

# Public Health (PH)

---

## Courses

### PH 101. Introduction to Public Health. 3 Credits.

This course introduces undergraduate students to the interdisciplinary and exciting field of public health. Discussing and studying the processes and practices of public health enhances the population health perspective of healthcare and other professionals.

### PH 379. Global Seminar. 1-6 Credits.

NDSU instructed experience or field study in a foreign country. Conducted in English for residence credit. Pre-requisite: Prior approval by International Student and Study Abroad Services and major department. May be repeated. Standard Grading.

### PH 452. Lifestyle Approaches to Prevention, Treatment, and Reversal of Disease. 3 Credits.

Explore Lifestyle Medicine and apply the science of lifestyle behaviors in the prevention, treatment, and reversal of disease. Prereq: BIOL 221, 221L. {Also offered for graduate credit - See PH 652.}.

### PH 474. Epidemiology. 3 Credits.

Study of the distribution and dynamics of disease in populations. {Also offered for graduate credit - see PH 674.}.

### PH 479. Global Seminar. 1-6 Credits.

NDSU instructed experience or field study in a foreign country. Conducted in English for residence credit. Pre-requisite: Prior approval by International Student and Study Abroad Services and major department. May be repeated. Standard Grading.

### PH 491. Seminar. 1-5 Credits.

### PH 652. Lifestyle Approaches to Prevention, Treatment, and Reversal of Disease. 3 Credits.

Explore Lifestyle Medicine and apply the science of lifestyle behaviors in the prevention, treatment, and reversal of disease. Prereq: matriculated into the MPH program or public health certificate. {Also offered for undergraduate credit - See PH 452.}.

### PH 674. Epidemiology. 3 Credits.

Study of the distribution and dynamics of disease in populations. {Also offered for undergraduate credit - see PH 474.}.

### PH 700. Preventing and Managing Chronic Illness. 3 Credits.

This course will explore the effects of chronic health issues on individuals, families, and lay caregivers from a public health and clinical systems perspective. PH students only.

### PH 704. Public Health Management and Policy. 3 Credits.

The course will provide a pragmatic overview of the issues, constituents, processes, and tools of public health management and policy.

### PH 705. Global Health. 3 Credits.

This course will survey the health of populations globally and introduce strategies, programs and health systems designed to improve the health of those populations. Prereq: Admission to PH program.

### PH 706. Essentials of Epidemiology. 3 Credits.

Emphasis on application of the principles of epidemiology as applied to the investigation and prevention of individual and population health problems.

### PH 711. Integrating Primary Care and Public Health. 3 Credits.

The course examines the role of primary care and public health in addressing personal and population health issues with particular attention to social determinants of health, health inequities, cultural competence, and community involvement to address contemporary challenges to the health of U.S. populations.

### PH 712. Public Health Research Methods. 3 Credits.

This course provides an introduction to a variety of research methods and key components of a research study that can be employed in public health research and practice.

### PH 720. Environmental Health. 2 Credits.

Analysis of key concepts, principles, and applications of the primary natural and social science disciplines that underpin the core of environmental health.

### PH 722. Applied Community Health. 3 Credits.

This course is designed to provide students with knowledge and skills needed to address public health issues within community settings. Prereq: Public Health students only.

### PH 725. Promoting Health through Policy, System and Environment. 3 Credits.

This course will focus on health promotion at community, state, and national levels through policy, system, and environment (PSE) strategies through readings, films, writing, and discussion.

### PH 731. Biostatistics. 3 Credits.

This core course introduces the selection, use and interpretation of basic statistical tests and concepts that may be used in addressing, analyzing and solving problems in public health, biomedical and health care research.

**PH 735. Principles of Infectious Disease Management I. 3 Credits.**

The course is the first part of a two-part series that will provide a foundational overview of the major infectious diseases that have a significant impact on public health.

**PH 736. Principles of Infectious Disease Management II. 3 Credits.**

The course will build on PH 735, Principles of Infectious Disease Management I and focus on the epidemiology, clinical presentation, treatment, and control of the major communicable diseases. Prereq: PH 735.

**PH 741. Social and Behavioral Sciences in Public Health. 3 Credits.**

Foundation knowledge and competencies in applying social and behavioral sciences theories and methods to public health problems.

**PH 745. Community Health Leadership. 3 Credits.**

This course will focus on developing leadership and collaboration skills required by public health leaders to work with community leaders and organizations.

**PH 750. Epidemiologic Methods I. 2 Credits.**

This course covers the development of an observational epidemiologic study and the use and interpretation of methods and techniques for analyzing observational epidemiologic data. Prereq: PH 706, PH 731.

**PH 752. Epidemiologic Methods II. 2 Credits.**

Distribution and dynamics of disease in populations and methods for detecting and interpreting spatial patterns of disease.

**PH 753. Public Health Surveillance. 2 Credits.**

This course provides an introduction to public health surveillance and key characteristics of a variety of surveillance systems that can be utilized in all fields of public health practice. Lectures from experts in the field will provide real world examples and opportunities for students to interact with public health professionals.

**PH 754. Health Survey Research. 2 Credits.**

This course will familiarize students with the use of survey research methods. The course will cover practical issues in survey methods, with a focus on instrument development, mode of data collection, sampling, and minimizing survey error. The course will include hands-on development of a survey instrument, a cover letter, and a sampling plan.

**PH 765. Cultural Competence in Health Professions. 3 Credits.**

The purpose of this course is to provide education and skill building that will enable students to effectively utilize cultural and linguistic competence as a key tool to improve health outcomes and understanding of communication for diverse populations. PH students only.

**PH 772. American Indian Health Equity. 3 Credits.**

To provide a detailed overview of the basis for and regional differences in American Indian health inequity and disparities as well as strategies to reduce these in culturally appropriate ways. Prereq: Admission to the PH program.

**PH 774. Research and Evaluation in Tribal Communities. 3 Credits.**

The course will provide a detailed overview of the unique considerations for conducting health-related research and evaluation in Indigenous communities. Considerations include centering Indigenous ways of knowing and methodologies, creating community-driven research agendas, sovereignty, distrust of research and evaluation based on historical and contemporary abuses, effective partnerships with non-Indigenous allies, and strengths and limitations of datasets for addressing health disparities. Prereq: Admission to PH program.

**PH 775. Case Studies in Indian Health. 3 Credits.**

This course will provide an overview of several case studies in American Indian and Alaska Native Health that have been successfully implemented. The cases will be examined to determine what worked, why it worked, and challenges in developing successful programs. Prereq: Admission to the PH program.

**PH 789. Integrative Learning Experience. 1 Credit.**

Students must complete an integrative learning experience (ILE) that demonstrates synthesis of foundational and concentration competencies selected based on student's educational and professional goals. Must have department permission to register.

**PH 790. Graduate Seminar. 1-5 Credits.**

**PH 793. Individual Study. 1-5 Credits.**

**PH 794. Practicum. 1-8 Credits.**

**PH 795. Field Experience. 1-15 Credits.**

**PH 798. Master's Thesis. 1-10 Credits.**

**PH 899. Doctoral Dissertation. 1-15 Credits.**
