Statistics

Department Information

- Department Chair: Rhonda Magel, Ph.D.
- Department Location: 221 Morrill Hall
- Department Phone: (701) 231-7177
- Department Email: ndsu.stats@ndsu.edu
- Department Web Site: www.ndsu.edu/statistics/ (http://www.ndsu.edu/statistics/)
- Application Deadline:

Application deadline is March 15 for international students and applicants who would like an opportunity for an assistantship if available.

- Credential Offered: Ph.D., M.S., Certificate
- Test Requirement: GRE (recommended)
- English Proficiency Requirements: TOEFL ibt 79; IELTS 6.5; Duolingo 105

Statistics Certificate (for non-majors)

The graduate certificate requires 12 semester credit hours consisting of graduate level courses in statistics. STAT 725 needs to be the first course taken for students with little or no prior knowledge of statistics. No credit will be given for STAT 725 for the certificate if it is not the first course taken. Students in the certificate program should not take both STAT 661 and STAT 726. STAT 726 is recommended. Also, students in this program should not take both STAT 670 and STAT 671. After completing the requirements for the certificate, please contact the Department of Statistics to verify completion.

Big Data Applied Statistics Analysis Certificate

This certificate serves graduate students and working professionals by providing summer online coursework in Big Data Applied Statistics Analysis. Analytics professionals are in demand in this era of big data. Students will learn how to visualize and use statistical learning algorithms to explore big data.

Code	Title	Credits
STAT 712	Applied Statistical Machine Learning	3
STAT 711	Basic Computational Statistics using R	3
STAT 713	Introduction to Data Science	3
STAT 714	Statistical Big Data Visualization	3
Total Credits		12

Master of Science in Applied Statistics

The program for the M.S. degree in applied statistics requires 32 semester credits with an overall GPA of 3.0 or higher. An oral defense of a researchbased thesis or paper is required.

Code	Title	Credits		
Complete a set of core courses* with a grade of B or better, including				
STAT 661	Applied Regression Models	3		
STAT 662	Introduction to Experimental Design	3		
STAT 764	Multivariate Methods	3		
or STAT 774	Generalized Linear Models			
STAT 767	Probability and Mathematical Statistics I	3		

2 Statistics

Probability and Mathematical Statistics II	3
racticums in consulting. Each statistical practicum will be listed as STAT 794	2
epends on number of research hours) of course work selected from the following courses:	9-12
Applied Survey Sampling	
Nonparametric Statistics	
Discrete Data Analysis	
Introduction to Biostatistics	
Statistical SAS Programming	
Introduction to the R Language	
Time Series	
Actuarial Statistical Risk Analysis	
Introductory Survival and Risk Analysis I	
Introductory Survival and Risk Analysis II	
Biostatistics	
Introduction to Bioinformatics	
Survival Analysis	
Using Statistics in Sports	
Advanced Inference	
Special Topics	
Bayesian Statistical Inference	
Applied Spatial Statistics	
Master's Thesis	
Master's Paper	
courses.	
	Probability and Mathematical Statistics II racticums in consulting. Each statistical practicum will be listed as STAT 794 epends on number of research hours) of course work selected from the following courses: Applied Survey Sampling Nonparametric Statistics Discrete Data Analysis Introduction to Biostatistics Statistical SAS Programming Introduction to the R Language Time Series Actuarial Statistical Risk Analysis Introductory Survival and Risk Analysis I Introductory Survival and Risk Analysis II Biostatistics Survival Analysis Using Statistics in Sports Advanced Inference Special Topics Bayesian Statistical Inference Applied Spatial Statistics

*If one of these courses has been taken at the undergraduate level, another graduate level course should be substituted. STAT 725 Applied Statistics and STAT 726 Applied Regression and Analysis of Variance will not be counted for this degree program.

- A plan of study must be submitted at least one semester prior to graduation.
- Pass a written comprehensive exam. This exam consists of two sections. Exam 1 covers STAT 767 Probability and Mathematical Statistics
 I and STAT 768 Probability and Mathematical Statistics II. Exam 2 covers STAT 661 Applied Regression Models, STAT 662 Introduction to
 Experimental Design and STAT 764 Multivariate Methods or STAT 774 Generalized Linear Models. Exam 1 is two hours and Exam 2 is three hours.
 These exams are offered during approximately the fifth week of each semester. A maximum of two attempts is allowed.
- · Complete and successfully defend the research thesis or paper.

M.S. Degree in Computer Science and Statistics

Code	Title	Credits
Statistics Courses		
STAT 661	Applied Regression Models	3
STAT 671	Introduction to the R Language	3
STAT 669	Introduction to Biostatistics	3
STAT 772	Computational Statistics	3
STAT 732	Introduction to Bioinformatics	3
One additional graduate course in sta Variance	atistics, not including STAT 725 Applied Statistics or STAT 726 Applied Regression and Analysis of	
Computer Science Courses		
CSCI 713	Software Development Processes	3
CSCI 724	Survey of Artificial Intelligence	3
CSCI 732	Introduction To Bioinformatics	3
CSCI 765	Introduction To Database Systems	3

Two additional graduate level courses in computer science.

Ph.D. Degree in Statistics

The program for the Ph.D. degree requires an additional 30 credits of course work beyond the M.S. degree and 30 hours of research. An oral defense of a dissertation is required. All students entering program must have an M.S. degree in statistics or closely related field. Any core course (or similar course) required for the M.S. degree that has not been taken before entering the Ph.D. program, must be taken before obtaining the Ph.D. degree. This may require additional course work beyond the 30 credits depending on the area in which the M.S. degree was obtained.

Successfully complete two 1-credit practicums in Consulting/Presentation Practicum. Each statistical practicum will be listed as **STAT 794** Practicum/Internship

Complete at least 30 semester credits of statistics courses at the 600- to 800-level (does not include STAT 725 Applied Statistics STAT 726 Applied Regression and Analysis of Variance). At least 15 credits must be at the 700- to 800-level. Students must take STAT 786 Advanced Inference, STAT 764 Multivariate Methods and STAT 774 Generalized Linear Models if not taken at the M.S. level.

Upon approval by the adviser and advisory committee, up to 9 hours may be taken in Mathematics or Computer Science. It is recommended that a student have knowledge of real analysis at some level such as MATH 650 Real Analysis I.

- A plan of study must be submitted at least one semester prior to graduation.
- Pass a written comprehensive exam. This exam consists of two sections. Exam 1 covers STAT 767 and STAT 768. Exam 2 covers STAT 661, STAT 662 and STAT 764 or STAT 774. Exam 1 is two hours and Exam 2 is three hours. These exams are offered during approximately the fifth week of each semester. A maximum of two attempts is allowed.
- · Submit a research proposal and pass an oral exam on the proposal and related topics.
- · Complete and successfully defend the research dissertation.

Code	Title	Credits
Core Courses		
STAT 661	Applied Regression Models	3
STAT 662	Introduction to Experimental Design	3
STAT 764	Multivariate Methods	3
or STAT 774	Generalized Linear Models	
STAT 767	Probability and Mathematical Statistics I	3
STAT 768	Probability and Mathematical Statistics II	3
Additional statistics courses, not including STAT 725 or STAT 726		30
If not taken at the M.S. level, student must take STAT 764, STAT 774, STAT 786.		
STAT 899	Doctoral Dissertation	
Total		60
