

## The Program

Each of the degree programs requires basic courses in such areas as English, social and behavioral sciences, and science and mathematics. In addition, each program has a distinctive requirement—an approved minor for the B.S., foreign language proficiency at the second-year level for the B.A. and 30 credits in specified education courses for the history education degree. The curriculum in these degree options includes a variety of courses in North American, European and world history. After taking introductory courses, students majoring in history work with their advisers in selecting an interrelated sequence of upper-division courses.

A total of 39 credits in history are required in each of the options. Each option requires nine to 15 credits at the 100-200 level, a historical research and writing course and at least 18 credits in 300- or 400-level courses. Eighteen of the credits at the 300-400 level must meet geographic distribution requirements. A three-credit senior seminar is required of all history majors as a capstone experience.

## Public History Major

In 1982, the Department of History launched a public history program, the first in the Upper Midwest, which introduces students to such fields as archival and museum work. Public History is now a vibrant field of study in the United States and trains students for a wide variety of careers. The Public History major is a 51 credit professional major. More information can be found on the history department web page.

## Multimedia Lectures

History faculty incorporate multimedia presentations into many of their introductory classes. Some faculty work extensively with computer-aided teaching in the multimedia lecture halls to increase the visual impact and student learning from their lectures.

## Active Learning in Classes

The department encourages active learning in many of its introductory classes by using techniques that include student portfolios, in-class exercises, role playing, computer simulations and library assignments. Faculty make prudent use of technology and encourage the examination of all sorts of primary sources, including films, novels and textiles as well as government documents and memoirs.

## International Perspectives and Cultural Diversity

The department is strongly committed to helping students understand the diversity of human experience. In addition to the specific courses in non-western areas, other history classes help students understand how differences in race, gender, ethnicity, and social and economic class have affected people's lives. Department faculty are also active in numerous efforts to promote understanding of diversity. These include women's studies and NDSU's anti-racism team. The department encourages study abroad, and NDSU historians have designed programs in Vienna and Mexico City.

## The Faculty

Each member of the NDSU history faculty of ten holds a doctorate from a leading university, among them UCLA, Cornell, Indiana University, Northwestern, and Notre Dame. Faculty members provide a wide range of academic experience and specialties. They have published books and articles on subjects such as Great Plains, Environmental History, pre-colonial Latin America, 20th-century Indochina, American women and families, the American Revolutionary War, Early Modern Europe, and Eastern Europe under communist rule. History faculty members frequently present scholarly research papers at professional historical conferences in various centers of learning. Faculty members have won college, university, state and national awards for their research. The department also hosts regional history conferences and lectures.

## History Department Affiliate

The North Dakota Institute for Regional Studies is closely connected with the Department of History, Philosophy, and Religious Studies. The Institute collects, organizes and preserves materials on our region's historical heritage. An archival theory and practice course is offered by the department and utilizes the Institute's resources.

## Cooperation with Humanities Council and the National Endowment for the Humanities

History faculty are active in programs sponsored and funded by the North Dakota Humanities Council. In recent years, faculty have written and presented on genocide in Bosnia, suicide and divorce in the Civil War South, the Dakota War of 1862 and French Colonial policies in Indochina.

### Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		6
<b>Wellness (W) <sup>†</sup></b>		2
<b>Cultural Diversity (D) <sup>*†</sup></b>		
<b>Global Perspectives (G) <sup>*†</sup></b>		
Total Credits		39

- \* May be satisfied by completing courses in another General Education category.
  - † General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.
- A list of university approved general education courses and administrative policies are available here (p. 91).

## Arts, Humanities, and Social Sciences

### Degree Requirements

**Bachelor of Science (B.S.) Degree** – The completion of a minor program of study, a second major, or a second degree is required.

**Bachelor of Arts (B.A.) Degree** – Second year language proficiency at college level required.

### Arts, Humanities and Social Sciences College Requirements

An additional 9 credits are required by the College of Arts, Humanities and Social Sciences for all Bachelor of Science and Bachelor of Arts degree programs of study, except the Bachelor of Fine Arts degree, the Bachelor of Music degree, the Bachelor of Science in Architecture degree, and the Bachelor of Science degree with a major in Environmental Design:

Code	Title	Credits
<b>AH&amp;SS College Requirements</b>		
Courses used to satisfy any general education requirement cannot be used to also count toward the AH&SS College Requirements. A minimum of three credits is required in each of the 3 following areas for a total of 9 credits. Choose only those courses with the prefixes listed for each area. A course with the WGS prefix can only be used in one area.		
<b>Area One: Humanities</b>		3
ARB, ENGL, FREN, GERM, HIST, HUM, PHIL, RELS, SPAN, or WGS		
<b>Area Two: Social Sciences</b>		3
ANTH, CJ, COMM, EMGT, POLS, SOC, or WGS		
<b>Area Three: Fine Arts</b>		3
ARCH, ART, ENVD, LA, MUSC, or THEA		
Total Credits		9

### Major Requirements

Twenty-four (24) credits must be taken at the 300-400 level and of these 24, twenty (20) credits must be taken in residence at NDSU for a history major.

Code	Title	Credits
<b>History Major Requirements</b>		
Foundation Core: Select 2 courses from the following:		6
HIST 101	Western Civilization I (May satisfy general education category A)	
HIST 102	Western Civilization II (May satisfy general education category A)	
HIST 103	U.S. to 1877 (May satisfy general education category A)	
HIST 104	U.S. Since 1877 (May satisfy general education category A)	
Research & Writing		
HIST 390	Historical Research and Writing	3
Transitional Courses: Select one course from the following:		3
HIST 135	Race in U.S. History (May satisfy general education category A and D)	
HIST 220	North Dakota History	
HIST 251	Introduction To Public History	
HIST 252	Introduction to Museum Work	
HIST 259	Women in European History 1400-1800	
HIST 261	American Indian History (May satisfy general education category A and D)	
HIST 270	American Religious History (May satisfy general education category A)	
HIST 271	Introduction to Latin American History (May satisfy general education category A and D)	
HIST 280	History of East Asia to 1600	
HIST 281	History of East Asia from 1600	
<b>Distribution Requirement: Minimum credit required for each distribution area.</b>		

North American History: Select 6 credits from the following:		6
RELS 340	New Religious Movements	
RELS 345	Religion and Politics	
HIST 382	Canada	
HIST 415	Public Memory and Memorialization in America	
HIST 420	Colonial American History	
HIST 421	Revolutionary America	
HIST 422	American Civil War and Reconstruction	
HIST 423	The Gilded Age and Progressive America	
HIST 424	U.S. History 1917-1960	
HIST 425	U.S. History 1917-Present II	
HIST 426	Women in American History	
HIST 428	War and Society in Early America	
HIST 431	The North American Plains	
HIST 434	Environmental History	
HIST 436	American Frontier to 1850	
HIST 437	American West Since 1850	
European History: Select 6 credits of the following:		6
HIST 320	History of Christianity	
HIST 450	Ancient History	
HIST 451	Medieval History	
HIST 454	Renaissance And Reformation	
HIST 455	The Eighteenth Century	
HIST 456	Europe 1815-1914	
HIST 457	Europe Since 1914	
HIST 464	Imperial Spain	
HIST 465	Germany since 1750	
HIST 467	History Of Russia II	
Widening Horizons: Select 6 credits of the following:		6
HIST 355	History of Global Islam	
HIST 381	Australia & New Zealand (May satisfy general education category A and G)	
HIST 440	The Ottoman Empire	
HIST 473	Colonial Mexico	
HIST 474	Modern Mexico	
HIST 475	The Aztec, Maya, and Inca	
HIST 477	Slavery in the Atlantic World	
HIST 480	History of Modern China from 1600	
HIST 481	History of Japan	
HIST 482	Vietnam: 125 Years of Conflict	
HIST 484	Cultures and Civilizations of the Pre-modern World	
HIST 485	Cultural Exchange and the Making of the Modern World	
Senior Seminar:		
HIST 489	Senior Seminar (Capstone) *	3
<b>Additional Electives: A minimum of 6 credits of history courses required.</b>		<b>6</b>
Total Credits		39

\* Prerequisite for HIST 489 Capstone: HIST 390

## Minor Requirements

### History Minor

#### Minor Requirements

Required Credits: 18

Code	Title	Credits
<b>Electives</b>		
HIST	100-200 level courses	9
HIST	300-400 level courses	9

### Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.

## History Education

### Department Information

- **Department Location:**  
Katherine Kilbourne Burgum Family Life, 4-H Center
- **Department Phone:**  
701-231-7921
- **Department Web Site:**  
[www.ndsu.edu/education/](http://www.ndsu.edu/education/)
- **Credential Offered:**  
B.A.; B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/history-education/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/history-education/)

### The Program

The History Education curriculum includes classes in the various fields of history, namely European history, US history, and Widening Horizons (world history). Candidates in the history education major are prepared to teach a diverse curriculum to a diverse student population.

### Professional Education Courses

The history education student should work closely with an advisor to be sure that the general education courses taken will provide a strong foundation for the advanced courses in the major. Students may enroll in 300-level professional education courses before being formally admitted to the School of Education (SOE). Prior to enrolling in the 400-level courses, students must complete the application for admission to the SOE; attain a minimum of a 2.75 grade point average overall in their course work and in education courses; and pass the Praxis Core Academic Skills for Educators exam(s). Requirements for admission can be found on the School of Education website (<https://www.ndsu.edu/education>).

### Student Teaching

Student teaching is the culmination of the teaching program. Students have the opportunity to apply skills acquired in college courses under the supervision of an experienced history educator.

### Student Advisement

Students will be assigned individual advisors who will work closely in program planning and in other ways to advise and assist them. Students are encouraged to seek their advisor's help whenever needed.

### Certification

Upon completing this program, students are eligible to teach history in most states. The program is accredited by the Council for the Accreditation of Educator Preparation (CAEP).

### Career Opportunities

A degree in History Education will prepare you to teach history at the 7-12 level. In general, "employment of high school teachers is projected to grow 8 percent from 2016 to 2026, about as fast as the average for all occupations. Rising student enrollment should increase demand for high school teachers, but employment growth will vary by region".

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Major Requirements

### Major: History Education

**Degree Type:** B.A. or B.S.

**Minimum Degree Credits to Graduate:** 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### Degree Requirements and Notes

- Courses taken *Pass/Fail* will not be used to satisfy any requirements other than total credits.
- A grade of 'C' or better is required in all professional education courses.
- To be placed in student teaching, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required.
- To exit the program, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required as well as completing the Praxis Subject test and the Principles of Learning and Teaching test.

# Honors Program

---

## Department Information

- **Department Location:**  
Library 06
- **Department Phone:**  
701-231-9616
- **Department Web Site:**  
[www.ndsu.edu/honors/](http://www.ndsu.edu/honors/)
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/honors-program/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/honors-program/)

The Honors Program at North Dakota State University provides a signature experience for motivated students with exceptional academic potential. The program combines interdisciplinary coursework, an honors capstone project, experiential learning and leadership development.

The requirements for the Honors Program can be integrated into the curriculum of any major on campus. The program is not simply a harder version of an existing major. Honors students complete 16 credits designed to develop their critical thinking and problem-solving skills.

## HONORS MINOR

Students who complete the required 16 credits will receive a minor in honors. Students must complete 6 credits of required HON courses, 6 honors elective credits and 4 credits for the Honors capstone project.

### Summary

- **Required Courses (6 Credits)**
  - HON 151: Sapien Logic (3 Credits)
    - This course fulfills the Humanities and Cultural Diversity General Education requirements
  - HON 193: First Year Projects (1 Credit)
  - HON 251: Leadership Development (2 Credits)
    - This course fulfills the Wellness General Education requirement
- **Honors Electives (6 Credits; students can take any combination to reach 6 credits)**
  - *HON 340, 341, or 342: Colloquium in the Humanities, Social Sciences or Sciences (3 Credits)*
    - These courses count for General Education requirements
  - *Departmental course designed as an honors course with section(s) restricted to Honors students (3 Credits)*
    - ART 380 – Drone Photography
  - *HON 391: Honors Colloquium (3 Credits)*
    - Course themes include: technology; sustainability; food; health; development; global communities; creativity; justice; education
  - *Graduate level course: (3 Credits)*
    - Submit proposal to take graduate course as a junior and complete the course as a senior
  - *HON 396: Honors Field Experience (1-3 Credits)*
    - Students can take on a leadership role in the program. Students can serve as mentors, public relations specialists, marketing specialists, etc.
  - *Study Abroad (1-3 Credits)*
    - Student who study abroad can use the credits for honors with approval
- **Honors Capstone Project (4 Credits)**
  - HON 491: Introduction to the Honors Creative Project (1 Credit)
  - HON 489: Senior Thesis: Proposal Writing (2 credits)
  - Students must take at least 1 credit of independent study (HON 494) or research credit (xxx 393 or 493) in the department of the capstone advisor

## INTERDISCIPLINARY COURSEWORK

Honors courses are small interactive classes of no more than twenty-five students. The classes promote student-centered discussion and the development of analytical and communications skills. All honors courses are designed specifically for the honors program and are not harder versions of other classes. First year honors courses introduce students to the unique atmosphere of the honors classroom as well as the student-centered design of the courses. After the first year, students have the opportunity to explore topics in greater depth in upper-division colloquia. In these upper-

level courses students might find themselves discussing the politics of radicalism, the impact of science on society or even engaging in drone photography.

### HONORS CAPSTONE PROJECT

All students in the Honors program must complete the honors capstone project. The honors capstone project is the culmination of the Honors experience. Honors students will work with a faculty mentor to design and carry out the project. Students can complete a research thesis, online portfolio, experiential-based project, creative/performative project or an innovation project.

All projects should be conceptualized as a project that cannot be completed within the confines of one class or one semester. This means that the project should be sufficiently broad in scope and in-depth in analysis. Students can select one of five options for the Honors capstone project.

### EXPERIENTIAL LEARNING and LEADERSHIP DEVELOPMENT

Experiential learning is geared toward achieving leadership skills. The leadership development curriculum is based on strengths-based leadership and developing the National Association of Colleges and Employers competencies for success in the workplace. In the Leadership Development course, honors students both develop leadership skills and prepare to become peer mentors for incoming freshmen honors students. Juniors and Seniors in the program can serve as peer mentors for first year honors students.

- **Department Email:**  
ndsu.plantsciences@ndsu.edu
- **Department Web Site:**  
[www.ag.ndsu.edu/plantsciences/undergraduate/horticulture](http://www.ag.ndsu.edu/plantsciences/undergraduate/horticulture)
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/horticulture/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/horticulture/)

Horticulture is the science and art of producing, improving, marketing, and using fruits, vegetables, flowers, and ornamental plants. It differs from botany and other plant sciences in that horticulture incorporates both science and aesthetics. Horticulture is an art as old as the ancient gardens and a science as new as today's genetic engineering. Horticulture is an industry, profession, business, vocation and avocation. Production and consumption of high quality fruits and vegetables allows us to maintain a healthy, balanced daily diet. Flowers and ornamental plants enrich our homes and communities, and contribute to our sense of well-being. Horticulture impacts our lives on a daily basis by providing nutritious fruits and vegetables, offering visual enjoyment, and promoting recreational activities.

## The Program

The Department of Plant Sciences offers a four-year curriculum in horticulture leading to the Bachelor of Science degree. There are six horticulture options: horticulture science, landscape design, landscape management, production-business, sports and urban turfgrass management, and urban forestry and parks.

## Career Opportunities

**Production** – producers of horticultural food crops for fresh consumption or processing; nursery and greenhouse production of food and ornamental crops; field positions for processing, marketing and seed companies; and plant propagation/tissue culture specialists. Salaries range from \$35,000 - \$80,000

**Landscaping** – planners, designers and installers of residential, commercial, public and recreational landscapes (both exterior and interior), employment with nurseries, landscape management and maintenance firms or private consultants. Salaries range from \$35,000 - \$80,000

**Arborist or Urban Park Forester** – selection, planting and management of woody plants in urban environments. Salaries range from \$36,000 - \$80,000

**Park Management and Maintenance** – positions in national, state and local park systems, botanic gardens and arboreta

**Golf Course Superintendent** – professional manager who manages the labor, time, materials and financial resources needed to care for the turfgrass and landscaped grounds on a golf course. Starting as an assistant, it is possible for a graduate to become a full-fledged golf course superintendent in three to five years. Starting salaries range from \$28,000 to \$35,000, with the national average of head superintendents reaching more than \$80,000

**Sports Turf Management** – professional manager that is entrusted with the operation and management of sports fields and facilities. The average salary of a sports turf manager is about \$44,000. Sports fields include baseball, football, soccer, lacrosse, rugby, lawn bowling and cricket

**Lawn Care Operator** – professional manager responsible for the cultivation and care of the landscaping and grounds surrounding a business or building. Lawn care operators comprise the largest single group of potential career opportunities for the graduate with more than 6,000 companies in the United States servicing millions of American lawns at the residential, commercial and institutional levels. Salaries range from \$35,000 - \$80,000

**Facility Managers** – professional manager that maintains the buildings and grounds of an organization, directing staff and overseeing the upkeep of equipment and supplies. Facilities managers make sure the buildings and grounds are maintained, which entails daily and weekly reduction improvements and safety inspections

**Marketing** – positions in the retail/wholesale distribution of horticultural products and buying, selling and distribution of supplies and products used by the horticultural industries

**Industry** – management and sales positions in horticulture or allied firms for fertilizers, seed, food and ornamental crops, pesticides, equipment, processing and packaging

**Inspection** – field diagnosticians and inspectors for fresh and processed products in federal or private agencies

**Research** – positions at public and private institutions as technicians in field and laboratory research. Areas of research include horticultural plant breeding, pesticide evaluation, crop physiology, product testing and quality control, plant propagation and biotechnology

**Communication** – writers/editors for television, radio, magazines and newspapers

**Teaching and Extension** – extension personnel who assist growers, industry and the public through education and outreach

Graduates with master's degrees find positions in research, extension service and private industry. Teaching positions are available at community colleges, technical schools and other agriculture-related institutions.

They are also in demand for technical, supervisory and managerial positions in various horticultural industries. Graduates with doctoral degrees are qualified for teaching, research and extension positions at universities. They also may be employed for research positions by the USDA, government agencies, public and private botanical gardens and institutions, and various horticulture, breeding and biotechnology companies.

## Financial Aid and Scholarships

Loans, scholarships, grants and the work-study program are available through the Office of Financial Aid and Scholarships. Students requiring financial assistance may contact the Office of Financial Aid and Scholarships or One Stop.

The Department of Plant Sciences awards 15 horticultural scholarships for use during the freshman, sophomore, junior and senior years. The Horticulture and Forestry Club awards three scholarships each year as well. Additionally, scholarships are awarded to freshmen students by the College of Agriculture, Food Systems, and Natural Resources prior to enrollment. Scholarships also are available to students continuing a major in the College. Applications for all college and departmental scholarships may be applied for online between December 1 and March 1, annually. Also, many undergraduate students are employed part-time during the school year and full-time during the summer months as research or teaching assistants.

## Extra-Curricular Activities

There are two clubs associated with the horticulture major, the Horticulture & Forestry Club and Turf Club. Both clubs provide students with opportunities to meet with students who share a common interest, share information, connect with the commercial industry, gain real world experience and broaden their knowledge.

**Horticulture & Forestry Club** – an opportunity for students who enjoy plants to come together and participate in fun plant related events including: collegiate contests, field trips and networking opportunities. The club meets at least monthly. Collegiate contests and exhibits provide educational and leadership opportunities. Field trips are made annually, exposing students to a diversity of horticultural enterprises and potential job opportunities. Club members propagate, grow and sell flowers and ornamental plants to finance social events, field trips and scholarships.

**Turf Club** – the club organizes field trips, topic discussions and presentations by guest speakers. Other activities include attending regional and national turf conferences, community service and fundraising.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Major Requirements

### Major: Horticulture

**Degree Type:** B.S.

**Minimum Degree Credits to Graduate:** 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10

Humanities and Fine Arts (A) <sup>†</sup>	6
Social and Behavioral Sciences (B) <sup>†</sup>	6
Wellness (W) <sup>†</sup>	2
Cultural Diversity (D) <sup>**†</sup>	
Global Perspectives (G) <sup>**†</sup>	
Total Credits	39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Major Requirements

Code	Title	Credits
<b>Required Core Courses for Horticulture</b>		
PLSC 189	Skills for Academic Success <sup>1</sup>	1
BIOL 150	General Biology I	3
BIOL 151	General Biology II	3
PLSC 380	Principles of Plant Physiology	
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory (May satisfy general education category S)	4
CHEM 122	General Chemistry II (May satisfy general education category S)	3
CSCI 114 or MIS 116	Microcomputer Packages (May satisfy general education category S) Business Use of Computers	3
ECON 105 or ECON 201 or ECON 202	Elements of Economics (May satisfy general education category B and G) Principles of Microeconomics Principles of Macroeconomics	3
ENT 350	General Entomology	3
MATH 103	College Algebra	3
PLSC 210	Horticulture Science	3
PLSC 211	Horticulture Science Lab	1
PLSC 215	Weed Identification	1
PLSC 355	Woody Landscape Plants	3
PLSC 365	Herbaceous Landscape Plants	2
PLSC 457	Horticulture and Turfgrass Systems (Capstone)	3
PLSC 496 or PLSC 494	Field Experience Individual Study	2
PLSC 491	Seminar	1
PPTH 324	Introductory Plant Pathology	3
SOIL 210	Introduction to Soil Science	3
STAT 330	Introductory Statistics (May satisfy general education category R)	3
<b>Options: Select one of the six options listed below.</b>		32-34
Option information: Students must select one of the options listed below to complete the major. The standard option is Production Business; if students wish to complete one of the other options available they must officially declare their option with the Office of Registration and Records.		
Total Credits		83-85

<sup>1</sup> PLSC 189 is only required for first-time, first-year students—A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take this course.

**Production-Business Option (Standard) - 33 Credits**

Code	Title	Credits
ACCT 102	Fundamentals of Accounting	3
ENT 431	Principles of Insect Pest Management	3

PLSC 485	Arboriculture Science	
ENT 350	General Entomology	
PPTH 324	Introductory Plant Pathology	
SOIL 210	Introduction to Soil Science	

Total Credits

17-19

## Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- Students must earn a minimum 2.00 GPA for the minor requirements.

# Hospitality and Tourism Management

## Department Information

- **Department Location:**  
E. Morrow Lebedeff Hall 178
- **Department Phone:**  
701-231-8604
- **Department Web Site:**  
[www.ndsu.edu/adhm/hospitality\\_and\\_tourism\\_management/](http://www.ndsu.edu/adhm/hospitality_and_tourism_management/)
- **Credential Offered:**  
B.A.; B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/hospitality-tourism-management/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/hospitality-tourism-management/)

Are you a people-person? Are you passionate about customer service and enriching people's experiences? Do you have exceptional work ethic and enjoy a fast-paced environment? If so, Hospitality and Tourism Management (HTM) is a great field for you.

As the nation's number one retail employer, the hospitality and tourism industry employs millions of people. The demand for managers continues to grow as the demand for services grows. Along with this demand for services is an increasing emphasis on comfort, convenience and personalized attention. All of these factors increase the need for effective and efficient professionals to manage hospitality operations and lead teams of people.

## The Program

The mission of the Hospitality and Tourism Management (HTM) program is to develop effective and efficient leaders of the Hospitality and Tourism industry. To achieve this mission, it is our goal that students graduating from the HTM program at NDSU will demonstrate leadership skills by having the following:

- Knowledge of the industry
- People management skills
- Problem-solving skills
- A sense of responsibility

We are the only four-year HTM program in North Dakota accredited by the Accreditation Commission for Programs in Hospitality Administration (ACPHA). The program has undergone this process to ensure students receive a quality education. The ACPHA guidelines and standards help us pursue excellence in the area of hospitality administration.

- Our program incorporates a solid foundation of general education courses vital in developing a well-rounded professional.
- All students complete a core of fundamental courses on the management of people, materials, finances, technology, and time in a hospitality and tourism setting.
- Upper-division courses concentrate on project-based, critical evaluation, and production of quality services in hospitality and tourism operations.
- Students choose professional electives in areas such as food and beverage, casino operations, professional club management, resorts, and convention and meeting planning.
- A 24-credit minor in Business Administration is required with this major. The minor provides a strong business background on which we build depth of knowledge concerning the specifics of marketing and management in the hospitality industry. Students must have an overall grade point average of 2.5 to enroll in the business administration classes.

## Student Advisement

A faculty advisor is assigned to work with each student majoring in HTM. The academic advisor helps students set goals for their college work, choose courses and seek meaningful work experiences during their college career.

## Work Experience

The Fargo-Moorhead and West Fargo area provides many quality hospitality and tourism operations for students to gain work experience while completing their degrees. Supervised, on-the-job experience (internship) is also required of all students in a professional work setting. Students complete the field experience during the summer between their junior and senior years. Placement is determined by the student's desire for type of operation and preferred geographic location.

## Career Opportunities

The HTM program at NDSU provides you with a strong educational background for a variety of career options in the hospitality industry. The starting salary for a graduate in the HTM field can range from \$30,000 to \$40,000 with great possibility for increase in salary after the completion of management training. Students graduating with industry experience also may start at a higher rate.

Feed your passion and build your career in one of the following areas:

- Hotels, resorts, and other lodging operations
- Restaurants, catering, and other food and beverage operations
- Meetings, conventions, and event planning
- Travel, tourism, and transportation
- Theme parks, private clubs, and gaming operations
- Services sales and marketing

## STUDENT ORGANIZATION

The Hospitality Student Association (HSA) is open to all majors and minors in the program. They meet monthly, bring in industry speakers, tour local operations, plan and undertake study trips, and plan and produce the Food and Wine Show each spring.

## Financial Aid and Scholarships

The Office of Financial Aid and Scholarships makes available grants, loans, scholarships and work-study employment. Scholarships are also available through the Department of Apparel, Design, and Hospitality Management. Additionally, several hospitality associations have funds for scholarships, which are awarded by the associations through regional and national competition. Contact the Office of Financial Aid and Scholarships, One Stop or the Department of Apparel, Design, and Hospitality Management for additional information.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

ADHM 411	Food and World Cultures (May satisfy general education category A and D)	
ADHM 425	Experiential Retailing	
ADHM 489	Study Tour (with program permission if not taught by HTM)	
ADHM 491	Seminar (with program permission if not taught by HTM)	
EMGT 461	Business Continuity and Crisis Management	
UNIV 397	Fe/Coop Ed/Internship (with program permission)	
<b>Business Administration Minor*</b>		24
Requires a minimum 2.5 GPA in courses used for the minor.		
Total Credits		81

## Degree Requirements and Notes

- Courses taken *Pass/Fail* will not be used to satisfy any requirements other than total credits with the exception of UNIV 397.
- \* The Business Administration minor requirement may be waived for **transfer students** who meet the following criteria:
  - Earn an Associate in Applied Science (AAS) in Business Administration or closely related field<sup>1</sup> from a regionally accredited institution of higher learning;
  - AAS curriculum must have at least 24 credits of business-related coursework;
  - Earn the AAS degree with a cumulative GPA of at least 2.5;
  - Students must complete necessary General Education requirements not yet addressed by transfer credits; and
  - Students must complete the University's minimum requirement of 36 upper-level credits to complete the degree.

<sup>1</sup> *Related fields may include: AAS Business Management; AAS Management; AAS Advertising; AAS Marketing; AAS Business, Marketing, and Sales; AAS Entrepreneurship; AAS Marketing, Sales, and Hospitality Services*

### Minor Requirements

## Hospitality & Tourism Management Minor

### Minor Requirements

Required Credits: 18

Code	Title	Credits
<b>Required Courses</b>		
ADHM 140	Introduction to the Hospitality Industry	3
ADHM 141	Tourism and International Travel Management	3
<b>Elective Courses: Select 12 credits from the following:</b>		12
ADHM 241	Hospitality Accounting	
ADHM 301	Foundation of Event Management	
ADHM 360	Lodging Operations Management	
ADHM 379	Study Tour Abroad (with program permission if not taught by HTM)	
ADHM 381	Hospitality Marketing and Sales	
ADHM 384	Beverage Operations	
ADHM 391	Seminar (with program permission if not taught by HTM)	
ADHM 401	Convention and Meeting Planning

ADHM 435	Cost Controls in Hospitality and Food Service Systems	
ADHM 467	Hospitality Law	
ADHM 489	Study Tour (with program permission if not taught by HTM)	
ADHM 491	Seminar (with program permission if not taught by HTM)	
Total Credits		18

### Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- Students must satisfy all minor course prerequisites.

## Human Development and Family Science

### Department Information

- **Department Location:**  
E. Morrow Lebedeff Hall 283
- **Department Phone:**

701-231-8268

• **Department Web Site:**

[www.ndsu.edu/hdfs/](http://www.ndsu.edu/hdfs/)

• **Credential Offered:**

B.A.; B.S.

• **Official Program Curriculum:**

[bulletin.ndsu.edu/undergraduate/program-curriculum/human-development-family-science/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/human-development-family-science/)

Human development and family science (HDFS) provides a program of study for students interested in a variety of careers that involve work with children, adults and/or families. Students majoring in HDFS may obtain a bachelor's degree.

## Career Interest Areas

Career interest areas available at the undergraduate level include:

- Adolescent Development
- Adult Development and Aging
- Child Development
- Cooperative Extension Service
- Family and Human Services
- Family Economics
- Family Life Education
- Financial and Consumer Literacy
- Health Services
- Hospital Child Life
- Parenting and Family Life
- Gerontology

## The Program

The major emphasis in HDFS programs is family and human development over the life span. Students gain an understanding of the development of children and adults and their interaction in the family within society.

Students majoring in HDFS have three options: adult development and aging; child and adolescent development; and family science. Each of these options can be completed by itself or can be paired with another degree in one of our dual degree programs. Child development can be paired with elementary education, and family science and adult development and aging can be paired with social work. Information on these dual degree programs is on a separate fact sheet. Each of these options can also be combined with a master's degree program in one of our combined/accelerated master's programs. Child and adolescent development can be combined with the master's program in youth development; family science can be combined with the master's program in family financial planning; and adult development and aging can be combined with the master's program in gerontology. Information on these combined/accelerated degree programs is on a separate sheet.

Courses in the program include:

- Adolescent Development
- Adult Development and Aging
- Child Development
- Diversity and Multiculturalism in Individual and Family Life
- Children, Families, and Public Policy
- Personal and Family Finance
- Issues in Human Sexuality
- Life Span Human Development
- Parent-Child Relations
- Family Dynamics of Aging
- Couples, Marriages, and Families

Students majoring in HDFS enroll for credit in field experience as a critical part of their program of study. The department offers opportunities to work with children, youth, adolescents, older adults and families in various settings.

## Career Opportunities

Career directions through HDFS can be divided into two general areas:

**Direct Service to Children, Adults and Families** – community service worker, outreach worker, parent educator, gerontology outreach, extension agent, or financial counselor to name a few.

**Support Service to Children, Adults and Families** – program director for nursing or retirement facility, child care director, community and human service worker, consultant in human development, hospital-related services, researcher, child advocate, and family life education are some examples.

Some of the listed careers require a planned minor or a double major. Other careers require preparations beyond the bachelor's degree level. An HDFS degree is excellent preparation for students considering graduate work in counseling, family therapy, child and human development, or as a child life specialist. Study in HDFS provides course work for students interested in careers involving human relations.

Graduates from HDFS are currently employed in a variety of careers. These include extension agent, Head Start program director, child care director, home visitor for Head Start, crisis family counselor, hospital child life specialist, family life educator, developmental disabilities worker, volunteer coordinator, parent support specialist, parent educator, financial counselor and financial planner.

## The Facilities

Facilities for the Department of Human Development and Family Science are housed in Evelyn Morrow Lebedeff Hall and the Family Life Center. Included in these buildings are classrooms, conference rooms, research labs, and a child development center serving young children and their families.

## Community Setting

The Fargo-Moorhead metropolitan area offers a conducive setting for study. Students have the opportunity to work in a number of community institutions serving children and families. Professionals working with the elderly, child care programs, mental health centers, chemical dependency treatment centers, medical facilities and welfare agencies visit classes and conduct tours to explain their programs for children and families.

## Extra-Curricular Opportunities

Students may enhance their involvement in the HDFS area by participating in groups such as the HDFS Club, the North Dakota Association for the Education of Young Children, and the North Dakota Family and Consumer Sciences Association.

## Plans of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

E. Morrow Lebedeff Hall
- **Department Phone:**  
701-231-8268
- **Department Web Site:**  
[www.ndsu.edu/hdfs/](http://www.ndsu.edu/hdfs/)
- **Credential Offered:**  
B.S.; B.A.

- **Plan Of Study Sample:**  
bulletin.ndsu.edu/programs-study/undergraduate/human-development-family-science/

## Major Requirements

### Major: Human Development & Family Science

**Degree Type:** B.A. or B.S.

**Minimum Degree Credits to Graduate:** 120

#### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

#### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		6
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		6
<b>Wellness (W) <sup>†</sup></b>		2
<b>Cultural Diversity (D) <sup>*†</sup></b>		
<b>Global Perspectives (G) <sup>*†</sup></b>		
Total Credits		39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Major Requirements

Code	Title	Credits
<b>Human Development &amp; Family Science Core Requirements</b>		
CSCI 114	Microcomputer Packages (May satisfy general education category S)	3
or MIS 116	Business Use of Computers	
Select one of the following: (May satisfy general education category C)		3
ENGL 320	Business and Professional Writing	
ENGL 325	Writing in the Health Professions	
ENGL 358	Writing in the Humanities and Social Sciences	
ENGL 459	Researching and Writing Grants and Proposal	

HSE 189	Skills for Academic Success <sup>1</sup>	1
HDFS 230	Life Span Development (May satisfy general education category B)	3
HDFS 242	Couples, Marriages and Families (May satisfy general education category W)	3
HDFS 250	Introduction to Research Methods in Human Development and Family Sciences	3
HDFS 275	Diversity and Multiculturalism in Individual and Family Life (May satisfy general education category B and D)	3
HDFS 353	Children, Families and Public Policy	3
HDFS 389	Pre-Field Experience	2
HDFS 496	Field Experience <sup>2</sup>	3
HSE 320	Professional Issues	1
PSYC 111	Introduction to Psychology (May satisfy general education category B)	3
SOC 110	Introduction to Sociology (May satisfy general education category B)	3
STAT 330	Introductory Statistics (May satisfy general education category R)	3
<b>Option Selection: Select one option from the three listed below.</b>		21
<b>Minor Plan of Study: A minor plan of study is required outside of the HDFS department for all options.</b>		
Total Credits		58

### Adult Development and Aging Option

Code	Title	Credits
HDFS 357	Personal and Family Finance	3
HDFS 360	Adult Development and Aging	3
HDFS 480	Community Resources of Later Life	3
HDFS 482	Family Dynamics of Aging	3
HDFS 300-400 Level	Major Electives (can include up to 3 credits of HDFS 496 or HDFS 491)	9

### Child and Adolescent Development Option

Code	Title	Credits
HDFS 320	Prenatal, Infant and Toddler Development	3
HDFS 330	Child Development	3
HDFS 340	Adolescent Development	3
Select one of the following:		3
HDFS 424	Observation and Assessment of Children	
HDFS 483	Developmentally Appropriate Practices from Birth Through Adolescence	
HDFS 300-400 Level	Major Electives (can include up to 3 credits of HDFS 496 or HDFS 491)	9

### Family Science Option

Code	Title	Credits
HDFS 341	Parent-Child Relations	3
HDFS 357	Personal and Family Finance	3
HDFS 448	Issues In Sexuality	3
HDFS 462	Methods of Family Life Education	3
HDFS 300-400 Level	Major Electives (can include up to 3 credits of HDFS 496 or HDFS 491)	9

<sup>1</sup> HS&E 189 is required only for first-time, first-year students—A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students who are not first-time, first-year students who either transfer into the university or change their major are not required to take HS&E 189.

<sup>2</sup> In the semester prior to taking field experience credits, students are required to take HDFS 389 Pre-Field Experience. Note: HDFS 491 Senior Thesis may be completed as elective.

### Degree Requirements and Notes

- A grade of C or better is required for all HDFS courses, regardless of whether they are used for the major core, major electives, general education, or free electives.

- A 2.50 cumulative GPA is required in major courses for graduation.
- Courses taken *Pass/Fail* will not be used to satisfy any requirement other than total credits.

## Accelerated Program in HDFS

- A combined/accelerated program will allow high-achieving students to complete both a bachelor's and master's degree in HDFS in five years.
- Only students with a cumulative undergraduate GPA of at least 3.50 and who have completed at least 60 credits are eligible to apply. Interested students should speak with an HDFS advisor about how to proceed.
- 15 credits at the master's level may be used to meet the requirements for a bachelor's degree.
- The programs will map as follows:
  - BS-HDFS program with an option in Adult Development and Aging may enter the master's option Gerontology.
  - BS-HDFS program with an option in Child and Adolescent Development may enter the master's option in Youth Development.
  - BS-HDFS program with an option in Family Science may enter the master's option in Family Financial Planning

## Minor Requirements

### Human Development & Family Science Minor

#### Minor Requirements

Required Credits: 18

Code	Title	Credits
<b>Required Courses</b>		
HDFS 230	Life Span Development	3
HDFS 242	Couples, Marriages and Families	3
<b>Elective Courses</b> <sup>1, 2</sup>		
HDFS	Any Level Elective	12
Total Credits		18

<sup>1</sup> No more than 3 credits may be a field experience, practicum, or student teaching.

<sup>2</sup> Note that HDFS 250 or an approved equivalent in another department is a required co-requisite or pre-requisite for all 300-400 level HDFS courses. HDFS 250 may be counted as an HDFS elective course for the minor.

#### Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.

## Industrial Engineering and Management

### Department Information

- **Department Location:**  
Civil & Industrial Engineering 202
- **Department Phone:**  
701-231-9818
- **Department Web Site:**  
[www.ndsu.edu/ime/](http://www.ndsu.edu/ime/)
- **Credential Offered:**  
B.S.I.E.Mgt.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/industrial-engineering-management/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/industrial-engineering-management/)

World leadership—whether for nations, states or individual companies—depends upon providing the highest quality in goods and services at costs that are affordable to the widest possible audience. Retaining world-class status requires relentless and continuous improvement in all aspects of the business or governmental enterprise. Industrial engineers use a systems approach and focus on the processes for achieving quality, continuous improvement and cost effectiveness for all types of enterprises—manufacturers, healthcare service industries, non-profits and governments.

### The Profession

Industrial engineers are involved in the creation of wealth and prosperity. This is achieved through designing and implementing better, more productive systems in both a manufacturing and a service environment. Industrial engineering is an interdisciplinary program by nature. Industrial engineers design, install, fabricate and integrate systems that include people, materials, information, equipment and energy necessary to accomplish the desired

function. Industrial engineers are hired in every industry type such as manufacturing, healthcare, hotel, banking and finance, food processing, chemical and oil industry, distribution and logistics, and more.

Industrial engineers often are responsible for productivity improvements, supply chain optimization, project management, feasibility studies for new technologies and applications, lean and just-in-time implementation, health care management and logistics, and systems integration and engineering. Whether it's shortening a rollercoaster wait line, streamlining an operating room, managing a worldwide supply chain, manufacturing and designing superior automobiles, or solving logistics problems, industrial engineers are at the forefront.

## **The Program**

The Department of Industrial and Manufacturing Engineering (IME) at North Dakota State University offers two programs leading to either a Bachelor of Science degree in Industrial Engineering and Management or in Manufacturing Engineering. Both programs are accredited by the Engineering Accreditation Commission of ABET, [www.abet.org](http://www.abet.org).

As a graduate of industrial engineering, you will have the opportunity to design systems and processes that improve the quality and productivity of an organization's business activities. You will employ a strong base of fundamental engineering and management skills to effectively integrate people and resources to create positive change. Quite simply, you will design and implement the best way to get work done.

## **The Faculty and Facilities**

The faculty and staff in the IME department have extensive experience in industrial and manufacturing specialties. The IME faculty and staff will know your name, understand your potential and problems, and will give encouragement when you need it. When you leave NDSU, you will have built excellent capabilities for career success, the confident ability for life-long personal growth, and a network of friends and professional colleagues.

The IME department has 7 laboratories with a significant amount of equipment that provide valuable services in support of students' educational needs. The departmental laboratories include computer simulation, human factors, automation and robotics, additive manufacturing engineering, quality & reliability, SPACHES, PLC, manufacturing/fabrication, rapid prototyping, CNC machining, and microfabrication, as well as electronics, welding and precision manufacturing.

## **Career Opportunities**

The IME programs can help you to open the door to various opportunities starting your professional career in a wide range of industries or to seek advanced degrees at NDSU or another university. The IME programs will help you to develop a strong base in general education and engineering fundamentals that provide the foundation for a very wide range of career choices and a lifetime of growth. The IME programs' core will help you develop industry-standard skills—the skills you can use to open the door to many career opportunities that can offer you financial rewards and exceptional professional growth.

Graduates of the IME programs have become a source of talent working in industries such as health care, manufacturing, consulting, food, transportation and distribution, and information systems. Recent IME graduates command starting salaries in the top rank of engineering disciplines. According to the Bureau of Labor Statistics, the national average salary was \$87,040 in 2019 (<https://www.bls.gov/ooh/architecture-and-engineering/industrial-engineers.htm>).

## **Transfer Admission**

Students who have studied two years of pre-engineering at another institution may be able to transition into the industrial engineering and management program with no loss of credits. Students who transfer with an AA or AS degree will have lower division general ed credits satisfied.

## **Scholarship and Financial Aid**

The Department of Industrial and Manufacturing Engineering awards several scholarships annually. Scholarships are available for incoming freshman, transfer students and currently enrolled students. Other forms of financial aid are available through the Office of Financial Aid and Scholarships.

## **Selective Admission**

The Department of Industrial and Manufacturing Engineering has minimum admission requirements for transfer students. Transfer students must have a minimum cumulative grade point average of 2.3.

## **Industrial Engineering and Management Minor**

Students majoring in any engineering discipline may elect a minor in Industrial Engineering and Management. These optional studies offer engineering students the opportunity to add important career-enhancing skills to their technological competencies. The elected courses in an IE&M minor add skills for integrating technology and resources within the complex of people, technology, machinery and information that make up the successful modern business enterprise. Students completing this minor will achieve better understanding of organizational and management processes and will be better prepared to work in the multi-functional teams crucial to success in industry. Total requirement is 18 credits (6 credits are required courses and 12 credits of approved electives).

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Industrial Engineering and Management

### Department Information

- **Department Location:**  
Civil & Industrial Engineering
- **Department Phone:**  
701-231-9818
- **Department Web Site:**  
[www.ndsu.edu/ime/](http://www.ndsu.edu/ime/)
- **Credential Offered:**  
B.S.I.E.Mgt.
- **Plan Of Study Sample:**  
[bulletin.ndsu.edu/programs-study/undergraduate/industrial-engineering-management/#planofstudytext](http://bulletin.ndsu.edu/programs-study/undergraduate/industrial-engineering-management/#planofstudytext)

## Major Requirements

### Major: Industrial Engineering & Management

Degree Type: B.S.I.E.Mgt.

Minimum Degree Credits to Graduate: 132

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

CHEM 122	General Chemistry II (May satisfy general education category S)	3
ENGL 321	Writing in the Technical Professions (May satisfy general education category C)	3
ENGR 402	Engineering Ethics and Social Responsibility	1
PHYS 252 & 252L	University Physics II and University Physics II Laboratory (May satisfy general education category S)	5
<b>Industrial Engineering and Management Electives</b>		
Computer Science Electives: Select one of the following:		3
CSCI 122	Visual BASIC	
CSCI 159	Computer Science Problem Solving	
CSCI 160	Computer Science I	
ECE 173	Introduction to Computing	
Programming Language: Any programming language course must be approved by your adviser.		
Engineering Science Electives: Select 12 credits from the following:		
CE 309	Fluid Mechanics	3
ME 223	Mechanics of Materials	3
ME 350	Thermodynamics and Heat Transfer	3
Select one of the following:		3-4
EE 206	Circuit Analysis I	
ECE 275	Digital Design	

ECE 301	Electrical Engineering I	
Technical Electives: Select 9 credits from the following:		9
IME 335	Welding Technology	
IME 380	CAD/CAM for Manufacturing	
IME 411	Human Factors Engineering	
IME 427	Packaging for Electronics	
IME 430	Process Engineering	
IME 431	Production Engineering	
IME 432	Composite Materials Manufacturing	
IME 437	Methods for Precision Manufacturing	
IME 433	Additive Manufacturing	
IME 435	Plastics and Injection Molding Manufacturing	
IME 451	Logistics Engineering and Management	
IME 453	Hospital Management Engineering	
IME 462	Total Quality In Industrial Management	
IME 463	Reliability Engineering	
IME 464	Reliability Analysis	
Only one of the following 5 courses may be counted as a technical elective.		
BUSN 340	International Business	
BUSN 431	Business Law I-Contracts, Property and Torts	
MGMT 320	Foundations of Management	
MRKT 320	Foundations of Marketing	
MIS 320	Management Information Systems	
Total Credits		108-109

## Degree Requirements and Notes

- A student must complete at least 60 semester credits of professional level course work in his/her program while in residence and enrolled in the college. Students transferring into the college from programs with professional accreditation are exempt from this residency requirement but are subject to the residency requirement of NDSU.
- Grades less than 'C' will not be accepted for required courses in CHEM, MATH, and PHYS.
- Students may request approval for other 300-400 level engineering or related courses to be approved as technical electives. To request approval, a student should submit a memo to the IME Department indicating the course of interest and why the course should be approved as a technical elective. This memo will be reviewed by the IME Department Chair for approval.
- 300-400 level BUSN courses require at least junior standing and a minimum 2.50 cumulative GPA.

## Minor Requirements

### Minor: Industrial Engineering & Management

Required Credits: 18

Code	Title	Credits
<b>Required Courses</b>		
IME 111	Introduction to Industrial and Manufacturing Engineering	3
IME 311	Work/Station Design and Measurement	3
<b>Electives: Select 12 credits from the following:</b>		12
IME 450	Systems Engineering and Management	
IME 451	Logistics Engineering and Management	
IME 453	Hospital Management Engineering	
IME 456	Program and Project Management	
IME 461	Quality Assurance and Control	
IME 462	Total Quality In Industrial Management	
IME 463	Reliability Engineering	
IME 470	Operations Research I	

IME 472	Simulation of Business and Industrial Systems
IME 480	Production and Inventory Control
IME 482	Automated Manufacturing Systems
IME 485	Industrial and Manufacturing Facility Design

Total Credits

18

## Minor Requirements and Notes

- A minimum of 9 credits must be taken at NDSU.
- Only students majoring in an engineering discipline or with department permission agricultural or physical science majors may elect a minor in Industrial Engineering & Management.

## Interior Design

### Department Information

- **Department Location:**  
E. Morrow Lebedeff Hall 178
- **Department Phone:**  
701-231-8604
- **Department Web Site:**  
[www.ndsu.edu/adhm/interior\\_design/](http://www.ndsu.edu/adhm/interior_design/)
- **Credential Offered:**  
B.A.; B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/interior-design/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/interior-design/)

A professional interior designer is one who is qualified by education, examination and experience to identify, research and creatively solve problems relative to the function and quality of people's interior environments. The course of study in interior design leads to a first professional degree.

### Background Information

The program focuses on improving the quality of life and protecting human health and safety through design of the interior environment. Students study design fundamentals, theory, process, communication, research and technology to identify and solve problems for a wide range of physical interior environments for all individuals regardless of socioeconomic background.

### The Program

The Department of Apparel, Design, and Hospitality Management offers an accredited undergraduate degree program in interior design. The first two years of the program introduce the fundamentals of design, visual and technical communication techniques (including drafting, perspective drawing, model building, rendering, computer aided design), and theoretical and practical applications (including anthropometrics, ergonomics, inclusive design, interior design technology and color theory). Each student becomes aware that the interior design profession is exceedingly complex, and collaborating with design professionals and related disciplines in a team approach to problem solving is routine practice.

Beginning their first year through their final semester, students interact with professionals during industry tours, critiques, and guest speaking events providing a direct connection to the interior design profession. Upper-division course work is focused on a series of integrated studio experiences and supporting courses including history, evidence based design, interior materials, professional practice, building information modeling and interior systems. The studio experience culminates in a senior capstone project. Studio experiences require that each student be exposed to a variety of projects at several different levels of complexity and different client project goals.

### Field Experience

North Dakota State University interior design students are required to complete a field experience between the third and fourth year of the program. Students accept a variety of positions throughout the United States and abroad. In the past few years students have completed field experiences in places such as Los Angeles, Minneapolis, Denver, Florida, New York, Ireland, and Shanghai (China).

### Selective Admission

Admission into the second year professional program comes at the conclusion of the first year of the pre-professional program and is based upon demonstrated professional interest and involvement; a 3.0 institutional cumulative GPA, and a minimum grade of C in all major core requirements.

Students must maintain the 3.0 minimum cumulative GPA requirement and a grade of C or better in all major core requirements throughout the remainder of the program.

## COMPUTER REQUIREMENTS

All students are required to purchase a laptop computer prior to starting the program. Students **must be in compliance** with the computer requirements posted on the program web site. Computers failing to be in compliance will not be supported.

## Accreditation

The interior design program at NDSU is accredited by the Council for Interior Design Accreditation (CIDA) and received re-accreditation in 2016. The program is also accredited by the National Association of Schools of Art and Design (NSAD).

## Career Opportunities

Three main career paths typically chosen by the design professional include residential, commercial and specialized design. Residential design includes kitchen and bath design, renovation for physically challenged, model homes or historical restoration. Commercial design includes corporate and executive offices, healthcare, retail facilities, institutional transportation, and hospitality and entertainment venues. Other areas of specialty design include lighting, codes, adaptive reuse, product design or product representation.

Opportunities for NDSU graduates vary according to geographic area of practice and responsibilities of specific positions. Recent graduates have accepted entry-level positions with starting salaries as high as \$50,000 (Minneapolis).

## Extra-Curricular Opportunities

NDSU students participate locally in the student chapter of the American Society of Interior Designers (ASID). Students also have the opportunity to participate in the North Dakota Interior Designers (NDID) organization. A number of professionals visit campus each year to present programs and informational seminars to students. Trips are planned to design studios, architectural firms and product markets to supplement course work. NDSU interior design students are encouraged to enter design competitions and have experienced a very high success rate.

## The Facilities

NDSU facilities and instructional amenities are among the finest in the Upper-Midwest. The Interior Design Resource Center is well equipped with current samples and a virtual product library. Studios provide individual work stations and tools necessary to complete graphic presentations.

## The Faculty

NDSU faculty hold terminal degrees in interior design or related fields and have been selected because of their individual and collective experience as interior designers and their commitment to teaching. All hold memberships in professional design-related organizations.

## Introductory Curriculum

A suggested curriculum is provided. Other general education combinations are possible, but the sequence of interior design courses cannot vary from this plan. Students who plan to transfer to NDSU should contact the Interior Design Program Coordinator for guidance in selecting courses before or during the first year sequence.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

Minard Hall
- **Department Phone:**  
701-231-8845
- **Department Web Site:**  
ndsu-studyabroad.applicationgateway.com/index.cfm?FuseAction=Abroad.ViewLink&Parent\_ID=0&Link\_ID=84ED8C0B-26B9-564D-D6D3F9968C0D3616 ([http://ndsu-studyabroad.applicationgateway.com/index.cfm?FuseAction=Abroad.ViewLink&Parent\\_ID=0&Link\\_ID=84ED8C0B-26B9-564D-D6D3F9968C0D3616](http://ndsu-studyabroad.applicationgateway.com/index.cfm?FuseAction=Abroad.ViewLink&Parent_ID=0&Link_ID=84ED8C0B-26B9-564D-D6D3F9968C0D3616))
- **Credential Offered:**  
Offered as a second major only
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/international-studies/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/international-studies/)

The International Studies major is a secondary major that is offered concurrently with a student's primary program of study. This program provides students with the opportunity to internationalize their major by combining special requirements to obtain the international studies major with their academic field of study. Students complete course work that integrates a senior project, demonstrate proficiency in a foreign language, and participate in an experience abroad to complete a second major in International Studies.

### Courses

In addition to the courses required for the primary major, students seeking the International Studies major are required to take courses that have an international focus. These include a 15-credit core and nine credits of electives that will be chosen with the help of the student's adviser. Work or study abroad experience, as well as an integrative senior project that ties international study to the primary degree also are required.

### Languages

Knowledge of a foreign language is an important part of the program. At NDSU students may study French, German, and Spanish. Additional language study is available through the Tri-College University in languages such as Japanese, and Chinese. Foreign language proficiency equivalent to completion of two years of college language study is required. This requirement may be met either through appropriate course work or through a testing procedure in the Department of Modern Languages (<https://www.ndsu.edu/modernlanguages>).

### Experience Abroad

An important part of the International Studies major is participation in a study, work, or research experience abroad for at least 10 consecutive weeks in duration. The experience abroad must be pre-approved by the International Studies adviser. Assistance with finding an overseas study program is available in the Office of International Programs (<https://www.ndsu.edu/international>).

### Selective Admission

To be eligible to participate in the International Studies major, students must have declared a primary major and maintain a minimum cumulative grade-point average of 2.50. Additional information about the International Studies major and curriculum requirements are available through the department of a student's academic major, the college International Studies adviser, the Department of Modern Languages (<https://www.ndsu.edu/modernlanguages>).

\* ANTH 206 may fulfill the Group B **OR** the Group D requirements but not both.

## Major Requirements and Notes

- The General Education component is to be completed with the student's choice of primary major.
- Students must maintain a 2.5 Cumulative GPA to continue in the program.
- Courses for the International Studies core may not double count to meet the major requirements of the primary major. However, courses meeting general education requirements and requirements for global perspectives and cultural diversity may count in the International Studies major.
- The electives list is not all inclusive; other courses meeting this requirement may be selected with the assistance of an International Studies major adviser and submission of a substitution form to the Office of Registration and Records (<https://www.ndsu.edu/registrar>).

# Journalism

## Department Information

- **Department Location:**  
Minard Hall
- **Department Phone:**  
701-231-7705
- **Department Web Site:**  
[www.ndsu.edu/communication/](http://www.ndsu.edu/communication/)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/journalism/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/journalism/)

Journalism is one of four majors offered by the Department of Communication. Students are trained in both print and broadcast journalism. The program has a strong emphasis on cross-platform reporting and multi-media storytelling.

## Why Choose a Major in the Department of Communication?

Our programs are designed to meet the needs and interests of today's students. We provide:

- **More time to explore your interests.** The introductory courses are the same for all four of our majors, making it possible to switch between our programs without extending your graduation timeline.
- **Personalized guidance on choosing a career.** Our Majors and Careers in Communication course helps you meet others in your major, learn more about possible careers, and navigate the program with your professional goals in mind.
- **Hands-on learning.** You'll have multiple ways to apply what you are learning through course projects, consulting for local organizations, and participating in national competitions.

- **Built-in communities.** You can connect with other students by joining any of the eight student organizations affiliated with our majors.
- **Field experience.** Our internship coordinator helps you acquire professional experience and a stronger sense of your future career.

## Journalism Major

Students majoring in journalism may earn a Bachelor of Science degree (includes an approved minor) or a Bachelor of Arts degree (includes a modern language proficiency).

## Admission to the Major

Students complete 18 credits of Pre-Communication courses with a minimum 3.00 GPA to be admitted to the professional program in journalism. These courses include COMM 110, COMM 112, COMM 114, COMM 212, COMM 220, and ENGL 120.

## Internship Requirement

Internships offer practical experience for journalism students. Three credits (120 hours) of field experience are required for the major, and many students complete more than one internship. Students have interned with a variety of media companies in the Fargo-Moorhead area and beyond. Internships often lead to jobs.

## Career Opportunities

Coursework in the journalism major prepares students for careers in news reporting, media writing, broadcast writing, and broadcast production. The courses emphasize written and oral communication skills and prepare students to communicate in meaningful and effective ways with a variety of audiences.

## Extra-Curricular Activities

Students majoring in journalism are encouraged to gain additional experience by working with the Bison Information Network (television), KNDS-96.9 (radio), or The Spectrum (print). NDSU has two honoraries for top students majoring in a degree program offered by the Department of Communication. Pi Kappa Delta is a national honor fraternity for students involved in human communication activities. Lambda Pi Eta is a national honorary for communication majors with high academic achievement.

## High School Preparation

A well-rounded high school education with experiences in high school music, forensics, theater, newspaper, or yearbook serves as good preparation for a major in journalism. Students with interests in science and art, business and service, and publicity and promotion will find a major in this department to be a good fit.

## Scholarships

The Department of Communication awards a number of scholarships to students who excel in academics and who have demonstrated career potential. Applications are due by March 1. Visit [the department website](#) for details.

## The Faculty

Faculty members in the Department of Communication are dedicated teachers, scholars, and practitioners who are committed to providing high-quality courses, hands-on learning experiences, and opportunities for undergraduate research. We encourage students who want to learn more about journalism to reach out via email or schedule an appointment via [Navigate](#).

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Major Requirements

### Major: Journalism

**Degree Type:** B.A. or B.S.

**Minimum Degree Credits to Graduate:** 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.

3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10

<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		6
<b>Wellness (W) <sup>†</sup></b>		2
<b>Cultural Diversity (D) <sup>**†</sup></b>		
<b>Global Perspectives (G) <sup>**†</sup></b>		
Total Credits		39

\* May be satisfied by completing courses in another General Education category.

<sup>†</sup> General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Arts, Humanities, and Social Sciences

### Degree Requirements

**Bachelor of Science (B.S.) Degree** – The completion of a minor program of study, a second major, or a second degree is required.

**Bachelor of Arts (B.A.) Degree** – Second year language proficiency at college level required.

### Arts, Humanities and Social Sciences College Requirements

An additional 9 credits are required by the College of Arts, Humanities and Social Sciences for all Bachelor of Science and Bachelor of Arts degree programs of study, except the Bachelor of Fine Arts degree, the Bachelor of Music degree, the Bachelor of Science in Architecture degree, and the Bachelor of Science degree with a major in Environmental Design:

Code	Title	Credits
<b>AH&amp;SS College Requirements</b>		
Courses used to satisfy any general education requirement cannot be used to also count toward the AH&SS College Requirements. A minimum of three credits is required in each of the 3 following areas for a total of 9 credits. Choose only those courses with the prefixes listed for each area. A course with the WGS prefix can only be used in one area.		
<b>Area One: Humanities</b>		3
ARB, ENGL, FREN, GERM, HIST, HUM, PHIL, RELS, SPAN, or WGS		
<b>Area Two: Social Sciences</b>		3

## Large Animal Veterinary Technology Minor

The Large Animal Veterinary Technology minor is a unique opportunity for Veterinary Technology students to expand their learning in the area of livestock species and horses. This minor allows for a great deal of flexibility in course selection to meet the needs and interests of the individual student. Coursework focuses on topics such as livestock production, reproduction, and animal behavior. This minor is reserved for Veterinary Technology majors only. Students may earn this minor by completing a minimum of 16 credits. A minimum of eight credits must be completed at NDSU.

### Logistics Management Minor

Working in conjunction, the College of Business (<https://www.ndsu.edu/business>), the Upper Great Plains Transportation Institute (<http://www.ugpti.org>), and the Department of Agribusiness and Applied Economics (<http://www.ag.ndsu.edu/agecon>) offer a minor in Logistics Management. Companies directly involved with transportation as well as companies in the retail and wholesale sectors increasingly rely on an

effective and efficient logistics system to remain competitive. In addition, the public sector also utilizes individuals with logistics and supply chain management skills. Minimum GPA requirements apply to this minor. See Minor Requirements for further information.

<b>Approved Elective - Must have department approval</b> *		3
Total Credits		19

\* An additional 3-credit 300-400 level course in business, industrial engineering, or agribusiness. Under certain circumstances, a course from other departments may satisfy this requirement. Contact departments for a list of approved courses. Departmental approval is required for any course not completed at NDSU and used to satisfy the minor requirements. Courses may not be taken pass/fail unless approved as an internship.

### Minor Requirements and Notes

- To enroll in 300/400 level college of business courses, students must have 2.5 minimum institutional cumulative GPA.
- To complete this minor, students must earn at minimum 2.50 GPA in courses used to satisfy the minor requirements. Courses may not be taken pass/fail. Minors must satisfy all course prerequisites.
- A minimum of 8 credits must be taken at NDSU.

## Management

### Department Information

- **Department Location:**  
Richard H. Barry Hall
- **Department Phone:**  
701-231-8651
- **Department Web Site:**  
[www.ndsu.edu/business/programs/undergraduate/majors/](http://www.ndsu.edu/business/programs/undergraduate/majors/)

- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/management/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/management/)

The management curriculum has been carefully designed to inspire and enable students to meet the demand of today's business and organizational landscapes. Management is an exciting and ever-developing field, and our students are supported by curriculum that fosters critical thinking, interpersonal and communication skills, leadership, analytic skills and global awareness. A success measure of our management program is the successful placement of our graduates in business, industry, and non-profit organizations, in tandem with their enhanced abilities to plan, organize, work as a team, and make sound decisions.

## Background Information

The Association to Advance Collegiate Schools of Business (AACSB International) accredits the undergraduate and graduate programs in the College of Business at North Dakota State University (NDSU). Our College of Business is one of only two AACSB-accredited schools of business in North Dakota.

AACSB International is one of higher education's most prestigious and rigorous accrediting bodies, emphasizing a commitment to continuous improvement, innovation, engagement, and impact in business education. Less than 10 percent of business programs worldwide have this accreditation, highlighting the academic excellence of our College of Business at NDSU.

## The Program

The Management major is a four-year program with a curricular blend of general education, pre-professional course work, fundamental business knowledge (accounting, finance, management, marketing, and information systems), international exposure, and in-depth management-specific courses. Students pursuing a Management major can also choose the Human Resource Management and/or Supply Chain Management tracks to advance their field-specific skills and knowledge. The program nurtures important business skills and managerial competencies including planning, organizing, problem-solving, analytical ability, communication, teamwork, and leadership. Management students are thus prepared to lead and perform in evolving landscapes of business enterprises and non-profit organizations.

## Selective Admission

Students who wish to study management at NDSU enroll as pre-management students in the College of Business for the first semester of their freshman year. Admission to the professional program requires the successful completion of the pre-professional course requirements (ENGL 120, COMM 110, MATH 144, ECON 201 or 202, and PSYC 111 or SOC 110) and a minimum cumulative grade point average (GPA) of 2.5. Transfer students may also be eligible for immediate admission in the professional program. Contact a College of Business professional advisor for more information.

## The Faculty

To provide a rigorous and relevant educational experience to our students, faculty in our program are highly qualified in their respective areas of expertise. Our faculty have been recognized for their teaching excellence by their students and colleagues and for their outstanding research by their peers. They employ a wide variety of instructional techniques and embed both classical and cutting-edge knowledge into their classes. They remain current in their fields by actively engaging in research and/or with firms and business professionals regarding their management practice, business challenges and issues.

## The Practicum

Management majors are encouraged to complete practicum experiences, ideally at the end of sophomore and junior years. The practicum is designed to enable our students to connect management concepts learned in the classroom with live business situations and to broaden their horizons beyond the classroom setting. The practicum also gives students a competitive edge in job placement.

## Career Opportunities

Graduates with a management major have career opportunities in business, industry, government service, and the non-profit sector, both regionally and globally. Employment opportunities for management majors are significant as the management function exists in every type of business and organization, whether manufacturing or service, small- or large-sized, for-profit or not-for-profit. Major job categories include human resources, supply chain/operations, project management, product/service management, and general management.

## The College

In addition to the management major, the College of Business offers undergraduate majors in accounting, business administration, finance, global business (second major only), marketing, and management information systems. The College of Business also offers five graduate programs including Master of Business Administration, Master of Accountancy, Master of Managerial Logistics, Master of Transportation and Urban Systems, and Doctorate in Transportation and Logistics.

## High School Preparation

It is recommended that high school students interested in studying management at the university level take mathematics courses at least through pre-calculus. High school electives in the social sciences, communication, and English also would be of benefit. Students who have satisfactorily completed Advanced Placement courses in Calculus, Economics, English, Communication, and Psychology or Sociology may be immediately eligible for admission to the professional program. Please speak with a professional advisor in the College of Business for more information.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Major Requirements

### Major: Management

Degree Type: B.S.

Minimum Credits Required for Degree: 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

<b>Management Elective Courses (MGMT Prefix) 300-400 Level</b>		12
Select courses from current MGMT curriculum		
<b>Management Elective Courses 300-400 Level</b>		9
Select courses from within the CoB, Prefixes of BUSN, MRKT, FIN, ACCT, MIS, ENTR (includes courses cross-listed with CoB courses)		
<b>Management Elective Course 300-400 Level</b>		3
This 300-400 level elective can be external to the CoB and must be satisfied with a single 3-credit 300 - 400 level course. It cannot be used to satisfy other requirements (includes courses cross-listed with CoB courses)		
At least one of the following international courses must be included in the plan of study and can count in one of the management 300-400 level elective areas:		
BUSN 340	International Business	
BUSN 341	Global Business Environment	
FIN 440	International Finance	
MGMT 440	International Management	
MRKT 440	International Marketing	
Total Credits		93

<sup>1</sup> Take the second course of the pair, which was not taken for the admission into the professional program.

<sup>2</sup> Denotes Common Body of Knowledge (CBK) course.

## Degree Requirements and Notes

- Students follow the published curricula for the management program of study from the semester/year of entrance in the College of Business (CoB) to graduation provided enrollment at NDSU has not been discontinued for more than one year. Students who change their major are subject to meeting the curricular requirements in effect at the time the new major is declared.
- Business courses from programs that do not hold AACSB International accreditation cannot be used for major or minor requirements in the (CoB); such courses may be eligible for use as degree electives.
- The CoB accepts a maximum of nine credits of non-NDSU 300-400 level business courses from AACSB programs with approval of the department.
- A grade of 'C' or better is required in transfer courses accepted for all accounting, business administration, finance, management, management information systems, and marketing courses.
- No courses for the major may be taken with Pass/Fail grading.
- Of the credits completed in residence at least 30 credits must be in 300-400 level CoB courses.
- Students must be accepted to the Management major prior to the completion of the last 30 credits in 300 and 400 level CoB courses.
- A Business Administration minor is NOT offered with this major.
- For multiple majors within the CoB, at least 15 unique credits of 300-400 level CoB courses must exist between the majors.
- Internship and cooperative education credits may be applied toward the total credits required for graduation as non-major electives or 300-400 level electives not used in pre-major categories.
- Student may choose to take the Human Resource Management Track or the Supply Chain Management Track within the Management major.

### Human Resources Management

## Management Communication

### Department Information

- **Department Location:**  
Minard Hall
- **Department Phone:**  
701-231-7705
- **Department Web Site:**  
[www.ndsu.edu/communication/](http://www.ndsu.edu/communication/)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/management-communication/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/management-communication/)

Management Communication is one of four majors offered by the Department of Communication. Students study various communication techniques necessary for success in the workplace, including organizational communication, risk and crisis communication, leadership communication, team-based communication, and conflict communication.

## Why Choose a Major in the Department of Communication?

Our programs are designed to meet the needs and interests of today's students. We provide:

- **More time to explore your interests.** The introductory courses are the same for all four of our majors, making it possible to switch between our programs without extending your graduation timeline.
- **Personalized guidance on choosing a career.** Our Majors and Careers in Communication course helps you meet others in your major, learn more about possible careers, and navigate the program with your professional goals in mind.
- **Hands-on learning.** You'll have multiple ways to apply what you are learning through course projects, consulting for local organizations, and participating in national competitions.
- **Built-in communities.** You can connect with other students by joining any of the eight student organizations affiliated with our majors.
- **Field experience.** Our internship coordinator helps you acquire professional experience and a stronger sense of your future career.

## Management Communication Major

A major in management communication trains students to be effective managers and leaders in corporate or non-profit environments. Students will complete an applied capstone course in their final semester. Students majoring in management communication may earn a Bachelor of Science degree (includes an approved minor) or a Bachelor of Arts degree (includes a modern language proficiency).

## Admission to the Major

Students complete 18 credits of Pre-Communication courses with a minimum 3.00 GPA to be admitted to the professional program in management communication. These courses include COMM 110, COMM 112, COMM 114, COMM 212, COMM 220, and ENGL 120.

## Internship Requirement

Internships offer practical experience for management communication students. Three credits (120 hours) of field experience are required for the major, and many students complete more than one internship. Students have interned with a variety of private companies, non-profit organizations, and government agencies. Internships often lead to jobs.

## Career Opportunities

Coursework in the management communication major prepares students for careers in college admissions, corporate training, consulting, human resource administration, organizational communication, and project management. The coursework emphasizes written and oral communication skills and prepares students to communicate in meaningful and effective ways with a variety of audiences.

## Extra-Curricular Activities

Students majoring in management communication are encouraged to join the Management Communication Club for undergraduate research and consulting opportunities. They may also be interested in joining the department's chapter of the Public Relations Student Society of America (PRSSA). NDSU has two honoraries for top students majoring in a degree program offered by the Department of Communication. Pi Kappa Delta is a national honor fraternity for students involved in human communication activities. Lambda Pi Eta is a national honorary for communication majors with high academic achievement.

## High School Preparation

A well-rounded high school education with experiences in high school music, forensics, theatre, journalism, student government, or scouting serves as good preparation for the management communication major. Students with interests in science and art, business and service, and publicity and promotion will find a major in this department to be a good fit.

## Scholarships

The Department of Communication awards a number of scholarships to students who excel in academics and who have demonstrated career potential. Applications are due by March 1. Visit [the department website](#) for details.

## The Faculty

Faculty members in the Department of Communication are dedicated teachers, scholars, and practitioners who are committed to providing high-quality courses, hands-on learning experiences, and opportunities for undergraduate research. We encourage students who want to learn more about management communication to reach out via email or schedule an appointment via [Navigate](#).

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

COMM 487	Organizational Power and Leadership	
Total Credits		21

### Minor Requirements and Notes

- Student enrollment is limited to one degree program offered by the Department of Communication.
- A minimum of 9 credits must be taken at NDSU.

## Management Information Systems

#### Department Information

- **Department Location:**  
Richard H. Barry Hall
- **Department Phone:**  
701-231-8651
- **Department Web Site:**  
[www.ndsu.edu/business/programs/undergraduate/majors/](http://www.ndsu.edu/business/programs/undergraduate/majors/)
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/management-information-systems/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/management-information-systems/)

The management information systems (MIS) program is designed for those students who wish to prepare themselves for professional careers in information processing or information systems in business and government. The program develops technical skills and administrative insights required for the design, development, implementation, maintenance and management of organizational information systems.

### Background Information

MIS emphasizes the collection, organization, analysis and dissemination of information for the planning and control of business or organizational operations. The program prepares graduates to build information systems for the present and the future. The student learns how to handle the

complex problems of building a bridge between the computer science professional, who has a technical orientation, and the managerial individual, who has a functional perspective.

Another objective of the program is to provide students with both theoretical knowledge and hands-on experience. The program requires a practicum. Practical experience enables graduates to become productive in any setting more quickly. Further, hands-on experience provides excellent motivation and concrete models for advanced course work. Graduates of the program find employment in a wide variety of settings.

## The Program

North Dakota State University's MIS program is a unique collaborative effort by the faculty of two distinct disciplines: business administration and computer science. The Bachelor of Science degree provides sufficient background and skills to support a successful career in technical computing (e.g., as a programmer, systems analyst, systems designer, etc.), systems or network administration, database administration, information technology management, sales or technical sales support.

## Selective Admission

Admission to the pre-MIS phase of the program is open to any student who is admitted to NDSU. During the pre-MIS phase, a set of rigorous courses taken in business, computer science and mathematics is designed to give the student the proper background for the core courses. Pre-MIS majors are then admitted to the professional program after completing the pre-professional courses required for professional program admission (i.e., ENGL 120, COMM 110, MATH 144, ECON 201 or ECON 202, and PSYC 111 or SOC 110) and have earned a cumulative GPA of at least a 2.5. Transfer students with appropriate course work may be admitted directly into the professional program. Contact a professional advisor in the College of Business for more information.

## Computing Facilities

The computer facilities at NDSU are among the best in the country. The Quentin Burdick Building (QBB) houses the academic host server for the North Dakota University System's 11 colleges and universities and their 48,000 students. Faculty, staff and students may use a variety of computing systems ranging from multi-user host systems to microcomputers, all connected on a 100 MB, full-duplex, fiber-optic high-speed campus network, a high-speed statewide network and then onto the Internet. The campus network is the largest network in the state, consisting of over 6,500 data ports in 35 buildings. Wireless access is available in most campus buildings, including residence halls, and in two outdoor green spaces.

Open access microcomputer clusters are located in 26 buildings on the campus. These clusters house 495 PCs and 65 Macintosh computers along with printers and scanners. Some of these clusters are open 24 hours a day. The computers are equipped with the most commonly used software, e.g., Microsoft Office, Adobe Photoshop, AutoCad, SPSS, etc. Students can use these computers as stand-alone workstations, to access host systems, or to communicate via the Internet with other students and professionals throughout the world. These clusters are open to all students at NDSU. All residence halls are wired to the campus network, making it easy for students with computers to access remote information for course work and various investigations.

In addition to the open access microcomputer clusters, the MIS program and the computer science department maintain two special-purpose clusters housing approximately 170 computers for use by the students in their respective programs. These clusters include a computer structures and networking laboratory, and a network and server laboratory.

NDSU has assumed a leadership role in computer networking as part of a six-state consortium for extremely high-level networking in the Upper Midwest and connectivity to the National Science Foundation supercomputer centers. NDSU is a charter member of Internet 2 and has connectivity with the national vBNS research network.

NDSU also houses a Center for High Performance Computing (CHPC) that provides access to secure, advanced scientific computing resources. The CHPC is a member of the Coalition of Academic Scientific Computation, a nonprofit organization of supercomputing centers and research universities that offer leading edge hardware, software, and expertise in high performance computing resources.

## Career Opportunities

As an MIS specialist, one might choose a job in business, education, research, agriculture, or government. This work may be in areas such as systems analysis, management information processing, database, telecommunications/networks, software systems, simulation models, design and development of new computer systems or management. The Federal Bureau of Labor Statistics expects job opportunities in information systems to be a very attractive career path in the foreseeable future.

## High School Preparation

It is recommended that high school students interested in studying MIS at the university level take the maximum number of math courses offered at the high school level. High school electives in the social sciences, English and communication also would be of benefit. Please speak with a professional advisor in the College of Business for more information.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

Total Credits: 127

<sup>1</sup> Students must complete one of the following options: MIS 397 Cooperative Education, UNIV 492 Study Abroad, MIS 413 Service Internship, CSCI 445 Software Projects Capstone, or AGEC 371 Export Management. Requires MIS 320 as a pre-requisite and faculty advisor's prior approval.

NOTE: This is only a sample curriculum; actual schedules will depend on course availability and individual choices. Students are encouraged to meet with their academic advisor on a regular basis to review their plan of study.

## Management Information Systems

### Department Information

- **Department Location:**  
Richard H. Barry Hall
- **Department Phone:**  
701-231-8651
- **Department Web Site:**  
[www.ndsu.edu/business/departments/afis/](http://www.ndsu.edu/business/departments/afis/)
- **Credential Offered:**  
B.S.
- **Plan Of Study Sample:**  
[bulletin.ndsu.edu/programs-study/undergraduate/management-information-systems/#planofstudytext](http://bulletin.ndsu.edu/programs-study/undergraduate/management-information-systems/#planofstudytext)

## Major Requirements

### Major: Management Information Systems

Degree Type: B.S.

Minimum Credits Required for Degree: 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		6
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		6
<b>Wellness (W) <sup>†</sup></b>		2
<b>Cultural Diversity (D) <sup>**†</sup></b>		
<b>Global Perspectives (G) <sup>**†</sup></b>		
Total Credits		39

- \* May be satisfied by completing courses in another General Education category.
- † General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Major Requirements

Code	Title	Credits
------	-------	---------

All courses taken for the Management Information Systems Major require a grade of C or better. A minimum 2.5 cumulative GPA is required for admission to the professional program, to enroll in 300 - 400 level courses, and to graduate.

### Admission to the Professional Program

COMM 110	Fundamentals of Public Speaking (May satisfy general education category C) *	3
ENGL 120	College Composition II (May satisfy general education category C) *	3
ECON 201	Principles of Microeconomics (May satisfy general education category B and G) *	3
ECON 202	Principles of Macroeconomics (May satisfy general education category B and G) *	3
MATH 144	Mathematics for Business *	4
PSYC 111	Introduction to Psychology (May satisfy general education category B) *	3
or SOC 110	Introduction to Sociology	

### Management Information System Major Requirements

ACCT 200	Elements of Accounting I *	3
ACCT 201	Elements of Accounting II *	3
MIS 116	Business Use of Computers (May satisfy general education category S) *	3
PHIL 216	Business Ethics (May satisfy general education category A) *	3
STAT 330	Introductory Statistics (May satisfy general education category R) *	3
STAT 331	Regression Analysis *	2
CSCI 227	Computing Fundamentals I (Fall) *	3
ECON 201	Principles of Microeconomics <sup>2</sup>	3
ECON 202	Principles of Macroeconomics	
CSCI 228	Computing Fundamentals II (Spring) *	3
ENGL 320	Business and Professional Writing	3

Admission to the Professional Program required prior to taking the following courses

FIN 320	Principles of Finance <sup>1</sup>	3
MGMT 320	Foundations of Management <sup>1</sup>	3
MGMT 360	Operations Management	3
MRKT 320	Foundations of Marketing <sup>1</sup>	3
BUSN 430	Legal and Social Environment of Business <sup>1</sup>	3
BUSN 489	Strategic Management (Capstone Course) <sup>1</sup>	3
MIS 320	Management Information Systems <sup>1</sup>	3
MIS 315	System Analysis and Design (requires a grade of C or better)	3
MIS 350	Enterprise Systems	3
MIS 375	Database Design for Business Application (S)	3
MIS 376	Data and Telecommunications Administration (F)	3
MIS 470	Information Systems (S)	3
CSCI 312	Survey of Programming Languages (F)	3

### Management Information Systems Practicum

Student must complete one of the following options:		3
MIS 397	Fe/Coop Ed/Internship	
MIS 413	MIS Service Internship	
AGEC 371	Export Management	

### Elective Requirements for MIS Major (Elective courses can only be used to fulfill ONE requirement) \*\*

1) Programming Elective: Select one course from the following or an intermediate or advanced CSCI course that was not the teaching language of CSCI 227 or CSCI 228.	3
--	---

CSCI 125	Beginning COBOL	
CSCI 172	Intermediate Visual BASIC	
CSCI 213	Modern Software Development	
CSCI 371	Web Scripting Languages	
ECE 173	Introduction to Computing	
2) Technology Elective I: Any 300-400 level CSCI or MIS class not used to satisfy another MIS program requirement or		3
ECE 173	Introduction to Computing	
ECE 275	Digital Design	
CSCI 125	Beginning COBOL	
CSCI 172	Intermediate Visual BASIC	
CSCI 222	Discrete Mathematics	
CSCI 277	Introduction to UNIX	
CSCI 345	Topics on Personal Computers	
CSCI 371	Web Scripting Languages	
CSCI 469	Network Security	
CSCI 473	Foundations of the Digital Enterprise	
CSCI 488	Human-Computer Interaction	
CSCI 489	Social Implications of Computers	
MIS 340	Applied Business Intelligence	
MIS 412	Computer Crime, Forensics, and Investigation	
MIS 460	Enterprise Infrastructure I	
MIS 479	Business Data Mining and Predictive Analytics	
IME 456	Program and Project Management	
3) Technology Elective II: Take two courses from IME 456 or any 300 or 400 level CSCI or MIS course not used to satisfy another MIS major requirement		6
4) Business Elective: Any 300-400 level CoB course not used to satisfy other major requirements, CSCI 473, or ECON 324. (Excludes internships, study abroad, LEAD courses & MIS 371; includes courses cross-listed with CoB courses)		3
Total Credits		102

\* Pre-college and pre-management information systems major courses. A grade of 'C' or better for pre-college and pre-management information systems major courses is required for admission into the Management Information Systems major.

<sup>1</sup> Denotes Common Body of Knowledge (CBK) course.

<sup>2</sup> Take course not taken prior to admission to professional program

## Degree Requirements and Notes

- Students follow the published curricula for management information systems program of study from the semester/year of entrance in the College of Business to graduation provided enrollment at NDSU has not been discontinued for more than one year. Students who change their major are subject to meeting the curricular requirements in effect at the time the new major is declared.
- Business courses from programs that do not hold AACSB International accreditation cannot be used for major or minor requirements in the College of Business (CoB); such courses may be eligible for use as free electives.
- The CoB accepts a maximum of nine credits of non-NDSU 300-400 level business courses from AACSB programs with approval of the department.
- Admission to the MIS major is required to enroll in the advanced 300 or 400 level courses in the CoB.
- A grade of 'C' or better is required in transfer courses accepted for ACCT 200 Elements of Accounting I and ACCT 201 Elements of Accounting II and all 300-400 level accounting, business administration, finance, management, management information systems, and marketing courses.
- A letter grade must be earned in any course that fulfills a major requirement (with the exception of some practicum options and BUSN 301).
- Requirements for graduation are those in existence at the time of admission to the MIS major.
- Of the credits completed in residence at least 30 credits must be in 300-400 level CoB courses.
- Students must be accepted to the MIS major prior to the completion of the last 30 credits in 300 and 400 level CoB courses.
- A Business Administration minor is NOT offered with this major.
- For multiple majors within the CoB, at least 15 unique credits of 300-400 level CoB courses must exist between the majors.
- Prerequisite for Management Information Systems Practicum: MIS 320 with a grade of C or better.

## Minor Requirements

### Management Information Systems Minor

#### Minor Requirements

Required Credits: 21

Students should refer to [www.ndsu.edu/business](http://www.ndsu.edu/business) for information on declaring the minor with the CoB.

Code	Title	Credits
<b>Requirements</b>		
MGMT 320	Foundations of Management	3
MIS 315	System Analysis and Design	3
MIS 375	Database Design for Business Application *	3
or CSCI 366	Database Systems	
MIS 376	Data and Telecommunications Administration *	3
or CSCI 459	Foundations of Computer Networks	
CSCI 227	Computing Fundamentals I **	3-4
or CSCI 160	Computer Science I	
Select one of the following:		3
ACCT 420	Accounting Information Systems	
MIS 470	Information Systems	
Or an MIS advisor-approved CoB course that is MIS related		
Select one of the following:		3
An MIS adviser approved 300-400 level CSCI course		
Or one of the following:		
CSCI 122	Visual BASIC	
CSCI 161	Computer Science II	
CSCI 172	Intermediate Visual BASIC	
CSCI 228	Computing Fundamentals II **	
<b>Total Credits</b>		<b>21-22</b>

\* Students who take CSCI 366 Database Systems & CSCI 459 Foundations of Computer Networks, must select an additional MIS advisor-approved CoB course.

\*\* It is strongly recommended that students who take CSCI 227 select CSCI 228 as their elective in preparation for MIS 315.

#### Minor Requirements and Notes

- A minimum of 9 credits must be completed in the CoB.
- Approval forms must be submitted after completed CSCI 227 Computing Fundamentals I or CSCI 160 Computer Science I.
- To be accepted into the minor program, students must have a 2.50 institutional cumulative GPA. To complete a minor, students must earn at least a 2.50 GPA that is based on the courses used to satisfy the minor requirements. Courses may not be taken pass/fail.
- If the cumulative GPA falls below the 2.50 after acceptance into the program, the student will not be allowed to register for the CoB courses until the cumulative GPA returns to 2.50 or above.
- Students are subject to the minor requirements in effect during the year in which the minor was approved.
- Minors must satisfy all course prerequisites.
- Approval for a minor does not guarantee enrollment in specific courses.
- Graduation with a minor in Management Information Systems requires a grade of 'C' or better in all courses required for the minor.

## Managerial Psychology

#### Department Information

- **Department Location:**  
Minard Hall 232
- **Department Phone:**  
701-231-8622

- **Department Web Site:**  
www.ndsu.edu/psychology/
- **Credential Offered:**  
Minor
- **Official Program Curriculum:**  
bulletin.ndsu.edu/undergraduate/program-curriculum/managerial-psychology/

The Department of Psychology offers a managerial psychology minor that fills the need of many students who want essential training in behavior relevant to management in organizations which would help them in their professional careers as well as personal lives. The minor follows a number of themes important for NDSU students' in their future working lives: (1) managerial behavior derived from learning self-management, (2) managerial behavior derived from knowing and understanding others, and their diversity, (3) learning the broad implications of psychology for working with others, (4) recognizing the judgment, problem solving, and decision making foundation of managerial behavior, and (5) developing an understanding of the intrapersonal, interpersonal and organizational contexts of managerial behavior.

## Managerial Psychology

www.ndsu.edu/psychology/
- **Credential Offered:**  
Minor
- **Program Overview:**  
bulletin.ndsu.edu/programs-study/undergraduate/managerial-psychology/

## Minor Requirements

### Managerial Psychology

#### Minor Requirements

Required Credits: 18

Code	Title	Credits
PSYC 111	Introduction to Psychology	3
PSYC 211	Introduction To Behavior Modification	3
PSYC/SOC 214 or PSYC 216	Social Interaction Cultural Psychology	3
PSYC 221	Psychology Applied to Work	3
PSYC 322	Judgment & Decision-Making	3
PSYC 453 or PSYC 457	Organizational Psychology Managing Work Motivation and Morale	3

Total Credits

18

### Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.

## Manufacturing Engineering

### Department Information

- **Department Location:**  
Civil & Industrial Engineering 202
- **Department Phone:**  
701-231-9818
- **Department Web Site:**

[www.ndsu.edu/ime/](http://www.ndsu.edu/ime/)

- **Credential Offered:**  
B.S.Mfg.E.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/manufacturing-engineering/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/manufacturing-engineering/)

Manufacturing engineers make things. Everything manufacturing engineers do is ultimately tied to the production of goods. Almost everything we use, whether at home, at work, or at play, is manufactured. By its official professional definition, manufacturing occurs when the shape, form or properties of a material are altered in a way that adds value. Manufactured goods are everywhere: aircraft structures, machinery, electronics, medical devices, automobile parts, household products, toys, textiles and clothing, cans and bottles—virtually everything we use.

## The Profession

Everything needed in modern society is manufactured. Manufacturing engineers design, direct and coordinate the processes and production systems for making virtually every kind of product from beginning to end. As businesses try to make products better and at a lower cost, they turn to manufacturing engineers to find out how.

Manufacturing engineers apply scientific principles to the production of goods. They are key team members in production of a wide range of products: automobiles, airplanes, tractors, electronics, surgical instruments, toys, building products, foodstuffs, sports and recreational equipment, and more. In all cases, manufacturing engineers design the processes and systems to make products with the required functionality, to high quality standards, available when and where customers prefer, at the best possible price and in ways that are environmentally friendly.

## The Program

The Department of Industrial and Manufacturing Engineering (IME) at North Dakota State University offers two programs leading to either a Bachelor of Science degree in Manufacturing Engineering or Industrial Engineering and Management. Both programs are accredited by the Engineering Accreditation Commission of ABET, [www.abet.org](http://www.abet.org).

As a graduate of manufacturing engineering, you will have the opportunity to design systems and processes that improve the quality and productivity of an organization's business activities. You will employ a strong base of fundamental engineering and management skills to effectively integrate people, technology, machines and money to create positive change. Quite simply, you will design and implement the best way to make things.

## Faculty and Facilities

The faculty and staff members in the department have extensive experience in industrial and manufacturing specialties. The IME faculty and staff will know your name, understand your potential and problems, and will offer encouragement when you need it. When you leave NDSU, you will have built excellent capabilities for career success, the confident ability for lifelong personal growth, and a network of friends and professional colleagues.

The department has 7 laboratories with a significant amount of equipment that provide valuable services in support of students' educational needs. The departmental laboratories include manufacturing, rapid prototyping, CNC, machining, microfabrication, welding, electronics, precision manufacturing, automation and robotics, and PLC, as well as computer simulation, quality & reliability, SPACHES, and human factors.

## Career Opportunities

The IME programs at NDSU can help you to open the door to various opportunities for starting your professional career in a wide range of industries or to seek advanced degrees at NDSU or another institution. The IME programs will help you to develop a strong basis in general education and engineering fundamentals that provide the foundation for a very wide range of career choices and for a lifetime of growth. IME programs will help you develop industry-standard skills you can use to open the door to many career opportunities that can offer you financial rewards and exceptional professional success.

Manufacturing engineering graduates have become a source of talent working in industries that produce such products as biomedical devices, microelectronics, transportation and construction equipment, aircraft and spacecraft, and processed foods. Recent IME graduates command starting salaries in the top rank of engineering disciplines. According to Payscale.com, the national average salary was \$69,000 in February of 2020 ([https://www.payscale.com/research/US/Job=Manufacturing\\_Engineer/Salary](https://www.payscale.com/research/US/Job=Manufacturing_Engineer/Salary)).

## Transfer Admission

Students who have studied two years of pre-engineering at another institution may be able to transition into the manufacturing engineering program with no loss of credits. Students who transfer with an AA or AS degree will have lower division general ed credits satisfied.

## Scholarship and Financial Aid

The Department of Industrial and Manufacturing Engineering awards several scholarships annually. Scholarships are available for incoming freshman, transfer students and currently enrolled students. Other forms of financial aid are available through the Office of Financial Aid and Scholarships.

## Selective Admission

The Department of Industrial and Manufacturing Engineering has minimum admission requirements for transfer students. Transfer students must have a minimum grade point average of 2.3.

## MANUFACTURING Engineering Minor

Students majoring in any engineering discipline may elect a minor in Manufacturing Engineering. These optional studies offer engineering students the opportunity to add important career-enhancing skills to their technological competencies. Total requirement is 18 credits (6 credits are required courses and 12 credits of approved electives).

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>Freshman</b>

## Major Requirements

### Major: Manufacturing Engineering

Degree Type: B.S.Mfg.E.

Minimum Degree Credits to Graduate: 131

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

<b>Manufacturing Electives</b>		
Computer Science Electives: Select 3 credits from the following:		3
CSCI 122	Visual BASIC	
CSCI 159	Computer Science Problem Solving	
CSCI 160	Computer Science I	
ECE 173	Introduction to Computing	
Engineering and Science Electives: Select a minimum of 9 credits from the following:		
CE 309	Fluid Mechanics	3
ME 350	Thermodynamics and Heat Transfer	3
Select one of the following:		3-4

EE 206	Circuit Analysis I
ECE 275	Digital Design
ECE 301	Electrical Engineering I

**Technical Electives: Select 9 credits from the following:** 9

IME 335	Welding Technology
IME 411	Human Factors Engineering
IME 427	Packaging for Electronics
IME 432	Composite Materials Manufacturing
IME 433	Additive Manufacturing
IME 435	Plastics and Injection Molding Manufacturing
IME 437	Methods for Precision Manufacturing
IME 450	Systems Engineering and Management
IME 451	Logistics Engineering and Management
IME 462	Total Quality In Industrial Management
IME 463	Reliability Engineering
IME 464	Reliability Analysis
IME 470	Operations Research I
IME 472	Simulation of Business and Industrial Systems
IME 485	Industrial and Manufacturing Facility Design

Only one of the following five courses may be counted as technical electives.

BUSN 340	International Business
BUSN 431	Business Law I-Contracts, Property and Torts
MGMT 320	Foundations of Management
MRKT 320	Foundations of Marketing
MIS 320	Management Information Systems

Total Credits 107-108

## Degree Requirements and Notes

- A student must complete at least 60 semester credits of professional level course work in his/her program while in residence and enrolled in the college. Students transferring into the college from programs with professional accreditation are exempt from this residency requirement but are subject to the residency requirement of NDSU.
- Grades less than 'C' will not be accepted for required courses in CHEM, MATH, and PHYS.
- Students may request approval for other 300-400 level engineering or related courses to be approved as technical electives. To request approval, a student should submit a memo to the IME Department indicating the course of interest and why the course should be approved as a technical elective. This memo will be reviewed by the IME Department Chair for approval.
- 300-400 level BUSN courses require at least junior standing and a minimum 2.50 cumulative GPA.

## Minor Requirements

### Minor: Manufacturing Engineering

Required Credits: 18

Code	Title	Credits
<b>Required Courses</b>		
IME 330	Manufacturing Processes	3
IME 380	CAD/CAM for Manufacturing	3
IME 430	Process Engineering	3
IME 431	Production Engineering	3
<b>Electives: Select 6 credits from the following:</b> 6		
IME 335	Welding Technology	
IME 427	Packaging for Electronics	
IME 432	Composite Materials Manufacturing	
IME 433	Additive Manufacturing	

IME 435	Plastics and Injection Molding Manufacturing
IME 437	Methods for Precision Manufacturing
IME 461	Quality Assurance and Control
IME 482	Automated Manufacturing Systems

Total Credits

18

## Minor Requirements and Notes

- A minimum of 9 credits must be taken at NDSU.
- Only students majoring in an engineering discipline or with department permission agricultural or physical science majors may elect a minor in Manufacturing Engineering.

# Marketing

## Department Information

- **Department Location:**  
Richard H. Barry Hall
- **Department Phone:**  
701-231-8651
- **Department Web Site:**  
[www.ndsu.edu/business/programs/undergraduate/majors/](http://www.ndsu.edu/business/programs/undergraduate/majors/)
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/marketing/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/marketing/)

Marketing is a primary function of organizations to ensure the needs of customers and external constituents are met. The marketing curriculum is carefully designed to ensure students have understanding of how to successfully manage products, price, place and promotion, and have analytical and interpersonal skills. A success measure of our marketing program is the successful placement of our graduates in business, industry, and non-profit organizations, in tandem with their enhanced abilities to manage marketing mix, analyze markets, work as a team, and make sound decisions.

## Background Information

The Association to Advance Collegiate Schools of Business (AACSB International) accredits the undergraduate and graduate programs in the College of Business at North Dakota State University. Our College of Business is one of only two AACSB-accredited schools of business in North Dakota.

AACSB International is one of higher education's most prestigious and rigorous accrediting bodies, emphasizing a commitment to continuous improvement, innovation, engagement, and impact in business education. Less than 10 percent of business programs worldwide have this accreditation, highlighting the academic excellence of our College of Business at NDSU.

## The Program

The Marketing major is a four-year program with a curricular blend of general education, pre-professional course work, fundamental business knowledge (accounting, finance, management, marketing, and information systems), international exposure, and in-depth marketing-specific courses. Students in the Marketing major can also choose the Supply Chain Management track and/or pursue the Certificate in Professional Selling to advance their field-specific skills and knowledge. The program nurtures important business skills and marketing competencies including managing marketing mix (price, product, promotion, and place), analytical ability, interpersonal skills, and teamwork. Marketing students are thus prepared to perform the marketing function and activities in business enterprises and non-profit organizations.

## Selective Admission

Students who wish to study marketing at NDSU enroll as pre-marketing students in the College of Business for the first semester of their freshman year. Admission to the professional program requires the successful completion of the pre-professional course requirements (ENGL 120, COMM 110, MATH 144, ECON 201 or 202, and PSYC 111 or SOC 110) and a minimum cumulative grade point average (GPA) of 2.5. Transfer students may also be eligible for immediate admission in the professional program. Contact a College of Business professional advisor for more information.

## The Faculty

To provide a rigorous and relevant educational experience to our students, faculty in our program are highly qualified in their respective areas of expertise. Our faculty have been recognized for their teaching excellence by their students and colleagues and for their outstanding research by their peers. They employ a wide variety of instructional techniques and embed both classical and cutting-edge knowledge into their classes. They remain current in their fields by actively engaging in research and/or with firms and business professionals regarding their marketing practice, business challenges and issues.

## The Practicum

Marketing majors are encouraged to complete practicum experiences, ideally at the end of sophomore and junior years. The practicum is designed to enable our students to connect marketing concepts learned in the classroom with live business situations and to broaden their horizons beyond the classroom setting. The practicum also gives students a competitive edge in job placement.

## Career Opportunities

Graduates with a marketing major have career opportunities in business, industry, government service, and the non-profit sector, both regionally and globally. Employment opportunities for marketing majors are significant as the marketing function exists in every type of business and organization, whether for-profit or not-for-profit. Major job categories include sales, retailing, product/service management, advertising and promotion, and market research.

## The College

In addition to marketing major, the College of Business offers undergraduate majors in accounting, business administration, finance, global business (second major only), management, and management information systems. The College of Business also offers five graduate programs including Master of Business Administration, Master of Accountancy, Master of Managerial Logistics, Master of Transportation and Urban Systems, and Doctorate in Transportation and Logistics.

## High School Preparation

It is recommended that high school students interested in studying marketing at the university level take mathematics courses at least through pre-calculus. High school electives in the social sciences, communication, and English also would be of benefit. Students who have satisfactorily completed Advanced Placement courses in Calculus, Economics, English, Communication, and Psychology or Sociology may directly apply for admission to the professional program. Please speak with a professional advisor in the College of Business for more information.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Major Requirements

### Major: Marketing

**Degree Type:** B.S.

**Minimum Credits Required for Degree:** 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		
ENGL 110	College Composition I	12
ENGL 120	College Composition II	

COMM 110	Fundamentals of Public Speaking	
	Upper Division Writing <sup>†</sup>	
	<b>Quantitative Reasoning (R)</b> <sup>†</sup>	3
	<b>Science and Technology (S)</b> <sup>†</sup>	10
	<b>Humanities and Fine Arts (A)</b> <sup>†</sup>	6
	<b>Social and Behavioral Sciences (B)</b> <sup>†</sup>	6
	<b>Wellness (W)</b> <sup>†</sup>	2
	<b>Cultural Diversity (D)</b> <sup>*†</sup>	
	<b>Global Perspectives (G)</b> <sup>*†</sup>	
Total Credits		39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Major Requirements

Code	Title	Credits
All courses taken for the Marketing Major require a grade of C or better. A minimum 2.5 cumulative GPA is required for admission to the professional program, to enroll in 300 - 400 level courses, and to graduate.		
<b>Admission to the Professional Program Requirements</b>		
COMM 110	Fundamentals of Public Speaking (May satisfy general education category C)	3
ECON 201 or ECON 202	Principles of Microeconomics (May satisfy general education category B and G) <sup>1</sup> Principles of Macroeconomics	3
ENGL 120	College Composition II (May satisfy general education category C)	3
MATH 144	Mathematics for Business	4
PSYC 111 or SOC 110	Introduction to Psychology <sup>1</sup> Introduction to Sociology	3
<b>Marketing Major Requirements</b>		
ACCT 200	Elements of Accounting I	3
ACCT 201	Elements of Accounting II	3
MIS 116	Business Use of Computers (May satisfy general education category S)	3
PHIL 216	Business Ethics (May satisfy general education category A)	3
STAT 330	Introductory Statistics (May satisfy general education category R)	3
STAT 331	Regression Analysis	2
ECON 201 or ECON 202	Principles of Microeconomics (May satisfy general education category B and G) <sup>1</sup> Principles of Macroeconomics	3
PSYC 111 or SOC 110	Introduction to Psychology <sup>1</sup> Introduction to Sociology	3
ENGL 320	Business and Professional Writing (May satisfy general education category C)	3
Admission to the Professional Program required prior to taking the following courses:		
FIN 320	Principles of Finance <sup>2</sup>	3
MGMT 320	Foundations of Management <sup>2</sup>	3
MRKT 320	Foundations of Marketing <sup>2</sup>	3
MIS 320	Management Information Systems <sup>2</sup>	3
BUSN 430	Legal and Social Environment of Business <sup>2</sup>	3
BUSN 489	Strategic Management (Capstone Course) <sup>2</sup>	3
MRKT 410	Consumer Behavior	3
MRKT 450	Marketing Research	3
MRKT 460	Marketing Strategy	3
<b>Marketing Elective Courses (MRKT prefix) 300-400 Level</b>		12
Select courses from current MRKT curriculum		

**Marketing Elective Courses 300-400 Level** 9

Select courses from within the CoB, Prefixes of BUSN, MGMT, FIN, ACCT, MIS, ENTR (includes courses cross-listed with CoB courses)

**Marketing Elective Course 300-400 Level** 3

This 300-400 level elective can be external to the CoB and must be satisfied with a single 3-credit 300 - 400 level course. It cannot be used to satisfy other requirements (includes courses cross-listed with CoB courses)

At least one of the following international courses must be included in the plan of study and can count in one of the management 300-400 level elective areas:

BUSN 340	International Business
BUSN 341	Global Business Environment
FIN 440	International Finance
MGMT 440	International Management
MRKT 440	International Marketing

Total Credits 93

<sup>1</sup> Take the second course of the pair, which was not taken for admission to professional program.

<sup>2</sup> Denotes Common Body of Knowledge (CBK) course.

**Degree Requirements and Notes:**

- Students follow the published curricula for the marketing program of study from the semester/year of entrance in the College of Business (COB) to graduation provided enrollment at NDSU has not been discontinued for more than one year. Students who change their major are subject to meeting the curricular requirements in effect at the time the new major is declared.
- Business courses from programs that do not hold AACSB International accreditation cannot be used for major or minor requirements in the (CoB); such courses may be eligible for use as free electives.
- The CoB accepts a maximum of nine credits of non-NDSU 300-400 level business courses from AACSB programs with approval of the department.
- Admission to the marketing major is required to enroll in the advanced 300 or 400 level courses in the CoB.
- A grade of 'C' or better is required in transfer courses accepted for all accounting, business administration, finance, management, management information systems, and marketing courses.
- No courses for the major may be taken with Pass/Fail grading.
- Requirements for graduation are those in existence at the time of admission to the marketing major.
- Students must earn a 2.50 institutional GPA to graduate.
- Of the credits completed in residence at least 30 credits must be in 300-400 level CoB courses.
- Students must be accepted to the marketing major prior to the completion of the last 30 credits in 300 and 400 level CoB courses.
- A Business Administration minor is NOT offered with this major.
- For multiple majors within the CoB, at least 15 unique credits of 300-400 level CoB courses must exist between the majors.
- Internship and cooperative education credits may be applied toward the total credits required for graduation as non-major electives or 300-400 level electives not used in pre-major categories.
- Student may choose to take the Supply Chain Management Track within the Marketing major.

Code	Title	Credits
MGMT 461	Supply Chain Management (Required)	3
MGMT 462	Modeling the Supply Chain (Required)	3
Select one of the following:		3
MGMT 360	Operations Management	
MGMT 451	Negotiation and Alternative Dispute Resolution	
MRKT 430	Sales and Personal Selling	
MRKT 438	Customer Relationship Management (CRM) and Sales Technology	
AGEC 378	Introduction to Transportation & Logistics

B.A.; B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/mathematics/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/mathematics/)

Mathematics is the language of science and technology. Its explosive development during the 20th Century and its history as the oldest and most highly developed discipline make math one of the most exciting and rewarding areas of study for the 21st Century.

## Background Information

In the past few years, a tremendous increase has occurred in the need for mathematics and mathematicians. In such fields as actuarial science, computer science, statistics, engineering, economics and commerce, mathematical training is in high demand.

If you enjoy mathematics and are good at it, you will find both challenges and opportunities in the Department of Mathematics at North Dakota State University. Your advisor, a faculty member in the department, will provide you with information concerning courses, curricula and the many exciting and rewarding careers open to mathematics graduates. The Cooperative Education Program offers the possibility of academic credit for on-the-job training. The student mathematics organization, Math Club, brings in both academic and nonacademic speakers who explore career possibilities and fascinating topics in mathematics at club meetings. Opportunities for paper grading and tutoring are available and allow students to deepen their understanding by assisting others in learning mathematics.

Our faculty members contribute research findings in a variety of areas in theoretical and applied mathematics to internationally known journals. This wide variety of areas of specialization and expertise of faculty members in the department means that you will probably find someone both interested and knowledgeable in any area of mathematics that might fascinate you.

## The Program

The Department of Mathematics offers a broad and balanced curriculum of courses taught by a faculty of 15. A student may choose to major in mathematics or mathematics education. Minors in related areas are encouraged. These choices may be made immediately or deferred until the basic course work is completed. In addition to the Bachelor of Science degree, the department offers master's and doctorate degrees.

## Career Opportunities

Our students have been very successful in finding employment. Graduates are working in a wide variety of corporations, agencies, universities and school systems. A number continue on for advanced degrees.

## The Faculty

A. Akhmedov, Ph.D., Yale, 2004

M.A. Alfonseca, Ph.D., Universidad Autonoma de Madrid, 2003

N. Barabanov, Ph.D., University of Kiev, 1979

J. Boynton, Ph.D., Florida Atlantic University, 2006

C. Ciuperca, Ph.D., University of Kansas, 2001

J. Striker, Ph.D., University of Minnesota, 2008

A. Ungar, Ph.D., University of Tel Aviv, 1973

I. Yegorov, Ph.D., Lomonosov Moscow State University, 2014

### The Curriculum

For a mathematics major, 57 credits of mathematics courses are required. The mathematics education major requires 37 credits and emphasizes those areas of mathematics and related disciplines that have proven most useful for secondary school teachers. In addition, there are cooperative double majors in mathematics and computer science, mathematics and physics, and mathematics and statistics, which take advantage of the overlap of requirements and give the student a broader background, thus opening a wider range of career possibilities. Advisors in the Department of Mathematics can furnish details about these and other programs, such as an emphasis in actuarial mathematics.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Major Requirements

### Major: Mathematics

Degree Type: B.A. or B.S.

Minimum Degree Credits to Graduate: 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## Mathematics and Physics

### Department Information

- **Department Location:**  
Minard Hall or South Engineering
- **Department Phone:**  
701-231-8171
- **Department Web Site:**  
[www.ndsu.edu/math/](http://www.ndsu.edu/math/) or [www.ndsu.edu/physics/](http://www.ndsu.edu/physics/)
- **Credential Offered:**  
B.S.; B.A.
- **Plan Of Study Sample:**  
[bulletin.ndsu.edu/programs-study/undergraduate/mathematics-physics/#planofstudytext](http://bulletin.ndsu.edu/programs-study/undergraduate/mathematics-physics/#planofstudytext)

### Major Requirements

#### Major: Mathematics & Physics

Degree Type: B.A. or B.S.

Minimum Degree Credits to Graduate: 122

## University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		6
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		6
<b>Wellness (W) <sup>†</sup></b>		2
<b>Cultural Diversity (D) <sup>**†</sup></b>		
<b>Global Perspectives (G) <sup>**†</sup></b>		
Total Credits		39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## College Requirements

Code	Title	Credits
<b>Bachelor of Arts (BA) Degree – An additional 12 credits Humanities and Social Sciences and proficiency at the second year level in a modern foreign language. *</b>		12
<b>Bachelor of Science (BS) Degree – An additional 6 credits in Humanities or Social Sciences *</b>		6

\* Humanities and Social Sciences may be fulfilled by any course having the following prefix: ADHM, ANTH, ARCH, ART, CJ, CLAS, COMM, ECON, ENGL, FREN, GEOG, GERM, HDFS, HIST, LA, LANG, MUSC, PHIL, POLS, PSYC, RELS, SOC, SPAN, THEA, WGS, or any course from the approved list of general education courses in humanities and social sciences (general education categories A and B). These credits must come from outside the department of the student's major.

## Major Requirements

A grade of 'C' or better is required for all MATH, PHYS, and AST prefix courses.

Code	Title	Credits
<b>Mathematics Major Requirements</b>		
MATH 129	Basic Linear Algebra	3
MATH 165	Calculus I (May satisfy general education category R)	4
MATH 166	Calculus II	4
MATH 265	Calculus III	4

MATH 266	Introduction to Differential Equations	3
MATH 270	Introduction to Abstract Mathematics	3
MATH 329	Intermediate Linear Algebra	3
MATH 346	Metric Space Topology	3
Select any two of the following:		6
MATH 420	Abstract Algebra I	
MATH 450	Real Analysis I	
MATH 452	Complex Analysis	
MATH 483	Partial Differential Equations	
MATH 491	Seminar	2
<b>Physics Major Requirements</b>		
PHYS 171	Introductory Projects in Physics	1
PHYS 251 & 251L	University Physics I and University Physics I Laboratory (May satisfy general education category S)	5
PHYS 251R	University Physics I Recitation	1
PHYS 252 & 252L	University Physics II and University Physics II Laboratory (May satisfy general education category S)	5
PHYS 252R	University Physics II Recitation	1
PHYS 350	Modern Physics	3
PHYS 355	Classical Mechanics (or PHY 330: Intermediate Mechanics at MSUM)	3
PHYS 360	Modern Physics II	3
PHYS 361	Electromagnetic Theory (or PHY 370: Electromagnetic Theory at MSUM)	3
PHYS 370	Introduction to Computational Physics	3
PHYS 462	Thermal and Statistical Physics	3
PHYS 485	Quantum Mechanics I	3
PHYS 486	Quantum Mechanics II	3
PHYS 488	Senior Project I	1
PHYS 489	Senior Project II	2
Physics Electives: Select 3 of the following:		9
PHYS 215	Research For Undergraduates	
PHYS 411	Optics for Scientists & Engineers	
PHYS 413	Lasers for Scientists and Engineers	
PHYS 415	Elements of Photonics	
PHYS 481	Condensed Matter Physics	
MSUM AST	Astronomy courses (300/400-level) with departmental permission	
<b>Related Required Courses</b>		
Computer Science:		
CSCI 160	Computer Science I	4
Chemistry: Select one of the following (150/160 recommended):		4
CHEM 150 & CHEM 160	Principles of Chemistry I and Principles of Chemistry Laboratory I	
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory	
Select one of the following (151/161 recommended):		4
CHEM 151 & CHEM 161	Principles of Chemistry II and Principles of Chemistry Laboratory II	
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory	

Total Credits

96

**Program Notes**

- Except for courses offered only as pass/fail grading, no course may be taken Pass/Fail.

## Mathematics and Statistics Double Major

### Pre-Actuarial Science Option

Actuarial Science is the study of the evaluation and measurement of risk. The Actuary Science option is a pre-professional program designed to provide the background needed to enter the field. Entrance into the profession is regulated under a system of examinations run by actuarial professional societies. The curriculum for this option is designed to prepare the student to pass several of these examinations.

The nature of the actuarial profession requires its practitioners to have a broad knowledge of finance, law, mathematics, management, and statistics. This option leads to a double major in Mathematics and Statistics with either a minor in Economics or additional courses in business. Students selecting this option are requested to visit with the actuarial advisers in both the Departments of Mathematics and Statistics early and often to confirm their progress and to inform themselves of changes in the examination curriculum.

### Plans of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Mathematics Education

### Department Information

- **Department Location:**  
Katherine Kilbourne Burgum Family Life, 4-H Center
- **Department Phone:**  
701-231-7921
- **Department Web Site:**  
[www.ndsu.edu/education/](http://www.ndsu.edu/education/)
- **Credential Offered:**  
B.A.; B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/mathematics-education/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/mathematics-education/)

### The Program

Candidates in the Mathematics Education major are prepared to teach a broad curriculum to a diverse student population. Mathematics is the language of science and technology, and its history as the oldest and most highly developed discipline making math one of the most exciting and rewarding areas of study for the 21st Century. The mathematics education student should work closely with an advisor to be sure that the general education courses taken will provide a strong foundation for the advanced courses in the major.

### Professional Education Courses

Students may enroll in the 300-level professional education courses before being formally admitted to the School of Education (SOE). Prior to enrolling in the 400-level courses, students must complete the application for admission to the SOE; attain a minimum of a 2.75 grade point average overall in their course work and education courses and pass the Core Academic Skills for Educators exam(s). Requirements for admission can be found on the School of Education website (<https://www.ndsu.edu/education>).

### Student Teaching

Student teaching is the culmination of the teaching program. Students have the opportunity to apply skills acquired in college courses under the supervision of an experienced mathematics educator.

### Student Advisement

Students will be assigned individual advisors who will work closely with them in program planning. Students are encouraged to meet with their advisor(s) at least once a semester.

### Certification

Upon completing this program, students are eligible for certification to teach mathematics in most states. The program is accredited by the Council for the Accreditation of Educator Preparation (CAEP).

### Career Opportunities

The mathematics education degree prepares students to teach Grades 7-12 in the United States and internationally. The major in mathematics is also valued by a wide range of employers in government and industry. Mathematics teachers may also choose to pursue graduate degrees after

building classroom experience. Those masters and doctoral degrees could lead to post-secondary academic positions and leadership roles in state and national educational organizations.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

MATH 450	3		
Apply for Student Teaching			
Complete PLT (grades 7-12) Exam			

Total Credits: 121-123

## Mathematics Education

### Department Information

- **Department Location:**  
Katherine Kilbourne Burgum Family Life, 4-H Center
- **Department Phone:**  
701-231-7921
- **Department Web Site:**  
[www.ndsu.edu/education/](http://www.ndsu.edu/education/)
- **Credential Offered:**  
B.S.; B.A.
- **Plan Of Study Sample:**  
[bulletin.ndsu.edu/programs-study/undergraduate/mathematics-education/#planofstudytext](http://bulletin.ndsu.edu/programs-study/undergraduate/mathematics-education/#planofstudytext)

## Major Requirements

### Major: Mathematics Education

Degree Type: B.A. or B.S.

Minimum Degree Credits to Graduate: 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		6
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		6
<b>Wellness (W) <sup>†</sup></b>		2
<b>Cultural Diversity (D) <sup>**†</sup></b>		
<b>Global Perspectives (G) <sup>**†</sup></b>		

Total Credits

39

- \* May be satisfied by completing courses in another General Education category.
  - † General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.
- A list of university approved general education courses and administrative policies are available here (p. 91).

## Major Requirements

A grade of 'C' or better is required in all Teaching Specialty requirement courses and the Professional Education requirement courses.

Code	Title	Credits
<b>Teaching Specialty Requirements</b>		
CSCI 160	Computer Science I	4
MATH 165	Calculus I (May satisfy general education category R)	4
MATH 166	Calculus II	4
MATH 265	Calculus III	4
MATH 270	Introduction to Abstract Mathematics	3
MATH 329	Intermediate Linear Algebra	3
MATH 346	Metric Space Topology	3
MATH 374	Special Problems In Mathematics	1
MATH 420	Abstract Algebra I	3
MATH 440	Axiomatic Geometry	3
MATH 450	Real Analysis I	3
MATH 478	History of Mathematics	3
STAT 367	Probability	3
STAT 368	Statistics	3
<b>Mathematics Courses</b>		
Select one 300-400 level MATH prefix course approved by the department. MATH 266 may be used as one of these electives.		3
<b>Professional Education Requirements</b>		
EDUC 321	Introduction to Teaching	3
EDUC 322	Educational Psychology	3
EDUC 451	Instructional Planning, Methods and Assessment	3
EDUC 481	Classroom Practice Methods of Teaching I: (Math)	3
EDUC 485	Student Teaching Seminar	1
EDUC 486	Classroom Management for Diverse Learners	3
EDUC 487	Student Teaching	9
EDUC 488	Applied Student Teaching	3
EDUC 489	Teaching Students of Diverse Backgrounds	3
Total Credits		78

## Degree Requirements and Notes

- A GPA of 2.75 or better in the teaching specialty is required for placement in student teaching and exit from the program.
- A GPA of 2.75 or better in professional education as well as passing the appropriate Praxis II exam are required to exit the program.
- Courses taken *Pass/Fail* will not be used to satisfy any requirements other than total credits.
- Students pursuing both Mathematics Education and Mathematics majors are encouraged to take STAT 467/468 in place of STAT 367/368, and choose MATH 421 and 453 or 454 as part of their required Math credits.
- See School of Education (<https://www.ndsu.edu/education>) for admission requirements.

## Mechanical Engineering

### Department Information

- **Department Location:**  
Dolve Hall 111
- **Department Phone:**

701-231-8671

- **Department Web Site:**  
[www.ndsu.edu/me/](http://www.ndsu.edu/me/)
- **Credential Offered:**  
B.S.M.E.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/mechanical-engineering/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/mechanical-engineering/)

The mechanical engineer deals with the broad areas of heat, energy, force and motion, and their effects on a multitude of products. Mechanical engineers may be involved in the design of large industrial machinery, power plants, automobiles and aircraft, robots, biomedical devices and equipment, precision measurement and data acquisition equipment, nanotechnology and new materials, among others. Within these areas, the mechanical engineer enjoys considerable professional flexibility.

## The Program

The demand for mechanical engineers with a good technical education has been high for many years. The Department of Mechanical Engineering at North Dakota State University offers an education that enables its graduates to take their places in all facets of the profession. The department has graduated more than 3,200 mechanical engineers who are working throughout the United States and many other parts of the world. The Bachelor of Science degree in Mechanical Engineering is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>).

## Curriculum

The standard curriculum allows students flexibility in choosing courses that reflect their interests within the broad areas of mechanical engineering. These include mechanics, materials and nanotechnology, biomedical engineering, alternative energy sources, fluid dynamics, robotics and more. ME students also have the opportunity to pursue minors in coatings and polymeric materials, biomedical engineering, and robotics, among others, which can enhance their educational experience.

The coatings and polymeric materials minor prepares students for careers that require specialized polymers training, such as the manufacturing of coatings to enhance and preserve vehicles, structures and machines. NDSU's Department of Coatings and Polymeric Materials is internationally renowned. Only five other universities in the U.S. offer programs in coatings and employment opportunities far exceed the number of graduates.

The biomedical engineering minor provides an opportunity for specialized training in one of the highest demand fields today. It prepares graduates to be able to contribute to the global demand for medical technologies and innovations.

The robotics minor is designed to give students the skills needed to design and develop robotic devices, and use those devices to solve real-life problems. The minor provides depth of content in subjects including microprocessor programming, sensors and instrumentation, actuation systems, control principles, and robot manipulation. Graduates from this program may work in a wide range of industries including automotive, aerospace, drone manufacturers, packaging systems, precision agriculture, energy and mining, among others.

Undergraduate students who excel in our program may consider advancing towards a master's degree by applying for our Accelerated Master's Program. This option gives the student a jump-start on the Master of Science curriculum requirements while they finish their Bachelor of Science degree by allowing 6 credits of coursework to be applied to both degrees.

## The Faculty and Facilities

The Department of Mechanical Engineering is housed in Dolve Hall, which is part of an eight-building engineering complex. Laboratories and classrooms are well-suited and equipped for teaching and research. Students have access to PC computer clusters and facilities located in Dolve Hall to assist them in their laboratory and class work. The faculty offers a variety of expertise and extensive experience in teaching and research.

## High School Preparation

To enroll in the mechanical engineering curriculum for the freshman year, students should have two years of high school algebra and one year of trigonometry, as well as a year in chemistry and physics. Students without these courses may take them at NDSU to better prepare academically for a specific engineering curriculum.

## Selective Admission

The Department of Mechanical Engineering has minimum admission requirements for new freshmen and transfer students.

New freshmen must have a minimum high school grade point average (GPA) of 3.2 or have a minimum math ACT of 26 or SAT math sub score of 590.

Transfer students must have a minimum cumulative grade point average (GPA) of 2.7.

All new students who meet mechanical engineering admission requirements are initially admitted to the basic program in mechanical engineering. After completing 50 credits of specified courses with a minimum GPA of 2.5, minimum engineering GPA of 2.7 and no grade below a C, students are eligible for admission to the professional program. The engineering GPA is calculated based on specific core engineering courses.

Students who do not meet the minimum admission criteria will be placed in mechanical engineering under the advisement of a general engineering advisor until minimum admission criteria have been met.

## Career Opportunities

Recent graduates have found employment in companies throughout the United States. The average starting salary is approximately \$62,000. A sampling of companies hiring NDSU graduates includes: 3M, American Crystal Sugar, Angus Palm, Applied Engineering, Arctic Cat Inc., Black and Veatch, Bobcat, Boeing, Cargill, Caterpillar, Daktronics, Horsch Anderson, Integrity Windows, John Deere, Montana Dakota Utilities, Parker-Hannifin, Puget Sound Naval Shipyard and Xcel Energy.

## Cooperative Education Program

Students in mechanical engineering are encouraged to participate in the Cooperative Education Program at NDSU. It consists of one or more four-month sessions of work experience after completion of the sophomore year. This optional industry experience provides students with hands-on opportunities not available in the classroom, and makes students more marketable to employers after graduation. Students who register for co-op credits and successfully complete the program may apply those credits towards graduation as technical elective coursework.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

PHYS 252 & 252L	University Physics II and University Physics II Laboratory (May satisfy general education category S)	5
Technical Electives: Select 15 credits from the following:		15
ME 332	Engineering Materials II	

ME 353	Thermodynamics II
ME 435	Plastics and Injection Molding Manufacturing
or IME 635	Plastics and Injection Molding Manufacturing
ME 436	Biopolymers and Biocomposites
ME 437	Engineering Ceramics
ME 468	Introduction to Biomechanics
ME 470	Renewable Energy Technology
ME 471	Experimental Stress Analysis
ME 472	Fatigue and Fracture of Metals
ME 473	Engineering with Polymeric Materials
ME 474	Mechanics of Composite Materials
ME 475	Automatic Controls
ME 476	Mechatronics
ME 477	ME Finite Element Analysis
ME 478	Advanced Flow Diagnostics
ME 479	Fluid Power Systems Design
or ABEN 479	Fluid Power Systems Design
ME 480	Biofluid Mechanics
ME 481	Fundamentals of Energy Conversion
ME 482	Fuel Cell Science and Engineering
ME 483	Introduction to Computational Fluid Dynamics
ME 484	Gas Turbines
ME 485	Heating, Ventilation and Air Conditioning
ME 486	Nanotechnology and Nanomaterials
or CE 686	Nanotechnology and Nanomaterials
ME 487	Internal Combustion Engines
ME 488	Introduction to Aerodynamics
ME 489	Vehicle Dynamics
Approved technical electives from other departments - no more than 3 courses from the following:	
ABEN 456	Biobased Energy
CPM 473	Polymer Synthesis
CPM 474	Applied Polymer Science
CPM 475	Coatings' Materials Science
CPM 486	Corrosion and Materials
CSCI 485	Autonomous Command and Artificial Intelligence for Robots and Other Cyber-Physical Systems
ECE 485	Biomedical Engineering
ECE 487	Cardiovascular Engineering
ECE 488	Cardiovascular Engineering II
ENGR 310	Entrepreneurship for Engineers and Scientists
IME 430	Process Engineering
IME 431	Production Engineering
IME 432	Composite Materials Manufacturing
IME 440	Engineering Economy
IME 450	Systems Engineering and Management
IME 460	Evaluation of Engineering Data
IME 485	Industrial and Manufacturing Facility Design
PHYS 350	Modern Physics
PHYS 361	Electromagnetic Theory
PHYS 485	Quantum Mechanics I

## Degree Requirements and Notes

- A student must complete at least 60 semester credits of professional level course work in his/her program while in residence and enrolled in the college. Students transferring into the college from programs with professional accreditation are exempt from this residency requirement but are subject to the residency requirement of NDSU.
- No grades less than 'C' will be accepted to fulfill a degree requirement.
- No more than nine credits of approved technical electives may be taken outside the ME department.
- Admission to the Mechanical Engineering Professional program requires a minimum 2.70 engineering GPA and a minimum 2.50 cumulative GPA.
- A 2.50 cumulative GPA is required for graduation requirements.

### Degree Notes:

- No grade less than 'C' is accepted to fulfill any of the degree requirements.
- Admission to the dual major requires a minimum 2.70 GPA
- A 2.50 cumulative GPA is required for graduation.

## Medical Laboratory Science

### Department Information

- **Department Location:**  
Sudro Hall
- **Department Phone:**  
701-231-8713
- **Department Web Site:**  
[www.ndsu.edu/alliedsciences/](http://www.ndsu.edu/alliedsciences/)
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/medical-laboratory-science/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/medical-laboratory-science/)

Medical laboratory scientists use analytical procedures and complex instruments to perform tests on blood and body fluids that assist physicians in patient diagnosis and treatment, disease monitoring and prevention. Because the tests performed are so vital in medical treatment, the medical laboratory scientist must know how to perform these tests with scientific precision and accuracy, but also be well educated in the underlying scientific principles and clinical significance of the results.

## Background Information

Laboratory work plays a vital role in the daily routine of the medical laboratory scientist and, while usually not having direct contact with patients, the MLS enjoys being a vital member of the health care team. Clinical chemistry, hematology, microbiology, urinalysis, immunohematology and immunology are the principle areas of practice in the medical laboratory. In addition to laboratory testing and analysis, a medical laboratory scientist may also monitor test quality, supervise personnel, conduct research and develop new tests and methodologies.

## Career Opportunities

Certified medical laboratory scientists may readily find employment throughout the country in hospitals, medical and diagnostic laboratories, and other healthcare services. According to the U.S. Department of Labor Bureau of Labor Statistics (<https://www.bls.gov/ooh/healthcare/medical-and-clinical-laboratory-technologists-and-technicians.htm>), employment of clinical laboratory workers is expected to grow faster than average for all occupations through 2026. This increase is attributed to growth in the aging population leading to a greater need to diagnose medical conditions through laboratory procedures, as well as, prenatal testing for various genetic conditions which has become increasingly common. Mean annual wages for medical laboratory scientists/technologists was \$62,440 in 2016 ([www.bls.gov/oes/2016/may/oes292011.htm](http://www.bls.gov/oes/2016/may/oes292011.htm)).

## The Program

North Dakota State University's Bachelor of Science degree, major in medical laboratory science, includes three years of academic courses on campus followed by an 11 to 12 month full-time professional-level internship in an affiliated hospital-based school of medical laboratory science. Graduates are eligible to take a national certification exam administered by the American Society for Clinical Pathology Board of Certification (<https://www.ascp.org/content/Board-of-Certification>). NDSU graduates have enjoyed excellent employment opportunities and pass rates on the ASCP BOC exam. To remain certified, medical laboratory scientists must earn continuing education credits.

Students interested in pursuing medical laboratory science should have an interest and aptitude in the sciences, particularly chemistry and biology. College courses include college algebra, biological sciences, microbiology, general, organic and biochemistry and statistics, along with general education courses. Transfer students need to successfully complete a minimum of 20 resident credits at NDSU prior to beginning an internship. The full-time internship consists of classroom and clinical bench instruction in clinical chemistry, hematology, immunohematology, microscopy/urinalysis, microbiology, serology, phlebotomy, education, management, and research methods.

## Internship Admission

Internship application occurs annually in the fall. Pre-MLS students who will have completed all courses on campus by start of the internship and meet grade and grade point average (GPA) requirements may be eligible to apply for the professional-level internship. This internship occurs onsite within an affiliated hospital-based MLS program. NDSU maintains affiliation with seven medical laboratory science programs. These include: Sanford Medical Center (Fargo, ND), Mercy Medical Center (Sioux City, IA), Mercy College of Health Sciences (Des Moines, IA), Methodist Hospital (Omaha, NE), St. Luke's College (Sioux City, IA), St. Luke's Hospital (Cedar Rapids, IA), and Colorado Center for Medical Laboratory Science (Aurora, CO). All affiliated programs are accredited by the National Accrediting Agency for Clinical Laboratory Science. (<https://naaccls.org/Students.aspx>)

Internship admission is selective. Admission criteria are established by each hospital program and generally includes the student's cumulative and science GPA (a minimum of 2.50-3.00 is required and varies by hospital program), courses completed, related experience, references and an interview. In addition, students must comply with criminal background and student conduct requirements. In order to participate in an MLS internship, students must be able to comply with program-designated essential functions, or request reasonable accommodations to meet these essential functions. Requirements include a sound intellect, good motor skills, eye-hand coordination and dexterity, effective communication skills, visual acuity to perform macroscopic and microscopic analyses, or read procedures and graphs, and behavioral skills such as organization, time management and good judgment, even in emergency situations.

It is highly recommended that students interested in the MLS major meet with a medical laboratory science advisor to discuss degree and major requirements, internship admission, and create an individualized plan of study at least one year prior to their anticipated internship application. Information about the profession, curriculum, internship, and advising contacts are available from the NDSU Department of Allied Sciences (<https://www.ndsu.edu/alliedsciences>).

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

First Year

## Major Requirements

### Medical Laboratory Science Major

Degree Type: B.S.

Minimum Degree Credits to Graduate: 120

#### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

#### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		6
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		6
<b>Wellness (W) <sup>†</sup></b>		2
<b>Cultural Diversity (D) <sup>*†</sup></b>		
<b>Global Perspectives (G) <sup>*†</sup></b>		
Total Credits		39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Major Requirements

Code	Title	Credits
<b>Medical Laboratory Science Major Requirements</b>		
CHP 190	Critical Thinking and Academic Success	2
MLS 200	Introduction to Medical Laboratory Science	1
MLS 435	Hematology	2
MLS 496	Field Exp/Internship	30
Professional education (internship) within an accredited affiliated school of medical laboratory science includes the capstone experience.		

**Related Courses Required:**

BIOC 460 & 460L	Foundations of Biochemistry and Molecular Biology I and Foundations of Biochemistry I Laboratory	4
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	4
BIOL 220 & 220L	Human Anatomy and Physiology I and Human Anatomy and Physiology I Laboratory (May satisfy a general education category S)	4
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory (May satisfy a general education category S)	4
BIOL 221 & 221L	Human Anatomy and Physiology II and Human Anatomy and Physiology II Laboratory	4
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory	4
CSCI 114 or CSCI 116	Microcomputer Packages (May satisfy a general education category S) Business Use of Computers	3
MATH 103	College Algebra (or higher level; excluding MATH 104)	3
MICR 350 & 350L	General Microbiology and General Microbiology Lab	5
MICR 463	Clinical Parasitology	2
MICR 460 & 460L	Pathogenic Microbiology and Pathogenic Microbiology Laboratory	5
MICR 470	Basic Immunology	3
MICR 471	Immunology and Serology Laboratory	2
STAT 330	Introductory Statistics (May satisfy a general education category R)	3
ZOO 315 & 315L	Genetics and Genetics Laboratory	4
<b>Select one group of the following:</b>		6-7
Group One:		
CHEM 341 & 341L	Organic Chemistry I and Organic Chemistry I Laboratory	
CHEM 342	Organic Chemistry II	
Group Two:		
CHEM 240	Survey of Organic Chemistry	
BIOC 461	Foundations of Biochemistry and Molecular Biology II	

Total Credits

95-96

**Degree Requirements and Notes**

- All required courses must be completed with a grade of 'C' or above. All students must maintain a semester GPA of 2.0 or above for each semester in the College. A student who fails to meet this standard for two successive or three non-successive semesters may be terminated from enrollment in the College.
- Completion of the prerequisites does not guarantee a student internship. Selection of interns is competitive. Please consult your MLS advisor for more information.

**Microbiology**

## Department Information

- **Department Location:**  
Van Es Hall
- **Department Phone:**

- **Department Web Site:**  
[www.ndsu.edu/micro/](http://www.ndsu.edu/micro/)
- **Credential Offered:**  
B.S.

- **Official Program Curriculum:**

[bulletin.ndsu.edu/undergraduate/program-curriculum/microbiology/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/microbiology/)

Microbiology is a fundamental biological science concerned with bacteria, viruses and other microbes. Some of the most important scientific discoveries have been made by microbiologists. Since 1910, approximately one-third of the Nobel Prizes in medicine and physiology have been awarded to microbiologists. The discipline covers a wide spectrum of specialized interest areas that show how microbes affect human and animal health, agriculture, our environment, food technology and safety, and the biotechnology industry. Microbiology prepares students for a wide range of important career opportunities.

In recent years, the field of microbiology has had a major impact upon virtually all other scientific disciplines. For this reason, students who choose to major in microbiology often minor in biotechnology, chemistry or food safety. Students who choose to major in other fields may find it advantageous to minor in microbiology.

## High School Preparation

Students will find courses in science and mathematics, such as algebra, biology, physics and chemistry, to be very helpful in preparing for a major in microbiology.

## The Curriculum

During the first year, students in microbiology take basic college courses in English, chemistry, biology or zoology and mathematics. The curriculum over the next three years includes advanced courses in microbiology and the life sciences. These courses include pathogenic microbiology, virology, immunology, parasitology, microbial genetics, food microbiology, microbial ecology and bacterial physiology. Students majoring in microbiology can enhance their understanding of applied microbiology and infectious disease by taking courses in epidemiology and food safety offered through other programs.

## The Faculty and Facilities

The teaching faculty offer expertise and experience in nearly all areas of microbiology. Additionally, faculty are active researchers and devoted research mentors. Our undergraduates frequently have opportunities to perform cutting edge research in nationally-funded laboratories.

The Department of Microbiological Sciences, located in Van Es Hall, has well-equipped teaching and research laboratories. Several courses are taught in the dedicated STEM education building, A. Glenn Hill Center.

Qualified upper class students majoring in microbiology may pursue individualized study and research under the supervision of one of the faculty members.

## Post Graduate Opportunities

**Pre-Professional.** The microbiology major is excellent preparation for professional school including medical, veterinary, dental, optometry, and physician assistant programs.

**Graduate School.** The microbiology major emphasizes experiential learning in coursework and research laboratories that provides the foundation to be successful in graduate school.

## Career Opportunities

Graduates may seek employment in the health sciences, biomedical industries, biotechnology, agricultural biosystems, food industries, pharmaceutical industries and government agencies. In these careers, graduates may identify new emerging diseases; develop diagnostic tests, new medicines and vaccines; work in departments of public health or hospital laboratories to ensure a safe food supply; or work in academic or private research laboratories. Microbiologists work in government agencies such as the National Institutes of Health and the Environmental Protection Agency. Many microbiologists are teachers and professors.

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

MICR 499	Special Topics	
Total Credits		16

### Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- Students must earn a 2.50 minimum GPA for the minor with a grade of 'C' or better in the courses used to satisfy the minor requirements.

## Military Science

Department Information

- **Department Location:**  
Bentson Bunker Fieldhouse 103
- **Department Phone:**  
701-231-7575
- **Department Web Site:**  
[www.ndsuarmyrotc.com](http://www.ndsuarmyrotc.com) (<http://www.ndsuarmyrotc.com>)
- **Credential Offered:**  
Minor
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/military-science/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/military-science/)

The North Dakota State University Army Reserve Officers' Training Corps (ROTC) program provides college-trained officers for the Army, Army Reserve and Army National Guard. Army ROTC enhances a student's education. It provides unique educational opportunities by combining leadership and management theory with actual hands-on experience. Army ROTC helps the student to develop leadership skills to include self-discipline, physical stamina and advanced life skills – the qualities basic to success in any worthwhile career.

## Career Opportunities

Students who complete the Army ROTC program may pursue careers as officers in the Army National Guard, Army Reserve, or the active Army. Students selected for active duty will receive a generous salary in excess of \$55,000 per year, with housing and medical benefits, and will have opportunities to travel to assignments throughout the world. Students selected for reserve components receive more than \$10,000 per year and amazing health insurance for attending for drills and annual training while pursuing their civilian careers. More importantly, the professional experience in management and leadership will enhance the student's marketability in any profession, civilian or military.

## Program Description

The Army ROTC program consists of a two-year Basic Course and a two-year Advanced Course. The Basic Course is normally taken during the freshman and sophomore years. During these two years there is no military obligation for non-contracted cadets, and a student may withdraw at any time. Students who have taken Junior ROTC, have active duty military experience, or are currently a member of a Reserve/National Guard unit may receive placement credit for the Basic Course.

[www.ndsu.edu/performingarts/music/](http://www.ndsu.edu/performingarts/music/)
- **Credential Offered:**  
B.A.; B.S.; B.Mus.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/music/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/music/)

North Dakota State University offers the most comprehensive degree programs for music majors in the region and provides outstanding musical opportunities for all NDSU students.

## The Program

The NDSU Challey School of Music features excellent students, faculty, staff and facilities. The program has been continuously accredited by the National Association of Schools of Music since 1970 and has a strong tradition of excellence in ensembles dating back to 1904. Faculty and staff members are committed to providing outstanding musical opportunities for all NDSU students—whether they aspire to be professional musicians or only wish to take advantage of NDSU's many musical opportunities.

## The Faculty

NDSU music faculty members have international credentials in performance, music education and academic studies. All full time faculty members have doctorates in music; adjunct faculty members and graduate students provide additional instruction to achieve a well-balanced program.

## The Degrees

NDSU's Challey School of Music offers the largest variety of degree programs in the region, from liberal arts degrees with emphases in music to professional music degrees at the bachelor's, master's and doctoral levels.

Undergraduate music majors take courses in music theory, music literature, music history, and conducting; receive private lessons on a selected instrument and/or in voice; and participate in a major ensemble. Other courses are selected within chosen areas of concentration. In all programs, applied instrumental or vocal studies develop musicianship and performance ability. Students are accepted for private lessons depending upon demonstrated musical ability and available staff resources.

The Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) in music are liberal arts degrees with an emphasis in music. In addition to a general education core and the music concentration, students complete either a two-year competency in a foreign language or a complementary minor. Students take 18 to 19 credits in music electives.

The Bachelor of Music (B.Mus.) with an option in music education leads to K-12 vocal and instrumental certification for North Dakota public schools, and satisfies basic agreements in the primary area for Minnesota certifications.

The B.Mus. in performance leads to professional performing careers or preparation for graduate school. Students select a concentration in instrumental, vocal or piano studies.

NDSU also offers the Master of Music and the Doctor of Musical Arts degrees.

Further, the School of Music offers a minor in music consisting of 21 credit hours of music classes, including applied study, ensembles, academic studies and electives.

## Career Opportunities

Degree programs in music education prepare students for opportunities as elementary, high school or college teachers, while performance degree students usually seek performing or conducting careers. Graduates often choose careers as professional teachers, instrumentalists or vocalists, and conductors. There are also more general opportunities in various music industries.

## Music Performance Opportunities

All music ensembles are open to any NDSU student without regard to major and provide course credit (generally one semester hour for each group listed). Ensembles are some of the most rewarding experiences in college, and all students with musical interests are encouraged to participate.

The **Gold Star Marching Band** plays for all home NDSU football games and marches in special events during fall semester. The group rehearses three days per week and is open to all students.

The **Concert Choir** meets five days per week, both fall and spring semesters. Open by audition, the group tours regionally or nationally on an annual basis and to European countries every three years.

The **NDSU Wind Symphony** is NDSU's large concert ensemble for wind and percussion instruments. Members meet both fall and spring semesters and tour annually. Open by audition.

A smaller ensemble, **Madrigal Singers**, performs repertoire from the renaissance through contemporary periods. This auditioned group meets two days per week fall and spring semesters and produces the annual Madrigal Dinners in December. Members are auditioned from Concert Choir.

The **Jazz Ensembles** are two jazz big bands, generally of about 20 musicians each. Ensembles meet two times per week fall and spring semesters. Open by audition.

In **Opera Theatre**, opera scenes are rehearsed and produced each semester. This auditioned group meets three times per week. The School of Music traditionally produces a fully staged opera or musical every year in the spring semester.

A second concert band, **University Band** is open to all students by audition for section placement. University Band meets three times per week and has two concerts. The **University Symphony Orchestra** performs four concerts per year.

The **University Chamber Singers** is an auditioned mixed choir of students from many different majors and disciplines. They perform a wide variety of music and sing in at least two concerts each semester. There is an audition for this ensemble.

Women performing treble literature from all periods meet three times per week for **Cantemus**, and men sing with the **NDSU Statesmen**. There is no audition for these ensembles.

Chamber ensembles include the percussion ensemble, brass ensemble, brass chamber ensembles, woodwind chamber ensembles (including flute quartets, clarinet ensembles, saxophone quartets and mixed woodwinds), vocal chamber ensembles, piano chamber ensembles and jazz combos.

## The Curricula

Music degree programs vary because of the numerous options available. All music degrees, however, feature a general core of music classes that includes applied lessons, ensembles, supportive music courses, academic music studies and electives. Curriculum guides are available online and from the School of Music.

## Plans of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Degree Requirements and Notes

- Music majors may not declare a music minor.
- A grade of 'C' or better is required in all MUSC prefix courses.
- Arts, Humanities and Social Sciences College Requirements: An additional 9 credits are required by the College of Arts, Humanities and Social Sciences for all Bachelor of Science and Bachelor of Arts degree programs of study, except the Bachelor of Fine Arts degree, the Bachelor of Music degree, Bachelor of Landscape Architecture degree, and the Bachelor of Science in Architecture degree
- Bachelor of Science (B.S) Degree - The completion of a minor program of study, a second major, or a second degree is required.
- Bachelor of Arts (B.A.) Degree - Second year language proficiency at college level required.
- MUSC 189 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take MUSC 189.
- B.A./B.S. Recital Capstone or Individual Study Capstone is fulfilled by registration in MUSC 380 Recital, MUSC 480 Recital, or MUSC 494 Individual Study. The MUSC 494 Individual Study registration is approved by the music faculty and supervised by the adviser. Possibilities include:
  - Half (MUSC 380 Recital) or full (MUSC 480 Recital) recital with program notes.
  - Approved research project on a topic related to music; requires a formal written document (MUSC 494 Individual Study).
  - Approved internship, such as directing an ensemble (e.g. church choir), teaching at the NDSU Academy, observed regularly by the advisor, with a formal written document of the experience (MUSC 494 Individual Study).
  - Approved "lecture recital" with a formal presentation. Lecture recital should be at least the same length as a half recital (MUSC 494 Individual Study)
  - Performance or major opera role or a major solo with ensemble in a formal concert, accompanied by a summary document (MUSC 494 Individual Study)

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<sup>1</sup> MUSC 189 is only required for first-time, first-year students. A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take MUSC 189.

\* Music majors may not declare a music minor.

## Music

### Department Information

- **Department Location:**  
Reineke Fine Arts Center
- **Department Phone:**  
701-231-7932
- **Department Email:**  
ndsuhperforming.arts@ndsuh.edu
- **Department Web Site:**  
[www.ndsu.edu/performingarts/music/](http://www.ndsu.edu/performingarts/music/)
- **Credential Offered:**  
B.S.; B.A.; B.Mus.
- **Plan Of Study Sample:**  
[bulletin.ndsu.edu/programs-study/undergraduate/music/](http://bulletin.ndsu.edu/programs-study/undergraduate/music/)

## Major Requirements

### Major: Music

**Degree Type: B.A. or B.S.**

**Minimum Degree Credits to Graduate: 122**

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12

\* May be satisfied by completing courses in another General Education category.

<sup>†</sup> General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Arts, Humanities, and Social Sciences

### Degree Requirements

**Bachelor of Science (B.S.) Degree** – The completion of a minor program of study, a second major, or a second degree is required.

**Bachelor of Arts (B.A.) Degree** – Second year language proficiency at college level required.

### Arts, Humanities and Social Sciences College Requirements

An additional 9 credits are required by the College of Arts, Humanities and Social Sciences for all Bachelor of Science and Bachelor of Arts degree programs of study, except the Bachelor of Fine Arts degree, the Bachelor of Music degree, the Bachelor of Science in Architecture degree, and the Bachelor of Science degree with a major in Environmental Design:

Code	Title	Credits
<b>AH&amp;SS College Requirements</b>		
Courses used to satisfy any general education requirement cannot be used to also count toward the AH&SS College Requirements. A minimum of three credits is required in each of the 3 following areas for a total of 9 credits. Choose only those courses with the prefixes listed for each area. A course with the WGS prefix can only be used in one area.		
<b>Area One: Humanities</b>		3
ARB, ENGL, FREN, GERM, HIST, HUM, PHIL, RELS, SPAN, or WGS		
<b>Area Two: Social Sciences</b>		3
ANTH, CJ, COMM, EMGT, POLS, SOC, or WGS		
<b>Area Three: Fine Arts</b>		3
ARCH, ART, ENVD, LA, MUSC, or THEA		
Total Credits		9

## Major Requirements

A grade of 'C' or better is required in all MUSC prefix courses.

MUSC 306	Concert Choir	
<b>Music Electives or Emphasis Courses</b>		<b>15</b>
Performance Attendance: Must enroll for 5 different semesters		
MUSC 180	Performance Attendance	0
Total Credits		57

- <sup>1</sup> MUSC 189 is only required for first-time, first-year students—A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take MUSC 189.
- <sup>2</sup> B.A./B.S. Recital Capstone or Individual Study Capstone is fulfilled by registration in MUSC 380 Recital, MUSC 480 Recital, or MUSC 494 Individual Study. The MUSC 494 Individual Study registration is approved by the music faculty and supervised by the adviser. Possibilities include:
- Half (MUSC 380 Recital) or full (MUSC 480 Recital) recital with program notes.
  - Approved research project on a topic related to music; requires a formal written document (MUSC 494 Individual Study).
  - Approved internship, such as directing an ensemble (e.g. church choir), teaching at the NDSU Academy, observed regularly by the advisor, with a formal written document of the experience (MUSC 494 Individual Study).
  - Approved "lecture recital" with a formal presentation. Lecture recital should be at least the same length as a half recital (MUSC 494 Individual Study)
  - Performance or major opera role or a major solo with ensemble in a formal concert, accompanied by a summary document (MUSC 494 Individual Study)

## Degree Requirements and Notes

- Music majors may not declare a music minor.

## Major Requirements

### Major: Music - Instrumental Performance

**Degree Type: B.Mus.**

**Minimum Degree Credits to Graduate: 128**

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

<b>Minor Ensemble: Select 4 credits from the following:</b>		4
MUSC 215	University Chamber Singers	
MUSC 317	Madrigal Singers	
MUSC 319	Opera Workshop	
Or as approved by adviser		
<b>Performance Attendance: Must enroll for 5 different semesters</b>		
MUSC 180	Performance Attendance	0
Total Credits		103

<sup>1</sup> MUSC 189 is only required for first-time, first-year students—A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take MUSC 189.

## Degree Notes

- Music majors may not declare a music minor.

## Minor Requirements

### Minor: Music

#### Minor Requirements

Required Credits: 20

Code	Title	Credits
<b>Required Courses</b>		
MUSC 103	Introduction to Music History	3
MUSC 130	Theory and Analysis I	3
MUSC 131	Theory and Analysis II	3
MUSC 132	Ear Training & Sight Singing I	1
MUSC 133	Ear Training & Sight Singing II	1
<b>Applied Study Electives</b>		2
<b>Major Ensemble Electives</b>		2
<b>Electives</b>		5
Total Credits		20

## Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.

## Music Education

### Department Information

- **Department Location:**  
Reineke Fine Arts Center
- **Department Phone:**  
701-231-7932
- **Department Email:**  
ndsu.performing.arts@ndsu.edu
- **Department Web Site:**  
[www.ndsu.edu/performingarts/music/](http://www.ndsu.edu/performingarts/music/)
- **Credential Offered:**  
B.Mus.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/music-education/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/music-education/)

The **Bachelor of Music in Music Education** (B.Mus.) includes certification requirements for students to teach music in North Dakota's public schools. Students will be certified to teach K-12 after completing all requirements from the music education curriculum and ND state licensure. Though the degree contains comprehensive preparation, students generally elect a principal area in either instrumental or voice/choral.

## Certification in Music Education

Students must complete the School of Education (<https://www.ndsu.edu/education>) requirements, complete the common core music requirements, complete either the vocal or instrumental emphasis and pass a piano proficiency examination prior to student teaching. Piano credit requirements may be waived in whole or in part upon successful completion of the piano proficiency examinations. Specific general education requirements, School of Education requirements, and other information may be obtained from the Division of Performing Arts (<https://www.ndsu.edu/performingarts>) office.

## Ensembles

The NDSU Challey School of Music sponsors a large variety of ensembles including the NDSU Wind Symphony, Concert Choir, University Symphony Orchestra, Madrigal Singers, two large Jazz Ensembles, Jazz Combos, the Gold Star Marching Band, Brass Ensemble, University Chamber Singers, NDSU Statesmen, Cantemus, University Band, Bison Pep Bands, NDSU Opera Theatre, and chamber ensembles in typical instrumental and vocal combinations. The Concert Choir, Wind Symphony, Jazz Ensemble, Madrigal Singers and several other groups have touring programs, some of which are national or international in scope. Participation in these ensembles is open to all students, some by audition and some as open-enrollment ensembles.

## Music Curricula

Requirements are grouped by degree. Please refer also to graduation requirements listed in the Academic Policies (p. 66) section of this publication. The information in this Bulletin may be superseded by information updated regularly and provided by the Challey School of Music.

### instrumental music education

9 Semester Plan of Study for Students entering in EVEN Fall.

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Major Requirements

### Major: Music Education - Instrumental Music Track

Degree Type: B.Mus

Minimum Degree Credits to Graduate: 143

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

- \* May be satisfied by completing courses in another General Education category.
- † General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Major Requirements

- A grade of 'C' or better is required in all MUSC prefix courses.

**Instrumental Track Requirements**

Major Instrumental Ensemble: Must enroll in MUSC 303 Wind Symphony for 5 semesters and MUSC 111 Marching Band for 2 semesters.		7
MUSC 303	Wind Symphony	
MUSC 304	University Symphony Orchestra (for string majors)	
MUSC 111	Marching Band	
Minor Ensembles: Must enroll in 2 different semesters as approved by adviser. May be selected from the following ensembles:		2
MUSC 112	University Band	
MUSC 311	Jazz Ensemble	
MUSC 314	Brass Chamber Ensemble	
MUSC 315	Woodwind Chamber Ensemble	
MUSC 316	String Chamber Ensemble	
MUSC 318	Mixed Chamber Ensemble	
MUSC 322	Jazz Combo	
Major Choral Ensemble (Must enroll for 2 different semesters as approved by adviser):		2
MUSC 116	Cantemus	
MUSC 117	Statesmen of NDSU	
MUSC 215	University Chamber Singers	
Applied Voice:		
MUSC 163	Voice Class for Instrumentalists	2
Performance Attendance: Must enroll in the following for 5 different semesters:		
MUSC 180	Performance Attendance	0
Applied Major Instrument: All students enrolled in applied instruction must participate in a major ensemble specific to their area. Two semesters each of 100 level, 200 level, and 300 level. One semester of 400 level. Select from the following:		7
MUSC 165	Applied Piano	
MUSC 168	Applied Wind Instruments	
MUSC 169	Applied Percussion Instruments	
MUSC 170	Applied Upper Strings	
MUSC 171	Applied Lower Strings	
MUSC 172	Applied Guitar	
Applied Piano: Private (MUSC 165) or class (MUSC 160; MUSC 161; MUSC 260; MUSC 261)		4
MUSC 165	Applied Piano (up to 2 semesters with permission)	
MUSC 160	Piano Class I	
MUSC 161	Piano Class II	
MUSC 260	Piano Class III	
MUSC 261	Piano Class IV	

Total Credits

116

<sup>1</sup> MUSC 189 is only required for first-time, first-year students—A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take MUSC 189.

**Proficiency Waiver**

- Piano proficiency exam must be completed before student teaching.
- Piano credit requirements listed may be waived in whole or in part for successful completion of the piano proficiency.
- Piano majors may fulfill this requirement by accompanying or performance on a secondary medium according to the discretion of the student's applied instructor/adviser.

**Degree Requirements and Notes**

- Music majors may not declare a music minor.
- See School of Education (<https://www.ndsu.edu/education>) for admission requirements.

<b>Humanities and Fine Arts (A) <sup>†</sup></b>		<b>6</b>
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		<b>6</b>
<b>Wellness (W) <sup>†</sup></b>		<b>2</b>
<b>Cultural Diversity (D) <sup>*†</sup></b>		
<b>Global Perspectives (G) <sup>*†</sup></b>		
Total Credits		<b>39</b>

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

### Major Requirements

- GPA of 2.75 or better in the teaching specialty is required for placement in student teaching and exit from the program.
- A grade of 'C' or better is required in all MUSC prefix courses.

Code	Title	Credits
<b>Music Core Requirements for Education Majors</b>		
PSYC 111	Introduction to Psychology (May satisfy general education category B)	3
HDFS 230	Life Span Development (May satisfy general education category B)	3
or PSYC 250	Developmental Psychology	
MUSC 103	Introduction to Music History (May satisfy general education category A)	3
MUSC 130	Theory and Analysis I	3
MUSC 131	Theory and Analysis II	3
MUSC 132	Ear Training & Sight Singing I	1

MUSC 133	Ear Training & Sight Singing II	1
MUSC 174	Pronunciation for Singers I	1
MUSC 175	Pronunciation for Singers II	1
MUSC 189	Skills for Academic Success <sup>1</sup>	1
MUSC 230	Theory and Analysis III	3
MUSC 231	Theory and Analysis IV	3
MUSC 232	Ear Training & Sight Singing III	1
MUSC 233	Ear Training & Sight Singing IV	1
MUSC 250	Basic Conducting	2
MUSC 332	Survey of Choral Literature	2
MUSC 340	Music History I	3
MUSC 341	Music History II	3
MUSC 349	Vocal Methods & Pedagogy I	2
MUSC 350	Vocal Methods & Pedagogy II	2
MUSC 351	Instrumental Conducting & Literature	2
MUSC 352	Choral Conducting & Literature	2
MUSC 353	Woodwind Methods I	2
MUSC 355	Brass Methods	2
MUSC 359	Percussion Methods	2
MUSC 380	Recital	1
or MUSC 480	Recital	
MUSC 385	Music Entrepreneurship	3
MUSC 481	Instrumental Music Methods	2
MUSC 482	Choral Music Methods	2
MUSC 483	Elementary Music Methods	2
<b>Professional Education Requirements</b>		
EDUC 321	Introduction to Teaching	3
EDUC 322	Educational Psychology	3
EDUC 451	Instructional Planning, Methods and Assessment	3
EDUC 485	Student Teaching Seminar	1
EDUC 486	Classroom Management for Diverse Learners	3
EDUC 487	Student Teaching	9
EDUC 488	Applied Student Teaching	3
EDUC 489	Teaching Students of Diverse Backgrounds	3
<b>Vocal Track Requirements</b>		
Major Choral Ensemble: Must be taken in 7 different semesters. Select from the following in consultation with adviser:		7
MUSC 116	Cantemus	
MUSC 117	Statesmen of NDSU	
MUSC 306	Concert Choir	
Minor Choral/Vocal Ensemble: Must be taken in 2 different semesters. Select two credits from the following in consultation with adviser:		2
MUSC 215	University Chamber Singers	
MUSC 317	Madrigal Singers	
MUSC 319	Opera Workshop	
Major Instrumental Ensemble: Must be taken in 2 different semesters. Select two credits from the following in consultation with adviser:		2
MUSC 111	Marching Band	
MUSC 112	University Band	
MUSC 303	Wind Symphony	
MUSC 304	University Symphony Orchestra	
MUSC 311	Jazz Ensemble	
Performance Attendance: Must enroll for 5 different semesters		
MUSC 180	Performance Attendance	0
Applied Voice: Must enroll in the following as indicated:		7

MUSC 167	Applied Voice (for 2 semesters)	
MUSC 267	Applied Voice (for 2 semesters)	
MUSC 367	Applied Voice (for 2 semesters)	
MUSC 467	Applied Voice (for 1 semester)	
Students enrolled in applied instruction must participate in a major ensemble specific to applied area.		
Applied Piano: Private (MUSC 165) or class (MUSC 160; MUSC 161; MUSC 260; MUSC 261)		4
MUSC 160 or MUSC 165	Piano Class I (Up to 2 semesters of MUSC 165 with permission) Applied Piano	
MUSC 161	Piano Class II	
MUSC 260	Piano Class III	
MUSC 261	Piano Class IV	
Total Credits		112

<sup>1</sup> MUSC 189 is only required for first-time, first-year students—A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take MUSC 189.

## Proficiency Waiver

- Piano proficiency exam must be completed before student teaching.
- Piano credit requirements listed may be waived in whole or in part for successful completion of the piano proficiency.
- Piano majors may fulfill this requirement by accompanying or performance on a secondary medium according to the discretion of the student's applied instructor/adviser.

## Degree Notes

- Music majors may not declare a music minor.
- See School of Education (<https://www.ndsu.edu/education>) for admission requirements.

## Minor Requirements

### Minor: Music Education

Required Credits: 19

Code	Title	Credits
<b>Required Courses</b>		
MUSC 103	Introduction to Music History	3
MUSC 130	Theory and Analysis I	3
MUSC 131	Theory and Analysis II	3
MUSC 132	Ear Training & Sight Singing I	1
MUSC 133	Ear Training & Sight Singing II	1
<b>Applied Study Electives</b>		2
<b>Major Ensemble Electives</b>		2
<b>Music Education Practicum: Select one of the following:</b>		2
MUSC 481	Instrumental Music Methods	
MUSC 482	Choral Music Methods	
MUSC 483	Elementary Music Methods	
<b>Music Education Methods: Select one from the following:</b>		2
MUSC 349	Vocal Methods & Pedagogy I	
MUSC 353	Woodwind Methods I	
MUSC 355	Brass Methods	
MUSC 359	Percussion Methods	
Total Credits		19

## Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.

## Minor Requirements

### Instrumental Music Education Minor

Required Credits: 19

Code	Title	Credits
MUSC 103	Introduction to Music History	3
MUSC 130	Theory and Analysis I	3
MUSC 131	Theory and Analysis II	3
MUSC 132	Ear Training & Sight Singing I	1
MUSC 133	Ear Training & Sight Singing II	1
MUSC 351	Instrumental Conducting & Literature	2
<b>Instrumental Ensemble: Select 2 credits from the following:</b>		2
MUSC 111	Marching Band	
MUSC 112	University Band	
MUSC 303	Wind Symphony	
<b>Music Education Methods</b>		
MUSC 353	Woodwind Methods I	2
MUSC 355	Brass Methods	2
MUSC 359	Percussion Methods	2
<b>Music Education Practicum</b>		
MUSC 481	Instrumental Music Methods	2
Total Credits		23

## Minor Requirements

### Vocal Music Education Minor

Required Credits: 20

Code	Title	Credits
MUSC 103	Introduction to Music History	3
MUSC 130	Theory and Analysis I	3
MUSC 131	Theory and Analysis II	3
MUSC 132	Ear Training & Sight Singing I	1
MUSC 133	Ear Training & Sight Singing II	1
MUSC 352	Choral Conducting & Literature	2
<b>Choral Ensemble: Select 2 credits from the following:</b>		2
MUSC 116	Cantemus	
MUSC 117	Statesmen of NDSU	
MUSC 215	University Chamber Singers	
MUSC 306	Concert Choir	
<b>Music Education Methods</b>		
MUSC 162	Voice Class	1
MUSC 163	Voice Class for Instrumentalists	2
Music Education Practicum		
MUSC 482	Choral Music Methods	2
Total Credits		20

## Natural Resources Management

Department Information

- **Department Location:**  
Morrill Hall 307A
- **Department Phone:**

701-231-8180

• **Department Web Site:**

[www.ndsu.edu/snrs/](http://www.ndsu.edu/snrs/)

• **Credential Offered:**

B.S., Minor

• **Official Program Curriculum:**

[bulletin.ndsu.edu/undergraduate/program-curriculum/natural-resources-management/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/natural-resources-management/)

With increasing human pressure and a growing need to balance competing demands, we need new and better ways to manage our natural resources. The natural resources management (NRM) undergraduate program gives students flexible and powerful options to pursue their studies. Core courses provide a broad foundation in the biological and physical/earth sciences. Students then choose one of six emphases to further their skills and prepare for a variety of careers.

## THE PROGRAM

The NRM undergraduate program is offered by the School of Natural Resource Sciences (SNRS) at North Dakota State University (NDSU). We are an interdisciplinary program that focuses on the science and management of natural resources. The program draws upon courses and resources across SNRS, including Entomology, Natural Resource Management, Range Science, and Soil Science, as well as additional programs and colleges across NDSU.

Students in NRM acquire a broad background in natural resources as well as an in-depth study in an area of interest. This exposure to multiple disciplines helps prepare students to find solutions to complex environmental problems. The undergraduate program curriculum is divided into core classes required of all students and an emphasis selected by the individual student from six areas of interest.

**NRM Core** – This group of courses provides each student a broad foundation while satisfying NDSU's General Education requirements.

**NRM Emphasis** – NRM offers six emphasis areas, each with their own combination of course requirements and electives. The emphases allow students to choose courses from a diverse group of approved electives.

- **Entomology** - Entomology is the study of insects and how they interact with people and with the environment. This emphasis area provides a strong scientific foundation with a focus on insects, how they are studied, and their management.
- **Environmental Sustainability, Outreach, and Policy** - Focuses on how to deal with environmental and social changes in a sustainable way. The emphasis area prepares students to work on environmental policy and public outreach combined with strategic thinking to predict sustainable paths on pressing environmental issues.
- **Rangeland Ecology** - Focuses on the broad study of native, non-forested ecosystems that cover more than 50% of the earth's land. These areas are managed as natural ecosystems to provide services that can benefit society. This emphasis area will prepare students by covering a variety of ecological topics including wildlife management, grassland restoration, and fire ecology.
- **Rangeland Livestock Production** - Focuses on the management of rangelands and grasslands for optimum livestock production and environmental benefits for society. Students will cover land management fields, the work of agencies and the private sector, as well as ranching operations.
- **Soil Science** - Soil Science is the study of the soil as a component of natural and man-made systems and is the key factor in food production and is at the forefront of environmental and natural resource issues such as land use, soil contamination, ground water quality and waste disposal.
- **Water, Habitat, and Environmental Management** - Focuses in an interdisciplinary way on the environmental management of ecosystems. This emphasis area teaches basic and hands-on principles in the management of water, habitat (animals and plants), and the environment as a whole.

## THE FACULTY

Our faculty come from across the School of Natural Resource Sciences and are dedicated to providing quality instruction and advising.

## CAREER OPPORTUNITIES

NRM graduates are prepared with the skills and knowledge for facing complex problems in natural resources, agriculture, and the environment. Common career options include natural resources jobs with government agencies at the federal, state, or local level; agricultural, conservation and environmental non-profit organizations, extension and outreach positions, and private sector employment, including consulting in addition to preparation for advanced degrees.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>First Year</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>
BIOL 150 & 150L	4	BIOL 151 & 151L	4
ENGL 110	4	ENGL 120	3
NRM 150	1	Hum. & Fine Arts Elective	3

## Natural Resources Management Emphasis Areas

### Entomology

<b>Code</b>	<b>Title</b>	<b>Credits</b>
BIOL 364	General Ecology	3
BIOL 450	Invertebrate Zoology	3
BIOL 475	Conservation Biology	3
ENT 350	General Entomology	3
ENT 431	Principles of Insect Pest Management	3
ENT 470	Insect Ecology	3
PLSC 110	World Food Crops	3
RNG 450	Range Plants	3
or BIOL 461	Plant Ecology	
or PLSC 380	Principles of Plant Physiology	
Required 6 additional PLSC/SOIL elective credits		6
Required 15 additional elective credits		15
Total Credits		45

**environmental sustainability, outreach, and policy**

<b>Code</b>	<b>Title</b>	<b>Credits</b>
BIOL 364	General Ecology	3
ECON 481	Natural Resource Economics	3
HIST 434	Environmental History	3
or HIST 435	World Environmental History	
NRM 401	Urban-Ecosystem Management	3
NRM 420	Sustainable Scenarios in Natural Resources Management	3
NRM 431	National Environmental Policy Act & Environmental Impact Assessment	3
200-level or higher POLS, SOC, or EMGT		6
Required 26 additional elective credits		26
Total Credits		50

**rangeland ecology**

<b>Code</b>	<b>Title</b>	<b>Credits</b>
ANSC 114	Introduction to Animal Sciences	3
BIOL 364	General Ecology	3
BIOL 452	Ichthyology	3
or BIOL 454	Herpetology	
or BIOL 456	Ornithology	
or BIOL 458	Mammalogy	
BIOL 461	Plant Ecology	3
BIOL 475	Conservation Biology	3
or BIOL 476	Wildlife Ecology and Management	
NRM 431	National Environmental Policy Act & Environmental Impact Assessment	3
NRM 453	Rangeland Resources Watershed Management	3
or NRM 454	Wetland Resources Management	
PLSC 380	Principles of Plant Physiology	3
RNG 450	Range Plants	3
RNG 451	Ecology of Fire-Dependent Ecosystems	3
RNG 456	Ecological Restoration	3
RNG 458	Grazing Ecology	3
SOIL 217	Introduction to Meteorology & Climatology	3
SOIL 351	Soil Ecology	3
or SOIL 410	Soils and Land Use	
or SOIL 444	Soil Genesis and Survey	
Required 9 additional approved elective credits		9
Total Credits		51

**rangeland livestock production**

<b>Code</b>	<b>Title</b>	<b>Credits</b>
ANSC 114	Introduction to Animal Sciences	3
ANSC 220	Livestock Production	3
ANSC 223	Introduction to Animal Nutrition	2

## Major Requirements

### Major: Natural Resources Management

**Degree Type:** B.S.

**Minimum Degree Credits to Graduate:** 120

#### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

#### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		6
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		6
<b>Wellness (W) <sup>†</sup></b>		2
<b>Cultural Diversity (D) <sup>*†</sup></b>		
<b>Global Perspectives (G) <sup>*†</sup></b>		
Total Credits		39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

#### MAJOR REQUIREMENTS

Code	Title	Credits
Required Core Courses for Natural Resources Management:		
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	4
BIOL 151 & 151L	General Biology II and General Biology II Laboratory	4

CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory	4
ECON 201	Principles of Microeconomics (May satisfy general education category B and G)	3
ENGL 321 or ENGL 324 or ENGL 459	Writing in the Technical Professions Writing in the Sciences Researching and Writing Grants and Proposal	3
ENT 210	Insects, Humans and the Environment	3
PHIL 215 or PHIL 225	Contemporary Moral Issues (May satisfy general education category A) Environmental Ethics	3
MATH 103	College Algebra	3
NRM 150	Natural Resource Management Orientation	1
NRM 225	Natural Resources & Agrosystems	3
NRM 421	Environmental Outreach Methods	3
NRM/RNG/SOIL 462	Natural Resource and Rangeland Planning	3
RNG 136	Introduction to Range Management	3
RNG 213	Rangeland Sampling Techniques	3
RNG 452 or GEOG 455	Managing Natural and Rangeland Resources using GIS Introduction to Geographic Information Systems	3
EMGT, POLS, or SOC Elective		3
SOIL 210	Introduction to Soil Science	3
STAT 330	Introductory Statistics	3
<b>Emphasis: Students must select one of the NRM emphasis areas listed below to complete the major requirements.</b>		45-50
Total Credits		100-105

#### NATURAL RESOURCES MANAGEMENT EMPHASIS AREAS

- Declaring an Emphasis- Students should formally declare an emphasis area with the **Office of Registration & Records** no later than the beginning of their junior year. The emphasis area is recorded on the academic transcript with the degree.

#### *Water, Habitat, and Environmental Management Emphasis*

Total Credits 45

### Degree Requirements

- **Acceptable Substitutions:** For the Water, Habitat, and Environmental Management; Environmental Sustainability, Outreach, and Policy; and Entomology emphasis areas there is a list of recommended emphasis electives: **All other substitutions require advisor approval and a substitution form to be completed and submitted to the Office of Registration and Records** (<https://www.ndsu.edu/registrar>). Emphasis area courses may not be double-counted with the NRM core classes; a maximum of 3 credits of Field Experience (396/496) or Co-op Ed (397/497) may be counted as emphasis electives.

## Minor Requirements

### Natural Resources Management Minor

#### Minor Requirements

Required Credits: 18

Code	Title	Credits
<b>Core Course</b>		
NRM 225	Natural Resources & Agrosystems	3
Interdisciplinary Courses: Select 5 of the following:		15
BIOL 364	General Ecology	
BIOL 476	Wildlife Ecology and Management	
ECON 481	Natural Resource Economics	
EMGT 261	Disaster Preparedness	
EMGT 262	Disaster Mitigation	
ENT 350	General Entomology	
GEOL 105	Physical Geology	
GEOL 300	Environmental Geology	
HIST 434	Environmental History	
HIST 435	World Environmental History	
NRM 264	Natural Resource Management Systems	
NRM 401	Urban-Ecosystem Management	
NRM 402	River and Stream Resource Management	
NRM 420	Sustainable Scenarios in Natural Resources Management	
NRM 421	Environmental Outreach Methods	
NRM 431	National Environmental Policy Act & Environmental Impact Assessment	
NRM/RNG 453	Rangeland Resources Watershed Management	
NRM 454	Wetland Resources Management	
NRM 456	Ecological Restoration	
RNG 136	Introduction to Range Management	
RNG 450	Range Plants	
RNG 451	Ecology of Fire-Dependent Ecosystems	
RNG 458	Grazing Ecology	
SOC 405	Community Development	
SOC 431	Environmental Sociology	
SOIL 210	Introduction to Soil Science	
SOIL 351	Soil Ecology	
SOIL 410	Soils and Land Use	
SOIL 433	Soil Ecohydrology and Physics	

**Minor Requirements and Notes:**

- Students must earn a 2.00 minimum GPA in the courses used to satisfy the minor requirements.
- A minimum of 8 credits must be taken at NDSU.

## Neuroscience

## Department Information

- **Department Location:**  
Minard Hall 232
- **Department Phone:**  
701-231-8622
- **Department Web Site:**  
[www.ndsu.edu/psychology/](http://www.ndsu.edu/psychology/)
- **Credential Offered:**  
Minor
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/neuroscience/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/neuroscience/)

Neuroscience is a rapidly expanding field and an undergraduate minor will benefit students studying in many scientific disciplines (e.g., biology; zoology; psychology; chemistry), pre-professional and professional areas (e.g., exercise science; nursing; pharmacy), as well as in the humanities and social sciences. Students learn how the brain and nervous system receives and processes a variety of external and internal information to generate a variety of conscious and unconscious behaviors. Moreover, with an inherent emphasis on critical thinking, a neuroscience minor provides a valuable check on magical or mystical thinking about the human condition. The neuroscience minor may increase students' opportunities either to attend graduate school or to find positions in their professional field.

Courses taken for a Psychology major cannot be used toward a Neuroscience minor. Be sure to officially declare your minor with the Office of Registration and Records (<https://www.ndsu.edu/registrar>) by completing the Minor/Advisor Change Form (<https://www.ndsu.edu/registrar/forms>) which is found online.

### Neuroscience Minor

#### Minor Requirements

Required Credits: 17

Code	Title	Credits
<b>Required Courses</b>		
PSYC 260	Introduction to Neuroscience	3
Electives: Select 14 credits from the following:		
BIOL 220	Human Anatomy and Physiology I	14
BIOL 220L	Human Anatomy and Physiology I Laboratory	
PSYC 322	Judgment & Decision-Making	

PSYC 450	Computational Methods in Experimental Psychology
PSYC 460	Sensation & Perception
PSYC 461	Memory And Knowledge
PSYC 464	Attention & Thinking
PSYC 465	Psychobiology
PSYC 481	Health Psychology
PSYC 486	Neuropsychology
PSYC 493	Undergraduate Research (no more than 6 credits)

Total Credits

17

## Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- Psychology Majors: Classes taken for the psychology major cannot be double-counted with the neuroscience minor. The credits must be unique from courses used to fulfill the psychology major.

## Nursing

### Department Information

- **Department Location:**  
SGC D102
- **Department Phone:**  
701-231-7395
- **Department Web Site:**  
[www.ndsu.edu/nursing/](http://www.ndsu.edu/nursing/)
- **Credential Offered:**  
B.S.N.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/nursing/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/nursing/)

North Dakota State University offers a Bachelor of Science in Nursing (BSN) degree. The professional program is offered at the NDSU Fargo site and NDSU Nursing at Sanford Health in Bismarck. Graduates are eligible to apply for the national licensing examination (NCLEX) to become a registered nurse (RN). The program is fully accredited by the Commission of Collegiate Nursing Education and approved by the North Dakota Board of Nursing.

### The Program

The mission of the School of Nursing is to advance nursing knowledge and develop dynamic nurse leaders who improve the health of all people, emphasizing underserved, rural, and diverse populations. The nursing curriculum prepares professional nurses by providing a sound educational base for practice, graduate study, professional development, and professional and civic responsibility. The nursing program serves as a resource for society through consultation, collaboration, advocacy and scholarship.

### Career Opportunities

Rapid changes in health care and technology require the nursing profession to continually expand its role. Employment forecasts predict an increasing demand for professional nurses. Career opportunities for a nurse with a BSN include positions in hospitals, schools, community agencies, the military, insurance companies, nursing homes, clinics, businesses and research settings. Graduates are prepared to work in a variety of settings that demand critical thinking, autonomy, collaboration and accountability. A four-year BSN degree offers an array of career options and opportunities for career advancement.

### Extra-Curricular Activities

Numerous active student organizations are available at NDSU, including Student Nurses Association chapters in Bismarck and Fargo. Nursing students are strongly encouraged to participate in campus activities because they provide opportunities for teamwork, leadership, service and enjoyment.

### Scholarships

Information on scholarships for students admitted to the major is available from the Office of Financial Aid and Scholarships and the School of Nursing. Information on first year or transfer student scholarships is available from the Office of Admission.

## The Faculty and Facilities

The NDSU BSN program is offered at two locations: the NDSU Fargo site and NDSU Nursing at Sanford Health in Bismarck. At the NDSU Fargo site, you'll find faculty offices and state-of-the art, hands-on nursing education labs in the six-story Aldevron Tower. Additional classrooms are found in Sudro Hall, connected to Aldevron Tower. In Bismarck, the School of Nursing is conveniently located across the street from Sanford Health. The School houses faculty offices, classrooms and fully equipped skills and health assessment labs as well as and an advanced simulation center to enhance student learning. The Fargo-Moorhead and Bismarck communities provide a rich source of health care facilities, which are utilized by the nursing program. The faculty members are experts in specialized clinical practice areas and assist students with learning in the classroom, laboratory and clinical settings.

## Advising

The School of Nursing is part of the College of Health Professions. Pre-nursing advising is available for all students prior to acceptance into the professional program. Each nursing student admitted to the professional program is assigned a nursing faculty advisor who is available for academic guidance, assistance, and career planning. Students are strongly encouraged to seek the assistance of their advisor early in their plan of study and maintain contact on a regular basis.

## Transfer

The pre-professional courses may be completed at NDSU or at another regionally accredited college or university. Transfer students are encouraged to contact a pre-nursing advisor early to discuss course selection and transferability. The pre-licensure professional program, which takes three years to complete, must be taken in sequence and cannot be accelerated due to clinical placements. The LPN-BSN and RN-BSN program, which will take two years to complete, must be taken in sequence and cannot be accelerated.

## Admission to the Pre-Licensure Program

### Direct Admission

Direct admissions is offered to high school seniors who have demonstrated exemplary academic performance. Direct admission is available at both the Bismarck and Fargo site. The selection process begins in spring for the following fall semester. If admitted through direct admission, students will need to maintain established progression criteria during their first year of pre-requisite coursework. Students not admitted through direct admission, or who do not maintain progression requirements, can apply through the standard admission process. Additional information as well as the admission application can be found at [https://www.ndsu.edu/nursing/degrees/pre\\_licensure\\_bsn\\_track/direct\\_admin/](https://www.ndsu.edu/nursing/degrees/pre_licensure_bsn_track/direct_admin/).

### Standard Admission

The School of Nursing in Bismarck accepts applications and admits students for both fall and spring semesters. On the Fargo campus, applications are accepted once per year for students starting the program in both fall and spring. To be eligible for application, students must meet the following requirements: 1) a minimum cumulative grade point average (GPA) of 2.75\* on all college level work, and 2) completion of the prerequisite courses with a grade of "C" or higher. The application deadlines and online application are posted on the School of Nursing website ([www.ndsu.edu/nursing/pre\\_licensure\\_bsn\\_track](http://www.ndsu.edu/nursing/pre_licensure_bsn_track)). Admission is competitive and involves a holistic review process. The holistic review considers a student's life experiences, personal qualities, and attributes as well as traditional measures such as GPA. Students are encouraged to consult with the pre-nursing advisor at their preferred site prior to the application deadline. *\*Because of limitations on class size, the typical student admitted to the nursing program has a selective GPA higher than 2.75.*

## Selected Prerequisite Courses

The selected GPA is calculated based on grades in the following prerequisite courses. (Applicants may have prerequisite courses in progress at the time of application.)

- Communication 110: Fundamentals of Public Speaking
- English 120: College Composition II
- Psychology 111: Introduction to Psychology
- Sociology 110: Introduction to Sociology or Anthropology 111: Introduction to Anthropology

A minimum of 8 credits in the science category (preference will be given to those students who have completed 11 credits or more.)

- Biology 220/220L: Human Anatomy and Physiology I/Lab
- Biology 221/ 221L: Human Anatomy and Physiology II/Lab
- Biochemistry 260: Elements of Biochemistry
- Chemistry 117/117L: Chemistry Concepts and Applications/Lab
- Microbiology 202/202L: Introductory Microbiology/Lab

Note:

- Students should consult their faculty advisor for electives that may enhance their program of study to meet graduation requirements.
- Computer proficiency is expected before beginning the nursing major.
- Disclaimer: The recommended curriculum is subject to change based on nursing program development. Students must consult with their nursing advisor to facilitate progression in the program.

## Advancing to a BSN from a LPN or RN

NDSU offers two tracks for nurses who are licensed as either an LPN or an RN.

The NDSU School of Nursing offers individual, personalized advising to all students prior to and once accepted in the professional programs. NDSU accepts courses from Regional Accredited Colleges and Universities.

### **LPN to BSN:**

The LPN to BSN program is designed for a licensed practical nurse (LPN) who wants to obtain a Bachelor of Science in Nursing. Graduates are then eligible to apply for the national council licensure examination (NCLEX) to become a registered nurse (RN). Coursework in the professional program is completed on a part-time basis (6 nursing credits a semester) over the length of two years (including summers). Courses are delivered online with clinical work completed in a variety of Fargo locations during the summer semesters. The curriculum builds on students' prior knowledge to develop critical thinking, theoretical knowledge, leadership, and growth in the RN professional role.

### ***Admission Requirements for LPN-BSN***

1. Completion of the NLN NACE II (RN-BSN) Exams in the areas of Adult Health, Mental Health, Care of the Child, Care of the Client during Childbearing is required prior to applying to the professional program.
2. Admission to NDSU (it is recommended the application be submitted by Sept. 1st for spring start). Note: Admission to NDSU is not required to complete the validation exams (NACE II exams).
3. Completed Application, which is sent to students after passing all 4 NACE II exams. Application deadline: Oct. 15th.
4. Professional Nursing Program Requirements
  - a. NLN NACE II exams must be completed with passing score prior to applying to the professional program.
  - b. Graduate with a Diploma or Certificate in Nursing or an Associate of Applied Science in Nursing.
  - c. Cumulative GPA of a 2.75 or greater and a Nursing GPA of 3.0 or greater.
  - d. The completion of the following courses with a "C" or higher:
    - Biology 220/2201 & 221/2211: Anatomy and Physiology I and II with lab
    - Microbiology 202/202L: Introduction to Microbiology
    - English 120: College Composition II
    - Communications 110: Fundamentals of Public Speaking
    - Psychology 250: Developmental Psychology
    - Sociology 110: Introduction to Sociology
5. Current unencumbered nursing license as a Licensed Practical Nurse or must be able to obtain license by May and will be admitted on probation pending licensure.

### **RN TO BSN:**

The RN to BSN program is designed for registered nurses who want to advance to a Bachelor of Science in Nursing. The two year program is geared for part-time students. Coursework focuses on the current health care system/environment, quality and safety, evidence-based practice, population-focused nursing, leadership and chronic health issues. The program is intended to educate nurses to practice with a transformed perspective, having a better understanding of themselves and the complex environment in which nurse's work.

### ***Admission Requirements for RN-BSN***

1. Admission to NDSU.
2. Completion of an associate degree in nursing or an associate of applied science degree in nursing.
3. Current unencumbered nurse license (RN).
4. Cumulative GPA of 2.75.
5. Transcripts from all post-secondary schools attended.
6. Completed School of Nursing application including personal statement and background check.
7. Interview upon request.

### **Demonstrated Competency Credits for RN-BSN**

- 18 demonstrated competency credits will be awarded upon completion of the first semester to students who have earned an Associates of Applied Science Degree.
- 25 demonstrated competency credits will be awarded upon completion of the first semester to students who have earned an Associates of Science Degree.

## Plans of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Major Requirements

### Major: Nursing - Pre-Licensure Track

Degree Type: B.S.N.

Minimum Degree Credits to Graduate: 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12

SOC 110 or ANTH 111	Introduction to Sociology (May satisfy a general education category B) * Introduction to Anthropology	3
Total Credits		98

\* Will be used in the selective GPA calculation for admission to the Professional Nursing program. Grades for three of the five sciences (lecture/lab) will be used for selective GPA.

<sup>1</sup> CHP 190 is required for students with fewer than 24 earned transfer credits.

## Degree Requirements and Notes

- Students must maintain a semester GPA of 2.0 or above for each semester in the College of Health Professions (CoHP). A student who fails to meet this standard for two successive or three non-successive semesters may be terminated from enrollment in the CoHP.
- Would also accept the following course sequence in place of CHEM 117 Chemical Concepts and Applications/CHEM 117L Chem Concepts and Applications Lab: CHEM 121 General Chemistry I/CHEM 121L General Chemistry I Laboratory, CHEM 122 General Chemistry II/CHEM 122L General Chemistry II Laboratory or CHEM 121 General Chemistry I/CHEM 121L General Chemistry I Laboratory and CHEM 140 Organic Chemical Concepts and Applications.
- Would also accept the following course sequence in place of Psychology 250: HDFS 230, HDFS 320, and HDFS 340.

## Major Requirements

### Major: Nursing - LPN to BSN Track

Degree Type: B.S.N.

Minimum Degree Credits to Graduate: 120

## University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

#### Requirements and Degree Notes:

- Students must maintain a semester GPA of 2.0 or above for each semester in the College of Health Professions (CoHP). A student who fails to meet this standard for two successive or three non-successive semesters may be terminated from enrollment in the CoHP.
- Courses will be offered in 8 week blocks
- 60 credits toward degree must be earned from a four-year degree granting institution
- 36 credits must be earned in residence at NDSU
- 18 demonstrated competency credits will be awarded upon completion of the first semester to students who have earned an Associates of Applied Science Degree
- 25 demonstrated competency credits will be awarded upon completion of the first semester to students who have earned an Associates of Science Degree

## Pharmacy

### Department Information

- **Department Location:**  
Sudro Hall
- **Department Phone:**  
701-231-7456
- **Department Web Site:**  
[www.ndsu.edu/pharmacy/](http://www.ndsu.edu/pharmacy/)
- **Credential Offered:**  
Pharm.D.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/pharmacy/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/pharmacy/)

The pharmacist is one of the most accessible members of today's health care team. More than 200 million people—nearly two-thirds of our entire population—pass through America's pharmacies each week. At more than 50,000 locations, for most hours of the day, pharmacists are ready to serve the public and address their complete pharmaceutical care needs. The pharmacist traditionally has been the first source of advice and assistance for many health concerns. Today, pharmacists are assuming more responsibility in attempting to better meet the health care needs of society.

### The Program

The North Dakota State University College of Health Professions, and its School of Pharmacy, houses one of more than 130 schools fully accredited by the Accreditation Council for Pharmacy Education (ACPE). The School of Pharmacy offers a six-year professional degree program leading to the Doctor of Pharmacy (Pharm.D.). The School of Pharmacy is a member of the American Association of Colleges of Pharmacy.

### Pharmaceutical Care

The profession of pharmacy has embraced a practice philosophy called pharmaceutical care. Specifically, pharmaceutical care is defined as commitment of the pharmacist to design, implement and monitor patient drug therapy for the purpose of achieving optimal therapeutic outcomes with the ultimate goal of improving the patient's quality of life.

The NDSU School of Pharmacy has developed an emphasis of pharmaceutical care within its curriculum and strives to prepare pharmacy students for their future practices in delivering this contemporary practice philosophy. The curriculum develops skills in pharmaceutical care and emphasizes critical thinking, communication skills, awareness of ethical and social responsibilities, and lifelong self-learning ability.

### Career Preparation

Pharmacists today are responsible for ensuring the rational, safe and cost-effective use of drugs. Pharmacist duties include: participating in the drug use decision-making process, establishing therapeutic goals for each patient, selecting the appropriate drug dosage form, selecting the drug product source of supply, determining the dose dosage schedule, preparing the drug product for patient use, providing the drug product and drug information to the patient, monitoring the patient to maximize compliance, monitoring the patient to detect adverse drug reactions and drug interactions, and monitoring the patient's progress to improve therapeutic outcomes.

Numerous drug therapy problems are recognized and corrected by pharmacists in their practices. Pharmacists work closely with the prescriber and patient to ensure proper and safe use of medications.

The current professional pharmacy curriculum fully integrates classroom and experiential learning. All pharmacy students participate in experiential learning (introductory pharmacy practice experiences) and in the Thrifty White Concept Pharmacy each year. The Thrifty White Concept Pharmacy Laboratory is a state-of-the-art model pharmacy that allows students to experience all aspects of pharmacy practice in a real-life environment.

### **Career Opportunities**

Employment of pharmacists within the region remains strong and is expected to grow at a steady pace over the next decade. There has been an increased demand for pharmaceutical services by the public as the population ages and as more potent, costly and high risk drugs enter the marketplace. Approximately 60 percent of pharmacists practice in community pharmacies with the remainder employed as hospital pharmacists, managed care specialists, home health care providers, nursing home consultants, research and product development scientists, and teachers in colleges and universities. According to the U.S. Department of Labor Bureau of Labor Statistics (<https://www.bls.gov/ooh/healthcare/pharmacists.htm>), the median salary in 2018 for pharmacists was \$126,120.

### **Selective Admission**

NDSU's pharmacy program consists of two phases, a pre-pharmacy phase and a professional pharmacy phase. The professional program limits enrollment to 85 new students per class. Students may qualify for admission via one of two different paths.

The Early Admissions Pathway (EAP) Program is designed for high achieving high school students who seek an expedited path to the professional program. Students are selected for this path based on their academic credentials (including high school grade point averages and ACT or SAT scores) at the time they apply. Preference is given to North Dakota residents and. Students are evaluated during the spring before they enroll at NDSU as first year students. To be considered, students must be admitted to NDSU and must complete the Early Admissions Pathway (EAP) application along with all the required application fees by February 1st. Students who apply by the deadline will be notified by March 1. If offered conditional acceptance into NDSU's EAP Program, an additional \$125.00 NON-REFUNDABLE fee is required to save the student's spot in the program. Accepted students will then enter into the EAP pre-professional curriculum which includes an expedited set of courses that prepares them for the professional program. During their second pre-pharmacy year, students will complete a supplemental application on PharmCAS. To satisfy ACPE accreditation requirements, students also complete the Pharmacy College Admissions Test (PCAT) and an on-site interview. Transition into the final four years of the professional program is guaranteed as long as students meet all academic and professional requirements as specified by the College of Health Professions at the time of admission and in the conditional admission letter for the early admission path. Students accepted into the "Early Admissions" path, but who fail to meet all academic and professional requirements, are encouraged to apply to the professional program through our traditional path.

The second path is the "traditional" path. Pre-pharmacy students (including transfer students) typically apply for admission to the four-year professional program during the second (or in some cases the third) pre-pharmacy year. Students are selected based on academic performance in pre-pharmacy courses. Preference is given to North Dakota residents and students who attend NDSU. A cumulative grade point average of 3.0 (4.0 = A) or above is required before an applicant will be evaluated for admission to the professional program. The actual admission cutoff typically can be as much higher. The Pharmacy College Admission Test (PCAT) is an admission requirement, as is an on-site interview. Supplemental applications are due on or before December 31 for subsequent fall semester admission. Supplemental applications are submitted online directly to the Pharmacy Admissions Committee. A nonrefundable \$125.00 application fee must accompany the supplemental application.

### **Differential Tuition**

Students in the pharmacy professional program (i.e, the final five years of study for students on the early admission path, and the final four years for students on the traditional admission path) are assessed a different tuition rate. This differential tuition is assessed to cover the higher costs associated with the program.

### **Current Curriculum**

The curriculum leading to the Pharm.D. degree requires a minimum of six years of study. Approximately 77 semester hours are required in the pre-professional curriculum. The vast majority of required pre-professional courses (listed by name and number) must be completed by the end of spring term prior to admission to the professional program for traditional path students, or for early admission students, the final four years of the professional program. A maximum of six elective credits may be taken during the summer prior to entrance in the professional program.

The four-year professional program is divided into three years of didactic education on campus and one year (40 weeks) of experiential training (advanced pharmacy practice experience) with qualified preceptors at various practice sites. Additional introductory experiential training occurs during the summer sessions following the first and second years of the professional program, as well as during the third professional academic year. A wide variety of experiential rotation offerings are available to students. Students should plan to travel outside the Fargo-Moorhead area to fulfill their experiential program requirements.

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>Professional Pharmacy P1 &amp; P2 Years</b>		<b>72-76</b>

<sup>1</sup> Curricular plan based on traditional admissions path or early acceptance path. Consult adviser for additional information.

### Selected Core Courses

Selected core courses will be used for selection criteria to determine GPA used in calculation for admission to the professional program. These courses must show evidence of letter grade, or other means of demonstrating acceptable competency (i.e. AP – CEEB) and MUST be completed by the end of fall semester prior to the admissions deadline to apply to the pharmacy program. Remaining courses, which are required and listed in the pre-pharmacy curriculum, MUST be completed by the end of spring term. The only exception to this is that up to six credits of electives may be completed during the summer term.

### Pre-Professional Pharmacy Requirements and Notes

- All courses listed for pre-pharmacy must be complete in order to apply for the professional program in the last spring semester in which pre-requisite courses are taken.

### Degree Requirements and Notes

- All required courses must be completed with a grade of 'C' or above.
- All students must maintain a semester GPA of 2.0 or above for each semester in the College. A student who fails to meet this standard for two successive or three non-successive semesters may be terminated from enrollment in the College of Health Professions.

## Major Requirements

### Major: Doctor of Pharmacy

Degree Type: Pharm.D.

Minimum Degree Credits to Graduate: 147

### Professional Pharm.D. Requirements

The following professional Pharm.D. requirements that follow are subject to change per department. Students follow the curricula developed by the School of Pharmacy and any changes that occur while in the professional program will be communicated to the students by the School of Pharmacy.

In addition to curriculum listed below, 6 credits of Professional Elective MUST be completed PRIOR to P4 year.

Code	Title	Credits
<b>P1 First Year Professional</b>		
MICR 470	Basic Immunology	3
PSCI 367	Pharmaceutical Calculations	1

- All applicants to the NDSU Doctor of Pharmacy program must apply using the PharmCAS admissions website. It is imperative that the NDSU Pharmacy supplemental application be completed and submitted to the NDSU School of Pharmacy by all persons wishing to be considered for acceptance into NDSU's Entry-Level Pharm.D. Program.
- The application deadline can be found on the School of P (<https://www.ndsu.edu/pharmacy>)harmacy website (<https://www.ndsu.edu/pharmacy>).
- PCAT: We do require the PCAT (<http://www.pearsonassessments.com/haiweb/Cultures/en-US/site/Community/PostSecondary/Products/pcat/pcathome.htm>) (Pharmacy College Admission Test). The College requires that students take either the PCAT in July, September, October or November 2020 for students applying for 2021. We will accept PCAT scores from exams taken back three years (July 2017 to November 2020).
- Applicants who are NOT currently NDSU students must submit official transcripts of previous academic work to the University's Admissions Office and one set to the NDSU School of Pharmacy.

- Students not previously enrolled at NDSU must apply both to NDSU and to the School of Pharmacy within College of Health Professions. For an NDSU application (<https://www.ndsu.edu/apply>), contact the Office of Admissions at 701-231-8643. For International students, contact the Office of International Programs at 701-231-7895.

## Philosophy/Humanities

### Department Information

- **Department Location:**  
Minard Hall
- **Department Phone:**  
701-231-8654
- **Department Web Site:**  
[ndsuhprs.org/](http://ndsuhprs.org/) (<http://ndsuhprs.org/>)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/philosophy-humanities/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/philosophy-humanities/)

North Dakota State University offers students a philosophy curriculum that may be approached either as a philosophy-humanities major or minor, or an interdisciplinary philosophy minor.

### The Program

People have always had fundamental questions about the world in which they live. Among a wide variety of practical topics, they wondered about truth, knowledge, morality, goodness, or life's meaning. By means of dialogue, logic, and critical and creative thought, philosophers have trailblazed pathways to wisdom and an understanding of the human condition, which not only helps our students live more fulfilled lives but makes them more competitive in their careers.

### The Faculty

- Dennis Cooley
- Anthony Flood
- John Helgeland (Emeritus)
- Bradley Morris
- Adam Taylor

### The Philosophy-Humanities Major

The philosophy-humanities major consists of 32 semester credits. Of these, the 21 credits are required. 11 elective credits, which can be independent studies, complete the major.

### The Philosophy-Humanities Minor

The philosophy-humanities minor consists of 21 semester credits: 15 required and 6 elective credits from the elective philosophy courses, including independent studies.

### Independent Study

Independent study along the lines of Oxford tutorials may be pursued by students wanting to read on a special philosophical topic (e.g., aesthetics) or read the work of a particular philosopher. To initiate independent study, students must contact a philosophy faculty member.

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Major Requirements

### Major: Philosophy/Humanities

Degree Type: B.A. or B.S.

Minimum Degree Credits to Graduate: 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.

5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		<b>12</b>
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		<b>3</b>
<b>Science and Technology (S) <sup>†</sup></b>		<b>10</b>
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		<b>6</b>
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		<b>6</b>
<b>Wellness (W) <sup>†</sup></b>		<b>2</b>
<b>Cultural Diversity (D) <sup>*†</sup></b>		
<b>Global Perspectives (G) <sup>*†</sup></b>		
Total Credits		<b>39</b>

\* May be satisfied by completing courses in another General Education category.

<sup>†</sup> General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Arts, Humanities, and Social Sciences

### Degree Requirements

**Bachelor of Science (B.S.) Degree** – The completion of a minor program of study, a second major, or a second degree is required.

**Bachelor of Arts (B.A.) Degree** – Second year language proficiency at college level required.

### Arts, Humanities and Social Sciences College Requirements

An additional 9 credits are required by the College of Arts, Humanities and Social Sciences for all Bachelor of Science and Bachelor of Arts degree programs of study, except the Bachelor of Fine Arts degree, the Bachelor of Music degree, the Bachelor of Science in Architecture degree, and the Bachelor of Science degree with a major in Environmental Design:

Code	Title	Credits
<b>AH&amp;SS College Requirements</b>		
Courses used to satisfy any general education requirement cannot be used to also count toward the AH&SS College Requirements. A minimum of three credits is required in each of the 3 following areas for a total of 9 credits. Choose only those courses with the prefixes listed for each area. A course with the WGS prefix can only be used in one area.		
<b>Area One: Humanities</b>		<b>3</b>
ARB, ENGL, FREN, GERM, HIST, HUM, PHIL, RELS, SPAN, or WGS		
<b>Area Two: Social Sciences</b>		<b>3</b>
ANTH, CJ, COMM, EMGT, POLS, SOC, or WGS		
<b>Area Three: Fine Arts</b>		<b>3</b>

### Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.

## Physical Education

#### Department Information

- **Department Location:**  
Katherine Kilbourne Burgum Family Life, 4-H Center
- **Department Phone:**  
701-231-7921
- **Department Web Site:**  
[www.ndsu.edu/education/](http://www.ndsu.edu/education/)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/physical-education/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/physical-education/)

The physical education teacher education (PETE) program provides opportunities for students to become critical thinkers, creative planners and effective practitioners.

## The Physical Education Program

To be successful in the field, a physical education student must like to work with people, be adequately skilled in physical activities, have a commitment to fitness and be interested in the physical, biological and social sciences.

The PETE program emphasizes teaching and provides students with skills and techniques necessary to begin a successful career in K-12 physical education. The PETE program is aligned with the National Standards Guidelines for Physical Education Teacher Education and is accredited by the Council for the Accreditation of Educator Preparation (CAEP). The courses are strategically structured to be sequential in nature.

Students initially take courses through the Department of Health, Nutrition, and Exercise Sciences (HNES) and complete their degree requirements through the School of Education (SOE). Students are admitted upon meeting the criteria established by the SOE. Completing the degree requirements for a physical education degree in the SOE prepares a graduate to become certified to teach physical education from kindergarten through grade 12.

Students majoring in physical education will be studying the art and science of human movement, which includes classes in elementary, middle and high school activities; motor learning, physiology and the psychology of human movement; the art of teaching and motivating students; and an appreciation of the individual differences of all people.

Students may enroll in the 300-level professional education courses before being formally admitted to the SOE. Prior to enrolling in the 400-level EDUC courses, students must complete the application for admission to the SOE; earn required grades in all core physical education courses (as specified in the handbook) and must maintain at least a 2.75 cumulative grade point average to stay in full-standing in the program; and pass the Core Academic Skills for Educators exam(s). Requirements for admission can be found on the School of Education website (<https://www.ndsu.edu/education>).

A graduate leaves prepared to teach in a professional manner, while demonstrating exemplary ethical behavior and displaying current best practices. Graduates are expected to be positive role models for K-12 students in the area of physical education, physical activity and sports.

## Technology in Physical Education

Physical education majors at North Dakota State University are taught how to use and apply heart rate monitors and pedometers in activity settings.

Students will use video cameras and computer software to analyze sport skills and improve teaching effectiveness, K-12 student accountability, and personal reflection.

## Double Major

It is recommended that physical education majors obtain a degree enhancement through a double major. The physical education curriculum has been structured to allow PETE students to obtain a health education major during the same four-year time frame. The acquisition of additional credentials helps to prepare future professionals, giving them a broader area of expertise and making them more marketable. For further information about school health education, please refer to the Health Education Fact Sheet.

## Career Opportunities

Graduates in physical education find career opportunities teaching in public or private educational settings, coaching within the community, athletic programs including coaching at higher education institutions, community sports positions with parks and recreation facilities, and/or local organizations like the YMCA. If interested in coaching at higher education institutions, students are encouraged to maintain a 3.0 GPA to enhance their possibility for acceptance into graduate school to pursue the necessary master's degree required to coach at this level.

### *Plans of Study*

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

Total Credits		80

\* Students must earn a grade of 'B' or better.

## Degree Requirements and Notes

- A GPA of 2.75 or better in the teaching specialty is required to stay in full standing in the program, for placement in student teaching, and to exit from the program.
- A GPA of 2.75 or better in the professional education requirements, as well as passing the Exit Portfolio, are required to exit the program.
- Courses taken *Pass/Fail* will not be used to satisfy any requirements other than total credits.
- See School of Education (<https://www.ndsu.edu/education>) for admission requirements.

**Bachelor of Arts (BA) Degree** – An additional 6 credits of Humanities and Social Sciences and proficiency at the second year in a modern foreign language are required. See School of Education for admission requirements.

## Physics

### Department Information

- **Department Location:**  
South Engineering
- **Department Phone:**  
701-231-8974
- **Department Web Site:**  
[www.ndsu.edu/physics/](http://www.ndsu.edu/physics/)
- **Credential Offered:**  
B.S.; B.A.

- **Official Program Curriculum:**

[bulletin.ndsu.edu/undergraduate/program-curriculum/physics/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/physics/)

Physics is the most fundamental and exact of the physical sciences. Its laws are basic to deep understanding in all of technology, and in many fields of study, such as astronomy, chemistry, engineering, materials science, photonics, biology, medicine, geology, and environmental science. Physicists often end up in a wide range of leadership positions. Notable examples include Jimmy Carter, Elon Musk, Steven Wolfram, Douglas Hofstadter, and Angela Merkel.

## Background Information

The Department of Physics has growing undergraduate and graduate programs. Yet, its size remains comparatively small, allowing personalized interactions between students with all of its 11 faculty members. Not only do students participate in research projects early on, they often become authors in peer-reviewed publications and present their results in the regional and national conferences and workshops. In addition, our students are highly engaged; they regularly participate successfully in the University Physics Competition and contribute actively to various outreach activities.

The Department of Physics has a strong research focus on three fields: materials (especially soft materials), computational physics, and physics education research. While this represents only a small subset of all existing physics fields, our focus makes us competitive and successful on the national level and beyond. Students can choose among a number of curricular options that prepare them for industrial, governmental, and academic careers. The Fargo/Moorhead urban area contains three colleges with a physics program. Courses can be taken in each college through the Tri-College University. This increases the number of available courses to a level typical for large universities only.

## High School Preparation

A prospective physics major is generally expected to have taken physics, chemistry, and mathematics courses. Computer courses can also be useful. Incoming students should normally be ready to start learning calculus. Some of our incoming students have already taken AP courses in physics or mathematics. Note, however, that deficiencies in any of these subjects may be remedied in the freshman or later years at the University.

## Curriculum Options

The most popular curricular option in the Department of Physics is the standard physics major. Also popular are our two double major programs in Physics and Mathematics as well as in Physics and Computer Science. Since fall 2017 we offer a new double major in Electrical and Computer Engineering and Physics. All these programs allow well-prepared students to complete the requirements for both majors in four years by taking advantage of the close connections between physics, mathematics, computer science, and engineering. In addition, we offer a physics major with a focus on optical science and engineering. The optical science and engineering option, which is the only regional program of this type, includes an interdisciplinary optics/photonics sequence of courses taught by the Department of Physics and the Department of Electrical and Computer Engineering using a state-of-the-art optics teaching laboratory. Finally, highly qualified students can earn both a Bachelor's and Master's degree in physics by enrolling into the Accelerated Masters program in their junior year.

All of our physics majors (including the double majors and physics majors with the optical science and engineering option) take introductory courses in classical mechanics, computational physics, electricity and magnetism, optics, thermodynamics, quantum mechanics, and modern physics, as well as selected specialized courses such as photonics, lasers, or condensed matter physics. In addition, all physics majors get involved in research projects with faculty, typically in fields like materials (including bio- and polymer physics), computational physics, and physics education research. Two dedicated courses allow students to receive credit for their research efforts. Any of our curriculum options prepares students for graduate work in physics or related fields and subsequent employment in industry, government, or academia. Physics graduates have excellent job perspectives because they are widely valued as creative and persistent problem solvers who are often able to step into leadership positions.

## Career Opportunities

A great variety of employment opportunities exist for physics majors who wish to pursue careers after obtaining a bachelor's degree. Some find positions in industry or government. Many technical industries seek physics graduates for work in software development, engineering, science and lab technician positions, management and sales. According to the results of the National Association of Colleges and Employers Winter 2016 Salary Survey, physics majors were expected to receive an average starting salary of \$65,250.

As technology continues to develop, there will be a need for skilled people to make new discoveries in the basic sciences. Because of this, talented physics majors are encouraged to pursue the doctoral degree. Outstanding doctoral graduates in physics find research and teaching positions in universities or employment in government laboratories and research-oriented industries.

An education in physics is so fundamental that it provides an excellent preparation for graduate education in nearly every technical field, including engineering. Additionally, North Dakota State University graduates in physics have entered medical schools and have studied law. One past graduate received a doctorate in biophysics and now works at the University of Minnesota Medical School; another is at the Mayo Clinic in Rochester, Minn. Some of our recent graduates worked on advanced degrees in biomedical engineering, chemical physics, electrical engineering, solid-state physics, meteorology and radiological science. A number of recent graduates have pursued graduate studies at schools such as Cornell University, Michigan State University, the University of Minnesota, Carnegie Mellon University, Ohio State University, University of Illinois at Chicago, State University of New York Stony Brook, Rutgers University and Northwestern University.

## Financial Aid

Financial aid at NDSU is available in the form of loans, grants, scholarships, and work-study. Students who qualify for federal college work-study may be paid for work on department research projects. Highly qualified students may be hired through the Department of Physics or the College of Science and Mathematics as undergraduate Research Assistants (RA) or Learning Assistants (LA).

## Internships

The Cooperative Education Program provides students the opportunity to earn money and gain valuable experience by spending one or more semesters working in industrial or government laboratories. Internship opportunities include Sanford Medical Center in Fargo and NASA. Students may also apply to participate in research projects through the Department of Physics or Research Experience for Undergraduates program at NDSU or other institutions.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Physics

### Department Information

- **Department Location:**  
South Engineering
- **Department Phone:**  
701-231-8974
- **Department Web Site:**  
[www.ndsu.edu/physics/](http://www.ndsu.edu/physics/)
- **Credential Offered:**  
B.S.; B.A.
- **Plan Of Study Sample:**  
[bulletin.ndsu.edu/programs-study/undergraduate/physics/#planofstudytext](http://bulletin.ndsu.edu/programs-study/undergraduate/physics/#planofstudytext)

## Major Requirements

### Major: Physics - Standard

Degree Type: B.A. or B.S.

Minimum Degree Credits to Graduate: 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12

PHYS 355	Classical Mechanics	3
PHYS 360	Modern Physics II	3
PHYS 361	Electromagnetic Theory (or PHY 370: Electromagnetic Theory from MSUM)	3
PHYS 370	Introduction to Computational Physics	3
PHYS 411 & 411L	Optics for Scientists & Engineers and Optics for Scientists and Engineers Lab	4
PHYS 462	Thermal and Statistical Physics	3
PHYS 485	Quantum Mechanics I	3
PHYS 486	Quantum Mechanics II	3
PHYS 488	Senior Project I	1
PHYS 489	Senior Project II	2
Physics Electives: Select two from the following:		6
PHYS 215	Research For Undergraduates	
PHYS 413	Lasers for Scientists and Engineers	
PHYS 415	Elements of Photonics	
PHYS 463	Statistical Mechanics	
PHYS 481	Condensed Matter Physics	
MSUM AST	Astronomy courses (300/400 level) with departmental approval	
<b>Related Required Courses</b>		
CSCI 160 or ECE 173	Computer Science I Introduction to Computing	4
CSCI 161	Computer Science II	4

MATH 129 or MATH 329	Basic Linear Algebra Intermediate Linear Algebra	3
MATH 165	Calculus I (May satisfy general education category R)	4
MATH 166	Calculus II	4
MATH 265	Calculus III	4
MATH 266	Introduction to Differential Equations	3
MATH Electives - Select 6 credits from the following:		6
MATH 270	Introduction to Abstract Mathematics	
MATH 400 Level (MATH 488 & MATH 489 are recommended)		
Select one of the following chemistry sequences (150/160 is recommended):		4
CHEM 150 & CHEM 160	Principles of Chemistry I and Principles of Chemistry Laboratory I	
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory	
Select one of the following chemistry sequences (151/161 recommended):		4
CHEM 151 & CHEM 161	Principles of Chemistry II and Principles of Chemistry Laboratory II	
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory	
Total Credits		90

## Program Notes

- Except for courses offered only as pass/fail grading, no course may be taken Pass/Fail.

## Major Requirements

### Major: Physics with Optical Science and Engineering Option

Degree Type: B.A. or B.S.

Minimum Degree Credits to Graduate: 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

PHYS 251L	University Physics I Laboratory	
PHYS 251R	University Physics I Recitation	
PHYS 252R	University Physics II Recitation	
PHYS 215	Research For Undergraduates	
Any 300-400 level Physics course		
ME 221 and ME 222 may be substituted for PHYS 251 and PHYS 251L		
Total Credits		19

### Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.

# Physics Education

## Department Information

- **Department Location:**  
Katherine Kilbourne Burgum Family Life, 4-H Center
- **Department Phone:**  
701-231-7921
- **Department Web Site:**  
[www.ndsu.edu/education/](http://www.ndsu.edu/education/)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/physics-education/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/physics-education/)

Physics is the most fundamental and exact of the physical sciences. Its laws are basic to deep understanding in all of technology, and in many fields of study, such as astronomy, chemistry, engineering, materials science, photonics, biology, medicine, geology, and environmental science.

## The Program

Candidates in the Physics Education major are prepared to teach a diverse curriculum to a diverse student population. The physics education student should work closely with an advisor to be sure that the general education courses taken will provide a strong foundation for the advanced courses in the major.

## Professional Education Courses

Students may enroll in the 300-level professional education courses before being formally admitted to the School of Education (SOE). Prior to enrolling in the 400-level courses, students must complete the application for admission to the SOE; attain a minimum of a 2.75 grade point average overall in their course work and education courses; and pass the Praxis Core Academic Skills for Educators exam(s). Requirements for admission can be found on the School of Education website (<https://www.ndsu.edu/education>).

## Student Teaching

Student teaching is the culmination of the teaching program. Students have the opportunity to apply skills acquired in college courses under the supervision of an experienced physics educator.

## Student Advisement

Students will be assigned individual advisors who will work closely in program planning and in other ways to advise and assist them. Students are encouraged to seek their advisor's help whenever needed.

## Certification

Upon completing this program, students are eligible for certification to teach physics in most states. The program is accredited by the Council for the Accreditation of Educator Preparation (CAEP).

## Career Opportunities

Students who major in Physics education get hired to teach physical science and physics at the high school level. To expand their choices, students can elect to double major in Physics Education and Physics or take additional science coursework in other disciplines to increase teacher licensure areas. Graduates can also work in industry with the Physics major.

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

First Year			
Fall	Credits	Spring	Credits
ENGL 110 or 120 (or College Composition II based on placement)**	3-4	CHEM 122 & 122L	4
CHEM 121 & 121L	4	MATH 129 or 329	3

## Major Requirements

### Major: Physics Education

**Degree Type:** B.A. or B.S.

**Required Degree Credits to Graduate:** 122

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

EDUC 489	Teaching Students of Diverse Backgrounds	3
Total Credits		107

## Degree Requirements and Notes

- See School of Education (<https://www.ndsu.edu/education>) for admission requirements.
- Courses taken P/F may not be used to satisfy any requirements.
- A grade of 'C' or better is required in all professional education courses.

- To be placed in student teaching, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required.
- To exit the program, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required as well as completing the Praxis Subject test and the Principles of Learning and Teaching test.

## Political Science

### Department Information

- **Department Location:**  
Putnam Hall
- **Department Phone:**  
701-231-8567
- **Department Web Site:**  
[www.ndsu.edu/cjps/](http://www.ndsu.edu/cjps/)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/political-science/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/political-science/)

Political science is the study of politics, public policy, government and related topics. This includes the investigation of political behavior, international relations, law, and political values. The coursework in political science provides students with knowledge and understanding of how government and politics affect their everyday lives and ultimately prepares students for careers in a variety of politics- or government-related professions.

### The Program

The political science program at North Dakota State University offers a number of avenues for the study of government. The curriculum in political science ensures that students graduate with a solid knowledge of key political science subfields, including American government and institutions, the legal system and Constitutional law, international relations, and comparative politics. In addition to the many course offerings available at NDSU, students can draw upon many additional courses through Tri-College University (a consortium of NDSU, North Dakota State College of Science, Minnesota State Community and Technical College, Minnesota State University Moorhead and Concordia College). The urban center of Fargo-Moorhead enables students to observe and participate in metropolitan judicial and governmental affairs.

### Internship/Field Experience

The Department of Political Science & Public Policy has been very successful in helping students secure internships in local, state, and federal agencies where they can experience first-hand the functioning of government. NDSU students also regularly serve as interns for elected officials from North Dakota and Minnesota.

### Career Opportunities

One out of five persons in the United States today is employed by some level of government. The expansion of the public sector has created a vital need for thoughtful and active people who are professionally trained in government and in political science. The type of jobs available to NDSU political science graduates include policy analyst, budget analyst, lobbyist, legislative aide, state or federal program administration, city/county administration, positions in non-profit organizations, diplomatic service, and other careers.

Political science students also regularly go on to attend law school and then pursue a legal profession. NDSU political science students have attended law schools such as the University of North Dakota, the University of Minnesota, the University of Michigan, the University of Washington, Northwestern University, Duke, and George Washington University. Still other NDSU political science students may elect to go on for graduate study in political science, public policy, or public administration and pursue advanced careers in public administration, regional planning, as researchers at think tanks, or as academicians.

### Extra-Curricular Activities

The Department of Political Science & Public Policy works closely with the Pre-Law Club, which is designed to provide students with information about law schools, entrance examinations and career opportunities in the field of law.

### The Faculty

Thomas Ambrosio, Professor, Ph.D., 2000, University of Virginia

Nicholas Bauroth, Professor, Ph.D., 2003, Loyola University

Ethan Boldt, Assistant Professor, Ph.D. 2019, University of Georgia

Sarah Boonstoppel, Assistant Professor, Ph.D., 2014, University of Maryland

Steven Briggs, Associate Professor, Ph.D., 2007, University of Nebraska -- Omaha

Kjersten Nelson, Associate Professor, Ph.D., 2009, University of Minnesota

Daniel Pemstein, Associate Professor, Ph.D., 2010, University of Illinois at Urbana-Champaign

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>First Year</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>

## Major Requirements

### Major: Political Science - Standard

**Degree Type:** B.A. or B.S.

**Minimum Degree Credits to Graduate:** 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		6
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		6
<b>Wellness (W) <sup>†</sup></b>		2
<b>Cultural Diversity (D) <sup>*†</sup></b>		
<b>Global Perspectives (G) <sup>*†</sup></b>		
Total Credits		39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Arts, Humanities, and Social Sciences

### Degree Requirements

**Bachelor of Science (B.S.) Degree** – The completion of a minor program of study, a second major, or a second degree is required.

**Bachelor of Arts (B.A.) Degree** – Second year language proficiency at college level required.

### Arts, Humanities and Social Sciences College Requirements

An additional 9 credits are required by the College of Arts, Humanities and Social Sciences for all Bachelor of Science and Bachelor of Arts degree programs of study, except the Bachelor of Fine Arts degree, the Bachelor of Music degree, the Bachelor of Science in Architecture degree, and the Bachelor of Science degree with a major in Environmental Design:

Code	Title	Credits
<b>AH&amp;SS College Requirements</b>		
Courses used to satisfy any general education requirement cannot be used to also count toward the AH&SS College Requirements. A minimum of three credits is required in each of the 3 following areas for a total of 9 credits. Choose only those courses with the prefixes listed for each area. A course with the WGS prefix can only be used in one area.		
<b>Area One: Humanities</b>		3
ARB, ENGL, FREN, GERM, HIST, HUM, PHIL, RELS, SPAN, or WGS		
<b>Area Two: Social Sciences</b>		3
ANTH, CJ, COMM, EMGT, POLS, SOC, or WGS		
<b>Area Three: Fine Arts</b>		3
ARCH, ART, ENVD, LA, MUSC, or THEA		
Total Credits		9

### Major Requirements

Code	Title	Credits
<b>Core Requirements</b>		
POLS 110 or POLS 115	Introduction to Political Science (May satisfy general education category B) American Government	3
POLS 220 or POLS 225	International Politics Comparative Politics	3
POLS 240	Political Ideologies	3
POLS 325 or CJ 325	Applied Research Methods Applied Research Methods	4
POLS 489	Senior Seminar	3
STAT 330	Introductory Statistics (May satisfy general education category R)	3
<b>Select a minimum of one course from each of the four areas listed below:</b>		12
Area 1:		
POLS 420	Political Behavior-Executive-Legislative Process	
POLS 421	Political Behavior-Political Parties	
POLS 422	State and Local Politics	
POLS 423	Public Policy Analysis	
Area 2:		
POLS 430	Constitutional Law-Civil Liberties	
POLS 431	Constitutional Law-Criminal Justice	
Area 3:		
POLS 442	Global Policy Issues	
POLS 444	International Law	
POLS 445	Ethnic Conflicts	
POLS 453	Environmental Policy and Politics	
POLS 446	International Criminal Law	
Area 4:		
POLS 442	Global Policy Issues	
POLS 450	Politics of the Developing Countries	

POLS 451	Politics of the Industrialized Countries	
POLS 452	Comparative Political Economy	
POLS 453	Environmental Policy and Politics	
<b>Political Science Electives: At least 9 credits must be from permanently numbered courses.</b>		<b>9</b>
Courses which are eligible to fulfill this requirement may come from any of the following courses, or from Special Topic classes offered by the Political Science department (requires a substitution form to be submitted to the Office of Registration and Records signed by dept. chairperson), or from classes not selected to meet area requirements.		
POLS 120	Terrorism	
POLS 210	Current Politics	
POLS 215	Problems and Policies In American Government	
POLS 216	Campaigns and Elections	
POLS 230	Judicial Process	
POLS 350	Gender Issues and the Law	
POLS 351	Women and Politics	
POLS 360	Principles of Public Administration	
Total Credits		40

## Degree Requirements and Notes

- Minimum cumulative GPA of 3.00 required in courses with the POLS prefix.

## Major Requirements

### Major: Political Science - Pre-Law Option

Degree Type: B.A. or B.S.

Minimum Degree Credits to Graduate: 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

# Precision Agriculture

---

## Department Information

- **Department Location:**  
Agricultural and Biosystems Engineering
- **Department Phone:**  
701-231-7261
- **Department Email:**  
ndsu.aben@ndsu.edu
- **Department Web Site:**  
www.ndsu.edu/aben/
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/precision-agriculture/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/precision-agriculture/)

A focused in-depth education in sciences, technologies and practices, including unmanned aerial systems (drones), remote sensing, acritical intelligence, machine learning, sensors, robotic applications, cloud computing, big data management, and site-specific resources management, awaits students in the precision agriculture (PAG) field. We prepare our graduates to apply their knowledge and skills to address profitability, production efficiency, and environmental stewardship related to modern high-tech agricultural production systems.

## The Program

The PAG major in the College of Agriculture, Food Systems, and Natural Resources is administered by the Department of Agricultural and Biosystems Engineering. The PAG program leads to a Bachelor of Science degree and includes core requirements in mathematics, communications, sciences, humanities and social sciences. In the major, students will complete technical courses in machine principles, data mapping, electrical systems and electronics, crop production principles, computer applications for precision agriculture, remote sensing, data management, site-specific agriculture, and information/decision support technology. The curriculum balances instruction in agricultural sciences principles with hands-on training and application of technology. A degree is awarded after completion of a minimum of 120 credits.

The PAG major curriculum provides opportunities for individuals from both rural and urban backgrounds to choose courses to meet personal career objectives. Minors may be developed in related fields of production agriculture, agribusiness or in fields that add curriculum diversity, e.g., international studies, communication, natural resources management, business administration, accounting, or industrial management.

## internships

The curriculum requires at least one internship, but students are highly encouraged to take advantage of as many internship opportunities as they wish, especially co-operative education experiences (paid internships). These are great opportunities for students to gain hands-on experience working with precision agriculture technologies. In addition, internship experiences allow students to make more informed decisions regarding their major, to make better selection of elective courses, and open doors for employment upon graduation.

## Career opportunities

Opportunities for PAG graduates are many and diverse. Graduates may, for example, be employed by companies providing equipment and technical services related to precision agriculture, such as Titan Machinery, RDO Equipment, FarmersEdge, IntelligentAg,, John Deere. The adoption of aerial remote sensing and artificial intelligence is on the rise in both private and public sectors, which creates new employment opportunities for PAG graduates. In addition, one always can start his/her own business as a private consultant on precision agriculture.

## Scholarships

Several scholarships are available through the department. These scholarships range from \$300 to \$4,000. Students also may be eligible for scholarships from the College of Agriculture, Food Systems, and Natural Resources.

## Extra-Curricular Activities

The Precision Ag Club offers students opportunities to participate in professional and social activities with other students at the local and regional levels. Being an active participant in student organizations helps students develop leadership, teamwork, organization and communication skills.

## A well equipped teaching facility

The PAG degree program is housed in the Agricultural and Biosystems Engineering building which includes offices, classrooms, and laboratories. Laboratories are equipped with state-of-the-art equipment typically used in industry and research, such as personal computers with software used to manipulate and to write prescriptions to field equipment, several models of unmanned aerial systems (drones), a variety of sensors (RGB,

multispectral, and hyperspectral) mounted to drones and to benches in the lab, tractors, engines, surveying equipment, etc. Faculty expertise varies across a wide and diverse range of specialties related to agricultural and biological systems.

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## Major Requirements

### Major: Precision Agriculture

**Degree Type:** Bachelor of Science (B.S.)

**Minimum Degree Credits to Graduate:** 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12

# Pre-Law

## Department Information

- **Department Location:**  
104A Putnam Hall
- **Department Phone:**  
701-231-8567
- **Department Web Site:**  
[www.ndsu.edu/cjps/](http://www.ndsu.edu/cjps/)
- **Credential Offered:**  
Minor
- **Program Overview:**  
[bulletin.ndsu.edu/programs-study/undergraduate/pre-law/](http://bulletin.ndsu.edu/programs-study/undergraduate/pre-law/)

## Minor: Pre-Law

Required Credits: 21

### Minor Requirements

NOTE: A student completing this minor may not take any of the pre-law minor classes in the political science major/minor or toward other degree requirements (i.e. general education, college, or other major related requirements).

Code	Title	Credits
<b>Core Courses</b>		
POLS 230	Judicial Process	3
POLS 430 or POLS 431	Constitutional Law-Civil Liberties <sup>1</sup> Constitutional Law-Criminal Justice	3
POLS 444 or POLS 446	International Law <sup>1</sup> International Criminal Law	3
<b>Communication Requirement</b>		
COMM 214 or COMM 216	Persuasive Speaking Intercultural Communication	3
ENGL 320 or ENGL 358	Business and Professional Writing Writing in the Humanities and Social Sciences	3
<b>Additional Law-Related Courses - Select two courses from the following:</b>		6
CJ 201	Introduction to Criminal Justice	
CJ 230	Criminology	
CJ 330	Criminal Law and Procedure	
CJ 460	Criminal Court System	
COMM 431	Communication Ethics and Law	
HIST 434	Environmental History	
PHIL 257	Traditional Logic	
PHIL 370	Social and Political Philosophy	
POLS 430	Constitutional Law-Civil Liberties (if not used in the core) <sup>1</sup>	
POLS 431	Constitutional Law-Criminal Justice (if not used in the core) <sup>1</sup>	
POLS 444	International Law (if not used in the core) <sup>1</sup>	
POLS 446	International Criminal Law (if not used in the core) <sup>1</sup>	
PSYC 370	Forensic Psychology	
Total Credits		21

<sup>1</sup> One class of the pair must be used in the core and the other class may be used toward the six credits of the additional law-related courses.

### Program Notes:

- All course pre-requisites apply.

# Pre-Law Minor

---

## Department Information

- **Department Location:**  
104A Putnam Hall
- **Department Phone:**  
701-231-8567
- **Department Web Site:**  
[www.ndsu.edu/cjps/](http://www.ndsu.edu/cjps/)
- **Credential Offered:**  
Minor
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/pre-law/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/pre-law/)

Pre-law can be a vital building block for students who pursue a career in law. Getting into law school is certainly an achievement, but it is just a start in the process of becoming a lawyer. Many students are unprepared for the sort of intensified reading, writing, and in-class argumentation necessary to succeed in law school. Indeed, depending on the institution, anywhere from ten to thirty percent of all new law students drop out of school by the end of their first year. A rigorous pre-law minor with a focus on abstract thoughts and methods would facilitate NDSU students' success in law school and beyond.

A law career itself lends itself to a generation of students who will change careers several times in their lives. Within the law itself, there are several different career paths available to students, including a private practice lawyer, corporate attorney, legal aid attorney, and in-house attorney for non-profit groups. Law is a stable and well-paying career option in the Upper Midwest. The profession of attorney is projected to grow by 3.0 percent by 2024 (as compared to 2014 numbers).

NDSU graduates who pursue a law education typically attend law school through the University of North Dakota, the University of Minnesota, or Hamline University. However, NDSU graduates have also been admitted to such prominent institutions as the University of Michigan Law School, the University of Notre Dame Law School, and DePaul University College of Law.

If you have any questions, please contact the NDSU Department of Political Science & Pubic Policy at [ndsu.poli.sci@ndsu.edu](mailto:ndsu.poli.sci@ndsu.edu).

## Professional Selling

### Department Information

- **Department Location:**  
Richard H. Barry Hall
- **Department Phone:**  
701-231-8651
- **Department Web Site:**

## Certificate in Professional Selling

The Certificate in Professional Selling develops student knowledge and competencies related to the sales profession, with particular emphasis on key interpersonal and selling skills. The program focuses on concepts and tools that are consistent with current professional practice.

Prospective students are subject to the university's admission policies and procedures. Certificates must be declared within and approved by the College of Business. Declare your certificate by completing the Certificate in Professional Selling form online at: <https://www.ndsu.edu/business/programs/sales/salesapp>. Please do so *before or when* taking MRKT 430 Sales and Personal Selling.

MGMT 451	Negotiation and Alternative Dispute Resolution	
MGMT 461	Supply Chain Management	
MGMT 462	Modeling the Supply Chain	
MRKT 438	Customer Relationship Management (CRM) and Sales Technology	
MRKT 470	Services Marketing	
Total Credits		16

\* Optional co-requisite with MRKT 320

\*\* Requires approval by College of Business Center for Professional Selling and Sales Technology

### Requirements for a certificate in Professional Selling

- Certificates must be declared within the College of Business. Be sure to officially declare your certificate by completing the Certificate in Professional Selling form ([https://www.ndsu.edu/business/research/centers\\_institutes/sales\\_center](https://www.ndsu.edu/business/research/centers_institutes/sales_center)). Please do so *before or when* taking MRKT 430 Sales and Personal Selling.
- To be accepted into the certificate program, students must have a 2.50 institutional cumulative GPA and at least junior standing (60 credits).
- To complete a certificate, students must earn a 'C' or better in all courses used to satisfy certificate requirements and a minimum 2.50 grade point average that is based on the courses used to satisfy the certificate requirements.
- If the certificate or institutional GPA falls below the 2.50 GPA after acceptance into the program, the student will not be allowed to register for the CoB courses until the cumulative GPA returns to 2.50 or above.
- Certificate students must satisfy all course prerequisites.
- Approval for a certificate does not guarantee enrollment in specific courses.

## Psychology

www.ndsu.edu/psychology/
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
bulletin.ndsu.edu/undergraduate/program-curriculum/psychology/

Whether you're interested in psychology as a helping profession or as the science of mind and behavior, the Department of Psychology at North Dakota State University is an exciting place to be. For the last several years, our programs have grown to build on our strengths in health psychology and cognitive neuroscience. Our expanded faculty and graduate programs mean that our undergraduate majors have ample opportunities for participating in cutting-edge research and course work.

## Background Information

Psychologists study a broad range of thought and behavior, from normal to abnormal, in both individuals and social groups. What distinguishes psychology from other fields is its strong research orientation. Because psychology is relevant to virtually all professions, students who plan to enter professions such as medicine, law, business management, social work, education or counseling often elect to major or minor in psychology.

## Career Opportunities

Most professional positions for psychologists require a master's or doctoral degree. In addition to pursuing graduate work in psychology, recent graduates have entered professional programs in medicine, counseling and guidance, business, special education, social work, law, dentistry, ministry and optometry.

Many of our students seek employment immediately after completing their bachelor's degree. Employers seek out psychology majors for their combination of people and research skills. Some of our graduates have entered positions directly related to psychological services (e.g., mental health aide, psychological testing technician, behavior analyst, or medical research assistant). Others have taken positions not directly concerned with psychological services but related to psychology (e.g., sales, management, law enforcement, corrections, advertising, market research and statistical consulting).

Alumni surveys by the NDSU Career Center have consistently shown that our graduates are very successful in obtaining good jobs or going on to graduate or professional school.

## The Program

Undergraduate students can either major or minor in psychology at NDSU. Students majoring in psychology may pursue either a Bachelor of Arts (B.A.) or a Bachelor of Science (B.S.). The primary difference between the two degree programs is that the B.A. degree requires competency at the second-year level of a foreign language while the B.S. requires an approved minor or additional course work in either the natural sciences or the social sciences instead of a language. Both the major and minor requirements within psychology allow each student to select the courses most relevant to his or her own interests.

## Advising

Freshman and transfer students receive introductory academic advising from the department's professional advisor in conjunction with NDSU's Career and Advising Center. This preparatory advising continues until students are assigned to a faculty advisor to start their junior year. In addition to these professional and faculty advisors, students can use our web-based advising center to obtain information about the psychology curriculum and career planning. Printed handouts with this information are also available from the department.

One helpful feature is the Career Orientation OverLay (COOL), which has been developed to aid students in selecting courses relevant to their career goals. COOLs are available for behavioral neuroscience (e.g., medicine, medical research), industrial psychology (e.g., business, industry), human services (e.g., clinical psychology, social work), and experimental psychology (e.g., academic and research careers).

## Research and Computing Facilities

Students and faculty at NDSU are engaged in research on a wide variety of topics in psychology. Research laboratories include experimental rooms for human research, sound-attenuated chambers, a group lab suite, a virtual reality display system and a driving simulator. Laboratory facilities include advanced equipment for studying human perception, brain function, information processing and social interaction.

Because the program at NDSU emphasizes the scientific approach to the study of behavior, student research is strongly encouraged. Undergraduate students often serve as research assistants working closely with faculty and graduate students. Current research includes projects on health, vision, virtual reality/multi-sensory integration, information processing, behavior modification, emotion, depression, history of psychology, and group processes.

## Field Experience

The department maintains excellent relations with a number of service agencies in the Fargo-Moorhead community. Through these contacts, psychology majors can gain field experience in human service settings. At the same time, they earn college credit and gain an understanding of the applications of psychological principles in community service agencies.

## Financial Aid

Research and teaching assistantships are sometimes available to advanced undergraduate students. Students can also receive support for work in the department through the NDSU work-study program. In addition, the Psychology Research Award Fund provides money to undergraduates for research projects and travel to professional conferences.

Some scholarships are available for undergraduates. For example, the Patricia Beatty Scholarships provide funding for one to two junior and senior psychology students each year. Students are invited to apply for these scholarships, which are awarded based on grade point average and involvement in department research and activities. Many of our students also have participated in campus-wide programs that sponsor students to do research with faculty mentors (for example, the McNair Scholars program).

## High School Preparation

Basic college preparatory courses in high school are sufficient for NDSU psychology majors. Since research and writing skills are particularly important, students should be well-grounded in English, science, social science, and mathematics. Do not be concerned if you have not had psychology in high school—you will get plenty of courses here. In fact, we generally prefer that students take their introductory psychology course at NDSU rather than Advanced Placement Psychology in high school.

## Requirements for Majors

A total of 51 semester credits are required in psychology and must include PSYC 111 (Introduction to Psychology), PSYC 350 and 351 (Research Methods I and II) and 15 credits at the 400-level from a selection of courses. Students also are required to complete general education requirements, which include our required courses of MATH 103 (College Algebra) or higher and ENGL 324, 325, or 459 for Upper Division Writing, and a capstone experience course.

## Psychology Minors

A total of 18 credits are required in psychology and must include PSYC 111 (Introduction to Psychology) and one 300 or 400-level course. In addition to general psychology minors, more specialized minors are available in neuroscience and managerial psychology.

## B.S. in Behavioral Statistics

This interdisciplinary major is the result of a joint effort between the Departments of Psychology and Statistics. (Note: students in this major also complete the requirements for a degree in psychology.) Graduates of this program will have skills in collecting and analyzing data on human behavior, and would be employable in firms that deal with medical or Medicare data, consumer activity, market research, etc. See the psychology web site, your advisor or the *NDSU Bulletin* for detailed information.

## Plans of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

## **Major Requirements**

### **Major: Psychology**

Degree Type: B.A. or B.S.

Minimum Degree Credits to Graduate: 120

## University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## University General Education Requirements

<b>Other Required Courses</b>		
ENGL 324	Writing in the Sciences (May satisfy general education category C)	3
or ENGL 325	Writing in the Health Professions	
or ENGL 459	Researching and Writing Grants and Proposal	
MATH 103	College Algebra (or higher level)	3
<b>Track Elective</b>		<b>14-16</b>
Students earning a Bachelor of Science degree must select one of the three tracks listed below in consultation with an adviser (14 credit minimum).		
<b>Total Credits</b>		<b>51-53</b>
<b>Code</b>	<b>Title</b>	<b>Credits</b>
<b>Track: Natural Science</b>		<b>14</b>
14 additional credits in math/science. Prefixes accepted include: BIOL, BIOC, BOT, CHEM, ENT, GEOL, MATH, MICR, PHYS, PLSC, STAT, OR ZOO. Courses selected for this track cannot count for general education.		
<b>Code</b>	<b>Title</b>	<b>Credits</b>
<b>Track: Social Science</b>		<b>14</b>
14 additional credits in social sciences (excluding PSYC prefix courses). Prefixes accepted include: ANTH, CJ, ECON, POLS, SOC or HDFS general education courses or courses that include an HDFS general education prerequisite. Courses selected for this track cannot count for general education.		
Other courses accepted include:		
COMM 114	Human Communication	
COMM 212	Interpersonal Communication	
COMM 216	Intercultural Communication	
COMM 260	Introduction to Web Design	
COMM 271	Listening and Nonverbal Communication	
COMM 301	Rhetorical Traditions	
COMM 402	Contemporary Rhetoric	
COMM 435	Critical Approaches to Popular Culture	

COMM 436	Issues in Mass Communications
COMM 450	Issues in Communication
COMM 480	Health Communication II
BUSN 487	Managerial Economics
MGMT 320	Foundations of Management
MGMT 330	Foundations of Organizational Behavior
GEOG 151	Human Geography
GEOG 161	World Regional Geography
GEOG 262	Geography of North America

Code	Title	Credits
<b>Track: Minor Program of Study</b>		16+
A minor in an approved area of study.		

<sup>1</sup> PSYC 189 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take PSYC 189.

## Program Notes

- Students earning a Bachelor of Arts degree must complete the Modern Foreign Language proficiency (3-14 credits).
- Except for courses offered only as pass/fail grading, no course may be taken Pass/Fail.
- When a student selects psychology as a second major, the student will not have to complete the track elective.

## Minor Requirements

### Psychology Minor

#### Minor Requirements

Required Credits: 18

Code	Title	Credits
<b>Required Courses</b>		
PSYC 111	Introduction to Psychology	3
PSYC Electives	At least one course must be a 300-400 level course	15
Total Credits		18

### Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- Courses cannot be taken P/F.

# Public Health

---

## Department Information

- **Department Location:**  
Aldevron Tower 6th Floor
- **Department Phone:**  
701-231-6269
- **Department Web Site:**  
[www.ndsu.edu/publichealth/](http://www.ndsu.edu/publichealth/)
- **Credential Offered:**  
Minor
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/public-health/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/public-health/)

The public health minor will serve to engage students in the history and philosophy of public health as well as its core values, concepts and functions across the globe and in society. The minor will include understanding of the socioeconomic, behavioral, and biological factors that impact human health and contribute to health disparities. Communication skills will be emphasized through writing, critical thinking, and other methods of oral and visual/electronic communication. The minor will compliment many majors such as Emergency Management, Sociology, Microbiology, Exercise Science, Nutrition, and Psychology and is a compliment to pre-health majors. Completing a minor in public health is also a great introduction for students thinking about attending graduate school to attain a Master of Public Health (MPH).

The field of public health is growing and there is increasing demand for public health professionals as well as other professionals in health-related fields as identified by the U.S. Bureau of Labor Statistics. More specifically, employment in the areas of health education, epidemiology, and statistics are identified as having a growing employment need.

## Public History

### Department Information

- **Department Location:**  
Minard Hall
- **Department Phone:**  
701-231-8654
- **Department Web Site:**  
[www.ndsuhprs.org/](http://www.ndsuhprs.org/) (<http://www.ndsuhprs.org/>)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/public-history/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/public-history/)

Do you like to study history but wonder what you can do with a history degree? If so, the public history program at North Dakota State University may be for you. Public history is an umbrella field that encompasses archival work, museum studies, collections management, historic preservation, cultural resource management, and many other public facing historical professions. This innovative program exposes undergraduates to "doing" history. It provides students with the opportunity to explore a variety of careers and prepares them for employment or graduate school in the expanding field of public history. Examples of opportunities for public history majors include employment in historical societies, museums, archives, historic preservation, corporations, municipalities, labor and farm organizations, and state and federal government agencies.

### THE PROGRAM

The core of the major is 51 credits, which consists of a well-integrated combination of courses designed to provide students with training in history and in the specific field of public history. The goal of the program is to provide a structured framework of courses and allowance for some flexibility to reflect personal interests. The public history major provides students with a solid foundation in history content and methodology and introduces them to the sub-fields of public history. A crucial part of the program is an approved internship of nine credit hours at a historical agency, often at local museums such as Bonanzaville in West Fargo or the Historical and Cultural Society of Clay County at the Hjemkomst Center in Moorhead, Minnesota. The internship is an opportunity for practical, on-the-job experience in public history.

### CAREER OPPORTUNITIES

Recent graduates in public history are employed at the State Historical Society of North Dakota, the National Park Service, and at several regional county museums and historic sites. Currently, the U.S. Department of Labor predicts that openings at public history sites is "projected to grow 9 percent from 2018 to 2028, faster than the average for all occupations." Further information on career opportunities can be found in the *Occupational Outlook Handbook* published by the U.S. Department of Labor. Some students decide to pursue further graduate study after completing a public history degree at NDSU. Several of our recent graduates have been admitted to leading graduate public history programs such as the Cooperstown Museum Studies Program and Middle Tennessee State University.

### THE CURRICULUM

Students begin with 9 to 15 credits at the 100-200 level to provide a foundation for their later work. Public history courses at the 200 level may be used to meet this requirement. Year-long survey courses in U.S. history and Western Civilization are provided to give students a basic knowledge of the history of the United States and of the wider cultural heritage of the western world. After completing 100-200 level courses, students complete a course on historical research and writing. At the junior or senior level, students take a sequence of courses in American, European, and world history. These courses provide students with in-depth historical content. Courses in museum collections management, digital history, and public memory and memorialization are also required. The resources of the North Dakota Institute for Regional Studies at the NDSU Archives are used in these classes.

Three to nine more credits of history at the junior or senior level are required to gain further historical knowledge; these courses are chosen after consultation with an advisor. A three-credit senior seminar is required of all history majors as a capstone experience.

Courses such as introduction to public history, museum studies, collections management, and digital history are designed to instill knowledge of specific areas in public history. The introduction to public history course provides an overview of the field and an opportunity to create a public

history project. The museum studies course familiarizes students with the theory and practice of museum work and provides experience creating an exhibit. The collections management course focuses on the care and management of museum collections. These courses and the required historical content courses provide students with an understanding of cultural, political, social and economic changes through time and teach students how to craft an interpretation of those changes.

Finally, a nine-credit internship provides practical experience in the field of public history. The State Historical Society of North Dakota (and other local and regional historical agencies) provide opportunities in areas such as collections management, archival work, historical editing, historical preservation, and interpretation of historic sites.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>First Year</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>

## Major Requirements

### Major: Public History

Degree Type: B.A. or B.S.

Minimum Degree Credits to Graduate: 120

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		3
<b>Science and Technology (S) <sup>†</sup></b>		10
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		6
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		6
<b>Wellness (W) <sup>†</sup></b>		2
<b>Cultural Diversity (D) <sup>**†</sup></b>		
<b>Global Perspectives (G) <sup>**†</sup></b>		
Total Credits		39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Arts, Humanities, and Social Sciences

### Degree Requirements

**Bachelor of Science (B.S.) Degree** – The completion of a minor program of study, a second major, or a second degree is required.

**Bachelor of Arts (B.A.) Degree** – Second year language proficiency at college level required.

### Arts, Humanities and Social Sciences College Requirements

An additional 9 credits are required by the College of Arts, Humanities and Social Sciences for all Bachelor of Science and Bachelor of Arts degree programs of study, except the Bachelor of Fine Arts degree, the Bachelor of Music degree, the Bachelor of Science in Architecture degree, and the Bachelor of Science degree with a major in Environmental Design:

Code	Title	Credits
<b>AH&amp;SS College Requirements</b>		
Courses used to satisfy any general education requirement cannot be used to also count toward the AH&SS College Requirements. A minimum of three credits is required in each of the 3 following areas for a total of 9 credits. Choose only those courses with the prefixes listed for each area. A course with the WGS prefix can only be used in one area.		
<b>Area One: Humanities</b>		3
ARB, ENGL, FREN, GERM, HIST, HUM, PHIL, RELS, SPAN, or WGS		
<b>Area Two: Social Sciences</b>		3
ANTH, CJ, COMM, EMGT, POLS, SOC, or WGS		
<b>Area Three: Fine Arts</b>		3
ARCH, ART, ENVD, LA, MUSC, or THEA		
Total Credits		9

## Major Requirements

Thirty-three (33) credits of the major must be taken in residence at NDSU.

Code	Title	Credits
<b>Core Requirements</b>		
Select one history survey course from the following:		3
HIST 101	Western Civilization I	
HIST 102	Western Civilization II	
HIST 103	U.S. to 1877	
HIST 104	U.S. Since 1877	
HIST 251	Introduction To Public History	3
HIST 252	Introduction to Museum Work	3
HIST 352	Museum Collections Management	3
HIST 390	Historical Research and Writing	3
HIST 401	Archival Theory and Practice	3
HIST 403	Archival Preservation	3
HIST 404	Digital History	3
HIST 415	Public Memory and Memorialization in America	3
HIST 489	Senior Seminar (Capstone)	3
HIST 496	Field Experience (Approved Internship)	9
<b>Distribution Requirement: Minimum credit required for each distribution area.</b>		
U.S. History: Select 6 credits from the following:		6
RELS 340	New Religious Movements	
RELS 345	Religion and Politics	
HIST 382	Canada	
HIST 415	Public Memory and Memorialization in America	
HIST 420	Colonial American History	
HIST 422	American Civil War and Reconstruction	
HIST 423	The Gilded Age and Progressive America	
HIST 424	U.S. History 1917-1960

# Publishing

---

## Department Information

- **Credential Offered:**  
Certificate
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/publishing/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/publishing/)

The certificate in publishing will prepare students to work within the unique framework of the publishing industry. The top five skills employers seek among college graduates: communication, problem solving, ability to work in a team, project management, and quantitative skills (Job Outlook Survey 2019, Nat'l Assoc. of Colleges and Employers). The certificate in publishing delivers an educational experience that allows students to learn about the history and practice of publishing scholarly and literary works. The course work offers in-depth, real-life experience with a decades-old publishing house, applying current methods and customs of scholarly and literary publishing while meeting real-time production deadlines and schedules in preparation for national distribution of North Dakota State University Press books. The key topics for the certificate in publishing are the same as described in the Classification of Instructional Programs for publishing: focusing on the process of managing the creation, publication, and distribution of print and electronic books and other text products, and preparing individuals to manage the editorial, technical, and business aspects of publishing operations. The certificate in publishing includes instruction in product planning and design, editing, author relations, business and copyright law, publishing industry operations, contracting and purchasing, product marketing, electronic publishing and commerce, history of publishing, and professional standards and ethics.

## Publishing

### Department Information

### Certificate Requirements

Required Credits: 12

Code	Title	Credits
AHSS 472	Introduction to Publishing	3
AHSS 476	Practicum in Publishing	3
AHSS 496	Field Experience	3
Additional Requirement *		3
Total Credits		12

\* Additional requirement coursework to be determined in collaboration with a student's goals and the program coordinator. Experiences related to the field of publishing, such as contemporary literature, graphic design, marketing & publicity, bookkeeping, editing, digital history, etc. The department will need to submit a substitution form to the Office of Registration and Records in order for it to apply to this certificate since it is an undefined additional requirement.

## Radiologic Sciences

### Department Information

- **Department Location:**  
Sudro Hall
- **Department Phone:**  
701-231-8713
- **Department Web Site:**  
[www.ndsu.edu/alliedsciences/](http://www.ndsu.edu/alliedsciences/)
- **Credential Offered:**  
B.S.

- **Official Program Curriculum:**

[bulletin.ndsu.edu/undergraduate/program-curriculum/radiologic-sciences/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/radiologic-sciences/)

Radiologic Sciences at North Dakota State University combines foundational science, math, and general education courses on campus with applied imaging classroom, lab, and clinical education during a two-year full-time internship within an affiliated hospital. Three unique and specialized internships available to RS majors are radiography, diagnostic medical sonography, and echocardiography.

## Background Information

**Radiographers**, also known as **radiologic technologists**, perform diagnostic imaging examinations, accurately position patients, obtain quality diagnostic images, and adhere to radiation protection regulations for themselves, their patients, and coworkers. They work closely with radiologists, the physicians who interpret medical images, to diagnosis or rule out disease or injury. Radiologic technologists are educated in anatomy, patient positioning, examination techniques, equipment protocols, radiation safety, radiation protection and basic patient care. To become a registered radiologic technologist, RT(R), students must complete an accredited educational program, earn an academic degree, and pass a national certification examination. To remain registered, they must earn continuing education credits.

Radiologic technologists work in hospitals, physician offices and clinics, or diagnostic imaging centers. Multi-skilled RT(R)s who are educated and credentialed in more than one type of imaging technique are most marketable. With experience and additional training, general radiographers may become specialists in CT, magnetic resonance imaging, mammography, interventional radiography, or advance into management or education. Radiation therapy, sonography, and nuclear medicine typically require additional specialized formal education in a dedicated training program. Currently there are job openings throughout the country. According to the U.S. Department of Labor Bureau of Labor Statistics (<https://www.bls.gov/ooh/healthcare/radiologic-technologists.htm>), employment of radiologic technologists is expected to grow faster than average for all occupations through 2026. An increase in medical conditions among the aging baby-boom population will require imaging as a tool to making diagnoses. Mean annual earnings for radiologic technologists in 2018 was \$61,540 (<https://www.bls.gov/oes/2018/may/oes292034.htm>).

**Sonographers** use special equipment and high frequency sound waves (ultrasound) to obtain images of internal body structures and organs. They have a high level of patient interaction and play a vital role in providing the physician with quality images to interpret, assess, and diagnose medical conditions or conduct surgical procedures. Two options for NDSU students interested in sonography are echocardiography and diagnostic medical sonography. **Echocardiographers**, also known as cardiac sonographers, evaluate the anatomy and hemodynamics (blood flow) of the heart, its chambers and valves, and related blood vessels. **Diagnostic medical sonographers** evaluate abdominal structures like the kidney, liver, and spleen, breast tissue, the reproductive system, blood vessels, fetal development, and musculoskeletal structures like tendons and joints. Sonographers are educated in anatomy and pathophysiology, patient positioning, examination techniques, equipment protocols, and basic patient care and safety. To become registered, students must complete an accredited educational program and pass national certifying examinations. To remain registered, they must earn continuing education credits.

Sonographers work in hospitals, physician offices, and medical and diagnostic laboratories. Currently there are job openings throughout the country. According to the U.S. Department of Labor Bureau of Labor Statistics (<https://www.bls.gov/ooh/healthcare/diagnostic-medical-sonographers.htm>), the demand for sonographers will continue to grow much faster than average for all occupations through 2026. This demand is attributed to the likelihood that the need to diagnose medical conditions within an aging baby-boom population will increase, as well as, the continued need for ultrasound as an alternative to imaging that involves radiation. Mean annual wages for diagnostic medical sonographers in 2018 was \$73,860 (<https://www.bls.gov/oes/2018/may/oes292032.htm>).

## The Program

A Bachelor of Science degree, major in Radiologic Sciences, includes two or more years of rigorous academic courses on campus followed by a two-year full-time professional-level internship in an affiliated hospital-based program. RS students must have an interest and aptitude in the sciences and math and a strong desire to work directly with patients. Academic courses include chemistry, physics, anatomy and physiology, microbiology, trigonometry, psychology, statistics, and computer sciences, in addition to general education courses. Students pursuing any one of the three specializations in radiography, echocardiography, or diagnostic medical sonography will complete the same pre-radiologic sciences college courses. Transfer students must complete a minimum of 12-20 resident credits at NDSU prior to start of the internship. Residency requirements vary by RS specialization. During their final year of courses on campus, qualified students will apply for the two-year internship. The internship class and clinical education prepares the graduate to work in their respective area of specialization in radiography, diagnostic medical sonography, or echocardiography. College courses and the internship classes, lab, and clinical education constitute the four-year degree awarded by NDSU. Radiography graduates are eligible to take the national certifying exam administered by the American Registry of Radiologic Technologists (<https://www.arrt.org>) to earn the RT(R) credential. Sonography graduates are eligible to take national certifying exams appropriate to their specialization and administered by the American Registry for Diagnostic Medical Sonography (<http://www.ardms.org/Pages/default.aspx>).

## Internship Application and Admission

The internship application process begins annually in the fall. Internship admission is competitive. Admission criteria are established in collaboration with affiliated hospital programs and generally includes successful completion of all college courses on campus with a minimum grade of C, grade point averages (a minimum of 2.50-3.00 is required and varies by hospital program), references, related experience, interview and ability to meet program-designated technical standards, or request accommodations to execute those skills. Technical standards include a sound intellect and emotional health to exercise good judgement even in emergencies, visual and hearing acuity, physical abilities to lift and position patients, pull, push,

carry equipment, enter data, stand and walk for extended periods of times and communicate effectively. In addition, students must also comply with criminal background and student conduct requirements.

**Radiography.** Pre-RS students who apply and are accepted into the radiography internship will complete their applied classroom and clinical education in one of the following affiliated hospital-based radiologic technology programs: Avera McKennan Hospital (Sioux Falls, SD), Mercy/St Luke's Hospitals (Cedar Rapids, IA), Sanford Medical Center (Bismarck and Fargo, ND, Sioux Falls, SD), St. Cloud Hospital (St. Cloud, MN), St. Luke's College (Sioux City, IA), UnityPoint Health (Des Moines, IA), and the Veteran Affairs Medical Center (Minneapolis, MN). Affiliated hospital programs maintain programmatic accreditation through the Joint Review Committee on Education in Radiologic Technology (<https://www.jrcert.org>). Internship classes and clinical experience will focus on patient care, anatomy and physiology, radiation physics and protection, imaging principles, positioning, radiobiology, and pathology.

**Sonography.** Pre-RS students who apply and are accepted into one of the sonography specializations will complete the 21-month internship offered by Sanford Medical Center Fargo. Internship classes, scanning labs, and clinical experience for echocardiography will focus on adult echocardiography with rotations in pediatric and stress echo. Internship classes, scanning labs, and clinical experience in diagnostic medical sonography will focus on abdomen, OB/GYN, small parts, and vascular sonography. SMCF's sonography programs are accredited by the Commission on Accreditation of Allied Health Education Programs (<https://www.caahep.org>).

It is highly recommended that students interested in an RS major meet with the RS advisor at least one year prior to anticipated internship application to discuss areas of specialization, internship admission, and create a plan of study for successful completion of degree requirements. Information about the RS professions and specializations, curriculum, internship, and advising contacts are available from the NDSU Department of Allied Sciences (<https://www.ndsu.edu/alliedsciences>).

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

				1-6

Total Credits: 130-143

\* All students are required to successfully earn credit for Engl 110 and Engl 120. Enrollment is based on English Placement. Upon completion of Engl 120 with a "C" grade or higher, students will be awarded placement credit (4) for Engl 110.

\*\* RS 496 classroom, lab, and clinical education (internship) takes place within an affiliated hospital. The internship is full-time for 21-24 months, including summer. RS 496 courses and credits vary by radiography, echocardiography, or diagnostic medical sonography specialization.

## Radiologic Sciences

### Department Information

- **Department Location:**  
Sudro Hall
- **Department Phone:**  
701-231-8713
- **Department Web Site:**  
[www.ndsu.edu/alliedsciences/](http://www.ndsu.edu/alliedsciences/)
- **Credential Offered:**  
B.S.
- **Plan Of Study Sample:**  
[bulletin.ndsu.edu/programs-study/undergraduate/radiologic-sciences/#planofstudytext](http://bulletin.ndsu.edu/programs-study/undergraduate/radiologic-sciences/#planofstudytext)

## Major Requirements

### Radiologic Sciences Major

**Degree Type:** B.S.

**Minimum Degree Credits to Graduate:** 122

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		12
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		

Quantitative Reasoning (R) <sup>†</sup>	3
Science and Technology (S) <sup>†</sup>	10
Humanities and Fine Arts (A) <sup>†</sup>	6
Social and Behavioral Sciences (B) <sup>†</sup>	6
Wellness (W) <sup>†</sup>	2
Cultural Diversity (D) <sup>*†</sup>	
Global Perspectives (G) <sup>*†</sup>	
Total Credits	39

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Major Requirements

Code	Title	Credits
<b>Radiologic Science Major Requirements</b>		
CHP 190	Critical Thinking and Academic Success	2
RS 200	Introduction to Radiologic Sciences	1
RS 496	Field Experience	60
Professional education (internship) within an accredited affiliated school of radiologic technology includes the capstone experience.		
<b>Related Courses Required:</b>		
BIOC 260 or BIOC 460	Elements of Biochemistry Foundations of Biochemistry and Molecular Biology I	4
BIOL 220 & 220L	Human Anatomy and Physiology I and Human Anatomy and Physiology I Laboratory (May satisfy a general education category S)	4
BIOL 221 & 221L	Human Anatomy and Physiology II and Human Anatomy and Physiology II Laboratory	4
CHEM 117 & 117L	Chemical Concepts and Applications and Chem Concepts and Applications Lab (May satisfy a general education category S)	4
CSCI 114 or CSCI 116	Microcomputer Packages (May satisfy a general education category S) Business Use of Computers	3
MATH 105	Trigonometry (or higher level)	3
Select one microbiology course and lab from the following:		3-5
MICR 202 & 202L	Introductory Microbiology and Introductory Microbiology Lab	
MICR 350 & 350L	General Microbiology and General Microbiology Lab	
CHP 125	Medical Terminology for Health Professionals	1
PHRM 170	Common Medicines & Diseases	2
PHYS 211 & 211L	College Physics I and College Physics I Laboratory	4
PHYS 212 & 212L	College Physics II and College Physics II Laboratory	4
PSYC 111	Introduction to Psychology (May satisfy a general education category B)	3
STAT 330	Introductory Statistics (May satisfy a general education category R)	3
<b>Special Major Elective (department approved)</b>		
Select one of the following:		3
PHIL 210	Ethics	
SOC 417	Sociology of the Family	
SOC 426	Sociology of Medicine	
SOC 440	Sociology of Aging	

SOC 441	Death and Dying
COMM 308	Business and Professional Speaking
COMM 315	Small Group Communication
COMM 380	Health Communication I
COMM 381	Patient-Provider Communication
COMM 383	Organizational Communication I
CHP 400	Interprofessional Health Care Practice

Total Credits

108-110

### Degree Requirements and Notes

- All required courses must be completed with a grade of 'C' or above. All students must maintain a semester GPA of 2.0 or above for each semester in the College. A student who fails to meet this standard for two successive or three non-successive semesters may be terminated from enrollment in the College.
- Completion of the prerequisites does not guarantee a student internship. Selection of interns is competitive. Please consult your Radiologic Sciences advisor for more information.

# Reliability Engineering

---

## Department Information

- **Department Location:**  
Civil & Industrial Engineering 202
- **Department Phone:**  
701-231-9818
- **Department Web Site:**  
[www.ndsu.edu/ime/](http://www.ndsu.edu/ime/)
- **Credential Offered:**  
Minor
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/reliability-engineering/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/reliability-engineering/)

Students majoring in any engineering discipline are eligible and may choose a minor in Reliability Engineering. Reliability engineering focuses on assessment of product/system design for the dependability of a system or component to function under varying operating conditions for specified time periods. Fundamentally, it deals with the elimination or reduction of uncertainty and risks resulting in an improved reliability and reduction of failures. Cost elements of failed systems include costs of downtime, repair costs, idle personnel, warranty costs and the cost of maintaining spares and replacement inventory. Engineers must identify the cause of failures, correct the causes, and determine ways to deal with failures that have occurred, and ultimately change the design or design process to reduce the frequency of failures in new systems or components. Students completing a minor in Reliability Engineering will develop a better understanding of statistical analysis, reliability and risk modeling, failure analysis, and design testing and optimization tools. Major manufacturing employers are looking to hire engineers that have a better understanding of these tools and skill sets.

The Reliability minor requires completion of 18 credits of which at least 12 must be in addition to the credits applied to the major. There are 9 required courses and 9 elective courses. Interested students are encouraged to visit with relevant faculty in the IME Department for advice on course selection to best suit their career interests. Students must have a declared major in any of the engineering disciplines to elect a minor in Reliability Engineering.

## Reliability Engineering

### Department Information

- **Department Phone:**  
701-231-7494
- **Department Web Site:**  
[www.ndsu.edu/coe/](http://www.ndsu.edu/coe/)

## Minor: Reliability Engineering

### Required Credits: 18

Code	Title	Credits
IME 460	Evaluation of Engineering Data	3
IME 463	Reliability Engineering	3
IME 464	Reliability Analysis	3
Elective Credits: Select 9 credits from the following:		9
IME 450	Systems Engineering and Management	
IME 461	Quality Assurance and Control	
ME 332	Engineering Materials II	
ME 442	Machine Design I	
ME 472	Fatigue and Fracture of Metals	
ECE 341	Random Processes	
ECE 427	Packaging for Electronics	

or IME 427	Packaging for Electronics
ECE 443	Communications I
ECE 444	Applied Digital Signal Processing
STAT 330	Introductory Statistics
STAT 461	Applied Regression Models
STAT 462	Introduction to Experimental Design

---

Total Credits

18

**MINOR NOTE:**

- This minor is only available to students pursuing an engineering major.
- 12 of the 18 credits for this minor must be unique and cannot count toward requirements in the student's engineering major.

# Religious Studies

---

## Department Information

- **Department Location:**  
Minard Hall
- **Department Phone:**  
701-231-8654
- **Department Web Site:**  
[ndsuhprs.org/](http://ndsuhprs.org/) ([http://ndsuhprs.org](http://ndsuhprs.org/))
- **Credential Offered:**  
Minor
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/religious-studies/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/religious-studies/)

From 1932 to 1977 the School of Religion was independent from the University but in close association with it. Presently, the School of Religion continues as a part of the College of Arts, Humanities, and Social Sciences. A minor in religious studies is available. The minor consists of 18 credits of which 9 credits may be at the 100-200 level and 9 credits must be at the 300-400 level.

## Religion

### Department Information

- **Department Location:**  
Minard Hall
- **Department Phone:**  
701-231-8654
- **Department Web Site:**  
[ndsuhprs.org/](http://ndsuhprs.org/) ([http://ndsuhprs.org](http://ndsuhprs.org/))
- **Credential Offered:**  
Minor
- **Program Overview:**  
[bulletin.ndsu.edu/programs-study/undergraduate/religious-studies/](http://bulletin.ndsu.edu/programs-study/undergraduate/religious-studies/)

## Minor Requirements

### Religion Minor

#### Minor Requirements

Required Credits: 18

Code	Title	Credits
<b>Required Minor Courses</b>		
RELS 100	World Religions	3
RELS 460	Theory and Methods of Religious Studies	3
RELS	300-400 level electives	6
RELS	Additional electives	6
Total Credits		18

### Minor Requirements and Notes

- A minimum of 9 credits must be taken at NDSU.
- For advice on the distribution of electives consult with religious studies faculty members.

## Respiratory Care

### Department Information

- **Department Location:**  
Sudro Hall
- **Department Phone:**  
701-231-8713
- **Department Web Site:**  
[www.ndsu.edu/alliedsciences/](http://www.ndsu.edu/alliedsciences/)
- **Credential Offered:**  
B.S.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/respiratory-care/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/respiratory-care/)

Respiratory Care is an allied health profession that specializes in the evaluation, treatment, and education of patients with cardiopulmonary (heart-lung) disorders. Respiratory therapists (RTs) work closely with patients, physicians, nurses and other healthcare team members in critical care, emergency rooms, nurseries and pediatrics, medical units and home care. RTs' diverse responsibilities include patient assessment, medical gas therapy, pulmonary hygiene, diagnostic testing, mechanical ventilatory and cardiovascular support, rehabilitation activities, and consulting with physicians to develop treatment plans.

## Background Information

The practice of respiratory care encompasses activities in diagnostic evaluation, therapy, and education of the patient, family and public. Diagnostic activities include obtaining and analyzing sputum and blood specimens, performing breathing studies to determine if lung function is impaired, performing sleep disorder studies and interpreting the data obtained from these. Therapy includes administering medical gases and respiratory medications to alleviate breathing problems, initiating and managing mechanical ventilators, establishing and maintaining artificial airways, performing pulmonary hygiene procedures and cardiopulmonary rehabilitation activities. Education of the patient, family and public promotes knowledge of disease processes, therapy and wellness. These essential functions of the RT are practiced under qualified medical direction.

## Career Opportunities

Graduates of the respiratory care program are eligible to complete a series of national examinations administered by the National Board of Respiratory Care that lead to the Registered Respiratory Therapist (RRT) credential. NDSU graduates have enjoyed excellent pass rates on these certifying exams. Most states require a license to practice respiratory care and use these examinations or verification of credentials for state licensing. To remain licensed, RTs may also be required to obtain continuing education credit. Graduates readily find employment in hospital, clinic and home care settings throughout the country. Additional career opportunities exist in management, education, sleep medicine, research, sales and public health. According to the U.S. Department of Labor Bureau of Labor Statistics (<https://www.bls.gov/ooh/healthcare/respiratory-therapists.htm>), employment of respiratory therapists is expected to grow much faster than the average for all occupations through the year 2026. This increased demand is attributed to growth in the middle-aged and elderly populations that will increase the incidence of respiratory conditions, advances in preventing and detecting disease, and improved medications and sophisticated treatments. Mean annual wages (<https://www.bls.gov/oes/2018/may/oes291126.htm>) for respiratory therapists in 2018 was \$62,500.

## The NDSU/Sanford Respiratory Care Program

A Bachelor of Science degree with a major in respiratory care from North Dakota State University includes two to three years of academic courses and a 15-month professional-level internship at Sanford Medical Center Fargo. The NDSU/Sanford Respiratory Care program is accredited by the Commission on Accreditation for Respiratory Care (<https://coarc.com>).

Academic courses include college algebra, chemistry, physics, anatomy and physiology, microbiology, psychology and computer science, in addition to general education courses. Transfer students need to successfully complete a minimum of 20 resident credits at NDSU prior to starting the internship. The full-time internship consists of lecture, lab and clinical education, which prepares the student to enter the profession of respiratory care.

Near the end of the internship, students design a specialty proposal for a focused clinical experience (RC 494, Individual Study). Common specialty areas include: neonatal/pediatric general or intensive care, adult general or intensive care, cardiopulmonary diagnostics, pulmonary rehabilitation or home care, education, and management.

## Internship Admission

Admission to the internship is selective. Qualified students apply during the spring of the academic year during which they will complete all courses on campus. Admission is based upon successful completion of all internship prerequisites (20 resident credits at NDSU), cumulative and core course grade point averages (a minimum of 2.50 is required; the maximum number of core course attempts is two), related experience, references, an interview, and compliance with criminal background and student conduct requirements. In addition, students admitted to the NDSU/Sanford Respiratory Care Program must possess the ability to complete the entire curriculum which requires that the student meet designated technical standards, or request accommodations to execute these skills. Technical standards include cognitive, physical, motor and tactile abilities, visual acuity, and speaking, hearing and interactive requirements. A detailed list of technical standards are found in the Department of Allied Sciences handbook (<https://workspaces.ndsu.edu/fileadmin/alliedsciences/Handbook/Handbook2019.pdf>). Internship applications are available from the NDSU Department of Allied Sciences. Deadline for receipt of completed applications is March 1. An admission committee selects the interns.

It is highly recommended that students interested in the RC major meet with the respiratory care advisor to discuss degree requirements, internship admission, and create an individualized plan of study at least one year in advance of applying for the internship. Information about the profession, curriculum, internship, technical standards, and advising contacts are available from the Department of Allied Sciences. (<https://www.ndsu.edu/alliedsciences>)

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>First Year</b>					
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>

## Major Requirements

### Respiratory Care Major

**Degree Type:** B.S.

**Minimum Degree Credits to Graduate:** 126

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.
  - a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
  - b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

### University General Education Requirements

Code	Title	Credits

# Robotics

---

## Department Information

- **Credential Offered:**  
Minor
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/robotics/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/robotics/)

Robotics is a branch of engineering that combines mechanical engineering, electronics engineering, manufacturing engineering, computer science and other fields of engineering at different degrees. A minor degree in Robotics equips students with skills required for designing and construction of robot mechanisms; designing and development of electronic control systems using sensory feedback and information processing to generate robotic motions by various actuators; and programming and application of robots for carrying out tasks that would be regarded as dirty, dull and dangerous (DDD) to a human being.

# Robotics

## Minor Requirements

### Robotics Minor

Required Credits: 18

Code	Title	Credits
<b>Part One - Core Content Areas: Nine (9) credits of core courses are aligned in four areas:</b>		
1) Robotics Principles Area (Required)		
PREFIX	Introduction to Robotics	3
Take six credits (two courses) from any two of the remaining core areas.		6
2) Core Programming Area		
CSCI 122	Visual BASIC	
CSCI 277	Introduction to UNIX	
ECE 173	Introduction to Computing	
3) Controls and Robot Applications Area		
ABEN 358	Electric Energy Application in Agriculture	
CSCI 485	Autonomous Command and Artificial Intelligence for Robots and Other Cyber-Physical Systems	
ECE 461	Control Systems I	
ECE 463	Modern Control	
IME 482	Automated Manufacturing Systems	
ME 475	Automatic Controls	
4) Measurements and Actuation Systems Area		
ABEN 479	Fluid Power Systems Design	
ABEN 482	Instrumentation & Measurements	
CE 782	Introduction to Intelligent Infrastructure *	
ECE 483	Instrumentation for Engineers	
ME 412	Engineering Measurements	
ME 476	Mechatronics	
<b>Part Two - Approved Additional Courses: Nine (9) credits from the following:</b>		9
Artificial Intelligence & Machine Learning:		
CE 494	Individual Study	
CSCI 345	Topics on Personal Computers	
CSCI 426	Introduction to Artificial Intelligence	
CSCI 436	Intelligent Agents	
CSCI 485		
CSCI 488	Human-Computer Interaction	
IME 774	Neural Networks *	
Perception & Data Processing		
ABEN 482	Instrumentation & Measurements	
ECE 444	Applied Digital Signal Processing	
ECE 448	Image Analysis I	
ECE 483	Instrumentation for Engineers	
ME 412	Engineering Measurements	
Electric Machines and Control Systems		
ECE 376	Embedded Systems	
ECE 461	Control Systems I	

ECE 463	Modern Control
ECE 476	Advanced Embedded Systems
ME 475	Automatic Controls
ME 476	Mechatronics
Kinematics & Dynamics of Machineries	
ABEN 478	Machinery Analysis & Design
ABEN 479	Fluid Power Systems Design
ME 442	Machine Design I
ME 489	Vehicle Dynamics
ECE 761	Advanced Control Theory I *
Applications of Unmanned Systems	
ABEN 358	Electric Energy Application in Agriculture
ABEN 452	Bioenvironmental Systems Design
IME 437	Methods for Precision Manufacturing
IME 482	Automated Manufacturing Systems
PAG 115	Introduction to Precision Agriculture
PAG 315	Electronic Systems in Precision Ag
PAG 454	Applications of Precision Agriculture
CE 425	Bridge Evaluation and Rehabilitation
CE 452	Fundamentals of Oil & Gas Pipeline: Design, Operation, Inspection & Maintenance
CE 782	Introduction to Intelligent Infrastructure *
IME 782	Robotics/CAD/CAM/Control Systems *
IME 784	Computer Integrated Manufacturing *
Total Credits	
	18

\* Graduate level courses will require the student to obtain a class permit from the department teaching the class before enrolling.

## Program Notes

- Any course used to satisfy Part One: Core Courses may not use that course to satisfy any of the nine credits for Part Two: Approved Courses.

# Social Science Education

## Department Information

- **Department Location:**  
Katherine Kilbourne Burgum Family Life, 4-H Center
- **Department Phone:**  
701-231-7921
- **Department Web Site:**  
[www.ndsu.edu/education/](http://www.ndsu.edu/education/)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/social-science-education/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/social-science-education/)

Social science involves the study of people and their interactions with each other, with their social and political institutions and with their environments. Accordingly, the social science education major includes a broad range of courses and subjects. Students are expected to demonstrate both breadth and depth of understanding in the academic disciplines that make up the social sciences.

## The Program

Candidates in the social science education major are prepared to teach a diverse curriculum to a diverse student population. The social science education student should work closely with an advisor to be sure that the general education courses taken will provide a strong foundation for the advanced courses in the major.

## Professional Education Courses

Students may enroll in the 300-level professional education courses before being formally admitted to the School of Education (SOE). Prior to enrolling in the 400-level courses, students must complete the application for admission to the SOE; attain a minimum of a 2.75 grade point average overall in their course work and education courses; and pass the Praxis Core Academic Skills for Educators exam(s). Requirements for admission can be found on the School of Education website (<https://www.ndsu.edu/education>).

## Student Teaching

Student teaching is the culmination of the teaching program. Students have the opportunity to apply skills acquired in college courses under the supervision of an experienced social science educator.

## Student Advisement

Students will be assigned individual advisors who will work closely in program planning and in other ways to advise and assist them. Students are encouraged to seek their advisor's help whenever needed.

## Certification

Upon completing this program, students are eligible for certification to teach social science in most states. The program is accredited by the Council for the Accreditation of Educator Preparation (CAEP).

## Career Opportunities

There has been a surplus of social science teachers across the country for the past several years. It has been predicted that the surplus will continue. Students who elect to major in social science education should consider obtaining a second major or a teachable minor to enhance their employment prospects. In addition, students in social science education are encouraged to seek volunteer and employment experiences that complement their education. Summer or after-school work with special needs students, high school or middle school student activities, or other human service activities can provide the candidate valuable experience with children and adolescents.

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.

<b>First Year</b>			
<b>Fall</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>
ANTH 111, SOC 110, or PSYC 111	3	ENGL 120	3
COMM 110	3	Quantitative Reasoning	3

## Major Requirements

### Major: Social Science Education

Degree Type: B.A. or B.S.

Minimum Degree Credits to Graduate: 120

### University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
6. Transfer Students: Must earn a minimum of 60 credits from a baccalaureate-degree granting or professional institution.

- a. Of these 60, at least 36 must be NDSU resident credits as defined in #7.
- b. Within the 36 resident credits, a minimum of 15 must be in courses numbered 300 or higher and 15 credits in the major field of study.
7. At least 36 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.

For complete information, please refer to the Degree and Graduation Requirements (p. 122) section of this Bulletin.

## University General Education Requirements

Code	Title	Credits
<b>Communication (C)</b>		<b>12</b>
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing <sup>†</sup>		
<b>Quantitative Reasoning (R) <sup>†</sup></b>		<b>3</b>
<b>Science and Technology (S) <sup>†</sup></b>		<b>10</b>
<b>Humanities and Fine Arts (A) <sup>†</sup></b>		<b>6</b>
<b>Social and Behavioral Sciences (B) <sup>†</sup></b>		<b>6</b>
<b>Wellness (W) <sup>†</sup></b>		<b>2</b>
<b>Cultural Diversity (D) <sup>*†</sup></b>		
<b>Global Perspectives (G) <sup>*†</sup></b>		
Total Credits		<b>39</b>

\* May be satisfied by completing courses in another General Education category.

† General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

- A list of university approved general education courses and administrative policies are available here (p. 91).

## Major Requirements

Code	Title	Credits
<b>Teaching Specialty Requirements</b>		
HIST 101	Western Civilization I (May satisfy general education category A)	3
HIST 102	Western Civilization II (May satisfy general education category A)	3
HIST 103	U.S. to 1877	3

EDUC 481	Classroom Practice Methods of Teaching I: (Soc Sci)	3
EDUC 485	Student Teaching Seminar	1
EDUC 486	Classroom Management for Diverse Learners	3
EDUC 487	Student Teaching	9
EDUC 488	Applied Student Teaching	3
EDUC 489	Teaching Students of Diverse Backgrounds	3
Total Credits		91

## Degree Requirements and Notes

- A GPA of 2.75 or better in the teaching specialty is required for placement in student teaching and exit from the program.
- A grade of 'C' or better is required in all Professional Education Requirement courses.
- A GPA of 2.75 or better in professional education as well as passing the appropriate Praxis II exam are required to exit the program.
- Course taken *Pass/Fail* will not be used to satisfy any requirements other than total credits.
- See School of Education (<https://www.ndsu.edu/education>) for admission requirements.

# Social Work & Human Development and Family Science

## Department Information

- **Department Location:**  
E. Morrow Lebedeff Hall
- **Department Phone:**  
701-231-8268
- **Department Web Site:**  
[www.ndsu.edu/hdfs/undergraduate\\_studies/prospective\\_majors/social\\_work/](http://www.ndsu.edu/hdfs/undergraduate_studies/prospective_majors/social_work/)
- **Credential Offered:**  
B.S.; B.A.
- **Official Program Curriculum:**  
[bulletin.ndsu.edu/undergraduate/program-curriculum/social-work-human-development-family-science/](http://bulletin.ndsu.edu/undergraduate/program-curriculum/social-work-human-development-family-science/)

The dual-degree program in human development and family science and social work offers students an integrated knowledge of children, adolescents, adults and families across the life span that will prepare them for careers in the helping professions. Students will gain a broad range of knowledge

and skills that will equip them to address the needs and aspirations of people living in a changing world and be eligible for North Dakota licensure as social workers.

## The Program

Students are concurrently enrolled in the family science or adult development and aging option of human development and family science (HDFS) at North Dakota State University and the social work major through Minot State University (MiSU). The culmination of these requirements leads to a Bachelor of Science from NDSU as well as a Bachelor of Social Work from MiSU.

Under a cooperative agreement, students remain on the NDSU campus to complete all course work for the dual degree. The courses specific to the social work major are offered on the NDSU campus by MiSU faculty or offered through interactive video.

Together the HDFS degree and the social work degree complement and strengthen the knowledge and skills that students will possess upon completion of this dual degree program. The curriculum combines course work in human development and family science with course work in social work. The curriculum includes a strong liberal arts base, studies in human development, family science, social work practice, social welfare, human behavior and research, and additional course work in economics, psychology, sociology and political science.

## Selective Admission

Admission to the dual degree program consists of two separate university applications:

1. Application for admission to NDSU for the human development and family science/social work dual degree prior to beginning the program,
2. After admission and enrollment at NDSU and after meeting with an advisor, application for admission to Minot State University, and
3. Upon completion of specific requirements, application for admission to MiSU social work program.

## Field Education

Students are required to complete 465 hours of direct practice with either a public or private human service agency. This supervised field practice enables students to gain valuable hands-on experience working with clients.

The social work program does not give academic credit for life experience or work experience, nor does the program allow such experience to be substituted for field education.

## Financial Aid and Scholarships

The Office of Financial Aid and Scholarships at NDSU makes available grants, loans, scholarships and work-study employment. Scholarships also are available through the College of Human Development and Education. For more information visit:

<https://www.ndsu.edu/onestop/finaid/scholarships/>

## The Facilities

Facilities for the dual degree program are housed in Evelyn Morrow Lebedeff Hall and the Family Life Center.

## Extra-Curricular Opportunities

Students may enhance their involvement by participating in groups such as the HDFS Club and/or the Student Social Work Organization.

## Community Setting

The Fargo-Moorhead metropolitan area offers a setting conducive to study. Students have the opportunity to work in a number of community institutions serving children and families.

## Accrediting Agency

The social work program is accredited by:

The Council on Social Work Education

1701 Duke Street, Suite 200

Alexandria, VA 22314-3457

## Plan of Study

Please note this is a sample plan of study and not an official curriculum. Actual student schedules for each semester will vary depending on start year, education goals, applicable transfer credit, and course availability. Students are encouraged to work with their academic advisor on a regular basis to review degree progress and customize an individual plan of study.
