

# Food Science and Technology Minor

---

## Minor Requirements

Minimum Credits Required: 19

| Code                                                   | Title                                       | Credits   |
|--------------------------------------------------------|---------------------------------------------|-----------|
| <b>Required Core</b>                                   |                                             |           |
| CFS 210                                                | Introduction to Food Science and Technology | 3         |
| CFS 370                                                | Food Processing I                           | 3         |
| CFS 464                                                | Food Analysis                               | 3         |
| CFS 470                                                | Food Processing II                          | 3         |
| CFS 471                                                | Food Processing Laboratory                  | 1         |
| CFS 452                                                | Food Laws and Regulations                   | 3         |
| Elective Courses: Select 3 credits from the following: |                                             | 3         |
| ANSC 340                                               | Principles of Meat Science                  |           |
| ANSC 344                                               | Fundamentals of Meat Processing             |           |
| CFS 450                                                | Cereal Technology                           |           |
| CFS 460                                                | Food Chemistry                              |           |
| CFS 461                                                | Food Chemistry Laboratory                   |           |
| CFS 474                                                | Sensory Science of Foods                    |           |
| CFS 480                                                | Food Product Development                    |           |
| MICR 453                                               | Food Microbiology                           |           |
| PLSC 210                                               | Horticulture Science                        |           |
| PLSC 415                                               | Vegetable Crop Production                   |           |
| <b>Total Credits</b>                                   |                                             | <b>19</b> |

### Minor Requirements and Notes:

- A minimum of 8 credits must be taken at NDSU.
- Only grades of "C" or better accepted for minor courses.
