

School of Natural Resource Sciences

Department Information

- www.ndsu.edu/snrs (<http://www.ndsu.edu/snrs/>)

Undergraduate Programs of Study

- Natural Resources Management (major, minor)
- Range Science (minor)
- Soil Science (minor)

Graduate Programs of Study

- Entomology
- Natural Resources Management
- Range Science
- Soil Science

Degrees Offered

- Bachelor of Science (B.S.)
- Master of Natural Resources Management (M.N.R.M.)
- Master of Science (M.S.)
- Doctor of Philosophy (Ph.D.)

Department Description

Natural resources form the foundation of agronomic productivity and ecological health. Increasing global demands for fresh water, sustainable food supplies, energy, and a healthy environment requires preparation of graduates to study and manage these complex issues. The School of Natural Resource Sciences offers degrees in Natural Resource Management, which include six emphasis areas: Entomology; Environmental Sustainability; Outreach and Policy; Rangeland Ecology; Rangeland Livestock Production; Soil Science; and Water, Habitat, and Environmental Management. Faculty in the School are nationally recognized and careers range from local agronomists to global resource policy makers.
