

# Robotics

---

## Department Information

- **Department Web Site:**  
[www.ndsu.edu/coe/](http://www.ndsu.edu/coe/) (<http://www.ndsu.edu/coe/>)
- **Credential Offered:**  
Minor
- **Official Program Curriculum:**  
[catalog.ndsu.edu/undergraduate/program-curriculum/robotics/](http://catalog.ndsu.edu/undergraduate/program-curriculum/robotics/) (<http://catalog.ndsu.edu/undergraduate/program-curriculum/robotics/>)

Robotics is a branch of engineering that combines mechanical engineering, electronics engineering, manufacturing engineering, computer science and other fields of engineering at different degrees. A minor in Robotics equips students with skills required for designing and construction of robot mechanisms; designing and development of electronic control systems using sensory feedback and information processing to generate robotic motions by various actuators; and programming and application of robots for carrying out tasks that would be regarded as dirty, dull and dangerous (DDD) to a human being.
