About the Catalog

The University Catalog is the official undergraduate and graduate catalog that includes information about academic programs and student services offered by North Dakota State University. It contains general University policies, as well as undergraduate and graduate academic policies and degree requirements, and the official curriculum for the academic year of publication. The catalog is published in an online format with the option to download a PDF of individual pages or a PDF of the entire catalog.

The catalog is intended to complement other university information including specific materials supplied by The Office of Admission, the Graduate School, and individual academic colleges and units. The catalog sections include the following:

- The academic policies, programs of study, and course descriptions sections are relevant for all students. Information in the admission and the undergraduate sections applies to undergraduate and professional students at the university. Information for graduate students, including admission, is available in the graduate section.
- The sections for colleges and departments link the reader directly to the official university websites for each academic college and unit. This is the same for the student resource section. Linking to the official university websites ensures that information is consistently up-to-date.
- The academic policies and information contained within this catalog are effective for the academic year of the published catalog. The past catalog archive section links to several prior years of the University Catalog.
- The undergraduate curricula in this catalog are effective for students who declare a program of study during the publication year of this catalog. Undergraduate students are subject to meeting the major requirements for declared majors and minors outlined in the Baccalaureate Degree and Graduation Requirements (https://catalog.ndsu.edu/academic-policies/undergraduate-policies/degree-and-graduation/) section of the catalog. Graduate students should refer to information provided in the Graduate (https://catalog.ndsu.edu/graduate/) section of the catalog.
- Questions about undergraduate academic policies and curriculum guides may be directed to the Office of Registration and Records (https://www.ndsu.edu/registrar/). Questions about graduate programs and policies can be directed to the Graduate School (https://www.ndsu.edu/gradschool/).
- It is important for students to be familiar with the information that applies to them, including policies and procedures related to registration, academic progress and degree requirements. Students are strongly encouraged to consistently consult their academic advisers to ensure they are completing requirements applicable to their degree and major programs.
- All new, current, and returning students should become well acquainted with the regulations regarding NDSU Policy 335: Academic Responsibility and Conduct (https://www.ndsu.edu/fileadmin/policy/335.pdf) and NDSU Policy 601: Rights and Responsibilities of Community: A Code of Student Conduct (https://www.ndsu.edu/fileadmin/policy/601.pdf).
- Information about the Family Educational Rights and Privacy Act of 1974 (https://www.ndsu.edu/onestop/student-privacy-policy-ferpa/), as amended, is available online or in the Office of Registration and Records.

Reservation of Rights (Subject to Change Statement)

Every effort has been made to provide accurate and current information; however, the right is reserved to change any of the rules and regulations of the university at any time, including those relating to admission, instruction, and graduation. The right to withdraw curricula and specific courses, change or discontinue programs, alter course content, change the calendar, and to impose or increase tuition and fees similarly is reserved. In some cases, requirements for programs and prerequisites for courses offered are effective even if they are not listed in this catalog. All such changes are effective at such times as the proper university authorities determine, and may apply not only to prospective students but also to those who are already enrolled in the university.

Non-discrimination Policy

North Dakota State University does not discriminate on the basis of age, color, disability, expression/identity, gender, genetic information, marital status, national origin, public assistance status, race, religion, sex, sexual orientation, or status as a U.S. veteran. Direct inquiries to the Office of the Vice Provost and Title IX Coordinator (https://www.ndsu.edu/equity/), Old Main 201, (701) 231-7708.

NDSU Overview

To learn more about North Dakota State University, visit ***About*** on the NDSU website. There you will find information related to the student-focused, land-grant, research heritage of the university. Information includes:

- Research status
- Enrollment numbers
- NDSU faculty and staff
- Campus map
- NDSU facts
- Mission statement

- Recent news
- Explore the Fargo-Moorhead community

Administration

- Office of the President (https://www.ndsu.edu/president/)
- Office of the Provost (https://www.ndsu.edu/provost/)
- President's Cabinet (https://www.ndsu.edu/president/about/the_presidents_cabinet/)

Accreditation

NDSU is accredited as an institution by the Higher Learning Commission (https://www.hlcommission.org/) and inquiries may be directed to them at 230 South LaSalle St., Suite 7-500, Chicago, IL 60604-1411. In addition, many programs are accredited or approved by their respective professional organizations and agencies.

Accrediting Agency Degrees and Programs

The following programs of study are accredited as listed below and in the college sections of this bulletin:

- Accreditation Commission for Programs in Hospitality Administration: Hospitality and Tourism Management (Bachelor of Arts and Bachelor of Science)
- Accreditation Council for Pharmacy Education (ACPE): Pharmacy Doctorate
- Accrediting Council for Education in Nutrition and Dietetics: Dietitian Education Program (Bachelor of Science); Didactic Program in Dietetics (Bachelor of Arts and Bachelor of Science)
- American Council for Construction Education: Construction Management
- American Society of Health-System Pharmacists: Pharmacy (Doctor of Pharmacy)
- American Veterinary Medical Association Committee on Veterinary Technician Education and Activities (AVMA): Veterinary Technology (Bachelor of Science)
- Association to Advance Collegiate Schools of Business: Business (Bachelor Science and Master of Business Administration)
- Certified Financial Planner Board of Standards: Family Financial Planning (Master of Science and Graduate Certificate)
- Commission on Accreditation for Respiratory Care: Respiratory Care (Bachelor of Science)
- Commission on Accreditation of Allied Health Education Programs: Exercise Science (Bachelor or Arts and Bachelor of Science)
- Commission on Accreditation of Athletic Training Education (CAATE): Athletic Training (Master of Athletic Training)
- Commission on Collegiate Nursing Education (CCNE): Bachelor of Science in Nursing; Master of Science in Nursing; Doctor of Nursing Practice
- Council for Interior Design Accreditation: Interior Design (Bachelor of Arts and Bachelor of Science)
- Council on Education for Public Health (CEPH): Public Health (Master of Science)
- Engineering Accreditation Commission of ABET, http://www.abet.org: Bachelor of Science degrees in: Agricultural and Biosystems Engineering, Civil Engineering, Computer Engineering, Construction Engineering, Electrical Engineering, Industrial Engineering and Management, Manufacturing Engineering, Mechanical Engineering
- Institute of Food Technologists: Food Science (Bachelor of Science)
- Joint Review Committee for Education in Radiologic Technology: Radiologic Sciences (Bachelor of Science)
- Landscape Architecture Accreditation Board: Bachelor of Landscape Architecture
- National Accrediting Agency for Clinical Laboratory Science: Medical Laboratory Science (Bachelor of Science)
- National Architectural Accrediting Board: Bachelor of Science in Architecture and Master of Architecture
- National Association for the Education of Young Children: Center for Child Development
- National Association of Schools of Art and Design: Visual Arts (Bachelor of Fine Arts, Bachelor of Arts and Bachelor of Science) and Interior Design (Bachelor of Arts and Bachelor of Science)
- National Association of Schools of Music: Music (Bachelor of Arts, Bachelor of Science, Bachelor of Music, Master of Music, Master of Music in Music Education, Doctor of Musical Arts)
- National Association of Schools of Theatre: Theatre (Bachelor of Fine Arts, Bachelor of Arts and Bachelor of Science)
- Council for the Accreditation of Educator Preparation: Teacher Education (Bachelor of Arts, Bachelor of Science, Master of Education and Master of Science); Education Administration (Master of Education and Master of Science); Counselor Education (Master of Education and Master of Science)
- National Council for Accreditation of Counseling and Related: School and Clinical Mental Health (Master of Education and Master of Science); Counselor Education and Supervision (Doctor of Philosophy)

Agencies Associated with the University

- North Dakota Agricultural Experiment Station (https://www.ag.ndsu.edu/research/)

State Board of Higher Education

Created by constitutional amendment in 1939, the State Board of Higher Education (https://ndus.edu/sbhe-overview/) is the governing body of North Dakota State University and all other state supported institutions of higher education in North Dakota. The board's chief executive officer is the Chancellor (https://ndus.edu/ndus-overview/ndus-chancellor/) of the North Dakota University System, with offices in the state capitol in Bismarck. More information regarding the State Board of Higher Education, including members, can be found on the North Dakota University System (https://ndus.edu/) website.

Admission

Our diverse student body is comprised of students from various backgrounds and identities, each seeking an academically rigorous education within a supportive community. No matter what type of student you are, we want to make your application experience as seamless as possible.

Domestic Undergraduate Admission

Choose one of the menu options on the right-hand side of the page to learn more about your specific application process and requirements. Prospective students can also visit the Office of Admission (https://www.ndsu.edu/admission/how_to_apply/) website for undergraduate domestic and permanent resident student application information.

International Undergraduate Admission

The Office of International Student & Study Abroad Services processes international undergraduate applications. Visit the **International Undergraduate Admission** website for undergraduate international student application requirements and to find out how to apply.

Graduate Admission

Admission to the Graduate School is a selective process intended to identify applicants who are outstanding among recipients of baccalaureate degrees. For graduate admission information, please visit the Graduate Admission catalog page (https://catalog.ndsu.edu/graduate/admission-information/) or the Graduate School website (https://www.ndsu.edu/gradschool/).

Readmission

For more information on returning to NDSU as a former student, select 'Undergraduate Readmission' in the menu on the right-hand side.

Domestic First-Year Admission

Applications for Domestic First-Year Admission are evaluated on an individual basis. The university uses selective criteria in order to assure adequate preparation which will enable students to be successful in their academic pursuits. For full procedures, deadlines and to apply for Domestic First-Year Admission, follow the First-Year Admission Procedures (https://www.ndsu.edu/admission/how_to_apply/first_year/requirements/) outlined online.

International First-Year Admission

For information regarding applications for international first-year applicants, please see the International Admission (https://catalog.ndsu.edu/admission/#internationaladmissiontext) catalog page.

Early Entry Admission

The Early Entry Program allows high school students to take courses at NDSU while still enrolled in high school. Students who are in their junior and senior year of high school and who have earned a cumulative GPA of 3.0 or higher are ideal candidates for the program. Early Entry students pay a reduced tuition and fees rate.

Students are encouraged to begin the application process at least one month prior to the semester they wish to take classes. See the Early Entry Admission Procedures (https://www.ndsu.edu/admission/how_to_apply/early_entry_program/) to ensure all necessary steps are completed. Students are required to participate in a brief orientation session with an admission representative following registration. To begin enrollment as an Early Entry student, contact the Office of Admission (https://www.ndsu.edu/admission/contact/).

The Early Entry Program is different from early admission status. Early admission is primarily used for high-school students as conditional acceptance into a specific degree program. Early entry is also different from dual credit (https://www.ndsu.edu/dce/k12_students/early_entry/) in that you do not earn high school credit for these courses unless you seek permission from your high school or home school.

International Students Early Entry Admission

International student applicants attending high school in the United States who are interested in Early Entry admission should first begin by contacting the international undergraduate admission team in the Office of International Student & Study Abroad Services (https://www.ndsu.edu/international/about/contact/).

Domestic Transfer Admission

NDSU considers a transfer applicant's overall academic performance when making an admission decision. An applicant's cumulative college grade point average (GPA) and high school preparation (if applicable) are taken into consideration when evaluating an applicant. For full procedures, deadlines and to apply for Domestic Transfer Admission, follow the Transfer Admission Procedures (https://www.ndsu.edu/admission/how_to_apply/transfer/) outlined online.

International Transfer Admission

For information regarding applications for international transfer applicants, please see the International Admission (https://catalog.ndsu.edu/admission/#internationaladmissiontext) catalog page.

International Student Admission

All international undergraduate applicants must demonstrate English proficiency by providing official results from an approved proficiency exam such as the TOEFL, IELTS, Duolingo English Test, ACT, or SAT. There are exemptions to this requirement located here (https://www.ndsu.edu/admission/how_to_apply/international/english_proficiency/). Contact the Office of International Student & Study Abroad Services (https://www.ndsu.edu/international/about/contact/) if you feel you qualify for this exemption. For full admission procedures, deadlines, and to apply, follow the steps outlined on the International Admission (https://www.ndsu.edu/international/apply/undergraduate/) page. Students who have been suspended from other institutions will not be considered for admission to NDSU until the suspension has been lifted by that institution or until one year has elapsed.

For First-Year international undergraduate admission, applicants must meet the following requirements:

- Applicants should have an educational background in the core curriculum of laboratory science, mathematics, social science, and English. A secondary or high school grade point average of at least 2.75 (4.0 scale) or the equivalent in core subjects is recommended.

FOR TRANSFER INTERNATIONAL UNDERGRADUATE ADMISSION, APPLICANTS MUST MEET THE FOLLOWING REQUIREMENTS:

- A student is considered a transfer applicant if they have 24 or more transferable college credits completed at the time of application. A decision will be based on your college academic record including coursework attempted, coursework completed and cumulative GPA from all previously attended post-secondary institutions. A post-secondary/university grade point average (GPA) of 2.0 (4.0 scale) or the equivalent, is recommended.

Non-Degree Seeking Admission

Special status is reserved for non-degree seeking students who wish to enroll in a limited number of courses at NDSU. Students are limited in the number of credits they can complete as a non-degree student and are not eligible for financial aid. Students currently enrolled at another college or university who plan to take limited coursework at NDSU with intention of transferring credits back to their home institution, but not earn an NDSU degree, should follow application procedures for non-degree student status.

Some courses are limited to students in select programs of study, in specified classifications (i.e., junior or senior status), or are restricted by prerequisite/corequisite coursework. Such information is listed in the course descriptions (https://bulletin.ndsu.edu/course-catalog/descriptions/) of the catalog or in the course search feature in the student information system, Campus Connection. If restrictions are placed on the courses in which you are interested in enrolling as a non-degree seeking student, permission to enroll may be sought through the academic department responsible for teaching the class.

For full procedures on domestic undergraduate non-degree seeking admission, visit the Non-Degree Seeking Applicants **(**https://www.ndsu.edu/admission/how_to_apply/non_degree/**)** website.

International Non-Degree Seeking Admission

International undergraduate applicants seeking non-degree admission should visit the International Admission (https://www.ndsu.edu/international/apply/undergraduate/) website.

For full procedures on graduate non-degree seeking admission, visit the **Non-Degree Graduate Applicants** website.

Selective and Limited Admission Programs

Admission to a number of academic programs is selective and/or limited. Admission to the university does not guarantee entrance to a specific major. Supplemental applications may be required for students seeking admission to professional-level programs. Some programs require that minimum standards be met and maintained for continuous enrollment and advancement in the program. Contact your respective department for further admission criteria.

Undergraduate Reactivation/Readmission

Undergraduate or Doctor of Pharmacy students who discontinue enrollment, either voluntary or involuntary, for one or more semesters (except summer) must request to reactivate their record before being eligible to enroll in classes. To begin this process, students complete and submit the Undergraduate Reactivation/Petition for Readmission (https://www.ndsu.edu/onestop/undergraduate-reactivationpetition-readmission/) form. It is recommended that all students begin this process early as deadlines will apply.

During a discontinued enrollment period from NDSU, students who attended one or more institutions must identify those institutions on the *Reactivation/Petition* form and arrange to have official transcripts submitted for review. NDSU is able to retrieve academic transcripts from other North Dakota University System (NDUS) institutions at no charge to students, but the institution must be identified on the form when submitted. Students must arrange for other transcripts from outside of the NDUS system to be sent to the address listed in the *Previous Enrollment* section of

the form. Students should be aware that a reactivation decision could be placed on hold or rescinded if official transcripts are not received. Students seeking reactivation/readmission must achieve a minimum cumulative GPA of 2.00 at these other institutions. If the minimum cumulative GPA of 2.00 was not achieved, students are also considered for reactivation/readmission if their minimum cumulative GPA of 2.00 is met by combining the GPA from all institutions attended.

Deadlines and Academic Standing Considerations

Students who discontinued enrollment from NDSU in good academic standing

Students who left NDSU in good academic standing (NDSU cumulative GPA is 2.00 or higher) must submit the form no later than 5:00 PM on Friday of the first week of classes for the term the student is seeking to be re-enrolled. *Reactivation* forms will not be processed after this deadline and students will have to submit a new reactivation form for a future semester. Students should be aware that a reactivation decision could be rescinded if official transcripts are not received before the start of the next semester or it is found the students' cumulative GPA at other institutions or all institutions does not meet the 2.00 minimum.

Students who discontinued enrollment from NDSU with an academic alert or Continued alert

Students who left the university with one of these academic deficiencies in their last semester at NDSU is considered to be eligible to enroll in classes. However, students who attended one or more institutions after leaving NDSU will be required to submit official transcripts *before* a reactivation decision can be granted. It is highly recommended a student submit the *Reactivation* form early and arrange to have transcripts send if this applies. Students need to be aware that a reactivation decision cannot be considered if these transcripts are not received or the cumulative GPA from these other institutions is not 2.00. For students who did not attend elsewhere, the latest a form may be received is no later than 5:00 PM on Friday of the first week of classes for the term the student would like to enroll. *Reactivation* forms will not be processed after this time/day and to be readmitted in a future semester, students will have to submit a new reactivation form for a future semester. **(Prior to fall 2022 these standings were warning, probation and continued probation.)**

Students who discontinued enrollment from NDSU as a result of an academic suspension (Petition for Readmission)

Students who served the university's imposed academic suspension for a minimum of two semesters must ***Petition for Readmission*** by the deadlines indicated below. It should be noted that readmission is not guaranteed but is influenced by the document the student must upload in the section titled *Returning from an NDSU Academic Suspension*. This document and the student's previous academic performance are assessed by a readmission committee.

As a result of this process, an earlier deadline is necessary to ensure that the committee has had adequate time to review the readmission material fully. Should the decision to readmit be granted, students require adequate time to find and use university resources, which may include meeting and discussing an educational plan for enrollment with an academic advisor. Forms submitted after the deadline will be considered for a future semester. The 2.00 minimum cumulative GPA standards described above will be applied to students who attended other institutions during the suspension period. The deadlines for the ***Petition for Readmission*** process are:

- Readmission consideration in a Spring semester = November 20 (until midnight)
- Readmission consideration in a Fall semester = July 20 (until midnight)
- Summer semester readmission is not supported. Students returning from an academic suspension are strongly discouraged from taking summer classes due to the expedited timeline of classes. Students are shown to be more successful returning in either a fall or spring semester.

Graduate Admission Policies

Admission Requirements

Admission to the College of Graduate and Interdisciplinary Studies (Graduate College) is a selective process intended to identify applicants who are outstanding among recipients of baccalaureate degrees. The following minimum qualifications are required of all students seeking an advanced degree:

1. The applicant must have a baccalaureate degree from an educational institution of recognized standing.
   a. Applicants still completing a baccalaureate degree may apply.
2. The applicant must have adequate preparation in the chosen field of study and must show potential to undertake advanced study and research as evidenced by academic performance and experience.
3. At the baccalaureate level, the applicant must have earned a cumulative grade point average (GPA) of at least 3.0, or equivalent, to attain full standing in a graduate degree program. Applicants whose last degree completed is a graduate degree may be admitted in full standing if the final GPA of that degree is at least 3.0 or equivalent.

Each program may set higher qualifications and may require the submission of additional evidence of academic performance.

Application Requirements

All degree and certificate seeking applicants must submit the following to complete the application process. Additional application requirements are found on the Graduate College website: https://www.ndsu.edu/gradschool/apply (https://www.ndsu.edu/gradschool/apply/).

- Online Application for Graduate Admission
  - Current graduate students adding a graduate certificate must submit the Request to Add a Certificate to a Graduate Degree (https://powerforms.docusign.net/f3f9def4-ea91-4164-9e08-2e549196549f/?env=na3&acct=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7&accountId=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7) form and $35 application fee to apply.
- $35 application fee
- Official transcripts
  - Non-degree applicants are not required to submit transcripts.
  - When a transcript is submitted in advance of completion of either undergraduate or graduate studies, an updated transcript showing all course credits, grades, and degree completions must be provided prior to initial registration at NDSU.

Applying to Multiple Programs

To apply for additional programs, a separate application and $35 fee are required for each. Other previously submitted documents may be used for additional applications, please email ndsu.grad.school@ndsu.edu (ndsu.grad.school@ndsu.edu?subject=Use%20application%20material%20from%20previous%20application) to notify our admissions team.

English Language Proficiency

All graduate applicants, regardless of citizenship or residency, must demonstrate proficiency with the English language before they will be considered for admission to a graduate program.

This requirement may be met by applicants who have:

- Been raised in a recognized country where English is the only official language. A list of exempt counties (https://www.ndsu.edu/gradschool/apply/international/#:~:text=Countries%20Exempt%20from%20the%20English%20Proficiency%20Examination%20Requirement) is found on the Graduate College website.
- Earned a bachelor's degree or higher from a recognized institution in a recognized country where English is the only official language.
- Achieved a satisfactory TOEFL (Test of English as a Foreign Language), IELTS (International English Language Testing System), or Duolingo score. The test date must be within two years of the date of the application to the Graduate College. Minimum scores required:
  - Test of English as a Foreign Language (TOEFL (https://www.ets.org/toefl/)): 71 (internet-based)
  - Duolingo (https://englishtest.duolingo.com/): 105 (internet-based)
  - International English Language Testing System (IELTS (https://www.ielts.org/)): 6.0 (academic version)

Please note that applicants meeting the criteria above may need to contact the Graduate College to ensure their exemption from the test of English proficiency requirement.

Admission Status

Full Graduate Standing

These students have met all requirements for admission and have been accepted by a program leading to a graduate degree. A student must have full graduate standing to receive a graduate degree.

Conditional Standing

Students in conditional standing do not meet all requirements for admission or have deficiencies in prerequisite course work; however, they show potential for successful graduate study. Upon admission in conditional standing, the student's program must specify conditions to be satisfied for a change in status to full graduate standing.

Admitted students with an undergraduate cumulative grade point average (CGPA) below 3.0 at the time of admission will be placed in conditional standing by the Graduate College. The condition placed by the Graduate College requires the student to earn a CGPA of 3.0 or higher in their first nine graduate didactic credits; additional conditions may be placed by the student's academic program.

Students admitted under conditional status are automatically placed on academic warning until the conditions of admission are met (see Academic Standing (https://catalog.ndsu.edu/graduate/graduate-school-policies/#academicstandardstext)).

Students admitted conditionally to a graduate program cannot earn more than 12 graduate credits prior to completing the conditions of admission. However, an exception to this policy enables programs to allow students admitted to an accelerated degree program to earn up to one-half of their required program's graduate credits while in conditional standing. Graduate credits earned beyond 15 while conditionally admitted may not be eligible for undergraduate financial aid and would be charged at the graduate tuition rate.

Non-Degree Enrollment

This category is for individuals who desire to pursue study beyond the baccalaureate degree for personal growth and improvement of skills but not in order to work toward an advanced degree objective. Some courses may have prerequisites or other requirements, which may require consultation and permission to enroll from course instructors. In courses with limited enrollment, preference is given to degree-seeking students.

Students enrolled with non-degree status are not eligible for graduate assistantships, tuition waivers, or federal title IV student financial assistance. Students in this category are affiliated with the Graduate College and not an academic program. Professional development graduate courses (numbered 600 or 2000), offered by NDSU Distance and Continuing Education (https://www.ndsu.edu/dce/), are not eligible to use toward a graduate degree.

Non-degree students who wish to become degree-seeking students must complete the admission process through the Graduate College (including a new application and fee). No more than 10 credits earned as a non-degree student may be used toward a graduate degree, and must be approved by the student's adviser, supervisory committee (if applicable) and the graduate program coordinator.

Student Financial Information

Comprehensive student financial information can be found on the One Stop (https://www.ndsu.edu/onestop/) website. Students and families can use this website for information related to students accounts, including tuition and fees, payment information, financial aid and scholarship opportunities, and policies and procedures related to residency and tuition reciprocity programs. In addition, NDSU is committed to providing resources to veteran and military students and dependents that will help guide them in receiving educational benefits.

- Financial Aid and Scholarships (https://www.ndsu.edu/onestop/financial-aid-and-scholarships/)
- Residency and Tuition Reciprocity (https://www.ndsu.edu/onestop/residency-and-reciprocity/)
- Tuition and Billing (https://www.ndsu.edu/onestop/tuition-and-billing/)
- Military and Veteran's Education Benefits and Certification (https://www.ndsu.edu/veterans/)

Academic Policies

Academic policies, procedures, rules, guidelines and regulations are all part of academic compliance and are adopted to insure that programs at North Dakota State University are consistently of high quality. It is the responsibility of NDSU students and employees to comply with the standards set-forth within this publication and any regulation published on the NDSU website. These policies, procedures, rules, guidelines, and regulations maintain NDSU's academic compliance with federal and state regulations and meet quality standards set forth by the Higher Learning Commission (HLC) (https://www.hlcommission.org/).

Academic Advising and the Career and Advising Center

Academic Advising

North Dakota State University is committed to an advising experience to assist students in reaching their full potential. The successful development of our students will be an intentional outcome of a partnership between advisor and advisee that provides accurate, supportive and quality information.

We envision an advising process that is:

- Consistent and student centered from matriculation through graduation
- Holistic, exploring academic, career, and life decisions
- Integrated and designed to encourage advising relationships and services across all units of the university#(Academic, Career, and Well-being)
- Developmental
- Continually evaluated and responsive to data
- Committed to accessible, inclusive, and equitable practices

We envision advisors who are:

- Knowledgeable
- Accessible and approachable
- Caring and responsive

We envision advisees who are:

- Engaged in the advising relationship
- Responsible and prepared for advising discussions
- Aware of resources regarding campus policies and procedures

Following admission to NDSU, each student is assigned an advisor from the college or department in which the student is majoring. If a major has not been declared, an assignment is made with an advisor in the Career and Advising Center (https://career-advising.ndsu.edu/). Advisors assist students in selecting courses to ensure a balanced education and they help interpret university and college policies and requirements. However, students are responsible for their academic decisions and meeting all program requirements including the selection of courses, meeting course requisites (co-requisites/prerequisites), and adhering to policies, procedures, and deadlines. Students are encouraged to see their advisor prior to registration and to consult the university Bulletin for all degree program requirements. Students with advisor holds are required to meet with their advisors before the hold is lifted. advisor assignments and holds can be viewed on Campus Connection.

Degree Map (https://www.ndsu.edu/registrar/degreemap/) is an interactive planning tool for students and advisors to plan a path to graduation. Degree Map works alongside the Academic Requirements Report (https://www.ndsu.edu/onestop/viewing-academic-requirement-report/) within Campus Connection, so students can plan their class schedules, remaining requirements, and set academic and career goals to discuss with their academic advisor.

Each of the academic colleges has a Degree and Records Analyst (https://www.ndsu.edu/registrar/office/analysts/) within the Office of Registration and Records who serves as a central point of contact to support and facilitate academic advising activities for faculty and professional advisors working with undergraduate (including pharmacy programs) student degree progress.

Career and Advising Center

Students often choose to enter college without a declared major but with the goal of exploring various academic and career opportunities. At NDSU those students are served through the Career and Advising Center, whose mission is to guide academic exploration, provide academic advising services to undeclared/exploratory students, and support academic and career exploration.

Working one-on-one with an academic advisor in the Center, students choose one of five Exploratory Areas to guide their academic choices. Exploratory Areas are collections of majors at NDSU that can lead to careers in related fields. The five Exploratory Areas (https://career-advising.ndsu.edu/exploratory-areas/) are listed below:

- Science, Technology, Engineering & Math (https://career-advising.ndsu.edu/stem-and-applied-sciences-exploratory-area/) – an area for students interested in how and why things work or who enjoy using facts and figures to create innovative solutions to issues in fields like science, engineering and agriculture.
- Health & Life Sciences (https://career-advising.ndsu.edu/health-and-life-science-exploratory-area/) – an area for students fascinated by science and medicine, who enjoy solving problems and investigating the unknown. Ideal for students interested in a health field by becoming a practitioner or researching, creating and promoting health-related products and information.
- Social Science, Human Services & Education (https://career-advising.ndsu.edu/social-science-human-service-and-education-exploratory-area/) – an area for students who want to work in education and other people-oriented, helping fields. Teaching, counseling and advising are just some of the common traits.
- Liberal Arts, Communication & Design (https://career-advising.ndsu.edu/liberal-arts-communication-design-exploratory-area/) – an area for students interested in the arts, theory, history and design. Fits well with those who enjoy designing something new and being creative with music, art and language.
- Business Studies (https://career-advising.ndsu.edu/business-studies-exploratory-area/) – an area for students interested in working within a variety of settings like corporate offices or non-profit organizations. Leadership, analysis, marketing and persuasion are just a few characteristics common to this area.

Advising staff will confirm a student's choice of Exploratory Area during summer orientation and use it to help build the most appropriate course schedule, incorporating academic interests and goals. Students are encouraged to take 15-16 credits each semester that include general education requirements as well as a course to explore a major of interest. Advisors maintain a list of courses that can either serve as an introduction to a particular major or as a foundational course in that major's curriculum and work with students to select exploratory options.

Students may declare a major – or change their current major to undeclared so they can broadly explore their academic options – whenever they feel confident in doing so. Most students declare a major by the time they have completed approximately 45 credits or about three semesters of classwork.

Location & Contact Information:

306 Ceres Hall

701-231-7111

ndsu.cac@ndsu.edu

https://career-advising.ndsu.edu/

Academic Calendar & Final Exams

Calendar Year

NDSU operates on a semester system consisting of two standard 16-week fall and spring semesters, plus a final examination week. A 12-week summer semester is also offered. In all semesters, variable-length, short-session courses are available, and meet the same total contact (class) hours as in a standard semester. See definition of an academic credit (p. 31).

Mid-Term

The mid-term point of a standard semester is approximately 40 class days after the standard semester start. See mid-term grading (p. 37).

Summer Semester

The 12-week summer semester is designed to provide coursework within various time intervals called sessions. Summer classes carry full academic credit because classes meet the same number of contact hours as the standard fall or spring semester. Students should refer to the Dates and Deadlines (https://www.ndsu.edu/onestop/dates-and-deadlines/) webpage on the One Stop website for session start and end dates, as well as the drop/add deadlines for the summer semester. For information on summer school, please refer to the summer session (https://www.ndsu.edu/summer/) website.

Final Examinations

The schedule for final examinations is determined and published by the Office of Registration and Records.

Final examinations (NDSU Policy 336 (https://www.ndsu.edu/fileadmin/policy/336.pdf)) in one-credit or variable length short courses are usually given during the last regular class period. Final examinations for all other courses may not be rescheduled during the final examination period. According to State Board of Higher Education policy, the final examination period is instructional time and, if an examination is not given, some instructional use of this period is expected. Final examinations for summer school and distance and continuing education classes are arranged by the instructors.

No student shall be obligated to take more than three final examinations scheduled for the same calendar day. In the event that a student has four or more final examinations on the same calendar day, the student shall notify the instructor(s) from the highest numbered course(s) no later than two weeks before the last day of class to schedule a make-up examination to be administered at a mutually acceptable time.

Dead Week

Only one exam or quiz per course may be given during the last two weeks of the semester (prorated accordingly for variable length courses), which includes finals week. Exceptions include summer classes, self-paced/correspondence courses, make-up exams, courses in which laboratory is incorporated with a lecture, one-credit courses, and quizzes that account for less than 5% of the students' overall grade. If a professor chooses to give an exam during the last week of classes, he/she is expected to make some instructional use of the final examination time.

Academic Credit

NDSU Credit Hour Definition

NDSU defines and assigns credit hours in accordance with the requirements articulated by the United States Department of Education, the Higher Learning Commission, and the North Dakota State Board of Higher Education.

Specifically, NDSU defines a “credit hour” as an amount of student work represented in intended learning outcomes and verified by evidence of student achievement that reasonably approximates:

1. Not less than 50 minutes of classroom or direct faculty instruction and a minimum of two hours out-of-class student work each week for approximately fifteen weeks for one semester, or the equivalent amount of work over a different period of time; or
2. At least an equivalent amount of work as outlined in item 1 above for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.

A clock hour at NDSU is normally represented as 50 minutes of lecture or structured student/faculty interaction or 2-3 hours of laboratory session each week of the semester or at least the equivalent of work.

The University adopts the federal and state definitions of the credit hour, regardless of the mode of delivery, including but not limited to: self-paced, synchronous online, asynchronous online, hybrid, lecture, seminar, and laboratory.

Academic Honesty and Integrity

NDSU strives to create an atmosphere of honesty, trust, and integrity amongst its students, faculty, staff. Faculty members are responsible for providing guidelines concerning academic honesty and expectations at the beginning of the semester for each course.

Students are responsible for submitting their own work. Students who cooperate on oral or written examinations or work without authorization share the responsibility for violation of academic principles and are subject to disciplinary action even when one of the students is not enrolled in the course where the violation occurred. Students have the right to be informed when they are suspected of violating academic principles and have the right to a fair opportunity to refute them.

Faculty have the prerogative of determining the penalty regarding prohibited academic conduct in their classes. Faculty members may, among other sanctions, fail the student for the particular assignment, test, or course involved. Penalties may be varied with the gravity of the offense and the circumstances of the particular case. A student may not drop a course in which they have been formally accused of academic misconduct. Any instructor who suspects a student of academic misconduct must contact Registration and Records to issue an "IP" grade while the investigation is being conducted. Students are prohibited from forfeiting, withdrawing, or dropping any courses for which they have been found guilty of academic misconduct.

Faculty members will report the incident via the ***Student Academic Misconduct Report*** form linked from the Academic Honesty and Integrity website. In cases of repeat offenses, higher sanctions, up to and including suspension or expulsion may be recommended to the Provost and Committee on Academic Standards.

Refer to the Academic Honesty and Integrity (https://www.ndsu.edu/academichonesty/) website for more information regarding NDSU's academic honesty and integrity, student expectations, disciplinary sanctions, appeal procedures, and hearing guidelines.

Class Attendance

At NDSU class attendance refer to NDSU Policy Manual, Policy 333 (https://www.ndsu.edu/fileadmin/policy/333.pdf) for specific student and instructor responsibilities, including absence information. Class attendance policies may not have discriminatory effect (intentional or unintentional) on members of a protected class (see NDSU Policy 100 (https://www.ndsu.edu/fileadmin/policy/100.pdf)).

NOTE: Missing class due to common illnesses is inevitable at some point. The past few years have certainly shown the importance of staying home when symptomatic, as to limit exposure to others. Student Health Service (SHS) routinely receives requests for class absence excuses, which they can provide, however, the illnesses students are typically presenting with are generally best cared for by rest and self-care at home. Requiring documentation for things such as sore throats, cold symptoms, or mild gastrointestinal illnesses is not only inconvenient for students, but will likely also incur an unnecessary cost.

Co-Curricular Activities

Student participation in co-curricular activities is encouraged as an important aspect of college life and is viewed as helping fulfill social and educational needs as well as developing leadership ability. Information about participation eligibility in co-curricular activities can be found on the Dean (https://www.ndsu.edu/deanofstudents/student_rights_and_responsibilities/eligibility_for_participation_in_co_curricular_activities/)of Students website.

Commencement

Commencement exercises are held at the close of fall and spring semesters for students earning bachelor, master and/or doctoral degrees.

Students who complete graduation requirements during the summer are eligible to participate in the May commencement ceremony within the calendar year of their graduation. To participate in the May commencement exercises, students must be registered in the remaining graduation requirements for the summer session of the same year.

A student may participate in commencement only once for a particular degree. The date of degree conferral will be printed on the academic transcript and diploma according to the academic calendar of the university.

Reservations for student participation in the commencement ceremony must be made by the date specified by the Office of Registration and Records. Orders for caps, gowns, and hoods are made by the date specified by the NDSU Bookstore (http://www.ndsubookstore.com/). Commencement information is available at www.ndsu.edu/commencement (https://www.ndsu.edu/commencement/).

Degrees Offered and Accelerated Degree Programs

A degree is the title of the credential that the university confers on a graduate who has completed all university requirements. Degrees are defined by the State Board of Higher Education of the North Dakota University System Policy 409: Degrees Offered (https://ndusbpos.sharepoint.com/:w:/s/NDUSPoliciesandProcedures/EUI_EJRtUx1HoaFZyCfqD2MBrVyhonpUFz0OnGPLZ1RU7A/?e=9ANFbL).

Degree Types Defined

Certificate of Completion - A certificate awarded for the completion of an undergraduate course of study of less than nine credit hours or a graduate course of study of less than eight credit hours.

Program Certificate - A program certificate is a course of study requiring a minimum of nine credit hours at the undergraduate level or eight credit hours at the graduate level. A certificate program can be completed in one year of study or less.

Bachelor's Degree - A bachelor's degree requires a minimum of 120 semester credits. A baccalaureate degree is comprised of academic courses in general education and a major field of study consisting of a minimum of 32 credits related to an academic area. Majors may include subplans (also called options, specializations, concentrations, emphasis areas, etc.) which are a specific identified group of courses consisting of a minimum of 12 credits. Subplans may not always appear on the transcript; this is determined by the department at the time of the subplan request. In addition to a major, students may also wish to pursue a minor program of study as part of their bachelor's degree (see Other Credential Offered below).

Master's Degree - The Master of Arts and Master of Science degrees require a minimum of 30 credit hours in courses that carry graduate credit.

Education Specialist - This degree requires a minimum of 60 credit hours in courses that carry graduate credit beyond the baccalaureate degree. This degree is a professional degree for certification in an educational field.

Doctoral Degree - A Doctor of Philosophy degree requires a minimum of 90 credit hours beyond the bachelor's degree in courses that carry graduate credit with a substantial component of independent research. A Doctor of Education degree also requires a minimum of 90 credit hours beyond the bachelor's degree and it recognizes the completion of academic preparation for professional practice in education. A Doctor of Musical Arts requires

a minimum of 90 credits beyond the baccalaureate degree. A Doctor of Pharmacy degree is a terminal degree program that prepared individuals to practice pharmacy. A Doctor of Nursing Practice requires 86 credit hours beyond the bachelor's degree and prepares nurses to make contributions to evidence-based practice through professional leadership and scholarly practice and to function as clinical educators of future nurses.

Other Credentials Offered

Minor - A minor is a similar grouping courses in a field of study with a minimum of 16 credit hours. Minors cannot be earned without the student also completing a major program of study. Only after a baccalaureate degree is earned at NDSU can a student return to pursue a minor on its own.

Undergraduate Degrees

Most undergraduate degree recipients at NDSU earn a Bachelor of Science (B.S.) degree, however, many programs of study result in a specialized degree. Students may also pursue a Bachelor of Arts (B.A.) degree, if available for their selected major, by completing the Bachelor of Arts Requirements Using a Second Language (p. 68) and/or requirements as specified by their academic college on the program curriculum guide.

NDSU confers the following degrees at the undergraduate level:

- Bachelor of Arts (B.A.)
- Bachelor of Fine Arts (B.F.A.)
- Bachelor of Music (B.Mus.)
- Bachelor of Science (B.S.)
- Bachelor of Science in Agricultural and Biosystems Engineering (B.S.A.B.En.)
- Bachelor of Science in Architecture (B.S.Arch.)
- Bachelor of Science in Civil Engineering (B.S.C.E.)
- Bachelor of Science in Computer Engineering (B.S.Cpr.E.)
- Bachelor of Science in Construction Engineering (B.S.Con.E.)
- Bachelor of Science in Construction Management (B.S.Cons.M.)
- Bachelor of Science in Environmental Engineering (B.S.Env.E.)
- Bachelor of Science in Electrical Engineering (B.S.E.E.)
- Bachelor of Science in Industrial Engineering and Management (B.S.I.E.Mgt.)
- Bachelor of Science in Manufacturing Engineering (B.S.Mfg.E.)
- Bachelor of Science in Mechanical Engineering (B.S.M.E.)
- Bachelor of Science in Nursing (B.S.N.)
- Bachelor of University Studies (B.U.S.)

Graduate Degrees

NDSU awards the following graduate degrees:

- Doctor of Education (Ed.D.)
- Doctor of Musical Arts (D.M.A.)
- Doctor of Nursing Practice (D.N.P.)
- Doctor of Pharmacy (Pharm.D.)
- Doctor of Philosophy (Ph.D.)
- Education Specialist (Ed.S.)
- Master of Accountancy (M.Acc.)
- Master of Architecture (M.Arch.)
- Master of Arts (M.A.)
- Master of Athletic Training (M.A.Trg.)
- Master of Business Administration (M.B.A.)
- Master of Construction Management (M.Cons.M.)
- Master of Education (M.Ed.)
- Master of Engineering (M.Engr.)
- Master of Landscape Architecture (M.L.A.)
- Master of Music (M.M.)
- Master of Natural Resources Management (M.N.R.M.)
- Master of Public Health (M.P.H.)
- Master of Public Health in Epidemiology (M.P.H.Epi.)

- Master of Public Policy (M.P.P.)
- Master of Science (M.S.)
- Master of Software Engineering (M.S.E.)
- Master of Supply Chain Management (M.S.C.M.)

Accelerated Degree Programs

NDSU offers accelerated programs of study in a variety of academic disciplines. These programs provide an opportunity for highly-qualified students to earn both a bachelor's degree and master's degree in a cost-effective, high-quality and timely manner. The following disciplines are available as a combined accelerated program where requirements for each degree have been agreed upon by the faculty:

Undergraduate Program	Graduate Program
B.S. in Agribusiness	**M.S. in Agribusiness & Applied Economics**
B.S. in Agricultural Economics	**M.S. in Agribusiness & Applied Economics**
B.S.A.B.En. in Agricultural and Biosystems Engineering	**M.S. in Agricultural and Biosystems Engineering**
B.S. in Animal Science	**M.P.H. in Public Health**
B.S. in Biochemistry & Molecular Biology	**M.S. in Biochemistry**
B.S. or B.A. in Biological Sciences	**M.S. in Biology**
B.S. in Biotechnology	**M.S. in Microbiology**
B.S. in Chemistry	**M.S. in Chemistry**
B.S.C.E. in Civil Engineering	**M.S.CVE. in Civil Engineering**
Minor in Coatings & Polymeric Materials*	**M.S. in Coatings & Polymeric Materials**
B.S.Con.E. in Construction Engineering	**M.S. or M.Cons.M. in Construction Management**
B.S.Con.E. in Construction Engineering	**M.S.CVE. in Civil Engineering**
B.S.Cons.M. in Construction Management	**Master of Business Administration**
B.S.Cons.M. in Construction Management	**M.S. or M.Cons.M. in Construction Management**
B.S.Cpr.E. in Computer Engineering	**M.S. or M.Engr. in Electrical & Computer Engineering**
B.S. in Computer Science	**M.S. in Computer Science**
B.S. or B.A. in Criminal Justice	**M.S. in Criminal Justice**
B.S. in Crop and Weed Science	**M.S. in Plant Sciences**
B.S. or B.A. in Economics	**M.S. in Agribusiness & Applied Economics**
B.S.E.E. in Electrical Engineering	**M.S. or M. Engr. in Electrical & Computer Engineering**
B.S. in Emergency Management	**M.P.H. in Public Health**
B.S. in Exercise Science	**M.A.Trg. in Athletic Training**
B.S. in Food Science	**M.S. in Cereal Science**
B.S. in Health Services	**M.P.H. in Public Health**
B.S. in Horticulture & Urban Agriculture	**M.S. in Horticulture & Urban Agriculture**
B.S. in Human Development & Family Science	**M.S. in Human Development & Family Science**
B.S.I.E.Mgt. in Industrial Engineering and Management	**Master of Business Administration**
B.S. in Mathematics	**M.S. in Mathematics**
B.S.M.E. in Mechanical Engineering	**M.S. in Mechanical Engineering**
B.S. in Microbiology	**M.S. in Microbiology**
B.S. in Microbiology	**M.P.H. in Public Health**
B.S. in Natural Resources Management	**M.N.R.M in Natural Resources Mgt. (not eligible with the M.S. in NRM)**
B.S. in Nutrition Science	**M.S. in Dietetics**
B.S. in Nutrition Science	**M.P.H. in Public Health**
B.S. in Nutrition Science	**M.S. in Health, Nutrition and Exercise Science - Exercise Science & Nutrition option**
B.S. or B.A. in Physics	**M.S. in Physics**
B.S. or B.A. in Political Science	**M.P.P. in Public Policy**
B.S. in Psychology	**M.P.H. in Public Health**
B.S. in Sport Management	**M.S. in Sport Management**

Guidelines for Accelerated Bachelors to Masters Programs

The following guidelines set the minimal expectations for combined/accelerated students and programs. Academic departments may set more stringent standards.

- Student must complete at least 60 credits at the undergraduate level prior to conditional admission to the College of Graduate and Interdisciplinary Studies (https://www.ndsu.edu/gradschool/).
- Interested and eligible students must submit a Accelerated Program Degree Program Declaration Form (https://powerforms.docusign.net/b40bdfd4-58b2-46bb-8fb3-3a890efd93de/?env=na3&acct=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7) to the director of the graduate program of choice. The graduate program director will evaluate the student's proposed set of graduate classes to determine whether the student will be able to complete them as part of an accelerated program.
- Next, the student's undergraduate major or minor department chairperson/head will evaluate and approve the substitution of the graduate level courses into the undergraduate program as noted in the chart below. A maximum of 15 graduate student credits may be applied to the undergraduate degree.

UGRD Credits to be Satisfied by GRAD coursework	Academic Unit Approving the Couse Substitution
Open Electives	**UGRD Academic Major**
Optional Minor	**UGRD Academic Minor**
Required Minor	**UGRD Academic Minor**
Major	**UGRD Academic Major**

- After receiving the necessary approvals noted above, the student will submit the declaration form to the Graduate School and formally apply for admission to the graduate program.
- All admissions to the Graduate College will be conditional. The minimum condition is completion of the bachelor's degree prior to full standing in the master's program, and the student must maintain a 3.00 CGPA in their graduate classes. Other conditions related to academic performance may be added by the academic unit or Graduate School.
- No undergraduate course may be counted toward a master's degree.
- Students entering the master's degree with a bachelor's degree in hand may not use courses earned as part of the bachelor's program for master's requirements, even if those courses were graduate level courses.
- Students must meet all requirements that would ordinarily be expected of those enrolled in the master's program.

Degree Posting and Diploma Information

Degree Posting

Undergraduate students must declare their intent to graduate with the Office of Registration and Records. Graduate students must also declare their graduation intent with the Graduate School. Degrees are posted to academic records three times per academic year - at the close of each semester. Conferral date of the degree is the last day of finals week, which is the last instructional day of the term. It takes approximately three weeks for the degree to be posted to the academic record at the close of the semester in which degree requirements were reviewed to be successfully completed.

Diplomas

Diplomas are mailed approximately five weeks following the close of the academic semester in which graduation requirements have been completed. Diplomas will not be released for students who have outstanding debts owed to the university or who have select other holds. Students are responsible for submitting name and address updates for diploma processing. Should a diploma be returned for an insufficient address, the Office of Registration and Records makes every attempt to obtain an updated address. When an updated address is not available, it is held in the Office of Registration and Records for one year, after which time a student will need to request a diploma replacement.

A diploma replacement (https://www.ndsu.edu/onestop/diploma-replacement-requests/) service is provided by the Office of Registration and Records for those who have lost or damaged their original diploma.

FERPA

The Family Educational Rights and Privacy Act of 1974 (FERPA), as amended, is the Federal law which requires educational institutions to establish written policy with regard to the privacy rights of students and to safeguard their educational records. North Dakota State University is committed to maintaining the privacy and confidentiality of education records in accordance with the provisions of FERPA. As a part of our commitment, students have the following rights pertaining to their educational records at the university:

1. The right to inspect and review the student's education records within 45 days of the day the University receives a request for access.
2. The right to request the amendment of the student's education records that the student believes are inaccurate, misleading, or otherwise in violation of the student's privacy rights.

3. The right to consent to disclosures of personally identifiable information contained in the student's education records, except to the extent that FERPA authorizes disclosure without consent.
4. The right to request personally identifiable information, or directory information, not be made public.
5. The right to file a complaint with the U.S. Department of Education concerning alleged failure by NDSU to comply with the requirements of FERPA: U.S. Department of Education, Student Privacy Policy Office, 400 Maryland Avenue SW, Washington, DC 20202.

Grades and Grading

Grades and Honor Points

NDSU has three grading periods per academic year: fall semester, spring semester, and summer session. The quality of student work and achievement of learning outcomes is indicated by a letter grade. In computing scholastic averages, each letter grade is assigned a specific number of honor points for each credit earned. Student work is reported in terms of grade-point average for the term and institutional grade-point average for the composite of work at NDSU. Calculations are based on the following:

Grade Descriptions

Passing Grades

		Honor Points Per Credit
A	Excellent	4.0
B	Good	3.0
C	Average	2.0
D	Passing	1.0
P	Pass (D or better) - undergraduate	*
S	Satisfactory (C or better) - graduate	*
W	Withdrew	*
AU	Audit	*

Non-passing Grades

		Honor Points Per Credit
F	Failure	0.0
I	Incomplete	*
U	Unsatisfactory - graduate	*

*
Not calculated in grade-point average, but may be calculated in attempted credits for satisfactory academic progress (https://www.ndsu.edu/onestop/finaid/sap/) (SAP) used for financial aid eligibility.

Grade Point Average (GPA) Calculation

Semester (or term) GPA refers to the grade-point average for any given grading period. Cumulative or institutional GPA refers to the composite grade-point average for all courses and grading periods completed at NDSU.

Institutional cumulative grade-point average is calculated by dividing the total number of honor points earned at NDSU by the total number of credit hours in which honor points were recorded, including grades of 'F'. NDSU GPA calculations do not include developmental coursework, which does not count toward the graduation requirements. Coursework/grades accepted in transfer by NDSU are not included in the institutional cumulative GPA, and are not used in calculations for determining academic standing with the University. Refer also to Pass/Fail Grading and Repeated Courses.

Course Failures

A failing (F) grade may not be removed by special examination or transfer credit. When a failing grade has been assigned, credit for that course may be earned only by repeating it at NDSU, or via Tri-College, and completing the course satisfactorily. Review the Repeated Courses (p. 43) policy for full details.

Pass-Fail Grading

Pass-fail grading is available for undergraduate courses; however, the pass/fail option may not be used for courses taken to meet general education requirements, unless the course is only offered pass/fail. Students are advised to check degree-program restrictions regarding acceptance of pass/fail credits. Pass/Fail Option Request forms (https://www.ndsu.edu/onestop/student-forms/) may be acquired online. Forms must be signed by the student's adviser. Pass/fail policies include the following:

1. Students are limited to a total of 16 credits under the pass/fail grading option. Courses that are offered only for pass/fail grading for all students who enroll are not included in the 16-credit limitation. (Waived during the COVID-19 pandemic in spring 2020 and fall 2020.)
2. Approval for the pass/fail option must be filed in the Office of Registration and Records by the published pass/fail deadline of the semester. Variable length and summer courses have prorated deadlines according to actual course length. Review the online dates and deadline (https://www.ndsu.edu/onestop/dates-and-deadlines/) schedule for specific information regarding variable length and summer course deadlines.
3. Once a pass/fail request has been submitted and processes, it may not be changed back to a regular letter grade.
4. A grade of 'P' is without honor points and is not included in the grade-point computation; however, a grade of 'F' is included in the grade-point computation.
5. If a course is taken for a regular grade, it cannot be repeated on a pass/fail basis.

Mid-Term Grading

As an early intervention effort to improve retention and academic progress of students, faculty are encouraged to enter deficient mid-term grades of D and F, at minimum, in undergraduate courses. Notifications are sent to students with reported deficient mid-term grades. Mid-term grades are not considered official grades and do not appear on student academic transcripts.

Final Grades

Grades for all students in all degree-eligible courses are entered by the grade loading deadline each term to allow important end-of-term academic and financial processes to run, and to ensure timely notifications may be sent to students. Final grades entered into Campus Connection by instructors are posted to student records approximately 2-3 business days after the close of final examination week.

Grade Changes

With the exception of incomplete grades, a course grade issued by an instructor and recorded on an academic record is considered final. For the student who has reason to believe the grade issued is incorrect, the student must initiate a request for a change of a grade with the instructor within fifteen (15) instructional days of the first day of the semester immediately following the semester in which the grade was assigned. For Spring Semester courses, the request may be made within fifteen (15) instructional days of the start of Fall Semester, if the student is not enrolled for the summer term. If deemed appropriate, the instructor may submit a change of grade to the Office of Registration and Records via a **Grade Reporting Form**. Grade changes may only be considered for students who have not yet earned a degree.

Grade Appeals

If a grade dispute between the student and instructor is not resolved through the grade change process, the student may engage in the full, formal Grade Appeals process outlined within the NDSU Policy Manual, Section 337: Grade Appeals Board (https://www.ndsu.edu/fileadmin/policy/337.pdf). Grade appeals may only be considered for students who have not yet earned a degree.

Grades of Incomplete

Under extraordinary circumstances and at the discretion of the instructor, a student may be assigned a grade of Incomplete (I). The following policies apply to Incomplete grades:

1. The grade of Incomplete is assigned to indicate that satisfactory work has been completed up to within five weeks of the semester end, and that circumstances beyond the student's control prevented completion of the work. The time period is proportional for variable length courses and summer session.
2. The grade of Incomplete is not to be given in any instance where the student has a deficiency of more than five weeks (or equivalent) of work including final exam week.
3. Grades of Incomplete are initiated by student request. The student must contact the instructor, request an Incomplete grade, and, upon instructor approval, make arrangements to complete the work.
4. The grade of Incomplete (I) is an administrative grade that may only be entered by the Office of Registration and Records, except in courses designated as practicum, internship, individual study, field experience, or study abroad.
5. FORM and DEADLINE: An **Incomplete Grade Reporting Form** detailing the work to be completed, expected completion date (see #6), and grading standard is to be completed by the course instructor. This is an electronic form submitted to the Office of Registration and Records by the grade submission deadline for the semester in which the course was taken.
6. Grades of Incomplete, including those for most course types identified in #4, must be removed no later than the end of the seventh week of the next full semester (fall or spring) or by the completion date set by instructor if other than the standard seventh week. The time period is proportional for variable length courses and summer session.
7. Grades of Incomplete are removed when the student has completed all course requirements and the instructor of the course files a **Grade Reporting Form**.
8. All grades of Incomplete that are not removed within the specified time are automatically changed to 'F' grades by the Office of Registration and Records.
9. Instructors may specify completion deadlines for remaining work on the **Incomplete Grade Reporting Form** earlier than the standard deadlines.

10. Requests for extensions beyond the expected completion date require approval by both the instructor and the chair of the department offering the course. The extended deadline must be indicated on the **Incomplete Grade Reporting Form** and may not exceed two Incomplete conversion/deadline cycles. If a grade is not submitted by the specified deadline, the Incomplete grade will convert to a grade of 'F'. Contact Registration and Records for date extension.
11. Grades of Incomplete, which convert to grades of 'F', earned in the last semester of attendance by a student who leaves the university for two or more years may be changed to Withdrawn ('W') upon re-enrollment. Requests for this privilege must be filed with the Office of Registration and Records during the first term of re-entry.
12. An Incomplete grade may be converted to a letter grade (or P/F, S/U) according to the above guidelines, but may not be expunged from the record.
13. Students may not register in courses in which they currently hold grades of Incomplete, except for courses that are repeatable for credit.
14. Students are not allowed to graduate with Incomplete grades on their academic records. Upon graduation, unconverted Incomplete grades will convert to grades of 'F'. If a course in which an Incomplete grade was assigned is required for graduation, the instructor may extend the deadline according to the above procedures and timelines, and graduation will be postponed.
15. Students who receive grades of Incomplete or converted grades of F may appeal disputed grades in accordance with NDSU Policy, Section 337: Grade Appeals Board (https://www.ndsu.edu/fileadmin/policy/337.pdf).

Military and Veteran Certification

The Military and Veteran Certification Office is your one stop shop for everything military benefits. Whether you are a Guardsmen, Reservist, Active Duty, Veteran, or Dependent receiving benefits from a relative then you would go the Military and Veteran Certification Office first. Benefits differ based on your classification and status so visit with your School Certifying Official to learn more. Most programs include a monetary stipend and tuition assistance.

North Dakota guard members also receive a tuition waiver that pays for part of your tuition. If you are a North Dakota Resident and your parent or guardian is 100% disabled, there is a tuition waiver that covers the cost of tuition for 48 months. For more information, please visit your School Certifying Official. Contact information can be found on the Military and Veterans Certification (https://www.ndsu.edu/veterans/) website.

Project 65

Individuals aged 65 or over may audit one course per semester free of tuition and related mandatory fees as outline within North Dakota State Board of Higher Education Policy 805.3: Fees (https://ndusbpos.sharepoint.com/:w:/s/NDUSPoliciesandProcedures/EXZY1ANs-3lDtaHaQ4tJxKIBX3yID19gIa4hSi_pLCh79Q/?rtime=eOQStM8u2kg). First time Project 65 participants must complete an application through the Office of Admission to get started. Once the application is complete, participants are responsible for course selection and need to obtain a Class Permit from the academic department teaching the course. The instructor/department staff will issue the Class Permit with the Project 65 authorization. Class Permits must be received in accordance with published dates and deadline for the semester.

As a course auditor (https://catalog.ndsu.edu/academic-policies/registration/#auditingtext), participants of Project 65 are encouraged to purchase the textbooks for their courses. The transcript of a Project 65 participant will show a grade of 'AU' (audit) for the course, which will not count as credit toward a degree. By definition, an auditor may attend class only as a listener. Participants wishing to earn credit must be fully admitted to a degree program, pay all tuition and fees and complete all course assignments and tests.

Participants may contact Registration and Records (https://www.ndsu.edu/registrar/) with questions about the program.

Registration

Students must be properly admitted and fully enrolled to attend classes. Students ultimately are responsible for all course registration activity and they are expected to monitor their schedule of classes and drop courses that they do not intend to complete by the published deadlines; this includes dropping individual courses or withdrawing from a semester. Dates and deadlines for advising and registration are made available in the Dates and Deadlines (https://www.ndsu.edu/onestop/dates-and-deadlines/) calendar posted online. Students are encouraged to visit with an academic adviser before registering for classes *(see* Academic Advising *(p. 29))*.Campus Connection is an online web-based system that students can access from a variety of web browsers, such as Firefox and Google Chrome. Registration instructions (https://www.ndsu.edu/registrar/registration/) are posted online.

For registration purposes, students are grouped into the following general categories:

- **Currently enrolled students:** Currently enrolled students or those who had registration in a prior standard semester (fall or spring) are assigned registration appointment times according to total credits earned. Registration appointments can be viewed on Campus Connection.
- **Returning students:** Returning students are those who have previously attended NDSU, but who have not been in attendance for at least one full semester (fall or spring). Returning students are assigned a registration appointment time according to total credits earned after the Reactivation/Petition for Readmission (https://www.ndsu.edu/onestop/undergraduate-reactivationpetition-readmission/) form is received and processed in the Office of Registration and Records. Students are notified of their readmission status via the email address the student provides on the Reactivation/Petition form. After processing and notification, student may view their registration appointment times via Campus Connection.

- **New students:** Detailed information regarding registration options is sent to all new students from Student Success Programs (https://www.ndsu.edu/studentsuccess/). Incoming freshmen, including first year students with transfer credit, will work with academic advisors to enroll in courses for their first semester.
- **Transfer students:** Admitted transfer students may register in Campus Connection or they may attend a transfer orientation and registration program. Transfer student registration appointment times are based on the total number of credits accepted in transfer to NDSU.

Financial Obligation Agreement

The North Dakota University System Financial Obligation Agreement (https://www.ndsu.edu/onestop/financial-obligation-agreement/) (FOA) is used to verify that a student has acknowledged their financial responsibility to the University when they register for courses. Students must access, review and accept the FOA prior to registration for each term of enrollment in Campus Connection. It is in the students' best interest to read the full terms of agreement as this agreement is enforced and the terms of financial obligation are upheld by the University.

Classroom Instruction Mode

The university offers classroom instruction in a variety modes. The course delivery mode is assigned to each class and can be viewed when the student is enrolling for classes. NDSU instruction modes include:

- **On Campus Face to Face** - Describes the traditional classroom setting where the instructor and students are physically located in the same place and may incorporate the use of multiple supportive technologies as appropriate.
- **Off Campus Face to Face** - Describes the traditional classroom setting where the instructor and student are physically located in the same place in an off campus location and may incorporate the use of multiple supportive technologies as appropriate.
- **Online Asynchronous** - Online instruction occurring independent of time or location
- **Online Synchronous** - Online instruction occurring independent of location, but at the same time (real time).
- **Hybrid/Blended** - A form of instruction that includes students from different locations and/or environments (face-to-face, online, IVN, etc.) for synchronous and/or asynchronous instruction.
- **Independent Study** - Instruction is provided in a self-study, self-paced format where the instructor and student mutually establish method(s) of communication.

Changes in Registration

Registration deadlines for all courses are posted in the online Dates and Deadlines (https://www.ndsu.edu/onestop/dates-and-deadlines/) calendar. Deadlines for regular and variable length courses, as well as summer session courses, are adjusted proportionately. Students are always responsible for course registration activity and they are expected to review and monitor their schedule of classes and drop courses that they do not intend to complete by published dates and deadlines; this includes dropping individual courses or withdrawing from a semester. Questions related to registration should be directed to the Office of Registration and Records (https://www.ndsu.edu/registrar/).

Adding & Dropping Individual Courses

Enrollment Add Deadline

Students may add courses to their schedules via Campus Connection until the published deadline in the Dates and Deadlines calendar.

Class Permits

All students are expected to have added their courses via Campus Connection one week from the start of the semester. After the deadline to add via Campus Connection, an authorized "Class Permit" for each course to be added must be acquired from the department offering the course and submitted to the Office of Registration and Records. Courses will not be added to a student's record after the semester has concluded.

Dropping Courses

Students who register and determine they no longer wish to be enrolled in a class are responsible to drop the classes that they do not intend to complete. Students failing to drop courses by published deadlines will result in failing grades and debt owed the university based on the NDUS Financial Obligation Agreement (https://www.ndsu.edu/onestop/financial-obligation-agreement/) (FOA) that the student accepts when registering for classes. Students drop classes via Campus Connection through the semester drop deadlines published in the online Dates and Deadlines calendar. Students wishing to drop all of their classes in a semester need to refer to the Withdrawing to Zero Credits section below.

- **No-record drops:** Students may drop a course from their schedule without it appearing on their academic record until the published *No Record Drop* deadline for standard and variable length courses. Refer to the Dates and Deadlines calendar for both regular session and variable session no-record drop deadlines.
- **Record (W) drops:** Students may continue to drop courses after the no-record drop period until the published *With Record Drop* deadline for standard and variable length courses. However, such drops are recorded on student transcripts with 'W'. Grades of W do not count as attempted credit for grade-point averages on the academic record, but are counted in attempted credits for financial aid satisfactory academic progress (https://www.ndsu.edu/onestop/finaid/sap/) (SAP). Refer to the Dates and Deadlines calendar for both regular session and variable session with-record drop deadlines.

Administrative Drop

Administrative drops are used in courses with high demand that typically have significant wait list numbers. At no time should students rely on instructors or departments to administratively drop them from classes. Instructors or departments have the option to administratively drop students who have not attended the first week (and in some cases, the first meeting) of a high demand lecture or laboratory course, or students who do not meet all course pre-requisites or co-requisites. Administrative course drop requests made by instructors/departments are submitted to the Office of Registration and Records within the first week of a class meeting for processing.

Withdrawing to Zero Credits in a Semester

- **Cancellation of Registration (before classes start)**

  Students who register and then decide not to attend NDSU **before** the semester start date must cancel their registration by submitting a Cancellation of Registration/Withdraw to Zero Credits (https://www.ndsu.edu/onestop/withdrawing-classes/?CONTEXTIDPARAMS=TEMPLATE_ID%3aPTPPNAVCOL&scname=G_NCOL_NDSU_NDUS_EFORMS&PanelCollapsible=Y&PTPPB_GROUPLET_ID=G_TILE_NDSU_NDUS_EFORMS&CRefName=G_T form. Forms must be submitted to NDSU One Stop. **It is not possible for a student to cancel registration online using Campus Connection; students must submit the form.** Cancellations are not accepted by telephone. Cancellations completed ***prior to the semester start date*** result in a full refund and no courses appear on the academic transcript.

- **Withdrawal to Zero Credits (after classes have started)**

  Students who have registered and then wish to drop all courses ***after the semester start date*** must officially withdraw from the university by submitting a Cancellation of Registration/Withdraw to Zero Credits (https://www.ndsu.edu/onestop/withdrawing-classes/?CONTEXTIDPARAMS=TEMPLATE_ID%3aPTPPNAVCOL&scname=G_NCOL_NDSU_NDUS_EFORMS&PanelCollapsible=Y&PTPPB_GROUPLET_ID=G_TILE_NDSU_NDUS_EFORMS&CRefName=G_T form by the semester deadline published on the Dates and Deadlines calendar. **It is not possible for a student to withdraw from all of their classes in a semester online using Campus Connection; students must submit the form.** Failure to initiate the withdrawal process will result in the grades earned in the course appearing on the academic transcript and financial obligations owed to the university. Tuition refund (https://www.ndsu.edu/onestop/effects-dropping-or-withdrawing/) information may be reviewed on the One Stop website. Steps to withdraw from all courses include the following:

1. Read and complete the Cancellation of Registration/Withdraw to Zero Credits form. Submit to NDSU One Stop.
2. Students are responsible for any unpaid bills at the time of withdrawal.
3. Withdrawal forms must be submitted by the published deadline of the semester. Withdrawals received after this date will not be processed. Students who have a documented compelling reason or circumstance which prevented them from submitting the Withdraw to Zero Credits form by the published deadline may appeal using the Missed Deadline Appeal (https://www.ndsu.edu/onestop/forms/) (grades not yet posted to record) or the Retroactive Withdraw Appeal (see the section below).
4. Students should not attempt to drop all of their courses, their last course, or their only course via Campus Connection.
5. Unlike refunds for individual course drops, withdrawal refunds (https://www.ndsu.edu/onestop/accounts/dropping_withdrawing/) are prorated and are based on complete withdrawals from all courses, course lengths, and withdrawal dates.
6. If a final grade for any course taken in the semester is posted to the NDSU transcript, students are not eligible to Withdraw to Zero Credits. Students may drop the remainder of courses in accordance with the published drop deadlines for the semester (see Adding/Dropping Individual Courses above). Students may view their unofficial transcript in Campus Connection.

Retroactive Withdrawals

Students seeking to withdraw after final grades have been posted to the academic transcript as a result of extenuating circumstances beyond their control, which is documented with dated evidence, may appeal for a retroactive withdrawal. Students must submit An *Appeal for Retroactive Withdrawal* prior to 3 years after the close of the term being requested. Retroactive withdrawals appeals *(*https://www.ndsu.edu/onestop/forms/***) must be considered for all courses taken in one or more semesters as a result of these extenuating circumstances; selective course drops are not allowed. Students are not eligible to request a retroactive withdrawal from any semester that contributes attempted credit to an earned degree and the degree GPA.** A student will complete the *Appeal for Retroactive Withdrawal*, which requires:

- the student to acknowledge understanding a series of academic statements;
- provide a detailed explanation that includes dates of the extenuating circumstance, which was beyond the control of the student that impacted the student's learning during the identified semester(s), and;
- includes dated documented evidence of the circumstance which prevented the student from either disrupted learning during the semester or from withdrawing on or before the published deadline for the semester(s).

Once the appeal material is gathered, the student will submit the *Appeal for Retroactive Withdrawal* and all supporting documentation to the Office of Registration and Records. Appeals are reviewed and final decisions are rendered in the college of the student's current academic major by either a designated individual or appointed committee. Decisions by the college are final.

Auditing & Wait Listing Courses

Auditing Courses

An auditor may attend classes only as a listener, without participation in regular class exercises. No credit is received for audited courses, and an 'AU' grade appears on the transcript. A student cannot fail an audit; however, an instructor may assign a 'WAU' (withdrawn) for non-attendance.

Audit Process: A student is admitted to a class as an auditor when a Class Permit is issued by the course instructor or the academic department. The department or course instructor submits the Class Permit to the Office of Registration and Records for enrollment processing on or before the semester deadline published in the Dates and Deadlines Calendar. Once the audit registration is processed, the decision cannot be reversed.

Audit Fee: The audit fee is one-half of the regular tuition rate, based on the student's residency, and is included in the tuition cap. No student fees will be assessed.

Wait Listed Classes

NDSU utilizes a wait list feature in Campus Connection for most classes. Students attempting to register for a class that has reached its enrollment capacity may add themselves to a wait list. Wait list processes run daily until the No Record Drop deadline for a class. Students should monitor their position on a wait list and will be automatically enrolled if a seat becomes available and no holds or course restrictions prevent enrollment. Students are notified via their official NDSU email if enrolled in a class via the wait list process. Students no longer wishing to be enrolled in a wait listed class must drop it from their study list using Campus Connection. Students wishing to enroll in a class that does not utilize the wait list process may contact the academic department offering the course for enrollment options.

Dual Career Registration

Students are permitted to register for classes according to their classification level with the university. However, there are instances when a graduate student may need to enroll in undergraduate courses as per-requisite preparation for a graduate program of study. In addition, on a limited basis, permission may be granted for an undergraduate student to take graduate level courses.

1. Graduate students who need to enroll in undergraduate coursework must follow the procedure below that most closely matches their academic intent. Students will complete and submit the Dual Career Registration (https://www.ndsu.edu/sites/default/files/onestop/Forms/dualugcourses.pdf) form for the following situations:
   - Undergraduate coursework is a prerequisite or condition of admission to a graduate program of study. Approval is granted by the Graduate School. The student will enroll for these courses on an undergraduate academic record and billing will be at the undergraduate rate.
   - A graduate student would like to take undergraduate coursework at the same time they are enrolled in graduate courses either as a non-degree seeking student or for an undergraduate program of study. For an undergraduate program of study, the student must submit either an Undergraduate Application for Admission (https://www.ndsu.edu/admission/admission_information/application/) (if never enrolled as an undergraduate at NDSU) to the Office of Admission or an Undergraduate Reactivation Form (https://www.ndsu.edu/onestop/undergraduate-reactivationpetition-readmission/) (if previously enrolled as an undergraduate at NDSU) to the Office of Registration and Records. The student will enroll in the undergraduate coursework on an undergraduate academic record and be billed at the undergraduate rate. Graduate tuition waivers will not cover undergraduate coursework. (Not for accelerated program. See #2 for approved accelerated programs)
   - On a limited basis and only with permission, undergraduate coursework may be applied to a graduate program of study (select programs only). Students must obtain approval from the Graduate School. The undergraduate coursework will appear on a graduate academic record and be billed at the graduate rate.
2. Undergraduate students who wish to enroll in graduate coursework must make application to the Graduate School and be admitted to take graduate level courses.
   - Applies to undergraduate students who have been approved for an accelerated program of study. Students must make formal application to the Graduate School and be accepted into an approved graduate program of study concurrently with an approved undergraduate program of study. Students enroll in graduate level coursework on an graduate academic record and are billed at the graduate rate. No more than 15 credits of graduate level coursework can be applied to an undergraduate program of study. Specific coursework is to be identified on the Accelerated Declaration form submitted to the Graduate School with the Graduate School application. The credit for the graduate courses is applied as transfer credit onto the undergraduate record to satisfy predetermined undergraduate major program of study requirements.

Collaborative Registration

A collaborative student is one who chooses to enroll at more than one North Dakota University System (NDUS) institution for a particular term. The institution from which the student is earning a degree is considered the *"**home institution**"*. The institution(s) that supplies courses for a degree is considered the *"**provider institution(s)**"*. The following guidelines pertain to courses taken collaboratively:

1. A student must be enrolled in at least one degree credit course at NDSU before enrolling in a collaborative course including the summer semester. Excluded from this requirement are students using the faculty/staff tuition waiver.
2. Only fully admitted undergraduate and graduate students in good academic standing (GPA of 2.0 or higher) are allowed to enroll collaboratively. Students requiring ASC 86 or ASC 87 are exempt from the academic standing requirement.
3. The collaborative process allows NDSU to combine credits from more than one NDUS institution for the purpose of financial aid (for courses added through the seventh business day from the start of the term).
4. Collaborative courses are not subject to the NDSU tuition cap.
5. The provider institution's tuition/fees for collaborative course(s) are included in the student's accounts receivable balance at NDSU.
6. Not all scholarships will pay for collaborative tuition and fees assessed by the non-NDSU/provider campus. Please check with the awarding organization to confirm. NDSU-funded tuition discounts may not be applied to any collaborative charges.
7. Students must be in good financial standing to be eligible for collaborative course registration.
8. The student cannot exceed a total of 20 credits between NDSU and the provider institution(s) without special permission from the Registrar at home and provider campuses.
9. The student must follow NDSU's academic dates and deadlines for adding/dropping collaborative courses.
10. Drops/adds must be administered by submitting an updated collaborative registration form to the home institution. NDSU students may submit the form to the Office of Registration and Records, 110 Ceres Hall.
11. Courses will be posted to the NDSU academic record as transfer credit once NDSU receives an official transcript from the provider institution. ***Note:*** *Grades earned in collaborative courses may be used in determining financial aid satisfactory progress.*
    a. Graduate students using collaborative credits to satisfy NDSU graduate program degree requirements must either a) list the collaborative credits as transfer credits on their plan of study form, or b) submit the Request for Change to Plan of Study (https://powerforms.docusign.net/20c075c4-741c-4c43-8767-4c48338ddfaf/?env=na3&acct=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7&accountId=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7) form and indicate which degree requirements the collaborative credits are satisfying on their advisement report.
12. Completion of the Collaborative Student Contract and Registration (https://www.ndsu.edu/onestop/forms/) form does not guarantee registration into the requested course(s). Registration is not considered completed until the student has received confirmation of enrollment from the provider institution. However, if the request(s) cannot be processed, the student will be notified via their NDSU e-mail address.
13. Collaborative registration is not an option for repeating courses previously taken at NDSU. If students wish to take advantage of the repeated course opportunity to improve a grade, that course must be repeated at NDSU.
14. Due to federal compliance, course repeats via collaborative registration will be prohibited to prevent significant federal financial aid impacts which could result in over-payment of federal financial aid funds.
15. The option to wait-list is subject to the provider institution's discretion and does not guarantee enrollment into the requested course(s).

Summer Registration

The 12-week summer session is designed to provide instruction within various time intervals throughout the summer. Classes are offered in several sessions throughout the summer. While the time interval of the individual sessions is different than that of the standard semester (16 weeks), each course carries full credit because classes meet the same number of contact hours as in the standard fall or spring semesters. In addition, deadlines for summer session courses are adjusted proportionately. Students are responsible for making changes to their registration according to published summer Dates and Deadlines calendar. (https://www.ndsu.edu/onestop/dates-and-deadlines/)

Each college or department determines its summer offerings. The summer session course offerings schedule is available in Campus Connection. For more information about summer schedule visit the Summer Schedule website (https://www.ndsu.edu/summer/).

Fees and Housing

Summer tuition and fees are available online (https://www.ndsu.edu/onestop/accounts/tuition/). Information concerning summer housing may be secured by contacting the Department of Residence Life (https://www.ndsu.edu/reslife/), Dept. 5310, P.O. Box 6050, Fargo, ND 58108, or 701-231-7557 (toll-free 1-800-572-8840).

Graduate Work

A considerable number of graduate courses are offered, but generally the summer serves as an important term for students to work on their research requirements, especially if field work is involved. Work on disquisitions and individual study arrangements frequently are facilitated during summers. Courses scheduled to begin at different times and for varying periods provide a high level of flexibility. Thus, those who may have only a portion of a given summer available are likely to find courses that meet their scheduling limitations. In addition, workshops, internships, and other special programs are offered. Teachers generally find the summer school designed to offer attractive selections as components of a degree program, as well as courses directed toward improvement of professional skills. Persons interested in graduate programs of study are encouraged to contact the Graduate School (https://www.ndsu.edu/gradschool/) for further information.

Repeated Courses

At NDSU, repeating a course is defined as retaking the same course on a student's NDSU academic transcript in an attempt to improve a grade. The course repeat option is available to students who have not graduated. Repeats are processed at the end of a semester after grades have been posted. Exceptions to this repeated courses policy are not considered due to the GPA impact of the NDSU student record. The following criteria applies:

1. Credit earned in any given course (or equivalent course) is applicable to a degree requirement only once; therefore the course repeat option to improve the cumulative GPA is only available to students who have not earned a degree. Repeat attempts made in semesters following a degree posting will remain on the academic record along with the new grade, but the credit and honor points are excluded from cumulative GPA and credit calculations, and the repeated course will be marked "Repeated: Post Degree-Not Included in Cum Totals."
2. If a course is completed at NDSU first and an attempt is made to repeat that course at another institution, the credit is considered duplicate and is not eligible for transfer back to NDSU.
3. An NDSU student may register for a Tri-College course to repeat a course previously taken at NDSU. Tri-College (https://www.ndsu.edu/onestop/registration/tricollege/) enrollment rules and restrictions apply.
4. All grade entries remain on the student's academic record, but only the credits, grades and related honor points for the most recent attempt are calculated in the cumulative grade point average and credits for graduation. Students forfeit the previous letter grade no matter what letter grade was earned. Previous letter graded attempts are excluded from cumulative totals and marked as '*Repeat Excluded*' on the record.The most recent letter graded course is marked '*Repeat Included*' on the record.
5. There is no limit to the number of different courses that may be repeated unless otherwise restricted by an academic department.
6. Courses initially taken with A-F letter grading may not be repeated if the pass-fail grading option is elected in the repeat attempt.

NOTE: Repeating courses has impacts to financial aid eligibility and can effect a student's completion rate.

Student Credit Load

	Enrollment Status	Eligibility for MOST Federal Financial Aid	Tuition Cap	Max Credits for Registration
	Status used for loan deferments, enrollment verifications, etc.	(Student must be eligibile) Varies by type of aid (refer to Student Financial Services)*	Credits over the cap are at no additional cost to the student. Tuition cap refers to NDSU tuition charges only.	The max credits that students can enroll in per semester.**
UGRD - Fall/Spring/Summer Semester	Half-time= 6 cr.; Full-time=12 cr.	6 cr. minimum half-time aid; 12 cr. for full-time aid	13 cr.	20 cr. (15 for summer)
PROF PHARM - Fall/Spring/Summer Semester	Half-time=5 cr.; Full-time=9 cr.	Half-time=5 cr.; Full-time=9 cr.	13 cr.	20 cr (15 for summer)
GRAD - Fall/Spring/Summer Semesters	Half Time=5 cr. Full Time=9 cr.	5 cr. minimum half-time aid 9 cr. for full-time aid	No tuition cap, except ARCH at 13 cr.	15 cr. (may vary by program)

Undergraduate Students

The recommended credit load for undergraduate students is 15-18 hours per semester during a standard academic term (fall/spring). Undergraduate and professional student full time status is 12 or more credits per semester. Half time is 6 credits per semester. Undergraduate students are limited to 20 credits per semester (15 credits in the summer). Students who find it necessary to exceed this credit limit must have an NDSU minimum institutional grade-point average of 3.0 to be eligible to petition for an overload. The Petition to Exceed Maximum Credit Load (https://www.ndsu.edu/registrar/forms/) is available online.

Graduate Students

Graduate student full time status is 9 or more credits per semester. Half time is 5 credits per semester. Graduate students may enroll in up to 15 credits per semester. Students wanting to exceed the credit limit must submit the Over 15 Credit Petition (https://www.ndsu.edu/gradschool/current_students/forms/#:~:text=Over%2015%20Credits%20Petition) form.

Student Transcripts

Transcripts

Current students may request an official NDSU transcript through the online Campus Connection portal using an active login and password. Former students may request an official transcript in either hard copy or electronic format through Parchment (https://www.parchment.com/u/registration/34559/institution/). Parchment online ordering provides 24/7 access with additional tracking information. According to federal law, telephone requests and requests from others on behalf of the student cannot be honored. There is a charge for an official transcript; see Official

Transcript Requests (https://www.ndsu.edu/onestop/official-transcript/) for detailed transcript fee information. The transcript only includes detailed work completed at NDSU. Requests for transcripts of work completed elsewhere must be made directly with the respective institution.

Current students may obtain unofficial transcripts (https://www.ndsu.edu/onestop/unofficial-transcript/), any time, free of charge, on Campus Connection.

Correction of Transcript Errors

If a student believes there is an error in the recording of a course grade on the transcript, the student should first contact the instructor to verify the grade. Other transcript questions or concerns should be directed to the Office of Registration and Records (https://www.ndsu.edu/registrar/). See also the sections on Grade Changes and Appeals (p. 37).

Tri-College University

Tri-College University (https://www.tri-college.org/) (TCU) is a consortium of five regional institutions of higher education: North Dakota State University, Concordia College, Minnesota State University Moorhead, Minnesota State Community and Technical College, and North Dakota State College of Science. Students at the five schools may benefit from what each institution offers individually and cooperatively through the consortium.

Through the Tri-College course exchange, students enrolled at one campus may take courses at the other institutions at no extra cost and without going through separate admission procedures. Tri-College expands discipline offerings and course availability for students beyond their home campus.

Tuition and Fees

Tuition is paid to the home campus. Courses not eligible for Tri-College registration are those off-campus or weekend courses offered through MSUM's Continuing Education program, most workshops, most graduate courses, independent study courses at Concordia College, private music instruction at Concordia, and international travel programs.

Students enrolling in classes that require special fees (lab/course fees, lessons, supplies, etc.) beyond the home-campus tuition and fees assessed at the time of registration will be responsible for remittance of payment to the provider institution. The following information can be found on the TCU Registration form (https://www.tri-college.org/fileadmin/tri-college.org/Current_Forms/TCU_Registration_Form_FINAL.pdf) and information guide (https://www.tri-college.org/fileadmin/tri-college.org/Current_Forms/TCU_Information_Guide_FINAL.pdf).

Course Limits

The TCU Course Exchange is limited to two courses per student per semester per participating campus, and only if the courses are not cataloged or offered on the student's home campus in a given semester. Exceptions to the two-course/semester limit among campuses are detailed, along with other TCU registration information. All students must be registered at their home campus before being eligible to enroll in Tri-College courses (excludes summer for MSUM and NDSU). Concordia students—and NDSU students wanting to take courses at Concordia—may take only two courses per term and then, only if they are full-time students and only if that course is not available on their home campus during that academic term. Concordia does not participate in the TCU course exchange during the summer.

Credits and Grades

Courses taken through TCU course exchange will appear on a student's home campus transcript within the respective term and may be applied toward graduation requirements. Credits and grades are calculated into home campus grade point averages and cumulative totals.

Course Substitutions

Students need to obtain advanced approval to substitute TCU courses for required courses in a major or minor unless otherwise stipulated in the major/minor requirements.

Course Repeats

Students taking a TCU course to repeat a course previously taken at the home campus must indicate this on the registration form. Duplication of credit is not permitted.

Policies and Deadlines

Students must observe all registration and academic policies and deadlines of their home campus, including arrangements for withdrawals, drops/adds, pass/fail options, audits, and incomplete grades. Courses are applied to resident credit requirements only at the institution where they pay tuition.

Registration

NDSU students register by submitting the Tri-College registration form to the Office of Registration and Records, 110 Ceres Hall.

Tri-College Minors

The Tri-College partners recognize minors earned through the TCU course exchange. Minors are available to students at Concordia, MSUM, and NDSU. Students receive recognition on their academic transcript for minors completed on one of the other TCU campuses. This policy applies only to minors earned in programs not available on a student's home campus. The TCU Minor form (https://www.tri-college.org/fileadmin/tri-college.org/Current_Forms/TCU_Minor_Form_FINAL.pdf) is available online.

Majors

Majors may be earned only at the school from which a student earns a degree. Most students enroll initially at the school from which they intend to graduate. However, the TCU course exchange agreement between MSUM and NDSU allows a student to begin their studies at one of the schools prior to transferring to the other school to complete their degree. Tri-college students typically are restricted to pre-professional coursework at a campus that offers a professional program of study. Students should work with the chair of the department in which they intend to major to make sure their program includes all requirements for the major and for graduation.

Library Services

Students, faculty, and staff of the TCU institutions may use all of the libraries in the consortia. Circulating materials from TCU libraries are available free of charge for direct checkout or through inter-library loans.

A regional computer-based catalog shows the availability of materials at the TCU and other libraries.

Bus and Parking Services

A Tri-College bus schedule provides inter-campus transportation to Concordia, MSUM, and NDSU every half hour. The bus is operated on weekdays by the City of Fargo during the academic year; it is not available during the summer. Bus schedules are available at MATBUS (http://www.matbus.com/).

A separate parking permit is not issued for Tri-College University parking. If vehicles have a current home-campus permit, they may be parked in the following lots on other campuses.

- **Concordia:** TCU students, faculty, and staff can park in the O parking lots (https://www.concordiacollege.edu/directories/offices-departments-directory/facilities-management/parking-services/).
- **M-State:** Apply for free parking at the Moorhead (https://www.minnesota.edu/about/campuses/moorhead/#Directions_to_Campus) campus.
- **MSUM:** TCU students can park in the G parking lots (https://www.mnstate.edu/parking/).
- **NDSCS:** contact Campus Police in the Student Center (https://www.ndscs.edu/current-students/campus-buildings-services/parking/) for parking permit information.
- **NDSU:** Parking Lots R, TA, and Fargo Dome lots B, C, D, and E (https://www.ndsu.edu/fileadmin/parking/docs/NDSU_Parking_lots_map.pdf) . Faculty/staff permits are honored in AE and TA lots. Individuals with state-issued mobility-impaired permits may park in any mobility-impaired space on campus provided the Tri-College institution permit and the state-issued mobility-impaired permit are clearly displayed in conjunction with one another. Free parking is not available at NDSU, for Tri-College faculty and staff possessing a retiree parking permit, not issued by NDSU.

All drivers are subject to traffic regulations of the respective institutions. Lot restrictions are eased after 5 p.m., and there is no overnight parking.

- Academic Forgiveness

Credit By Examination

Students may demonstrate evidence of college-level achievement through the use of nationally standardized tests. Competency to take these examinations may have been gained through intensive preparation in high school, extensive reading in a particular field, or other types of formal or informal preparation. A student may not use credit by examination to repeat a course that has been previously completed at NDSU or another regionally accredited institution. Score reports must be sent directly to NDSU from the awarding agency/board. High school transcripts and student-issued grade reports are not considered official for purposes of awarding credit by examination. Credit by examination is not counted towards the university residence credit requirement for graduation.

Advanced Placement Examination (AP)

Students from high schools that participate in the Advanced Placement Program may earn credit through examinations provided by the CollegeBoard. The examinations are administered at the conclusion of a college-level course taught in participating high schools. AP Score Reports are sent to the colleges or universities designated on your exam answer sheet. Students who do not designate NDSU on their answer sheet may contact AP Services (see below) to have scores sent to NDSU. The code for NDSU is **6474**.

In accordance with North Dakota University System policy, a minimum score of three is required to receive credit for Advanced Placement (AP) examinations. If NDSU does not have an equivalent course, free elective credit may be awarded. Credit earned through AP is not residence credit and may not be used to satisfy residence-credit requirements for graduation. A listing of AP exams and current NDSU equivalent courses are listed below.

Examination	Score	Equivalent NDSU Course	Credit Hours	Gen Ed Category
Art-History	3	ART 210 & ART 211	6	A & A
Biology	3	BIOL 111 & BIOL 100L	4	S/L & S/L
Biology	4	BIOL 150, BIOL 150L, BIOL 151, & BIOL 151L	8	S/L, S/L, S/L, & S/L

College Level Examination Program (CLEP)

CLEP is a national testing program is provided by CollegeBoard.

According to North Dakota University System policy, a minimum score of 50 is required to receive credit for CLEP subject examinations. If NDSU does not have an equivalent course, free elective credit may be awarded. Credit earned through CLEP is not residence credit and may not be used to satisfy residence-credit requirements for graduation.

CLEP Examinations

A listing of CLEP exams and current NDSU equivalent courses are listed below.

Examination	Score	Equivalent NDSU Course	Credit Hours	Gen Ed Category
American Government	50	POLS 115	3	B

DSST Examinations

NDSU recognizes the DSST (Dantes) examination, which was originally designed for the military as a way to provide individuals an opportunity to obtain college level credit for what they have learned in nontraditional ways. Now available for civilian use, the DSST Test Control Officer (TCO) administers the exams on more than 560 military installations and official DSST test centers. The main users of the exams include adult education programs, U.S. Department of Defense, and two- and four-year colleges and universities. NDSU's DSST location site code is: DSST-9366.

In accordance with North Dakota University System policy, students must receive a minimum score on the examinations to qualify for possible awarding of credit and advanced placement, which is determined by the appropriate academic department on campus. If NDSU does not have an equivalent course, elective credit may be awarded. Credit earned through DSST may not be used to satisfy residence credit requirement for graduation. A listing of DSST exams and current NDSU equivalent courses are listed below.

International Baccalaureate (IB)

NDSU recognizes the International Baccalaureate program, offered at many high schools in the United States and abroad, which allows students to take examinations for credit. The examinations are offered at the standard (SL) and higher (HL) levels. **However, according to state policy, NDSU will only grant credit for applicable HL examinations.**

In accordance with North Dakota University System policy, students must receive a predetermined minimum score on higher-level (HL) examinations to qualify for possible awarding of credit and advanced placement, which is determined by the appropriate academic department on campus. Credit earned through IB may not be used to satisfy residence-credit requirements for graduation. Scores received in IB examinations not included in the table below may be considered for credits. Contact the Office of Registration and Records (https://www.ndsu.edu/registrar/contact/) for information.

Course Challenge

A student who is currently registered may seek credit by challenging a course. A course challenge usually consists of a special comprehensive examination; however, additional types of performance may be required for some courses. A course challenge is only permitted for courses in which the student has no previous record (prior registrations allowable if course was dropped by the No Record Drop deadline in a given term). Further, credits earned by course challenge may not satisfy requirements toward a graduate degree.

Procedures for pursuing a course challenge include the following

1. Obtain a Petition for Course Challenge Form (https://www.ndsu.edu/sites/default/files/onestop/Forms/challenge.pdf), available online.
2. Obtain approval from the academic adviser, the instructor of the course, and the chair of the department offering the course. Clarify expectations of the challenge, e.g., examination only or examination plus other performance. Based on the nature of the course and content area, some courses may not be approved for challenge by the department.
3. Pay the course challenge fee at the Customer Account Services (https://www.ndsu.edu/cas/), 302 Ceres Hall, after receiving approval for the challenge (50% of the regular credit tuition charge; not subject to tuition cap).
4. Arrange a mutually convenient date and time for the challenge with the instructor or department.
5. Upon receipt of the signed Petition for Course Challenge form from the department, courses and credits successfully challenged are listed on the student's academic transcript with a passing (P) grade. Unsuccessful challenges are not recorded.

English and Mathematics Placement

Undergraduate students are placed into English and mathematics courses in accordance with the North Dakota State Board of Higher Education course placement policy 413 (https://ndusbpos.sharepoint.com/:w:/s/NDUSPoliciesandProcedures/Eacm2xutfb9Gp5S8P5GL4b0BrUq5pIRVB4u5pNSlF4YjfQ/?e=ZQTozp) and procedure 413.1 (https://ndusbpos.sharepoint.com/:w:/s/NDUSPoliciesandProcedures/EbApPAwqaedGh6E5skti4FIBQZq7K48UXVoNqvOE3A1WhQ/?e=RHhl14). The intent of placement is to ensure students are appropriately placed based on their demonstrated readiness.

English Placement for U.S. Students, Canadian Students, and U.S. Permanent Residents

- All students are required to successfully earn credit for ENGL 110 and 120 or equivalent as part of the NDSU general education requirements.
- For students who have multiple placement exam scores, the highest placement may be used.
- Eligible students with disabilities may seek reasonable accommodations to take the placement test. Please submit disability documentation to NDSU Disability Services at least two weeks prior to the time in which the accommodations are needed. Documentation will be reviewed and students will be notified if additional documentation is needed to make an eligibility decision. Please submit the request and documentation to: NDSU Disability Services (https://www.ndsu.edu/disabilityservices/); Dept. 2860; P.O. Box 6050; Fargo, ND 58108-6050; (701) 231-8463.
- Students who have not submitted any of the approved English placement examinations are required to take the NDSU English Placement Survey. Acceptable placement exams are listed in the table below. Questions about the NDSU English Placement Survey can be directed to NDSU One Stop (https://www.ndsu.edu/onestop/).
- Students who have submitted placement scores, may elect to take the NDSU English Placement Survey to attempt to place into a higher English course. ENGL 120 is the highest placement attainable.
- Students who place into ASC 86 or ASC 87 developmental English courses are required to enroll through the collaborative student registration (p. 41) process delivered by North Dakota State College of Science (https://www.ndscs.edu/current-students/student-success/test-center/) (NDSCS). Course textbooks for ASC 87 may be purchased through the NDSU bookstore (http://www.ndsubookstore.com/).
- Upon completion of ENGL 120 with a 'C' grade or higher, students will be awarded placement credit (3) for ENGL 110.
- Students who transfer ENGL 120 with a grade of 'C' or higher to NDSU will be awarded placement credit (3) for ENGL 110.
- Students who transfer in ENGL 110 with a non-passing grade, may elect to take the NDSU English Placement Survey.
- Students with a MELAB score should contact the IELP coordinator (http://www.ndsu.edu/modernlanguages/department_directory/) for information on English placement.

NDSU English Placement Survey Scoring Guide
Score Range 1-8: ASC 087

Score Range 9-10: ASC 087 OR English 112 (choice; English 110 if 112 not offered)

Score Range 11-12: ASC 087 OR English 110 (choice)

Score Range 13-16: English 112 (110 if 112 not offered)

Score Range 17-20: English 110

Score Range 21-24: English 112 or 122 (choice; English 110 or 120 if not offered)

Score Range 25-28: English 110 or 120 (choice)

Score Range 29-34: English 122 (120 if 122 not offered)

Score Range 35-40: English 120

Score Range 41-42: English 122 OR Course Challenge (choice; English 120 if 122 not offered)

Score Range 43-44: English 120 OR Course Challenge (choice)

The table below lists exam scores and corresponding English course placement at NDSU:

English ACT Subtest Score	SAT Writing	ACT Aspire	Smarter Balanced 11/12 Grade(ELA)	Accuplacer WritePlacer Test Score	Accuplacer Next-Generation Writing	MyFoundationsLab Pearson (CREAM CLEM & Others)	NDSU Course Placement
13 or lower	Evidence-based reading & writing: 470 or lower	425 or lower	2 or lower	4 or lower	249 or lower	69% or lower	English Placement Survey

14-17	Evidence-based reading & writing: 480	426 or higher	3 or higher	5	250-255	70% or higher	ENGL 110
18 or higher	Evidence-based reading & writing: 480	-	-	6-8	256 or higher	-	ENGL 120

English Placement for International Students

- International students living in a country where the primary language is English are not required to present test scores for placement. Even if they have test scores, they should take the placement survey on Blackboard to determine which English course to take.
- Students who are required to begin in LANG 109 must successfully complete the course with a 'C' grade or higher before they may enroll in ENGL 112 or equivalent.
- ENGL 112 and 122 are special sections of College Composition equivalent to ENGL 110 and 120, respectively. International students who are multilingual are encouraged to enroll in ENGL 112 or 122, but they may enroll in ENGL 110 or 120 if ENGL 112 or 122 is not available.
- All degree-seeking students are required to successfully earn credit for ENGL 112 and 122 (or 110 and 120) or equivalent as part of the NDSU general education requirements.
- For students who have multiple exam scores, the highest placement may be used.International students who meet the threshold for ENGL 112 based on exam scores (see table below) should take the English placement survey in Blackboard to determine their course placement (ENGL 112 or 122, or equivalent).
- Students who are advised to enroll in ENGL 122, will be awarded placement credit (3) for ENGL 112 upon completion of ENGL 122 with a 'C' grade or higher.
- For students who have multiple exam scores, the highest placement may be used.

Exam Type	LANG 109: Language Use in Writing ESL II	ENGL 112: ESL College Composition I	ENGL 122: ESL College Composition II
TOEFL iBT	70 or lower	71 or higher	English Placement Survey
IELTS (Overall)	5.5 or lower	6.0 or higher	English Placement Survey
Duolingo English Exam	99 or lower	100 or higher	English Placement Survey
SAT Evidence-based reading & writing	400 or lower	410 or higher	English Placement Survey
ACT English Subscore	13 or lower	14 or higher	English Placement Survey

NDSU Math Placement Procedures

A variety of approved placement examinations are used (see table below) to determine placement of students into entry-level math courses. The following guidelines apply to math placement practices:

- For students who have scores from multiple exams, the highest placement will be used.
- Eligible students with disabilities may seek reasonable accommodations to take the placement test. Please submit disability documentation to NDSU Disability Services at least two weeks prior to the time in which the accommodations are needed. Documentation will be reviewed and students will be notified if additional documentation is needed to make an eligibility decision. Please submit the request and documentation to: NDSU Disability Services **(**https://www.ndsu.edu/disabilityservices/**);** Dept. 2860; P.O. Box 6050; Fargo, ND 58108-6050; (701) 231-8463.
- Current, incoming or returning NDSU students who do not have prior college-level mathematics *OR* have not taken an approved placement examination must take the NDSU Pearson Placement exam to determine course placement.
- Students who meet the minimum score requirement of any approved placement examination may elect to take the NDSU Pearson Placement exam to attempt to place into a course above MATH 103 or MATH 104. Please note that the NDSU Pearson Placement exam should be completed prior to a student enrolling in either MATH 98 or MATH 103/104. If the Pearson Placement exam is taken after enrollment in MATH 98 or MATH 103/104, the student must drop this course either on or before the no-record drop deadline for the Pearson Placement to take effect.
- Students that do not meet the minimum score requirement on any approved placement examination will place into Math 98, however, students may elect to take the NDSU Pearson Placement exam offered through NDSU to attempt to place into a course above MATH 98.
- Students have the option to retake the NDSU Pearson Placement exam one time and must be completed before the last day to add classes in Campus Connection.
- Questions about the NDSU Pearson Placement exam can be directed to NDSU One Stop (https://www.ndsu.edu/onestop/).

Exam scores and corresponding course placement possibilities are listed in the table below:

The table below identifies NDSU approved placement examinations and minimum exam scores for placement into MATH 103 or Math 104:

Test	Test Component	Minimum Score
ACT	Math Subtest	21
SAT	MATH	530
SAT (prior to 2/05/2016)	Math + Reading	990
Accuplacer Next-Generation	Quantitative Reasoning, Algebra, and Statistics	255
Accuplacer Next-Generation	Advanced Algebra Functions	237
ACT Aspire	Math Subtest	431
ALEKS	Mathematics PPL	46
MyFoundationsLab Pearson (CREAM, CLEM & Others)	Math	70%
EdReady (NROC)	Math Placement	75
MAA Maplesoft	Algebra	12
Smarter Balanced	Grade 11-12 Math	3

The Table below identifies NDSU Pearson Placement exam scores and corresponding Math course placement at NDSU:

Pearson	Course Placement
Intermediate Algebra < 70%	Math 098
Intermediate Algebra ≥ 70%	Math 103 or Math 104
Algebra < 60%	Math 103 or Math 104
Algebra ≥ 60% AND Trigonometry < 65%	Math 105 or Math 144* or Math 146
Algebra ≥ 65% AND Trigonometry 40%-64.9%	Math 165 with Math 105
Algebra ≥ 65% AND Trigonometry ≥ 65%	Math 165

*Math 144: Mathematics for Business is only available for College of Business majors.

Students with College Transfer Coursework or Credit by Examination Placement

Students with prior college coursework, Advance Placement (AP) or other credit-by-examination (CLEP, IB, DSST) will follow NDSU's Credit by Examination (p. 46) guidelines for placement into mathematics and English coursework.

Sequence of NDSU math courses as a reference or guide:

START: MATH 98* > MATH 103 > MATH 105 > MATH 165 > MATH 166 or

MATH 98* > MATH 103 > MATH 146 > Math 147 or

MATH 98* > MATH 104

START: Math Placement Test > MATH 107 > MATH 165 > MATH 166

*Students who begin in Math 98 must successfully complete the course with a 'C' grade or higher before they may continue to Math 103 or 104.

General Education

The purpose of general education at NDSU is to ensure that students acquire knowledge, perspectives, and skills basic to a university education. The program is designed so that students will be able to adapt to and anticipate changes in their profession and in society. Students also will be able to integrate and use the knowledge and perspectives they have gained to live productive, intellectually rewarding and meaningful lives.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**

Category S: Science and Technology †	**10**
Category A: Humanities and Fine Arts †	**6**
Category B: Social and Behavioral Sciences †	**6**
Category W: Wellness †	**2**
Category D: Cultural Diversity *†	
Category G: Global Perspectives *†	
Total Credits	**39**

*****
Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†
General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

General Education Category Descriptions

The following descriptions are elaborations of the general education categories approved by the Faculty Senate.

- **Communication (C)** is the clear, precise, and purposeful exchange of information in a variety of contexts, using either written or oral means.
- **Cultural diversity (D)** focuses on the social, personal, and interpersonal effects of variety and differences among cultures.
- **Fine arts (A)**, as an integral component of the humanities, promote the appreciation of aesthetics and the expression of creativity.
- **Global perspectives (G)** focus on analysis of worldwide issues illustrating the interdependence of the world and its people.
- **Humanities (A)** systematically explore cultural and intellectual forces shaping events, individual expression, and social values.
- **Quantitative reasoning (R)** is an organized set of quantitative methods used to solve problems or extend knowledge. Quantitative methods are a set of principles and procedures that could be used to manipulate numerical data.
- **Science (S)** is an organized body of knowledge, including principles and procedures based on scientific methods, used to explain physical or biological phenomena.
- **Social and behavioral sciences (B)** use scientific methods to analyze the behaviors, structures, and processes of individuals and groups.
- **Wellness (W)** is a dynamic and integrative process of becoming aware of healthy lifestyles, of learning to make informed choices, and of developing a balanced approach to living.

General Education Program Assessment

General education assessment has three basic purposes:

1. To improve student learning and development by identifying the intended student outcomes for the program.
2. To provide feedback on the progress toward the intended student outcomes.
3. To use the feedback to modify aspects of the program to ensure that the outcomes are being achieved and that student learning is improved.

Assessment activities are valued at NDSU and include the participation of students. Results will not be used to penalize students or faculty. Student performance on assessment of the general education program will not become part of the transcript.

General Education Transfer

Students transferring lower-division general education credits within the North Dakota University System need to consult with advisers in their academic programs at NDSU for two reasons. First, degree requirements of individual programs and colleges at NDSU may exceed the university-wide general education requirements. Second, meeting the university-wide lower-division general education requirements by transfer credits may not necessarily prepare students for advanced, upper-division study in an academic major at NDSU. See also the NDUS GERTA Agreement.

NDSU Global Seminar and Global Practicum Courses

Global Practicum: Study Abroad [(Prefix) 292, 392, 492, 692] A student who studies abroad for one or more semesters, and who successfully completes a minimum of three credits eligible for transfer back to NDSU, may qualify for either Cultural Diversity or Global Perspectives. Completing six or more study abroad credits may qualify for both Cultural Diversity and Global Perspectives categories. A student must arrange to have an official transcript sent to NDSU from the study abroad institution for official evaluation and credit determination. The student must complete a Student Appeal for Exception to General Education Requirements (https://www.ndsu.edu/fileadmin/registrar/forms/genedappeal.pdf) for this consideration.

Global Seminar [(Prefix) 179, 279, 379, 479, 679] Global Seminar experiences *do not* automatically qualify for NDSU general education. An NDSU global seminar instructor must apply for approval in an appropriate general education category *before* the course is open for student enrollment and well in advance of seminar departure. Approval requires the instructor to submit a course syllabus and a one-page rationale to the University General Education committee addressing how the seminar experience aligns the course learning outcomes with the general education learning outcomes

for the category being sought. Approval is a one-time event and is not extended to additional semesters. Only students who enroll in the class and complete the experience are eligible for general education.

General Education Learning Outcomes

The intended learning outcomes resulting from the various general education categories include the following:

Communication (C) - students will

- effectively communicate analysis, knowledge, understanding, expression and/or conclusions in a range of contexts
- skillfully use high-quality, credible, relevant sources
- demonstrate appropriate conventions in a variety of communication situations

Quantitative Reasoning (R) - student will

- apply quantitative and qualitative methods to collect and analyze data, in order to:
  - explain the nature of evidence used for analysis
  - evaluate the assumptions, evidence, and logic of competing views and explanations

Science & Technology (S)

Technology Learning Outcome- students will

- understand, use, and apply technology to demonstrate creativity and solve problems
- identify the social, aesthetic, and ethical implications of technological decisions
- analyze how technology shapes, limits, and augments our experiences and understandings

Natural and Physical Sciences Learning Outcome - students will

- analyze components and dynamics of natural and physical worlds
- develop models to explain phenomena within the natural and physical worlds
- apply methods of scientific inquiry to enhance their understanding of the natural and physical world

Humanities & Fine Arts (A) - students will

- identify the nature and impact of aesthetic, creative, or cultural activities on human experience
- analyze the components and dynamics of human societies in their artistic, cultural, and historical contexts

Social & Behavioral Sciences (B) - students will

- analyze the interplay of self and society, particularly how social structures shape human experiences and how humans shape social structures
- apply theories or research methods to understand human events, identities, artifacts, or social structures
- Examine their own values, biases, and conclusions within larger social or theoretical contexts

Social & Behavioral Sciences - Wellness (W) - students will

- examine how social ecological contexts relate to their personal wellness values, biases, and conclusions
- articulate how their personal, professional, or civic goals reflect their core wellness values
- explore, identify and evaluate sources of information related to personal wellness

Cultural Diversity (D) - students will

- identify how diverse societies shape individual experiences, expressions and identities
- identify how diversity influences cultural values

Global Perspectives (G) - students will

- apply theories or research methods to develop strategies and solutions that address global challenges
- identify potential benefits and explore the implications of global citizenship
- evaluate global phenomena using perspectives, attitudes and beliefs of communities with cultural backgrounds different from their own

General Education Administrative Policies

1. General education courses may be used to satisfy requirements for both general education requirements and the major, minor, and program emphases, where applicable.
2. Departments or colleges may preclude their students from double counting general education courses with major courses.
3. Except for courses that meet the cultural diversity or global perspectives requirements, no course can fulfill the requirements for more than one general education category.
4. General education requirements can be met through credit by exam, departmental examinations, or equivalents.
5. General education requirements can be met by successful completion of a course for which an approved general education course in the same department is a prerequisite or by successful completion of an advanced course in the same department with comparable course content.
6. Except for courses offered only on a pass/fail basis, no courses taken to meet the general education requirements may be taken for pass/fail grades. (Exception for Spring and Fall 2020: Students were allowed to complete general education requirements with a pass grade.)
7. The general education minimum requirements apply to all baccalaureate degree programs.
8. Transfer students who have only partially fulfilled general education category requirements by transfer-approved courses must complete the requirements in approved courses within the NDSU deficient categories. No category credit requirement may be deficient by more than a partial semester credit. However, in the communication category, if the transfer course(s) have been evaluated as equivalent to ENGL 110 College Composition I, ENGL 120 College Composition II, and COMM 110 Fundamentals of Public Speaking and total no less than eight semester credits, the lower-division category requirement has been met.
9. Students may receive placement credit for ENGL 110 College Composition I based on a minimum English ACT score (or SAT equivalent) and satisfactory performance (grade of 'C' or better) in ENGL 120 College Composition II or equivalent.
10. A student who has completed an associate of arts or an associate of science degree in the United States or Canada at a regionally accredited institution and who transfers to NDSU or who pursues a second baccalaureate degree at NDSU is considered to have completed his or her lower-division general education requirements at NDSU. Transfer student coursework from outside the United States and Canada will be evaluated on a course-by-course basis.
11. General education courses at other accredited institutions, which do not have equivalent courses or general education status at NDSU, may be accepted in transfer as part of the general education requirements at NDSU.
12. All general education course syllabi and course web sites must identify the course as having been approved for meeting general education requirements and include the general education outcomes for which each course is approved. (See Syllabus Requirements (https://www.ndsu.edu/facultysenate/committees_1/ucc/syllabus_information/))
13. Students who have completed basic military training (which is the commitment for enlistment) will receive a waiver for the Wellness category. Military record documentation is required for the waiver; documentation is to be submitted to the Office of Registration and Records with a completed Appeal for Exception to General Education Requirements form. The waiver for the training will not lead to course credit, and all other minimum graduation requirements apply.
14. Military Services members that have been deployed to a foreign country for a minimum period of 90 consecutive days will be recognized as meeting Global Perspectives general education requirement. Additionally, services members will have satisfied the Cultural Diversity requirement for completing an additional 90 days of foreign deployment. A copy of the military deployment documentation can be submitted with a completed Appeal for Exception to General Education Requirements form.
15. Students must complete at least four credits of natural and physical sciences in the Science and Technology category. Also in this category, a student must complete a one-credit lab taken as a co-requisite with an approved general education science and technology lecture course, unless the approved science and technology course has an embedded lab experience equivalent to one-credit (ex. CHEM 117 & CHEM 117L; PLSC 110).

General Education Courses

The following is representative of the courses approved in each general education category for the specific catalog year. The general education component requires a minimum of 39 total credits with a minimum credit requirement in each of the six categories. Cultural diversity and global perspectives may be satisfied by completing courses in another category.

Category C: Communications - 12 credits

- 3 of the 12 credits must be at the 300/400 level upper-division

Code	Title	Credits
ENGL 110	College Composition I	3
or ENGL 112	Multilingual College Composition I	
ENGL 120	College Composition II	3
or ENGL 121	Honors Composition II	
or ENGL 122	Multilingual College Composition II	
COMM 110	Fundamentals of Public Speaking	3
or COMM 111	Honors Public Speaking	

ECON 356	History of Economic Thought	3
ENGL 320	Business and Professional Writing	3
ENGL 321	Writing in the Technical Professions	3
ENGL 322	Writing and the Creative Process	3
ENGL 324	Writing in the Sciences	3
ENGL 325	Writing in the Health Professions	3
ENGL 326	Writing in the Design Professions	3
ENGL 357	Visual Culture and Language	3
ENGL 358	Writing in the Humanities and Social Sciences	3
ENGL 459	Researching and Writing Grants and Proposal	3
FREN 360	Studies in Language and Style	3
HIST 390	Historical Research and Writing	3
PHIL 352	Knowledge and Reality	3
PHIL 450	Metaphysics	3
PHIL 451	Skepticism and the Possibility of Knowledge	3
PHRM 324	Writing and Professionalization in Pharmacy	3
SPAN 401	Advanced Spanish Grammar and Writing	3

Category R: Quantitative Reasoning - 3 credits

Code	Title	Credits
CSCI 122	Visual BASIC	3
CSCI 159	Computer Science Problem Solving	3
MATH 104	Finite Mathematics	3
MATH 144	Mathematics for Business	4
MATH 146	Applied Calculus I	4
MATH 165	Calculus I	4
PHIL 257	Traditional Logic	3
STAT 330	Introductory Statistics	3

CATEGORY S: Science & Technology - 10 Credits

- Four of the 10 credits must be in natural or physical sciences
- A co-requisite, one-credit lab must be taken with a natural or physical science course unless the course includes an embedded lab experience equivalent to a one-credit course.

Natural Science (Sn):

Code	Title	Credits
AGRI 115	Wonders of Weather	3
BIOL 100L	Non-Majors Biology Lab *	1

North Dakota University System General Education Requirements Transfer Agreement

The North Dakota University System (NDUS) General Education Requirements Transfer Agreement (GERTA) (https://ndus.edu/lets-get-started/transfer-to-a-different-campus/gerta/) was established by the State Board of Higher Education to ease student transfers within the system. Although subject to revision by the board, the policies at the time of this printing were as follows:

- If students have completed the lower-division general education course requirements (36 credits or more) at one NDUS institution and transfer to another NDUS institution, then the lower-division general education requirements will have been met.

If the lower-division general education requirements have not been completed before transferring, the general education courses from the indicated areas are applicable to an appropriate general education requirement of the institution to which they are transferred. In these cases, the number of credits required to complete the general education requirement in each area is determined by the policies of the institution to which the courses are transferred.

Students transferring lower-division general education credits within the North Dakota University System need to consult with advisers in their academic programs at NDSU for two reasons. First, degree requirements of individual programs and colleges at NDSU may exceed the university-wide general education requirements. Second, meeting the university-wide lower-division general education requirements by transfer credits may not necessarily prepare students for advanced, upper-division study in an academic major at NDSU.

Students transferring from non-ND University System institutions will have their general education requirements evaluated on a course-by-course basis when they enter NDSU.

Undergraduate Classification

Undergraduate Classification

Undergraduate degree-seeking students are classified according to the total number of credits earned.

Classification	Completed Credits
Freshman	0 - 26
Sophomore	27 - 59
Junior	60 - 89
Senior	90 or more

Credit limitations may be placed on students who have not been fully admitted to a degree program at NDSU. Also, classification or standing in a declared plan of study may vary from the classification used by the university in determining academic standing, financial aid award levels, etc.

Undergraduate Non-degree Student

A student who is not seeking a degree or who has not completed the formal application process for admission is considered a non-degree students. Non-degree students may take a maximum of 15 undergraduate credits. Non-degree students are not eligible for financial aid, but academic standing will be processed at the end of each semester.

Undergraduate Degree and Graduation Information

Baccalaureate Degree and Graduation Requirements

To receive a baccalaureate (bachelor's) degree, student candidates must satisfactorily complete two sets of requirements. NDSU offers a number of baccalaureate degree types (p. 32), but the two most common bachelor's degrees awarded at NDSU are the Bachelor Science (B.S.) and the Bachelor of Arts (B.A.). Students are responsible for understanding these requirements and should consult official curriculum guides (https://www.ndsu.edu/onestop/curriculum-guides/) for all programs declared. Students should also plan to collaborate with an academic advisor to help guide them in this process.

A) University-Wide Degree Requirements

1. Minimum Total Credits: Students must present a minimum of 120 semester credits before a degree can be posted to record. Requirements for some academic programs may exceed this degree credit minimum.
2. University General Education Requirements: Students must satisfactorily complete the university's general education program requirements as outlined by the university in the general education section of the Bulletin from the year of admission or readmission to the university.
3. Minimum Scholastic Standing: Students presented for graduation must meet a minimum cumulative institutional grade-point average (GPA) of 2.00. This GPA is based on coursework taken at NDSU. Coursework transferred to NDSU is not included in this GPA calculation. Some academic programs may require a higher minimum GPA, which must be clearly outlined on the official curriculum when higher than the university minimum of 2.00 is required.

4. Resident Credit Requirement: Resident credits are earned from undergraduate courses that a student has registered and paid for at NDSU. Students must satisfactorily complete a minimum of 30 credits from courses offered at NDSU or via Tri-College registration as an NDSU student.
5. Upper Level Credit Requirements: Students must present a minimum of 36 credits in courses taken at the 300-400 level for degree completion. These credits may or may not be earned at NDSU.
6. Transfer Credits: Students presenting transfer credit must meet the NDSU residence credits as defined in #4 and the minimum upper level credit defined in #5. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.
7. Satisfy All Financial Obligations: Students must satisfy all financial obligations owed to the university. Diplomas and official transcripts will not be released to students who have outstanding debts owed to the university.
8. Application for degree**:** Candidates eligible for a baccalaureate degree or a Doctor of Pharmacy degree must complete the *Application for Graduation* found in Academic Records in Campus Connection. When eligible, students will apply for graduation from the Graduation menu within the published semester deadline (https://www.ndsu.edu/registrar/dates/). This is a hard deadline and failure to apply by the published deadline of the planned semester could delay the awarding of the degree until the following semester. Failure to satisfy all degree requirements can also delay the awarding of a degree requiring a student to have to reapply in a future semester.

B) Major Requirements for Declared Major and Minors

1. Major Requirements: In addition to the university-wide degree requirements listed above, students must complete the requirements for all declared majors and minors outlined on the official curriculum. One major will serve as the primary major; this major will determine what college will confer the degree and what, if any, college or department level requirements also apply. Refer to the curriculum guide for specific details.
   a. Declaring a major: Students must officially declare their degree and major intent. This is done:
      i. at the time of admission to the University on the application form submitted to the Office of Admission; or
      ii. at the time of readmission to the University on the *Undergraduate Reactivation/Petition for Readmission* form submitted to the Office of Registration and Records; or
      iii. by submitting a *Major Change Request* form to the Office of Registration and Records.
   b. Completing declared major: Student follow the curricula that is published in the catalog at the time they officially declare their degree and major intent described in 1.a.i-iii. Students follow the published curricula until graduation provided their enrollment at NDSU has not been discontinued for more than one calendar year (B.1.e) or a new major is declared (B.1.a.iii.).
   c. Declaring additional majors/minors: Students who wish to pursue additional majors/minors/multiple degrees/certificates must officially declare these programs to the Office of Registration and Records (B.1.a.iii).
   d. Pre-requirements majors and selective admission majors: Students enrolled in majors with pre-requirements or selective admission enrollment will have their program degree status changed from the pre-program to full-degree status based on information provided to the Office of Registration and Records by the respective academic department.
   e. Discontinue enrollment: Students who discontinue enrollment at NDSU for more than one calendar year are subject to meeting the curricular requirements published in the catalog during the term of readmission.
   f. Degree audit: Each program of study presented by a candidate for the baccalaureate degree is formally audited for meeting degree requirements by the Office of Registration and Records. Students can also view their degree progress by reviewing the academic requirements report available in Campus Connection.

Undergraduate Majors and Minors

Majors and minors are an integral part of the baccalaureate degree. Minimum credit for majors and minors is guided by Policy and Procedure 409 (https://ndusbpos.sharepoint.com/:w:/s/NDUSPoliciesandProcedures/ESMcRWeGv7tCkvL8r7aqc7MBGr1JIL_U5ES61ZgX5RF86g/?e=Lr8ZKz) from the North Dakota University System (NDUS) State Board of Higher Education (SBHE). Students are responsible for following the requirements in place at the time a major or minor is officially declared with the university. Specific major and minor curriculum requirements are available in the Undergraduate Program Curriculum (http://catalog.ndsu.edu/undergraduate/program-curriculum/) section of the catalog.

Majors

Major: An undergraduate major is a planned grouping of courses in an academic discipline, called a curriculum, to which a student formally commits to studying by declaring the major. An academic major must total a minimum of 32 semester credits and departments should actively ensure during major development that each major has a minimum of 15 unique credits from any other major offered at the University. Most majors are earned as a Bachelor of Science or a Bachelor of Arts degree, however, there are a few majors that are earned as a specialized degree. All NDSU degree types can be viewed in the Degree Types and Diploma Information (p. 32) in the catalog.

Second/Double or Multiple Majors: Students may pursue more than one major under a Bachelor of Science or a Bachelor of Arts degree. The student will identify one of majors as the primary major and this major will determine from what college the degree will be awarded. To be eligible for multiple majors, all requirements from each major curriculum must be satisfactorily completed along with other undergraduate degree requirements. ***Important Note***: When majors with different degree types are declared, the requirements for a second degree apply - see the section **Second Degree**.

Once a Bachelor of Science or a Bachelor of Arts degree is awarded, students may complete additional majors or minors under that specific degree type. Subsequent majors or minors appear as a milestone statement on the academic record following the term for which the requirements were completed.

Dual Major: A dual major is different than a second/double major or declaring multiple majors. With a dual major, two majors have been formally combined into a single curriculum. Typically, a dual major has fewer overall required classes than if a student were to declare both majors individually. Departments must request formal approval of a dual major through the governance process. Students can officially declare a dual major through the major change process. Dual majors are identified on the official major curriculum (http://catalog.ndsu.edu/undergraduate/program-curriculum/) list in the catalog.

Minors

Minor: A minor is a similar grouping of courses in an academic discipline that students may declare to enhance their undergraduate studies. A minor program of study must total a minimum of 16 credits. A minimum of eight credits for the minor must be earned in residence at NDSU. Minors are not stand alone credentials; they are awarded with a bachelor's degree.

Additional minors may be completed and recorded on a student's academic record after earning a degree. A subsequent minor will appear as a milestone statement on the academic record following the term for which the requirements were completed.

Undergraduate Certificates

Undergraduate Certificate: A certificate program is a specialized course of study requiring a minimum of 9 credits at the undergraduate level. Certificates may be earned while in pursuit of a degree or as a stand-alone program of study. Curricular requirements are available on the official major curriculum list (http://catalog.ndsu.edu/undergraduate/program-curriculum/) in the catalog.

Prospective students interested in certificate programs must make application to the University through the Office of Admission for undergraduate certificates.

Second Degree

A second baccalaureate degree type may be earned at NDSU with the following provisions:

1. All curriculum requirements must be satisfactorily completed.
2. Each baccalaureate degree must be different (ex. B.S. & B.A. or B.S. & B.S.E.E.). Students cannot earn more than one degree type, however, students may complete requirements for more than one major within a given degree, if available (see Second/Double or Multiple Majors).

Exceptions to Academic Program Requirements

Academic policies associated with degree requirements and graduation, transfer credit, and general education, as well as curricular requirements for programs of study are designed to ensure that programs at NDSU are consistently of high quality. Students are expected to complete all curricular requirements for a degree program, which includes:

- Overall University requirements (including general education),
- Any college or department requirements if applicable, and
- Major program of study requirements.

However, limited exceptions may be granted under some circumstances. In consultation with an academic advisor, a student may request a course substitution or waiver to a curricular requirement. An advisor begins the process by completing and submitting the Substitution/Waiver form, which is routed to the academic department chairperson or curriculum coordinator for formal approval.

Academic departments should plan to teach all of the classes in a major program of study, thus allowing students to complete their degree in a timely manner. If required courses in the major can no longer be taught, the academic unit has two options available so students may complete their degree requirements:

1. The department chairperson or curriculum coordinator may file individual substitution/waiver forms for students requiring a curricular adjustment, or
2. Move the student to a newer updated curriculum in the same major.

Bachelor of Arts Requirement Using a Second Language

The Bachelor of Arts (B.A.) degree may be conferred upon students who complete the major requirements for their chosen field of study and have functional proficiency in at least one language other than English. The B.A. degree recognizes these students as having acquired the foundation for enhancing their ability to communicate, work, and study in an internationalized world. The B.A. signifies that these students have chosen to develop, through the equivalent of at least four semesters of coursework, both practical language skills and a comparative perspective on their own language and culture. The B.A. second language requirement fosters an awareness of the culturally conditioned nature of the students' assumptions about the

world, and it better equips them with the mental agility needed to understand ways of thinking different from their own as they encounter the diversity of professional and personal relationships, as well as the intellectual and practical challenges of their future careers.

The second language requirement of the B.A. degree involves student demonstration of functional language proficiency over a sustained period of time, typically 14 credits of coursework. Given the sequential nature of language courses, the assessment of their abilities across the range of skills in speaking, reading, writing and listening comprehension is continuous and demanding. For this reason, NDSU requires that those students who have prior language-learning experience or who present language examination scores (CLEP, etc.) take, at minimum, the exit-level (202) course in order to verify their broad functional ability and basic cultural competence. It is important to note that the language requirement is not defined in credits but in terms of proficiency or communicative competence in all four skills of speaking, reading, writing and listening comprehension.

To fulfill the B.A. language requirement a student must demonstrate competence equivalent to that normally attained after four semesters of college study (NDSU level 202). Competency may be demonstrated in the following ways:

1. Completion in any second language of coursework at the NDSU 202 level or its equivalent with a grade of 'C' or better. Note that this requirement cannot be fulfilled by coursework taken pass/fail.
2. Successful completion of any second language course with a grade of 'C' or better that has the equivalent of NDSU 202 or higher as a prerequisite.
3. For students having previously passed the CLEP Examination (p. 48) in French, German or Spanish with a CLEP score high enough for second-year college credit (59 in French, 60 in German and 63 in Spanish) or the AP exam (p. 46) with a minimum score of 4 in French, German or Spanish, taking one additional college-level language class at the 202 level or higher in order to demonstrate competency in all four skill levels. Students must complete this course with a 'C' or better.
4. English satisfies the B.A. language requirement for students whose official, certified transcripts demonstrate that their secondary or higher education was completed in a language other than English. It is the responsibility of the student to provide all necessary untranslated, official documentation to the Department of Modern Languages (https://www.ndsu.edu/modernlanguages/) for verification. No credit will be awarded.
5. Students who are unable to provide the above mentioned certified documentation but who are native speakers of languages other than English may fulfill the second language requirement through proficiency in English by successful completion of the three-semester General Education English composition sequence and by passing an additional English (ENGL) course with a 'C' or better. Students having completed this sequence may apply to the Department of Modern Languages (https://www.ndsu.edu/modernlanguages/) for a waiver of the Second Language requirement.
6. Requests for determination of proficiency in languages not taught at NDSU are considered by the Department of Modern Languages (https://www.ndsu.edu/modernlanguages/). If a student would like to demonstrate proficiency through testing in a language that is not taught at NDSU, it is his/her responsibility to arrange for such testing. The proficiency test must be completed by a faculty or staff member at a college or university; the evaluator must hold at least a master's degree (in any discipline). The test must evaluate reading, writing, listening and speaking through the fourth semester (intermediate NDSU 202) college level. The student must provide documentation from the evaluator which includes a copy of the test, a letter from the evaluator assessing the level of proficiency, and a statement of the evaluator's credentials, including an explanation of his/her expertise in the language being tested, if the evaluator does not teach that language at the college level. No credit is awarded but proficiency requirement is fulfilled.

Graduation with Honor

Graduation with honor applies to students earning a baccalaureate degree. Candidates are eligible for graduation with honor if they have completed a minimum of 60 undergraduate resident credits at NDSU and earn a minimum institutional cumulative grade point average (CGPA) of 3.50 or higher. Transfer credit and graduate coursework are not used in the calculation of graduation with honor. Students who meet these academic criteria will graduate according to one of the following honor levels:

Honor	Criteria
Summa Cum Laude	60 undergraduate credits in residency and a CGPA equal to or greater than 3.90
Magna Cum Laude	60 undergraduate credits in residency and a CGPA equal to or greater than 3.70 and less than 3.90
Cum Laude	60 undergraduate credits in residency and a CGPA equal to or greater than 3.50 and less than 3.70

Graduation with Honor Recognition During the Commencement Ceremony

Recognition in the commencement program is based on coursework that is completed and graded at the time of the ceremony. Courses that are in progress and grades are not yet accessible online (via Campus Connection) are not included. The honor level is not announced during the reading of the student's name at the ceremony.

Official Degree Audits

A degree audit is an official review of graduation requirements by the university to determine a student's degree progress and graduation eligibility. Undergraduate students who have completed approximately 70% of their degree requirements within their primary major of study are notified by the Office of Registration and Records via their NDSU email account to submit a degree audit request form linked within this email. A Degree and Records

Analyst from Registration and Records performs a comprehensive audit and notifies both the student and the student's assigned academic advisor to locate and review the official audit results in Campus Connection.

It should be noted that degree audits are not automatically completed because student educational and degree goals vary (multiple degree, majors, minors, etc.). If the student fails to submit the official audit, graduation *could* be delayed if critical graduation requirements are missed.

Tools for students to use to continually monitor degree progress

At any time, undergraduate students and academic advisers can track degree progress using the Academic Requirements Report (https://www.ndsu.edu/onestop/viewing-academic-requirement-report/) (automated degree audit) feature in Campus Connection. In addition to this report, which details all degree requirements, students can also use Degree Map (https://www.ndsu.edu/onestop/degree-map-and-planning/) to plan out their course requirements in an interactive semester-by-semester plan of study that integrates with the registration tool Schedule Planner. Both tools function using real time enrollment data that displays completed requirements, in-progress requirements, and those requirements that are yet to be satisfied.

Transfer and Test Credit

Transfer credit evaluations are conducted in the Office of Registration and Records (https://www.ndsu.edu/registrar/). The evaluation process begins after a student is admitted as a degree seeking student to the university or has completed the reactivation process with the Office of Registration and Records if a returning NDSU student.

Administrative Policy for the Evaluation of Transfer Credit from U.S. Institutions

The Office of Registration and Records administers the NDSU policies governing the acceptance of college credit from outside institutions. These requirements apply to returning students who have attended other institutions, as well as new NDSU students. Before credits may be evaluated for specific NDSU course equivalencies or application to programs of study, transfer courses will be accepted for university credit according to the following criteria:

1. College-level coursework recognized by the United States Department of Education (https://www2.ed.gov/admins/finaid/accred/accreditation_pg3.html#RegionalInstitutional) are eligible for acceptance in transfer with receipt of official transcript or score report.
2. Course repeats
   a. Courses repeated elsewhere prior to attending NDSU will be accepted in transfer as indicated on the transferring institution's official transcript. Transfer courses taken from multiple institutions that have the same NDSU equivalent will be considered as a repeated course, and only the most recent attempted course will be accepted for transfer.
   b. Courses will not be accepted in transfer to replace any grades or credits earned at NDSU. If a course is completed at NDSU, and an attempt is made to repeat that course elsewhere, the course is considered duplicate and is not eligible for transfer. (See also Repeated Courses (p. 43) policy.)
3. Credit for a remedial course is not accepted for transfer if the course is remedial by definition of the transferring institution or if it is equivalent to a remedial course at NDSU. Remedial courses may, however, fulfill prerequisite requirements, if applicable.
4. Credit awarded by a transfer institution through examination, placement or prior learning credit will not be accepted.
5. The Office of Registration and Records determines the applicability of transfer credit toward NDSU general education requirements (p. 55) according to institutional and North Dakota University System guidelines. (See also General Education Administrative Policies (p. 58).)
6. College-level credits that do not have course equivalents at NDSU will be accepted as electives and may count only toward total credits. An academic department may determine whether these electives satisfy specific curricular requirements through the course substitution process.
7. NDSU requires that a minimum of 36 credits toward a baccalaureate degree be earned at the junior or senior (300- and 400-level) level. Therefore, while a freshman- or sophomore-level (100- or 200-level) course transferred from another institution may satisfy a specific upper-level program requirement at NDSU, that course will not be counted toward the 36-credit upper-division degree requirement.
8. Transfer grades are recorded but not computed in the institutional cumulative GPA at NDSU. Transfer grades are used only for purposes of admission to the University, admission to certain programs, and for some scholarships and financial aid.
9. All letter grades will be accepted by the university; however, many colleges and departments have standards to determine course applicability toward their respective degree programs. Transfer grades will be converted to the NDSU grading (https://catalog.ndsu.edu/academic-policies/grades/) option.
10. The name of transfer institutions and total credits accepted by NDSU will be indicated on the official transcript. Individual transfer courses are not detailed on the official transcript but are provided in the academic requirements report (https://www.ndsu.edu/onestop/academic-requirements-report/) after admission to the university.
11. Transfer credits are converted to semester credits, if applicable.

Evaluation of Transfer Credit from International Institutions

According to North Dakota University System procedure 411.5 (https://ndusbpos.sharepoint.com/:w:/s/NDUSPoliciesandProcedures/ESEpCE9aw11AhF31ewMNH-0BhqSGql3x77MepnG5VULMSw/?e=0nl6XB), international transcripts must be submitted to an approved external

credential evaluation service. Obtaining an evaluation is the sole responsibility of the student. Evaluations must be submitted according to the guidelines listed below. The policies for the evaluation of transfer credit listed for Domestic/US Institutions also apply to international transfer credit. NDSU students participating in an approved study-abroad program and international students transferring from a North Dakota State University partnership institution are exempt from submitting an external credential evaluation.

- Students must submit official transcripts to an evaluation service that has been approved by the National Association of Credential Evaluation Services (NACES) (https://www.naces.org/members/) or the Association of International Credential Evaluators (AICE) (http://aice-eval.org/endorsed-members/).
- Official transcript(s) issued in English must be submitted to NDSU in addition to the evaluation unless the evaluation service provides certification of student documents and sends copies of transcript(s) to NDSU.
- The evaluation must contain a **course by course** evaluation.
- New international students should send evaluations directly to the Office of International Student and Study Abroad Services (https://www.ndsu.edu/admission/how_to_apply/international/transfer/).
- New domestic students or United States permanent resident students should send evaluations directly to the NDSU Office of Admission (https://www.ndsu.edu/admission/how_to_apply/transfer/requirements/).
- Students must submit course syllabi for all completed coursework directly from the international institution to the NDSU Office of Registration and Records (https://www.ndsu.edu/registrar/).
- Effective January 2020, all international transfer coursework listed as “English as a Foreign Language” will not be accepted for NDSU English Composition courses.

North Dakota University System Common Course Numbers

Institutions in the North Dakota University System have established common course numbers (CCN) (https://ndus.edu/lets-get-started/transfer-to-a-different-campus/common-course-numbering-ccn/) to facilitate transfer within the University System. Under the CCN agreement, transfer students who have successfully completed CCN courses will not be required to retake them at NDSU unless their degree program requires a higher grade. However, CCN courses will not fulfill residence requirements nor will 100- and 200-level courses fulfill the upper-division requirement for graduation.

Evaluation of Military Credit

North Dakota State University accepts military courses recognized by the American Council on Education (ACE). Students who have completed military courses may receive transfer credit from NDSU. When evaluating military courses, the Office of Registration and Records will follow the criteria illustrated below:

1. Only Joint Services Transcripts that are sent electronically from the American Council on Education will be considered official and will be accepted.
2. Courses listed under “Military Courses” will be accepted for credit. Courses listed under “Military Occupations”, “College Level Test Scores”, and “Other Learning Experiences” on the Joint Services Transcript will not be accepted for credit.
3. Basic Military Training courses will transfer as an elective but will earn credit towards the General Education Category: Wellness (W).
4. Each course listed under Military Courses will be awarded the number of credits recommended by the American Council on Education.
5. Courses that do not have an NDSU equivalency will be set as electives. These courses will be evaluated per the American Council of Education’s recommendations.
6. Courses that are recommended as vocational or graduate level will not be accepted for transfer.

Joint Services Transcript Order Information:

Website: Joint Services Transcript Request (https://jst.doded.mil/official.html)

Email: jst@doded.mil

Academic Standing

Records of all undergraduate and professional (pharmacy) students are examined at the end of each semester, including summer. Academic progress is measured by grades and credits earned. To be eligible to register continuously without restrictions, students must maintain good academic standing, which is defined as meeting or exceeding a 2.00 semester GPA on a 4.0 scale. Students are notified at the end of a semester via their NDSU email account if they become academically deficient.

Some academic majors have academic standards that are higher than the University minimum of 2.00. This information should be clearly outlined on the official major curriculum found in the University Catalog. Students may also consult with their academic adviser or academic department for information about program specific requirements. A graphic illustration of academic progress and standing is available in chart format on the Academic Standing (https://www.ndsu.edu/onestop/academic-standing/) webpage on the One Stop website.

Academic standing is defined as follows:

Good Standing

Good standing is achieved when a student's cumulative GPA is at or above 2.00. **(Prior to fall 2022, this standing was achieved when a student's semester GPA and cumulative GPA were both at or above 2.00.)**

Academic Alert

An academic alert is issued when a student who entered the grading period on good standing (or academic warning) earns both a semester and cumulative GPA below the minimum 2.00. An academic alert does not appear on the student's official academic transcript, but does appear on the unofficial transcript. Students are notified of their academic alert status via official NDSU email. **(Prior to fall 2022, this standing was Academic Probation.)**

Continued Alert

Continued alert is a formal extension of the academic alert status. It is issued when a student enters the grading period on academic alert or continued alert, shows adequate progress by attaining a minimum semester GPA of 2.00, but the cumulative GPA is still below the minimum 2.00. Continued alert does not appear on the student's official academic transcript, but does appear on the unofficial transcript. Students are notified of their continued alert status via official NDSU email. **(Prior to fall 2022, this standing was Continued Probation.)**

Academic Suspension

Academic suspension is issued when a student enters the semester on either academic alert or continued alert and earns both a semester GPA and cumulative GPA below the minimum 2.00. This includes students admitted on alert (formerly probation) for their first semester at NDSU or readmitted on alert (formerly probation) following an academic suspension. An academic suspension is a university administrative intervention, which requires a student to be disenrolled for two semesters immediately following the semester of suspension (includes summer). A **suspension hold** is placed on the student's record by the Office of Registration and Record which enrollment in these future semesters. If a student is enrolled in a future semester, this enrollment is removed to ensure that tuition and fees are refunded and there is no record activity. Students are notified of their suspension status via official NDSU email. A copy of this notification is available on the student's Campus Connection hompage in the Tasks and Communication tile. An academic suspension appears on the student's official academic transcript.

Readmission After Serving an Academic Suspension

To be considered for readmission after serving an academic suspension, a student must file a Undergraduate Reactivation/Petition for Readmission Form (https://www.ndsu.edu/onestop/student-forms/) to the Office of Registration and Records a minimum of 30 business days prior to the beginning of the semester in which the student is eligible for readmission. The petition is reviewed by a college committee and if approved, the student will be readmitted on academic probation and may register for classes.

IMPORTANT NOTE: Students who enrolled in courses at another institution while serving the terms of an NDSU academic suspension should review the NDSU repeated courses policy (https://catalog.ndsu.edu/academic-policies/repeated-courses/) and transfer credit policy (https://catalog.ndsu.edu/academic-policies/undergraduate-policies/transfer-test-credit/) (#2). Students must arrange for an official transcript to be sent to the Office of Registration and Records **before** readmission will be considered. Students re-entering NDSU from an academic suspension who attended courses elsewhere must earn a minimum cumulative GPA of 2.00 in those classes. NDSU reserves the right to revoke readmission if official transcripts are not received or the final cumulative GPA from a sending institution is below 2.00.

An Academic Suspension from Another Institution

NDSU honors suspensions of other institutions. Transfer and returning students who have been suspended from another institution may not be considered for admission or readmission until one year has lapsed or the suspension has been lifted. Students who fail to report all previous college work may be subject to dismissal or loss of credit or both. Courses previously completed at NDSU may only be repeated at NDSU for grade and GPA improvement on the NDSU academic record, with the exception of Tri-College courses (see Repeated Courses (https://catalog.ndsu.edu/academic-policies/grades/#repeatedcoursestext) section for more details).

Dean's List

To be eligible for inclusion on the Dean’s List for any given semester, a student must have earned a minimum grade-point average of 3.50 during that term while completing at least 12 semester hours in graded coursework. Graded coursework includes the developmental course MATH 098. MATH 098 does not satisfy graduation requirements and does not calculate into the cumulative grade-point average on the academic record, but it is factored into the overall attempted credits and honor points for Dean's List consideration.

The Dean’s List is only maintained for undergraduate students and Pharm.D. students. Credits taken simultaneously via transfer, accelerated graduate coursework, and collaborative or consortium registration are not included in the NDSU Dean’s List calculation and do not count toward the NDSU minimum credit requirement. These courses are considered transfer credit (see transfer credit). No exceptions can be considered for Dean’s List consideration.

NOTE: The Office of Registration and Record notifies University Relations of Dean's List honorees.

Academic Forgiveness

A former student who has not completed a baccalaureate degree and has not been in attendance at for six (6) or more years*, but who is presently enrolled and attending classes at NDSU may request to exclude from grade-point-average calculations all grades earned in selected full terms (quarters or semesters) completed at NDSU prior to the six-year absence.

The courses and grades for the terms selected will remain on the student's academic record, but credits, honor points, and grades will be excluded from grade-point average calculations. Excluded courses cannot be used to satisfy any academic requirements. A student may exercise this option only once so it is in the student's best interest to understand all implications and to work with a knowledgeable advisor to determine the outcome before submitting the request. Qualified students can expect the forgiveness to be processed on the academic record after the 50% refund deadline, which is approximately 10 weeks into the semester. If the request is received between semesters or during the summer, the request will be processed after the 50% refund deadline of the next full semester.

A qualifying student wishing to request academic forgiveness should submit a letter addressed to the Office of Registration and Records (https://www.ndsu.edu/registrar/), 110 Ceres Hall, NDSU Dept. 2801, PO Box 6050, Fargo, ND 58108-6050 (or by fax to 701-231-8959 or email to ndsu.registrar@ndsu.edu) that includes the following:

- Student full name
- Student ID number
- Mailing address
- NDSU email address
- Prior full semesters you would like considered for forgiveness

Notification of the request will be sent to the student's NDSU email account.

***Exception**: Students who qualify for the Bachelor of University Studies general studies option (https://catalog.ndsu.edu/past-bulletin-archive/2021-22/programs-study/undergraduate/university-studies/#generalstudiesoptiontext) may apply for academic forgiveness in accordance with the above policy with one exception; rather than a 6 year absence, students in this program qualify for forgiveness after a 2 year absence.

Graduate College Policies

- General Policies (p. 74)
- Master's Degree Policies (p. 77)
- Doctoral Degree Policies (p. 81)
- Graduate Certificate Policies (p. 85)
- Graduate Assistantship Policy (p. 86)
- English Language Proficiency Procedure for Graduate Teaching Assistants (p. 88)
- Graduate Student Appeals Process (p. 89)

General Policies

Graduate students must follow all academic policies in the most recent catalog unless a policy states it applies only to undergraduate students.

Non-Discrimination Policy

NDSU does not discriminate in its programs and activities on the basis of age, color, gender expression/identity, genetic information, marital status, national origin, participation in lawful off-campus activity, physical or mental disability, pregnancy, public assistance status, race, religion, sex, sexual orientation, spousal relationship to current employee, or veteran status, as applicable. Direct inquiries to: Vice Provost, Title IX/ADA Coordinator, Old Main 201, NDSU Main Campus, Fargo, ND, 58108, 701-231- 7708, ndsu.eoaa@ndsu.edu.

This publication is available in alternate format upon request. Please contact the Graduate College at (701) 231-7033 or ndsu.grad.school@ndsu.edu.

Graduate Courses

Courses approved at the 600, 700 and 800 level may be taken for graduate credit and used to satisfy course requirements on the student's graduate plan of study.

Didactic courses are those courses approved for graduate credit numbered 601-689, 691; 700-789,791; 800-889, 891. Courses numbered 690, 692-699, 790, 792-799, 890, 892-899 are special or experimental courses and are not to be included as didactic courses on a plan of study.

Change of Degree Objective

Students may change their degree objective within their graduate program. Students must meet the requirements of the new degree objective.

Students moving from a doctoral degree or Plan A master's to a Plan B or C (non-thesis) masters may use, with the approval of their advisor and graduate program coordinator, up to four (4) completed research credits toward the minimum credits for the new degree objective.

Academic Standing

The scholastic requirements below apply to each student enrolled in the Graduate College. Programs may have additional requirements. Refer to your program handbook for more information.

- A student must have a cumulative grade point average (CGPA) of at least 3.0 to be in good academic standing and to receive a graduate degree.
- All courses taken by a graduate student for which grades are given (not satisfactory/unsatisfactory) will be used in calculating the semester and CGPA.
- Grades of A, B, C or S may be used to fulfill graduation requirements.
- Earning more than two grades of C, D, F or U may be grounds for dismissal upon recommendation by the program coordinator.

Academic Warning

Any student in good standing whose CGPA drops to less than 3.0 at any time of attendance is placed on academic warning. Any student admitted in conditional status is placed on academic warning. A student on academic warning cannot register for the following semester until the grades for the current semester post.

An academic warning does not appear on the official academic transcript. Students are notified of their academic warning status via official NDSU email. These students remain eligible for graduate assistantships.

Academic Probation

If a student on academic warning fails to achieve a CGPA of at least 3.0 in the subsequent semester of attendance, they will be placed on academic probation.

A student on academic probation is not eligible for a graduate assistantship or tuition waiver. An academic probation does not appear on the student's official academic transcript. Students are notified of their academic probation status via official NDSU email.

To continue the pursuit of a graduate degree program, a student on academic probation must develop a remediation plan in collaboration with the advisor and submit the Academic Probation Remediation Plan (https://powerforms.docusign.net/bf60da25-48d5-4576-8c81-d9b5377fea07/?env=na3&acct=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7&accountId=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7) form.

This plan must include:

- the specific course(s) you plan to take
- the grade you plan to earn in order to return to a CGPA of at least 3.0 within one additional semester (fall or spring) for full-time students and two semesters for part-time students (i.e. students taking 5 credits or fewer)
- explanation of the measures being taken to ensure you will receive the grades you've indicated
- signatures of the student, adviser and department chair/graduate program coordinator

The remediation form should be submitted for Graduate College approval before the first day of class the following semester. If the form is not received by the deadline, or if the goals outlined in the plan are not met in the subsequent semester(s), the student will be dismissed from the Graduate College.

Dismissal from the Graduate College

Dismissal results in the loss of active graduate student status with the Graduate College and participation in all graduate programs and course work. A dismissal is documented on the student's official academic transcript. Students are notified of their dismissal via official NDSU email.

Graduate students may be dismissed from the Graduate College as a result of:

- failure to meet our scholastic standards
- academic or professional misconduct
- insufficient progress toward a degree
- failure to meet professional expectations or standards
- failure to submit an acceptable remediation plan
- failure to meet the goals outlined in the approved remediation plan

Dismissal is confirmed following the completion of any appeal process (p. 89). Students dismissed from the Graduate College may reapply for admission after at least one calendar year from the date of their dismissal.

Enrollment Policy

Students must maintain continuous enrollment by registering for at least one graduate credit during fall and spring semester until all degree requirements are completed. If applicable, this includes the Graduate College approval of the master's paper, thesis, or dissertation.

- Registration is required for students completing the preliminary or final examinations during the summer semester.
- Students may take up to 15 credits each semester. Students wanting to exceed the credit limit must submit the Over 15 Credit Petition (https://www.ndsu.edu/gradschool/current_students/forms/#:~:text=Over%2015%20Credits%20Petition) form.
- A student who has not registered for longer than a continuous two-year period must reapply for admission and is subject to the degree requirements at the time of readmission
- For information regarding assistantships and enrollment see https://catalog.ndsu.edu/graduate/graduate-school-policies/graduate-assistantship-policy/
- In some circumstances, graduate assistants who are working 20 hours per week and registered for five or more graduate credits may be considered full-time. Check with your lender, funding provider or other organization to determine their specific requirements.

See Credit Load page (https://catalog.ndsu.edu/academic-policies/student-credit-load/) for more information.

Student visa holders, see the International Student and Study Abroad Services page (https://www.ndsu.edu/international/iss/immigration/students/credits/) for credit load information.

Coursework Completion Deadlines

- Coursework, including transfer credit, more than seven years old cannot be used to satisfy the requirements of any certificate or master's degree. Current students or students returning within the seven year timeframe may petition for an exception to this policy for NDSU coursework only. The petition for exception is limited to one extension of at most one (1) calendar year. The exception must be approved by the student's advisor, the graduate program coordinator, and the Graduate College.
- Coursework, including transfer credit, more than ten years old cannot be used to satisfy degree requirements of any doctoral degree. Current students or students returning within the ten year timeframe may petition for an exception to this policy for NDSU coursework only. The petition for exception is limited to one extension of at most two (2) calendar years. The exception must be approved by the student's advisor, the graduate program coordinator, and the Graduate College.

Master's Paper, Thesis, or Dissertation Completion Deadlines

The student will have one year from the date of the final examination to complete the Graduate College format review process and any other outstanding degree requirements.

If all degree requirements are not completed within one year the student must repeat the final examination. If a period of time two years or greater lapses before the master's paper, thesis or dissertation is approved by the Graduate College, the student must reapply to the Graduate College, redefend the disquisition and register for a minimum of two credits.

Graduate College Leave of Absence

Students may file a Request for Leave of Absence (https://powerforms.docusign.net/dfe263d9-611c-4814-a1ef-14376c97f7e8/?env=na3&acct=1ceb9a57-b6a3-4df7-b655-%20d64cf8f1c2d7&accountId=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7) from their graduate program for up to two years. Forms must be submitted for Graduate College approval by the end of the fourth week of classes and can only be submitted if the student is not enrolled or has withdrawn to zero credits (https://www.ndsu.edu/onestop/withdrawing-classes/) (see Dates and Deadlines (https://www.ndsu.edu/onestop/dates-and-deadlines/) for details).

Filing a Request for Leave of Absence ensures that you will not need to register for semesters in which leave was approved. To re-enroll (within the two- year limit), submit the Request for Reactivation (https://powerforms.docusign.net/8e0410f1-3331-4b61-a369-85780b99e512/?env=na3&acct=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7&accountId=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7). Any approved leave of absence does not amend the seven- or ten-year coursework completion deadline.

Students who do not maintain continuous enrollment and fail to file for a leave of absence with the Graduate College must submit the Request for Reactivation (https://powerforms.docusign.net/8e0410f1-3331-4b61-a369-85780b99e512/?env=na3&acct=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7&accountId=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7) form and enroll in at least one credit per missed semester (fall and spring) up to four credits.

Family and Medical Accommodation Policy for Graduate Students

The Graduate School at NDSU is committed to promoting an environment where students can successfully balance their academic and family responsibilities. The goal of this policy is to provide consistent, equitable treatment to all graduate students, regardless of family status, by providing timeline extensions for completing preliminary/qualifying examinations and by offering modified duties to students experiencing a serious health condition or needing to provide care to a new child or a seriously ill family member.

1. Extensions for Completing Preliminary/Qualifying Examinations, Final Examinations, and/or Disquisitions

Eligibility:

A graduate student is eligible to apply for a time extension on completing preliminary/qualifying examination, final examination, and/or disquisition upon showing that they are:

1. In good academic standing and making progress toward degree completion, and
2. Undergoing childbirth, caring for their newborn, caring for their child with a serious medical condition, adopting a child, accepting foster placement of a child, experiencing their own serious medical condition, or experiencing a serious medical condition of a spouse/partner or parent for which they have caretaker responsibilities (medical certification may be required).

Length of Extensions:

While each extension granted under this policy will be assessed on a case-by-case basis, absent extraordinary circumstances, the additional time granted by this policy will not exceed two years.

A graduate student undergoing childbirth, adopting a child, or accepting foster placement of a child shall be entitled to receive an extension of up to one extra year for completing preliminary/qualifying examination, final examination, and/or submitting a disquisition.

A graduate student experiencing their own serious medical condition, caring for their child with a serious medical condition, or experiencing a serious medical condition of a spouse/partner or parent for which they have caretaker responsibilities shall be entitled to receive an extension of up to six extra months for completing a preliminary/qualifying examination, a final examination, and/or submitting a disquisition.

Application/Approval Process:

Graduate students who wish to obtain an extension under this policy must document their eligibility in writing to their academic unit prior to the effective date of the extension – retroactive requests will not be considered, absent extraordinary circumstances. The student's academic unit and the Graduate School will then assess the student's eligibility and approve/deny the extension. Additionally, international students on a visa must have their extension approved by the Office of International Student and Study Abroad Services.

Leave of Absence

Students requesting an extension may also choose to take a leave of absence from their graduate program. International students will need to consult with the Office of International Student and Study Abroad Services to determine if they are eligible for a leave of absence.

2. Modified Duties for Graduate Assistants

Eligibility:

A graduate assistant is eligible for "modified duties" if the graduate assistant:

1. Becomes a parent through childbirth, adoption, or foster placement of a child;
2. Has a health condition that makes him or her unable to perform regular duties but does not necessitate a reduction in workload; or
3. Will be caring for a child, spouse/partner or parent who has a serious health condition.
4. Must have served as a graduate assistant for at least one academic term.

Definition and Length of Modified Duties:

"Modified duties" means a change to duties and goals without reduction of stipend for a limited period of time. A graduate assistant taking modified duties will still be at a 100% workload and 100% stipend; however, the nature of the responsibilities for this time period will be adjusted. Modified duties will include a revision of workload for up to the equivalent of a semester. If warranted and supported by appropriate medical documentation, graduate students can be excused from most, if not all, of their regular duties for up to six weeks without a reduction in pay. All eligible students will be granted a Parental Accommodation period for up to six weeks immediately following the birth of a child or the adoption of a child under the age of 6 for which the student has parental responsibilities. (Additional time may be granted based on medical documentation of exceptional medical circumstances experienced by the student or his/her child, spouse, partner, or dependent parent.)

Regardless of circumstances, modified duties agreements must conclude within 12 months.

Application/Approval Process

A graduate assistant requesting modified duties shall document their request in writing to their supervisor and department chair/head. The graduate assistant and the department will engage in an interactive process to determine how the graduate assistant's duties will be modified and the duration of the modified duties. In the event that an agreement cannot be reached between the graduate assistant and the department, the Dean of the Graduate School shall assist in reaching an agreement. To ensure that all parties are operating under the same understanding, the agreement for modified duties shall be put in writing. Graduate assistants accepting modified duties are subject to the regular evaluation procedures used in the program; however, such evaluations shall be based on the agreed upon modified duties.

Master's Degree Policies

Degrees Offered

North Dakota State University (NDSU) offers Master of Arts (M.A.), Master of Science (M.S.), and non-thesis master's programs.

M.A. and M.S. students may opt for a Plan A (Thesis) or Plan B (Master's Paper/Comprehensive Study) program. The Plan C (Culminating Experience) option is primarily intended for non-thesis degree programs; however, some M.S. programs do offer the Plan C option. Not all programs offer all three options. In addition, plans may differ in the composition of the student's supervisory committee and required submissions to the Graduate College for degree completion.

Master of Arts/Master of Science Overview

Plan A: Thesis-based Master's

The thesis typically includes a problem statement, a review of existing literature relevant to that problem, and the creation and presentation of new knowledge in providing a solution to the problem. Each student assembles a supervisory committee, as described on the next tab, and is required to pass a final oral examination in which the supervisory committee serves as the examining committee. Following a successful final examination, the student will submit an electronic copy of their thesis to the Graduate College for format review.

Plan B: Master's Paper/Comprehensive Study-based Master's

The student will develop a thorough understanding of existing knowledge and the ability to apply that existing knowledge to a problem of interest. The individual creative component is defined by the program and could include a portfolio or integrated field experience.

Each student is required to pass a final oral examination in which the supervisory committee serves as the examining committee. Following a successful final examination, the student will submit an electronic copy of their master's paper to the Graduate College for format review.

Plan C: Culminating Experience-based Master's

The Plan C option allows each academic program to define a culminating experience such as a capstone course, a written examination, or some other approach to measure the student's understanding of the relevant material in the discipline.

Non-Thesis Master's Programs (Discipline-specific or course-based master's programs)

Master of Accountancy (M.Acc.)

Master of Athletic Training (M.A.Trg.)

Master of Business Administration (M.B.A.)

Master of Construction Management (M.C.M.)

Master of Education (M.Ed.)

Master of Engineering (M.Engr.)

Master of Music (M.M.)

Master of Natural Resources Management (M.N.R.M.)

Master of Public Health (M.P.H.)

Master of Public Policy (M.P.P.)

Master of Software Engineering (M.S.E.)

Master of Supply Chain Management (M.S.C.M.)

Education Specialist (Ed.S.) in Educational Administration

Supervisory Committee

Some Plan C programs do not require a Supervisory Committee. Refer to Plan C specifics below.

The Supervisory Committee is comprised of the student's advisor (committee chair) and supporting committee members. The major adviser-student relationship must be a mutually acceptable one. The goal in selecting a supervisory committee is creating a team to help the student develop a Plan of Study to align with the student's desired professional goals, provide support in the growth of the student as a professional, and oversee the student's final project or final examination.

Students may not bring food or beverages for the committee members to Supervisory Committee meetings, preliminary examinations, or final examinations. If a program wishes to provide refreshments at these meetings, it is the responsibility of the program to pay for and obtain them.

The supervisory committee members should be identified before the Plan of Study is formulated so that all committee members have a chance to contribute. The supervisory committee, agreed upon by the major advisor and student, is approved by the graduate program coordinator at the time the Plan of Study is submitted.

To add an external member (not full or affiliate graduate faculty) to a graduate committee, the Plan of Study or Supervisory Committee Change form (if the Plan of Study is already filed) must include a letter of support from the department chair and a copy of the external member's curriculum vitae (CV). The chair's letter should indicate the chair and department's support for this person to be on the committee and list the expertise this person brings to the committee. There is a paperclip icon on both forms that allows the student, advisor and graduate program coordinator to add the letter and CV.

- The letter must come from the department chair only, not the advisor. An advisor may add a letter of support, though this letter alone is not sufficient.
- The external member cannot be an affiliate graduate faculty member of the advisor's home department/program.

Plan A and Plan B

The supervisory committee will have at least three members. The members consist of:

- The major advisor, who must be a full or affiliate member of the graduate faculty Level 1 or Level 2, will be the committee chair.
- A second member, who must be a full or affiliate member of the graduate faculty. The second member may serve as co-adviser on the supervisory committee. The co-chair designation implies equally shared responsibilities in guiding the student through to degree completion.
- A third member, who could be either a full member of the graduate faculty from outside the advisor's home department or a qualified off-campus expert in the field.

Plan C

The student's advisor must be a full or affiliate member of the graduate faculty. If the program does require students in this option to form a supervisory committee, all members must be a full or affiliate member of the graduate faculty.

Advisor or Supervisory Committee Changes

Advisor changes and changes to the supervisory committee may be made with the Request to Form or Change Supervisory Committee (https://powerforms.docusign.net/1c3281c5-f567-4702-8620-3d62724d1518/?env=na3&acct=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7&accountId=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7) form. The student, advisor, graduate program coordinator, and the Graduate College must approve changes.

Plan of Study

Some programs do not require a Plan of Study to be filed with the Graduate College. Refer to your program handbook for more information.

The Plan of Study is an agreement between the student, the academic program, and the Graduate College that specifies all courses required to earn the graduate degree. This includes any qualifying transfer credits (see transfer credit policy below) and up to 10 credits taken as a non-degree NDSU graduate student toward the degree.

A master's degree includes both didactic credits and non-didactic credits. Didactic credits are numbered 601-689, 691; 700-789, 791; 800-889 and 891. Non-didactic credits are numbered 690, 692-699; 790, 792-799; 890, 892-899. The 600 number range indicates a combined undergraduate/graduate course and 700 and 800 are masters and doctoral level courses. Courses that a student has used to fulfill the requirements of a baccalaureate degree may not be used on that student's graduate plan of study, unless taken as part of an accelerated degree program.

Each program is responsible for defining the requirements for a major in its disciplinary area and making this information available to students. Each student is responsible for familiarizing themselves with the requirements, rules, and recommendations.

The Graduate College allows credits taken as part of a certificate to be used towards the requirements for a master's degree. Programs may restrict the usage of these credits on the master's Plan of Study. Reference your program's handbook for more information.

The Plan of Study must be approved by the student, the supervisory committee, the graduate program coordinator, and the Graduate College and must be filed with the Graduate College by the end of the student's second semester of study.

Plan A Master's Degree

- Minimum 30 credits total
- 16 of the 30 must be didactic credits
- 6-10 credits of 798 Master's Thesis

Plan B Master's Degree

- Minimum 30 credits total
- 21 of the 30 must be didactic credits
- 2-4 credits of 797 Master's Paper

Plan C Master's Degree

- Minimum 30 credits total

Course Deletions or Substitutions

Course deletions or substitutions may be made with the Change to Plan of Study (https://powerforms.docusign.net/20c075c4-741c-4c43-8767-4c48338ddfaf/?env=na3&acct=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7&accountId=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7) form. The student, advisor, graduate program coordinator, and the Graduate College must approve changes.

Transfer of Credit

Transfer of credit is requested at the time a Plan of Study or Change to Plan of Study is filed in the Graduate College. A maximum of 10 credits of graduate-level course work from regionally accredited colleges or universities (or equivalent for international institutions) may be eligible to be used in completing the student's degree program.

Transfer credit coursework must:

- meet degree program requirements
- be graduate level
- be verified by an official transcript from the transfer institution with grades posted
  - Transcript(s) must be filed in the Graduate College at the time the transfer of credit is requested
- not have been used to fulfill the requirements of a baccalaureate degree
- carry only grades of A or B on a 4.0 scale
  - Pass/Fail or Satisfactory/Unsatisfactory graded courses are not eligible for transfer
- not be a continuing education, correspondence, extension education, or workshop course
- not be internship, individual study, special topics, or research course
- have been earned within a 7-year period at the time of the student's final defense (Plan A/B options) or at the end of the student's last semester of coursework (Plan C option/non-thesis degree programs)

Departments and programs have the right to further restrict or eliminate acceptance of transfer credits for their degree programs. Prospective students are encouraged to contact the respective academic department or the Graduate College with transfer credit questions.

Concurrent Master's Degrees

A student may be allowed to work at satisfying the requirements of two graduate degrees concurrently. A maximum of 10 graduate credits of course work can be applied to both programs of study as approved by all members of both supervisory committees, the two program administrators, and the Graduate College. A student pursuing multiple graduate degrees must

- Apply and be accepted to both degree programs
- File a plan of study for each program
- Complete all academic program requirements
- Complete all Graduate College requirements
- Maintain continuous enrollment in each program
- Successfully complete the master's thesis, paper, or culminating experience for each degree program
  - If each program requires a master's paper, thesis, or culminating work, they must differ substantially and must result from substantial work completed independently in each discipline.
- Successfully complete any final examination as required for each program

Master's Degree with Two Major Areas

A student may pursue one master's degree with two major areas. Such a program must have the concurrent recommendation of the administrators of the two programs. The Plan of Study shall clearly delineate the course work required for each major area.

- A minimum of 40 credit hours is required, including at least 14 graduate course credits in each of the two major areas.
- No more than 10 of the required 40 credits shall be research credits under the Plan A masters, while no more than four of the required 40 credits shall be paper credits under the Plan B master's.
- The student is required to conduct interdisciplinary scholarly work culminating in one master's paper or thesis acceptable in both major areas.

Final Defense

The following policies do not apply to Plan C option students. Refer to your program handbook for more information on procedures.

The final defense is an oral examination given to the supervisory committee in which the author of the master's paper, thesis, or culminating work demonstrates satisfactory command of both the focus area of their project and the broader field.

Notification of Scheduled Examination

At least seven (7) calendar days prior to the final defense date, the Notification of Scheduled Examination form must be approved by the student's advisor and graduate program coordinator and filed with the Graduate College.

- A *successful* submission requires all signatures, not only that the graduate student has initiated the form.
- If the form is not filed seven (7) calendar days prior, it will not be approved by the Graduate College.
- A final defense takes place without an approved notification form is considered void. A new defense date must be scheduled and the Notification of Scheduled Examination (https://powerforms.docusign.net/0abb6387-c124-45e6-bc80-337a7635ffb0/?env=na3&acct=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7&accountId=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7) filed seven days prior to the new date.

Pre-defense Document Distribution

The master's paper, thesis, or other culminating work must be distributed to the committee members for review at least seven (7) calendar days prior to the defense.

- If this seven (7) day stipulation cannot be met, the student's committee holds the right to cancel the final defense. It is the student's responsibility to notify the Graduate College if their defense does not take place as scheduled and to complete a new Notification of Scheduled Examination.

Defense Attendee Policy

- If one supervisory committee member cannot participate in the final defense, the defense may be held; however, their absence is considered a "Disapproval" of the student's defense.
- If more than one supervisory committee member cannot participate in the final defense, the defense must be rescheduled.
- It is the student's responsibility to notify the Graduate College if their defense does not take place as scheduled and to complete a new Notification of Scheduled Examination.

Final Defense Outcomes

It is the student's responsibility to initiate the Report of Final Defense (https://www.ndsu.edu/gradschool/current_students/forms/#:~:text=Report%20of%20Final%20Defense), ensure all committee members sign it, and submit it to the Graduate College within 14 calendar days following the defense.

- A *successful* submission requires all signatures, not only that the graduate student has submitted the form.
- If the form is not submitted within 14 calendar days, the defense is considered void and must be rescheduled.

The student must pass a final defense as part of earning the master's degree.

- A negative vote by two or more members of the student's committee will signify failure of the defense.
- The student may repeat the defense only upon permission from a majority of the supervisory committee. The committee will set a date at least one month after the failed defense and a new Notification of Scheduled Examination must be submitted within the seven (7) day deadline.
  - Exceptions to this time limit will be considered by the graduate dean upon presentation of written justification from the chair of the committee in consultation with the committee. Should the defense be failed twice, the student cannot continue in their graduate program.
  - The student will not be given a third defense except by recommendation of the examining committee, program coordinator, and special approval of the Dean of the Graduate College following consultation with the Graduate Council.

Doctoral Degree Policies

Degrees Offered

Doctor of Philosophy (Ph.D.)

Doctor of Education (Ed.D.)

Doctor of Musical Arts (D.M.A.)

Doctor of Nursing Practice (D.N.P.)

Didactic Credit-Based Doctoral Degrees

In didactic-credit based doctoral programs, students gain knowledge through coursework of which the majority are didactic. Didactic courses are numbered 601-689, 691; 700-789, 791; 800-889 and 891.

Outcomes-Based Doctoral Degrees

Students in outcomes-based doctoral programs must meet Graduate Council and program specific outcomes through credit-based academic activity. There are no didactic credit requirements for these programs, though 90 credits post-baccalaureate degree must be earned.

Residence Requirements

Graduate study for the Doctor of Philosophy degree normally requires a minimum of three (3) years of full-time study beyond the baccalaureate degree. A student who has a master's degree or equivalent must devote at least one of the two remaining academic years of study in residence at North Dakota State University.

Supervisory Committee

The supervisory committee is comprised of the student's advisor (committee chair) and supporting committee members. The goal in selecting a supervisory committee is creating a team to help the student develop a Plan of Study to align with the student's desired professional goals, provide support in the growth of the student as a professional, and oversee the student's preliminary examination and final defense and dissertation completion.

Students may not bring food or beverages for the committee members to supervisory committee meetings, preliminary examinations, or final examinations. If a program wishes to provide refreshments at these meetings, it is the responsibility of the program to pay for and obtain them.

The supervisory committee members should be identified before the plan of study is formulated so that all committee members have a chance to contribute. The supervisory committee, agreed upon by the major advisor and student, is approved by the graduate program coordinator at the time the Plan of Study is submitted.

To add an external member (not full or affiliate graduate faculty) to a graduate committee, the Plan of Study or Supervisory Committee change form (if the Plan of Study is already filed) must include a letter of support from the department chair and a copy of the external member's curriculum vitae (CV). The chair's letter should indicate the chair and department's support for this person to be on the committee and list the expertise this person brings to the committee. There is a paperclip icon on both forms that allows the student, advisor and graduate program coordinator to add the letter and CV.

- The letter must come from the department chair only, not the advisor. An advisor may add a letter of support, though this letter alone is not sufficient.
- The external member cannot be an affiliate graduate faculty member of the advisor's home department/program.
- For doctoral students, the external member (Graduate School Representative) must be a full member of the graduate faculty. An affiliate graduate faculty or non-tenured or tenure-track faculty member cannot serve in this role. If a previously approved GSR has left NDSU, a new GSR must be found and a supervisory committee change form be filed with the Graduate School

The supervisory committee will have at least four members. The members consist of:

- The major advisor, who must be a full or affiliate member of the graduate faculty Level 1, will be the committee chair. The major advisor-student relationship must be a mutually acceptable one.
- A second member, who must be a full or affiliate member of the graduate faculty. The second member may serve as co-advisor on the supervisory committee. The co-chair designation implies equally shared responsibilities in guiding the student through to degree completion.
- A third member, who could be either a full or affiliate member of the graduate faculty, affiliate member of the graduate faculty, or a qualified off-campus expert in the field.
- The Graduate School Representative (GSR), chosen by the student in consultation with the committee chair ensures
  - Graduate College policies are followed,
  - expectations for the student's performance are reasonable,
  - interactions with the supervisory committee are conducted on a professional basis.
  - the process and assessment of the student's performance is documented and, for outcomes-based doctoral programs, matches the outcomes defined

GSR Eligibility Requirements

The GSR must be a full member of the graduate faculty and

- be either a tenured faculty member outside the committee chair's/co-chairs home department(s) OR a faculty member outside the primary college of the committee chair/co-chairs
- be clear of any conflicts of interest with either the student or the committee chair/co-chairs. Examples of possible conflicts of interest may include budgetary or financial relationships, family or personal relationships, or research and/or publication relationships.

If the student is in an interdisciplinary program, the GSR must also not be listed as a faculty member on that program's catalog page.

Advisor or Supervisory Committee Changes

Advisor changes and changes to the supervisory committee may be made with the Supervisory Committee Change (https://www.ndsu.edu/gradschool/current_students/forms/#:~:text=Change%20Supervisory%20Committee) form. The student, advisor, graduate program coordinator, and the Graduate College must approve changes.

Plan of Study

Some programs do not require a Plan of Study to be filed with the Graduate College. Refer to your program handbook for more information.

The Plan of Study is an agreement between the student, the academic program, and the Graduate College that specifies all courses required to earn the graduate degree. This includes :

- any qualifying transfer credits (see transfer credit policy below)
- up to 10 credits taken as a non-degree NDSU graduate student toward the degree
- any previously earned master's degree if being used toward the total 90 credits

The Plan of Study must be approved by the student, the supervisory committee, the graduate program coordinator, and the Dean of the Graduate College and must be filed with the Graduate College by the end of the student's second semester of study and at least one month prior to scheduling the comprehensive/preliminary examination.

NDSU has minimum requirements for degrees, which are outlined below. Students in outcomes-based programs must complete the minimum number of credits for the degree. Each program is responsible for defining the requirements for a major in its disciplinary area and making this information available to students. Each student is responsible for familiarizing themselves with the requirements, rules, and recommendations.

Bachelor's to Doctoral Degree

- Minimum of 90 graduate credits total; minimum of 86 graduate credits for the DNP
- 27 credits must be from didactic courses
  - 15 of which must be 700 or 800 level course work
  - No more than 15 didactic credits may be transferred as part of the Plan of Study
  - Didactic credits requirements do not apply to outcomes-based programs.
- Specific programs may require completion of additional credits

Master's to Doctoral Degree

- Minimum of 90 graduate credits total; minimum of 86 graduate credits for the DNP
  - Thirty credits from a previously earned master's degree may be approved to fulfill 30 of the 90 doctoral program credits required. The previous master's degree must be meaningfully related to the discipline in which a doctoral degree is pursued.
  - Up to 15 transfer credits from another doctoral program in the same or a meaningfully related discipline from an accredited doctoral institution may be allowed in individual cases.
  - Minimum of 45 credits total completed at NDSU
- 15 credits must be 700-800 level didactic courses
  - Didactic credits requirements do not apply to outcomes-based programs.
- Specific programs may require completion of additional credits

Course Deletions or Substitutions

Course deletions or substitutions may be made with the Change to Plan of Study (https://powerforms.docusign.net/20c075c4-741c-4c43-8767-4c48338ddfaf/?env=na3&acct=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7&accountId=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7) form. The student, advisor, graduate program coordinator, and the Dean of the Graduate College must approve changes.

Transfer of Credit

NDSU graduate –level course work is not considered transfer credit, even if those credits were taken while in a different graduate program.

Transfer of credit is requested at the time a Plan of Study or Change to Plan of Study is filed in the Graduate College. A maximum of 15 credits of graduate-level course work from regionally accredited colleges or universities (or equivalent for international institutions) may be eligible to be used in completing the student's degree program.

Transfer credit coursework must:

- meet degree program requirements
- be graduate level
- be verified by an official transcript from the transfer institution with grades posted
  - Transcript(s) must be filed in the Graduate College at the time the transfer of credit is requested
- must not have been used to fulfill the requirements of a baccalaureate degree
- carry only grades of A or B on a 4.0 scale
  - Pass/Fail or Satisfactory/Unsatisfactory graded courses are not eligible for transfer
- not be a continuing education, correspondence, extension education, or workshop course
- not be internship, individual study, special topics, or research courses
- have been earned within a 10-year period at the time of the student's final defense

Departments and programs have the right to further or eliminate acceptance of transfer credits for their degree programs. Prospective students are encouraged to contact the respective academic department or the Graduate College with transfer credit questions.

Examinations

A **preliminary examination** consists of a written portion and an oral portion. Passing the preliminary examination allows the student to be formally admitted to candidacy for the doctoral degree.

- The Plan of Study must be approved at least 30 calendar days prior to scheduling the oral portion.
- A student may not attempt the final defense in the same semester in which they complete the the preliminary examination.

The **final defense** is an oral examination in which the author of the dissertation demonstrates to the supervisory committee a satisfactory command of both the focus area of their project and the broader field.

Notification and Report

The Notification of Scheduled Examination (https://powerforms.docusign.net/0abb6387-c124-45e6-bc80-337a7635ffb0/?env=na3&acct=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7&accountId=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7) form is required for the oral portion of the preliminary examination and for the final defense. This form must be submitted to the Graduate College at least seven (7) calendar days prior to the examination date.

- A *successful* submission requires all signatures, not only that the graduate student has initiated the form.
- If the form is not filed seven (7) calendar days prior, it will not be approved by the Graduate College.
- An oral preliminary examination or final defense takes place without an approved notification form is considered void. A new examination or defense date must be scheduled and the Notification of Scheduled Examination (https://powerforms.docusign.net/0abb6387-c124-45e6-bc80-337a7635ffb0/?env=na3&acct=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7&accountId=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7) filed seven days prior to the new date.

Pre-defense Document Distribution (Final Defense only)

The dissertation work must be distributed to the committee members for review at least seven (7) calendar days prior to the defense.

- If this seven-day stipulation cannot be met, the student's committee holds the right to cancel the defense. It is the student's responsibility to notify the Graduate College if their defense does not take place as scheduled and to complete a new Notification of Scheduled Examination.

Examination Attendee Policy

- Due to the role of the GSR, they are required to attend each examination.
- If another supervisory committee member cannot participate in an examination, the defense may be held; however, their absence is considered a "Disapproval" of the student's examination.
  - If more than one supervisory committee member cannot participate in an examination, the defense must be rescheduled.
- It is the student's responsibility to notify the Graduate College if their examination does not take place as scheduled and to complete a new Notification of Scheduled Examination.

Outcomes

It is the student's responsibility to initiate the appropriate report (https://www.ndsu.edu/gradschool/current_students/forms/#:~:text=Examination%20and%20Degree%20Completion), ensure it is signed by all committee members, and submit it to the Graduate College within 14 calendar days following the defense.

- A *successful* submission requires all signatures, not only that the graduate student has initiated the form.
- If the completed form is not submitted within 14 calendar days following the examination, the examination is considered void and must be rescheduled.

The student must pass each examination as part of earning the doctoral degree.

- A negative vote by two or more members of the student's committee will signify failure of the defense.
- The student may repeat the examination only upon permission from a majority of the supervisory committee.
  - The committee will set a date at least one month after the failed examination and a new Notification of Scheduled Examination must be submitted 14 calendar days prior to the defense date. Exceptions to this time limit will be considered by the graduate dean upon presentation of written justification from the chair of the committee in consultation with the committee.
- Should the examination be failed twice, the student cannot continue in their graduate program.
  - The student will not be given a third examination except by recommendation of the examining committee, program coordinator, and special approval of the Dean of the Graduate College following consultation with the Graduate Council.

Filing the Dissertation

After the final defense, the student incorporates all revisions into the dissertation as required by the supervisory committee. Once a student makes the corrections, submit the following items to the Graduate College:

- signed approval page
- IRB/IACUC/IBC Compliance Notification
- dissertation
- dissertation processing fee

The student will have one (1) year from the date of the final defense to complete the Graduate College dissertation format review process and all other degree requirements. Should the dissertation not receive final approval or any other degree requirements not be completed within this time limit, the student must repeat the final defense. If a period of time two (2) years or greater lapses before the final copies are submitted, the student must reapply to the Graduate College, retake the final defense, and register for a minimum of two (2) credits.

A degree posts at the end of the semester in which the dissertation is approved and other degree requirements are completed.

Graduate Certificate Policies

Graduate certificate programs at NDSU provide focused course experiences in a set curriculum that build a distinct skill set. Certificates may be completed independently or as part of a master's degree program. Only graduate credits earned at NDSU may be applied to a certificate program.

Students in a certificate program, (who are not also in a degree-seeking program) are not eligible to receive federal Title IV student financial assistance, graduate assistantships or tuition waivers.

Certificate Completion

- Certificate students must meet the same academic standing requirements as degree seeking students.
- Course substitutions may be made with the Change to Plan of Study. The student, advisor, graduate program coordinator, and the Graduate College must approve changes.
- Courses used to satisfy the Graduate Certificate program requirements cannot be older than seven (7) years at the time the certificate completion is verified.
- Candidates must submit a Graduation Application by the last day of the term in which certificate requirements are completed. The certificate will not post to the student's record if the graduation application is not submitted.
- Credits earned toward completion of a certificate also may be used toward the completion of a graduate degree, if allowed by the degree program.

Course Substitutions

Course substitutions may be made with the Change to Plan of Study. The student, advisor, graduate program coordinator, and the Graduate College must approve changes.

Graduate Assistantship and Fellowship Policies

A graduate#assistantship provides financial support for pursuing graduate studies in the form of employment. In return for#contribution#to the academic mission of North Dakota State University through#teaching, research, or administrative service, students receive a stipend, and if requirements are met, a waiver of graduate base tuition may be granted at the discretion of the graduate program's academic college. A graduate assistantship may involve research or teaching experiences conducted off-campus. In these instances, the experience should be clearly linked to the student's Plan of Study and involve a collaborative relationship between NDSU and the outside entity.

Students with Graduate Fellowships who are contracted to work in NDSU laboratories and/or classrooms must adhere to Graduate Assistant Policies.

To be eligible for an assistantship students must

- Be a degree seeking students
- Be in good academic standing
- Be enrolled in a minimum of 6 graduate credits during the fall and spring semester
  - This policy does not apply if the student has fewer than 6 credits remaining to complete their program of study.
  - Departments may require students to register for more than 6 credits to hold an assistantship
  - Students seeking a summer assistantship must be enrolled for a minimum of 6 credits either during the spring prior or fall term immediately after the summer fellowship; summer enrollment is not required for a summer term assistantship.

Assistantship appointments may vary in length and are contingent upon the availability of funding, which is determined by individual graduate programs. Graduate assistants must be paid at least minimum wage and wage is determined by individual graduate programs. For information, refer to the graduate student handbook or website of the program/department.

A full-time assistantship consists of 320 hours per term (i.e. 20 hours/week).#Exceptions may include:

- Allowing up to 40 hours of work weekly during spring break, winter break, and summer semester.
- Allowing up to 26 total hours/week.
  - To make this request, a Special Request form must be filed each spring and fall semester to add additional hours to a full-time domestic or permanent resident student's assistantship.
  - If approved by the Graduate College, a copy of the request must be attached to the payroll form.

In some instances, degree seeking students in good academic standing and meeting the enrollment requirement of six credits during the fall or spring semester may be eligible for a half- or part-time graduate assistantship. A minimum of 160 hours per semester (i.e. 10 hours/week) are required to qualify for a half- or part-time assistantship.

Assistantship Categories

Graduate Research Assistants (GRA) conduct research with faculty members that contributes directly to their graduate education and may lead to a dissertation or thesis topic. GRAs responsible for, or with access to, controlled substances and other drugs, explosives, or potentially dangerous chemicals must submit to a criminal background check. Students on research assistantships may also do related research for course credit. The number of hours of work per credit may vary depending on the discipline/department.

Graduate Teaching Assistants (GTA) share faculty responsibilities for undergraduate teaching but cannot teach graduate level courses. Responsibilities may include instruction, grading, course development, and proctoring exams. GTAs must demonstrate English proficiency (refer to catalog section titled "English Language Proficiency Procedures for Graduate Teaching Assistants").#A criminal background check is required.

Graduate Service Assistants (GSA) provide non-academic support for departments and campus services. Duties may vary between departments and positions. A criminal background check is required.

Additional Employment

Students with a full-time assistantship are discouraged from having additional off-campus employment.

Further, students with a#full-time#assistantship are restricted from working in any other capacity for NDSU, any other North Dakota University System (NDUS) campus, or any State of North Dakota agency or office.

Expectations of Graduate Assistant/Fellow

Students receiving a graduate assistantship are expected to fulfill their responsibilities adhering to the professional and academic expectations of their discipline and in compliance with NDUS and NDSU policies. Violations of these policies and expectations may result in sanctions, including loss of#assistantship#and/or termination from the Graduate College. Adjudication of these violations will occur using NDSU Policy 335: Code of Academic Responsibility and Conduct

Graduate assistants must

- be registered#for a minimum of six graduate credits each semester (fall and spring) they receive an#assistantship; credit requirements may vary by program
- remain in good academic standing
  - Students placed on Academic Warning may retain their assistantship
  - Students placed on Academic Probation may no longer receive an assistantship
- maintain the appropriate residency status
- abide by the appointment conditions outlined in the assistantship contract
- perform tasks as assigned
- make satisfactory degree progress
- make satisfactory research progress
- complete#required trainings#within#30 days#of their first day of work and#as required thereafter

Expectations of Assistantship Supervisor

Assistantship and Fellowship contracts

The Graduate#Contract specifies expectations and responsibilities of the graduate assistant or fellow.

The hour commitment defined by an assistantship may be averaged across a given time period. For example, a teaching assistantship of 20 hours/week should total to 320 hours across the 16 weeks of the academic term. In these cases, students#should be given#adequate advance notice of these variable expectations so that they can adjust their schedules to meet the requirements of the assistantship. Supervisors must also remain sensitive to the academic demands faced by graduate students.

Assessment

Assistantship supervisors must provide oral and written assessment of graduate student employees. As outlined in the contract, GSA and GRA performance must be evaluated at least annually. GTA review with respect to overall communication proficiency must be completed by the third week of the semester.

Tuition Waivers

Tuition waivers may be offered to students receiving a qualifying graduate assistantship or fellowship and are governed by the specific tuition waiver policies of the granting academic college.

Qualifying graduate assistantships must be a minimum of 10 hours a week and may not exceed 20 hours a week (see previous page) and must total a minimum of 160 hours during spring and fall semesters.

- Students who, for any reason, do not complete a minimum of 160 hours in a given semester will not be eligible for that semester's waiver and will be billed for the tuition.
- Partial tuition waivers are not given if the student works fewer than the minimum hours (160) required per semester.

Tuition waivers cover base tuition for NDSU graduate credits only. Students are responsible for differential tuition, student fees, and tuition for non-graduate level credits taken or Cooperative Education credits.

- The tuition waiver may be reduced by other financial awards directed specifically to pay tuition.
- Students receiving a graduate tuition waiver may not receive other NDSU tuition waivers. Student eligible for multiple tuition waivers will receive the waiver resulting in the most tuition being waived.

Tuition waivers are applied to student accounts following completion of required trainings.

Eligibility for a summer tuition waiver is dependent upon the specific tuition waiver policies of the granting college which may include holding a summer assistantship or having received a tuition waiver for the preceding or following academic term (spring or fall semester).

Rights and Privileges of Graduate Assistants

Graduate assistants have certain rights and privileges specific to the assistantship experience:

- The right to be notified in writing of all decisions that affect their status as a graduate assistant. This includes advance notification of evaluation procedures and a summary of their performance evaluation.
- The right to be notified of any complaints received by a supervisor or department chair concerning their performance of duties.
- The right to respond in writing to such complaints.

- The right, depending on the availability of departmental and university resources, to be supported in pursuing additional activities that pertain to their professional development.
- The right to balance their assistantship responsibilities with their responsibilities to their academic program so that they can complete their degree in a timely manner.
- The privilege of being treated as a professional in their chosen field of study.

Termination

Graduate assistants may have their assistantship terminated by the Dean of the College of Graduate and Interdisciplinary Studies, upon recommendation by their supervisor, with documentation of probable cause. Early termination for cause may occur when:

- A student does not abide by the appointment conditions.
- A student fails to perform tasks as assigned.
- A student does not make adequate degree progress.
- A student is placed on Academic Probation.
- A student does not make satisfactory research progress.
- A student fails to maintain minimum registration.
- A student persistently refuses to follow reasonable advice and counsel of faculty in carrying out assistantship obligations.
- A student fails to comply with responsibilities as an employee set forth in the *University Catalog*, department rules and regulations governing assistantships, or the terms of sponsored research agreements that fund the assistantship.
- A student's personal conduct is seriously prejudicial to the university, including violation of the NDSU Code of Student Behavior, state or federal law, and general university regulations.

Appeals Process

The North Dakota State University philosophy is to encourage and seek resolution of problems at the level most closely related to the origin of the specific disputes.

The first step should be an informal conference to first discuss and attempt to resolve the problem(s) with the person(s) directly involved.

When a mutually satisfactory resolution cannot be reached or if discussion of the problem(s) seems inappropriate because of the nature of the student's complaint, the student should seek advice from the director of the program, chair of the department, or the graduate program coordinator.

Depending on the nature of the problem(s), the department chair or student's graduate committee chair may deal with the situation directly, advise the student to discuss the problem(s) with the appropriate academic dean and/or the Dean of the College of Graduate and Interdisciplinary Studies, or advise the student of the appropriate grievance procedure to pursue.

If the graduate assistant wishes to challenge the termination decision, a written appeal to the Dean of the College of Graduate and Interdisciplinary Studies must be made within 14 calendar days of notification of the mediation results (refer to section titled "Graduate Student Appeals").

English Language Proficiency for Graduate Teaching Assistants

Graduate Teaching Assistants (GTAs) must meet requirements listed in the “English Language Test Score Minimum Requirements” chart below. GTAs may be grader-only or in-class teaching assistants. In-class teaching assistants are involved in lectures, labs, or tutoring. Grader-only assistants have no direct contact with students and may serve one calendar year before completing one of the following requirements:

- Meeting the English Language Test score minimums listed below for in-class assistants
- Satisfactorily completing LANG 701 English Language and Classroom Skills for International GTAs as well as
  - a co-requisite graduate-level oral skills course (LANG 606 Oral English Language Strategies and Skills for Presentation, LANG 702 English Language Tutorial for International GTAs or LANG 704 Language Strategies For Literature Reviews), and
  - a Mock Teaching Exam designed in coordination with their department to qualify to be an in-class teaching assistant at NDSU.

Test Score Requirements

Total Score

	Grader	Teaching Assistant
ibT	79	81
IELTS	6.5	7
PTE Academic	53	54
Duolingo	110	115

Speaking

	Grader	Teaching Assistant
ibT	19	23
IELTS	5.5	6.0
PTE Academic	51	62

Writing

	Grader	Teaching Assistant
ibT	21	21
IELTS	6.0	6.0
PTE Academic	56	56

Evaluation of Graduate Teaching Assistants

All in-class GTA are evaluated during the third week of the first semester of their appointment. While the format may be determined by individual units, the evaluation must be documented and it must address the comprehensive English proficiency of the teaching assistant, including speaking and listening ability, commensurate with assigned duties. A copy of the evaluation instrument and the results for each teaching assistant shall be made available to the Graduate Dean upon request.

Graduate Student Appeals

Overview

The Graduate College at North Dakota State University encourages resolution of problems at the level most closely related to the origin of the specific disputes. Students may seek advice regarding their situation from a neutral party, such as the University Ombudsperson (https://www.ndsu.edu/ombud/). Though this may be done at any point, it might be most helpful early in the process.

In order to resolve an issue, the following steps should be taken:

1. the student is to first discuss the problem(s) with the person(s) directly involved;
2. if the student is not satisfied after discussing the problem with the person(s) directly involved or if discussion of the problem(s) seems inappropriate because of the nature of the student's complaint, the student should seek advice from the administrator of the program; and
3. depending on the nature of the problem(s), the program administrator or student's supervisory committee chair may deal with the situation directly, advise the student to discuss the problem(s) with the appropriate academic dean and/or the Dean of the Graduate College, or advise the student of the appropriate grievance procedure to pursue as the procedure varies depending on the specific nature of the problem.

Areas of possible graduate student appeal include equal opportunity, dismissal from an academic program or the Graduate College, sanctions for academic dishonesty, and degree-acquisition processes that are unique to graduate education. The appropriate procedures/offices for these types of appeals are outlined below. The burden of proof by a preponderance of the evidence is on the graduate student making the appeal.

Equal Opportunity

North Dakota State University's general and specific commitment (https://www.ndsu.edu/equity/statement_from_the_president/) to being an equal opportunity institution is expressed elsewhere in this bulletin. In short, NDSU prohibits discrimination and harassment on the basis of age, color, gender expression/identity, genetic information, marital status, national origin, physical or mental disability, pregnancy, public assistance status, race, religion, sex, sexual orientation, spousal relationship to current employee, status as a U.S. veteran, or participation in lawful activity off the employer's premises during nonworking hours which is not in direct conflict with the essential business-related interests of the employer. Title IX specifically prohibits discrimination based on sex in education programs or activities, including, but not limited to, gender-based discrimination, pregnancy discrimination, sexual harassment, or sexual assault. NDSU also prohibits retaliation based on protected activity, including, but not limited to, reporting alleged discrimination, or providing information during a discrimination investigation.

Inquiries concerning compliance with NDSU Equal Opportunity policy may be directed to the Vice Provost and Title IX Coordinator (201 Old Main, 701-231-7708, ndsu.eoaa@ndsu.edu) or to the Office for Civil Rights, U.S. Department of Education, 10220 N. Executive Hills Blvd., 8th Floor, 07-6010, Kansas City, MO 64153-1367.

Academic Evaluation

The University Senate Grade Appeals Board (https://catalog.ndsu.edu/academic-policies/grades/#gradechangestext) has the authority to hear charges of inequitable or biased academic evaluations and to provide redress for any improper evaluations it may find to have taken place. This

process is for course grades assigned by the instructors of the courses, including grades for independent study, thesis, and dissertation credits. Policy 337 (https://www.ndsu.edu/fileadmin/policy/337.pdf) has the procedural details. Salient points repeated here are that the student must initiate a request for a change of grade with the instructor within 15 instructional days of the first day of the semester immediately following the semester in which the grade was awarded. During an appeal, the burden of proof is on the student.

Academic Dishonesty

Procedures dealing with issues of academic dishonesty in meeting course requirements, such as cheating, plagiarism, or other academic improprieties brought by instructors against students enrolled in their course(s) or other NDSU course(s) or persons not enrolled at NDSU but viewed by the instructor as involved in the academic dishonesty are detailed in both the "Rights & Responsibilities of Community: A Code of Student Behavior (https://www.ndsu.edu/fileadmin/policy/601.pdf)" and Section 335 (https://www.ndsu.edu/fileadmin/policy/335.pdf) of the NDSU Policy Manual. A substantial range of penalties to the student(s) is available to the instructor(s) and academic dean(s) of the college(s) involved, i.e., the college offering the course(s) and the college of which the student(s) is (are) a member. One option available to the deans is to recommend to the Dean of the Graduate College that the student be suspended or expelled from the university. A student may choose to appeal the assignment of a grade in a course in which academic misconduct has occurred to the Grade Appeals Board. (https://catalog.ndsu.edu/academic-policies/grades/#gradechangestext) The decision to impose any **additional penalty or disciplinary sanction** for prohibited academic conduct against a graduate student in meeting the requirements of either an undergraduate or graduate course may be appealed by the graduate student following the procedures outlined below.

Appeal of Activities Intrinsic to the Acquisition of a Graduate Degree

All other appeals are addressed through the Graduate College appeal process. The burden of proof lies with the graduate student. These appeals may address dismissal from a graduate program or the Graduate College, sanctions beyond the course grade for academic misconduct or dishonesty, and degree-acquisition processes that are unique to graduate education. The processes intrinsic to graduate education include specification of degree requirements, preliminary and qualifying examinations, disquisition writing and approval, and possible dismissal from the program.

Appeals of processes intrinsic to graduate students are complicated in that there may be different levels of individuals and committees involved depending on the nature of the specific grievance. An additional complication is that for some complaints, levels prior to the Graduate Dean are advisory in nature and cannot supersede a decision of the Graduate Dean. The steps outlined below will vary in number depending on the nature of the grievance as no relevant level may be skipped. The first step begins with the person/committee most closely related to the grievance. Additional steps are added with each level of reporting above the initial level. The table below indicates which individuals/committees should be included for specific issues. If there is an issue that a student wishes to appeal that is not included in the table and is not covered by another policy and appeal process, the student should consult with the Graduate School regarding the steps to take. This consultation should be documented in writing and the resolution signed by the Graduate Dean.

Topic of Grievance	Levels of Appeal	Decisions Prior to Graduate Dean are Only Advisory
Preliminary/comprehensive exam or final defense	Supervisory Committee Graduate Program Committee Dept Head/Chair Academic Dean Graduate Appeals Committee	No
Disquisition writing and approval	Supervisory Committee Graduate Program Committee Dept Head/Chair Academic Dean Graduate Appeals Committee	No
Degree requirements	Supervisory Committee Graduate Program Committee Dept Head/Chair Graduate Appeals Committee	Program Specific Requirements - No Requirements in Graduate Bulletin -Yes
Dismissal	Supervisory Committee Graduate Program Committee Dept Head/Chair Academic Dean Graduate Appeals Committee	Yes
Additional Penalties for Academic Misconduct Beyond Course Grade (Not including Suspension/Expulsion)	Supervisory Committee Graduate Program Committee Dept Head/Chair Academic Dean Graduate Appeals Committee	No

Research in which the student is involved	PI Dept Head/Chair Academic Dean Graduate Appeals Committee	No

Note. For the Supervisory Committee level, appeals should be submitted to the chair of the student's supervisory committee (i.e., the student's advisor). For the Graduate Program level, the appeal should be submitted to the Graduate Program Coordinator. If the program does not have a coordinator, the head or chair of the department should receive the appeal. For the Graduate Appeals Committee, the appeal should be submitted to the Graduate Dean. In each case the person receiving the appeal has the responsibility to consult with the other members of the committee or program regarding the appeal.

Appeals Process

Step 1: Initiating an Appeal: Within 30 calendar days of the date of the aggrieved action, the graduate student requesting consideration of a grievance must complete the Graduate Student Appeals form and provide a written memorandum stating the nature of the grievance, parties involved and requested remedy. The student should include relevant supplementary material that will support their grievance. The student then submits the appeal form and supplementary material to the first level indicated on the table above. Once submitted, the only materials that can be added to the appeal are documents that are requested by any level of reviewers.

Step 2: Initial Response to Appeal: Within 10 business days, the respondent to the appeal (in consultation with the relevant committee if applicable) shall record their decision to support or not support the appeal on the appeals form and attach a written memorandum explaining the basis for the decision. If the respondent at this level supports the appeal and has the ability to reverse the decision being appealed, they will implement that decision and the appeals process will be concluded. If the respondent does not have the ability to reverse the decision, the response will be considered advisory to the level that does have this ability.

Steps 3+: If the student is unsatisfied with the decision at the previous level, the student may move their appeal forward to the next level within 10 business days of the respondent's response by submitting all materials accumulated to date regarding the appeal, including the Graduate Student Appeals Form, the student's memorandum, and the respondant(s)' memo(s). At each step, the respondent will, within 10 business days, record their decision to support or not support the appeal on the appeals form and attach a written memorandum explaining the basis for the decision. If the respondent at this level supports the student's appeal and has the ability to reverse the decision being appealed, they will implement that decision and the appeals process will be concluded. If the respondent does not have the ability to reverse the decision, the response will be considered advisory to the level that does have this ability.

Graduate Student Appeals Committee

If the student is not satisfied with the outcome at prior levels, the student may bring the appeal to the Graduate Student Appeals committee by submitting the appeals form and all documentation generated in the prior steps to the Graduate Dean within 10 business days of the most recent date on the documentation. The dean, in turn, informs the committee of the appeal and provides them with all documentation.

The graduate student appeals committee has five members and is constituted by the Graduate Dean each academic year to handle all appeals for that year. Four of the members must be graduate faculty who are members of the Graduate Council. A graduate student member of the committee will be selected from a pool of graduate students that includes the student members of the Graduate Council and four students nominated by the Graduate Student Council. Two additional graduate faculty members of the Graduate Council and one graduate student from the pool must be designated as alternates when the committee is formed. Any member of the appeals committee who had a role in a previous level of the appeals process must recuse themselves from the committee for that appeal. They must be replaced by an alternate member for that appeal. The graduate student and the party or parties against whom the complaint has been brought each have the right to challenge, with cause, to the Dean of the Graduate College one member of the graduate student appeals committee. If a challenge is deemed to have merit, that member is replaced by an alternate for that appeal. The five committee members elect the chair of the committee from its membership.

The burden of proof shall be with the appealing graduate student. The appealing graduate student has the right to 1) be given due notice by the Dean of the Graduate College in sufficient detail that the accusation is clear and the circumstances of the accusation are detailed enough for meaningful response by the accused and 2) be heard by an impartial body. Each contending party may, if it wishes, be accompanied by one counsel, but any counseling is restricted to 1) what to ask, 2) when not to respond to a question, and 3) how to answer a question. Counsel may not intrude on the hearing. The appeals committee is not bound by rules of legal evidence or procedure and may develop procedures that its members consider to be fair and equitable to the particular circumstance(s).

The chair of the committee will preside over the hearing. The hearing will include an opening statement by both the student and the party or parties against whom the complaint has been brought, questioning by the appeals committee, and brief closing statements by the student and the party or parties against whom the complaint has been brought.

Committee members make decisions on available information; non-response to questions is available information, i.e., a negative inference can be drawn from the lack of a response. The hearing will be closed unless the student signs a release waiving their rights to a closed hearing. The hearing, but not the appeals committee's deliberations, will be audio recorded.

The decisions and recommendations of the appeals committee shall be by majority vote. Depending on the type of grievance (see table), the committee's decision is either final or is advisory to the Dean of the Graduate College. In either case, the Dean is responsible for taking appropriate action to implement the decision. Any further appeal shall be directed to the Provost of the University.

Graduate Faculty

Full Graduate Faculty

Graduate education is dedicated to the continued scholarship and professional development of our students. The Graduate College at NDSU sets as the defining principle of graduate education the formation of a special professional relationship between students and program faculty. This professional relationship culminates through mentorship that is developed between a student and a faculty mentor.

In recognition of the role of graduate education, and the importance of mentorship, the Graduate College identifies individuals as being members of the Graduate faculty. This faculty should teach and mentor graduate students. Programs should strive to have courses taught by Graduate Faculty members and student advisory committees composed of Graduate Faculty members. Graduate Faculty status confers certain rights, privileges, and responsibilities to individuals holding this status. The following sections define the various recognized levels of Graduate Faculty membership and the rights pertaining to each.

Full Member of the Graduate Faculty

Full-status members of the Graduate Faculty of North Dakota State University (NDSU) consist of all persons who hold a probationary (tenure-track) or tenured appointment and have been appointed to the rank of Assistant Professor, Associate Professor, or Professor in an academic unit or program area at NDSU.

A full-status member of the Graduate Faculty of NDSU may teach graduate courses, serve as a member of supervisory committees, chair supervisory committees, serve as the Graduate College appointee to supervisory committees, serve as a member of graduate student appeals committees, serve as a member of the Graduate Council, vote at graduate faculty meetings, and serve in any other capacity as required.

Akhmedov, Azer, Professor of Mathematics
Ph.D., 2004, Yale University
Al Asady, Ahmad, Assistant Professor of Management and Marketing
Ph.D., 2020, Kent State University
Aldrich-Wolfe, Laura, Associate Professor of Biological Sciences
Ph.D., 2006, Cornell University
Alfonseca Cubero, Maria, Professor of Mathematics
Ph.D., 2003, Universidad Autonoma de Madrid
Aly Ahmed, Bakr, Associate Professor of Architecture & Landscape Architecture
Ph. D., 2001, Virginia Polytechnic Institute and State University
Ambrosio, Thomas, Professor of Criminal Justice & Political Science
Ph.D. 2000, University of Virginia
Andrianova, Anastassiya, Associate Professor of English
Ph.D., 2011, City University of New York
Anwar, Zahid, Associate Professor of Computer Science
Ph.D., 2002, University of Illinois Champagne- Urbana
Archbold, Carol, Professor of Criminal Justice & Political Science
Ph.D., 2002, University of Nebraska-Omaha
Arnold, Lisa, Associate Professor of English
Ph.D., 2011, University of Louisville
Asa, Eric, Associate Professor of Construction Management & Engineering
Ph.D., 2000, University of Alberta
Azarmi, Fardad, Professor of Mechanical Engineering
Ph.D., 2008, University of Toronto
Baggett, Ashley, Associate Professor of History, Philosophy & Religious Studies
Ph.D., 2014, Louisiana State University
Balas, Benjamin, Professor of Psychology
Ph.D., 2007 Massachusetts Institute of Technology
Baldwin, Thomas, Assistant Professor of Plant Pathology
Ph.D., 2013, University of Georgia
Banawi, Abdulaziz Ali H, Assistant Professor of Construction Management & Engineering
Ph.D., 2013, University of Pittsburgh
Bandillo, Nonoy, Assistant Professor of Plant Sciences
Ph.D., 2016, University of Nebraska-Lincoln
Banerjee, Samiran, Assistant Professor of Microbiological Sciences

Ph.D., 2012, University of Saskatchewan
Banerjee, Somnath, Associate Professor of Management and Marketing
Ph.D., 2015, University of Central Florida
Barabanov, Nikita, Professor of Mathematics
Ph.D., 1979, Leningrad University
Barrett, Tracy, Associate Professor of History, Philosophy & Religious Studies
Ph.D., 2007, Cornell University
Bauer, Marc, Associate Professor of Animal Science
Ph.D., 1996, University of Kentucky
Bauroth, Nicholas, Professor of Criminal Justice & Political Science
Ph.D., 2003, Loyola University
Beck, Stephenson, Professor of Communication
Ph.D., 2008, University of Kansas
Beik, Omid, Assistant Professor of Electrical and Computer Engineering
Ph.D., 2012, McMaster University
Benton, Bradley, Associate Professor of History, Philosophy & Religious Studies
Ph.D., 2012, University of California Los Angeles
Berg, Eric, Professor of Animal Science
Ph.D., 1996, Purdue University
Berg, Erika, Associate Professor of Animal Science
Ph.D., 2006, University of Missouri
Berti, Marisol, Professor of Plant Sciences
Ph.D., 2007, North Dakota State University
Bertolini, Charles, Professor of Architecture & Landscape Architecture
Ph.D., 2008, Temple University
Bezbaruah, Achintya, Professor of Civil & Environmental Engineering
Ph.D., 2002, University of Nebraska-Lincoln
Bilen-Green, Canan, Professor of Industrial and Manufacturing Engineering
Ph.D., 1998, University of Wyoming
Bitzan, John, Professor of Management and Marketing
Ph.D., 1997, University of Wisconsin-Milwaukee
Blankenship, Anne, Associate Professor of History, Philosophy & Religious Studies
Ph.D., 2012, University of North Carolina at Chapel Hill
Boetel, Mark, Professor, School of Natural Resource Sciences
Ph.D., 1996, South Dakota State University
Boonstoppel, Sarah, Assistant Professor of Criminal Justice & Political Science
Ph.D., 2014, University of Maryland, College Park
Borr, Mari, Professor, Family and Consumer Sciences Education
Ph.D., 2005, University of North Dakota
Bowsher, Julia, Professor of Biological Sciences
Ph.D., 2007, Duke University
Boynton, Jason, Associate Professor of Mathematics
Ph.D., 2006, Florida Atlantic University
Braaten, Benjamin, Professor of Electrical & Computer Engineering
Ph.D. 2009, North Dakota State University
Brandel, Jennifer, Assistant Professor of Architecture
M.F.A,. 2018, California College of the Arts
Brekke, Jeremy, Associate Professor of Music
D.A., 2004, University of North Colorado
Bridgelall, Raj, Associate Professor of Transportation and Logistics
Ph.D., 2015, North Dakota State University
Briggs, Steven, Associate Professor of Criminal Justice & Political Science
Ph.D., 2007, University of Nebraska-Omaha
Bromley, Kimble, Professor of Visual Arts
M.F.A., 1986, Southern Illinois University
Brotherson, Sean, Professor of Human Development and Family Science
Ph.D., 2000, Oregon State University
Buchholz Holland, Carol, Associate Professor of Counselor Education
Ph.D., 2005, Kansas State University
Buettner-Schmidt, Kelly, Professor of Nursing
Ph.D., 2013, University of New Mexico
Burghaus, Uwe, Associate Professor of Chemistry and Biochemistry

Ph.D., 1995, Free University of Berlin
Burns, Kelly, Assistant Professor of Music
D.M.A., 2018, University of North Carolina at Greensboro
Burt, Sean, Assistant Professor of History, Philosophy & Religious Studies
Ph.D., 2009, Duke University
Byrd, Christopher, Assistant Professor of Animal Science
Ph.D., 2018, Purdue University
Cannayen, Igathinathane, Associate Professor of Agricultural & Biosystems Engineering
Ph.D., 1997,Indian Institute of Technology
Carlson, Elizabeth, Assistant Professor of Political Science
Ph.D., 2011, University of California Los Angeles
Casey, Francis, Professor, School of Natural Resource Sciences
Ph.D., 2000, Iowa State University
Caton, James, Assistant Professor of Agribusiness and Applied Economics
Ph.D., 2016, George Mason University
Caton, Joel, Professor of Animal Science
Ph.D., 1987, New Mexico State University
Chai, Linlin, Associate Professor of Management and Marketing
Ph.D., 2016 Iowa State University
Chen, Bingcan, Associate Professor of Plant Sciences
Ph.D., 2012 University of Massachusetts Amherst
Chen, Jun, Associate Professor of Accounting & Information Systems
Ph.D., 2014, University of North Carolina at Charlotte
Christensen, Bryan, Professor of Health, Nutrition & Exercise Science
Ph.D., 2000, University of Kansas
Christensen, Warren, Professor of Physics
Ph.D., 2007, Iowa State University
Christoffers, Michael, Associate Professor of Plant Sciences
Ph.D., 1998, University of Missouri-Columbia
Choi, Bong-Jin, Assistant Professor of Statistics
Ph.D., 2014, University of South Florida
Choi, Juwon, Associate Professor of Apparel, Merchandising, Design and Hospitality Management
Ph.D., 2016, Kansas State University
Choi, Yongki, Assistant Professor of Physics
Ph.D., 2010, The City University of New York
Chu, Xuefeng, Professor of Civil & Environmental Engineering
Ph.D., 2002, University of California, Davis
Cihacek, Larry, Professor, School of Natural Resource Sciences
Ph.D., 1979, Iowa State University
Ciuperca, Catalin, Professor of Mathematics
Ph.D., 2001, University of Kansas
Colbert, Christopher, Professor of Chemistry and Biochemistry
Ph.D., 2000, Purdue University
Collins, Ross, Professor of Communication
Ph.D., 1992, University of Cambridge
Comez, Dogan, Professor of Mathematics
Ph.D., 1983, University of Toronto
Conwell, Erin, Associate Professor of Psychology
Ph.D., 2009, Brown University
Cook, Gregory, Professor of Chemistry and Biochemistry
Ph.D., 1973, Stanford University
Cooley, Dennis, Professor of History, Philosophy & Religious Studies
Ph.D., 1995, University of Rochester
Cordova, Amanda, Assistant Professor, School of Education
Ph.D., 2018, University of Texas at San Antonio
Cox, John, Professor of History, Philosophy & Religious Studies
Ph.D., 1995, Indiana University
Creese, John, Associate Professor of Sociology and Anthropology
Ph.D., 2011, University of Toronto
Croll, Andrew, Professor of Physics
Ph.D., 2009, McMaster University
Crutchfield, David, Associate Professor of Architecture & Landscape Architecture

M.Arch., 2004, University of Texas at Austin
Cwiak, Carol, Associate Professor of Emergency Management
J.D., 1995, Western State University
Ph.D., 2009, North Dakota State University
Dahl, Laura, Assistant Professor, School of Education
Ph.D., 2019, Ohio State University
Dahlen, Carl, Associate Professor of Animal Science
Ph.D., 2009, University of Minnesota
Dai, Wenhao, Professor of Plant Sciences
Ph.D., 2001, North Dakota State University
Danielson, Ramona, Assistant Professor of Public Health
Ph.D., 2017, North Dakota State University
David Misialek, Shannon, Associate Professor of Health, Nutrition & Exercise Science
Ph.D., 2013, Ohio University
Deal, James, Professor of Human Development and Family Science
Ph.D., 1987, University of Georgia
DeKeyser, Edward, Professor, School of Natural Resource Sciences
Ph.D., 2000, North Dakota State University
Del Rio Mendoza, Luis, Professor of Plant Pathology
Ph.D., 1999, Iowa State University
Denton, Alan, Professor of Physics
Ph.D., 1991, Cornell University
Denton, Anne, Professor of Computer Science
Ph.D., 1996, Johannes Gutenberg University Mainz
DeSutter, Thomas, Professor, School of Natural Resource Sciences
Ph.D., 2004, Kansas State University
Deutsch, Michael, Professor, School of Education
Ph.D., 2007, North Dakota State University
Devine, Marc, Assistant Professor of Theatre Arts
M.F.A., 2013, Naropa University
Dey, Shuvashis, Assistant Professor of Electrical and Computer Engineering
Ph.D., 2018, Monash University
Dicks, Nathan, Assistant Professor of Health, Nutrition & Exercise Science
Ph.D., 2019, North Dakota State University
Dochtermann, Edward, Associate Professor of Biological Sciences
Ph.D., 2009, University of Nevada
Dorfmeister, Josef, Associate Professor of Mathematics
Ph.D., 2009, University of Minnesota
Dorsam, Glenn, Associate Professor of Microbiological Sciences
Ph.D., 1998, Virginia Commonwealth University
Dowdell, Thomas, Professor of Accounting & Information Systems
Ph.D., 2004, Temple University
Duda, Meghan, Assistant Professor of Visual Arts
M.F.A., 2012, University of North Dakota
Duffield, Stacy, Professor, School of Education
Ph.D., 2003, University of North Dakota
Duggan, Katherine, Assistant Professor of Psychology
Ph.D., 2016, University of California Riverside
Ebert, Malaika, Assistant Professor of Plant Pathology
Ph.D., 2018, Wageningen University & Research
Elias, Elias, Professor of Plant Sciences
Ph.D., 1987, North Dakota State University
Engler, Mark, Associate Professor of Theatre Arts
M.F.A., University of Wisconsin-Madison
Estevadeordal, Jordi, Professor of Mechanical Engineering
Ph.D., 1996, University of Houston
Eukel, Heidi, Professor of Pharmacy Practice
Pharm.D., 2008, North Dakota State University
Farahmand, Kambiz, Professor of Industrial & Manufacturing Engineering
Ph.D., 1992, University of Texas
Fellows, Kristen, Associate Professor of Sociology and Anthropology
Ph.D., 2013, University of Pennsylvania

Fier, Tiffany, Associate Professor of Theatre Arts
M.F.A., 2007, Purdue University
Fillmore, Natasha, Assistant Professor of Pharmaceutical Sciences
Ph.D., 2016, University of Alberta
Fischer, Dominic, Associate Professor of Architecture & Landscape Architecture
M.L.A., 2011, The Bernard and Anne Spitzer School of Architecture at the City College of New York
Fitzgerald, Margaret, , Professor of Human Development and Family Science
Ph.D., 1997, Iowa State University
Flood, Anthony, Professor of History, Philosophy & Religious Studies
Ph.D., 2003, University of Oklahoma
Flores, J. Paulo, Assistant Professor of Agricultural & Biosystems Engineering
Ph.D., 2008, Federal University of Rio Grande do Sul
Franzen, David, Professor, School of Natural Resource Sciences
Ph.D., 1993, University of Illinois
Frenzel, Jeanne, Professor of Pharmacy Practice
Pharm.D, 2003, North Dakota State University
Friesner, Daniel, Senior Associate Dean, College of Health Professions
Ph.D., 2000, Washington State University
Friskop, Andrew, Associate Professor of Plant Pathology
Ph.D., 2013, North Dakota State University
Fuller, Heather, Professor of Human Development and Family Science
Ph.D., 2009, University of Michigan
Ganesh Pillai, Rajani, Professor of Management and Marketing
Ph.D., 2009, University of Central Florida
Gao, Zhili, Associate Professor of Construction Management & Engineering
Ph.D., 2004, Iowa State University
Garden-Robinson, Julie, Professor of Health, Nutrition & Exercise Science
Ph.D., 1999, North Dakota State University
Geddes, Barney, Assistant Professor of Microbiological Sciences
Ph.D., 2014, University of Manitoba
George, Sumitha, Assistant Professor of Electrical and Computer Engineering
Ph.D., 2020, Pennsylvania State University
Gilblom, Elizabeth, Assistant Professor, School of Education
Ph.D., 2017, Cleveland State University
Gill, Upinder, Assistant Professor of Plant Pathology
Ph.D., 2012, Washington State University
Gillam, Erin, Professor of Biological Sciences
Ph.D., 2007, University of Tennessee-Knoxville
Gladen, Adam, Associate Professor of Mechanical Engineering
Ph.D., 2015, University of Minnesota
Gleye, Paul, Professor of Architecture & Landscape Architecture
Ph.D., 1983, University of California-Los Angeles
Glower, Jacob, Professor of Electrical & Computer Engineering
Ph.D., 1988, The Ohio State University
Godavarthy, Ranjit, Associate Professor of Transportation and Logistics
Ph.D., Kansas State University
Goldwyn, Adam, Professor of English
Ph.D., 2010, City University of New York
Gomes, Roberto, Assistant Professor of Pharmaceutical Sciences
Ph.D., 2011, Universidade de Sáo Paulo
Gore, Amy, Assistant Professor of English
Ph.D., 2019, University of New Mexico
Graham-Bertolini, Alison, Associate Professor of English
Ph.D., 2009, Louisiana State University
Gramig, Greta, Associate Professor of Plant Sciences
Ph.D., 2006 University of Wisconsin Madison
Green, Andrew, Associate Professor of Plant Science
Ph.D., 2016, Kansas State University
Green, Roger, Professor of Electrical & Computer Engineering
Ph.D., 1998, University of Wyoming
Greenlee, Kendra, Professor of Biological Sciences
Ph.D., 2004, Arizona State University

Greenwood, Torin, Assistant Professor of Mathematics
Ph.D., 2015, University of Pennsylvania
Greives, Timothy, Associate Professor of Biological Sciences
Ph.D., 2009, Indiana University
Greub, Charlott, Associate Professor of Architecture & Landscape Architecture
M.F.A., 1986, Kunstakademie Düsseldorf
M.Arch, 1992, Kunstakademie Düsseldorf
Grewell, David, Professor of Industrial & Manufacturing Engineering
Ph.D., Ohio State University
Guo, Ang, Assistant Professor of Pharmaceutical Sciences
Ph.D., 2010 Chinese Academy of Sciences
Hackerott, Caroline, Assistant Professor of Emergency Management
Ph.D., 2016, Oklahoma State University
Hackney, Kyle, Associate Professor of Health, Nutrition & Exercise Science
Ph.D., 2013, Syracuse University
Hageman, Jeanne, Associate Professor of Modern Languages
Ph.D., 1991, University of Wisconsin-Madison
Hamm, Jeremy, Assistant Professor of Psychology
Ph.D., 2016, University of Manitoba
Hammer, Carolyn, Professor of Animal Science
D.V.M., 2003, Iowa State University
Ph.D., 2003, Iowa State University
Hanna, Lauren, Associate Professor of Animal Science
Ph.D., 2003, Iowa State University
Hanson, Erik, Assistant Professor of Agribusiness & Applied Economics
Ph.D., 2016, University of Minnesota
Hargiss, Christina, Associate Professor, School of Natural Resource Sciences
Ph.D., 2009, North Dakota State University
Haring, Stuart, Associate Professor of Chemistry and Biochemistry
Ph.D., 2004, University of Iowa
Harmon, Jason, Professor, School of Natural Resource Sciences
Ph.D., 2003, University of Minnesota
Hatterman-Valenti, Harlene, Professor of Plant Sciences
Ph.D., 1993, Iowa State University
Hean, Oudom, Assistant Professor of Transportation, Logistics, and Finance
Ph.D., 2020, Ohio State University
Hearne, Robert, Professor of Agribusiness & Applied Economics
Ph.D., 1995, University of Minnesota
Heidinger, Britt, Associate Professor of Biological Sciences
Ph.D., 2007, Indiana University
Hektner, Joel, Professor of Human Development and Family Science
Ph.D., 1996, University of Chicago
Hellevang, Kenneth, Professor of Agricultural & Biosystems Engineering
Ph.D., 1989, North Dakota State University
Hershberger, John, Professor of Chemistry and Biochemistry
Ph.D., 1986, Yale University
Heuer, Loretta, Professor of Nursing
Ph.D., 1995, University of North Dakota
Hill, Brent, Associate Professor, School of Education
Ph.D., 2011, Oklahoma State University
Hilliard, Elizabeth, Associate Professor of Health, Nutrition & Exercise Science
Ph.D., 2018, North Dakota State University
Hilmert, Clayton, Professor of Psychology
Ph.D., 2003, University of California-San Diego
Hobbie, Erik, Professor of Physics
Ph.D., 1990, University of Minnesota
Hoffman, Meagan, Associate Professor, Extension Center for 4-H Youth Development
Ph.D., 2016, Oklahoma State University
Hoffman, Travis, Associate Professor of Animal Science
Ph.D., 2015, Colorado State University
Hong, Michelle, Assistant Professor of Management and Marketing
Ph.D., Virginia Polytechnic Institute and State University

Hong, Yongtao, Professor of Accounting & Information Systems
Ph.D., 2008, Drexel University
Hopkins, David, Professor, School of Natural Resource Sciences
Ph.D., 1997, North Dakota State University
Horsley, Richard, Professor of Plant Sciences
Ph.D., 1988, North Dakota State University
Hovick, Torre, Associate Professor, School of Natural Resource Sciences
Ph.D., 2014, Oklahoma State University
Howatt, Kirk, Associate Professor of Plant Sciences
Ph.D., 1999, Colorado State University
Hsu, Dan, Professor of Management and Marketing
Ph.D., Syracuse University
Huang, Huichi, Associate Professor of Accounting & Information Systems
Ph.D., 2012, Syracuse University
Huang, Ying, Professor of Civil & Environmental Engineering
Ph.D., 2012, Missouri University of Science & Technology
Huseth-Zosel, Andrea, Associate Professor of Public Health
Ph.D., 2014, North Dakota State University
Huseynov, Fariz, Professor of Accounting & Information Systems
Ph.D., 2009, University of Memphis
Ikley, Joseph, Assistant Professor of Plant Sciences
Ph.D., 2018, Purdue University
Irish, Leah, Associate Professor of Psychology
Ph.D., 2011, Kent State University
Isern, Thomas, Professor of History, Philosophy & Religious Studies
Ph.D., 1977, Oklahoma State University
Iskander, Syeed Md, Assistant Professor of Civil & Environmental Engineering
Ph.D., 2019, Virginia Polytechnic Institute and State University
Jang, Youjin, Assistant Professor of Construction Management & Engineering
Ph.D., Seoul National University
Jansen, Rick, Associate Professor of Public Health
Ph.D. 2009, University of Minnesota
Jarajapu, Yagna, Associate Professor of Pharmaceutical Sciences
Ph.D. , 2002, Glasgow Caledonian University
Jeon, Hyeongjin, Assistant Professor of Apparel, Merchandising, Interior Design, & Hospitality Management
Ph.D., 2018, Kansas State University
Jeong, Inbae, Assistant Professor of Mechanical Engineering
Ph.D., 2017, Korea Advanced Institute of Science and Technology
Jia, Xinhua, Professor of Agricultural & Biosystems Engineering
Ph.D., 2004, University of Arizona
Jiang, Lei, Assistant Professor, School of Education
Ph.D., 2021, University of Georgia
Jiang, Long, Professor of Mechanical Engineering
Ph.D., 2003, Sichuan University
Johnson, Burton, Professor of Plant Sciences
Ph.D., 1993, North Dakota State University
Johnson, Carrie, Associate Professor of Human Development and Family Science
Ph.D., 2012 Iowa State University
Johnson, Donald, Associate Professor of History, Philosophy & Religious Studies
Ph.D., 2015, Northwestern University
Johnson, Jeffrey, Associate Professor of Psychology
Ph.D., 2008, University of Iowa
Johnson, Pamela Jo, Professor of Public Health
Ph.D., 2004, University of Minnesota
Johnson, Sigurd, Associate Professor of Music
D.M.A., 1999, University of Memphis
Jones, Joseph, Associate Professor of Management and Marketing
Ph.D., 1991, University of Missouri
Jung, Jessica, Associate Professor of Theatre Arts
M.F.A., 2011, De Paul University
Kallmeyer, Alan, Professor of Mechanical Engineering
Ph.D., 1995, University of Iowa

Kandel, Herman, Professor of Plant Science
Ph.D., 1995, North Dakota State University
Kang, Seungmin, Assistant Professor of Health, Nutrition & Exercise Science
Ph.D., 2021, Louisiana State University
Karami, Ghodrat, Professor of Mechanical Engineering
Ph.D., 1984, University of London
Katti, Dinesh, Professor of Civil & Environmental Engineering
Ph.D., 1991, University of Arizona-Tucson
Katti, Kalpana, Professor of Civil & Environmental Engineering
Ph.D., 1996, University of Washington
Keene, Clair, Assistant Professor of Plant Sciences
Ph.D., 2015, Pennsylvania State University
Keogh Vanderburg, Cassie, Associate Professor of Music
D.M.A., 2015, University of Oklahoma
Kessler, Michael, Dean, of College of Engineering
Ph.D., 2002, University of Illinois
Khan, Mohamed, Professor of Plant Pathology
Ph.D., 1998, Clemson University
Kilin, Dmitri, Associate Professor of Chemistry and Biochemistry
Ph.D., 2000, Chemnitz University of Technology
Kilina, Svetlana, Professor of Chemistry and Biochemistry
Ph.D., 2007, University of Washington
Kim, Jiha, Associate Professor of Biological Sciences
Ph.D., 2006, University of Georgia
Kingsley Westerman, Catherine, Associate Professor of Communication
Ph.D., 2008, Michigan State University
Kirkpatrick, Sarah, Associate Professor of Emergency Management
Ph.D., 2013, North Dakota State University
Kirkwood, Matthew, Associate Professor of School of Design, Architecture, & Art
M.Des., 1993, Harvard University
Kliman, Susan, Professor of Architecture
Ph.D., 2015, University of Arizona
Knight, Jeffrey, Assistant Professor of Visual Arts
M.F.A., 2008, Savannah College of Art and Design
Knodel, Janet, Professor of Plant Pathology
Ph.D., 2005, North Dakota State University
Kong, Jun, Professor of Computer Science
Ph.D., 2005, The University of Texas at Dallas
Krishnan, Sumathy, Professor of Mechanical Engineering
Ph.D., 1995, Indian Institute of Technology
Krumel, Thomas, Assistant Professor of Agribusiness and Applied Economics
Ph.D., 2020, University of Connecticut
Kryjevskaia, Lioudmila, Professor of Physics
Ph.D., 2008, University of Washington
Kryjevski, Andrei, Associate Professor of Physics
Ph.D., 2004, University of Washington
Laabs, Benjamin, Associate Professor of Geosciences
Ph.D., 2004, University of Wisconsin-Madison
Langley, Linda, Associate Professor of Psychology
Ph.D., 1998, University of Minnesota
Lardy, Gregory, Professor of Animal Science
Ph.D., 1997, University of Nebraska
Larson, Mary, Associate Professor of Health, Nutrition & Exercise Science
Ph.D., 2008, University of North Dakota
Layek, Buddhadev, Assistant Professor of Pharmaceutical Sciences
Ph.D., 2014, North Dakota State University
Le, Chau, Assistant Professor of Civil, Construction and Environmental Engineering
Ph.D., 2021, Texas A&M University
Le Trung, Assistant Professor of Civil, Construction and Environmental Engineering
Ph.D., University of Minnesota
Leclerc, Estelle, Associate Professor of Pharmaceutical Sciences
Ph.D., 1994, University of Paris XI

Lee, Chiwon, Professor of Plant Sciences
Ph.D., 1977, Purdue University
Lee, Jaeha, Professor of Apparel, Design & Hospitality Management
Ph.D., 2008, University of Minnesota
Lehmberg, Derek, Professor of Management and Marketing
Ph.D., 2010, University of Western Ontario
Lemieux-Wottrich, Mariane, Assistant Professor, Challey School of Music
D.M.A., Stony Brook University
Leontyev, Alexey, Assistant Professor of Chemistry and Biochemistry
Ph.D., 2015, University of Northern Colorado
Lepper, Kenneth, Professor of Geosciences
Ph.D., 2001, Oklahoma State University
Lewis, Todd, Professor of Counselor Education
Ph.D., 2002, Kent State University
Li, Deying, Professor of Plant Sciences
Ph.D., 2001, Iowa State University
Li, Jin, Professor of Management and Marketing
Ph.D., 2007, University of Alberta
Li, Juan, Professor of Computer Science
Ph.D., 2008, University of British Columbia
Li, Xuehui, Associate Professor of Plant Sciences
Ph.D., 2009, University of Georgia
Lim, Siew, Professor of Agribusiness & Applied Economics
Ph.D., 2005, University of Georgia
Lima, Ivan, Associate Professor of Electrical & Computer Engineering
Ph.D., 2003, University of Maryland, Baltimore County
Lin, Zhibin, Associate Professor of Civil & Environmental Engineering
Ph.D., 2010, University of Wisconsin at Milwaukee
Lin, Zhulu, Associate Professor of Agricultural & Biosystems Engineering
Ph.D., 2003, University of Georgia
Littmann, Friedrich, Professor of Mathematics
Ph.D., 2003, University of Illinois at Urbana-Champaign
Liu, Lu, Assistant Professor of Computer Science
Ph.D., 2017, University of Texas-San Antonio
Liu, Pan, Professor of Psychology
Ph.D., 2015, McGill University
Liu, Zhaohui, Associate Professor of Plant Pathology
Ph.D., 2006, North Dakota State University
Liverani, Elisabetta, Assistant Professor of Pharmaceutical Sciences
Ph.D., 2007, University of the West of England
Lu, Pan, Associate Professor of Transportation and Logistics
Ph.D., 2011, North Dakota State University
Lu, Shuning, Assistant Professor of Communication
Ph.D., 2019, University of Texas at Austin
Ludwig, Simone, Professor of Computer Science
Ph.D., 2004, Brunel University
Mack, Kyle, Associate Professor of Music
D.A., 1992, Ball State University
Mackey, Hollie, Associate Professor, School of Education
Ph.D., 2010, Pennsylvania State University
Maddock Carlin, Kasey, Associate Professor of Animal Science
Ph.D., 2005, Iowa State University
Magel, Kenneth, Professor of Computer Science
Ph.D., 1977, Brown University
Magel, Rhonda, Professor of Statistics
Ph.D., 1982, University of Missouri-Rolla
Mahalingam, Ganapathy, Professor of Architecture & Landscape Architecture
Ph.D., 1995, University of Florida
Majdik, Zoltan, Professor of Communication
Ph.D., 2008, University of Southern California
Maleki, Reza, Associate Professor of Industrial & Manufacturing Engineering
Ph.D., 1989, North Dakota State University

Malik, Muhammad, Assistant Professor of Computer Science
Ph.D., 2014, University of Texas at Austin
Manthey, Frank, Professor of Plant Sciences
Ph.D., 1985, North Dakota State University
Marais, Gideon, Professor of Plant Sciences
Ph.D., 1979, North Dakota State University
Ph.D., 1992, Stellenbosch University
March, Raymond, Assistant Professor of Agribusiness and Applied Economics
Ph.D., 2017, Texas Tech University
Marineau, Joshua, Associate Professor of Management and Marketing
Ph.D., 2012, University of Kentucky
Markell, Samuel, Professor of Plant Pathology
Ph.D., 2007, University of Arkansas
Marx, Adam, Associate Professor, Agricultural Education
Ph.D., 2014, University of Missouri
Mataic, Dane, Assistant Professor of Sociology and Anthropology
Ph.D., 2018, The Pennsylvania State University
Mathew, Sijo, Assistant Professor of Pharmaceutical Sciences
Ph.D., 2006, Central food Technological Research Institute
Mattson, Jeremy, Associate Professor of Transportation and Logistics
Ph.D., 2017, North Dakota State University
May, Sylvio, Professor of Physics
Ph.D., 1996, Friedrich-Schiller University
McClean, Phillip, Professor of Plant Sciences
Ph.D., 1982, Colorado State University
McEvoy, John, Professor of Microbiological Sciences
Ph.D., 2002, University of Ulster
McGeorge, Christine, Professor of Human Development and Family Science
Ph.D., 2005, University of Minnesota
McGinnis, Esther, Associate Professor of Plant Sciences
Ph.D., 2013, University of Minnesota
McGrath, Ryan, Assistant Professor of Health, Nutrition & Exercise Science
Ph.D., 2015, University of Idaho
McMullen, Michael, Professor of Plant Sciences
Ph.D., 1976, University of Minnesota
Meehan, Miranda, Associate Professor of Animal Science
Ph.D., 2011, North Dakota State University
Miljkovic, Dragan, Professor of Agribusiness & Applied Economics
Ph.D., 1996, University of Illinois at Urbana-Champaign
Miller, E. John, Professor of Performing Arts
Ph.D., 1991, Northwestern University
Miller, Jo, Professor of Music
D.M.A., 1989, Conservatory of Music, University of Cincinnati College
Miranda, Carrie, Assistant Professor of Plant Sciences
Ph.D., 2018, University of Missouri
Moe, Charlette, Associate Professor of Music
D.M.A., North Dakota State University
Momsen, Jennifer, Professor of Biological Sciences
Ph.D., 2007, Rutgers University
Monono, Ewumbua, Assistant Professor of Agricultural & Biosystems Engineering
Ph.D., 2015, North Dakota State University
Montplaisir, Lisa, Professor of Biological Sciences
Ph.D., 2003, University of Arizona
Motuba, Diomo, Assistant Professor of Transportation and Logistics
Ph.D., 2009, North Dakota State University
Myer, Andrew, Associate Professor of Criminal Justice & Political Science
Ph.D., 2010, University of Cincinnati
Napoleon, Larry, Associate Professor, School of Education
Ph.D., 2009, The Pennsylvania State University
Narayanan, Lokesh, Assistant Professor of Industrial & Manufacturing Engineering
Ph.D., 2019, North Carolina State University
Nawrot, Mark, Professor of Psychology

Ph.D., 1991, Vanderbilt University
Nelson, Jill, Professor of Counselor Education
Ph.D., 1993, University of Wisconsin
Nelson, Kjersten, Professor of Criminal Justice & Political Science
Ph.D., 2009, University of Minnesota
Nganje, William, Professor of Agribusiness & Applied Economics
Ph.D., 1999, University of Illinois
Nordstrom, Onnolee, Associate Professor of Management and Marketing
Ph.D., University of Alberta
Norland, Jack, Associate Professor, School of Natural Resource Sciences
Ph.D., 2008, North Dakota State University
Novozhilov, Artem, Associate Professor of Mathematics
Ph.D., 2002, Moscow State University of Communication Means
Nyachwaya, James, Professor, School of Education
Ph.D., 2012, University of Minnesota Twin Cities
O'Connor, Melissa, Associate Professor of Human Development and Family Science
Ph.D., 2010, University of South Florida
Oduor, Peter, Professor of Geosciences
Ph.D., 2004, University of Missouri at Rolla
Olfert, Warren, Professor of Music
Ph.D., 1992, Florida State University
Olson, Frayne, Professor of Agribusiness & Applied Economics
Ph.D., 2007, University of Missouri
O'Rourke, Stephen, Professor of Pharmaceutical Sciences
Ph.D., 1985, University of Wisconsin
Orr, Megan, Associate Professor of Statistics
Ph.D., 2012, Iowa State University
O'Shea, Cailen, Assistant Professor, School of Education
Ph.D., 2020, University of Nebraska-Lincoln
Osorno, Juan, Professor of Plant Sciences
Ph.D., 2006, North Dakota State University
Otte, Marinus, Professor of Biological Sciences
Ph.D., 1991, Vrije Universiteit
Parent, Alexander, Assistant Professor of Chemistry and Biochemistry
Ph.D., 2013, Yale University
Park, Jeongdoo, Assistant Professor of Apparel, Design & Hospitality Management
Ph.D., 2014, Washington State University
Park, Kwangsoo, Associate Professor of Apparel, Design & Hospitality Management
Ph.D., 2013, Temple University
Parman, Bryon, Assistant Professor of Agribusiness & Applied Economics
Ph.D., 2013, Kansas State University
Parson, Laura, Associate Professor, School of Education
Ph.D., 2016, University of North Dakota
Pasche, Julie, Associate Professor of Plant Pathology
Ph.D., 2012, North Dakota State University
Patnode, Matthew, Professor of Music
D.M.A., 1999, Arizona State University
Pemstein, Daniel, Professor of Criminal Justice & Political Science
Ph.D., 2010, University of Illinois
Pengnate, Supavich, Associate Professor of Accounting & Information Systems
Ph.D., 2013, Oklahoma State University
Perett, Marcela, Associate Professor of History, Philosophy & Religious Studies
Ph.D., 2009, University of Notre Dame
Peters, Thomas, Associate Professor of Plant Sciences
Ph.D., 1990, North Dakota State University
Petersen, Michael, Associate Professor of Accounting & Information Systems
Ph.D. 2002, The University of Iowa
Peterson, Tim, Professor of Management and Marketing
Ph.D., Texas A & M University at College Station
Petry, Timothy, Associate Professor of Agribusiness and Applied Economics
M.S., 1973, North Dakota State University
Platt, Carrie Anne, Professor of Communication

Ph.D., 2008, University of Southern California
Pruess, Birgit, Professor of Microbiological Sciences
Ph.D., 1991, Ruhr-Universitat Bochum, Germany
Pryor, Scott, Professor of Agricultural & Biosystems Engineering
Ph.D., 2005, Cornell University
Quadir, Mohiuddin, Associate Professor of Coatings & Polymeric Materials
Ph.D. , 2010, Freie University of Berlin
Rahman, Md Mukhlesur, Associate Professor of Plant Sciences
Ph.D., 2007, University of Manitoba
Ramamoorthy, Sheela, Professor of Microbiological Sciences
Ph.D., 2006, Virginia Polytechnic Institute and State University
Ramsay, Ronald, Associate Professor of Architecture & Landscape Architecture
M.Arch., 1991, University of Texas-Austin
Rao, Jiajia, Associate Professor of Plant Sciences
Ph.D., 2013, University of Massachusetts
Rao, Xudong, Assistant Professor of Agribusiness and Applied Economics
Ph.D., 2015, University of Minnesota
Rasmussen, Jack, Professor of Plant Pathology
Ph.D., 1987, Michigan State University
Rasmussen, Seth, Professor of Chemistry and Biochemistry
Ph.D., 1994, Clemson University
Rasulev, Bakhtiyor, Associate Professor of Coatings and Polymeric Materials
Ph.D., 2002, Uzbek Academy of Sciences
Ray, Christopher, Professor, School of Education
Ph.D., 2007, Oklahoma State University
Rayamajhee, Veeshan, Assistant Professor of Agribusiness & Applied Economics
Ph.D., 2019, University of New Mexico
Ray-Degges, Susan, Professor of Apparel, Design & Hospitality Management
M.S., 1987, University of Missouri
Reindl, Katie, Professor of Biological Sciences
Ph.D., 2006, North Dakota State University
Reynolds, Lawrence, Professor of Animal Science
Ph.D., 1983, Iowa State University
Rhee, Yeong, Professor of Health, Nutrition & Exercise Science
Ph.D., 1999, Oklahoma State University
Rider, David, Professor, School of Natural Resource Sciences
Ph.D., 1988, Louisiana State University
Riggins, Frederick, Professor of Accounting & Information Systems
Ph.D., 1994 Carnegie-Mellon University
Ripplinger, David, Associate Professor of Agribusiness and Applied Economics
Ph.D., 2012, North Dakota State University
Roa-Henriquez, Alfredo, Assistant Professor of Transportation, Logistics, & Finance
Ph.D., 2019, Ohio State University
Roberts, David, Associate Professor of Agribusiness & Applied Economics
Ph.D., 2009, Oklahoma State University
Robinson, Andrew, Associate Professor of Plant Sciences
Ph.D., 1996, University of California, Davis
Robinson, Michael, Professor of Psychology
Ph.D., 2009, Oklahoma State University
Rodgers, Kenton, Professor of Chemistry and Biochemistry
Ph.D., 1988, University of Iowa
Ross, Darrell, Professor of School of Natural Resource Sciences
Ph.D., 1990, University of Georgia
Rubenstein, Kerrianne, Assistant Professor of Agribusiness & Applied Economics
Ph.D., West Virginia University, 2021
Rusch, Kelly, Professor of Civil & Environmental Engineering
Ph.D., 1992, Louisiana State University
Saimaiti, Aimaiti, Assistant Professor of Microbiological Sciences
Ph.D., 2019, University of Calgary
Saini-Eidukat, Bernhardt, Professor of Geosciences
Ph.D., 1991, University of Minnesota
Salajan, Florin, Professor, School of Education

Ed.D., 2007, Columbia University
Salem, Saeed, Professor of Computer Science
Ph.D., 2009, Rensselaer Polytechnic Institute
Scaglia, Guillermo, Professor of Animal Science
Ph.D., 2002, Texas A&M University
Scherer, Thomas, Associate Professor of Agricultural & Biosystems Engineering
Ph.D., 1986, University of Minnesota
Schumacher, Leon, Professor of Agriculture & Biosystems Engineering
Ph.D., 1987, Iowa State University
Schwaen, Regin, Associate Professor of Architecture & Landscape Architecture
M.Arch., 1992, Arkitektskolen I. Aarhus
Secor, Gary, Professor of Plant Pathology
Ph.D., 1978, University of California-Davis
Sedivec, Kevin, Professor, School of Natural Resource Sciences
Ph.D., 1994, North Dakota State University
Selekwa, Majura, Associate Professor of Mechanical Engineering
Ph.D., 2001, Florida A and M University
Sengupta, Indranil, Professor of Mathematics
Ph.D., 2010, Texas A & M University
Sharma, Anupa, Assistant Professor of Agribusiness & Applied Economics
Ph.D., 2016, Virginia Polytechnic Institute and State University
Shen, Gang, Associate Professor of Statistics
Ph.D., 2009, Purdue University
Shetty, Kalidas, Professor of Plant Sciences
Ph.D., 1989, University of Idaho
Shume, Teresa, Associate Professor, School of Education
Ph.D., 2013, University of North Dakota
Sibi, Mukund, Professor of Chemistry and Biochemistry
Ph.D., 1980, City University of New York
Signor, Sarah, Assistant Professor of Biological Sciences
Ph.D., 2013, University of California, Davis
Singh, Jagdish, Professor of Pharmaceutical Sciences
Ph.D., 1982, Banaras Hindu University, Varanasi, India
Sinha, Sangita, Professor of Chemistry and Biochemistry
Ph.D., 2000, Purdue University
Skoy, Elizabeth, Professor of Pharmacy Practice
Pharm.D., 2007, North Dakota State University
Slater, Kelsey, Assistant Professor of Health, Nutrition & Exercise Science
Ph.D., 2021, Mississippi State University
Smith, Gary, Professor of Civil, Construction, and Environmental Engineering
Ph.D., 1986, Purdue University
Smith, Angela, Professor of History, Philosophy & Religious Studies
Ph.D., Middle Tennessee University
Srinivasan, Sudarshan, Professor of Electrical & Computer Engineering
Ph.D., 2007, Georgia Institute of Technology
Stastny, Sherri, Professor of Health, Nutrition & Exercise Science
Ph.D., 2007, North Dakota State University
Steele, Dean, Associate Professor of Agricultural & Biosystems Engineering
Ph.D., 1991, University of Minnesota
Steffen, Kristine, Professor of Pharmaceutical Sciences
Ph.D., 2007, North Dakota State University
Stevens, Charles, Professor of Management and Marketing
Ph.D., 1998, University of Kansas
Steward, David, Professor of Civil & Environmental Engineering
Ph.D., University of Minnesota
Stichman, Amy, Associate Professor of Criminal Justice
Ph.D., 2003, University of Cincinnati
Stockwell, Craig, Professor of Biological Sciences
Ph.D., 1995, University of Nevada-Reno
Stokka, Gerald, Associate Professor of Animal Science
DVM, 1982, Iowa State University
Strand, Bradford, Professor of Health, Nutrition & Exercise Science

Ph.D., 1988, University of New Mexico
Strand, Mark, Professor of Pharmacy Practice
Ph.D., 2004, University of Colorado at Denver
Strand, Michael, Professor of Visual Arts
M.F.A., 1999, University of Nebraska
Straub, Jeremy, Associate Professor of Computer Science
Ph.D., 2015 University of North Dakota
Striker, Jessica, Professor of Mathematics
Ph.D., 2008, University of Minnesota
Sun, Chengwen, Associate Professor of Pharmaceutical Sciences
Ph.D., 1996, Norman Bethune University of Medical Sciences
Sun, Dali, Assistant Professor of Electrical & Computer Engineering
Ph.D., University of Tokyo
Sun, Xin, Associate Professor of Agricultural & Biosystems Engineering
Ph.D., 2013, Nanjing Agricultural University
Suzen, Yildirim, Associate Professor of Mechanical Engineering
Ph.D., 1998, Wichita State University
Swanson, Kendall, Professor of Animal Science
Ph.D., 2000, University of Kentucky
Swenson, David, Associate Professor of Visual Arts
Ph.D., 2006, Queens University
Syvertson, Eric, Assistant Professor of Visual Arts
M.F.A., 2014, Minneapolis College of Art and Design
Szmerekovsky, Joseph, Professor of Management and Marketing
Ph.D., 2003, Case Western Reserve University
Tackett, Lydia, Associate Professor of Geosciences
Ph.D., 2014, University of Southern California
Tangen, Jodi, Associate Professor of Counselor Education
Ph.D., 2015, University of North Carolina at Greensboro
Tangpong, Chanchai, Professor of Management and Marketing
Ph.D., 2002, Southern Illinois University, Carbondale
Tangpong, Xiangqing, Associate Professor of Mechanical Engineering
Ph.D., 2006, Carnegie-Mellon University
Templeton, Karisa, Assistant Professor, Challey School of Music
D.M., Indiana University
Theile, Verena, Associate Professor of English
Ph.D., 2006, Washington State University
Thomas, Laura, Associate Professor of Psychology
Ph.D., 2008, University of Illinois at Urbana-Champaign
Thompson, Asunta, Associate Professor of Plant Sciences
Ph.D., 1998, University of Idaho
Thompson, Kevin, Professor of Criminal Justice & Political Science
Ph.D., 1986, University of Arizona
Thompson, Rachel, Assistant Professor of Accounting & Information Systems
Ph.D., University of Minnesota
Tian, Ruilin, Professor of Accounting & Information Systems
Ph.D., 2008, Georgia State University
Tida, Umamaheswara Rao, Assistant Professor of Electrical & Computer Engineering
Ph.D., University of Notre Dame
Travers, Steven, Associate Professor of Biological Sciences
Ph.D., 1998, University of California, Santa Barbara
Ubhaya, Vasant, Professor of Computer Science
Ph.D., 1971, University of California-Berkeley
Ulven, Chad, Professor of Mechanical Engineering
Ph.D., 2005, University of Alabama, Birmingham
Ungar, Abraham, Professor of Mathematics
Ph.D., 1973, Tel-Aviv University
Uppala, Vishal, Assistant Professor of Accounting and Information Systems
Ph.D., University of North Caroline at Greensboro
Urness, Cindy, Associate Professor of Architecture & Landscape Architecture
M.Arch., 1988, Pratt Institute
Vachal, Kim, Associate Professor of Transportation and Logistics

Ph.D., George Mason University
Varland, Rooth, Professor of Theatre Arts
M.F.A, 1989, Northwestern University
Venkatachalem, Sathish, Associate Professor of Pharmaceutical Sciences
Ph.D., 2003, University of Madras
Vettern, Rachelle, Professor, Extension Center for 4-H Youth Development
Ph.D., 2006, North Dakota State University
Visilia, Anna-Marie, Associate Professor of Landscape Architecture
Ph.D., 1996, University of Pennsylvania
Vold, Jessica, Assistant Professor of Mechanical Engineering
Ph.D., 2015, North Dakota State University
Voldseth, Deirdre, Professor, School of Natural Resource Sciences
Ph.D., 2005, Washington State University
Voronov, Andriy, Professor of Coatings & Polymeric Materials
Ph.D., 1994, Lviv Polytechnic Institute, Lviv, Ukraine
Wachenheim, Cheryl, Professor of Agribusiness & Applied Economics
Ph.D., 1994, Michigan State University
Wageman, Justin, Professor, School of Education
Ph.D., 1999, University of North Dakota
Wagner, Carsten, Associate Professor of Physics
Ph.D., 1997, Oxford University
Walden, Justin, Associate Professor of Communication
Ph.D., 2013, Penn State University
Wallin, Kimberly, Dean, College of Science & Math
Ph.D., University of Wisconsin-Madison
Wang, Danling, Associate Professor of Electrical & Computer Engineering
Ph.D., 2003, Peking University
Ph.D., 2013, University of Washington
Wang, Wen, Assistant Professor of Human Development and Family Science
Ph.D., 2018, Michigan State University
Wang, Xinnan, Associate Professor of Mechanical Engineering
Ph.D., 2008, University of South Carolina
Wang, Yechun, Associate Professor of Mechanical Engineering
Ph.D., 2007, University of Maryland at College Park
Ward, Alison, Associate Professor of Animal Science
Ph.D., 2011, University of Saskatchewan
Weber, Michael, Professor of Music
D.M.A., 1990, University of Arizona
Weber Knopp, Christina, Professor of Sociology and Anthropology
Ph.D., 2005, State University of New York, Buffalo
Webster, Dean, Professor of Coatings & Polymeric Materials
Ph.D., 1984, Virginia Polytechnic Institute and State University
Werremeyer, Amy, Professor of Pharmacy Practice
Pharm.D., 2005, North Dakota State University
West, Todd, Professor of Plant Sciences
Ph.D., 2004, Southern Illinois University
Westerman, David, Associate Professor of Communication
Ph.D., 2007, Michigan State University
Whitsel, Christopher, Associate Professor of Sociology and Anthropology
Ph.D., 2009, Indiana University
Wick, Abbey, Associate Professor, School of Natural Resource Sciences
Ph.D., 2007, University of Wyoming
Wilkinson, John, Associate Professor of Chemistry and Biochemistry
Ph.D., 2001, Vanderbilt University
Wilson, William, Professor of Agribusiness & Applied Economics
Ph.D., 1980, University of Manitoba
Wing, Heath, Associate Professor of Modern Languages
Ph.D., 2015, Texas Tech University
Wischer, Stephen, Associate Professor of Architecture & Landscape Architecture
M. Arch., 2004, University of Calgary
M.F.A., 2004, University of Calgary
Wissman, Kathryn, Assistant Professor of Psychology

Ph.D., 2016 Kent State University
Wood, Nathan, Associate Professor, School of Education
Ph.D., 2006, University of Minnesota
Wood, Scott, Professor of Geosciences
Ph.D., 1985, Princeton University
Wottrich, Tyler, Associate Professor of Music
D.M.A., Stony Brook University
Wright, Newell, Professor of Management and Marketing
Ph.D., Virginia Polytechnic Institute and State University
Wu, Di, Associate Professor of Electrical & Computer Engineering
Ph.D., 2011, Polytechnic University of Turin
Ph.D., Zhejiang University
Wu, Xiangfa, Professor of Mechanical Engineering
Ph.D., 2003, University of Nebraska
Xia, Wenjie, Assistant Professor of Civil & Environmental Engineering
Ph.D., 2016, Northwestern University
Xu, Minwei, Assistant Professor of Plant Sciences
Ph.D., 2019, North Dakota State University
Yan, Changhui, Professor of Computer Science
Ph.D., 2005, Iowa State University
Yan, Guiping, Associate Professor of Plant Pathology
Ph.D., Washington State University
Yang, Mijia, Associate Professor of Civil & Environmental Engineering
Ph.D., 2006, University of Akron
Yang, Zhongyu, Associate Professor of Chemistry and Biochemistry
Ph.D.,, 2010, University of Pittsburgh
Yellavajjala, Ravi Kiran, Associate Professor of Civil & Environmental Engineering
Ph.D., 2014, University of Notre Dame
Yodo, Nita, Assistant Professor of Industrial & Manufacturing Engineering
Ph.D., 2017, Wichita State University
Yu, Yao, Associate Professor of Construction Management & Engineering
Ph.D., 2014, North Carolina Agricultural and Technical State University
Yuan, Mingao, Assistant Professor of Statistics
Ph.D., 2018, Purdue University
Zarak, Jenny, Associate Professor, School of Education
Ph.D., 2011, University of Illinois at Urbana-Champaign
Zeng, Cheng, Assistant Professor of Communication
Ph.D., 2018, University of Jyvaskyla
Zhang, Limin, Associate Professor of Accounting & Information Systems
Ph.D., 2006, University of Arizona
Zhang, Qi, Associate Professor of Plant Sciences
Ph.D., 2007, Kansas State University
Zhang, Qifeng, Associate Professor of Electrical & Computer Engineering
Ph.D., 2001, Peking University
Zhang, Wei, Professor of Accounting & Information Systems
Ph.D., 2001, Syracuse University
Zhang, Yan, Associate Professor of Mechanical Engineering
Ph.D., 2013, Iowa State University
Zhao, Pinjing, Professor of Chemistry and Biochemistry
Ph.D., 2003, Cornell University
Zhong, Shaobin, Professor of Plant Pathology
Ph.D., 2000, North Dakota State University
Zuk, Alan, Associate Professor of Plant Sciences
Ph.D., 2005, Kansas State University

Affiliate Graduate Faculty

Other qualified individuals who are not Full Graduate Faculty members may contribute to the scholarship and professional development of our graduate students. Affiliate Members of the Graduate Faculty are qualified by educational background and experience to effectively teach and mentor students in graduate programs at NDSU. An appointment for Affiliate Graduate Faculty status is initiated by a graduate program. The chair, head, or director of the academic unit in which the program resides will submit the Affiliate Graduate Faculty Nomination form (https://powerforms.docusign.net/b51d1f0b-7075-44f9-be79-59648eeac0d0/?env=na3&acct=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7) and a current

curriculum vitae. The request should include the level of Affiliate Faculty Membership the program proposes the applicant should be given. This request is forwarded to the dean of the academic college in which the program resides for approval. If approved, the request is submitted to the College of Graduate and Interdisciplinary Studies. The request will be reviewed by a subcommittee of the Graduate Council which will make a recommendation to the Dean of the College of Graduate and Interdisciplinary Studies, who will determine whether an appointment will be granted. A reappointment may be granted using the process described above.

Members of the Graduate Faculty who have left the institution may be granted Affiliate Faculty status as outlined below:

- Emeritus Faculty. Persons who are granted emeritus faculty status are eligible for Affiliate Faculty Level 1 status for a period of three years. Membership as an Affiliate Faculty may be renewed upon approval of the Graduate Council and the Dean of the College of Graduate and Interdisciplinary Studies.
- Individuals who have retired or left NDSU for other employment opportunities are eligible serve as chair (advisor) of supervisory committees for one year.
  - This is not renewable.
  - This eligibility does not apply to committee membership other than the chair (advisor).
- A department may nominate the individual for Affiliate Faculty status as outlined below.

There are three levels of Affiliate Graduate Faculty Members, the appointment level will be determined by the qualifications of the applicant.

Affiliate Graduate Faculty Level 1

Duties

- Chair committees for graduate students (may be approved to chair committees for Ph.D. programs, professional doctoral programs or both)
- Serve on committees for all students
- Teach graduate courses

Criteria

- Terminal degree
- Sustained record of scholarly and/or creative accomplishment, and/or (for professional doctoral programs only) professional practice appropriate to the discipline
- Demonstrated competence in instruction including classroom, advising, or mentoring
- Full-time employment at an NDSU on-campus unit or a Research and Extension Center

Term

- 6 years
- Must demonstrate sustained record of scholarly and/or creative accomplishment
- Demonstrated competence in graduate instruction including classroom, advising, or mentoring

---

Affiliate Graduate Faculty Level 2

Duties

- Chair committees for all master's students
- Serve as co-chair for all doctoral students (the other co-chair must be a full member of the graduate faculty)
- Serve on committees for all students
- Teach graduate courses

Criteria

- Terminal degree
- Record of scholarly or creative accomplishment
- Demonstrated experience in teaching, mentoring, or advising

Term

- 3 years
- Must demonstrate sustained record of scholarly or creative accomplishment
- Demonstrated competence in graduate teaching, advising, or mentoring

Affiliate Graduate Faculty Level 3

Duties

- Chair committees for students not required to complete a dissertation, thesis, or scholarly paper
- Serve on committees for all students
- Teach graduate courses (but no higher than his/her earned degree)

Criteria

- Record of professional achievement in an area related to the program
- Demonstrated competence in teaching

Term

- 3 years
- Must demonstrate sustained record of professional achievement in an area related to the program
- Active involvement in graduate teaching and work with graduate students (but no higher than his/her earned degree)

Affiliate Graduate Faculty Members

The list below is grouped by the AGF Level for which they were approved. There term ends on the last day of the semester indicated below their name.

Level 1

Addey, Kwame, Agribusiness and Applied Economics
2029 Summer
Bajwa, Sreekala, Agricultural and Biosystems Engineering
2026 Spring
Banerjee, Amrita, Pharmaceutical Sciences
2024 Fall
Benna, Justin, School of Education
2029 Fall
Benning, Kerri, School of Nursing
2029 Spring
Biermacher, Jon, Agribusiness and Applied Economics
2029 Spring
Borowicz, Pawel, Animal Sciences
2029 Summer
Boyer, Jeffrey, College of Science and Math
2029 Fall
Brunsvold, Abigail, School of Nursing
2029 Spring
Bullock, David, Agribusiness and Applied Economics
2024 Fall
Buncher, John, Physics
2027 Fall
Carson, Paul, Public Health
2027 Spring
Cernusca, Dan, Pharmacy Practice
2027 Spring
Chapara, Venkata, Plant Pathology
2028 Fall
Condry, Danielle, Microbiological Sciences
2025 Spring
Dimler, Laurel, School of Nursing
2025 Spring
Dresecher, Matthew, Health, Nutrition and Exercise Science
2029 Fall
Dybing, Alan, Transportation and Logistics
2026 Spring
Ewert, Dan, Electrical and Computer Engineering

2027 Spring
Falk, Kara, School of Nursing
2025 Spring
Foye, Brandon, Health, Nutrition and Exercise Science
2028 Fall
Fraase, Kolby Schaeffer, School of Nursing
2026 Spring
Geaumont, Benjamin, School of Natural Resource Sciences
2030 Spring
Gross, Dean, School of Nursing
2029 Summer
Hammed, Ademola, Agricultural and Biosystems Engineering
2026 Spring
Heilman Morales, Ana, Agricultural and Biosystems Engineering
2030 Spring
Hoang, Khang, Physics
2028 Spring
Hough, Jill, Upper Great Plains Transportation Institute
2025 Summer
Kalina, Emily, School of Nursing
2027 Fall
Kenzie, Daniel, English
2024 Fall
Klug, Page, Biological Sciences
2025 Spring
Koparan, Cengiz, Agricultural and Biosystems Engineering
2026 Fall
Leitch, Jay, Agribusiness and Applied Economics
2026 Spring
Littlefield, Robert, Communication
2027 Spring
Lopez-Martinez, Giancarlo, Biological Sciences
2025 Spring
McCaul, Kevin, Psychology
2024 Fall
McQueston, Jessica, School of Education
2027 Fall
Mushet, David, Environmental and Conservation Science
2025 Spring
Nahar, Nurun, Agricultural and Biosystems Engineering
2024 Fall
Nelson, Carrie, School of Nursing
2029 Spring
Ostlie, Michael, Plant Sciences
2028 Fall
Peltier, Allison, School of Nursing
2029 Spring
Prasifka, Jarrad, Entomology
2027 Fall
Qi, Xiaoning, Coatings and Polymeric Materials
2027 Spring
Rabia, Ahmed Harb, Agricultural and Biosystems Engineering
2030 Spring
Roseno, Ashley, Health, Nutrition and Exercise Science
2026 Spring
Saarinen, Heidi, School of Nursing
2029 Spring
Schauer, Christopher, Animal Sciences
2028 Fall
Staricka, James, Soil Science
2023 Fall
Tulibaski, Katherine, Management and Marketing

2027 Fall
Vachal, Kimberly, Agribusiness and Applied Economics
2028 Spring
Vanderburg, Kyle, Music
2028 Spring
Vetter, Stefan, Pharmaceutical Sciences
2029 spring
Vosen Callens, Melissa, Communication
2029 Summer
Williamson, Julia, Pharmacy Practice
2027 Spring
Wooldridge, Joshua, School of Nursing
2029 Fall
Yodo, Nita, Industrial & Manufacturing Engineering
2028 Fall
Yonk, Ryan, Agribusiness and Applied Economics
2026 Fall

Level 2

Ahlering, Marissa, Biological Sciences
2024 Fall
Alshami, Ali, Biomedical Engineering
2024 Fall
Amiri, Ali, Mechanical Engineering
2025 Summer
Anderson, James, Plant Sciences
2025 Spring
Beaver, James, Plant Sciences
2025 Fall
Benna, Justin, School of Education
2023 Fall
Blodgett Salafia, Elizabeth, Human Development and Family Science
2024 Fall
Bolton, Melvin, Plant Pathology
2026 Spring
Bortolon, Leandro, School of Natural Resource Sciences
2024 Fall
Carlson, Zachary, Animal Sciences
2026 Spring
Carr, Patrick, Plant Sciences
2025 Fall
Chao, Wun, Plant Sciences
2025 Fall
Crouse, Matthew, Animal Sciences
2027 Spring
Cushman, Robert, Animal Sciences
2027 Spring
da Silva Diniz, Wellison Jarles, Animal Sciences
2026 Spring
Daigh, Aaron, Soil Science
2025 Fall
Danielson, Jessica, School of Education
2026 Fall
Day, Stephanie, Biological Sciences
2026 Fall
Fauske, Gerald, School of Natural Resource Sciences
2026 Spring
Fiedler, Jason, Plant Sciences
2025 Fall
Forster, Shana, Plant Sciences
2026 Fall

Gasch, Caley, School of Natural Resource Sciences
2026 Spring
Grier, James, Biological Sciences
2026 Fall
Heitman, Joshua, School of Natural Resource Sciences
2027 Spring
Hendrickson, John, School of Natural Resource Sciences
2027 Spring
Hoffman, Jeanette, School of Education
2026 Fall
Jansen, Rick, Public Health
2026 Spring
Johnson, Blaine, Plant Sciences
2025 Fall
Kalil, Audrey, Plant Sciences
2026 Fall
Kandel, Shyam, Plant Pathology
2025 Fall
Kelley, Suzzanne, History, Philosophy and Religion
2025 Fall
Kim, James, Agricultural and Biosystems Engineering
2026 Fall
Laam, Leslie, Public Health
2026 Spring
Le, Trung, Industrial & Manufacturing Engineering
2025 Fall

Graduate Teaching Waivers

Graduate teaching waivers may be granted to individuals who do not meet the requirements for either full or associate graduate faculty status. Teaching waivers only allow individuals to serve as the instructor of record for graduate level courses and carry none of the other privileges of graduate faculty status. Waivers may be granted to qualified individuals who are not students in the department for which the waiver is sought. Graduate teaching waivers may be granted to individuals who do not meet the requirements for either full or associate graduate faculty status. Graduate teaching waivers should be granted sparingly. A request for a waiver should include a rationale for why the individual nominated is the best choice for teaching the particular course. Teaching waivers are most appropriate for elective courses or courses in applied/professional programs for which experiences gained by professionals will provide a valuable educational opportunity for the students. Teaching waivers should not be requested for required courses in a program, unless no other viable alternative exists. The request for teaching waivers should not be seen as a long-term solution to inadequate numbers of tenure-track faculty members. Thus departments will also be asked to explain their long-term plan to fill any deficiencies in their ability to offer courses for which a waiver is requested.

The burden of proof lies with the applying graduate program to show that the nominee holds qualifications that merit the granting of a graduate teaching waiver. A Graduate Teaching Waiver Request form (https://na3.docusign.net/Member/PowerFormSigning.aspx?PowerFormId=4833e793-7a58-47f4-9ae4-cbad0fae294f&env=na3&acct=1ceb9a57-b6a3-4df7-b655-d64cf8f1c2d7&v=2) must be completed with a current copy of the nominee's curriculum vitae and any other pertinent documentation attached.

Graduate teaching waivers are approved by the Graduate Council and the Dean of the Graduate College. Waivers are granted for one academic year and may be renewed twice at the discretion of the Dean of the Graduate College.

Student Resources

Diverse services and reinforcement programs are available to students at NDSU. The resources linked below are aimed at enhancing student life by assisting students in gaining the maximum benefit from their educational experiences.

- ACE Tutoring (Academic Collegiate Enhancement) (https://www.ndsu.edu/ace/)
- Air Force ROTC (https://www.ndsu.edu/afrotc/)
- Army ROTC (http://www.ndsuarmyrotc.com/)
- Athletics (http://www.gobison.com/)
- Bookstore (http://www.ndsubookstore.com/)
- Career and Advising Center (https://career-advising.ndsu.edu/)
- Center for Accessibility & Disability Resources (https://www.ndsu.edu/disabilityservices/)
- Center for Writers (https://www.ndsu.edu/cfwriters/)
- Code of Student Conduct: Rights and Responsibilities of Community NDSU Policy 601 (https://www.ndsu.edu/fileadmin/policy/601.pdf)

Undergraduate Programs of Study

A (p. 125) B (p. 125) C (p. 125) D (p. 126) E (p. 126) F (p. 127) G (p. 127) H (p. 127) I (p. 127) J (p. 127) K L (p. 127) M (p. 128) N (p. 128) O (p. 128) P (p. 128) Q R (p. 129) S (p. 129) T (p. 130) U (p. 130) V (p. 130) W (p. 130) X Y Z (p. 130)

These program of study pages provide a summary overview of NDSU's various undergraduate majors, minors and certificate programs. Majors include a sample program guide for a 4-year program. The sample program guide is an informal curriculum offering a suggested sequence of courses by

semester. Sample program guides are intended to be flexible based on a number of individual student factors and should never replace the official curriculum. A link to the official curriculum is included in each overview.

NDSU offers combined/accelerated degree programs for highly-qualified students to earn both a bachelor's and master's degree in a cost-effective, quality, and timely manner with department approval. These disciplines are currently available as combined/accelerated programs.

Accounting

Department Information

- **Department Web Site:**
  www.ndsu.edu/business/programs/undergraduate/ (http://www.ndsu.edu/business/programs/undergraduate/)
- **Credential Offered:**
  B.S.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/accounting/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/accounting/)

Accounting is the analysis, interpretation and communication of financial information about the resources of an organization and the use of those resources. Accountants help others make business decisions and provide auditing and tax services, as well as fraud examination (forensic accounting services).

The Program

The accounting major offered by the College of Business prepares students for entry-level positions in public accounting, corporate accounting, government accounting and forensic (fraud) accounting. The accounting curriculum includes accounting and business courses with a wide range of other courses selected to help develop well-rounded, well-educated graduates. Computer and information systems courses incorporate the essential knowledge of applying accounting skills using technology in today's business environment. Courses in other areas of business help students understand how their work relates to marketing, management and finance.

North Dakota law requires that persons who sit for the Certified Public Accountant (CPA) professional examination must have completed 150 semester hours of college education. Students can meet this requirement through a combination of the undergraduate accounting major and the Master of Accountancy (MAcc.) degree offered at North Dakota State University.

To succeed in the accounting profession, an individual should have a solid mathematical background and be able to interpret information. Good communication skills are essential to be able to present information to others. Interpersonal skills and the ability to work with others are also important.

Career Opportunities

An accountant could find a position in public accounting, management, private industry, governmental or other not-for-profit accounting, academia or forensic accounting. Therefore, the employment opportunities for an accountant are many and varied. In addition, some students use accounting as a pre-law program.

The most familiar professional designation in accounting is the CPA. Achieving this certification involves passing a comprehensive examination and meeting other requirements set by each state. CPAs provide auditing, tax and advisory services to businesses, other organizations and the general public.

Management accountants are employed by a single enterprise to perform services such as measuring and controlling costs or budgeting. These specialists may earn the Certified Management Accountant (CMA) certificate.

Internal auditors are concerned with determining whether the auditee is following prescribed organizational policies and procedures along with safeguarding organizational assets. The Certified Internal Auditor (CIA) is the professional designation of these accountants.

An accountant may also work in the area of governmental or not#for#profit accounting. Governmental accountants work for federal, state or local government agencies. The duties of governmental accountants include the control of tax revenues and expenditures. Not-for#profit organizations, such as charities and universities, also need the services of an accountant.

Forensic accounting is a rapidly growing area of accounting concerned with the detection, investigation and prevention of fraud and white-collar crimes. A Certified Fraud Examiner (CFE) is a specialist in the detection and/or deterrence of a wide variety of fraudulent conduct—from discovering employees or executives who misappropriate company assets to assisting investors who are defrauded in the course of commercial transactions.

Accountants also are employed in the academic sector to teach accounting courses, conduct research and write educational materials such as textbooks.

ACCOUNTING PRACTICUM (INTERNSHIP)

Accounting majors are able to gain experience at professional level jobs through the Accounting Practicum (Internship). Students usually take their Accounting Internship during the final two years of the program.

Students fulfill the three-credit practicum requirement through a semester-long, full-time work placement. Students must meet with their faculty advisor to arrange a practicum assignment prior to enrolling in the practicum through NDSU's Career and Advising Center.

Selective Admission

Students who wish to study accounting at NDSU enroll as pre-accounting majors in the College of Business for the first semester of their freshman year. Pre-accounting majors are then admitted into the major after completing the pre-major courses required for program admission (i.e., ENGL 120, COMM 110, MATH 144, ECON 201 or 202, and PSYC 111 or SOC 110) with at least a C or higher and earning a minimum 2.5 cumulative GPA. Transfer students with appropriate course work may be admitted directly into the major. Please see a College of Business professional advisor for more information.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Accounting

Department Information

- **Department Web Site:**
  www.ndsu.edu/business/programs/undergraduate/ (http://www.ndsu.edu/business/programs/undergraduate/)
- **Credential Offered:**
  B.S.
- **Sample Program Guide:**
  catalog.ndsu.edu/programs-study/undergraduate/accounting/#planofstudytext (http://catalog.ndsu.edu/programs-study/undergraduate/accounting/#planofstudytext)

Degree Requirements

Major: Accounting

Degree Type: Bachelor of Science (B.S.)
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.

3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †

UNIV 492		
Total Credits		**76**

1

ACCT 200 and 201 require a grade of B or better.

2

Take the other course not taken for the pre-major requirement.

3

Denotes Common Body of Knowledge (CBK) course.

4

Prerequisite for Accounting Practicum: ACCT 311 must be completed with a grade of C or better to take the accounting practicum.

Degree Requirements and Notes

- All courses for the pre-major and major require a grade of C or better.
- Students must earn a 2.50 institutional cumulative GPA to be admitted into the accounting major and to graduate with a degree.
- Students follow the published curricula for the accounting program of study from the semester/year of entrance in the College of Business to graduation provided enrollment at NDSU has not been discontinued for more than one year. Students who change their major are subject to meeting the curricular requirements in effect at the time the new major is declared.
- The CoB accepts a maximum of up to (but not including) 50% of upper-division (300-level and 400-level) business courses[1] required for degree completion, with a minimum grade of C[2]. All transfer courses are subject to approval by the course discipline chair or designated representative.
  - [1]Defined as courses with the following prefixes: ACCT, BUSN, ENTR, FIN, MGMT, MIS, MRKT, SCM
  - [2]Credits that do not qualify for degree completion will still be accepted as general credits towards graduation, within the restrictions defined by university policy.
- A letter grade must be earned in any course that fulfills a major requirement (with the exception of some practicum options).
- Students must be accepted to the accounting major prior to the completion of the last 30 credits in 300 and 400 level CoB courses.
- Of the credits completed in residence at least 30 credits must be in 300-400 level CoB courses.
- Students are not eligible to pursue a Business Administration minor with this major.
- For multiple majors within the CoB, at least 15 unique credits of 300-400 level CoB courses must exist between the majors.

Minor Requirements

Minor: Accounting

Required Credits: 19

Minor requirements

Code	Title	Credits
Requirements		
ACCT 200	Elements of Accounting I *	3
ACCT 201	Elements of Accounting II *	3
ACCT 311	Intermediate Accounting I	4
ACCT 320	Cost Management Systems	3
ACCT 300-400 Level Courses		**6**
Courses may be chosen from any 300-400 level accounting course with the exception of ACCT 397 and ACCT 413.		
Total Credits		**19**

*
Requires a grade of 'B' or better in order to enroll in 300-400 level ACCT courses.

Minor Requirements and Notes

- To be accepted into the minor program, students must have a 2.50 institutional cumulative GPA.
- To complete a minor, students must earn at least a 2.50 GPA that is based on the courses used to satisfy the minor requirements. Courses may not be taken pass/fail. Students must also earn a grade of 'C' or better in all courses required for the minor; the only exception is ACCT 200 and ACCT 201, which require grades of 'B' or better.
- If the cumulative GPA falls below the 2.50 after acceptance into the program, the student will not be allowed to register for the College of Business courses until the cumulative GPA returns to 2.50 or above.
- Students are subject to the minor requirements in effect during the year in which the minor was approved.
- Minors must satisfy all course prerequisites.
- Approval for a minor does not guarantee enrollment in specific courses.

Advertising and Design Certificate

Department Information

- **Department Web Site:**
  www.ndsu.edu/communication/ (http://www.ndsu.edu/communication/)
- **Credential Offered:**
  Undergraduate Certificate
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/advertising-design/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/advertising-design/)

NDSU's interdisciplinary Advertising and Design Certificate allows students to customize their advertising education to meet industry trends by combining courses in Communication, Visual Arts, Retail, Business, and English. This certificate enhances a student's skills training for a career in integrated marketing communications, such as graphic design, advertising creative, advertising account planning, social media messaging, visual merchandising, and many other advertising and design-related fields.

Advertising and Design Certificate

Program Notes:

- Students are required to take at least 6 credits outside of their major if their major is represented in the course offerings; at this time communication students are the only students affected by this requirement.
- The target market majors for this certificate are in Communication, Visual Art/Design, Business, English and Apparel Retail Merchandising and Design.

Aerospace Studies

Department Information

- **Department Web Site:**
  www.ndsu.edu/afrotc/ (http://www.ndsu.edu/afrotc/)
- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/aerospace-studies/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/aerospace-studies/)

Air Force Reserve Officer Training Corps (AFROTC) is a program that prepares you to become an Air Force or Space Force Officer. It's a challenge. It's an opportunity. It's a head start on a lifetime of success within the Air Force or Space Force and everything you choose to do. AFROTC provides you with a challenging program to hone your time management, physical fitness and analytical skills - and helps you push yourself to achieve your goals.

What is the Purpose of Air Force ROTC?

The AFROTC (Aerospace Studies) mission is to commission second lieutenants through the campus program offered at NDSU. Students enrolled in AFROTC earn college credits that can be used to fulfill elective requirements or to obtain a minor in Aerospace Studies. All full-time students (including graduate students) can pursue an Air Force or Space Force commission.

What is an Air Force or Space Force Commission?

An Air Force or Space Force commission is your ticket to work in top professional and management jobs in the United States Air Force or Space Force. Only college graduates can obtain an Air Force or Space Force commission, which is granted by the President of the United States.

Are You Interested in Flying?

The Air Force owns the most modern aircraft in the world. Those who meet the demanding physical, medical and academic qualifications are selected as pilot candidates and will attend Air Force pilot training at their first active duty assignment.

Are You Interested in Space?

The Space Force controls a vast assortment of satellites and other ground based architecture to meet the demanding requirements of space based systems. Those who meet the physical, medical and academic qualifications are selected as Guardians and will attend their respective space force training at their first active duty assignment.

Does a Technical or Management Career Interest You?

AFROTC graduates have opportunities in more than 250 specialized fields in which their education and training can be utilized. These specialties include physicists, space scientists, journalists, doctors, dentists, meteorologists, engineers, security and intelligence specialists, nurses and many others.

The General Military Course

The first two years of this four-year program begins with the General Military Course (GMC). It takes a time commitment of about five to six hours a week. Here, you'll learn the mission and structure of the Air Force and Space Force and take a look at what military life is like. You will study the strategies, doctrine and missions of aerospace power from early ballooning to today's use of space vehicles. You will learn about Air Force and Space Force career opportunities, educational benefits and the life and work of an Air Force or Space Force officer.

The Professional Officer Course

The Professional Officer Course (POC) is the second half of our four-year program and is taken during your junior and senior years. You will begin this course with an in-depth look at leadership styles and their applications. You will examine a broad range of American domestic and international military relationships and the environmental context in which American national security policy is developed and carried out. This class, combined with Leadership Laboratory, is where your leadership and management theories are applied. This is a competitive course and not all cadets who apply get in. Your performance during the GMC program is the driving factor of your selection into the POC program.

Scholarship Money?

AFROTC college scholarships are awarded to the best-qualified students and range in length from one to five years. These grants cover the cadet's tuition, incidental lab fees and up to $900 a year for textbooks. In addition, cadets receive a tiered monthly allowance. For example, cadets enrolled in the Professional Officer Corps (POC) receive $450 per month during their junior academic year and $500 per month during their senior academic year.

Obligation?

If you are not on an AFROTC scholarship, you incur *no obligation* to the Air Force or Space Force during your freshman and sophomore years of school. You are able to keep all your options open while you take an in-depth look at the Air Force and Space Force and the opportunities they have to offer. The length of your commitment upon graduation is dependent on the career you pick when entering active duty. Those service obligations are typically 4 years for non-flying officers and longer for those who chose to serve in an aircrew career field.

Guaranteed Job/Salary/Benefits

Students who successfully commission into the Air Force or Space Force can expect the following as soon as they enter the Active Duty work force:

- Highly competitive salary, starting at $55,000/year with guaranteed raises every two years
- Tax-free housing and food allowance
- 30 days of paid vacation a year
- unlimited, full pay sick leave

- full medical, dental and vision coverage at no cost
- competitive retirement package

For more information on Air Force ROTC admission requirements and career opportunities, please contact the Unit Admissions Officer at 701-231-8186.

- **Credential Offered:**
  Certificate
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/aging-studies/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/aging-studies/)

Throughout the world, people are living longer than ever before. Aging Studies is a growing field that is relevant to many careers in varying disciplines, and professionals with credentials in this area are in high demand. The Aging Studies undergraduate certificate enables students to learn more about current issues that affect adults as they age. Required courses cover physical, cognitive, social, financial, psychological, societal, and cultural aspects of aging. Students will learn foundational information, as well as how to apply it in real-world contexts to improve quality of life for older adults and their families.

Agribusiness

Department Information

- **Department Web Site:**
  www.ndsu.edu/agecon/ (http://www.ndsu.edu/agecon/)
- **Credential Offered:**
  B.S.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/agribusiness/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/agribusiness/)

The agribusiness industry accounts for nearly one-fifth of the U.S. gross national product and employs close to one-fourth of the U.S. labor force. There is a continuing strong demand by agribusiness firms, ranging from large multinational corporations to emerging food manufacturing and input supply firms, for highly qualified and better trained employees in both management and the agricultural sciences. Students who have mastered economic and business concepts along with agricultural sciences do extremely well in finding rewarding careers following graduation.

The Program

The agribusiness program at North Dakota State University recognizes the importance of agribusiness to the nation's economy and the long tradition of the department in training the industry's leaders. The agribusiness major has several main components.

- Students are exposed to a range of concepts and methods useful in agribusiness decision-making in each of three areas of specialization: finance, management and marketing. Equally important, agribusiness graduates will master problem solving and effective communication skills to face challenges encountered in their professional careers. Agribusiness students will have the opportunity to take classes at NDSU's state-of-the-art commodity trading room and learn to utilize the room's information technologies.
- Agribusiness students are required to participate in an internship during their studies. Employers continue to place high importance on work-related experience when they evaluate potential employees. Employers know that all NDSU agribusiness graduates have gained valuable work experience through the required internship.
- Collaboration with the College of Business leads to concurrent satisfaction of a minor in one of the business fields. A minor in accounting, business administration, logistics management, or entrepreneurship is required.

The Department of Agribusiness and Applied Economics also offers an agricultural economics major. Students should refer to the Agricultural Economics fact sheet. Students in economics or other majors outside the department may earn a minor in agribusiness.

Career Opportunities

Agribusiness graduates find career openings in many areas of specialization, including positions as international and domestic grain traders, elevator managers, sales representatives with chemical, seed, feed and fertilizer companies, analysts for railroads, transport and renewable energy companies, logistics managers, finance and credit officers, food company managers, experts with the foreign agriculture service, and analyst positions in market development organizations. In addition to a rewarding set of career opportunities following graduation, many students choose to continue with

graduate studies to further develop their analytical and management skills. Although many graduates find successful careers in North Dakota and Minnesota, others pursue careers throughout the nation and the world.

The Faculty

The department enjoys a growing international reputation for its excellent staff in agribusiness research and teaching. Faculty specialties include sales, finance, food marketing, food safety, industrial strategy, and commodity trading.

Agribusiness faculty expertise is complemented by other departmental faculty specializing in farm management, natural resource and environmental economics, and economic development. The quality of the faculty has been recognized by numerous awards for teaching and research excellence at both the state and national levels.

Financial Aid and Scholarships

Several $500 to $1,000 scholarships are available to outstanding freshmen entering the program each fall semester. Scholarships also are available to transfer students and students already in the agribusiness program at NDSU.

The department annually awards over $140,000 in scholarships (ranging from $500 to $12,000) to agribusiness and agricultural economics majors.

The College of Agriculture, Food Systems, and Natural Resources awards scholarships each year. For more information on scholarships, go to: https://www.ndsu.edu/admission/scholarships/.

Student loan, grant and work-study information is available from the Office of Financial Aid and Scholarships or One Stop.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Degree Requirements

Major: Agribusiness

Degree Type: Bachelor of Science (B.S.)
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	

ENGL 120	College Composition II

*****

Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†

General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Code	Title	Credits
Core Courses for Agribusiness:		
AGEC 242	Introduction to Agricultural Management	3
AGEC 244	Agricultural Marketing	3
AGEC 246	Introduction to Agricultural Finance	3
AGEC 339	Quantitative Methods & Decision Making	3
AGEC 344	Agricultural Price Analysis	3
AGEC 346	Applied Risk Analysis	3
AGEC 397	Fe/Coop Ed/Internship	1-3
AGEC 445	Agribusiness Industrial Strategy (capstone)	3
ECON 201	Principles of Microeconomics (May satisfy general education category B)	3
ECON 202	Principles of Macroeconomics (May satisfy general education category B)	3
ECON 341	Intermediate Microeconomics	3
ECON 343	Intermediate Macroeconomics	3
Accounting:		
ACCT 200	Elements of Accounting I	3
ACCT 201	Elements of Accounting II	3
Agriculture Science & Technology:		**9**
Complete nine (9) credits from two (2) areas in the College of AFSNR other than Agribusiness & Applied Economics. (Includes: ASM, ANSC, ABEN, CFS, ENT, MICR, NRM, PPTH, PLSC, RNG, SOIL & VETS.) EXCEPTION - All 9 credits may be in the same area if a student completes a minor from within the College of AFSNR.		
Areas of Specialization: Select one of the Areas of Specialization listed below.		**6**
Additional Requirements for Agribusiness		
AGRI 150	Agriculture Orientation	1
ECON 189	Skills for Academic Success	1
TL 116	Business Software Applications	3
Communication Requirement: Select one of the following:		**3**
COMM 212	Interpersonal Communication	
COMM 216	Intercultural Communication (Gen Ed B/D)	
COMM 308	Business and Professional Speaking	
COMM 315	Small Group Communication	
COMM 383	Organizational Communication I	
Math Requirement:		
MATH 144	Mathematics for Business (or any higher math)	4

STAT 330	Introductory Statistics (May satisfy general education category R)	3
STAT 331	Regression Analysis	2 or 3
or ECON 410	Econometrics	
Minor Requirement		**16-24**
In addition to the requirements for the major in Agribusiness, students must complete a minor in Accounting (19 cr), Business Administration (24 cr), Entrepreneurship (16 cr), Logistics Management (19 cr), or Banking (18 cr).		
Total Credits		**88-99**

Areas of Specialization: Select one

Code	Title	Credits
Finance - 6 Credits		
AGEC 446	Agribusiness Finance	3
Select one of the following:		3
AGEC 347	Principles of Real Estate	
AGEC 356	Advanced Agricultural Lending	
AGEC 474	Cooperatives	
ECON 324	Money and Banking	
ECON 402	Economics of Entrepreneurship	
ECON 470	Public Economics	
Total Credits		**6**

Code	Title	Credits
Management - 6 Credits		
MGMT 320	Foundations of Management	3
Select one of the following:		3
AGEC 474	Cooperatives	
AGEC 375	Applied Agricultural Law	
AGEC 378	Introduction to Transportation & Logistics	
AGEC 472	Advanced Logistical Analysis	
ECON 402	Economics of Entrepreneurship	
ECON 472	International Trade	
Total Credits		**6**

Code	Title	Credits
Marketing - 6 Credits		
AGEC 444	Advanced Commodity Trading	3
Select one of the following:		3
AGEC 343	Introduction to Commodity Trading	
AGEC 350	Agrisales	
AGEC 474	Cooperatives	
AGEC 450 & AGEC 451	National AgriMarketing Association (NAMA) I and National AgriMarketing Association (NAMA) II	
ECON 402	Economics of Entrepreneurship	
ECON 472	International Trade	
Total Credits		**6**

1

AGRI189 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take AGRI 189.

Degree Requirements and Notes

- Students must earn, at least, a 2.00 cumulative GPA that is based on the courses that satisfy major requirements.

Minor Requirements

Minor: Agribusiness

Required Credits: 18

Minor Requirements

Code	Title	Credits
Required Courses		
ECON 201	Principles of Microeconomics	3
Select two of the following:		6
AGEC 242	Introduction to Agricultural Management	
AGEC 244	Agricultural Marketing	
AGEC 246	Introduction to Agricultural Finance	
Elective Courses: A minimum of 9 credits from the following:		**9**
ECON 341	Intermediate Microeconomics	
AGEC	Any AGEC prefix courses numbered 242 or higher (excluding AGEC 397 and AGEC 496)	
Total Credits		**18**

- A minimum of 8 credits must be taken at NDSU.
- Students must earn a minimum 2.00 GPA for the minor requirements.
- Minor requirements are to be met with didactic courses only.
- This minor is not available to Agricultural Economics majors.

Agricultural and Biosystems Engineering

Department Information

- **Department Web Site:**
  www.ndsu.edu/aben/ (http://www.ndsu.edu/aben/)
- **Credential Offered:**
  B.S.A.B.En.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/agricultural-biosystems-engineering/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/agricultural-biosystems-engineering/)

The Agricultural and Biosystems Engineering (ABEN) program prepares students for careers in:

- Machine Systems Engineering – for mechanical equipment and power units such as tractors and other equipment
- Process Engineering – for food, feed, fiber, biofuels, and other bioproducts
- Natural Resources and Environmental Systems Engineering – for soil, water, air, waste, and other areas
- General ABEN - encompasses a student-selected mix of the above areas

Graduates design machines, processes, and natural resource systems. They solve problems using mathematics and applying physical, biological and engineering sciences. Agricultural and biosystems engineers address society's challenges in food, energy and water.

The Program

Agricultural and Biosystems Engineering integrates engineering topics, engineering design and biological sciences. Agricultural and biosystems engineers are uniquely qualified to use their knowledge of mathematics, biological and physical sciences, and engineering principles to solve problems relating to the:

- design, testing and production of machine systems
- production, handling and processing of crops and biological materials for food, feed, fiber and fuel
- building environmental design
- utilization and conservation of natural resources
- protection of the environment

A major in Agricultural and Biosystems Engineering can serve a broad range of career interests and can provide excellent career opportunities for students from diverse backgrounds.

The Bachelor of Science in Agricultural and Biosystems Engineering program is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org, under the commission's General Criteria and Program Criteria for Agricultural and Similarly Named Engineering Programs, and Program Criteria for Biological and Similarly Named Engineering Programs. .Agricultural and Biosystems engineering students are well-qualified for and encouraged to take the national Fundamentals of Engineering examination, which is the first step in the process of registration as a professional engineer.

ABEN class size is usually fewer than 25 students, which allows for close faculty-student interactions. Student advising for classes and career planning takes place in one-to-one meetings between a student and her or his faculty or professional adviser, and complemented by a student support professional in the department.

Internships

Although not required by the curriculum, students are strongly encouraged to take advantage of paid internships, which allow students to spend a summer or, more typically, a summer and a semester doing engineering work. Students can earn up to 3 credits of engineering or program electives related to internships. There are also opportunities to work as a research assistant in projects conducted by faculty. The intern and research assistant positions help students gain hands-on experience in engineering and open doors for employment upon graduation.

Career Opportunities

Position titles of graduates for both concentrations may include design engineer, test engineer, project engineer, plant engineer, quality control engineer, process engineer, energy adviser, consulting engineer and environmental engineer. Starting salaries are among the highest of all college graduates and are comparable to those in other fields of engineering. Recent starting salaries range from $55,000 to $75,000 per year with an average of $60,000 per year. The placement of graduates has been at or near 100 percent for many years.

Career opportunities for graduates in agricultural and biosystems engineering are numerous and diverse. Graduates are employed by companies and agencies that:

- design, develop, test and manufacture agricultural power and machine systems;
- develop electrical and electronic applications for agricultural processing, and natural resources problems.
- convert bio-based resources to food, feed, fuel and other renewable products;
- design and manage irrigation, drainage, and agricultural waste management systems.

Graduates with an agricultural and biosystems engineering degree may also pursue an advanced degree in engineering, medicine, veterinary medicine, business, management or law.

Scholarships

Several Departmental, College of Engineering, and NDSU scholarships are competitively awarded to students in the ABEN program each spring. There are scholarships for freshmen who apply to the ABEN program. The departmental scholarships range in value from about $500 to $4,500. Scholastic achievement, financial need and extracurricular activities are considered. Scholarships are provided by industry, faculty and alumni.

Extra-Curricular Activities

Varied extracurricular programs are available to students majoring in Agricultural and Biosystems Engineering. Students are involved with the International ¼ Scale Tractor Student Design Competition, Bison Antique Tractor Club, and the Society of Women Engineers.

A Well-Equipped Teaching Facility

Laboratories are furnished with equipment used in industry and research. Computer labs have specialized software used in engineering such as Creo, MATLAB, ANSYS, ArcGIS, and AutoCAD. Most courses include labs where students get hands-on experience with data acquisition systems, analytical tools, biomaterials handling and processing equipment, environmental measurement equipment, controllers, and analog and digital test equipment.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. ME 442	Machine Design I (Machinery Focus) [3]
PAG 115	Introduction to Precision Agriculture (Machinery/Natural Resource Focus)
PAG 315	Electronic Systems in Precision Ag (Machinary Focus)
PAG 454	Applications of Precision Agriculture (Machinery Focus)
PLSC 110	World Food Crops (Processing/Natural Resource Focus)
PLSC 225	Principles of Crop Production (Processing/Natural Resource Focus)
SOIL 210	Introduction to Soil Science (Natural Resource Focus)
SOIL 410	Soils and Land Use (Natural Resource Focus)
Total Credits	**105**

1

ABEN 348 - AG Tech Exp (1 add'l cr.) may be used as a Program Elective.

2

ABEN 496 - Field Exp./Internship (1 - 3 cr.) may be used as a Program Elective. A maximum of three credits of ABEN 496 Field Exp./Internship may be counted towards degree requirements.

3

Students must select at least 3 cr. of upper-division College of Engineering courses to satisfy the 15 cr. Program Elective requirement.

Degree Requirements and Notes

SUGGESTED FOCUS AREAS: Consult with adviser when making selections.

- **Machinery Focus** - Select electives with emphasis on machine, power, robotic/autonomous, and electrical/electronic systems.
- **Natural Resource Focus** - Select electives with emphasis on areas that contribute to solving problems in environmental engineering, natural resources management, hydrology, irrigation, watershed management, and waste management.
- **Processing Focus** - Select electives with emphasis on combining engineering, biological, and physical sciences in the application of engineering principles to handling and processing of biomaterials for food and non-food products.
- **General Focus** - Select electives from any of the above focus areas. Includes courses in structural and environmental aspects of agricultural facilities.

Degree Requirements for the Accelerated M.S. Program in Agricultural and Biosystems Engineering

Students pursuing an accelerated master's degree in ABEN must complete the following requirements:

- 30 credits after the B.S is required. However, a maximum of 15 graduate credits earned during the combined/accelerated degree program may also be counted toward the graduate degree.
- 20-24 credits are from didactic course work, while 6-10 credits are typically devoted for a master's thesis based on research
- A minimum of 6 credits of NDSU ABEN courses numbered 601-689 and 700-789 is required.
- ABEN Graduate Seminar (ABEN 790).

Agricultural Communication

Department Information

- **Department Web Site:**
  www.ndsu.edu/communication/ (http://www.ndsu.edu/communication/)
- **Credential Offered:**
  B.A.; B.S.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/agricultural-communication/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/agricultural-communication/)

Agricultural Communication is one of four programs in the Department of Communication. This course of study is for students who have strong interests in both agriculture and communication. Our graduates work as communication specialists for a variety of agribusinesses. Students might work for a livestock or grain association, as an editor of a specialized publication, or as an advocate for a farming or ranching organization.

Why Choose a Major in the Department of Communication?

Our students pursue degrees in Communication because they are interested in fast-paced careers where every day brings something new. They want to make a difference in the world while doing something they love – whether that's reporting breaking news, designing advertisements, running social media campaigns, promoting organizations, or leading others in the workplace.

You will get:

- **More time to explore your interests.** We give you the first year to explore your options, making it possible to switch between **four different COMM majors** without extending your graduation timeline.
- **Guidance on choosing a career.** In COMM 101: Majors and Careers in Communication, you will meet others in your major, learn more about possible careers, and find campus resources that help you achieve your professional goals.
- **Hands-on learning.** You'll have multiple ways to apply what you are learning through course projects, consulting for local organizations, and participating in national competitions.
- **Built-in communities.** You can connect with other students - while building your resume - through the **eight student organizations** affiliated with our department.
- **Professional experience.** We help you find and benefit from internships in your field through our relationships with local and regional employers.

Agricultural Communication Major

The agricultural communication major combines the resources and expertise of two units, Communication and Agriculture, to produce trained communicators who can explain science, technologies, and complex agricultural issues to diverse audiences. Students will complete an applied capstone course in their final semester. Students majoring in agricultural communication may earn a Bachelor of Science degree (with a recommended minor in the College of Agriculture, Food Systems, and Natural Resources) or a Bachelor of Arts degree (with intermediate-level language proficiency).

Admission to the Major

Students are admitted to the agricultural communication major after completing 18 credits of pre-communication courses: COMM 110, COMM 112, COMM 114, COMM 212, COMM 220, and ENGL 120.

Internship Requirement

Internships offer practical experience for agricultural communication students. Three credits (120 hours) of field experience are required for the major, and many students complete more than one internship. Students have interned with agricultural administrators, private agencies and firms, and governmental officials, among others. Internships often lead to jobs.

Career Opportunities

Coursework in the agricultural communication major prepares students for careers in agricultural and scientific industries, agencies and operations that include scientific writing, agricultural promotion and consulting, and agricultural planning and assessment. The coursework emphasizes written and oral communication skills and prepares students to communicate in meaningful and effective ways to a variety of audiences.

Extra-Curricular Activities

Students majoring in agricultural communication are encouraged to be active members of Agricultural Communicators of Tomorrow and/or the Saddle and Sirloin Club. They may also be interested in joining Advertising Club or the department's chapter of the Public Relations Student Society of America (PRSSA). NDSU has two honoraries for top students majoring in a degree program offered by the Department of Communication. Pi Kappa Delta is a national honor fraternity for students involved in human communication activities. Lambda Pi Eta is a national honorary for communication majors with high academic achievement.

High School Preparation

A well-rounded high school education with experiences in high school music, forensics, theatre, journalism, FFA, or scouting serves as good preparation for the major in agricultural communication. Students with interests in science and art, business and service, and publicity and promotion will find a major in this department to be a good fit.

Scholarships

The Department of Communication awards a number of scholarships to students who excel in academics and who have demonstrated career potential. Applications are due by March 1. Visit the department website (https://www.ndsu.edu/communication/scholarships/) for details.

The Faculty

Faculty members in the Department of Communication are dedicated teachers, scholars, and practitioners who are committed to providing high-quality courses, hands-on learning experiences, and opportunities for undergraduate research.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Agricultural Communication

Degree Type: B.A. or B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	

Upper Division Writing †	
Category R: Quantitative Reasoning †	**3**
Category S: Science and Technology †	**10**
Category A: Humanities and Fine Arts †	**6**

COMM 375	Principles of Strategic Communication	
COMM 465	Convergence Media	
COMM 470	Research for Strategic Communication	
COMM 485	Risk and Crisis Communication	
Total Credits		**21**

Minor Requirements and Notes

- Students must earn a minimum GPA of 2.75 in courses applied to the minor.
- A minimum of 9 credits must be taken at NDSU.

Agricultural Economics

Department Information

- **Department Web Site:**
  www.ndsu.edu/agecon/ (http://www.ndsu.edu/agecon/)
- **Credential Offered:**
  B.S.
- **Official Program Curriculum:**

catalog.ndsu.edu/undergraduate/program-curriculum/agricultural-economics/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/agricultural-economics/)

Agricultural economics combines the technical aspects of agriculture with the business aspects of management, marketing, and finance. Students are prepared for a wide variety of exciting careers in the marketing of commodities sold and inputs purchased by agricultural producers; agricultural finance; and management of agribusinesses, farms and ranches. In addition, many graduates pursue successful careers in government service, economic development, commodity promotion and agricultural policy analysis.

The Program

The agricultural economics program emphasizes decision making, technical expertise and communication with a focus on agriculture and the food industry. Students are trained to be decision makers through course work and practical experience in agriculture, analytical and communication skills, team building, economic theory and agricultural policy.

The agricultural economics program is flexible. Students may complement required courses with classes from within the Department of Agribusiness and Applied Economics, as well as from other programs across campus. Students planning careers in production agriculture are encouraged to enroll in courses in crop and livestock sciences, precision agriculture, agricultural systems or other production-oriented courses within the college. Students wanting careers in the food industry may select courses in food science and food safety, transportation or business. Students wishing to work in agricultural education, communication or extension can add courses in production agriculture, education or communication to their programs. By working with their academic advisor, agricultural economics students can identify courses that allow them to pursue interests in renewable energy, risk management, rural economic development, finance and natural resource management. Agricultural Economics students will have the opportunity to take classes at NDSU's state-of-the-art commodity trading room and learn to utilize the room's information technologies. Regardless of student selection of elective courses, the agricultural economics program contains a common core of classes introducing students to economic theory, farm management, agricultural finance, crop and livestock marketing, quantitative methods, and laws and policies important to agriculture.

The Department of Agribusiness and Applied Economics also offers major and minor programs in agribusiness and economics. Students should refer to the agribusiness and economics fact sheets.

The Faculty

The department has 20 faculty members involved in teaching, research and extension. Our faculty have received numerous prestigious teaching and research awards, including the Burlington Northern Foundation Faculty Achievement Award; the Fargo Chamber of Commerce Distinguished Professorship Award; the Chancellor's Award for Academic Leadership; the Western Agricultural Economics Association's Outstanding Educator Award; the Premier Forecaster Award; the Eugene R. Dahl Excellence in Research Award, Senior Faculty; and the Teaching Award of Merit from the National Association of Colleges and Teachers of Agriculture. Faculty expertise varies across a wide range of specialties, including agricultural marketing, production, natural resource management, economic development, trade, finance, cooperatives and agricultural law.

Career Opportunities

Agricultural economics graduates have become loan officers; managers of farm supply, equipment firms and grain elevators; sales representatives with chemical, seed, feed and fertilizer companies; economists with state and federal agencies; and commodity merchandisers. About 30 percent of the graduates choose to farm and ranch. While many graduates remain in North Dakota or Minnesota, others begin careers throughout the nation and the world.

Financial Aid and Scholarships

Several $500 to $1,000 scholarships are available to outstanding freshmen entering the program each fall semester. Scholarships also are available to transfer students and students already in the agribusiness program at North Dakota State University.

The department annually awards over $140,000 in scholarships (ranging from $500 to $12,000) to students majoring in agribusiness and agricultural economics.

The College of Agriculture, Food Systems, and Natural Resources awards scholarships each year. For more information on scholarships, go to: https://www.ndsu.edu/admission/scholarships/.

Student loan, grant and work-study information is available from the Office of Financial Aid and Scholarships or One Stop.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. COMM 383	Organizational Communication I	
Agribusiness & Applied Economics Electives:		9
Select a minimum of 9 credits of 300-400 AGEC or ECON electives		
Agriculture Science & Technology: [3]		9
Complete 9 credits from 2 other areas in the College of AFSNR other than Agribusiness & Applied Economics. (This includes courses with the following prefixes: ASM, ANSC, ABEN, CFS, ENT, MICR, NRM, PPTH, PLSC, RNG, SOIL & VETS.)		
Total Credits		**74-78**

1

Students are advised to consider which capstone course they will take by the end of their second year. This planning allows time to complete the required prerequisites for the capstone prior to the senior year.

2

AGRI150 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take AGRI 150.

3

Exception to the 9 credits of Agriculture Science & Technology - Students do not need to complete these 9 credits if the student completes a minor from the College of Agriculture, Food Systems, and Natural Resources.

Degree Requirements and Notes

- Students must earn, at least, a 2.00 cumulative GPA that is based on the courses that satisfy major requirements.
- Students majoring in Agricultural Economics may not pursue minors in either agribusiness or economics.

Agricultural Education

Department Information

- **Department Web Site:**
  www.ndsu.edu/education/ (http://www.ndsu.edu/education/)
- **Credential Offered:**
  B.S.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/agricultural-education/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/agricultural-education/)

The agricultural education major has two pathways to prepare future educators:

A) **Teacher Licensure Pathway**- prepares candidates to teach at the middle, secondary, post-secondary and adult levels in agricultural education programs. North Dakota State University is designated by the State Board of Career and Technical Education as the recognized institution for preparing teachers of agricultural education.

B) **Training and Development Pathway** - prepares candidates to develop and deliver educational programming in corporate training settings, Extension, and non-profit organizations. Students will learn to work with youth and adults in diverse educational environments. This pathway and program is unique to North Dakota State University.

The Program

The agricultural education major is designed to combine general studies, preparation for effective teaching and learning, and a broad background in the various disciplines in agriculture. Courses in agricultural economics, agricultural systems management, animal and range science, plant sciences, horticulture, and soil science provide the necessary background in modern agriculture. A wide array of elective courses are also available in agriculture content areas.

Professional Education Courses

The Agricultural Education Teacher Licensure program is a collaboratively delivered program between the Department of Youth Development, Family, and Agricultural Education in the College of Agriculture, Food, Systems, and Natural Resources as well as the School of Education in the College of Arts and Sciences. Teacher candidates may enroll in the 200 and 300-level professional education courses (H&CE and EDUC) before being formally admitted to School of Education (SOE) coursework. Prior to enrolling in the 400-level EDUC courses, teacher candidates must complete the application for admission to the SOE. Requirements for admission can be found at the NDSU Teacher Education (https://www.ndsu.edu/ted/admission/undergraduate/) website.

Internship Capstones

Each of the pathways in Agricultural Education major require an internship as the capstone experience to the degree. In the Teacher Licensure Pathway, that internship is Student Teaching. During Student Teaching, teacher candidates apply the knowledge and skills acquired in their college courses to real-world classrooms under the supervision of experienced agricultural educators in middle or secondary schools.

In the Training and Development Pathway, the internship is typically within the corporate setting or within an Extension setting. These candidates will also apply content and teaching and learning skills in their respective setting. They will develop and evaluate educational programming in a real-world setting, impacting the lives of others.

Student Advisement

Students are assigned to one of the faculty members in agricultural education who will work closely in program planning and in other ways to advise and assist them. Students are encouraged to seek their advisors' help whenever needed.

LICENSURE

Upon completing this program, teacher licensure candidates are eligible for certification to teach agricultural education in most states. Our program is accredited by the Council for the Accreditation of Educator Preparation (CAEP) and approved by the North Dakota Education Standards and Practices Board (ESPB).

Career Opportunities

Agriculture Teachers continue to be in high demand around the country. Most agricultural education teachers in North Dakota are on extended contracts and receive stipends for serving as an FFA advisor. The industry of agriculture is constantly looking for people with broad content knowledge and valuable people skills. No matter the pathway in Ag Ed, graduates will find themselves in high demand.

Ag Ed Society

The purpose of the Agricultural Education Society (https://myndsu.ndsu.edu/organization/ndsuagedsociety/) is to foster professional development, service, and community building among students, especially those in Agricultural and Extension Education. We aim to provide a place for students passionate for Agricultural Education to share their passion and grow professionally and personally.

Financial Aid and Scholarships

Students seeking financial aid should contact the Office of Financial Aid and Scholarships or One Stop. To inquire about scholarship opportunities, contact the Office of Admission. The College of Agriculture, Food Systems, and Natural Resources and the North Dakota FFA Foundation offer scholarships at $500-$1,000 or more.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Agriculture Education

Degree Type: B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Degree Requirements and Notes

- See the Agricultural Education website (https://www.ndsu.edu/programs/undergraduate/agricultural-education/) for admission requirements for the Ag Ed Teacher Certification pathway.
- Courses taken with a Pass/Fail grading basis may not be used to satisfy any degree requirement.
- A grade of 'C' or better is required in all required EDUC and H&CE courses.
- To be placed in student teaching, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required.
- To exit the program, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required, as well as completing the Praxis Subject test and the Principles of Learning and Teaching test.

Agricultural Sciences

Department Information

- **Department Web Site:**
  www.ag.ndsu.edu/academics/ (http://www.ag.ndsu.edu/academics/)
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/agricultural-sciences/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/agricultural-sciences/)

The Agricultural Sciences (Ag Sci) program is designed to serve students who wish to pursue a college education in the broad area of agriculture. The Ag Sci program allows students to tailor a degree to meet their career objectives in the broad Agriculture, Food Systems, and Natural Resources (AFSNR) industries. In addition, transfer students from two#year institutions find the greater flexibility of the Agricultural Sciences major useful in obtaining a bachelor's degree.

THE PROGRAM

Agricultural Sciences provides a broad-based program in Agriculture, Food Systems, and Natural Resources for students who wish to have a diversified program of study. In addition, the Agricultural Sciences Program can serve as an exploratory program for students who are undecided about the majors available in the College of Agriculture, Food Systems, and Natural Resources (https://www.ndsu.edu/agriculture/academics/academic-units/).

Students receive broad exposure to three, student-selected AFSNR emphasis areas from a choice of 10 emphases. The flexibility of the curriculum is a point of interest for many students. Several students transferring from two-year institutions have found that they could complete the requirements for a bachelor's degree in Agricultural Sciences more quickly than other majors.

ONLINE AVAILABILITY

Students can earn their BS in Ag Sci entirely online as well through a more prescribed curriculum. All credits can be earned at a distance.

FACULTY AND FACILITIES

Agricultural Sciences students are advised by faculty in the College of Agriculture, Food Systems and Natural Resources.

FINANCIAL AID AND SCHOLARSHIPS

Loans, scholarships, grants, and work-study are available through the Office of Financial Aid and Scholarships. Students requiring financial assistance should contact the Office of Financial Aid and Scholarships or One Stop directly. In addition, the College of Agriculture, Food Systems, and Natural Resources has several scholarships available for outstanding students based primarily on academic performance. Contact the Office of the Associate Dean, College of Agriculture, Food Systems, and Natural Resources for information and application forms.

EXTRA-CURRICULAR ACTIVITIES

Students are highly encouraged to become active members in at least one student organization, several of which are sponsored by the academic departments in the College of Agriculture, Food Systems, and Natural Resources.

CAREER OPPORTUNITIES

Employment opportunities for students in Agricultural Sciences remain strong and are similar to those of other production agriculture majors. Generally, the demand for graduates from the College of Agriculture, Food Systems, and Natural Resources exceeds the number of available graduates. Students can greatly enhance their employ-ability by obtaining at least one summer internship during their formal education.

NRM 401	Urban-Ecosystem Management	
NRM 402	River and Stream Resource Management	
NRM 420	Sustainable Scenarios in Natural Resources Management	
NRM 421	Environmental Outreach Methods	
NRM 431	National Environmental Policy Act and Environmental Impact Assessment	
NRM 453	Rangeland Resources Watershed Management	
NRM 454	Wetland Resources Management	
NRM 456	Ecological Restoration	
SOIL 264	Natural Resource Management Systems	
SOIL 410	Soils and Land Use	
Total Credits		**12**

Code	Title	Credits
Plant Food Production and Safety Emphasis Area		
MICR 100	Famine, Plague, and Cheese. Microbes: the cause and solution to the world's problems	3
MICR 453	Food Microbiology	2
Select 7 credits from the following:		7
ASM 323	Post-Harvest Technology	
CFS 370	Food Processing I	
CFS 450	Cereal Technology	
CFS 452	Food Laws and Regulations	
CFS 460	Food Chemistry	
CFS 462	Food Ingredient Technology	
CFS 472	Cereal and Food Fermentation	
CFS 473	Food Safety	
MICR 453L	Food Microbiology Laboratory	
Total Credits		**12**

Degree and Major Notes

- Courses cannot be used to fulfill more than one emphasis
- Classes offered in the emphasis may require additional prerequisites; consult an advisor to plan accordingly.
- Classes offered in the emphasis areas and electives may be offered on-campus only or available via distance education. See the semester schedule for a listing of online classes.

Animal Science

Department Information

- **Department Web Site:** www.ndsu.edu/agriculture/academics/academic-units/animal-sciences (http://www.ndsu.edu/agriculture/academics/academic-units/animal-sciences/)
- **Credential Offered:**

B.S.; Minor

- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/animal-science/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/animal-science/)

The animal science major at North Dakota State University encompasses physiology, nutrition, genetics, reproduction, marketing, management and husbandry of livestock and companion animals; the important scientific understanding for the utilization of animal products; and experiences necessary for leadership in, and advocacy for, industries providing animals and animal products that benefit humans.

The faculty and staff conduct teaching, research and extension programs to support production and utilization of many types of animals, including beef and dairy cattle, sheep, swine, horses and poultry, as well as those providing other types of food and fiber, companion animals and animals in zoos.

The Curriculum

Three study options are available for the animal science major.

Animal Production, Management and Husbandry – This option is designed for students wanting a background in the principles of animal management and husbandry. It includes broad training in animal husbandry, production and management.

Animal Biomedical Science – This option offers students a more scientific approach to animal science, preparing them for positions in research, teaching or veterinary medicine. Students receive an animal science degree while meeting academic requirements for application to veterinary schools.

Animal Agribusiness – This option is designed for students desiring a background in the business and economic principles of the livestock industry.

High School Preparation

High school preparation should include course work in biology, chemistry, English and algebra.

Career Opportunities

Animal science students qualify for many varied occupations that involve animal and agriculture business, livestock products and land management. Graduates find employment in career fields such as nutrition and pharmaceutical sales and support; areas of Extension; financial lending; the promotion, management and sale of livestock and meat; and farm, ranch and natural resource management. Students may also choose to continue their education in graduate school, veterinary school, or other graduate-level professional programs.

Extra-Curricular Activities

Animal science students belong to a variety of clubs including Saddle and Sirloin, Dairy Club, Rodeo Club, Pre-Vet Club, Horseman's Association, Collegiate Cattlewomen, Range Club, Anthrozoology Club, and Collegiate FFA. The Saddle and Sirloin club is the largest club on campus, and sponsors events such as the Little International Livestock Show, the Hall of Fame Banquet, and Kiddie Days. In addition to clubs, students participate in intercollegiate contests including livestock, meat, and dairy evaluation teams; equestrian and rodeo teams; and academic quadrathlon.

Financial Aid and Scholarships

Part-time work and work-study programs are available at the equine center, in several different livestock units, and in animal science laboratories within the department. Over $50,000 in departmental scholarships are awarded to Equine Science, Animal Science and Veterinary Technology students annually. In addition, the College of Agriculture, Food Systems, and Natural Resources awards scholarships each year to incoming freshman and current NDSU students. Contact the Office of the Dean, College of Agriculture, Food Systems, and Natural Resources, for more information on college scholarships https://www.ag.ndsu.edu/academics/scholarships (https://www.ag.ndsu.edu/academics/scholarships/)

Student loan, grant and work-study information is available from the Office of Financial Aid and Scholarships, and One Stop https://www.ndsu.edu/onestop/finaid/

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

This sample plan of study applies to the Animal Production, Management, and Husbandry study option.

Total Credits: 120

1

ANSC 102 or VETS 101 are also accepted, but ANSC 101 is preferred for this option.

2

CHEM 117 and 117L can be replaced by CHEM 121 and 121L, respectively. If a student transfers in or takes CHEM 121 instead of CHEM 117, then CHEM 122 and CHEM 140 or 240 must be taken to ensure adequate pre-requisites for BIOC 260 are met.

3

BIOL 150 and BIOL 150L are also accepted, but BIOL 111 and BIOL 100L are preferred for this option.

4

ANSC 235 is also accepted, but requires additional pre-requisites not included on this plan of study.

5

ANSC 396 (Internship Experience) is recommended, but students can also take ANSC 379 (Global Seminar) or ANSC 393 (Undergraduate Research) experiences.

6

Two industry and production courses are required for this option. Fall course options include ANSC 482 and 488, whereas spring course options include ANSC 480, 484, and 486.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

This sample plan of study applies to the Biomedical Science option. This option is recommended for students interested in pursing a Doctor of Veterinary Medicine degree and/or students interested in graduate degree programs.

Freshman

		14		**12**

Total Credits: 120

1

ANSC 101 or VETS 101 are also accepted, but ANSC 102 is preferred for this option.

2

MATH 105, 107, or 146 are required to satisfy PHYS 211 pre-requisites and are accepted in place of MATH 103. The series suggests only MATH 105 is necessary to meet PHYS 211 pre-requisites, but MATH 107 and 146 are also accepted if transferred in or student is placed as eligible to take those courses. A student that does not place into MATH 105 or transfer in MATH 103 must start with MATH 103 to meet pre-requisite requirements of MATH 105.

3

CHEM 341L is not required for this option's degree plan, but is recommended as part of the CHEM 341 and 341L sequence to meet veterinary medicine school admission requirements. Students should review specific school requirements to determine if CHEM 341L and subsequent organic chemistry courses such as CHEM 342 and CHEM 342L are necessary.

4

PHYS 120 and PHYS 120L are also accepted, but do not satisfy veterinary medicine school admission requirements. PHYS 211 and PHYS 211L are therefore recommended for students pursuing admission to veterinary medicine schools, which impacts MATH requirements noted earlier. Additional courses may be needed to satisfy veterinary medicine schools, but are school specific. Students should review specific school admission requirements and use electives to meet those admission requirements if not required on this option's degree plan.

5

ANSC 396 (Internship Experience) is recommended, but students can also take ANSC 379 (Global Seminar) or ANSC 393 (Undergraduate Research) experiences.

6

One industry and production course is required for this option. Fall course options include ANSC 482 and 488, whereas spring course options include ANSC 480, 484, and 486.

Animal Science

Department Information

- **Department Web Site:**
  www.ndsu.edu/agriculture/academics/academic-units/animal-sciences (http://www.ndsu.edu/agriculture/academics/academic-units/animal-sciences/)
- **Credential Offered:**
  B.S.; Minor
- **Sample Program Guide:**
  catalog.ndsu.edu/programs-study/undergraduate/animal-science/#planofstudytext (http://catalog.ndsu.edu/programs-study/undergraduate/animal-science/#planofstudytext)

Major Requirements

Major: Animal Science

Degree Type: B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.

4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**
Category W: Wellness †		**2**
Category D: Cultural Diversity *†		
Category G: Global Perspectives *†		
Total Credits		**39**

*****

Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†

General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Code	Title	Credits
Required Core Courses for Animal Science		
ANSC 114	Introduction to Animal Sciences	3
ECON 201	Principles of Microeconomics (May satisfy general education category B and G)	3
MATH 103	College Algebra	3
or MATH 105	Trigonometry	
or MATH 107	Precalculus	
or MATH 146	Applied Calculus I	
STAT 330	Introductory Statistics (May satisfy general education category R)	3
ANSC 218	Anatomy and Physiology of Domestic Animals	3
Select one of the following:		1
ANSC 101	Student Success Techniques - Animal and Equine Science	
ANSC 102	Student Success Techniques - Animal Sciences with Pre-Veterinary Medicine Emphasis	
ANSC 201	Student Success Techniques - Nontraditional & Transfer Students	
VETS 101	Student Success Techniques: Veterinary Technology	
ANSC 240	Meat Animal Evaluation and Marketing	3
ANSC 300	Domestic Animal Behavior and Management	3
ANSC 323	Fundamentals of Nutrition	3
ANSC 324	Applied Animal Nutrition	3
ANSC 463 & 463L	Physiology of Reproduction and Physiology of Reproduction Laboratory	4

ANSC 478	Research and Issues in Animal Agriculture	3
Select one of the following:		2
ANSC 379	Global Seminar	
ANSC 393	Undergraduate Research (research experience)	
ANSC 396	Field Experience (internship experience)	
Select one of the following:		3
ANSC 480	Equine Industry and Production Systems	
ANSC 482	Sheep Industry and Production Systems	
ANSC 484	Swine Production/Pork Industry Systems	
ANSC 486	Beef Industry and Production Systems	
ANSC 488	Dairy Industry and Production Systems	
Program Option		
Students must select one program option of interest to complete the major. The standard option for this major is the Animal Production, Management and Husbandry. Students who wish to declare an option other than the standard option must officially declare that option with the Office of Registration and Records.		44-48
Total Credits		**84-88**

Option 1: Animal Production, Management, & Husbandry Option (Standard)

Code	Title	Credits
AGEC 242	Introduction to Agricultural Management	3
AGEC 244	Agricultural Marketing	3
BIOC 260	Elements of Biochemistry	4
MICR 202 & 202L	Introductory Microbiology and Introductory Microbiology Lab (May satisfy general education category S)	3
PLSC 315	Genetics (May satisfy general education category S)	3
Select one from the following:		4
BIOL 111 & BIOL 100L	Concepts of Biology and Non-Majors Biology Lab (May satisfy general education category S)	
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	
Select one from the following:		4
CHEM 117 & 117L	Chemical Concepts and Applications and Chem Concepts and Applications Lab (May satisfy general education category S)	
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory (May satisfy general education category S)	
Select one the following evaluation courses:		2
ANSC 230	Meat Grading and Evaluation	
ANSC 231	Livestock Evaluation	
ANSC 232	Dairy Cattle Evaluation	
ANSC 235	Equine Evaluation	
ANSC 340	Principles of Meat Science	3
ANSC 357	Animal Genetics	3
ANSC 370	Fundamentals/Animal Disease	3
ANSC 380	Livestock Sales and Marketing	2
ANSC 480	Equine Industry and Production Systems	3
or ANSC 482	Sheep Industry and Production Systems	
or ANSC 484	Swine Production/Pork Industry Systems	
or ANSC 485		
or ANSC 486	Beef Industry and Production Systems	
or ANSC 488	Dairy Industry and Production Systems	
Animal Production, Management, and Husbandry Elective (choose from any level PLSC, NRM, RNG, or SOIL)		6
Total Credits		**46**

Option 2: Animal Agribusiness Option

Code	Title	Credits
ACCT 102	Fundamentals of Accounting	3
AGEC 242	Introduction to Agricultural Management	3
AGEC 244	Agricultural Marketing	3
AGEC 246	Introduction to Agricultural Finance	3
Select one from the following:		4
BIOL 111 & BIOL 100L	Concepts of Biology and Non-Majors Biology Lab (May satisfy general education category S)	
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	
Select one from the following:		4
CHEM 117 & 117L	Chemical Concepts and Applications and Chem Concepts and Applications Lab (May satisfy general education category S)	
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory (May satisfy general education category S)	
Select one of the following evaluation courses:		2
ANSC 230	Meat Grading and Evaluation	
ANSC 231	Livestock Evaluation	
ANSC 232	Dairy Cattle Evaluation	
ANSC 235	Equine Evaluation	
ANSC 357	Animal Genetics	3
ANSC 380	Livestock Sales and Marketing	2
ECON 202	Principles of Macroeconomics (May satisfy general education category B)	3
PLSC 315	Genetics (May satisfy general education category S)	3
AGEC elective	300-400 level	6
Animal Agribusiness Electives (choose from 300+ level ANSC, AGEC, ECON, PLSC or RNG)		9
Total Credits		**48**

Option 3: Biomedical Science Option [1]

Students interested in veterinary school should consider this option. The option meets most veterinary school prerequisites. Consultation with an adviser is recommended.

Code	Title	Credits
ANSC 357	Animal Genetics	3
ANSC 444	Livestock Muscle Physiology	3
BIOC 260	Elements of Biochemistry	4
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	4
BIOL 151 & 151L	General Biology II and General Biology II Laboratory	4
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory (May satisfy general education category S)	4
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory (May satisfy general education category S)	4
CHEM 240	Survey of Organic Chemistry	3
or CHEM 341	Organic Chemistry I	
MICR 350 & 350L	General Microbiology and General Microbiology Lab	5
PLSC 315	Genetics (May satisfy general education category S)	3
Select one from the following:		4
PHYS 120 & 120L	Fundamentals of Physics and Fundamentals of Physics Laboratory (May satisfy general education category S)	
PHYS 211 & 211L	College Physics I and College Physics I Laboratory (May satisfy general education category S)	

Biomedical Science Elective (choose from 300+ level ANSC, BIOC, BIOL, CHEM, MICR, PHYS OR ZOO)	3
Total Credits	**44**

1

Accelerated Undergraduate Animal Science Biomedical Sciences option to Master of Public Health Degree

- Students enrolled in the Biomedical Sciences option may participate in an accelerated undergraduate to graduate program (B.S. Animal Science degree to Master of Public Health degree).
- Students will complete and submit a required *Accelerated Degree Program Declaration* form identifying no more than 15 credits of graduate coursework to be counted towards their B.S. degree.
- A minimum 3.00 cumulative GPA must be maintained by students in the accelerated degree program.

Degree Requirements and Notes

- Students must earn a minimum 2.00 cumulative GPA for courses that satisfy major requirements
- Transfer grades must be 'C' or higher to count toward major requirements

Minor Requirements

Minor: Animal Science

Required Credits: 16

Minor Requirements

Code	Title	Credits
Required Courses		
ANSC 114	Introduction to Animal Sciences	3
ANSC 223	Introduction to Animal Nutrition	2
ANSC 220	Livestock Production	3
ANSC 240	Meat Animal Evaluation and Marketing	3
Elective Courses *		**5**
Must include one of the following courses:		
ANSC 300	Domestic Animal Behavior and Management	
ANSC 314		
ANSC 323	Fundamentals of Nutrition	
ANSC 324	Applied Animal Nutrition	
ANSC 340	Principles of Meat Science	
ANSC 357	Animal Genetics	
ANSC 370	Fundamentals/Animal Disease	
ANSC 444	Livestock Muscle Physiology	
ANSC 463	Physiology of Reproduction	
ANSC 487	Growing and Finishing Cattle Management	
Remaining credits may come from those listed above or the following courses:		
ANSC 230	Meat Grading and Evaluation	
ANSC 231	Livestock Evaluation	
ANSC 232	Dairy Cattle Evaluation	
ANSC 344	Fundamentals of Meat Processing	
ANSC 380	Livestock Sales and Marketing	
ANSC 426		
Total Credits		**16**

*

Enrolling in two 2-credit courses will not fulfill elective requirements.

Minor Requirements and Notes:

- A minimum of 8 credits must be taken at NDSU.
- Students must earn a minimum 2.00 GPA for the minor requirements.

Anthropology

Department Information

- **Department Web Site:**
  www.ndsu.edu/socanth/about/ (http://www.ndsu.edu/socanth/about/)
- **Credential Offered:**
  B.S.; B.A.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/anthropology/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/anthropology/)

Anthropology is the study of human beings over time and space. It seeks to understand humans by exploring the differences and similarities between humans and the human experience in all parts of the world and throughout humanity's existence.

The Mission

The mission of the anthropology major and minor degrees is twofold: (1) the promotion of cross-cultural and international understanding and (2) the advancement of knowledge about the human condition. Across subdisciplines and geographical areas, we take a cultural approach to understanding human variation past, present and future. Our mission goals are met by way of teaching, research and service to the university, state, region and profession of anthropology.

Faculty

The anthropology program has three faculty members with varying research interests and areas of specialization. The anthropology faculty provide expertise in gender, race, indigeneity, postcolonial studies, the African Diaspora, household and landscape archaeology, medical anthropology, and psychological anthropology across cultures. They employ GIS, ethnohistoric, and ethnographic methods. They cover regional studies in North America, the Caribbean, and East Asia.

The research efforts of the anthropology faculty are constantly integrated with the teaching process to bring new information and approaches to the classroom. This integration makes the classroom experience of majors and graduate students vibrant and dynamic. Faculty research activities also can provide students with valuable pre-professional experience as research assistants.

Laboratories

Students can pursue opportunities to work in the Archaeology Materials Lab as part of their course work, or in some cases, as paid research assistants. Materials from archaeological field studies are processed and analyzed in the lab. Students may also work with GIS data as part of Archaeological research projects.

Field Schools/Internships

The department encourages students to pursue field school opportunities where they can gain hands-on experience in archaeology or cultural anthropology while also earning course credit. Faculty periodically offer archaeological field schools in North America and the Caribbean. In addition, faculty advise students on selecting other field experiences abroad and nationally. In recent years students have completed field experiences in Wisconsin, Jamaica, Ireland, Greece, Mexico, and Poland. Faculty work with students on internship opportunities as pre-professional experience and have placed students in internships with numerous businesses, heritage organizations, and museums.

Career Opportunities

As with other fields of study that form the core of a solid liberal arts education, anthropology prepares students for many life and career challenges. An undergraduate degree in anthropology prepares students to think critically and analytically. It fosters a deep appreciation and understanding of cultural diversity and cross-cultural relations. Common areas of employment include advertising and public relations, community development, contract archaeology, corporate business and industry, cultural resource management, government agencies, non-profit organizations, policy research, and social services. For more information on anthropology employment, refer to the North Dakota State University Anthropology website or visit the American Anthropological Association website at www.aaanet.org.

The Curriculum

The course requirements in anthropology are designed to provide students with a solid grounding in the discipline as a whole and training in research and analysis methods. The curriculum covers the multiple subdisciplines in anthropology. Anthropology faculty advisors work very closely with students on the specific plan of study that best suits their needs and interests.

Anthropology Club

The Anthropology Club is a student directed organization with sponsorship and advising provided by the anthropology faculty. The club provides a forum for learning more about anthropology and related careers, for engaging in community service, and for interacting with students with different interests, levels of experience and education in anthropology.

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Anthropology

Department Information

- **Department Web Site:** www.ndsu.edu/socanth/about/ (http://www.ndsu.edu/socanth/about/)
- **Credential Offered:**

B.S.; B.A.; Minor

- **Sample Program Guide:** catalog.ndsu.edu/programs-study/undergraduate/anthropology/#planofstudytext (http://catalog.ndsu.edu/programs-study/undergraduate/anthropology/#planofstudytext)

Major Requirements

Major: Anthropology

Degree Type: B.A. or B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**
Category W: Wellness †		**2**
Category D: Cultural Diversity *†		
Category G: Global Perspectives *†		
Total Credits		**39**

*****
Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†
General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Code	Title	Credits
Anthropology Core Requirements		
SOC 110	Introduction to Sociology [1]	3
ANTH 111	Introduction to Anthropology [1]	3
ANTH 204	Archaeology and Prehistory [1]	3
ANTH 205	Human Origins [1]	3
ANTH 206	Introduction to Cultural Anthropology: Peoples of the World	3

ANTH 298		1
ANTH 470	Theory in Archaeology [1, 2]	3
or ANTH 480	Development of Anthropological Theory	
ANTH 471	Archaeological Research Methods [1, 2]	3
or ANTH 481	Ethnographic Research Methods	
ANTH 494	Individual Study	1
or ANTH 496	Field Experience	
Major Electives 300-400 Level: [3]		15
Total Credits		**38**

1

Students must earn a 'C' or better in each of the Core Requirements courses to successfully complete their major requirements.

2

Other courses may qualify to substitute for the Theory and Methods courses. Substitutions must be approved by the adviser and department chairperson prior to course enrollment and paperwork must be filed with the Office of Registration and Records.

3

Other courses may qualify to substitute for the 300-400 level courses. Substitutions must be approved by the adviser and department chairperson prior to course enrollment and a course substitution may need to be submitted to the Office of Registration and Records. These include internships, field schools, archaeology lab credits, etc.

Minor Requirements

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.

Apparel, Retail Merchandising and Design

Department Information

- **Department Web Site:**
  www.ndsu.edu/adhm/ (http://www.ndsu.edu/adhm/)
- **Credential Offered:**
  B.S.; B.A.; Minor; Certificate
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/apparel-retail-merchandising-design/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/apparel-retail-merchandising-design/)

Students majoring in apparel, retail merchandising and design choose one of the three options – Fashion Product Development, Fashion Entrepreneurship, and Retail Merchandising.

Students interested in design and product development would find the Fashion Product Development a great area of study. Graduates develop and deliver products to the global marketplace. This option focuses on developing, designing and marketing materials and products within the market and industry.

In the Fashion Entrepreneurship option, you will not only learn how to develop and sell products, you will also learn how to manage a successful business. Alumni from the program are using what they learned in the classroom to successfully run their own businesses.

New retail opportunities are emerging around the world today with digital retailing and retail technology. The course of study in the Retail Merchandising option includes classes on sourcing, buying, merchandising, promotion, and consumer behavior.

BACKGROUND INFORMATION

The world's textile and apparel industries are made up of companies that produce fibers, yarns, textiles and apparel, and accessory products for industrial, wholesale and individual consumers around the world. These industries are some of the largest and most productive in the world. Because of the size and nature of the textile and apparel industry, and their interconnection with many other industries, career opportunities are limitless. New retail opportunities are emerging around the world. National and global retailers provide goods and services to consumers, via multichannel retailing involving traditional stores, online venues, mobile apps, social networking sites, catalogs, and direct mail. Retailers use state-of-the-art technology to respond instantaneously to changing consumer demand from around the world. The dynamic environment in the retail industry provides many exciting opportunities for college graduates interested in the competitive, fast-paced field of retailing.

FLEXIBLE CURRICULUM

Three-year accelerated plans are available for all the three options. Two-year plans are available for transferred students who completed the general education requirements.

CAREER OPPORTUNITIES

Graduates hold positions as ***production developers, visual merchandisers, technical designers, buyers, sourcing specialists, social media marketing specialists, fashion forecasters, stylists, store managers,*** and ***interior merchandisers*** with such companies as ***Target, Kohl's, Scheels, Macy's, Merchology, Evereve, Best Buy, Nordstrom, The Gap, The Buckle, Evine Live, Nike, Forever 21, Old Navy,*** and ***Duluth Trading Company***, to name a few. Other graduates have used their skills to successfully run their own businesses.

OUR CONTACTS BEYOND COLLEGE WALLS

The apparel, retail merchandising and design program regularly plans travel and study programs to fashion, design and/or business centers. Off-campus study provides students contact with practicing professionals. Study tours to national and international destinations expose students to the fast pace of the changing global fashion and retail industry while allowing them to earn college credit. The program's affiliation with the Fashion Institute of Technology (FIT) in New York City permits NDSU students who qualify to earn credits as visiting students and to gain experience in the heart of the fashion business world. In addition, NDSU offers many study abroad programs in which students are encouraged to participate.

SCHOLARSHIPS

Several scholarships are designated for students majoring in apparel, retail merchandising and design; additional scholarships are available to all college majors.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Architecture

Department Information

- **Department Web Site:**
  www.ndsu.edu/architecture/ (http://www.ndsu.edu/architecture/)
- **Credential Offered:**
  B.S.Arch.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/architecture/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/architecture/)

Architecture is a fine art devoted to the design of the human environment. The architect is concerned with the aesthetic, social, environmental, technological and psychological factors that influence the design of a building. Architects are involved in the success, quality and appearance of a building within the context of a community and the city. Architecture is a dynamic profession that ranges from residential houses to large-scale urban buildings. An architect can design houses, commercial buildings, museums, college science buildings, and resorts, as well as many other building types.

BACKGROUND INFORMATION

To become an architect, you must learn to make use of science and technology, and develop sensitivity for beauty in the design of space and form with material. You must develop a deep understanding of people and their surroundings. Because this work encompasses so many different fields of interest, the architect is best thought of as a professional who bridges different areas of study and blends them into a single, significant activity.

CAREER OPPORTUNITIES

Architects work in architectural firms or accept positions with government, corporations or institutions. Some architects become highly specialized; others remain generalists in the profession, working on all facets of a project. Whichever path your career may follow, it is necessary to first build a firm background that includes essential architectural knowledge and skills. Architecture provides a variety of interesting positions within the discipline. One can either work for an established architecture firm or create their own business. There are three typical areas in architecture which one can focus on (or one can do all three) once they begin working. These three areas are: the design or aesthetic aspects of a project, the technical or material aspects of a project, or as the construction liaison when a project is being built. Further, architecture is a scalable profession depending on one's interests. For example, the possible areas one can work in range from small-scale residential houses to large-scale skyscrapers.

ACCREDITATION

The five-year Master of Architecture degree is fully accredited by the National Architectural Accreditation Board (NAAB). For more information see, www.naab.org/home. To become a licensed architect requires an accredited professional degree, completion of the Architectural Experience Program (AXP) and passing your state's licensing examination.

THE PROGRAM

The architecture program is a five-year professional course of study leading to a Master of Architecture degree. This degree is nationally accredited and recognized by all state architectural licensing boards. Students receive a Bachelor of Science in Architecture, a pre-professional degree, at the end of four years. During the first year of pre-architectural studies, the curriculum addresses the understanding of the environment and our impact on nature. In addition to meeting general education and departmental requirements, students take five environmental design courses (ENVD) comprised of lecture courses, a drawing course and a design fundamentals course. Beginning at the sophomore level, there is a selective admissions process where admitted students become architecture majors. We limit our studio courses to a maximum of 16 students to maintain a high level of student faculty contact. The program is a studio based model of education where students have high contact hours with their professors and learn problem solving techniques and design methodologies. The primary focus is on design thinking where students engage in individual and group projects that represent a vast array of design problems that require real-world solutions. Our primary focus is for students to learn to be great designers and leaders who engage the dynamic and emerging problems of the world with beautiful and thoughtful designs. Students will learn how to communicate their ideas through writing and public speaking in addition to traditional and new ways of thinking and communicating such as physical models, drawings, computer animation and renderings and virtual reality. The program has required field trips, a lecture series and invited outside professionals that help students focus on their own interests in architecture and create a project based on those interests.

ACTIVITIES AND FACILITIES

Activities within the department include:

- Student chapters of the American Institute of Architecture Students; Tau Sigma Delta; Freedom by Design; U.S. Green Building Council; National Organization of Minority Architects
- Yearly career fair
- Student-run Beaux Arts Ball with a guest speaker
- Interaction with community projects such as eFargo
- Studio field trips to U.S. cities
- Visiting lecturers who speak on architecture and related topics
- Joint studio projects with the landscape architecture program
- Semester-long term abroad option
- Summer study opportunities in Europe and North America and an International Student Exchange Program
- Spring break study abroad option
- Summer internship opportunities

Our facilities include:

- Two remarkable buildings located in downtown Fargo: Klai Hall and Renaissance Hall
- 3-D prototyping and printing
- 3-D computing rendering and server farm
- State-of-the-art computing labs
- Computer aided laser cutters and CNC
- Large document printers and scanners
- Software such as GIS, CAD and 3-D rendering and modeling
- An Architecture and Landscape Architecture Library of about 18,000 books, 70 magazine subscriptions and 36,000 slides
- Photographic and graphic reproduction equipment
- Individual studio spaces in the second through fifth years

HIGH SCHOOL PREPARATION

We suggest that students take high school courses in digital drawing and animation, an art class, such as drawing from life, and math and science courses such as calculus, trigonometry and physics. If possible, we encourage high school students to take advance placement or college credit courses that could be substitutes for North Dakota State University General Education requirements.

TRANSFER STUDENTS

Transfer applicants are required to enter the architecture program at the first-year level. Five years of study are required for completion of the degree. Advanced standing is possible through a portfolio and transcript review process.

SELECTIVE ADMISSION

Approximately 64 architecture majors are selected for admission into the second year of the program. A student's eligibility is based on their overall grade point average (GPA), their GPA for pre-architecture courses with the ENVD prefix, and a portfolio created in ENVD-172. It is important to apply early, complete all freshman courses in the first year and maintain a solid academic record. Students must have a minimum 3.0 GPA to apply to the graduate school during the third or fourth year of the program.

SPECIAL NOTICE

Students in the second year of the program will be required to purchase a laptop computer. Information on type of computer, software, purchase, and financing arrangements will be distributed to students prior to purchase.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Architecture

Degree Type: B.S.Arch
Minimum Degree Credits to Graduate: 138

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †

- **Credential Offered:**
  B.S.; B.A.; B.F.A.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/art/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/art/)

The Department of Art and Design+ at North Dakota State University is part of the School of Design, Architecture and Art. The Department offers a broad range of degree programs from art emphasis areas in graphic design, painting, printmaking, ceramics, drawing, sculpture, photography and art education. Additionally the Department is home to the Apparel, Retail Management and Design program with many career opportunities available across the Department. It provides a wide range of courses with the philosophy that a strong foundation in the development of creative strategy, digital literacy, design ability, critical thinking and art/design historical awareness will prepare our students for careers in the creative economies.

THE PROGRAM

With a vibrant major and minor program, the Department of Art and Design+ brings together students from every college in the University. As a primary career specialization, or as a complement to another major field, art and design is one of the most versatile areas of study. Housed in one of the finest facilities in the upper Midwest for art and design, the department is home to ten professional artists/designers/scholars who teach every class we offer. We are an undergraduate program only, and are focused on the individual attention, modest class sizes and high quality advising for our undergraduate students.

THE FACILITIES

Renaissance Hall, a state-of-the-art facility located in downtown Fargo houses the Department of Art and Design. In addition, our facilities to support programs in Apparel, Retail Management and Design are housed in the Family Life Center on the main campus. Both provide well-equipped studio facilities. Our new digital media lab has been equipped with the most current output devices and the program has access to A second digital media studio, LAAVA Lab, provides a design thinking gathering space with high tech tools including CNC, 3D printing, 3D ceramic printing, laser cutting and virtual reality facilities. The print shop houses several etching and litho presses as well as facilities for letterpress and silkscreen printing. The ceramic student is well equipped with three gas kilns and a wood burning kiln, clay mixing facilities and 25 throwing wheels. The large sculpture studio houses various types of welders, a plasma cutter and other tools for metal work, woodworking and carving in stone. A high-tech classroom for art history seats 75 and is also available for smaller classes. The department has its own gallery in the Renaissance Hall and has a partnership with the Memorial Union Gallery on main campus. A wide range of exhibitions, including national traveling exhibitions, and student and faculty shows are always available on and off campus. In close proximity to the Plains Art Museum, the department and the Plains work closely together, enhancing art experiences for the entire region.

THE TEACHING COMMUNITY

Faculty are involved in their practices at local, regional and International levels with the approach that being engaged at a high level in production makes for better instruction. The art faculty prides itself in being very accessible to students at all times for individual consultation and critique.

PEARS PROGRAM

The Printmaking Education and Research Studio (PEARS) is the research arm of the Department. PEARS has transformed into a community research and printmaking advocacy studio. This program looks for ways to intersect the printmaking process across disciplines within the school and campus. Additionally PEARS serves the Land Grant mission of engagement with communities in a variety of ways through workshops and unique programming. The program also offers artist residencies, internships and studio rentals to qualified artists and promotes sales and exhibition of artwork produced in the studio.

CAREER OPPORTUNITIES

Art and Design students develop a range of skills from creative strategy to technical proficiency. These skills are broadly applicable to careers in many different disciplines. Potential careers include marketing, advertising, illustration, graphic design, user experience specialist, animation, arts marketing, art historian, commercial photography, museum and gallery work, exhibition design, art therapy, professional studio artist, municipal art programs, art criticism, independent art instruction, industrial design, art media research, arts organizations, retail merchandising, apparel design, store management along with university instruction and K-12 education.

THE CURRICULUM

With an early emphasis on technology and skills relevant in the 21st century, all students graduating from Visual Arts have a background in design. From this foundation, students select tracks including: K-12 education, graphic design/illustration, printmaking, painting, photography, ceramics, sculpture and drawing. The program offers a highly flexible and personal approach to each student's development. The middle of the program focuses on developing a portfolio strong enough to apply for the capstone experience which is either a three-credit or six-credit baccalaureate project and thesis exhibition during the senior year.

THE DEGREES

Students majoring in art have several degree options. The Bachelor of Fine Arts (BFA) is the professional degree requiring 76 hours in art with an emphasis in one or a combination of the following: graphic design, painting, ceramics, printmaking, sculpture, photography or drawing.

The Bachelor of Arts (BA) and the Bachelor of Science (BS) requires 59 hours in art with an emphasis in one of the following: graphic design, illustration, painting, ceramics, printmaking, sculpture, photography or drawing.

SCHOLARSHIPS

The multi-million dollar James Falck Endowment for Visual Arts is part of a new suite of scholarships for incoming freshman and existing visual arts majors. Scholarships are awarded based on academic excellence and portfolio review. For more information contact the NDSU Department of Visual Arts at (701) 231-8818 or email Kelly.Todd@ndsu.edu.

ART MINOR

The art minor is flexible with an emphasis on depth over breadth which serves to “compliment” a students major. This flexibility allows a student to choose a path that suits their educational goals. For instance, a graphic design emphasis in a student's minor program would be an ideal compliment to many fields, including marketing, advertising, business, architecture and engineering.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

- A minimum of 8 credits must be taken at NDSU.
- This minor is intended to provide maximum flexibility to serve as a compliment to ones major track and/or an opportunity to go deeply into one studio area.

Art Education

Department Information

- **Department Web Site:**
  www.ndsu.edu/visualarts/ (http://www.ndsu.edu/visualarts/)
- **Credential Offered:**
  B.S.; B.A.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/art-education/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/art-education/)

Art Education is offered as a degree through the Department of Art and Design+ In collaboration with the NDSU School of Education. The program is led by Assistant Professor Eric Syvertson, who prior to NDSU was a 10+ year veteran teacher within the West Fargo School District. The mission of the Art Ed program is developing excellent K-12 artist-educators with a focus on professional practice, community engagement, technology integration and advocacy for the arts and design fields. Teacher candidates are prepared to teach and lead within and outside the school setting. Teacher candidates get the best of both worlds: content and studio courses with faculty in the department of Visual Arts and professional education courses from faculty in the School of Education (SOE). We develop excellent artists with a foundation to become impactful teachers. A minimum of 120 credit hours are needed for graduation.

STUDENT TEACHING

Student teaching (clinical practice) is the culmination of the teaching program. During the clinical practice, teacher candidates apply the knowledge and skills acquired in their college courses to real-world classrooms under the supervision of experienced art teachers in elementary, middle and high schools. Faculty members from NDSU conduct regular on-site visits to support, encourage, and evaluate teacher candidates so that they gain the confidence and ability to join the teaching profession after graduation.

Licensure

Upon completing this program, teacher candidates are eligible for teacher licensure in Art in most states. Our program is accredited by the National Association of Schools of Art and Design, the Council for the Accreditation of Educator Preparation (CAEP) and approved by the North Dakota Education Standards and Practices Board (ESPB)

5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**

Total Credits		**90**

Degree Requirements and Notes

- Courses taken P/F may not be used to satisfy any requirements.
- A grade of 'C' or better is required in all Professional Education Requirement courses.
- To be placed in student teaching, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required.
- To exit the program, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required as well as completing the Praxis Subject test and the Principles of Learning and Teaching test.
- See School of Education (https://www.ndsu.edu/education/) for admission requirements.

Artificial Intelligence

Department Information

- **Department Web Site:**
  https://www.ndsu.edu/cs/
- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/artificial-intelligence/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/artificial-intelligence/)

This minor will allow students to deepen their understanding of Artificial Intelligence. The program is designed to be relevant to students in any major. It is laid out to include a concise coverage of mathematical and computational foundations, a specific course on artificial intelligence, and an elective that can be drawn from courses offered in the computer science department or any of the other departments that have broadened their machine learning and artificial intelligence offerings in recent years.

Artificial Intelligence

Department Information

- **Department Web Site:**
  https://www.ndsu.edu/cs/
- **Credential Offered:**
  Minor
- **Program Overview:**
  catalog.ndsu.edu/programs-study/undergraduate/artificial-intelligence/ (http://catalog.ndsu.edu/programs-study/undergraduate/artificial-intelligence/)

Minor Requirements

Artificial Intelligence

Minimum Credits Required: 19

Code	Title	Credits
Required Courses		
Select one from the following:		4 or 6
CSCI 160	Computer Science I	
CSCI 227 & CSCI 228	Computing Fundamentals in Python I and Computing Fundamentals in Python II	
CSCI 222	Discrete Mathematics	3
or MATH 270	Introduction to Abstract Mathematics	
CSCI 372	Comparative Programming Languages	3
or CSCI 312	Survey of Programming Languages	
CSCI 426	Introduction to Artificial Intelligence	3
Additional Electives - select 6 credits from the following:		6
CSCI 420	Introduction to Data Science in Python	
CSCI 422	Fundamentals of Data Engineering	
CSCI 425	Machine Learning	
CSCI 428	Artificial Intelligence, Ethics, and the Environment	
CSCI 485	Autonomous Command and Artificial Intelligence for Robots and Other Cyber-Physical Systems	
ECE 477	Hardware Design for Machine Learning	
IME 465	Introduction to Machine Learning	
Total Credits		**19-21**

Minor Requirements and Notes:

- A grade of C is required in all courses for the AI minor.
- A minimum of 8 credits must be completed at NDSU
- Cannot be declared with the Standard track or the Data Science track of the B.S. in Computer Science.

Banking

Department Information

- **Department Web Site:**
  www.ndsu.edu/business/ (http://www.ndsu.edu/business/)
- **Credential Offered:**
  Minor

- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/banking/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/banking/)

Banks are the lifeblood of the economy. Today's commercial banks are more diverse than ever. Therefore there is a tremendous range of employment opportunities in this sector, starting at the branch level as a bank teller to a wide variety of other positions such as the credit analyst, personal banker, loan officer, mortgage originator, and so forth. As of December 2022, over 29,000 banking jobs are available nationwide on O*Net.com. Median salary in North Dakota is $77, 000 and in Minnesota is $79,000. Banks are actively recruiting management talent, especially in small and mid-sized towns.

FIN 430	Management of Financial Institutions	3
FIN 450	Advanced Bank Management	3
FIN 451	Credit Analysis	3
Total Credits		**18**

Notes:

- A minimum of eight credits must be earned in residence at NDSU.

Behavioral Statistics

Department Information

- **Department Web Site:**
  www.ndsu.edu/statistics/ (http://www.ndsu.edu/statistics/)
- **Credential Offered:**
  B.S.; B.A.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/behavioral-statistics/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/behavioral-statistics/)

This major is a joint effort between the Department of Statistics (https://www.ndsu.edu/statistics/) and the Department of Psychology (https://www.ndsu.edu/psychology/). It is recommended that a student wishing to obtain a degree in Behavioral Statistics consult with an advisor in both departments. This major prepares students for careers involving collecting and analyzing data on human behavior, for example, in medical care, insurance, market research, or health, educational and social services. Graduates of this program are expected to have good quantitative reasoning skills and to have strong people skills. ***Note:*** *this curriculum also fulfills requirements for the major in Psychology.*

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as,

but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Total Credits		**64-65**

Program notes

- Except for courses offered only as pass/fail grading, no course may be taken Pass/Fail.

Biochemistry and Molecular Biology

Department Information

- **Department Web Site:**
  www.ndsu.edu/chemistry/ (http://www.ndsu.edu/chemistry/)
- **Credential Offered:**
  B.S.; B.A.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/biochemistry-molecular-biology/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/biochemistry-molecular-biology/)

Biochemistry is concerned with the chemistry of the materials fundamental to life and contributes toward the understanding of the structure and functioning of all organisms. Because of the rapid advances in the areas of biotechnology, molecular biology and genetic engineering, biochemistry is an exciting area for study and research.

Background Information

The undergraduate program in biochemistry at North Dakota State University is planned for students who are seeking careers in the life sciences, agriculture, medicine or health related fields. The program is also suited for students who are contemplating advanced graduate degrees in biochemistry, botany, zoology and microbiology, or professional degrees in dentistry and medicine.

The biochemistry program is offered by the Department of Chemistry and Biochemistry.

The Program

Students with an interest in biochemistry earn the Bachelor of Science degree in biochemistry and molecular biology. This provides flexibility in the selection of courses for those students who plan to seek employment in areas related to biochemistry, enter graduate or medical school, or teach in high schools or higher education institutions. The program provides training in biochemistry, botany, microbiology, zoology or in applied areas according to the student's interest. In addition to the courses in chemistry, physics and mathematics, an additional 16 credits in biological sciences, 18 credits of electives in the humanities and social sciences, nine credits in English, three credits in speech and two credits in wellness are required. The pre-medical student is encouraged to take a year of upper-level zoology.

All undergraduates in biochemistry and molecular biology receive assistance in planning and scheduling classes from faculty advisors. In addition to course work and laboratory courses, students also have the opportunity to learn by conducting research in various areas of biochemistry under faculty guidance.

Faculty and Facilities

The Department of Chemistry and Biochemistry is well staffed with 17 faculty members. All of the faculty have doctorate degrees from well-known universities. Most of them have considerable experience in postdoctoral or industrial research.

The research and teaching facilities for the department are housed in four buildings— A. Glenn Hill Center, Ladd Hall, Dunbar Laboratories, and the Quentin Burdick Building.

Advanced instruments and facilities are readily available. These include ultracentrifuges; gene synthesizer; nuclear magnetic, infrared, ultraviolet and mass spectrometers; gas and liquid chromatographs; computers; recombinant DNA and cell and tissue culture laboratories; and an advanced electron microscope facility.

Career Opportunities

Employment opportunities for biochemists are found at higher education institutions within the chemistry, biochemistry and biological sciences departments; in medical schools, hospitals, research institutes and government research laboratories; and in other health, energy, environment and agricultural research programs. Biochemists are employed at all levels in industries concerned with food processing, manufacturing, genetic engineering and marketing of drugs, cosmetics and pesticides, as well as in the petroleum and allied industrial complexes.

Earnings of persons trained in biochemistry vary, and the salary level depends largely upon the amount of formal training a person has received. Entry-level salaries for biochemists average $44,100 per year, based on 2016 data from www.payscale.com. For biochemists who have an advanced degree, salaries and opportunities are much greater.

High School Preparation

A strong high school background in English, mathematics (through trigonometry, if possible), biology, chemistry and physics is recommended.

Sample Program Guide

- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/biological-sciences/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/biological-sciences/)

Biological sciences is an exciting, rewarding area of science that prepares students for a variety of careers. Biology is at the intersection of many societal challenges including environmental quality and human health, and our students finish their degrees well prepared to help solve these problems. The program provides hands-on experience in biological research and focuses on student experience and interests. Department faculty are involved in scientific research that answers questions in molecular and cellular biology, evolution, population biology, ecology, and science education. Students interested in biological sciences will need a strong interest and aptitude in the sciences and possess the ability to think both analytically and comprehensively.

CAREER Opportunities

Students graduate with an excellent foundation to pursue rewarding careers or gain admission into graduate and professional programs. Our graduates pursue many different careers including medical doctors, optometrists, dentists, physician assistants, chiropractors, genetic counselors, veterinarians, state and federal wildlife biologists, naturalists, wildlife rehabilitators, directors of zoological parks, conservation biologists, environmental consultants, teachers, and researchers. Students leave well-prepared to continue in graduate degree programs that require a solid background in the biological sciences. Most professional scientists can anticipate graduate education as being essential for career advancement.

High School Preparation

High school students are encouraged to take year-long courses in biology, chemistry, physics, algebra, geometry and trigonometry and, if available, an advanced science course and pre-calculus.

The Program

The program integrates studies in zoology, botany, and biological sciences and offers students the flexibility to customize their field of study to align course selection with educational and professional goals. The program integrates broad-based biology foundation classes with specializations, such as biomedical science or conservation biology, in later years. With appropriate course selection, the biological sciences degree provides a broad understanding of the complex relationship between the living and nonliving world. Students choose a research-based course in biology that focuses on antibiotics, wild-life ecology and conservation, STEM education, genomics, or biomedical research. Students have the option to choose an emphasis in Biomedical Science, Ecology and Conservation, or Environmental Sciences. Students planning to enter a health professional program, such as medical school, should refer to the plan of study for the Biomedical Science emphasis. Minors are available in Zoology and Botany with a Biological Sciences minor option for non-biology majors.

PROGRAM OUTCOMES

1. Makes connections between biology, the physical sciences and math.
2. Identifies scientific issues and uses the scientific method, including experimental design, data collection, analysis, and interpretation.
3. Understands the philosophical underpinnings of scientific reasoning.
4. Demonstrates the ability to use sources of information in biology, including published literature and scientific databases, and to evaluate the quality of information sources.
5. Demonstrates the ability to acquire and analyze experimental data and use quantitative analysis to interpret biological data.
6. Demonstrates the ability to develop numerical and graphical models and to simulate biological mechanisms.
7. Demonstrates the ability to use scientific techniques necessary for date gathering and analysis.
8. Communicates effectively in writing, speech, and visual presentations within a variety of contexts.
9. Understands the role of teamwork and individual effort in scientific endeavors; discusses issues constructively and appreciates different ideas and viewpoints.
10. Understands professional standards in science and its applications, including the responsible use of information.

Related Experiences

Career and professional program opportunities are enhanced by work experiences and extra-curricular involvement including student organization participation, internships, volunteering, work and research experiences. Part-time, science-related work and research experiences are available in several North Dakota State University departments, as well as at the nearby U.S. Department of Agriculture laboratories. Off-campus work, such as summer employment with public agencies or private organizations, is especially valuable and has sometimes been the entry point for a first permanent position after graduation. NDSU offers many extra-curricular activities, including student organizations suitable to diverse personal and professional interests.

Accelerated Program

The Department of Biological Sciences offers an Accelerated Bachelor and Master of Science program. The program allows students to begin thesis research during their junior year and simultaneously pursue their Bachelor of Science and Master of Science degrees in biological sciences. Students will work closely with a faculty member in our department who will serve as a mentor. The program is designed to produce a research-based master's degree. Students must be at junior standing with a minimum cumulative GPA of 3.5.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

First Year			
Fall	**Credits**	**Spring**	**Credits**
BIOL 189	1	BIOL 151 & 151L	4
BIOL 150 & 150L	4	CHEM 122 & 122L	4

  catalog.ndsu.edu/programs-study/undergraduate/biological-science/ (http://catalog.ndsu.edu/programs-study/undergraduate/biological-science/)

Major Requirements

Major: Biological Sciences

Degree Type: B.A. or B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.

5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**
Category W: Wellness †		**2**
Category D: Cultural Diversity *†		
Category G: Global Perspectives *†		
Total Credits		**39**

*****

Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†

General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Code	Title	Credits
Biological Sciences Core Requirements		
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	4
BIOL 151 & 151L	General Biology II and General Biology II Laboratory	4
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory (May satisfy general education category s)	4
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory (May satisfy general education category S)	4
MATH 146	Applied Calculus I (May satisfy general education category R) [2]	4
or MATH 165	Calculus I	
STAT 330	Introductory Statistics	3
BIOL 189	[1]	1
BIOL 270	Undergraduate Research Experience: Antibiotic Discovery	3
or BIOL 271	Undergraduate Research Experience: Diet and Exercise Physiology	
or BIOL 272	Undergraduate Research Experience: Health and Wellness Decisions	
or BIOL 273	Undergraduate Research Experience: Genomic Analysis	
or BIOL 274	Undergraduate Research Experience: Biomedical Research Analysis	
or BIOL 275	Undergraduate Research Experience: Insect Behavior	
BIOL 315 & 315L	Genetics and Genetics Laboratory	4

BIOL 359	Evolution	3
Emphasis Area		
Select one of the emphasis areas listed below to complete the major requirements		29-59
Total Credits		**63-93**

1

BIOL 189 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take BIOL 189.

2

Students interested in graduate programs that require 2 semesters of calculus should take MATH 165 and 166.

Standard emphasis

Code	Title	Credits
BIOL 364	General Ecology	3
or BIOL 370	Cell Biology	
Select one from the following:		3 or 8
CHEM 240	Survey of Organic Chemistry (or)	
CHEM 341 & 341L & CHEM 342 & CHEM 342L	Organic Chemistry I and Organic Chemistry I Laboratory and Organic Chemistry II and Organic Chemistry II Laboratory	
Select one from the following:		3 or 8

BIOL Courses	Choose an additional 12 credits of 300 - 400 level BIOL courses offered by the department	12
Total Credits		**49-59**

Degree and Program Note:

- Botany and/or Zoology minors: Students completing a botany or zoology minor along with their biological sciences major must take a 300 or 400 level elective in the minor that is different from any 300 or 400 level electives taken for the major emphasis area. The only classes that students can take in common for the biological sciences major and the botany and/or zoology minor are the BIOL 150/150L, BIOL 151/151L, and BIOL 359 courses.
- Except for courses offered only with pass/fail grading, no course may be requested to take as Pass/Fail grading for this major.

Minor Requirements

Minor: Biological Sciences

Required Credits: 17

Minor Requirements

Code	Title	Credits
Required Courses		
BIOL 150	General Biology I	3
BIOL 150L	General Biology I Laboratory	1
BIOL 151	General Biology II	3
BIOL 151L	General Biology II Laboratory	1
BIOL 359	Evolution	3
Select one of the following:		**3**
BIOL 364	General Ecology	
BIOL 370	Cell Biology	
Electives: Select one of the 300-400 level courses listed below		**3**
BIOL 364	General Ecology (if not used above)	
BIOL 370	Cell Biology (if not used above)	
BIOL 410	Comparative Chordate Morphology	
BIOL 414	Plant Systematics	
BIOL 444	Vertebrate Histology	
BIOL 450	Invertebrate Zoology	
BIOL 452	Ichthyology	
BIOL 454	Herpetology	
BIOL 456	Ornithology	
BIOL 458	Mammalogy	
BIOL 460	Animal Physiology

BIOL 462	Physiological Ecology	
BIOL 463	Animal Behavior	
BIOL 464	Endocrinology	
BIOL 465	Hormones and Behavior	
BIOL 470		
BIOL 472	Structure and Diversity of Plants and Fungi	
BIOL 475	Conservation Biology	
BIOL 476	Wildlife Ecology and Management	
BIOL 477	Wildlife and Fisheries Management Techniques	
BIOL 479		
BIOL 480	Ecotoxicology	

BIOL 481	Wetland Science
BIOL 482	Developmental Biology
BIOL 483	Cellular Mechanisms of Diseases
Total Credits	**17**

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- Classes taken for the biological sciences minor cannot be double-counted with courses taken to fulfill botany and/or zoology minors. The credits must be unique from courses used to fulfill the biological sciences minor. The only classes that can be double counted are BIOL 150/L, 151/L, and 359.

Biological Sciences Education

Department Information

- **Department Web Site:**
  www.ndsu.edu/education/ (http://www.ndsu.edu/education/)
- **Credential Offered:**
  B.S.; B.A.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/biological-sciences-education/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/biological-sciences-education/)

Biological sciences, in the broadest sense, is the study of life in the natural world. As such, it is a subject of great diversity and requires a background in many academic disciplines. Teaching biological sciences in middle or secondary schools requires deep knowledge of (a) science content, (b) current theories of adolescent development, and (c) current best practices in middle and secondary instruction. Accordingly, the biological sciences education major combines coursework in biology and related sciences with professional education courses on teaching and learning.

The Program

Candidates in biological sciences education are prepared to teach students in grades 5-12 with skill and confidence. The program is designed to develop science content knowledge as well as proficiency in a range of science-related skills and laboratory practices. Our professional education courses prepare teacher candidates to incorporate active learning strategies, create effective methods for assessment, and adjust instruction to accommodate diverse learners. Teacher candidates also apply their knowledge and build their teaching skills during multiple clinical experiences in local schools.

Professional Education Courses

Teacher candidates may enroll in the 300-level professional education courses before applying to be formally admitted to the School of Education (SOE). Prior to enrolling in the 400-level courses, teacher candidates must complete the application for admission to the SOE; attain a minimum of a 2.75 grade point average overall in their course work and education courses; and pass the Praxis Core Academic Skills for Educators test or meet minimum scores on the ACT+. Requirements for admission can be found on the School of Education website (https://www.ndsu.edu/education/).

STUDENT TEACHING

Student teaching (clinical practice) is the culmination of the teacher preparation program. During the clinical practice, teacher candidates apply the knowledge and skills acquired in their college courses to real-world classrooms under the supervision of experienced classroom teachers in middle or secondary schools. Faculty members from NDSU conduct regular on-site visits to support, encourage, and evaluate teacher candidates so that they gain the confidence and ability to join the teaching profession after graduation.

STUDENT ADVISEMENT

Biological sciences teacher candidates are assigned to academic advisors who work closely with them to plan their programs of study and to advise and assist them as they progress to degree completion. Students are encouraged to meet with their advisor at least once every semester, as well as whenever needed.

Licensure

Upon completing this program, teacher candidates are eligible for teacher licensure in biological sciences in most states. Students who take the Praxis Subject Assessment exam for Biology will be licensed to teach biology and related secondary courses, as well as middle school sciences. Teacher candidates who choose to take the Praxis Subject Assessment exam for General Science will be licensed to teach all areas of middle school and high school science. Our program is accredited by the Council for the Accreditation of Educator Preparation (CAEP) and approved by the North Dakota Education Standards and Practices Board (ESPB).

Career Opportunities

Science teachers are in high demand across the country, so our graduates usually obtain full-time employment in school districts shortly after graduation.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory	4
ENGL 324	Writing in the Sciences (May satisfy general education category C)	3
GEOL 105 & 105L	Physical Geology and Physical Geology Lab (May satisfy general education category G)	4
GEOL 106 & 106L	The Earth Through Time and The Earth Through Time Lab	4
Pick one of the following math classes:		3-4
MATH 105	Trigonometry	
MATH 146	Applied Calculus I	
MICR 202 & 202L	Introductory Microbiology and Introductory Microbiology Lab	3
Pick one of the following:		4
PHYS 120 & 120L	Fundamentals of Physics and Fundamentals of Physics Laboratory	
PHYS 211 & 211L	College Physics I and College Physics I Laboratory	
SOIL 217	Introduction to Meteorology & Climatology	3
STAT 330	Introductory Statistics (May satisfy general education category R)	3
Professional Education Requirements		
EDUC 321	Introduction to Teaching	3
EDUC 322	Educational Psychology	3
EDUC 451	Instructional Planning, Methods and Assessment	3
EDUC 481	Classroom Practice Methods of Teaching I: (Science)	3
EDUC 482	Classroom Practice/Methods of Teaching II: (Science)	3

EDUC 485	Student Teaching Seminar	1
EDUC 486	Classroom Management for Diverse Learners	3
EDUC 487	Student Teaching	9
EDUC 488	Applied Student Teaching	3
EDUC 489	Teaching Students of Diverse Backgrounds	3
Total Credits		**98-99**

Degree Requirements and Notes

- See School of Education (https://www.ndsu.edu/education/) for admission requirements.
- Courses taken P/F may not be used to satisfy any requirements.
- A grade of 'C' or better is required in all professional education courses.
- To be placed in student teaching, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required.
- To exit the program, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required as well as completing the Praxis Subject test and the Principles of Learning and Teaching test.
- Biological Sciences Majors: Electives taken for the Biological Sciences major cannot be double-counted with the Zoology minor. The only classes that can be double counted are BIOL 150/150L, 151/151L, and 359.

Biomedical Engineering

Department Information

- **Department Web Site:**
  www.ndsu.edu/coe/future_students/biomedical_engineering/ (http://www.ndsu.edu/coe/future_students/biomedical_engineering/)
- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/biomedical-engineering/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/biomedical-engineering/)

Biomedical engineering is highly relevant to the 21st century research and education needs of the citizens of North Dakota and providing opportunity to students in one of the highest demand fields today. The current high quality education received by engineering students at NDSU will be augmented with the biomedical engineering minor allowing graduates to more readily be able to contribute to the global demand for medical technologies and innovations. Employers are supportive and encouraging the addition of biomedical minor at NDSU.

Biomedical Engineering

Department Information

- **Department Web Site:**
  www.ndsu.edu/coe/future_students/biomedical_engineering/ (http://www.ndsu.edu/coe/future_students/biomedical_engineering/)
- **Credential Offered:**
  Minor
- **Program Overview:**

Minor Requirements

Minor: Biomedical Engineering

Required Credits: 21

Code	Title	Credits
Core Requirements		
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	4
BIOL 151	General Biology II	3
BME 220	Introduction to Biomedical Engineering	2
BIOL 370	Cell Biology	3

or BIOL 460	Animal Physiology	
Elective Requirements (at least 6 of the 9 credits must be courses with an engineering prefix of CE, ECE, IME, ME)		9
BIOC 461	Foundations of Biochemistry and Molecular Biology II	
BIOL 220	Human Anatomy and Physiology I	
BIOL 220L	Human Anatomy and Physiology I Laboratory	
BIOL 221	Human Anatomy and Physiology II	
BIOL 221L	Human Anatomy and Physiology II Laboratory	
BIOL 370	Cell Biology (if not used in the core)	
BIOL 460	Animal Physiology (if not used in the core)	
CE 486	Nanotechnology and Nanomaterials	
ECE 483	Instrumentation for Engineers	
ECE 485	Biomedical Engineering	
ECE 486	Biosensing Technology	
ECE 487	Cardiovascular Engineering	
ECE 488	Cardiovascular Engineering II	
IME 411	Human Factors Engineering	
IME 453	Hospital Management Engineering	
ME 331	Materials Science and Engineering	
ME 468	Introduction to Biomechanics	
ME 480	Biofluid Mechanics	
ME 486	Nanotechnology and Nanomaterials	
MICR 445	Animal Cell Culture Techniques	
Undergraduate Research or Individual Study (maximum 3 credits): ENGR/ME/ECE/CE/IME/ABEN 193, 293, 393, 493, 194, 294, 394 or 494		
Total Credits		**21**

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- Course pre-requisites apply.
- At least 12 credits that apply to this minor must be unique from courses that apply to the student's major.

Biotechnology

Department Information

- **Department Web Site:**
  www.ndsu.edu/agriculture/academics/academic-units/microbiological-sciences (http://www.ndsu.edu/agriculture/academics/academic-units/microbiological-sciences/)
- **Credential Offered:**
  B.S.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/biotechnology/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/biotechnology/)

Biotechnology is an interdisciplinary field that combines biology and technology to design and produce new molecules, plants, animals, and microorganisms with improved characteristics. Biotechnology offers seemingly unlimited opportunities to combine genes from related or unrelated species to produce useful organisms with desirable properties not previously found in nature.

Biotechnology may be considered a collection of technologies using animal and/or plant cells, biological molecules, molecular biology processes, and genetic engineering for applications in medicine, agriculture, and the pharmaceutical industry. The technologies include the use of recombinant DNA for gene cloning and gene transfers between organisms; culture of plant and animal cells and tissues; fusion of animal cells or plant protoplast; the regeneration of whole plants from single cells and the large-scale fermentation processes that use some of these novel organisms for the production of pharmaceuticals, diagnostic tests for diseases, feed additives, enzymes, and hormones.

Examples of successful biotechnology include the development of crop plants resistant to herbicides or insects, the production of human growth hormone and insulin by genetically engineered bacteria, and the development of unique vaccines.

CAREER OPPORTUNITIES

Biotechnology continues to develop rapidly into new research areas. Surveys indicate there will be a continuing high demand for well-educated personnel. Job opportunities are found in college and university life science departments, private and government research institutes, food production, pharmaceutical and agrochemical industries, and biotechnology industries. Graduates of this program have the educational background and laboratory experience to take advantage of any of these job opportunities. Graduates of the biotechnology program are now successful and productive scientists at pharmaceutical, agrochemical, and biotechnology companies, as well as government and private research institutions here in Fargo and throughout the country.

Scholarship Opportunities

- Biotechnology Scholarship, ~$200

HIGH SCHOOL PREPARATION

Students entering the biotechnology program should have a strong background in mathematics, including trigonometry, biology, chemistry, physics, writing and computer courses. A composite ACT score of 26 or higher is recommended.

TRANSFER STUDENT PREPARATION

Transfer students are strongly advised to take transferable general education and intro biology and chemistry courses in preparation for upper-level science courses at NDSU.

The Curriculum

The recommended course of study includes courses to develop special skills needed to enter the rapidly expanding and changing biotechnology field. In addition to the required courses, students may select from various specialized elective science courses to help develop a particular area of interest. Students majoring in biotechnology are required to either complete an internship or perform a research project in the laboratory of a faculty advisor. The biotechnology program leads to a Bachelor of Science degree.

Program Outcomes

1. Demonstrate a familiarity with professional and ethical behavior in biotechnology.
2. Identify and explain biotechnology discipline-specific knowledge and concepts.
3. Describe the process of scholarly inquiry in biotechnology
4. Perform classical and modern biotech techniques with consistency.
5. Communicate scientific results and scientific understanding to a chosen audience.
6. Participates effectively as a team member in collaborative work.
7. Exhibit professional skills and personal effectiveness to enter the job market.
8. Describe their role and begin participating in being civically responsible, contributing citizens, and creating inclusive environments.

Student organizations

We have an active Biotechnology and Microbiology Club that tours local businesses related to biotechnology and microbiology, hosts guest speakers currently working in the fields of microbiology and biotechnology, and meets for social events throughout the year.

The Faculty and Facilities

The faculty who advise, teach, and serve as research mentors for the biotechnology program are spread among several academic departments. The departments include plant sciences, biological sciences, biology, chemistry, biochemistry, and molecular biology; animal and range sciences; plant pathology; veterinary and microbiological sciences; and pharmaceutical sciences. Several North Dakota State University Center for Nanoscale Science and Engineering scientists and the on-campus USDA facilities also serve as research mentors.

Laboratory facilities and specialized equipment are used for instruction and research. These include animal and plant tissue culture facilities, small animal housing, electron and confocal microscopes, automated DNA sequencing equipment, equipment for performing microarray experiments, and NDSU Core Labs. The Core Labs are shared cutting-edge research facilities and include the Advanced Imaging and Microscopy Core, Core Biology Facility, Core Synthesis and Analytical Services, Biotech Innovation Core, and the Electron Microscopy Core Laboratory, among many other state-of-the-art facilities and equipment.

Most (approximately 60 percent) of biotechnology program graduates choose to continue their education in graduate or professional schools. Biotechnology program graduates have earned master's and doctoral degrees in many diverse areas, including cellular and molecular biology, biology,

microbiology, plant sciences, animal physiology, cancer biology, and virology, at many of the most respected universities in the United States. We also offer an accelerated bachelor of science pathway into a Master of Microbiology, completed both in 4-5 years.

POSTGRADUATE OPPORTUNITIES

Graduate School. The biotechnology major emphasizes experiential learning in coursework and research laboratories that provide the foundation to be successful in graduate school. We even offer an accelerated master's in microbiology program to help students optimize their timeline to complete their graduate degree while finishing their bachelor's degree.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Biotechnology

Degree Type: B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		

Category R: Quantitative Reasoning †	**3**
Category S: Science and Technology †	**10**
Category A: Humanities and Fine Arts †	**6**
Category B: Social and Behavioral Sciences †	**6**
Category W: Wellness †	**2**
Category D: Cultural Diversity *†	
Category G: Global Perspectives *†	
Total Credits	**39**

*****

Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†

General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major requirements

Code	Title	Credits
Biotechnology Requirements		
MICR 189	Skills for Academic Success [1]	1
CSCI 114	Computer Applications	3
or CSCI 122	Visual BASIC	
MATH 165	Calculus I	4
PHYS 211 & 211L	College Physics I and College Physics I Laboratory	4
PHYS 212 & 212L	College Physics II and College Physics II Laboratory	4
STAT 330	Introductory Statistics	3
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	4
BIOL 151 & 151L	General Biology II and General Biology II Laboratory	4
PLSC 315 & 315L	Genetics and Genetics Laboratory Cross-listed as BIOL 315/L	4
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory	4
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory	4
CHEM 341 & 341L	Organic Chemistry I and Organic Chemistry I Laboratory	4
CHEM 342	Organic Chemistry II	3
BIOC 460	Foundations of Biochemistry and Molecular Biology I	3
BIOC 461	Foundations of Biochemistry and Molecular Biology II	3
BIOC 474	Methods of Recombinant DNA Technology [2]	4
MICR 350 & 350L	General Microbiology and General Microbiology Lab	5
MICR 470	Basic Immunology [2]	3
MICR 471	Immunology and Serology Laboratory [2]	2
MICR 485	Capstone Experience I: Reflecting and Planning	1
MICR 486	Capstone Experience II: Reflection and Dissemination	1
Ethics - Select one philosophy/ethics course from the following:		3
PHIL 111	Professional Responsibility and Ethics	
PHIL 210	Ethics	
PHIL 215	Contemporary Moral Issues	
PHIL 216	Business Ethics	

PHIL 225	Environmental Ethics	
PHIL 327	Ethics, Engineering, and Technology	
Capstone - Select one of the following capstone experiences from the following:		2
MICR 493	Undergraduate Research (Research Experience) [3]	
MICR 494	Individual Study	
MICR 497	FE/Coop Ed/Internship (Internship Experience)	
Biotechnology Elective - Select one course from the following:		2-3
BME 220	Introduction to Biomedical Engineering	
MICR 455	Microbial Biotechnology [2]	
Genetics Elective - Select one course from the following:		3
ANSC 357	Animal Genetics [2]	
MICR 482	Microbial Genetics [2]	
PLSC 431	Intermediate Genetics [2]	
Physiology Elective - Select one course from the following:		3
MICR 480	Microbial Physiology [2]	
PLSC 380	Principles of Plant Physiology [2]	
BIOL 460	Animal Physiology [2]	
Major Electives - Select 9 credits from the following:		9
ABEN 263	Biological Materials Processing	
ABEN 456	Biobased Energy [2]	
ABEN 458	Process Engineering for Food, Biofuels and Bioproducts [2]	
ASM 234	3D Printing and Manufacturing	
BIOC 473	Methods of Biochemical Research [2]	
BIOC 487	Molecular Biology of Gene Expression [2]	
CFS 462	Food Ingredient Technology [2]	
CHEM 431	Analytical Chemistry I [2]	
CPM 436	Biopolymers and Biocomposites [2]	
ENVE 240	Microbiological Principles for Environmental Engineers	
IME 456	Program and Project Management	
MICR 352	Critical Skills in Microbiology	
MICR 352L	Critical Skills in Microbiology Laboratory Research	
MICR 445	Animal Cell Culture Techniques [2]	
MICR 481	Microbial Genomics with Computational Laboratory [2]	
PLSC 411	Genomics [2]	
PLSC 484	Plant Tissue Culture and Biotechnology [2]	
Total Credits		**90-91**

1

MICR 189 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take AGRI 189.

2

Courses that offer a 600 level dual course can be taken for the B.S./M.S. accelerated program. The 600 level courses have additional outcomes/ requirements that students will have to complete. Students approved for accelerated programs must complete and submit the *Accelerated Declaration form*, which will require the student and advisor to identify which graduate courses (no more than 15 credits) will be counted toward the B.S. degree.

3

The research may also be completed as BIOC or PLSC.

Degree Notes:

- An accelerated undergraduate to master's degree program is available for the B.S. in Biotechnology major to the M.S. in Microbiology. Students must have a 3.00 GPA. Instructions to apply can be found in the online catalog and a sample 5-year plan can be found on the departments website. Students may complete a thesis-based or comprehensive study-based master's program.

Minor Requirements

Minor: Biotechnology

Required Credits: 20

Code	Title	Credits
BIOC 460	Foundations of Biochemistry and Molecular Biology I	3
BIOC 461	Foundations of Biochemistry and Molecular Biology II	3
PLSC 315 & 315L	Genetics and Genetics Laboratory	4
Biotechnology Technique Electives: Select 4 credits from the following:		4
BIOC 473	Methods of Biochemical Research	
BIOC 474	Methods of Recombinant DNA Technology	
MICR 445	Animal Cell Culture Techniques	
MICR 471	Immunology and Serology Laboratory	
PLSC 484	Plant Tissue Culture and Biotechnology	
Specialized Electives: Select 6 credits from the following:		6
ANSC 314		
ANSC 357	Animal Genetics	
MICR 455	Microbial Biotechnology	
MICR 470	Basic Immunology	
MICR 480	Microbial Physiology	
MICR 482	Microbial Genetics	
PLSC 380	Principles of Plant Physiology	
PLSC 431	Intermediate Genetics	
BIOL 370	Cell Biology	
BIOL 460	Animal Physiology	
Total Credits		**20**

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.

Botany

Department Information

- **Department Web Site:**
  www.ndsu.edu/biology/ (http://www.ndsu.edu/biology/)
- **Credential Offered:**
  Minor
- **Program Overview:**
  catalog.ndsu.edu/programs-study/undergraduate/biological-science/ (http://catalog.ndsu.edu/programs-study/undergraduate/biological-science/)

BIOL 359	Evolution	3

BIOL 472	Structure and Diversity of Plants and Fungi	3
300-400 Elective: Select from the following:		3
BIOL 414	Plant Systematics	
BIOL 461	Plant Ecology	
BIOL 475	Conservation Biology	
PLSC 380	Principles of Plant Physiology	
Total Credits		**17**

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- *Biological Sciences Majors: Electives taken for the Biological Sciences major cannot be double-counted with the Botany minor. The only classes that can be double counted are BIOL 150/150L, 151/151L, and 359.*

Business Administration

Department Information

- **Department Web Site:**
  www.ndsu.edu/business/ (http://www.ndsu.edu/business/)
- **Credential Offered:**
  B.S.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/business-administration/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/business-administration/)

The global economy offers a vast array of career opportunities for professionals with a collegiate education in business. Businesses need individuals who not only understand the fundamentals of business practice, but who are adaptable in rapidly changing business environments. The business administration program has evolved to meet the needs of organizations and students by providing our students with a broad knowledge base in management, marketing, entrepreneurship, business law, accounting, finance, international business, and management information systems – with a blend of theory and practice. A broad understanding of business is particularly of value for individuals who operate in entrepreneurial firms, smaller enterprises, and organizations that need flexibility and multi-functional knowledge from their employees. Individuals who aspire to own their businesses or go on to graduate studies (e.g., law school) would also benefit from such a broad business knowledge base. Our graduates of the business administration program gain employment in business and non-profit organizations, pursue their own businesses and graduate studies, and enhance their abilities to manage business operations, analyze business opportunities/challenges, work as a team, and make sound decisions.

Background Information

The Association to Advance Collegiate Schools of Business (AACSB International) accredits the undergraduate and graduate programs in the College of Business at North Dakota State University. Our College of Business is one of only two AACSB-accredited schools of business in North Dakota.

AACSB International is one of higher education's most prestigious and rigorous accrediting bodies, emphasizing a commitment to continuous improvement, innovation, engagement, and impact in business education. Less than 10 percent of business programs worldwide have this accreditation, highlighting the academic excellence of our College of Business at NDSU.

The Program

The Business Administration major is a four-year program that is offered in a traditional face-to-face format or fully online. The major comprises a curricular blend of general education, pre-major course work, fundamental business knowledge (accounting, finance, management, marketing, and information systems), business law, entrepreneurship, international business, and business elective courses. The curriculum of this major is also designed with a 21-credit business elective block plus 3 credits of 300/400 level free electives built into the program. These electives allow students to pursue their personal or professional interest in certain business domains, which can be in the form of a specific track, certificate/minor (e.g., Professional Selling, Entrepreneurship, Organizational Leadership), and/or topic-based courses fitting the business knowledge/skills they want to develop. The program nurtures important business skills and administrative competencies including managing/overseeing business enterprises, ability to analyze business opportunities/challenges, legal and international awareness, interpersonal skills, and teamwork. Business Administration students are thus prepared to perform and manage various administrative and functional activities in business enterprises and non-profit organizations.

Selective Admission

Students who wish to study business administration at NDSU enroll as pre-business students in the College of Business for their first semester of their first year. Admission to the major requires the successful completion of the pre-major course requirements (i.e., ENGL 120, COMM 110, MATH 144,

ECON 201 or 202, and PSYC 111 or SOC 110) and a minimum cumulative grade point average (GPA) of 2.50. Transfer students may also be eligible for immediate admission in the major. Contact a College of Business professional advisor for more information.

The Faculty

To provide a rigorous and relevant educational experience to our students, faculty in our program are highly qualified in their respective areas of expertise. Our faculty have been recognized for their teaching excellence by their students and colleagues and for their outstanding research by their peers. They employ a wide variety of instructional techniques and embed both classical and cutting-edge knowledge into their classes. They remain current in their fields by actively engaging in research and/or with firms and business professionals regarding their business practice, challenges, and issues.

The Practicum

Business administration majors are encouraged to complete practicum experiences, ideally at the end of sophomore and junior years. The practicum is designed to enable our students to connect business concepts learned in the classroom with live business situations and to broaden their horizons beyond the classroom setting. The practicum also gives students a competitive edge in job placement.

Career Opportunities

Graduates with a business administration major have career opportunities in business, industry, government service and the non-profit sector, both regionally and globally. Employment opportunities for business administration majors are significant as business-related activities and administrative functions are needed in every type of business and organization, whether for-profit or not-for-profit. Major job categories include business operations, business analyst, human resource management, product/service management, retail management, small business owner, and entrepreneurship venture.

Minor in Business Administration

A minor in business administration can be a perfect choice for students with non-business majors who want to enhance their marketability through business knowledge and skills. The curricular details are available at https://www.ndsu.edu/business/programs/. This minor is not available to students with majors in the College of Business.

The College

In addition to the business administration major, the College of Business offers undergraduate majors in accounting, finance, global business (second major only), management, management information systems, marketing, and supply chain management, as well as several minors and certificate programs. Details about undergraduate minors and certificate programs are available at https://www.ndsu.edu/business/programs/undergraduate/. The College of Business also offers six graduate programs including Master of Business Administration, MBA in Agribusiness, Master of Accountancy, Master of Science in Business Analytics, Master of Supply Chain Management, and a Doctorate in Transportation and Logistics, as well as several graduate certificate programs. Details about graduate certificate programs can be found at https://www.ndsu.edu/business/programs/graduate/graduate_certificates/.

High School Preparation

It is recommended that high school students interested in studying business administration at the university level take mathematics courses at least through pre-calculus. High school electives in the social sciences, communication, and English also would be beneficial. Students who have satisfactorily completed Advanced Placement courses in Calculus, Economics, English, Communication, and Psychology or Sociology may directly apply for admission to the major. Please speak with a professional advisor in the College of Business for more information.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Business Administration

Degree Type: B.S.
Minimum Credits Required for Degree: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Business Administration Elective (300-400 level)		
This 300-400 level elective can be external to the CoB and must be satisfied with a single 3-credit 300-400 level course (includes courses cross-listed with CoB prefix courses). It cannot be used to satisfy other requirements.		3
Total Credits		**77**

1

Take the second course of the pair, which was not taken for admission to the major program.

2

Denotes Common Body of Knowledge (CBK) course.

Degree Requirements and Notes

- Students follow the published curricula for the business administration program of study from the semester/year of entrance in the College of Business (CoB) to graduation, provided enrollment at NDSU has not been discontinued for more than one year. Students who change their major are subject to meeting the curricular requirements in effect at the time the new major is declared.
- The CoB accepts a maximum of up to (but not including) 50% of upper-division (300-level and 400-level) business courses[A] required for degree completion, with a minimum grade of C[B]. All transfer courses are subject to approval by the course discipline chair or designated representative.

  A. Defined as courses with the following prefixes: ACCT, BUSN, ENTR, FIN, MGMT, MIS, MRKT, SCM.

  B. Credits that do not qualify for degree completion will still be accepted as general credits towards graduation, within the restrictions defined by university policy.

- Admission to the business administration major is required to enroll in advanced 300 or 400 level CoB courses.
- A grade of 'C' or better is required in transfer courses accepted for all accounting, business administration, finance, management, management information systems, and marketing courses.
- No courses for the major may be taken with Pass/Fail grading.
- Of the credits completed in residence at least 30 credits must be in 300-400 level CoB courses.
- Students must be accepted to the Business Administration major prior to the completion of the last 30 credits in 300 and 400 level CoB courses.
- For multiple majors within CoB, at least 15 unique credits of 300-400 level CoB courses must exist between the majors.
- Internship and cooperative education credits may be applied toward the total credits required for graduation as non-major electives.
- Student may choose to take the Supply Chain Management Track within the Business Administration major.

Supply Chain Management Track

Code	Title	Credits
SCM 320	Integrated Supply Chain Management	3

Total Credits		**24**

1 The following courses are excluded from the 300-400 level electives: BUSN 413, and ENTR 496.

Minor Requirements and Notes

- This minor is not available to students with majors in the College of Business.
- To enroll in 300/400 level college of business courses, students must have 2.5 minimum institutional cumulative GPA.
- Departmental approval is required for any course (including Tri-College) NOT completed at NDSU and used to satisfy the minor requirements (6 credits maximum).

- Students must earn a 2.50 minimum GPA, which is based upon the courses used to satisfy the minor requirements. Minors must satisfy all course prerequisites.

Business Analytics

Department Information

- **Department Web Site:**
  www.ndsu.edu/business/ (http://www.ndsu.edu/business/)
- **Credential Offered:**
  UG Certificate
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/business-analytics/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/business-analytics/)

The Business Analytics Certificate is designed for those students who wish to prepare themselves for professional careers in data science or business analytics. Business analytics is the practice of transforming data into insights for making informed decisions in a business setting. The certificate equips students with skills to develop actionable decisions or recommendations for actions based on insights from data by applying tools, techniques, and principles of analytics to solve complex business problems. Examples of career opportunities include operations analyst, marketing analyst, financial analyst, business analyst, and data scientist.

  www.ndsu.edu/education/ (http://www.ndsu.edu/education/)
- **Credential Offered:**
  B.S.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/business-education/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/business-education/)

Business education is a multi-disciplinary program that will prepare teacher candidates to be licensed as a business education teacher. The plan of study encompasses coursework from teacher education, business, computer sciences, and communication departments. The business education major includes a broad range of content and professional education courses so that teacher candidates fully understand (a) the discipline of business

education, (b) current theories of adolescent development, and (c) current best practices in middle and secondary instruction. Teacher candidates also apply their knowledge and build their teaching skills during multiple clinical experiences in local schools.

THE PROGRAM

Candidates in the business education major are prepared to teach students in grades 5-12 with creativity and confidence. Teacher candidates will gain knowledge and skills in business, management, marketing, accounting, computing, software development, web design, and database systems. Our professional education courses prepare teacher candidates to incorporate active learning strategies, create effective methods for assessment, and adjust instruction to accommodate diverse learners.

PROFESSIONAL EDUCATION COURSES

Teacher candidates may enroll in the 300-level professional education courses before being formally admitted to the School of Education (SOE). Prior to enrolling in the 400-level courses, teacher candidates must complete the application for admission to the SOE; attain at least a 2.75 grade point average in overall course work and education courses. Teacher candidates must also pass the Praxis Core Academic Skills for Educators exam or meet minimum scores on the ACT+. Additional requirements for admission are available on the **School of Education website**.

STUDENT TEACHING

Student teaching (clinical practice) is the culmination of the teaching program. During the clinical practice, teacher candidates apply the knowledge and skills acquired in their college courses to real-world classrooms under the supervision of experienced business teachers in middle or secondary schools. Faculty members from NDSU conduct regular on-site visits to support, encourage, and evaluate student teachers so that they gain the confidence and skills to join the teaching profession after graduation.

STUDENT ADVISEMENT

An academic advisor works individually with Business Education majors to plan their programs of study and to advise and assist them as they progress to degree completion. Students are encouraged to seek their advisor's help whenever needed.

LICENSURE

Upon completing this program, teacher candidates are eligible for teacher licensure in business education in most states. Our program is accredited by the Council for the Accreditation of Educator Preparation (CAEP) and approved by the North Dakota Education Standards and Practices Board (ESPB).

CAREER OPPORTUNITIES

Business teachers are in high demand across the country, so our graduates usually obtain full-time employment in school districts shortly after graduation. In addition to teaching careers, business education graduates can choose to seek advanced degrees in business or obtain careers as corporate trainers, managers, or entrepreneurs. Many options are available because a business education degree effectively teaches students to think critically, synthesize information, write and speak clearly and concisely, and to work effectively on teams.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Degree Notes:

- This degree plan will allow students to earn a Business Administration minor by completing the following courses totaling 24 credits: ACCT 102, ECON 105, MRKT 320, MGMT 320, MGMT 470, BUSN 340, BUSN 430, and MIS 320. This minor requires a minimum GPA of 2.5 in the courses that make up the minor. Students must officially declare this minor through the Office of Registration and Records to ensure the credential is posted to record.
- A grade of 'C' or better is required in all courses with an EDUC prefix.
- Courses taken *Pass/Fail* will not be used to satisfy any requirement other than total credits for graduation.
- See School of Education (https://www.ndsu.edu/education/) for admission requirements.
- To be placed in student teaching, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required.
- To exit the program, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required as well as completing the Praxis Subject test and the Principles of Learning and Teaching test.

Chemistry

Department Information

- **Department Web Site:**
  www.ndsu.edu/chemistry/ (http://www.ndsu.edu/chemistry/)
- **Credential Offered:**
  B.S.; B.A.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/chemistry/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/chemistry/)

The chemistry undergraduate major and its specialized options at North Dakota State University provides opportunities for personal achievement and professional training that are typically not available at many universities. Faculty teach all major courses. Students use state#of#the#art instrumentation in their laboratory courses. Many students get involved in fundamental and applied research with faculty research groups and have growth experiences commonly available only to graduate students. Future secondary chemistry and science teachers can participate in supervised laboratory teaching and peer mentoring programs.

Background Information

Industry and graduate schools are well aware of the quality of the undergraduate education at NDSU and actively seek out our graduates. Scholarships, fellowships and employment in research groups or in supervised teaching activities can cut the already modest cost of an NDSU education by one#half or more.

The Program

The Department of Chemistry and Biochemistry is fully accredited by the American Chemical Society (ACS) and offers programs leading to an ACS#certified Bachelor of Science degree. Options in biochemistry or coatings and polymeric materials can be added to the curriculum. A pre-professional option for those planning on medical, dental and other professional schools is also available. A chemistry major may be combined with secondary school teacher certification with as little as one additional semester for student teaching.

The prescribed curriculum provides a solid grounding through classroom and laboratory work in all of the main areas of chemistry. Major laboratory courses are designed to utilize the latest synthesis and characterization methods and employ advanced, computer-interfaced instrumentation.

Our pre-professional option includes the course work in biological and biochemical sciences that easily meets the requirements of medical, dental and other health#related professional schools. A chemistry major offers rigorous pre-professional education, as well as a back-up option in case career plans change in the future.

Research Opportunities

Almost every chemistry faculty member is heavily involved in forefront research, and undergraduates are encouraged to participate in that research. Students gain important skills and are exposed to the excitement of the hunt for new knowledge. This research experience often helps students define career goals more sharply.

Career Opportunities

People often think of the professional chemist as one who stands at a workbench in an industrial laboratory carefully manipulating chemicals or instruments. A lot of chemists are employed this way. This is often quite satisfying since many people are drawn to chemistry because they enjoy laboratory work. There are, however, many other tasks besides laboratory research in which a chemist may engage, and many different careers for which he or she can prepare for a degree in chemistry. A chemist may be employed in government, business, industry or education. Besides basic and applied research (the lab bench), an industrial chemist may be involved in production, technical service (assisting people who use products), national and international marketing and sales, or management and corporate planning. Some chemists prefer self#employment through small business or consulting firms.

Analytical chemists are in demand for services to other departments within a chemical company, for quality control in large and small concerns, and for environmental monitoring by industrial, governmental and private organizations. Organic chemists, also in great demand, study new pharmaceuticals, polymers and other compounds. Materials chemists are needed by all high#tech industries for their synthesis and characterization skills. Inorganic chemists work on the full range of synthesis, characterization and application of chemical compounds. Physical chemists model chemical structures and reactions, and design experiments and equipment to study them. The Department of Chemistry and Biochemistry offers specialized education and training in each of these fields.

A degree in chemistry can serve as excellent preparation for careers in medicine, dentistry and other health professions. A chemistry degree also can lead to law school, and perhaps a career in patent law, a very demanding and in#demand technical profession. About half of NDSU's chemistry graduates go on to graduate or professional schools. Almost all the rest go directly into industry. Average entry-level salaries for chemistry graduates is $45,300 to $81,400, based on 2016 data from www.payscale.com (http://www.payscale.com). For chemists who have advanced degrees, salary and opportunities are often much greater.

Faculty and Facilities

The Department of Chemistry and Biochemistry has 17 faculty members. All of the faculty have doctorate degrees from leading universities.

Most of the Department of Chemistry and Biochemistry's teaching and research facilities are located in Sugihara Hall, which opened in 2022. Some additional teaching laboratories are located in the A. Glenn Hill Center, and biochemistry research labs are in the Quentin Burdick Building. Students are trained in the use of state#of#the#art equipment, some of which is duplicated at only a few sites in the world. Some undergraduate students are trained to use several powerful and sophisticated laser systems, and some have even built lasers that were put directly to work on research projects. Nuclear magnetic resonance spectrometry, X-ray diffraction and fluorescence are as up#to#date as one would expect to find at any major research university. Theoretical chemistry researchers use some of the most powerful computers on the NDSU campus.

High School Preparation

Ideal high school preparation for a chemistry major includes four years each of English and mathematics, and a year each of biology, chemistry and physics. Experience with personal computers is also desirable. Strong writing and communication skills are as important to success in chemistry as they are in any technical field.

Financial Support

A number of endowed scholarships and fellowships are available to highly qualified applicants. The Department of Coatings and Polymeric Materials offers industry#funded scholarships and fellowships to chemistry majors interested in taking the coatings and polymeric materials option. In addition, more than half of the students majoring in chemistry are engaged in research and earning substantial portions of their living expenses. Financial support for research experiences is provided principally by grants and contracts of faculty researchers, various summer Research Experiences for Undergraduates (SURE) programs, and national scholarship and fellowship programs, such as the Goldwater Foundation. Since 1992, nine students in the department have been awarded Goldwater Fellowships, which cover all educational expenses. Students interested in secondary school teaching have additional funding opportunities as laboratory teaching assistants and discussion leaders in a peer#tutoring program known as Supplemental Instruction. These positions not only provide an opportunity for help toward meeting expenses but also in adding relevant experience to resumes.

Sample Program Guide

B.S. Chemistry, ACS Certified

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

First Year				
Fall	**Credits**		**Spring**	**Credits**

Major Requirements

Major: Chemistry

Degree Type: B.A. or B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.

7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**
Category W: Wellness †		**2**
Category D: Cultural Diversity *†		
Category G: Global Perspectives *†		
Total Credits		**39**

*****

Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†

General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Except for courses offered only as pass/fail grading, no course may be taken Pass/Fail.

Code	Title	Credits
Chemistry Core Requirements		
Select one from the following:		4
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory	
CHEM 150 & CHEM 160	Principles of Chemistry I and Principles of Chemistry Laboratory I	
Select one from the following:		4
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory	
CHEM 151 & CHEM 161	Principles of Chemistry II and Principles of Chemistry Laboratory II	
CHEM 341	Organic Chemistry I	3
CHEM 342	Organic Chemistry II	3

PHYS 252 & 252L	University Physics II and University Physics II Laboratory	5
Program Option		
Select one of the five options listed below to complete the major.		13-35
Total Credits		**75-97**

Option 1: ACS Certified Chemistry

Code	Title	Credits
CHEM 425 & CHEM 429	Inorganic Chemistry I and Inorganic Chemistry Laboratory [1]	6
CHEM 432 & 432L	Analytical Chemistry II and Analytical Chemistry II Laboratory [1]	4
MATH 266	Introduction to Differential Equations	3
Total Credits		**13**

Option 2: ACS Certified w/Biochemistry Option

Code	Title	Credits
BIOC 461	Foundations of Biochemistry and Molecular Biology II [1]	3
BIOC 473	Methods of Biochemical Research [1]	4
BIOC 474	Methods of Recombinant DNA Technology	4
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	4
CHEM 425 & CHEM 429	Inorganic Chemistry I and Inorganic Chemistry Laboratory [1]	6
MATH 266	Introduction to Differential Equations	3
MICR 350 & 350L	General Microbiology and General Microbiology Lab	5
Select 6 credits of the following (Biology):		6
BIOL 315 & 315L	Genetics and Genetics Laboratory	
MICR 352	Critical Skills in Microbiology	
BIOL 370	Cell Biology	
Total Credits		**35**

Option 3: Coating & Polymeric Materials

Code	Title	Credits
CHEM 425 & CHEM 429	Inorganic Chemistry I and Inorganic Chemistry Laboratory [1]	6
CHEM 471	Physical Chemistry Laboratory	2
CHEM 432 & 432L	Analytical Chemistry II and Analytical Chemistry II Laboratory [1]	4
CPM 473	Polymer Synthesis	3
CPM 474 & CPM 484	Applied Polymer Science and Coatings I Laboratory	5

CPM 475 & CPM 485	Coatings' Materials Science and Coatings II Laboratory	5
MATH 266	Introduction to Differential Equations	3
Total Credits		**28**

Option 4: Pre-Professional Option

Code	Title	Credits
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	4
BIOL 220 & 220L	Human Anatomy and Physiology I and Human Anatomy and Physiology I Laboratory	4
BIOL 221 & 221L	Human Anatomy and Physiology II and Human Anatomy and Physiology II Laboratory	4
CHEM 425	Inorganic Chemistry I [1]	3
MATH 266	Introduction to Differential Equations	3
or STAT 330	Introductory Statistics	
MICR 350 & 350L	General Microbiology and General Microbiology Lab	5
Total Credits		**23**

Option 5: Chemistry Pre-Education

Application must be made to the School of Education in order to obtain a teaching degree.

Code	Title	Credits
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	4
CHEM 425	Inorganic Chemistry I [1]	3
EDUC 321	Introduction to Teaching	3
EDUC 322	Educational Psychology	3
MATH 266	Introduction to Differential Equations	3
or STAT 330	Introductory Statistics	
PHYS Elective		3
Recommended for Education Option		
BIOL 151 & 151L	General Biology II and General Biology II Laboratory	4
GEOL 105 & 105L	Physical Geology and Physical Geology Lab	4
Total Credits		**27**

Program Notes:

- Except for courses offered only as pass/fail grading, no course may be taken Pass/Fail.

Accelerated Program Notes:

- This major is eligible as an accelerated program for the student to earn a B.S./B.A. in Chemistry and a M.S. in Chemistry. Students may complete either a thesis or non-thesis option in the master's program.

1

Students in the accelerated program may substitute the 600 level course equivalent to use in both the undergraduate and graduate degree programs. **No more than 15 credits of 600 level coursework can apply to the undergraduate degree program.**

Minor Requirements

Minor: Chemistry

Required Credits: 19

Minor Requirements

Code	Title	Credits
Required Courses		
CHEM 121	General Chemistry I	3
CHEM 121L	General Chemistry I Laboratory	1
CHEM 122	General Chemistry II	3
CHEM 122L	General Chemistry II Laboratory	1
Electives		**11**
300-400 level courses in chemistry, biochemistry, or coatings & polymeric materials; one lab course required.		
Total Credits		**19**

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.

Chemistry Education

Degree Requirements and Notes

- See School of Education (https://www.ndsu.edu/education/) for admission requirements.
- Courses taken P/F may not be used to satisfy any requirements.
- A grade of 'C' or better is required in all professional education courses.
- To be placed in student teaching, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required.
- To exit the program, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required as well as completing the Praxis Subject test and the Principles of Learning and Teaching test.

Chemistry Education

Department Information

- **Department Web Site:**
  www.ndsu.edu/education/ (http://www.ndsu.edu/education/)
- **Credential Offered:**
  B.S.; B.A.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/chemistry-education/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/chemistry-education/)

Chemistry involves the study of the composition, structure, properties and interactions of matter. Chemistry is often considered a central or enabling science, because it is foundational to understanding other scientific disciplines. Teaching chemistry in middle and secondary schools requires deep knowledge of (a) science content, (b) current theories of adolescent development, and (c) current best practices in secondary instruction. Accordingly, the chemistry education major combines coursework in chemistry and related sciences with professional education courses on teaching and learning.

The Program

Candidates in chemistry education are prepared to teach students in grades 5-12 with skill and confidence. The program is designed to develop science content knowledge as well as proficiency in a range of science-related skills and laboratory practices. Our professional education courses prepare teacher candidates to incorporate active learning strategies, create effective methods for assessment, and adjust instruction to accommodate diverse learners. Teacher candidates also apply their knowledge and build their teaching skills during multiple clinical experiences in local schools.

Professional Education Courses

Teacher candidates may enroll in the 300-level professional education courses before being formally admitted to the School of Education (SOE). Prior to enrolling in the 400-level courses, teacher candidates must complete the application for admission to the SOE; attain a minimum of a 2.75 grade point average overall in their course work and education courses; pass the Praxis Core Academic Skills test or meet minimum scores on the ACT+. Requirements for admission can be found on the School of Education website (https://www.ndsu.edu/education/).

Student Teaching

Student teaching (clinical practice) is the culmination of the teaching program. During the clinical practice, teacher candidates apply the knowledge and skills acquired in their college courses to real-world classrooms under the supervision of experienced classroom teachers in middle or secondary schools. Faculty members from NDSU conduct regular on-site visits to support, encourage, and evaluate teacher candidates so that they gain the confidence and ability to join the teaching profession after graduation.

Student Advisement

Chemistry education teacher candidates are assigned to academic advisors who work closely with them to plan their programs of study and to advise and assist them as they progress to degree completion. Students are encouraged to meet with their advisor at least once every semester, as well as whenever needed.

licensure

Upon completing this program, teacher candidates are eligible for teacher licensure in most states. Teacher candidates who take the Praxis Subject Assessment exam for Chemistry will be licensed to teach Chemistry and related high school courses, as well as middle school sciences. Teacher candidates who choose to take the Praxis Subject Assessment exam for General Science will be licensed to teach all areas of middle school and high school science. Our program is accredited by the Council for the Accreditation of Educator Preparation (CAEP) and approved by the North Dakota Education and Standards Practices Board (ESPB).

Career OPPORTUNITIES

Science teachers are in high demand across the country, so our graduates usually obtain full-time employment in school districts shortly after graduation.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Civil Engineering

Department Information

- **Department Web Site:**
  www.ndsu.edu/ccee/ (http://www.ndsu.edu/ccee/)
- **Credential Offered:**
  B.S.C.E.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/civil-engineering/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/civil-engineering/)

Civil engineers are professionals who have broad technical knowledge, possess strong problem-solving skills, and enjoy working with people. The civil engineers work is directly related to public well-being and safety and has a significant impact on decision-making and planning processes. Civil engineers design solutions for the infrastructure of society and the environment in which we live.

Projects may include designing structures such as buildings, bridges, and sports stadiums; transportation infrastructure such as highways, railroads, pipelines, waterways, ports, and airports; water infrastructure like pipes, dams, and drainage; safe drinking water supply and waste systems; and averting damage from earthquakes, landslides and floods. The profession embraces new technologies such as nanotechnology, smart materials, sensors, robotics, etc. that are introduced into civil engineering projects to improve reliability, cost-effectiveness, and quality of life.

NDSU civil engineering graduates apply their skills in all fields of the profession domestically and abroad. With a strong and balanced technical and general education curriculum, they are highly sought by companies from all over the country at competitive salaries. The Bachelor of Science in Civil Engineering program is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org, under the commission's General Criteria and Program Criteria for Civil and Similarly Named Engineering Programs. In addition, a new 4+1 accelerated Master's degree in

civil engineering started in Fall 2021, which provides a path for excellent undergraduate students to complete a BS degree in the department and a Master's degree in Civil Engineering in 5 years.

PROGRAM EDUCATIONAL OBJECTIVES (PEO)

The following program educational objectives are consistent with the university, college and department missions. Graduates of our BS program in Civil Engineering program are expected within a few years of graduation to:

1. Engage successfully in the practice of engineering to solve current and emerging problems.
2. Conduct design in a manner that is ethical, includes diverse perspectives, and realizes the broader societal and sustainability implications of the design and decision-making process.
3. Ascend to leadership roles within the workplace via initiative and responsible stewardship
4. Advance their profession and communities through collaborative work, professional licensure, advanced degrees, lifelong learning, and engaged service.

STUDENT OUTCOMES (SO)

When graduated, students in the Civil Engineering program will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

CURRICULUM

First-year civil engineering students at NDSU begin their education with fundamental courses in English, chemistry, mathematics, and an introduction to the engineering sciences. Second-year courses become more specific with an emphasis on surveying, mathematics, physics, and engineering science courses. The third-year students preview the specialization areas of civil engineering. These are (1) environmental engineering, (2) geotechnical, (3) structural, (4) transportation, and (5) water resources. The senior year continues to require certain courses but also provides 12 hours of technical electives and a senior design project. The technical electives allow the student to take additional courses in those areas of civil engineering in which she/he/they intend to practice professionally. Currently, there are 51 core civil engineering and technical elective courses from which the student may choose.

Accelerated PROGRAM

The accelerated program provides opportunities for current students in the Civil Engineering program to complete a Master's degree in Civil Engineering (MSCE) in 5 years (one additional year beyond the BS degree). The accelerated Master's program requires at least a total of 30 semester credits. Up to 9 credits (three courses) from the Civil Engineering BS program can be double counted to the MSCE program. However, these courses must be taken at the 600- or 700-level. In that sense, the interested students could accelerate the Master's study by reducing three courses, so they could complete the remaining 21 credits plus the completion of the Master's thesis and graduate in one year, while the total and design credit requirements for the technical elective courses stay the same for the Civil Engineering BS degree.

FACULTY

The department has well-qualified and dedicated faculty members. They are nationally and internationally recognized experts, with the knowledge and experience to prepare graduates for successful careers. All faculty members in the department have a doctoral degree. Many are licensed as a Professional Engineer (PE) or Certified Professional Contractor (CPC). In addition, the department has many adjunct faculty members who worked or are currently working in the industry.

FACILITIES

The department has excellent laboratory facilities for undergraduate education across all civil, environmental, and construction areas, including the teaching laboratories for civil engineering materials, construction management and engineering, environmental engineering, geotechnical engineering, structural engineering, transportation engineering, and water resources engineering, . Students also have access to computer clusters and many state-of-the-art research laboratories.

STUDENT ORGANIZATIONS

Students participate in various professional student organizations in the department, which helps them develop leadership skills and the ability to work in teams. The major student organizations include: American Indian Science and Engineering Society (AISES), American Railway Engineering and Maintenance-of-Way Association (AREMA), American Society of Civil Engineers (ASCE), American Water Works Association (AWWA), Associated General Contractors of America (AGC), Engineers Without Borders (EWB), Grand Challenge Scholars of NDSU, Habitat for Humanity, Institute of Transportation Engineers (ITE), Materials Research Society (MRS), National Association of Home Builders (NAHB), National Society of Black Engineers (NSBE), Sigma Lambda Chi (ΣΛX), Society of Women Engineers (SWE), and Water Environment Federation (WEF), as well as Steel Bridge, Concrete Canoe, Associated Schools of Construction, Residential Construction Management, GeoWall, and Quiz Bowl competition teams. The student organizations have won several national and regional awards.

PREPARATION

High school students who wish to prepare for some phase of engineering at the college level should attempt to complete the following high school credits: one unit of physics, four units of mathematics, and one unit of chemistry. Incoming freshmen prepared to enroll in calculus frequently complete their civil engineering degree in four years. Transfer students who have studied two years of pre-engineering at another institution typically complete the civil engineering degree in two additional years.

SCHOLARSHIPS AND FINANCIAL AID

The department awards numerous scholarships each year, which mostly range from $500 to $10,000. Students should check with the department for more information. Other forms of financial aid are available through the Office of Financial Aid and Scholarships.

CAREER OPPORTUNITIES

NDSU civil engineers are widely regarded as hands-on, can-do, project-ready graduates, who are very successful in finding excellent jobs. Our students are highly sought for internships and co-ops, with most students having completed multiple work experiences. Most have selected a job before graduation and others within a few weeks of graduation. The work varies with the type of activity and location. Civil engineers can work in the office and/or in the field. They can work primarily on intricate designs or with people in management or sales.

Job placement of recent NDSU civil engineering graduates indicates a variety of work experience. About 40 percent of the graduates have gone to work for consulting engineering firms and another 40 percent with city, state government, and federal governments The remainder are employed by industry, contractors, and the military or have gone to graduate school at NDSU or other universities. Most graduates are involved in more than one type of civil engineering activity. Job placement of graduates seeking employment is 98-100 percent in recent semesters. The starting annual salaries for recent civil engineering graduates were between $65,000 and $85,000. The U.S. Bureau of Labor Statistics projects a 5-percent growth in employment for civil engineers from 2022 to 2032 which is above the average growth rate for all occupations (3 percent).

Graduate programs leading to Master of Science (MS) and Doctor of Philosophy (Ph.D.) degrees are available in specialized fields. For more complete details, see the Graduate Bulletin (http://catalog.ndsu.edu/graduate/) online.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Civil Engineering

Degree Type: B.S.C.E.
Minimum Credits Required for Degree: 130

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**

CE 478	Water Quality Management (Design Credits 1.5)
CE 479	Advanced Water and Wastewater Treatment (Design Credits 1.5)
CE 499	Special Topics (Design Credits 1.5)
Transportation:	
CE 419	Pavement Design (Design Credits 1.5)
CE 454	Geometric Highway Design (Design Credits 2.0)
CE 455	Airport Planning and Design (Design Credits 1.0)
CE 456	Railroad Planning and Design (Design Credits 1.5)
CE 457	Pavement Management Systems (Design Credits 1.0)
CE 458	Bituminous Materials and Mix (Design Credits 1.5)
CE 499	Special Topics (Design Credits 1.0)
Geotechnical:	
CE 417	Slope Stability and Retaining Walls (Design Credits 1.5)
CE 461	Foundation Engineering (Design Credits 1.5)
CE 462	Designing with Geosynthetics (Design Credits 1.0)
CE 463	Geotechnical Earthquake Engineering (Design Credits 1.5)
CE 464	Advanced Soil Mechanics (Design Credits 1.0)
Advanced Materials:	
CE 486	Nanotechnology and Nanomaterials (Design Credits 0.0)
CE 491	Seminar
CE 493	Undergraduate Research
Total Credits	**114**

[1]

No grades less than a "C" are accepted in any of the math courses.

Degree Requirements and Notes

- Students must complete courses in a minimum of three technical areas with a minimum of 6 credits in design for a minimum total of 12 technical electives.

Note: *Department permission required for graduate level courses. Credit may be earned only at the undergraduate level. Department permission is also required for some undergraduate courses. There are specific prerequisites and grade requirements to be allowed to take certain courses.*

Coatings and Polymeric Materials

Department Information

- **Department Web Site:**
  www.ndsu.edu/cpm/ (http://www.ndsu.edu/cpm/)
- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/coatings-polymeric-materials/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/coatings-polymeric-materials/)

Everybody uses products that are painted or coated in everyday life, but often take coatings for granted. However, a $100 billion industry exists to supply paints and coatings worldwide that decorate, protect and provide function to automobiles, building, furniture, aircraft, ships, appliances, bridges, medical devices, electronic devices and countless other objects. The performance of these coatings depends critically on specially tailored polymers, which form coating films. Thus, coatings scientists must also be good polymer scientists. Other scientific disciplines are also important to the coatings scientist, such as organic chemistry, electrochemistry, rheology, surface chemistry, chemical analysis, photochemistry, mathematics, physics and several branches of engineering and materials science.

North Dakota State University started offering polymer and coatings chemistry courses in 1905. Of the few universities offering training that focuses on the technology of paints and coatings, NDSU has the longest and most extensive experience. Over the decades, the Department of Coatings and Polymeric Materials has established a worldwide reputation for education and research. Today, there is a high demand for coatings and polymer scientists at all degree levels, providing coatings and polymer materials graduates with abundant job opportunities. NDSU graduates are especially sought after by companies in the paint, coatings, and polymer industries. Graduates of the program are employed by major paint, coatings, polymer,

and chemical companies with many graduates attaining upper management positions. At the undergraduate level, Bachelor of Science degrees in science and engineering with a coatings and polymeric materials minor are offered. Master's and doctoral degrees are available at the graduate level.

Coatings and Polymeric Materials

Department Information

- **Department Web Site:**
  www.ndsu.edu/cpm/ (http://www.ndsu.edu/cpm/)
- **Credential Offered:**
  Minor
- **Program Overview:**
  catalog.ndsu.edu/programs-study/undergraduate/coatings-polymeric-materials/ (http://catalog.ndsu.edu/programs-study/undergraduate/coatings-polymeric-materials/)

Minor Requirements

Minor: Coatings & Polymeric Materials

Required Credits: 16

Code	Title	Credits
Required Courses:		
CPM 475	Coatings' Materials Science	3
CPM 474	Applied Polymer Science	3
Select one lab course from the following:		1-2
CPM 483	Polymer Practicum	
CPM 484	Coatings I Laboratory	
CPM 485	Coatings II Laboratory	
CPM 487	Corrosion and Materials Laboratory	
Elective Courses: Select 9 credits from the following (if CPM 487 was completed, select 8 credits)		**9**
CHEM 240	Survey of Organic Chemistry [2†]	
CHEM 341	Organic Chemistry I [1†]	
CHEM 341L	Organic Chemistry I Laboratory [1*]	
CHEM 342	Organic Chemistry II [1†]	
CHEM 342L	Organic Chemistry II Laboratory [1*]	
CPM 436	Biopolymers and Biocomposites	
CPM 451	Laboratory, Chemical, Radiation, and Biological Safety	
CPM 472	Environment and Chemical Industries	
CPM 473	Polymer Synthesis [3]	
CPM 483	Polymer Practicum	
CPM 484	Coatings I Laboratory	
CPM 485	Coatings II Laboratory	
CPM 486	Corrosion and Materials	
CPM 487	Corrosion and Materials Laboratory	
Total Credits		**16-17**

1

If CHEM 341 & 341L and CHEM 342 & CHEM 342L are required for a student's major program of study, these credits cannot count toward the CPM minor.

2

If CHEM 240 is required for the student's major degree, the credits cannot also count for the CPM minor.

3

Chemistry and Biochemistry & Molecular Biology majors are required to have CPM 473.

*

CHEM 353 & CHEM 354 can be substituted for CHEM 341L & CHEM 342L.

†
For the CPM minor a student cannot get credit for both CHEM 240 and CHEM 341/342.

Minor Requirements and Notes:

- A minimum of 8 credits must be taken at NDSU.

Community Development

Department Information

- **Department Web Site:**
  www.ndsu.edu/socanth/ (http://www.ndsu.edu/socanth/)
- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/community-development/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/community-development/)

The Community Development minor is an applied, multidisciplinary minor. The purpose of the minor is to prepare students to integrate community development concepts into their own occupations; to recognize the relationships of social, economic, and development change on community viability and sustainability; and to take a more active role in the affairs of their own communities. The minor consists of 18 credits.

Community Development

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.

Comprehensive Science Education

Department Information

- **Department Web Site:**
  www.ndsu.edu/education/ (http://www.ndsu.edu/education/)
- **Credential Offered:**
  B.S.; B.A.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/comprehensive-science-education/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/comprehensive-science-education/)

The comprehensive science education degree requires coursework in biological sciences, chemistry, physics and earth science, as well as mathematics. Teaching science in middle and secondary school requires deep knowledge of (a) science content, (b) current theories of adolescent development, and (c) current best practices in middle and secondary instruction. Accordingly, the comprehensive science education major combines coursework in related sciences with professional education courses on teaching and learning.

The Program

Teacher candidates in comprehensive science education are prepared to teach students grades 5-12 with skill and confidence. The program is designed to develop science content knowledge as well as proficiency in a range of science-related skills and laboratory practices. Our professional education courses prepare teacher candidates to incorporate active learning strategies, create effective methods for assessment, and adjust

instruction to accommodate diverse learners. Teacher candidates also apply their knowledge and build their teaching skills during multiple clinical experiences in local schools.

Professional Education Courses

Teacher candidates may enroll in the 300-level professional education courses before being formally admitted to the School of Education (SOE). Prior to enrolling in the 400-level courses, teacher candidates must complete the application for admission to the SOE; attain a minimum of a 2.75 grade point average overall in their course work and education courses; and pass the Praxis Core Academic Skills test or meet minimum scores on the ACT+ Requirements for admission can be found on the School of Education website (https://www.ndsu.edu/education/).

Student Teaching

Student teaching (clinical practice) is the culmination of the teacher preparation program. During the clinical practice, teacher candidates apply the knowledge and skills acquired in their college courses to real-world classrooms under the supervision of experienced classroom teachers in middle or secondary schools. Faculty members from NDSU conduct regular on-site visits to support, encourage, and evaluate student teachers so that they gain the confidence and ability to join the teaching profession after graduation.

Student Advisement

Comprehensive science education teacher candidates are assigned to academic advisors who work closely with them to plan their programs of study and to advise and assist them as they progress to degree completion. Students are encouraged to meet with their advisor at least once every semester, as well as whenever needed.

licensure

Upon completing this program, teacher candidates are eligible for teacher licensure to teach all content areas of science in North Dakota. Teacher candidates interested in licensure to teach in other states should consult with their academic advisor because comprehensive science is not a typical teacher licensure category in all states. Our program is accredited by the Council for the Accreditation of Educator Preparation (CAEP) and approved by the North Dakota Education Standards and Practices Board (ESPB).

Career Opportunities

Science teachers are in high demand across the country, so our graduates usually obtain full-time employment in school districts shortly after graduation.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Comprehensive Science Education

Degree Type: B.A. or B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.

4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**
Category W: Wellness †		**2**
Category D: Cultural Diversity *†		
Category G: Global Perspectives *†		
Total Credits		**39**

*****

Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†

General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Code	Title	Credits
Comprehensive Science Education Requirements		
ENGL 324	Writing in the Sciences	3
Teaching Specialty Requirements		
Primary Concentration - Select one primary concentration from biology, chemistry, earth science, physics. Concentrations listed below.		24-25
Secondary Concentration - Two secondary concentrations from the science area not selected for the primary concentration.		24-28
Teritary Concentration - One teritary concentration from the science area not selected for the primary or secondary areas.		8
Math Requirements		
Select the math requirement based on choice of primary concentration. See math requirement section below.		6-18
Professional Education Requirements		
EDUC 321	Introduction to Teaching	3
EDUC 322	Educational Psychology	3
EDUC 451	Instructional Planning, Methods and Assessment	3
EDUC 481	Classroom Practice Methods of Teaching I:	2-3
EDUC 482	Classroom Practice/Methods of Teaching II:	2-3
EDUC 485	Student Teaching Seminar	1
EDUC 486	Classroom Management for Diverse Learners	3
EDUC 487	Student Teaching	9
EDUC 488	Applied Student Teaching	3

EDUC 489	Teaching Students of Diverse Backgrounds	3
Total Credits		**97-116**

Code	Title	Credits
Primary Concentration		
Select one primary concentration from biology, chemistry, earth science, or physics.		
Biology (24 credits)		
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	4
BIOL 151 & 151L	General Biology II and General Biology II Laboratory	4
BIOL 315 & 315L	Genetics and Genetics Laboratory	4
BIOL 359	Evolution	3
BIOL 364	General Ecology	3
BIOL 370	Cell Biology	3
MICR 202 & 202L	Introductory Microbiology and Introductory Microbiology Lab	3
Chemistry (25 credits)		
Select one introductory chemistry sequence (A or B)		8
Sequence A:		
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory	
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory	
Sequence B:		
CHEM 150 & CHEM 160	Principles of Chemistry I and Principles of Chemistry Laboratory I	
CHEM 151 & CHEM 161	Principles of Chemistry II and Principles of Chemistry Laboratory II	
CHEM 341 & 341L	Organic Chemistry I and Organic Chemistry I Laboratory	4
CHEM 342 & 342L	Organic Chemistry II and Organic Chemistry II Laboratory	4
CHEM 431 & 431L	Analytical Chemistry I and Analytical Chemistry I Laboratory	5
BIOC 260	Elements of Biochemistry	4
Earth Science (25 credits)		
GEOL 105 & 105L	Physical Geology and Physical Geology Lab	4
GEOL 106 & 106L	The Earth Through Time and The Earth Through Time Lab	4
GEOL 350	Invertebrate Paleontology	3
GEOL 303	Paleontology Field Course	1
GEOL 412	Geomorphology	3
GEOL 420 & GEOL 421	Mineralogy and Mineralogy Laboratory	4
PHYS 110	Introductory Astronomy	3
SOIL 217	Introduction to Meteorology & Climatology	3
Physics (24 credits)		
PHYS 171	Introductory Projects in Physics	1
PHYS 215	Research For Undergraduates	1-3
PHYS 251 & 251L & 251R	University Physics I and University Physics I Laboratory and University Physics I Recitation	6

PHYS 252 & 252L & 252R	University Physics II and University Physics II Laboratory and University Physics II Recitation	6
PHYS 350	Modern Physics	3
PHYS 355		3
PHYS 361	Electromagnetic Theory	3

Code	Title	Credits
Secondary Concetration		
Select two secondary concentrations not selected as the primary.		
Biology (14 credits)		
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	4
BIOL 151 & 151L	General Biology II and General Biology II Laboratory	4
BIOL 315	Genetics	3
BIOL 359	Evolution	3
Chemistry (12 credits)		
Select one introductory chemistry sequence (A or B)		8
Sequence A:		
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory	
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory	
Sequence B:		
CHEM 150 & CHEM 160	Principles of Chemistry I and Principles of Chemistry Laboratory I	
CHEM 151 & CHEM 161	Principles of Chemistry II and Principles of Chemistry Laboratory II	
CHEM 341 & 341L	Organic Chemistry I and Organic Chemistry I Laboratory	4
Earth Science (14 credits)		
GEOL 105 & 105L	Physical Geology and Physical Geology Lab	4
GEOL 106 & 106L	The Earth Through Time and The Earth Through Time Lab	4
PHYS 110	Introductory Astronomy	3
SOIL 217	Introduction to Meteorology & Climatology	3
Physics (12 credits)		
PHYS 110 & 110L	Introductory Astronomy and Introductory Astronomy Lab	4
PHYS 211 & 211L	College Physics I and College Physics I Laboratory	4
PHYS 212 & 212L	College Physics II and College Physics II Laboratory	4

Code	Title	Credits
Teritary Concentration		
Select one tertiary concentration not selected as the primary or secondary concentrations.		
Biology (8 credits)		
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	4
BIOL 151 & 151L	General Biology II and General Biology II Laboratory	4
Chemistry (8 credits)		

Select one introductory chemistry sequence (A or B)		8
Sequence A:		
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory	
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory	
Sequence B:		
CHEM 150 & CHEM 160	Principles of Chemistry I and Principles of Chemistry Laboratory I	
CHEM 151 & CHEM 161	Principles of Chemistry II and Principles of Chemistry Laboratory II	
Earth Science (8 credits)		
GEOL 105 & 105L	Physical Geology and Physical Geology Lab	4
GEOL 106 & 106L	The Earth Through Time and The Earth Through Time Lab	4
Physics (8 credits)		
PHYS 211 & 211L	College Physics I and College Physics I Laboratory	4
PHYS 212 & 212L	College Physics II and College Physics II Laboratory	4

Code	Title	Credits
Math Requirements		
Select the math requirement based on the choice of primary concentration.		
Biology or Earth Science (6-7 credits)		
MATH 105	Trigonometry	3 or 4
or MATH 146	Applied Calculus I	
STAT 330	Introductory Statistics	3
Chemistry (11 credits)		
MATH 165	Calculus I	4
MATH 166	Calculus II	4
STAT 330	Introductory Statistics	3
Physics (18 credits)		
MATH 165	Calculus I	4
MATH 166	Calculus II	4
MATH 265	Calculus III	4
MATH 266	Introduction to Differential Equations	3
MATH 129	Basic Linear Algebra	3
or MATH 329	Intermediate Linear Algebra	

Degree Requirements and Notes

- See School of Education (https://www.ndsu.edu/education/) for admission requirements.
- Courses taken P/F may not be used to satisfy any requirements.
- A grade of 'C' or better is required in all professional education courses.
- To be placed in student teaching, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required.
- To exit the program, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required as well as completing the Praxis Subject test and the Principles of Learning and Teaching test.
- Students who select Physics as their Primary Concentration can add Mathematics as an additional teacher licensure area with 6 additional credits. See your academic advisor for details.

Computer Engineering

Department Information

- **Department Web Site:**
  www.ndsu.edu/ece/ (http://www.ndsu.edu/ece/)
- **Credential Offered:**
  B.S.Cpr.E.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/computer-engineering/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/computer-engineering/)

Computer engineering deals with both hardware and software aspects of computer systems. Students take both essential electrical and computer engineering classes along with core classes specific to computer engineering design. Demand for computer engineers is strong due to the growing use of computers in all aspects of products and the need for engineers competent in computing practices.

The Program

Computer engineering is a degree program in the College of Engineering and provides a background in three broad areas: computer hardware, software, and hardware-software integration. Fundamental topics included in the program are embedded systems, computer architecture, digital systems, embedded machine learning, algorithms and operating systems. In addition, the program includes core subjects that are common to all engineering disciplines and basic university studies in humanities and social sciences. The Bachelor of Science in Computer Engineering program is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org, under the commission's General Criteria and Program Criteria for Electrical, Computer, Communications, Telecommunication(s) and Similarly Named Engineering Programs.

Areas of Specialization

The Computer Engineering program allows students to tailor their studies within broad parameters. Students are encouraged to develop an individual program of study in close consultation with their advisers. Examples are available to illustrate how specialization may be obtained in a number of different technical areas. Students may mix and match from the examples to suit their particular interests.

Technical areas include the following:

Computer Architecture/Digital VLSI – VLSI designers and computer architects design computer system hardware, including how the CPU communicates with various types of memory and high-performance multi-processor systems. VLSI design focusses on the lower levels of abstraction: transistor-level and physical-level design; whereas computer architecture focuses on the higher levels of abstraction: architecture and gate-level designs.

Cyber Physical Systems – deals with the interaction of computing elements monitoring/controlling physical entities, often in a large network.

Embedded Systems – deals with the design of a dedicated computer system to perform a specific task, often requiring real-time constraints. An example is a smartphone.

Computer Systems – deals with the close interaction between a system's hardware and software.

The Facilities

The Electrical and Computer Engineering building is part of an eight building engineering complex. The building contains specialized laboratories and equipment. Numerous grants and donations from the National Science Foundation and private industry have provided valuable equipment. Laboratories along with department and University computer capabilities support education and research. Students also have full access to computer clusters located in the ECE building and throughout the campus. These and other major computer resources are tied to local, regional, national and international computer networks, and remote access is provided for all ECE software.

Selective Admission

Transfer students from international institutions must have a 3.00 GPA.

Further, the department policy is that transfer courses equivalent to ECE 173 (or CSCI 160), ECE 275, EE 206 and all required math must have a C or better before enrolling in ECE courses listed in the curriculums for Junior & Senior years.

High School Preparation

High school students should attempt to complete one unit of physics, four units of mathematics and one unit of chemistry.

Career Opportunities

Graduates may find work as design engineers (computer hardware, software and systems), computer consultants, sales and customer support engineers or as engineers involved with computer-aided manufacturing and testing.

Research and Graduate Study

Graduate studies leading to a master's degree or doctoral degree are offered in the department. Further details are available in the *Graduate Bulletin*.

Cooperative Education Program

The Cooperative Education Program allows students to alternate classroom study with a series of paid professional work experiences related to electrical and computer engineering. These experiences increase in complexity as the student's background increases. The program provides opportunities for pre-graduation experience in the profession, exploration of several career opportunities, money for education, an enriched degree and enhanced opportunities for employment following graduation.

First Year			
Fall	**Credits**	**Spring**	**Credits**
MATH 098[1]	3	MATH 103[1]	3

Total Credits: 135

1

1. This course requires the student to earn a "C" or better, in order to take upper level ECE courses.

2

Choose from the approved Tech Elective List.

3

CpE Core Options:

1. **ECE 474 Computer Architecture** (prereq: ECE 374)
2. **ECE 477 Hardware design for Machine Learning** (prereqs: ECE 374 and ECE 375)
3. **ECE 423 VLSI Design** (prereqs: ECE 311 and ECE 321)
4. **ECE 425 Intro to Semiconductors** (prereqs: ECE 320)
5. **CSCI 474 Operating System Concepts** (prereqs: CSCI 374)
6. **CSCI 467 Algorithm Analysis** (prereqs: MATH 166, CSCI 161 and CSCI 222 or MATH 270)

4

ECE 173 is also an approved course for this requirement.

First Year

5. **CSCI 474 Operating System Concepts** (prereqs: CSCI 374)
6. **CSCI 467 Algorithm Analysis** (prereqs MATH 166, CSCI 161 and CSCI 222 or MATH 270)

4

ECE 173 is also an approved course for this requirement.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Computer Engineering

Degree Type: B.S.Cpr.E.
Minimum Degree Credits to Graduate: 126

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**
Category W: Wellness †		**2**
Category D: Cultural Diversity *†		
Category G: Global Perspectives *†		
Total Credits		**39**

*****
Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†
General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Code	Title	Credits
Computer Engineering Core Requirements		
ECE 111	Introduction to Electrical and Computer Engineering	3
ECE 173	Introduction to Computing	4
ECE 275	Digital Design	4
ECE 311	Circuit Analysis II	4

ECE 320	Electronics I	3
ECE 341	Random Processes	3
ECE 343	Signals & Systems	4
ECE 374	Computer Organization	4
ECE 375	Digital Design 2	3
ECE 376	Embedded Systems	4
ECE 401	Design I (capstone)	1
ECE 403	Design II (capstone)	2
ECE 405	Design III (capstone)	3
Math Courses Required		
MATH 129	Basic Linear Algebra	3
MATH 165	Calculus I (May satisfy general education category R)	4
MATH 166	Calculus II	4
MATH 265	Calculus III (w/ vectors)	4
MATH 266	Introduction to Differential Equations	3
CSCI Courses Required		
CSCI 161	Computer Science II (May satisfy general education category S for Computer Engineering majors only))	4
CSCI 222	Discrete Mathematics	3
Other Courses Required		
CHEM 121	General Chemistry I (May satisfy general education category S)	3
CHEM 121L	General Chemistry I Laboratory (May satisfy general education category S)	1
or PHYS 251L	University Physics I Laboratory	
EE 206	Circuit Analysis I	4
PHYS 251	University Physics I (May satisfy general education category S)	4
ENGR 327	Ethics, Engineering, and Technology	3
Select one from the following: (May satisfy general education category C)		3
ENGL 320	Business and Professional Writing	
ENGL 321	Writing in the Technical Professions	
ENGL 324	Writing in the Sciences	
ENGL 459	Researching and Writing Grants and Proposal	
Core Electives		**12**
Select 4 courses from the following:		
ECE 423	VLSI Design	
ECE 425	Introduction to Semiconductor Devices	
ECE 474	Computer Architecture	
ECE 477	Hardware Design for Machine Learning	
CSCI 467	Algorithm Analysis	
CSCI 474	Operating Systems Concepts	
ECE Electives		**6**
Select 6 credits from the following. A Core Elective from the section above may be used in this section if not taken as an ECE Core Elective.		
ECE 321	Electronics II	
ECE 424	Analog VLSI	
ECE 444	Applied Digital Signal Processing	
ECE 448	Image Analysis I	
ECE 461	Control Systems I	
ECE 463	Modern Control	
ECE 470	Fault Tolerant Digital Systems	
ECE 472	Design Automation of VLSI Circuits	
ECE 476	Advanced Embedded Systems	
ECE 483	Instrumentation for Engineers	
ECE 485	Biomedical Engineering	
CSCI 459	Foundations of Computer Networks	

CSCI 413	Principles of Software Engineering	
Tech Electives		**3**
Select 3 credits from the following:		
CSCI 336	Theoretical Computer Science	
CSCI 366	Database Systems	
CSCI 372	Comparative Programming Languages	
CSCI 4XX	Any CSCI 400 level didactic course	
ECE 351	Applied Electromagnetics	
ECE 4XX	Any ECE 400 level didactic course	
ECE 494	Individual Study	
ECE 496	Field Experience (max. of 3 cr.)	
ENGR 310	Entrepreneurship for Engineers and Scientists	
IME 440	Engineering Economy	
IME 456	Program and Project Management	
IME 460	Evaluation of Engineering Data	
IME 470	Operations Research I	
PHYS 252	University Physics II	
Total Credits		**102**

Degree Requirements and Notes

- In order to graduate, an ECE student must have at least a 2.0 GPA in all required EE and ECE courses. Elective ECE courses are not included in this GPA requirement.
- All Students – Students are required to attain a grade of 'C' or better in ECE 173 Introduction to Computing, ECE 275 Digital Design, EE 206 Circuit Analysis I, and all required MATH courses.

Computer Science

Department Information

- **Department Web Site:**
  www.ndsu.edu/cs/ (http://www.ndsu.edu/cs/)
- **Credential Offered:**
  B.S.; B.A.; Minor; UG Certificate
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/computer-science/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/computer-science/)

The Program

Computer Science can be earned as a B.A. or a B.S. degree, a minor and an undergraduate certificate. In addition, the department collaborates with two other departments to issue a dual major in Math and Computer Science, and Physics and Computer Science. An Accelerated Program is available for undergraduates with a 3.5 grade point average or better to complete a B.S. and a M.S. with a target graduation time of five years. In the Accelerated Program, graduate courses taken while an undergraduate student are used for both the B.S. and M.S. degree requirements. Currently, only the undergraduate certificate can be earned in an on-campus face-to-face format and in an online format.

We offer the most comprehensive and varied computer science programs in the region. In the core courses required of all majors, students are offered an opportunity to study concepts, applications and implementation techniques, which provide a broad and practical base both for a satisfying, well-paying career in computer science, and for advanced study. The curriculum offers an opportunity for an in-depth study of topics such as artificial intelligence, software engineering, cybersecurity, machine learning, data science, system simulation, computer communication networks, multimedia, operating systems, and database management systems. The department is expanding offerings in cybersecurity, data science, and software engineering. Students are encouraged to choose courses from related areas, such as business, economics, engineering, mathematics and statistics to broaden their program of study. Beginning in the junior year, students can explore co-op and internship opportunities to broaden their application of course-based knowledge. A senior capstone experience that provides a semester long project for industry is required and serves as an incredible opportunity to add maturity to the computer science skill set before graduation.

Career Opportunities

Computer scientists choose jobs in government, industry, teaching, research, agriculture, energy and other areas. A 2019 study showed that four of the eleven jobs with the most potential for growth are in areas taught by the Department. Graduates in computer science might choose a job in any of

these areas: artificial intelligence, systems analysis, software development/engineering, security, information assurance, cybersecurity, bioinformatics, data science, web development, networking, information system development, database management, technical support, automatic systems, robotics, and internet of things.

According to the Federal Bureau of Labor Statistics, software engineers, cybersecurity analysts, network systems and data scientists / analysts, computer scientists and database administrators are expected to be among the fastest growing occupations. Employment of these computer specialists is expected to increase much faster than average. Our programs provide excellent foundations for successful careers in these areas. As an undergraduate student, you will find many opportunities to work part-time as a research assistant on campus, or as a paid intern with a local or regional business.

Graduates of our department have accepted employment in major national businesses including Hewlett-Packard, IBM, AT&T, Apple, CISCO Systems, Google, Adesto, Cargill, SGI, FAST Enterprises, Medtronic, Microsoft, Bobcat, Facebook, Digi-Key, John Deere, Amazon, Intel, Raytheon, Target Corp. and Thomson Reuters. Many have chosen positions in North Dakota and adjoining states. There is a large and growing need for computer professionals in North Dakota.

During the final semester of their senior year, students take part in a capstone program. The objective of the capstone program is to provide the students with an experience that brings together the technical knowledge they have acquired while fostering valuable teamwork skills. This is accomplished by working in small teams on real-life projects. Capstone projects are done in conjunction with corporate, industrial or government clients/sponsors. Recent sponsors include Adventium, Aeritae Consulting, Appareo, ATC, BargInns, BCBSND, Border States Electric, Botlink, Bushel, Capturis, Collins Aerospace, Fjorge, IBM, Inwerken, John Deere, Marvin Windows, Microsoft, NAU Country, Noridian, OpenStack, Pedigree Technologies, Scheels, and UGPTI.

The Facilities

The department is located in the Quentin Burdick Building along with Information Technology Services. Students have free access to a wide range of computer systems.

CS Department equipment includes two clusters of Linux workstations, a number of virtual machines, and Hadoop and Spark analytic systems. Research labs support Windows, Macs, and Linux computers along with various peripheral equipment such as a cyber range, drones, and 3D printers. The department and the University have assumed a leadership role in computer networking through the acquisition and implementation of high-bandwidth network switches. The University also has entered into a six-state consortium for extremely high-level networking in the Upper Midwest. The high-performance Center for Computationally Assisted Science and Technology (CCAST) is available for distributed research projects. We are also a charter member of Internet2 and have connectivity to the national vBNS research network. The department maintains numerous web servers for class assignments and other information, which are accessed by thousands of users each day. The University provides more than 1,000 computers in 133 instrumented classrooms, 46 public computer labs, 21 department-owned labs and other spaces supported by Information Technology Services. There are 54 GoPrint release stations on campus for student printing. Internet usage is available for all students.

High School Preparation

While NDSU offers remedial courses for students who have not had the opportunity to complete all college-preparatory coursework, we recommend taking courses in high school that develop the ability to think logically, to organize, and to analyze (e.g., algebra, geometry, trigonometry, statistics and calculus). NDSU accepts the results of some AP tests in lieu of college classes through our Credit by Examination policy.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Computer Science

Degree Type: B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**
Category W: Wellness †		**2**
Category D: Cultural Diversity *†		
Category G: Global Perspectives *†		
Total Credits		**39**

*****

Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†

General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

A Grade of 'C' or better is required for all CSCI prefix courses.

Code	Title	Credits
B.S. Computer Science Core Requirements		
CSCI 160	Computer Science I	4 or 6
or CSCI 227 & CSCI 228	Computing Fundamentals in Python I and Computing Fundamentals in Python II	
CSCI 161	Computer Science II	4
CSCI 213	Modern Software Development	3
CSCI 222	Discrete Mathematics	3
CSCI 313	Software Development with Frameworks	3
CSCI 336	Theoretical Computer Science	3
CSCI 366	Database Systems	3

Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

[†]

General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

A Grade of 'C' or better is required for all CSCI prefix courses.

Code	Title	Credits
B.A. Computer Science Core Requirements		
CSCI 114	Computer Applications (May satisfy general education category S)	3

or TL 116	Business Software Applications	
CSCI 159	Computer Science Problem Solving	3
CSCI 160	Computer Science I	4 or 6
or CSCI 227 & CSCI 228	Computing Fundamentals in Python I and Computing Fundamentals in Python II	
CSCI 161	Computer Science II	4
CSCI 213	Modern Software Development	3
CSCI 222	Discrete Mathematics	3
CSCI 312	Survey of Programming Languages	3
CSCI 313	Software Development with Frameworks	3
CSCI 366	Database Systems	3
CSCI 371	Web Scripting Languages	3
CSCI 445	Software Projects Capstone [1]	3
CSCI 488	Human-Computer Interaction	3
CSCI 489	Social Implications of Computers [1]	3
Related Major Requirements		
COMM 260	Introduction to Web Design	3
COMM 261	Introduction to Web Development (or any 300/400 level CSCI elective)	3
MATH 146	Applied Calculus I (May satisfy general education category R)	4
or MATH 165	Calculus I	
STAT 330	Introductory Statistics	3
STAT 331	Regression Analysis	2
Other Courses:		
Select these seven credits from the following areas:		7
Science	Cannot be courses with the CSCI prefix	
Engineering	Cannot be ENGR 311 or ENGR 312	
Math	MATH prefix course with a number higher than MATH 147, but not MATH 165	
Statistics	STAT prefix course (except for STAT 330 or STAT 331)	
BA Degree Requirements		
Proficiency at the second year level in a modern foreign language.		
Total Credits		**63-65**

1

CSCI 445 Software Projects Capstone & CSCI 489 Social Implications of Computers form the department capstone. CSCI 445 is typically taken during the last spring semester and CSCI 489 is typically taken during the last fall semester prior to degree completion.

Minor Requirements

Minor: Computer Science

Minimum Credits: 16

Minor Requirements

Code	Title	Credits
Required Courses		
CSCI 213	Modern Software Development	3
Choose one of the following sequences:		8-9
CSCI 160 & CSCI 161	Computer Science I and Computer Science II	
CSCI 227 & CSCI 228 & CSCI 229	Computing Fundamentals in Python I and Computing Fundamentals in Python II and Computing Fundamentals in Python III	
Additional Electives: Select 5 or 6 credits to reach the minor 16 cr. minimum (at least 3 credits must be CSCI 300-400 level).		5-6
Total Credits		**16-18**

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- A grade of 'C' or better is required in all courses applied to this minor.

Certificate Requirements

Computer Science

Minimum Credits: 11

Code	Title	Credits

  www.ndsu.edu/cs/ (http://www.ndsu.edu/cs/)
- **Credential Offered:**
  B.S.; B.A.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/computer-science-mathematics/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/computer-science-mathematics/)

This dual major takes advantage of close connections between Computer Science (https://www.ndsu.edu/cs/) and Mathematics (https://www.ndsu.edu/math/), representing a streamlined curriculum that covers important concepts of both majors while removing redundancies between the programs. Students earn one degree with this dual major.

It is of particular interest to Computer Science students who wish to expand their understanding of mathematical foundations beyond the concepts that are covered in a B.S. in Computer Science with a Mathematics minor. Students are encouraged to enroll in this program if they intend to pursue a graduate degree in one of the more theoretical areas of computer science, or just generally have an interest in expanding their mathematics education.

Sample Program Guide

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**

Computer Science and Physics

Department Information

- **Department Web Site:**
  www.ndsu.edu/cs/ (http://www.ndsu.edu/cs/)
- **Credential Offered:**
  B.S.; B.A.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/computer-science-physics/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/computer-science-physics/)

Since the dawn of the computer age, Computer Science and Physics have been closely intertwined disciplines. Computational physics is now an established branch of physics, complementing experiment and theory, that develops and applies computer modeling approaches to the solution of a wide range of physical problems. At the same time, software development (e.g., for graphics and data mining applications) is increasingly inspired by physics. Computer modeling, including simulation and numerical analysis, is an essential component of modern research and development. Correspondingly, the demand is growing for scientists with multidisciplinary training that combines fundamental knowledge of physics and computer science with practical skills in programming and computation.

The Computer Science and Physics dual major program is designed to allow students to complete one degree and the core requirements of both majors. Graduates of the program will have a unique background qualifying them to work in industry or to pursue graduate studies in physics, computer science, engineering, or other technical fields.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

1

CSCI 189 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take CSCI 189.

Program Notes

- Except for courses offered only as pass/fail grading, no course may be taken Pass/Fail.

Computer Science Foundations

Department Information

- **Department Web Site:**
  www.ndsu.edu/cs/ (http://www.ndsu.edu/cs/)
- **Credential Offered:**
  UG Certificate
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/computer-science-foundations/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/computer-science-foundations/)

The Computer Science Foundations certificate completes the list of courses recommended for the first 2-3 semesters in the Computer Science B.S. major. Prerequisites for this certificate can be met in one of two ways: Students who have completed the Fundamentals of Computing and Security

certificate can proceed with the remaining course in the Python sequence (CSCI 228). Students without programming background can take the Computer Science I course in Java (CSCI 160), provided they pass the math placement test at trigonometry or pre-calculus level. This certificate provides fluency in data structures and algorithms (CSCI 161) and the use of the Unix operating system (CSCI 277), which is important in all of our majors.

Computer Science Foundations

Department Information

- **Department Web Site:**
  www.ndsu.edu/cs/ (http://www.ndsu.edu/cs/)

Construction Engineering

Department Information

- **Department Web Site:**
  www.ndsu.edu/ccee/ (http://www.ndsu.edu/ccee/)
- **Credential Offered:**
  B.S.Cons.E.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/construction-engineering/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/construction-engineering/)

The construction industry is one of the largest industries in the United States. It accounts for nearly 8 percent of the nation's gross national product and employs millions of people. The industry is divided into four sectors: residential building construction, industrial construction, commercial building construction, and heavy civil construction. The Construction Engineering program prepares nationally competitive students for successful careers in the construction industry.

THE PROGRAM

Construction Engineering involves the planning, design, and management of construction facilities, such as highways, bridges, airports, railroads, buildings, dams, and reservoirs. The construction of such projects requires knowledge of engineering, management, economics, and business. Construction Engineering is differentiated from Construction Management from the standpoint of the use of math, science, and engineering to design projects and processes and analyze problems. Construction Engineering is involved in a variety of construction disciplines, including commercial, residential, transportation, and infrastructure systems. Construction Engineers are also involved in the engineering design of temporary structures, cost estimating, planning and scheduling, material procurement, selection of equipment, and cost control. Due to their diverse skills, there is a very high demand for Construction Engineers.

The Bachelor of Science in Construction Engineering degree offers a blend of engineering and construction courses. The program is designed for those who want to work in the construction industry and become prepared for licensure as a professional engineer. A thorough knowledge of the physical sciences, math, and engineering is developed during the first two years followed by construction management and engineering courses. The technical side of the program is balanced with requirements in writing, humanities, social science, and communications. The Bachelor of Science in Construction Engineering program is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org, under the commission's General Criteria and Program Criteria for Construction and Similarly Named Engineering Programs.

PROGRAM EDUCATIONAL OBJECTIVES (PEO)

Graduates from the Bachelor of Science in Construction Engineering program are expected within the first few years after graduation to:

1. Engage successfully in the practice of construction engineering to solve current and emerging problems.
2. Integrate ethical considerations, diverse perspectives, and an awareness of the broader societal and sustainability implications into design and decision-making processes.
3. Begin to serve in mid-level project leadership roles in their construction engineering career.
4. Advance their profession through collaborative work, obtaining professional licensure, pursuing advanced degrees, and continuously acquiring new knowledge, while providing service to the community.

STUDENT OUTCOMES (SO)

The Program Educational Objectives are further connected to seven Student Outcomes (SO), developed by the Engineering Accreditation Commission of ABET, which describe what students are expected to know and be able to do by the time of graduation. These outcomes relate to the skills, knowledge, and behaviors that students acquire in their matriculation through the program. The Student Outcomes are listed below:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

CURRICULUM

First-year construction engineering students at NDSU begin their education with fundamental courses in English, chemistry, mathematics, and an introduction to the engineering and construction sciences. Second-year courses become more specific with an emphasis on surveying, mathematics, physics, and engineering and construction science courses. Third-year courses reflect the key areas of construction engineering and management. The senior year continues with key construction courses but also provides 12 hours of technical electives and a senior design project as well as a business law course.

Accelerated PROGRAM

Option 1: The accelerated program provides opportunities for current students in the Construction Engineering program to pursue the Master of Construction Management (MCM) offered by the department, which requires at least a total of 30 course credits. Up to 9 credits (three courses) from the Master of Construction Management program can be used to complete requirements in the undergraduate construction engineering program. These courses must be taken at the 600- or 700-level.

Option 2: Students in the Construction Engineering program have the option to obtain a Master's degree through the accelerated BSCE or BSConE + MSCE program, which requires at least a total of 24 course credits and 6 master's thesis credits. Up to 9 credits (three courses) from the Master of Science in Civil Engineering program can be used to complete requirements in the undergraduate construction engineering program. These courses must be taken at the 600- or 700-level.

Applicants can apply for admission in their junior year (having accumulated more than 75 credits) with an average accumulative GPA above 3.5. The review procedure for applications will follow the existing policy of master's graduate student admissions.

FACULTY

The Department has well-qualified and dedicated faculty. They are nationally and internationally recognized experts, with the knowledge and experience to prepare graduates for successful careers. All faculty members in the department have a doctoral degree. Many are licensed as a Professional Engineer (PE) or Certified Professional Constructor (CPC). In addition, the department has many adjunct faculty members who worked or are currently working in the industry.

FACILITIES

The department has excellent laboratory facilities for undergraduate education across all civil, environmental, and construction areas, including the teaching laboratories for civil engineering materials, construction management and engineering, environmental engineering, geotechnical engineering, structural engineering, transportation engineering, and water resources engineering. Students also have access to computer clusters and many state-of-the-art research laboratories. The program has the most updated modern teaching and research equipment such as GPS units, robotic total stations, drones, and VR units.

STUDENT ORGANIZATIONS

Students participate in many professional departmental student organizations in the department, which helps them develop leadership and teamwork skills. The major student organizations include the American Railway Engineering and Maintenance-of-Way Association (AREMA), American Society of Civil Engineers (ASCE), American Water Works Association (AWWA), Associated General Contractors (AGC), Institute of Transportation Engineers (ITE), Materials Research Society (MRS), National Association of Homebuilders (NAHB), Sigma Lambda Chi, and Water Environment Federation (WEF), as well as Steel Bridge, Concrete Canoe, Associated Schools of Construction, and Residential Construction Management, GeoWall, and Quiz Bowl competition teams. Students may also participate in several student organizations within the College of Engineering, including the American Indian Science and Engineering Society (AISES), Engineers Without Borders (EWB), Grand Challenge Scholars of NDSU, Habitat for Humanity, National Society of Black Engineers (NSBE), and Society of Women Engineers (SWE). The student organizations have won several national and regional awards.

PREPARATION

High school students who wish to prepare for some phase of engineering at the college level should attempt to complete the following high school credits: one unit of physics, four units of mathematics, and one unit of chemistry. Incoming freshmen prepared to enroll in calculus frequently complete their construction engineering degree in four years. Students who have studied two years of pre-engineering at another institution typically complete the construction engineering degree in two additional years.

SCHOLARSHIP AND FINANCIAL AID

The department awards numerous scholarships each year, which mostly range from $500 to $10,000. The AGC of North Dakota and the Fargo/Moorhead Home Builders Care Foundation (a charitable arm of the Home Builders Association of Fargo-Moorhead) offer annual scholarships to incoming first-year and outstanding other students. In addition, many other scholarships, such as the Cossette Construction Management and Engineering Scholarship, Excellence in Construction Safety Scholarship, and Interstates Construction Management and Engineering Scholarship, are available to students. Students should check with the department for more information. Other forms of financial aid are available through the Office of Financial Aid and Scholarships.

CAREER OPPORTUNITIES

Construction engineering graduates are in high demand after graduation by contractors in all types of construction, from design-construction firms to large owners who have continuing construction projects. Positions available include field engineer, office engineer, project engineer, project controls engineer, superintendent, and project manager. The starting salary for fresh graduates has been between $65,000 and $85,000 in recent years. Students from construction engineering find summer internships or employment in the construction industry. The U.S. Bureau of Labor Statistics projects a 5-percent growth in employment for construct engineers from 2022 to 2032 which is above the average growth rate for all occupations (3 percent).

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Construction Engineering

Degree Type: B.S.Cons.E.
Minimum Degree Credits to Graduate: 129

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

or ECON 202	Principles of Macroeconomics	
Total Credits		**112**

Degree Requirements and Notes

- A minimum 2.50 cumulative GPA is required for transfer students to be admitted to the B.S. in construction engineering program.

Construction Management

Department Information

- **Department Web Site:**
  www.ndsu.edu/ccee/ (http://www.ndsu.edu/ccee/)
- **Credential Offered:**
  B.S.Cons.M.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/construction-management/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/construction-management/)

The construction industry is one of the largest industries in the United States. It accounts for nearly 8 percent of the nation's gross national product and employs millions of people. The industry is divided into four sectors including residential building construction, industrial construction, commercial building construction, and heavy civil construction. The Construction Management program prepares nationally competitive students for successful careers in the construction industry.

THE PROGRAM

Construction Management is a combination of technology, construction techniques, and management to meet the needs of the rapidly growing construction industry. Construction management studies less math and engineering concepts than construction engineering but focuses more on business-related courses. The program is designed to prepare students for the art of achieving maximum profit by efficient use of people, machines, materials, and other resources to complete a construction project on time and to the satisfaction of the owner. A meld of engineering, construction, management, and business gives the student a background and understanding of a management point of view in the construction industry. The

program leading to a Bachelor of Science (BS) in Construction Management degree is accredited by the American Council for Construction Education (https://www.acce-hq.org/) (ACCE).

A minor in Business Administration offered by the College of Business is required for all B.S. in Construction Management students. Students are required to have a minimum cumulative GPA of 2.50 to be admitted into the minor program. A minor in Business Administration requires a minimum GPA of 2.50 in the courses that satisfy the minor. In addition, a cumulative GPA of 2.50 overall is required to graduate with a Bachelor of Science in Construction Management degree.

PROGRAM MIssion Statement

The Construction Management undergraduate program prepares nationally competitive graduates for successful careers in the construction management profession.

PROGRAM OBJECTIVES

1. Provide a comprehensive curriculum to meet the construction industry's needs.
2. Produce graduates with communication skills to successfully practice in the construction profession.
3. Promote professional opportunities such as guest speakers, scholarships, and internships from the construction industry to students.

The Program Objectives support the department and program missions and are further connected to the Program Learning Outcomes.

Program LEARNING OUTCOMES

The Construction Management program has adopted the 17 Student Learning Outcomes (SLOs) defined by ACCE as the Program Learning Outcomes (PLOs). Upon graduation from the Construction Management program, graduates shall be able to:

1. Create written communications appropriate to the construction discipline.
2. Create oral presentations appropriate to the construction discipline.
3. Create a construction project safety plan.
4. Create construction project cost estimates.
5. Create construction project schedules.
6. Analyze professional decisions based on ethical principles.
7. Analyze methods, materials, and equipment used to construct projects.
8. Apply electronic-based technology to manage the construction process.
9. Apply basic surveying techniques for construction layout and control.
10. Understand different methods of project delivery and the roles and responsibilities of all constituencies involved in the design and construction process.
11. Understand construction accounting and cost control.
12. Understand construction quality assurance and control.
13. Understand construction project control processes.
14. Understand the legal implications of contract, common, and regulatory law to manage a construction project.
15. Understand the basic principles of sustainable construction.
16. Understand the basic principles of structural behavior.
17. Understand the basic principles of HVAC, electrical and plumbing systems.

CURRICULUM

First-year construction management students at NDSU begin their education with fundamental courses in English, chemistry, mathematics, and an introduction to the construction and economics basics. Second-year courses become more specific with an emphasis on surveying, physics, and construction science and methods courses. Third-year courses reflect the key areas of construction management along with business fundamentals. The senior year continues with key construction management courses and also provides 9 hours of business electives and a senior capstone project.

Accelerated PROGRAM

The BSCM + MCM accelerated program provides opportunities for current students in the Construction Management program to pursue the Master of Construction Management (MCM) offered by the department. Students in the Construction Management program have an option to obtain a Master's degree through the accelerated BSCM + MCM program, which requires at least a total of 30 course credits. Up to 9 credits (three courses) from the Master of Construction Management program can be used in the undergraduate program. These courses must be taken in the 600- or 700-level. In that sense, the interested students could accelerate the master's study by shortening three courses, so that they could complete the remaining 21 credits and graduate in one year.

FACULTY
The department has well-qualified and dedicated faculty members. They are nationally and internationally recognized experts, with the knowledge and experience to prepare graduates for successful careers. Most faculty members in the department have a doctoral degree. Many of them are licensed

as a Professional Engineer (PE) or Certified Professional Contractor (CPC). In addition, the department has many adjunct faculty members who worked or are currently working in the industry.

FACILITIES

The department has excellent laboratory facilities for undergraduate education across all civil, environmental, and construction areas, including the teaching laboratories for civil engineering materials, construction management and engineering, environmental engineering, geotechnical engineering, structural engineering, transportation engineering, and water resources engineering. Students also have access to computer clusters and many state-of-the-art research laboratories. The program has the most updated modern teaching and research equipment such as GPS units, robotic total stations, drones, and VR units.

STUDENT ORGANIZATIONS

Students participate in many professional departmental student organizations in the department, which helps them develop leadership and teamwork skills. The major student organizations include the American Railway Engineering and Maintenance-of-Way Association (AREMA), American Society of Civil Engineers (ASCE), American Water Works Association (AWWA), Associated General Contractors (AGC), Institute of Transportation Engineers (ITE), Materials Research Society (MRS), National Association of Homebuilders (NAHB), Sigma Lambda Chi, and Water Environment Federation (WEF), as well as Steel Bridge, Concrete Canoe, Associated Schools of Construction and Residential Construction Management, GeoWall, and Quiz Bowl competition teams. Students may also participate in several student organizations within the College of Engineering, including the American Indian Science and Engineering Society (AISES), Engineers Without Borders (EWB), Grand Challenge Scholars of NDSU, Habitat for Humanity, National Society of Black Engineers (NSBE), and Society of Women Engineers (SWE). The student organizations have won several national and regional awards.

PREPARATION

High school students who wish to prepare for some courses at the college level should attempt to complete the four units of high school mathematics. Incoming freshmen prepared to enroll in calculus frequently complete their construction management degree in four years. Transfer students who have studied two years of construction-related courses at another institution typically complete the construction management degree in two additional years.

SCHOLARSHIP AND FINANCIAL AID

The department awards numerous scholarships each year, which mostly range from $500 to $10,000. The AGC of North Dakota and the Fargo/Moorhead Home Builders Care Foundation (a charitable arm of the Home Builders Association of Fargo-Moorhead) offer annual scholarships to incoming first-year and outstanding other students. In addition, many other scholarships, such as the Cossette Construction Management and Engineering Scholarship, Excellence in Construction Safety Scholarship, and Interstates Construction Management and Engineering Scholarship, are available to students. Students should check with the department for more information. Other forms of financial aid are available through the Office of Financial Aid and Scholarships.

CAREER OPPORTUNITIES

Construction management graduates are in high demand after graduation by contractors in all types of construction, from general contractors to specialty contractors. Positions available include superintendent, project manager, and construction executive. The starting salary for fresh graduates has been between $65,000 and $85,000 in recent years. Construction management students find summer internships or employment in the construction industry. The U.S. Bureau of Labor Statistics projects a 5-percent growth in employment for construction managers from 2022 to 2032 which is above the average growth rate for all occupations (3 percent).

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Total Credits: 123

An overall minimum CGPA of 2.50 and a minor in Business Administration with a minor GPA of 2.50 are required to graduate with a B.S. in Construction Management.

1

All science courses require the companion lab with the exception of geology.

2

To be eligible for enrollment into 300/400 level courses offered by the College of Business requires application for a minor in Business Administration (BA).

3

Accelerated Master's program will allow students to take up to 9 credits of graduate-level courses that can be used to fulfill both the undergraduate-level and graduate-level curriculum requirements. A separate application for the accelerated program applies.

Construction Management

Department Information

- **Department Web Site:**
  www.ndsu.edu/ccee/ (http://www.ndsu.edu/ccee/)
- **Credential Offered:**
  B.S.Cons.M.
- **Sample Program Guide:**

catalog.ndsu.edu/programs-study/undergraduate/construction-management/#planofstudytext (http://catalog.ndsu.edu/programs-study/undergraduate/construction-management/#planofstudytext)

Major Requirements

Major: Construction Management

Degree Type: B.S.Cons.M.
Minimum Credits Required for Degree: 123

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**
Category W: Wellness †		**2**
Category D: Cultural Diversity *†		
Category G: Global Perspectives *†		
Total Credits		**39**

*****
Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†
General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Code	Title	Credits
Construction Management Core Requirements		
CM&E 111	Introduction to Construction Management and Engineering	1

BA Minor 300/400 Elec. I [1]		3
BA Minor 300/400 Elec. II [1]		3
BA Minor 300/400 Elec. III [1]		3
Total Credits		**103**

Degree Requirements and Notes:

- An overall minimum cumulative GPA of 2.50 in all courses are required to graduate with a B.S. in Construction Management.
- Students must apply for the minor through the College of Business and maintain a minimum 2.50 cumulative GPA to be eligible to enroll in all 300/400 level courses offered by the College of Business.
- A cumulative GPA of 2.50 is required for both internal and external transfer students into this program.

Accelerated MBA Program Notes:

A maximum of 15 graduate credits may be used to satisfy both graduate and undergraduate degree requirements. Accelerated B.S.Cons.M./MBA students are to complete the following prescribed curriculum to meet that 15-credit limit.

1

The student in collaboration with a department advisor must identify the courses from the MBA program that will satisfy specific requirements in the undergraduate Construction Management program on the Accelerated Declaration form. Students are to complete the following graduate level classes in place of the required undergraduate course:

- CM&&E 715 for CM&E 315 (3 cr.)
- CM&E 603 for CM&E 403 (3 cr.)
- CM&E 605 for CM&E 405 (3 cr.)
- Three BA Minor 300/400 Electives (6 cr.)

Core Computer Science Competencies

Department Information

- **Department Web Site:**
  www.ndsu.edu/cs/ (http://www.ndsu.edu/cs/)
- **Credential Offered:**
  UG Certificate
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/core-computer-science-competencies/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/core-computer-science-competencies/)

The Core Computer Science Competencies certificate is comprised of those courses that anyone without a Computer Science degree may need for advanced course work or professions in computer science. CSCI 222 Discrete Mathematics includes an introduction into Boolean algebra and other mathematical concepts that form the basis of computer algorithms. CSCI 366 Database Systems addresses the theory and practice of relational database systems that underlay the vast majority of commercial software applications. CSCI 372 Comparative Programming Languages discusses concepts of some of the most important languages as well as similarities and differences between them. Programming knowledge equivalent to the Computer Science Foundations certificate is expected.

Creative Writing

Department Information

- **Department Web Site:**
  www.ndsu.edu/english/ (http://www.ndsu.edu/english/)
- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/creative-writing/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/creative-writing/)

The Creative Writing minor develops flexible and innovative thinkers who can apply their ideas and communication abilities in whatever career they choose. A Creative Writing minor offers students a rigorous practice in the craft of multiple poetic and storytelling genres, as well as opportunities to develop research skills, and skills in close reading and analysis of literary texts. Students pursuing this minor take a sequence of seven courses designed to develop design thinking, project management skills, analytic abilities, writing skills, and an understanding of creative processes. These skills are essential to the success of businesses and organizations in our region's fast-changing economy. The minor pairs well with majors in English Studies, Communication, Visual Arts, Theatre, Music, and other fields that value design thinking and creativity.

Criminal Justice

Department Information

- **Department Web Site:**
  www.ndsu.edu/criminaljustice/ (http://www.ndsu.edu/criminaljustice/)
- **Credential Offered:**
  B.S.; B.A.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/criminal-justice/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/criminal-justice/)

Criminal justice as a discipline is concerned with the broad areas of law enforcement, courts, law, and corrections, as well as criminological and legal theories which inform practice in these areas. The work of criminal justice practitioners include police patrol, criminal investigations, supervising juveniles on probation, practicing law, counseling and correctional work in institutions, group homes, or halfway houses. Criminal justice practitioners enjoy exciting professional challenges and opportunities for serving society and helping people.

The Program

During the past few years, the demand for professionals in criminal justice-related careers has increased significantly. Many criminal justice agencies and program administrators see a continuing need for qualified professionals. The criminal justice program at North Dakota State University has graduated students who have pursued criminal justice careers in local, state and federal agencies throughout the United States. The program is designed so our graduates will succeed in both beginning and advancing their criminal justice careers.

Faculty and Facilities

The criminal justice program is administered by faculty within the Department of Criminal Justice. Faculty provide teaching, research, and practical expertise related to many issues in criminal justice. The Fargo-Moorhead community provides a rich source of criminal justice education through a wide variety of criminal justice agencies that work with student interns.

Career Opportunities

Students graduating from this program have experienced much success in pursuing their career goals. Our alumni work in law enforcement, court system, law firms, correctional agencies, probation and parole departments and do so at the local, state and federal levels. These jobs typically come with good salaries and benefits, although this varies from agency to agency. Types of agencies that have employed our graduates include police departments, sheriff's departments, public policy and planning agencies, group homes, juvenile courts, family courts, probation and parole departments, juvenile and adult correctional institutions, halfway houses, and many federal agencies (e.g. U.S Marshals Service, Secret Service, and federal probation).

The Curriculum

The criminal justice curriculum is an interdisciplinary program drawing on the social sciences, behavioral sciences, humanities, and the law. Course requirements are based on the idea that our students should work through a curriculum that equips them with broad knowledge of the criminal justice system and criminological theory, and prepares them for a wide range of duties and professional responsibilities. The department also offers a minor in criminal justice and partners with the Department of Accounting and Information Systems on a fraud investigation minor.

Internship Program

Many students elect to complete internships. This is usually done during their junior or senior year. Internship opportunities exist in many agencies in North Dakota and Minnesota and can be done at any time during the calendar year. By completing an internship, students are able to combine the theoretical and applied aspects of professional preparation. Internship experience is an important element of successful job placement.

Criminal Justice Club

Students may expand their knowledge of criminal justice and career opportunities through the Criminal Justice Club. This student association allows participants to increase their knowledge and clarify career interests through field trips and meetings with professionals.

Accelerated Master's Program

Exceptional undergraduate students interested in pursuing a master's degree in criminal justice may apply during their junior year for admission into the department's accelerated master's program. This program allows students to complete certain courses which will count for both their bachelor's and master's degrees in criminal justice, thereby shortening the time it takes to complete the master's degree. Students interested in this option should consult with the department's graduate program coordinator or with their academic adviser.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

  B.S.; B.A.; Minor
- **Sample Program Guide:**
  catalog.ndsu.edu/programs-study/undergraduate/criminal-justice/#planofstudytext (http://catalog.ndsu.edu/programs-study/undergraduate/criminal-justice/#planofstudytext)

Major Requirements

Major: Criminal Justice

Degree Type: B.A. or B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**
Category W: Wellness †		**2**
Category D: Cultural Diversity *†		

Category G: Global Perspectives [*†]	
Total Credits	**39**

*

Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†

General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Code	Title	Credits
CJ 201	Introduction to Criminal Justice	3
CJ 210	Introduction to Policing	3
CJ 230	Criminology	3
CJ 270	Introduction to Corrections	3
CJ 325	Applied Research Methods	3
CJ 330	Criminal Law and Procedure	3
CJ 406	Crime and Delinquency [1]	3
CJ 407	Deviant Behavior [1]	3
CJ 460	Criminal Court System [1]	3
CJ 461	Corrections [1]	3
or CJ 410	Police & Society	
CJ 465	Gender, Race and Ethnicity in Criminal Justice [1]	3
PSYC 111	Introduction to Psychology (May satisfy general education category B)	3
SOC 110	Introduction to Sociology (May satisfy general education category B)	3
STAT 330	Introductory Statistics (May satisfy general education category R)	3
Criminal Justice Elective: Select 3 additional CJ prefix credits.		3
Using CJ 494 or CJ 496 to fulfill these electives requires permission from the department chairperson.		
Total Credits		**45**

1

Students approved to complete the accelerated B.S. in Criminal Justice to M.S. in Criminal Justice program will take the graduate level courses (CJ 606 Crime and Delinquency, CJ 607 Deviant Behavior, CJ 660 Criminal Court System, CJ 661 Corrections, and CJ 665 Gender, Race and Ethnicity in Criminal Justice).

Minor Requirements

Minor: Criminal Justice

Required Credits: 18

Code	Title	Credits
Required Courses		
CJ 201	Introduction to Criminal Justice	3
CJ 210	Introduction to Policing	3
CJ 230	Criminology	3
CJ 270	Introduction to Corrections	3
CJ 300-400 Level	6 credits of CJ credits at the 300-400 level required. Using CJ 494 and CJ 496 to fulfill these electives requires permission from the department chairperson. [*]	6
Total Credits		**18**

*

Students who do not complete a Research Methods course in their major program of study will be required to complete CJ 325 Applied Research Methods as part of their minor requirement.

Crop and Weed Science

Department Information

- **Department Web Site:**
  www.ag.ndsu.edu/plantsciences (http://www.ag.ndsu.edu/plantsciences/)
- **Credential Offered:**
  B.S.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/crop-weed-science/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/crop-weed-science/)

The Crop and Weed Sciences (CWS) major in the Department of Plant Sciences is the study of grain and forage crop production, weed science, genetics, plant breeding, crop physiology, and plant biotechnology. North Dakota is consistently a national leader for production of hard red spring wheat, durum wheat, barley, flax, dry edible beans, canola, dry peas, lentils, and sunflower. North Dakota also ranks in the top 10 states for production of several other agronomic crops, including oat, rye, sugarbeet, and grass hay, and usually ranks third in total acreage of crops harvested. Income from sales of crops accounts for more than half of the North Dakota farmers' annual cash income. Crops utilized as livestock feed account for much of the cash income credited to livestock sales. Thus, North Dakota State University offers a setting well-suited for the study of Crop and Weed Sciences.

Career Opportunities

More employment opportunities often are available in CWS than there are qualified graduates. Producers require annual inputs such as seed, fertilizers, and herbicides, so they seek assistance in sales or service areas such as crop consulting, chemical application, and soil testing each year. Therefore, opportunities for CWS graduates usually have been more stable than in employment areas where inputs can be deferred when income is low. Also, salaries for CWS graduates are at or near the top among all graduates in agriculture due to the high demand for agronomists by many companies.

The employment opportunities in CWS can best be summarized by the jobs that our graduates have accepted. Our graduates have been employed as crop production consultants (agronomists); marketing experts for herbicides, fertilizers and other agricultural chemicals; managers of farm service centers for cooperatives and elevators; agents in the production and marketing of certified seeds; research technicians for private companies and universities; natural resources conservationists and agents for other governmental agencies; county agricultural extension agents; field representatives for sugarbeet or food processing companies; farm managers; farm insurance agents; research associates with private plant breeding companies; and persons involved in the reclamation of strip-mined land.

Typically 10 to 15 percent of the CWS graduates at NDSU return to farming or ranching and 5 to 10 percent continue their studies to receive graduate degrees. The median starting salary for a CWS graduate with a bachelor's degree was $52,000 in 2022. In addition, benefits packages that include health, dental, and retirement are very competitive, signing bonuses and performance bonuses might be available, and some positions include access to a vehicle and cell phone.

Many employers hire undergraduate students as interns for the summer months, and some hire for spring-summer semester or summer-fall semester periods. Several faculty hire students to help with research activities, and the Department of Plant Sciences also sponsors summer interns with an expressed interest in graduate school. The opportunities for summer interns, beginning with students between their freshman and sophomore years, have exceeded the supply of students for several years. The salary for interns is competitive with the income for alternative summer jobs, and the strong market has resulted in wage rates as high as $22/hr with signing bonuses and some employers pay potential internship fees if taken for summer term credit. An internship provides excellent work experience and often results in a graduating senior being hired earlier and with a higher salary than students without comparable experience.

Financial Aid and Scholarships

Loans, scholarships, grants, and the work-study program are available through Financial Aid and Scholarships. Students requiring assistance may contact the Office of Financial Aid and Scholarships or One Stop.

The Department of Plant Sciences awards several scholarships for use during the freshman, sophomore, junior, and senior years. Additionally, certain scholarships are awarded by the College of Agriculture, Food Systems, and Natural Resources. Applications for all college and departmental scholarships may be applied for online between December 1 and March 1, annually. Also, many undergraduate students are employed part-time during the school year and full-time during the summer months to assist with research or teaching activities.

Extra-Curricular Opportunities

The department sponsors the NDSU Agronomy Club. The Agronomy Club invites industry and academic experts to speak about professional opportunities and activities at club meetings. The club also arranges trips to local agriculture businesses and arranges community outreach activities. The Agronomy Club participates in regional and national contests that involve crop production and weed science. And the club annually attends conventions to learn about several aspects of agriculture in the North Central region.

There are nearly 300 other Clubs and Organizations available at NDSU. Many of these focus around a discipline or interest area, just as the Agronomy Club targets the disciplines and professions encompassed by the CWS major, but you are not required to be in the major or minor to join these clubs. We welcome all students with an interest in Agronomy to join us whether you have background in crop production or just want to find out more about crop production and the industry opportunities.

CWS Major curriculum Options

The department offers four options in the CWS major: agronomy, biotechnology, science and weed science. This is an emphasis, subplan, or track as part of the CWS major to allow refinement in the direction of each student's career preparation. All students majoring or double majoring in CWS must meet the listed requirements for the core CWS program and one selected option. Students interested in a specific option will replace several of the elective courses listed in the sample curriculum with specific courses appropriate for that option.

- Agronomy – This option is the most popular. It deals with the technical aspects of agricultural production and management. It provides the most elective credits, which allows students to select courses that complement special interests in farming, marketing, business management, county extension work, etc.
- Biotechnology – This option is intended for students who wish to work as a technician or pursue graduate study in the crop biotechnology area.
- Science – This option deals with application of chemistry, botany, mathematics, and physics to CWS. It is an excellent curriculum option for students intending to pursue a graduate degree in CWS. The additional science and math component also provides good training for students pursuing careers in analysis and residue testing of soil, water, and plant tissue samples.
- Weed Science – This option, which emphasizes proper use of herbicides and other agricultural chemicals, meets the demand for qualified personnel in marketing and application of agricultural chemicals. Also, this option provides a good background for crop production consultants (agronomists) and plant protection careers. The emphasis balances crop production coursework with more requirements in weed science, entomology, plant pathology and soil science.

In addition, some faculty in plant sciences advise students interested in the Biotechnology or Agricultural Sciences majors. The Biotechnology major is an interdisciplinary program that stresses basic and applied science courses and lab experience to prepare students for employment in the biotechnology industry or for graduate study. The Agricultural Sciences program exposes students to disciplines within agriculture for careers with diverse course needs. This exposure is strengthened through selection of pertinent coursework in a minimum of three discipline areas.

cws minor

Any NDSU student with a major other than CWS can elect the CWS minor. The minor includes 18 credits of coursework and includes the foundation courses in crops and production practices with broad flexibility to explore specific crop production, pest management, soil aspects, or genetics courses. The CWS minor will give familiarity with terms and practices within crop production to assist student preparation in a related discipline. Sales and marketing managers of agronomic inputs or commodities, publication or promotion firms writing about or for Agriculture industries, animal operations that need forages and crops for feed, or soil conservationists who need to consider acceptable farming practices to meet Farm Bill criteria and stipulations are among the individuals and situations where the CWS minor would provide good supplement to another major.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

First Year			
Fall	**Credits**	**Spring**	**Credits**

PLSC 323	Principles of Weed Science	3
PLSC 455	Cropping Systems:An Integrated Approach [2]	3
PLSC 491	Seminar	1
PPTH 324	Introductory Plant Pathology	3
SOIL 210	Introduction to Soil Science	3
STAT 330	Introductory Statistics	3
Options: Select one from the following four option areas:		
The standard default option for the major is Agronomy. Student wishing to pursue a different option must officially declare that option with the Office of Registration and Records.		16-27
Total Credits		**73-84**

Agronomy Option

For students interested in production agriculture.

Code	Title	Credits
Agronomy Requirements		
BIOL 461	Plant Ecology [2]	3-4
or BIOC 260	Elements of Biochemistry	
or CHEM 240	Survey of Organic Chemistry	
MATH 103	College Algebra (or higher)	3
MICR 202 & 202L	Introductory Microbiology and Introductory Microbiology Lab	3
SOIL 322	Soil Fertility and Fertilizers	3
PLSC 300-400	(No more than 2 credits of co-op allowed) [2]	4
Total Credits		**16-17**

Biotechnology Option

For students interested in the biotechnology industry or pursuing graduate study in crop biotechnology.

Code	Title	Credits
Biotechnology Requirements		
BIOC 460	Foundations of Biochemistry and Molecular Biology I [2]	3
MATH 105	Trigonometry	3-4
or MATH 146	Applied Calculus I	
MICR 350 & 350L	General Microbiology and General Microbiology Lab	5
PLSC 453	Advanced Weed Science [2]	2-3
or PLSC 431	Intermediate Genetics	
PLSC 484	Plant Tissue Culture and Biotechnology [2]	3
Total Credits		**16-18**

Science Option

For students interested in advanced study and foundational studies.

Code	Title	Credits
Science Requirements		
CHEM 341 & 341L	Organic Chemistry I and Organic Chemistry I Laboratory	4
MATH 146	Applied Calculus I	4
MICR 202 & 202L	Introductory Microbiology and Introductory Microbiology Lab	3

PLSC 300-400	(No more than 2 credits of co-op may be used) [2]	4
Science and Math Electives	BIOC, BIOL, CHEM, MATH, MICR, and STAT prefix courses (100-400 level)	12
Total Credits		**27**

Weed Science Option

For students interested in crop consulting, weed science, and plant protection areas.

Code	Title	Credits
Weed Science Rquirements		
CHEM 240	Survey of Organic Chemistry	3-4
or BIOC 260	Elements of Biochemistry	
ENT 431	Principles of Insect Pest Management [2]	3
MATH 103	College Algebra (or higher level)	3
MICR 202 & 202L	Introductory Microbiology and Introductory Microbiology Lab	3
PLSC 433	Weed Biology and Ecology [2]	2
PLSC 453	Advanced Weed Science [2]	2
PPTH 454	Diseases Of Field and Forage Crops [2]	3
SOIL 322	Soil Fertility and Fertilizers	3
Total Credits		**22-23**

Degree Requirements and Notes

- The major allows no more than 6 credits of cooperative education (co-op) to be counted toward degree requirements.

1

PLSC 189 is only required for first-time, first-year students. These are students who have not yet completed a college course as a college student. Student that are not first-time, first-year students that either transfer into the university or change their major are not required to take this requirement.

2

Students who are approved to complete the accelerated program in the Master of Science in Plant Sciences are eligible to complete the 600 level course with graduate supervisor approval. Students are allowed to take 15 graduate credits and apply the graduate credit to these undergraduate program requirements. Students are required to complete the Accelerated Degree Student Declaration form and make formal application to the NDSU Graduate School.

Minor Requirements

Minor: Crop & Weed Science

Minimum Required Credits: 18

Code	Title	Credits
Required		
PLSC 110	World Food Crops	3
PLSC 225	Principles of Crop Production	3
Elective Courses: Select two of the following:		**6-7**
PLSC 315 & 315L	Genetics and Genetics Laboratory (both must be taken to count as one selection)	
PLSC 320	Integrated Forage and Cover Crops Production Management and Ecosystem Services	
PLSC 323	Principles of Weed Science	
Elective Courses:		**5-6**
Other courses approved by the department:		
PLSC 215	Weed Identification	
SOIL 210	Introduction to Soil Science	
ENT 350	General Entomology	
PPTH 324	Introductory Plant Pathology	

PLSC 300-400	Level Course
Total Credits	**18-19**

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- Students must earn a minimum 2.00 GPA for the minor requirements.

Cultural Diversity

Department Information

- **Department Web Site:**
  www.ndsu.edu/socanth/ (http://www.ndsu.edu/socanth/)
- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/cultural-diversity/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/cultural-diversity/)

The Cultural Diversity minor provides knowledge and skills to critically think about issues of diversity. It is a minor that can complement a variety of degree programs. The courses in this minor provide tools to help students better understand individual and societal experiences of diverse cultures and communities. Learning about other cultures helps us understand different perspectives within the world in which we live, something that is a valuable skill to take into any prospective career trajectory. The courses aim to strengthen students' understanding of how race, class, gender, ethnicity, nationality, and sexuality interact to define identities and shape social relations.

Cybersecurity

Department Information

- **Department Web Site:**
  https://www.ndsu.edu/cs/
- **Credential Offered:**
  B.S.; UG Certificate
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/cybersecurity/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/cybersecurity/)

The B.S. in Cybersecurity is designed to provide students with the knowledge and skills to allow students to succeed in the rapidly growing field of cybersecurity. It will prepare students to identify security issues with computing systems and networks, prior to attacks, and to detect and respond to ongoing attacks. This program will provide students with the skills that they will need to understand and respond to the computing, cybersecurity and relevant scientific challenges of today and tomorrow. Students will be prepared for entry level positions in a number of careers, such as cybersecurity analyst, defensive cybersecurity, penetration testing and computer and network forensics.

The cybersecurity certificate draws from the set of courses that are specific to the B.S. in Cybersecurity and the Cybersecurity track of B.S. in Computer Science degrees. The certificate can be of interest to professionals with computer science degrees who wish to expand their expertise in the area of cybersecurity. It is also targeted at current students who complete a different track of the B.S. in Computer Science and wish to cover more than one specialization.

- **Credential Offered:**
  UG Certificate
- **Program Overview:**
  catalog.ndsu.edu/programs-study/undergraduate/data-science/ (http://catalog.ndsu.edu/programs-study/undergraduate/data-science/)

Degree Requirements

Major: Data Science

Degree Type: B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Data Science

Department Information

- **Department Web Site:**
  https://www.ndsu.edu/cs/
- **Credential Offered:**
  B.S.

- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/data-science/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/data-science/)

The Major

The data science degree program is designed to equip students with advanced skills for success in today's data-driven world. This strategic program seamlessly blends statistics, computer science, and business, providing a deep understanding of data analysis, predictive modeling, and machine learning techniques while establishing a robust foundation in statistical methodologies and computational proficiency.

Students will learn how to navigate data collection, interpretation, and cleaning intricacies, simultaneously mastering programming languages and tools crucial for efficient data manipulation and analysis. Through a specialized focus on statistics, students gain expertise to extract valuable insights from complex datasets, making informed data-driven decisions, and expertly communicate findings to diverse audiences.

The Certificate

The Data Science certificate draws from the set of courses that are specific to the Data Science track of the B.S. in Computer Science degree. It can be of interest to professionals with computer science degrees who wish to expand their expertise in the area of data science. It is also targeted at current students who complete a different Computer Science track or another major program and wish to cover more than one specialization.

Economic Computation

Department Information

- **Department Web Site:**
  www.ag.ndsu.edu/agecon (http://www.ag.ndsu.edu/agecon/)
- **Credential Offered:**
  UG Certificate
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/economic-computation/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/economic-computation/)

The undergraduate certificate in economic computation places students at the forefront of technology and analytical skills. The program is intended to equip undergraduate students with applied skills in economic computation to analyze economic data and succeed in finding both post-graduate employment and pursuing graduate education. This certificate provides both theory to guide interpretation of economic data and applied statistical skills. Courses in computation and econometrics provide an opportunity for students to master both sets of skills in a relatively short period of time. Economic theory and the econometric and computational tools provided by the certificate offer students the opportunity to integrate methodologically grounded interpretation of empirical observations into discussion concerning policies at all levels of institutions, both public and private.

Economic Computation

Additional course prerequisites for ECON 410 and ECON 411 are required.

Economics

Department Information

- **Department Web Site:**
  www.ndsu.edu/agecon/ (http://www.ndsu.edu/agecon/)
- **Credential Offered:**
  B.S.; B.A.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/economics/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/economics/)

Economics is the social science that deals with problems of choice and decision making. It does so through a systematic and logical framework for analyzing how society and individuals solve such problems as what goods and services to produce, how to organize production and for whom goods and services are to be produced. Knowledge of economics is necessary for understanding and dealing intelligently with topics such as domestic and global economic development, environmental and natural resource management, renewable energy policy, international trade, government finance and market failure.

Background Information

Besides being important for understanding contemporary social issues, economics is useful in developing career skills for business, law, teaching, public administration and research. If you enjoy the challenge of understanding how the economy works and how economic concepts are used in making decisions, economics offers a stimulating and rewarding career.

The Program

The study of economics has a long tradition at North Dakota State University. A student pursuing an economics major at NDSU has the advantage of receiving instruction from a well-established and strong faculty. Economics courses are taken by students in all colleges on campus, so classes provide an opportunity to broaden one's understanding through interaction with other students.

The Department offers three tracks within the economics major: a general economics track, a quantitative economics track, and a business economics track.

- The general economics track offers students more flexibility in terms of economics field course selection.
- The quantitative economics track is designed for students who desire to pursue a graduate degree in economics after earning a bachelor's degree, or for students who desire a quantitative approach to economics. Students with strong quantitative and/or statistical backgrounds are highly encouraged to select the quantitative economics track.
- The business economics track is designed for economics students seeking business-oriented careers; it requires students to complete specific business and accounting courses offered through the College of Business.

During the freshman and sophomore years, the program requires basic college courses such as English, mathematics, science, communication and information technology. The introduction to economics includes 1) microeconomics, the study of relative prices and the consequences of different market forms, and 2) macroeconomics, the study of such topics as the general level of prices, employment and output.

Economics majors take a one-year sequence in intermediate economic theory. Students enhance their ability to explain and use fundamental microeconomics and macroeconomics concepts and are further exposed to relationships between governments and markets. These concepts and relationships establish the foundation a student needs to deal with current economic issues.

Economics students take elective courses to develop areas of emphasis such as development economics, international economics, industrial organization, public economics, health economics, natural resource economics, economics of entrepreneurship, and environmental economics. A representative program for the major in economics is summarized on the back of this page. A major in economics also can be combined with a variety of minors and other majors and still be completed in four years. The concepts of economics can be applied to many fields. A minor in economics may be selected in combination with most other majors on campus, including business.

Career Opportunities

Graduates with degrees in economics are in high demand, with economics consistently being among the top five majors wanted by employers. Business, industry, government service and teaching are some of the possible areas of employment for the economist. The study of economics also provides excellent preparation for graduate education in areas such as business, economics and law.

High School Preparation

It is recommended that high school students interested in studying economics at the university level concentrate on developing their mathematical and writing skills.

The Faculty

The economics faculty within the Department of Agribusiness and Applied Economics is student and academic oriented. The low student to faculty ratio in upper division economic courses provides close relationships and an interactive learning environment.

Financial Aid and Scholarships

A number of scholarships are available to outstanding agribusiness and applied economics majors. The College of Agriculture, Food Systems, and Natural Resources awards scholarships each year. For more information on scholarships, go to: https://www/ndsu.edu/admission/scholarships/.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

ECON 440	Game Theory and Strategy	
ECON 461	Economic Development	
ECON 470	Public Economics	
ECON 475	Health Economics	
ECON 480	Industrial Organization	
Program Option: Select one of three options to complete the major:		33-47
1) Standard		
2) Quantitative		
3) Business Economics		
Total Credits		**52-66**

1

ECON 189 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take ECON 189. If a student has completed another NDSU [Prefix] 189 course, this will substitute for ECON 189.

Standard Option

NOTE: Students selecting the Standard Option may complete either a Bachelor of Science or a Bachelor of Arts degree.

Code	Title	Credits
Standard Option Requirements		
MATH 144	Mathematics for Business	4
STAT 330	Introductory Statistics	3
or STAT 367	Probability	
STAT 331	Regression Analysis [2]	2-3
or ECON 410	Econometrics	
Economics Electives		15

Select 15 credits from the list below. Students may select no more than 6 credits from the list of approved non-economics courses, including ECON 324 and ECON 356, as part of the 15 credits of economics electives.		
ECON 402	Economics of Entrepreneurship	
ECON 410	Econometrics [2]	
ECON 411	Computational Economics	
ECON 440	Game Theory and Strategy (if not taken as capstone)	
ECON 461	Economic Development (if not taken as capstone)	
ECON 465	Labor Economics	
ECON 470	Public Economics (if not taken as capstone)	
ECON 472	International Trade	
ECON 475	Health Economics (if not taken as capstone)	
ECON 476	Monetary Theory and Policy	
ECON 480	Industrial Organization (if not taken as capstone)	
ECON 481	Natural Resource Economics	
ECON 482	Environmental Economics	
Select no more than 6 credits from the following as part of the 15 credits of economics electives:		
AGEC 339	Quantitative Methods & Decision Making	
AGEC 344	Agricultural Price Analysis	
AGEC 346	Applied Risk Analysis	
AGEC 347	Principles of Real Estate	
AGEC 445	Agribusiness Industrial Strategy	
AGEC 446	Agribusiness Finance	
BUSN 487	Managerial Economics	
ECON 324	Money and Banking	
ECON 356	History of Economic Thought	
FIN 410	Investment Analysis and Management	
FIN 420	Options, Futures, and Other Derivatives	
FIN 430	Management of Financial Institutions	
FIN 440	International Finance	
FIN 450	Advanced Bank Management	
FIN 460	Corporate Finance	
Additional Social & Behavioral Requirements		6
In addition to the 6 credits for general education, students must complete 6 credits of social and behavioral sciences. Three credits must be selected from the current general education list while the remaining 3 credits may be any course with a prefix of: ANTH, CJ, GEOG, POLS, PSYC, or SOC.		
Bachelor of Science or Bachelor of Arts Requirements - A student must select either a BS or BA degree. The following requirements apply to the specific degree type selected:		3-16+
Bachelor of Science: Completion of a minor program of study. This minor must be officially declared through the Office of Registration and Records. (Minimum 16 credits)		
Bachelor of Arts: Completion of the BA Langauge Proficiency requirements and 3 credits of 300-400 level humanities, social sciences or a study abroad experience. (Credits for language proficiency will vary depending on placement; 3-14 credits)		
Total Credits		**33-47**

2

STAT 331 is waived if ECON 410 is taken.

Quantitative Economics option

NOTE: Students selecting the Quantitative Economics Option complete a Bachelor of Science degree only.

Code	Title	Credits
Quantitative Economics Option Requirements		
CSCI 122	Visual BASIC	3
or CSCI 159	Computer Science Problem Solving	
ECON 410	Econometrics	3

or ECON 411	Computational Economics	
MATH 165	Calculus I	4
MATH 166	Calculus II	4
MATH 259	Multivariate Calculus	3-4
or MATH 265	Calculus III	
or CSCI 222	Discrete Mathematics	
MATH 266	Introduction to Differential Equations	3
or STAT 368	Statistics	
or CSCI 366	Database Systems	
STAT 367	Probability	3
or STAT 467	Probability and Mathematical Statistics I	
Economics Electives - Select 6 credits from the following 400-level economics electives:		6
ECON 402	Economics of Entrepreneurship	
ECON 410	Econometrics (May take the opposite course as an elective from what was taken in the quant. econ. option requirements.)	
or ECON 411	Computational Economics	
ECON 440	Game Theory and Strategy (if not used as capstone)	
ECON 461	Economic Development (if not used as capstone)	
ECON 465	Labor Economics	
ECON 470	Public Economics (if not used as capstone)	
ECON 472	International Trade	
ECON 475	Health Economics (if not used as capstone)	
ECON 476	Monetary Theory and Policy	
ECON 480	Industrial Organization (if not used as capstone)	
ECON 481	Natural Resource Economics	
ECON 482	Environmental Economics	
Minor Requirement		
Minor in Computer Science, Mathematics or Statistics Required		10-14
This option requires the completion of either the computer science, mathematics or statistics minor. Approximately 10-14 credits for any of these minors remains after the completion of the option requirements. The minor must be officially declared through the Office of Registration and Records.		
Total Credits		**39-44**

Business Economics option

NOTE: Students selecting the Business Economics Option complete a Bachelor of Science degree only.

Code	Title	Credits
Business Economics Option Requirements		
ECON 410	Econometrics	3
ACCT 200	Elements of Accounting I	3
ACCT 201	Elements of Accounting II	3
CSCI 122	Visual BASIC	3
Economics Electives - Select 9 credits from the following:		9
ECON 402	Economics of Entrepreneurship

ECON 475	Health Economics (if not used as capstone)	
ECON 476	Monetary Theory and Policy	
ECON 480	Industrial Organization (if not used as capstone)	

ECON 481	Natural Resource Economics	
ECON 482	Environmental Economics	
Electives - Select 3 credits from the following:		3
BUSN 340	International Business	
BUSN 341	Global Business Environment	
ECON 472	International Trade	
FIN 440	International Finance	
MGMT 440	International Management	
MRKT 440	International Marketing	
Quantitative Tools: Select 3 credits from the following:		3
ACCT 420	Accounting Information Systems	
AGEC 339	Quantitative Methods & Decision Making	
Minor Requirement		
Minor in Business Administration, Accounting, Banking or Entrepreneurship Required		10
This option requires the completion of a minor in Business Administration, Accounting, Banking, or Entrepreneurship. Approximately 10+ credits for the minor remains after the completion of the option requirements. The minor must be officially declared through the Office of Registration and Records.		
Total Credits		**37**

PROGRAM NOTES:

- Students selecting economics must complete the courses in the Core Requirement area and the requirements outlined within one of the identified option areas listed below: 1) Standard Option 2) Quantitative Economics Option or 3) Business Economics Option.
- Students must earn a minimum 2.00 cumulative GPA in courses that satisfy the core requirement and option requirements.

Minor Requirements

Minor: Economics

Required Credits: 18

Code	Title	Credits
Required Courses		
ECON 201	Principles of Microeconomics	3
ECON 202	Principles of Macroeconomics	3
ECON 341	Intermediate Microeconomics	3
or BUSN 487	Managerial Economics

Elective Courses		
ECON 300-400	Elective	3
ECON 400	Elective	3
Total Credits		**18**

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- Students must earn a minimum 2.00 GPA for the minor requirements.
- This minor is not available to Agricultural Economics majors.

Electrical Engineering

Department Information

- **Department Web Site:**
  www.ndsu.edu/ece/ (http://www.ndsu.edu/ece/)
- **Credential Offered:**
  B.S.E.E.
- **Official Program Curriculum:**

catalog.ndsu.edu/undergraduate/program-curriculum/electrical-engineering/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/electrical-engineering/)

Electrical engineers create products and services for society out of materials that exist in nature using principles of science and common sense. The profession is broad, encompassing products valued by society in many technical specialties from electric power and energy utilization to our current information age.

The Program

The Bachelor of Science in Electrical Engineering program is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org, under the commission's General Criteria and Program Criteria for Electrical, Computer, Communications, Telecommunication(s) and Similarly Named Engineering Programs. It has the largest enrollment in the Dakotas. The department faculty, many of whom have years of experience in industry and teaching, give considerable attention to the individual student. Major components of the undergraduate program are basic science and mathematics, humanities and social sciences, communication, engineering science, engineering design and ethics, and both breadth and depth in electrical and computer engineering.

Areas Of Specialization

The Electrical Engineering program is designed to reflect the broad nature of the field, and students may tailor their studies within broad parameters. Students are encouraged to develop an individual program of study in close consultation with their advisers. Examples are available to illustrate how specialization may be obtained in a number of different technical areas. Students may mix and match from the examples to suit their particular interests. Technical areas include the following:

- **Biomedical Engineering** is firmly based in engineering and the life sciences. The integration of medicine and engineering serves to provide appropriate products, tool, and techniques for research diagnosis and treatment by health care professionals. Some important products are artificial hearts, medical imaging (MRI, ultrasound, CT scans), prosthetic devices, and computer aids for diagnosis. Biomedical engineers help identify the problems and needs that can be solved using engineering technology and systems methodology to provide high-quality health care at reasonable cost.
- **Communication and Signal Processing** are closely related fields within electrical engineering. Communication is the process of transferring information from one point in time and space to another point. Signal processing involves signal representation, as well as signal design and filtering. Students with this specialization find challenging opportunities worldwide to meet the need for more convenient, inexpensive, and reliable communication and signal processing.
- **Control Engineering** deals with the design and implementation of algorithms for controlling physical systems. Examples include active suspension for cars, autopilots for aircraft, and robot motion control.
- **Electromagnetics** includes electromagnetic compatibility, fiber optics, antennas, microwave devices, radar, sonar, satellite systems, power and communication transmission lines, grounding, shielding and propagation.
- **Electronics and Microelectronics** deal with integrated circuits, VSLI, transistors, lasers, consumer electronics, defense electronics, power electronics, and electronic materials.
- **Nanotechnology** deals with the study of electric materials at the nanoscale level for applications such as solar cells and sensors.
- **Optical Engineering**, developed jointly with the Department of Physic, prepares future engineers in such areas as quantum theory; coherent/incoherent polarized/non-polarized light; geometric, physical, and Fourier optics; holography; and image processing and acquisition.
- **Power Systems** deals with generation, transmission, distribution and utilization of electric energy subject to safety, environmental and economic concerns.

Cooperative Education Program

The Cooperative Education Program allows students to alternate classroom study with a series of paid professional work experiences related to electrical engineering. These experiences increase in complexity as the student's background increases. The program provides opportunity for pre-graduation experience in the profession, exploration of several career opportunities, money for education, an enriched degree and enhanced opportunities for employment following graduation.

High School Preparation

High school students are recommended to take one unit of physics, four units of mathematics and one unit of chemistry.

The Facilities

The Electrical and Computer Engineering building is part of an eight building engineering complex. The building contains specialized laboratories and equipment. Numerous grants and donations from the National Science Foundation and private industry have provided valuable equipment. Laboratories along with department and university computer capabilities support education and research.

Career Opportunities

NDSU electrical engineering graduates are working all over the world in a variety of exciting jobs at excellent salaries. They work in research, design, sales, manufacturing, testing, installation, development and teaching. Many graduates find an engineering education provides excellent training for

fields other than engineering such as business, medicine or law. Since engineers are problem solvers, there is a constant demand for engineers to solve problems outside typical engineering fields.

Research and Graduate Study

Departmental faculty members are currently active in several areas of research including biomedical, nanotechnology, communication and signal processing, controls, electromagnetics, electronics and power engineering. Graduate studies leading to the master's and doctoral degrees are offered in the department. Further details are available in the *Graduate Bulletin.*

Selective Admission

Transfer students from international institutions must have a 3.00 GPA.

Further, the department policy is that transfer courses equivalent to ECE 173 (or CSCI 160), ECE 275, EE 206 and all required Math must have a "C" or better before enrolling in ECE courses listed in the curriculums for Junior & Senior years."

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Electrical Engineering

Degree Type: B.S.E.E.
Minimum Degree Credits to Graduate: 126

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**

Total Credits		**39**

*****

Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†

General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Code	Title	Credits
Electrical Engineering Core Requirements [1]		
ECE 111	Introduction to Electrical and Computer Engineering	3
ECE 173	Introduction to Computing [2]	4
ECE 275	Digital Design [2]	4
ECE 311	Circuit Analysis II	4
ECE 320	Electronics I	3
ECE 321	Electronics II	2
ECE 331	Energy Conversion	4
ECE 341	Random Processes	3
ECE 343	Signals & Systems	4
ECE 351	Applied Electromagnetics	4
ECE 376	Embedded Systems	4
ECE 401	Design I (capstone)	1
ECE 403	Design II (capstone)	2
ECE 405	Design III (capstone)	3
MATH Courses Required		
MATH 129	Basic Linear Algebra [2]	3
MATH 165	Calculus I (May satisfy general education category R) [2]	4
MATH 166	Calculus II [2]	4
MATH 265	Calculus III (w/ vectors) [2]	4
MATH 266	Introduction to Differential Equations [2]	3
Other Courses Required		
CHEM 121	General Chemistry I (May satisfy general education category S)	3
EE 206	Circuit Analysis I [2]	4
ENGR 327	Ethics, Engineering, and Technology	3
PHYS 251	University Physics I (May satisfy general education category S)	4

PHYS 252	University Physics II (May satisfy general education category S)	4
Select one of the following: (May satisfy general education category C)		3
ENGL 320	Business and Professional Writing	
ENGL 321	Writing in the Technical Professions	
ENGL 324	Writing in the Sciences	
ENGL 459	Researching and Writing Grants and Proposal	
Select one of the following lab courses (May satisfy general education category S):		1
CHEM 121L	General Chemistry I Laboratory	
PHYS 251L	University Physics I Laboratory	
PHYS 252L	University Physics II Laboratory	
ECE Electives		
Select 9 credits of ECE 4XX level prefix electives. Includes the cross listed courses of ECE 427/IME 427; ECE 429/IME 429; ECE 411/PHYS 411; & ECE 411L/PHYS 411L (excluding 494 and 496).		9
Tech Electives		
Select 12 credits from the following:		12
ABEN 456	Biobased Energy	
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	
BIOL 220 & 220L	Human Anatomy and Physiology I and Human Anatomy and Physiology I Laboratory	
BIOL 221 & 221L	Human Anatomy and Physiology II and Human Anatomy and Physiology II Laboratory	
BIOL 315 & 315L	Genetics and Genetics Laboratory	
CE 309 & CE 310	Fluid Mechanics and Fluid Mechanics Laboratory	
CE/ME 486	Nanotechnology and Nanomaterials	
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory	
CHEM 341 & 341L	Organic Chemistry I and Organic Chemistry I Laboratory	
CHEM 342 & 342L	Organic Chemistry II and Organic Chemistry II Laboratory	
CHEM 364	Physical Chemistry I	
CHEM 365 & CHEM 471	Physical Chemistry II and Physical Chemistry Laboratory	
CHEM 425 & CHEM 429	Inorganic Chemistry I and Inorganic Chemistry Laboratory	
CSCI 161	Computer Science II	
CSCI 222	Discrete Mathematics	
CSCI 336	Theoretical Computer Science	
CSCI 366	Database Systems	
CSCI 372	Comparative Programming Languages	
CSCI 426	Introduction to Artificial Intelligence	
CSCI 459	Foundations of Computer Networks	
CSCI 467	Algorithm Analysis	
CSCI 474	Operating Systems Concepts	
CSCI 477	Object-Oriented Systems	
ECE 374	Computer Organization	
ECE 494	Individual Study (max. of 6 cr.)	
ECE 4XX	Any ECE 400 level didactic course	
ECE 496	Field Experience (max. of 3 cr.)	
ENGR 310	Entrepreneurship for Engineers and Scientists	
IME 440	Engineering Economy	

IME 456	Program and Project Management
IME 461	Quality Assurance and Control
MATH 270	Introduction to Abstract Mathematics
MATH 420	Abstract Algebra I
MATH 421	Abstract Algebra II
MATH 429	Topics in Linear Algebra
MATH 450	Real Analysis I
MATH 452	Complex Analysis
MATH 480	Applied Differential Equations
MATH 481	Fourier Analysis
MATH 483	Partial Differential Equations
MATH 488	Numerical Analysis
ME 221	Engineering Mechanics I
ME 222	Engineering Mechanics II
ME 223	Mechanics of Materials
ME 350	Thermodynamics and Heat Transfer
ME 470	Renewable Energy Technology
MICR 445	Animal Cell Culture Techniques
PHYS 350	Modern Physics
PHYS 360	Modern Physics II
PHYS 413	Lasers for Scientists and Engineers
PHYS 415	Elements of Photonics
PHYS 485	Quantum Mechanics I
STAT 450	Stochastic Processes
STAT 468	Probability and Mathematical Statistics II
Total Credits	**106**

1

Students must complete all of the courses listed in the Electrical Engineering Core Requirements section with a 2.00 GPA.

2

No grade less than a 'C' is accepted in these courses and before enrolling in ECE 3XX level prefix courses, excluding ECE 311.

Degree Requirements and Notes

- For students interested in pursuing one of the areas of specialization, lists of recommendations for specific electives are available from the ECE Department (https://www.ndsu.edu/ece/).

Electrical Engineering and Physics

Department Information

- **Department Web Site:**
  www.ndsu.edu/ece/ (http://www.ndsu.edu/ece/)
- **Credential Offered:**
  B.S.E.E.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/electrical-engineering-physics/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/electrical-engineering-physics/)

This dual major option will appeal to students with broad interests in both fundamental physics science and applied engineering methods. Graduates, equipped with analytical problem-solving skills and technical knowledge, will be well prepared to pursue careers in a wide range of fields within industry, government, and higher education. Students will earn one degree, a Bachelor of Science in Electrical Engineering (B.S.E.E.) degree, with a major in electrical engineering and physics.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as,

but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

PHYS 486	Quantum Mechanics II	
PHYS 489	Senior Project II	
MSUM Astronomy Courses (AST 300-400 level - with dept. permission)		
Mathematics Courses Required		
MATH 129	Basic Linear Algebra [2]	3
MATH 165	Calculus I [2]	4
MATH 166	Calculus II [2]	4
MATH 265	Calculus III [2]	4
MATH 266	Introduction to Differential Equations [2]	3

Other Required Courses		
EE 206	Circuit Analysis I [2]	4
ENGR 327	Ethics, Engineering, and Technology	3
Select one upper division writing course from the following:		3
ENGL 320	Business and Professional Writing	
ENGL 321	Writing in the Technical Professions	
ENGL 324	Writing in the Sciences	
ENGL 459	Researching and Writing Grants and Proposal	
Total Credits		**111-112**

1

Students must complete all of the courses listed in the Electrical Engineering Core Requirements section with a 2.00 GPA.

2

No grade less than a 'C' is accepted in these course and before enrolling in ECE 3XX level prefix courses, excluding ECE 311.

Elementary Education & Human Development and Family Science

Department Information

- **Department Web Site:**
  www.ndsu.edu/hdfs/ (http://www.ndsu.edu/hdfs/)
- **Credential Offered:**
  B.S.; B.A.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/elementary-education-human-development-family-science/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/elementary-education-human-development-family-science/)

The human development and family science/elementary education dual degree program is designed to provide additional knowledge in all aspects of child development to prepare elementary teachers to be advocates for young children and extend their knowledge about how children learn, what they learn, and the techniques that facilitate such learning.

The Program

Through this curriculum, students are concurrently enrolled in the human development and family science (HDFS) major (child development option) through North Dakota State University and the elementary education major through Valley City State University (VCSU). The culmination of these requirements leads to a bachelor's degree from NDSU (human development and family science major/child development option) as well as a bachelor's degree from VCSU (elementary education major).

Under a cooperative agreement, students remain on the NDSU campus to complete all coursework for the dual degree. The courses specific to the elementary education major (VCSU) are offered on the NDSU campus or in nearby elementary schools by VCSU faculty. Students are certified to teach elementary education in public schools and may, with additional course work and an additional student teaching experience, be certified to teach kindergarten as well.

The HDFS degree complements and strengthens the elementary education curriculum with coursework in child development, family issues and cultural diversity.

Children are very diverse in all aspects of their development—physical, cognitive, social and emotional. It is more accurate to view "normal" development as a range of possible outcomes rather than a single life course. Ultimately, these developmental factors have a strong influence on children's performance and behavior in school. A degree in HDFS will help future teachers understand development and its diversity, making them more effective teachers and helping them work with children from a wide variety of backgrounds.

Selective Admission

Admission to the dual degree program consists of two separate university applications:

1. Application for admission to NDSU for the human development and family science/elementary education dual degree prior to beginning the program, and
2. Application for admission to VCSU and admission to the teacher education program, which occurs at the end of the sophomore year.

During or immediately following the introductory professional education course, students must meet additional requirements to be admitted into teacher education:

1. Sophomore standing or better with a minimum cumulative grade point average of 2.75,
2. Satisfactory academic performance in English 110 and 120 (grades of C or higher) and successful completion of a speech screening test,
3. Achievement of minimum scores on the Pre-Professional Skills Test (PPST), and
4. Qualification for teacher certification in the state of North Dakota upon VCSU program completion, as outlined in the latest issue of the Educator's Professional Certificate Regulation booklet published by the North Dakota Department of Public Instruction.

Student Teaching

Student teaching is the culmination of the teaching program. Students have the opportunity to apply skills acquired in college courses under the supervision of an experienced educator.

Certification

Upon completing this program, students are eligible for certification to teach grades 1 through 8. The program is accredited by the National Council for Accreditation of Teacher Education.

Additional Certifications and Endorsements

With some additional courses, students may complete any of the following certifications, endorsements, or minors: Coaching, English Language Learner, Kindergarten, Library Media and Information Science, Middle Level Education, Reading, Minnesota Licensure, Special Education Strategist, and STEM.

Financial Aid and Scholarships

The Office of Financial Aid and Scholarships (https://www.ndsu.edu/onestop/financial-aid-and-scholarships/) at NDSU makes available grants, loans, scholarships and work-study employment. Scholarships also are available through the College of Health and Human Sciences.

The Facilities

Facilities for the dual degree program are housed in Evelyn Morrow Lebedeff Hall and the Family Life Center. Included in these buildings are classrooms, conference rooms and a child development center serving young children and their families.

Extra-Curricular Opportunities

Students may enhance their involvement by participating in groups such as the HDFS Club, the Elementary Education Club, the North Dakota Association for the Education of Young Children, the North Dakota Family and Consumer Sciences Association and the North Dakota Education Association.

Community Setting

The Fargo-Moorhead metropolitan area offers a conducive setting for study. Students have the opportunity to work in a number of community institutions serving children and families.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Students should NOT enroll themselves in HDFS 496 via Campus Connection. The NDSU Registration and Records office automatically enrolls students in the course during the student's teaching semester.

**

BIOL 124 and GEOL 106 are two options for Global Perspectives, required for General Education

***

The lab credit must be in biology or earth science (including geology).

Elementary Education & Human Development and Family Science Dual Degree Program

Department Information

- **Department Web Site:**
  www.ndsu.edu/hdfs/ (http://www.ndsu.edu/hdfs/)
- **Credential Offered:**
  B.S.; B.A.
- **Sample Program Guide:**
  catalog.ndsu.edu/programs-study/undergraduate/elementary-education-human-development-family-science/#planofstudytext (http://catalog.ndsu.edu/programs-study/undergraduate/elementary-education-human-development-family-science/#planofstudytext)

Major Requirements

Dual Degree Program
Major at NDSU: Human Development & Family Science
Major at VCSU: Elementary Education

Degree Type at NDSU: B.A. or B.S.
Minimum Degree Credits to Graduate: 126

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**

GEOG 111	Survey of Geography	3
Total Credits		**112**

1

If no other NDSU courses are being taken during the same semester as EDUC 350, then students must enroll in an NDSU HDFS 496 course (1 cr.) in that semester. HDFS 496 can only be taken for a total of 2 credits for the entire program.

NDSU HDFS Degree Requirements and Notes

- A grade of C or better is required for all HDFS courses, regardless of whether they are used for the major core, major electives, general education, or free electives.
- A 2.50 cumulative GPA is required in major courses for graduation.
- Course taken *Pass/Fail* will not be used to satisfy any requirements other than total credits.

VCSU Elementary Education Degree Requirements and Notes

- Though not required, many majors pursue a Reading or STEM credential or an endorsement in Kindergarten, Middle School, English Language Learners (ELL), or as a Special Education Strategist.
- A 2.75 cumulative GPA is required for admission to teacher education.
- A 2.5 cumulative GPA is required to begin coursework in elementary education program.
- Students will need to take Praxis CORE I sophomore year and Praxis II subject matter and pedagogy exams senior year .

Emergency Management

Department Information

- **Department Web Site:**
  www.ndsu.edu/emgt/ (http://www.ndsu.edu/emgt/)
- **Credential Offered:**
  B.S.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/emergency-management/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/emergency-management/)

Our active pedagogy provides the theoretical and practical knowledge essential to the effective practice of emergency management in the public, private and non-profit sectors and the opportunity to apply that knowledge through discussion, activity, and service learning projects. You will be engaged, learn, and have a sense of belonging, and experience these things while focused on an important topic! Emergency management is “a managerial function charged with creating the framework within which communities reduce vulnerabilities to hazards and cope with disasters. Emergency management protects communities by coordinating and integrating all activities necessary to build, sustain, and improve the capability to mitigate against, prepare for, respond to, and recover from threatened or actual natural disasters, acts of terrorism, or other man-made disasters” (Principles of Emergency Management, 2007).

The Program

The major prepares students for success as practitioners in emergency management as well as related fields. The rigor of the major also prepares students for graduate work. The major is ideally-suited for students seeking emergency management as a career of first choice. Student career success is built upon the following four program attributes:

1. Provide an educational foundation that supports graduates’ entry into different settings where emergency management is practiced (e.g., government at all levels; businesses; schools and colleges; healthcare industry; non-profit organizations; humanitarian efforts; etc.);
2. Support effective practice by providing an evidence-based focus on the research and science critical to the field;
3. Promote and foster experiential opportunities through focused class activities and required internships;
4. Develop skills necessary to the effective practice of emergency management (e.g., communication; collaboration; teamwork; leadership; critical thinking; problem-solving, etc.).

The Faculty

Faculty members possess broad-based expertise in emergency management, as well as specialized expertise in their areas of practice and scholarly activity. The diversity in faculty interests, experience and expertise create a rich environment for students to learn, build relationships, and be mentored.

Curriculum Planning

Beyond the major, students are encouraged to plan a curriculum that leverages both general education coursework and requirements to complete a minor to advance their career interests and goals. Our faculty advisors are eager to meet with students to help them develop those plans. The Department also provides an orientation guide with a list of recommended general education courses that are complimentary to the major to support student choices and other guidance to support curriculum planning.

Transfer Students

Transfer students who have completed an Associates of Arts (AA), or an Associates of Science (AS), or an Associates of Applied Sciences (AAS) degree, the minor requirements for the Bachelor of Science degree will be waived. These two instances of transfer could save a student 16-24 credits or 5 to 8 classes. In addition, the department also values the service of our military men and women, and as of Fall 2020, current and former military men and women can save up to a semester when pursuing an undergraduate degree in emergency management. If NDSU's Office of Registration and Records recognizes 15 or more credits of your military training as transferable, students do not have to complete the Bachelor of Science minor requirement.

Internship Program

A six-credit internship is required for the major. Internships are typically completed in a student's junior or senior year. The internship experience allows students to combine theoretical and applied aspects of emergency management. Internships are designed to meet each student's career goals. As such, internship opportunities are as varied as students' career goals and can include working in a variety of local, national or international settings. Internships are essential for student development and are a key factor in successful job placement.

Career Opportunities

An emergency management degree prepares students for career opportunities across all sectors, all industries and all locations. The emergency management function, while structured in a variety of ways in different government, private sector, and non-profit organizations, plays an essential role in maintaining safe and secure operations that protect the entity's interests. Career opportunities in emergency management exist at all levels of government, across all government agencies, in all developing countries; private sector companies as both a site-based and corporate function; public schools and higher education institutions; hospital and healthcare facilities; non-profit organizations as part of a primary disaster mission or general operational mission; critical infrastructure industries; museums, malls, stadiums, and event centers; and other organizations or entities that manage facilities or services subject to hazards or operational interruptions that can result in harm to individuals, property or the organization.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. Cannot count an EMGT elective core course taken toward the required 6 elective credits in this category.

Minor Requirements and Notes

- A minimum of 9 credits must be taken at NDSU.

English

Department Information

- **Department Web Site:**
  www.ndsu.edu/english/ (http://www.ndsu.edu/english/)
- **Credential Offered:**
  B.S.; B.A.; Minor

- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/english/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/english/)

The English studies major offers students the flexibility to follow interests in literature, linguistics, and creative, technical, and professional writing. The curriculum joins the strengths of a traditional humanities education with the career outcomes today's students seek. English majors develop strong communication skills, multiple research strategies, flexibility in responding to complex situations, and effective project-management skills. Career success is tied to the ability to understand, restate, and analyze complex ideas and texts for multiple audiences. Such success requires habits of investigation, the ability to critically analyze sources of information, and the self-assurance to handle unfamiliar materials and situations. The department offers multiple opportunities to develop these skills both in the classroom and outside the university, while working with and for authentic clients.

The Program

The English department offers a Bachelor of Arts (B.A.) and a Bachelor of Science (B.S.) in English**.** The B.A. degree requires functional proficiency in at least one language other than English, typically 14 credits of course work in that language. The flexibility of the single major in English studies means that students can emphasize course work in literature, linguistics, writing studies, or a balance of these.

The English minor has two option areas for students to pursue: literature or writing studies.

- Literature option – This option of the English minor gives students the opportunity to read widely in literature, develop analytical skills, and hone writing skills. Courses include Literary Analysis, literature survey courses, elective literature and film courses, and one writing course.
- Writing Studies option – This option of the English minor provides students with the opportunity to write creatively and professionally, and to explore emerging communication technologies. Courses include Introduction to Writing Studies, elective writing courses, and one upper-level literature or linguistics course.

Community/Student Involvement Opportunities

The Department of English offers many options for co-curricular activities that add value and dimension to English majors and minors. Students develop leadership and planning skills by taking part in English Club and the English Honor Society, Sigma Tau Delta. They practice spoken English with international students through Conversational English Circles, and they create and edit an annual literary magazine, *Northern Eclecta*. The department office suite includes a collaboration and creativity space for undergraduate students, where students can meet to study or work on projects, or share lunch and conversation with other majors. English classes often work with a range of local non-profits, and English majors are encouraged to pursue internships, co-ops, and field experiences, and regularly find opportunities in local industries, non-profits, and government offices.

Career Opportunities

Traditional careers in English studies, such as teaching, and professional and technical writing, are currently in high demand in our region, and the abilities to think critically, to synthesize information, and to write and speak with precision, clarity, and effectiveness are valuable in any career. Thus, many companies look for employees with English majors or minors. The demand for technical and professional writers has been growing, and many companies, non-profit organizations, and government agencies hire English majors. English majors also acquire project management skills and the ability to work as members of a team, which make them desirable employees. Former and current students are employed in writing intensive and/or training positions; some start their own businesses. Some English graduates seek professional degrees (law, library science, ministry, or medicine) or graduate degrees in English immediately after earning a B.A. or B.S.; some choose these options as career changes later in life.

High School Preparation

Beyond the core curriculum requirements necessary for admission to the University, students should have an English preparation that includes both frequent reading from most literary genres and extensive writing experience.

Scholarships

The Department of English awards more than $8,000 in scholarships each year and English students regularly are awarded Fulbright fellowships. Contact the department for details.

- *Hal and Alice Dickey Memorial Scholarship* – awarded to a sophomore, junior, or senior.
- *Professor Ralph Engel Scholarship* – awarded to a major who has completed at least 21 credits at North Dakota State University.
- *Marjory Archer Haggart Memorial Scholarship* – awarded biennially to a sophomore or junior.
- *G. Wilson Hunter and Phyllis Krantz Hunter Scholarship* – awarded to a sophomore, junior or senior.
- *Madeline S. Gittings Endowed Scholarship* – awarded to two or three students each year.
- *Mart and Lois Vogel Award for Excellence* – awarded to one or two upper-class students.
- *Richard L. Johnson Scholarship* – awarded to a graduate student pursuing literary studies.
- *Rooney Scholarship* – awarded to a graduate student.
- *English Faculty Award* – awarded to one or two students with 15 to 45 credits.

Sample Program Guide

Major Requirements

Major: English

Degree Type: B.A. or B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

English Education

Department Information

- **Department Web Site:**
  www.ndsu.edu/education/ (http://www.ndsu.edu/education/)
- **Credential Offered:**
  B.S.; B.A.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/english-education/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/english-education/)

English education encompasses the four language arts of reading, writing, speaking, and listening. Accordingly, the English education major includes a broad range of English and professional education courses so that teacher candidates fully understand (a) each of the arts, (b) current theories of adolescent development, and (c) current best practices in secondary instruction. Teacher candidates also apply their knowledge and build their teaching skills during multiple clinical experiences in local schools.

The Program

Candidates in the English education major are prepared to teach language arts to students in grades 5-12 with creativity and confidence. Our curriculum comprises a variety of courses in language/linguistics, composition/rhetoric, and literature. Teacher candidates in our British, American, World, and Young Adult literature courses explore fiction, poetry, and non-fiction written by men, women, and minorities. Our professional education courses prepare teacher candidates to incorporate active learning strategies, create effective methods for assessment, and adjust instruction to accommodate multiple learning styles.

Professional Education Courses

Teacher candidates may enroll in the 300-level professional education courses before being formally admitted to the School of Education (SOE). Prior to enrolling in the 400-level courses, teacher candidates must complete the application for admission to the SOE; attain a minimum of a 2.75 grade point average overall in their course work and education courses; and pass the Praxis Core Academic Skills for Educators test or meet minimum scores on the ACT+. Requirements for admission can be found on the School of Education website (https://www.ndsu.edu/education/).

Student Teaching

Student teaching (clinical practice) is the culmination of the teaching program. During the clinical practice, teacher candidates apply the knowledge and skills acquired in their college courses to real-world classrooms under the supervision of experienced English teachers in middle or secondary schools. Faculty members from NDSU conduct regular on-site visits to support, encourage, and evaluate teacher candidates so that they gain the confidence and ability to join the teaching profession after graduation.

Student Advisement

An academic advisor works individually with English education majors to plan their programs of study and to advise and assist them as they progress to degree completion. Students are encouraged to seek their advisor's help whenever needed.

LICENSURE

Upon completing this program, teacher candidates are eligible for teacher licensure in English Language Arts in most states. Our program is accredited by the Council for the Accreditation of Educator Preparation (CAEP) and approved by the North Dakota Education Standards and Practices Board (ESPB).

Career Opportunities

English teachers are in high demand across the country, so our graduates usually obtain full-time employment in school districts shortly after graduation. In addition to teaching careers, some English education graduates choose to teach English abroad or seek advanced degrees in English, law, library science, and counseling. Others obtain careers as corporate trainers or technical writers. Many options are available because an English education degree effectively teaches students to think critically, synthesize information, write and speak clearly and concisely, and to work effectively on teams.

Option		
Select either the Standard Option or Communication Option to complete major requirements.		14 -18
Total Credits		**84-88**

Standard Option

Code	Title	Credits
In addition to the core requirements above, the standard option requires the student to select either a modern foreign language for a B.A. degree or a minor or second major for a B.S. degree.		14 or 16+

B.A. degree requirement - A modern foreign language requires students to complete courses through the 200 level intermediate conpentency (typically 14 credits).

B.S degree requirement - Student must complete a minor or a second major (minimum 16 credits)..

Communication Option

Code	Title	Credits
In addition to the core requirements above, the communication option requires students to complete the following:		
Communication Core Courses		
COMM 112	Understanding Media and Social Change	3
COMM 200	Introduction to Media Writing	3
COMM 220	Persuasion	3
Elective Courses: Select a minimum of 9 credits from the following:		9
COMM 114	Human Communication	
COMM 150	Forensic Practice	
COMM 216	Intercultural Communication	
COMM 301	Rhetorical Traditions	
COMM 310	Advanced Media Writing	
COMM 313	Multimedia Editing	
COMM 318	Argumentation and Advocacy	
COMM 330	Photography for the Media	
COMM 375	Principles of Strategic Communication	
COMM 421	History of Journalism	
Total Credits		**18**

Degree Requirements and Notes

- A grade of 'C' or better is required in all Professional Education Requirement (EDUC) and Teaching Specialty Core Requirement (ENGL) courses.
- To be placed in student teaching, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required.
- To exit the program, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required as well as completing the Praxis Subject test and the Principles of Learning and Teaching test.
- See School of Education (https://www.ndsu.edu/education/) for admission requirements.

Entrepreneurship

Department Information

- **Department Web Site:**
  www.ndsu.edu/business/ (http://www.ndsu.edu/business/)
- **Credential Offered:**
  Minor; UG Certificate
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/entrepreneurship/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/entrepreneurship/)

The entrepreneurship programs at NDSU are experiential programs accessible to all NDSU students, regardless of major. Our entrepreneurship programs equip students with the skills to solve meaningful problems within their communities and careers. True to NDSU's distinctive approach to learning, our entrepreneurship programs are designed to educate and empower. The programs are powered by the Center for Entrepreneurship and Family Business in the NDSU College of Business.

The program provides many pathways so that students are able to design a program experience specific to their interests and needs. Whether the goal be new business creation, taking over a family business, social entrepreneurship, international entrepreneurship, engineering, or a rewarding career within an existing business, the NDSU entrepreneurship program has a unique path for all of these interests.

The entrepreneurship certificate program is available for students to earn in either an on-campus or an online format. The entrepreneurship minor is available for students to earn only in an on-campus format.

Entrepreneurship

Minor Requirements

Minor: Entrepreneurship

Required Credits: 16-18

Code	Title	Credits
Minor Core Requirements		
ENTR 201	Introduction to Entrepreneurship	3
or MGMT 470	Entrepreneurship/Small Business Management	
ENTR 301	Entrepreneurship Toolbox I	3
or ENGR 310	Entrepreneurship for Engineers and Scientists	
or ENTR 440	International Entrepreneurship	
or MGMT 471	Leading Social Entrepreneurship and Nonprofit Organizations	
or MGMT 472	Managing Family Enterprises	
or MRKT 432	Entrepreneurial Sales	
ENTR 401	Entrepreneurship Capstone [4]	3
Select one from the following:		4-6
ENTR 496	Practicum/Internship	
ADHM 496	Field Experience (Topic - Entrepreneurship)	
ENGR 481 & ENGR 482	Engineering Entrepreneurship Capstone I and Engineering Entrepreneurship Capstone II	
Elective (choose one course): [1]		3
CE 483	Contracts and Specifications	
CSCI 345	Topics on Personal Computers	
ECON 402	Economics of Entrepreneurship	
ENGR 310	Entrepreneurship for Engineers and Scientists (if not taken above)	
ENTR 301	Entrepreneurship Toolbox I (if not taken above)	
ENTR 440	International Entrepreneurship (if not taken above)	
IME 450	Systems Engineering and Management	
MGMT 451	Negotiations [2]	
MGMT 471	Leading Social Entrepreneurship and Nonprofit Organizations (if not taken above)	
MGMT 472	Managing Family Enterprises (if not taken above)	
MRKT 430	Sales and Personal Selling	
MRKT 432	Entrepreneurial Sales ((if not taken above))	
MRKT 450	Marketing Research	
MRKT 465	Digital Marketing [3]	
ME 361	Product Design and Development	
MUSC 385	Music Entrepreneurship	
Total Credits		**16-18**

1

Prerequisite(s) for the elective courses apply; refer to the course descriptions.

2

Will require instructor's permission to enroll for students without MGMT 320 prerequisite.

3

Will require instructor's permission to enroll for students without MRKT 320 prerequisite.

4

ENTR 401 must be taken at NDSU; transfer coursework will not be allowed.

Degree Note:

- Students must declare this minor to register for College of Business prefix courses.

Certificate Requirements

Certificate: Entrepreneurship

Required Credits: 9

Code	Title	Credits

Environmental Design

Department Information

- **Department Web Site:**
  www.ndsu.edu/landscapearchitecture/ (http://www.ndsu.edu/landscapearchitecture/)
- **Credential Offered:**
  B.S.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/environmental-design/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/environmental-design/)

The Bachelor of Science in environmental design is direct preparation for the Master of Landscape Architecture graduate degree program. Students begin by completing a Bachelor of Science degree in environmental design. Successful performance in the coursework leads to placement in the Master of Landscape Architecture program. A successful student typically completes the undergraduate degree and the professional Master of Landscape Architecture degree in 5 years.

According to the American Society of Landscape Architects (ASLA), landscape architecture involves planning, designing, managing, and nurturing the built and natural environments. With their unique skill set, landscape architects work to improve human and environmental health in all communities. They plan and design parks, campuses, streetscapes, trails, plazas, residences, and other projects that strengthen communities.

Career Opportunities

The profession of landscape architecture is one of only 60 professions to be licensed in all 50 states and is projected to continue strong growth for the next 10-20 years. Landscape architects work for professional design firms, government agencies like the National Park Service, city planning offices, and other multi-disciplinary offices in the architecture and engineering fields. With their unique skill set, landscape architects work to improve human and environmental health in all communities.

High School Preparation

Although not required or continuously available, we suggest students take high school courses in drawing (digital and hand drawing), science, engineering, and math; geology, physics, civil engineering, drafting, and geometry, respectively. And, if possible, we encourage high school students to take advanced placement or college credit courses that fulfill NDSU General Education requirements.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Environmental Design

Degree Type: B.S.
Minimum Degree Credits to Graduate: 130

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**

LA 444	Advanced Construction Drawing + Documentation	4
LA 472	Advanced Community Planning + Design Studio	6
LA 471	Site Elements + Composition Design Studio	6
LA 475	City-Shaping Design Studio	6
LA 476	Ecological Design Studio	6
PLSC 355	Woody Landscape Plants	3
PSYC 111	Introduction to Psychology	3
or SOC 110	Introduction to Sociology	
Select one from the following:		3
ENGL 320	Business and Professional Writing	
ENGL 326	Writing in the Design Professions	
ENGL 357	Visual Culture and Language	
Total Credits		**90**

Degree Notes:

The Bachelor of Science degree with a major in environmental design is exempt from the college minor requirement and the nine credits of college area requirements. This major is intended only for students who plan to complete the Master of Landscape Architecture Degree.

Environmental Engineering

Department Information

- **Department Web Site:**
  www.ndsu.edu/ccee/ (http://www.ndsu.edu/ccee/)
- **Credential Offered:**
  B.S.Env.E.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/environmental-engineering/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/environmental-engineering/)

Environmental Engineering is one of the four undergraduate degree programs in the Department of Civil, Construction and Environmental Engineering (CCEE). The vision of the department is to impact people and communities through the creation of globally relevant knowledge, innovators, and future opportunity builders. We dare to change the world: we educate students to become global leaders in our fields; we solve existing and emerging challenges of the world through innovation and research excellence; we integrate the complexities of design, management, and practice to solve societal problems and create opportunities; and we serve all people and communities in North Dakota and beyond.

Would you like to make this world a better place to live by focusing on the interactions between humans and the environment? You could make a difference by choosing a career in environmental engineering. We design sustainable solutions to societal challenges today and into the future.

THE PROGRAM

In general, environmental engineers integrate and apply biological, chemical, and engineering principles to improve and sustain the environment for the protection of its ecosystems, human health, and environmentally-related enhancement of the quality of life. The discipline focuses on water and wastewater treatment system design and public health protection; traditional and emerging contaminant mitigation in water, soil, and air; ecological principles in the design process; green manufacturing; and sustainable design. Environmental engineers will play a crucial role in numerous 21st-century challenges, including sustainably supplying food, water, and energy; designing a future without pollution and waste; creating efficient, healthy, and resilient cities; fostering informed decisions and actions; and, curbing climate change and adapting to its impacts.[1] Environmental engineers are professionals who have broad scientific and technical knowledge, possess strong problem-solving and design skills, and enjoy working with people. Our work is directly related to public and environmental health and well-being, and we have a significant impact on decision-making and planning processes. NDSU's B.S. in Environmental Engineering degree program began accepting students in fall 2020. Its graduates will be sought by

companies nationally at competitive salaries, and they will apply their skills in all fields of the profession domestically and abroad. The graduates will most certainly put their education to good use, bettering themselves and the world in which they live.

PROGRAM EDUCATIONAL OBJECTIVES (PEO)

The following program educational objectives are consistent with the university, college and department missions. Graduates of our B.S. in Environmental Engineering program are expected within a few years of graduation to:

1. Engage successfully in the practice of engineering to solve current and emerging problems.
2. Conduct design in a manner that is ethical, includes diverse perspectives and realizes the broader societal and sustainability implications of the design and decision-making process.
3. Ascend to leadership roles within the workplace via initiative and responsible stewardship.
4. Advance their profession and communities through collaborative work, professional licensure, advanced degrees, lifelong learning, and engaged service.

STUDENT OUTCOMES (SO)

The B.S. in Environmental Engineering degree program has the following student outcomes:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

CURRICULUM

First-year environmental engineering students at NDSU begin their education with fundamental courses in English, chemistry, mathematics, introduction to environmental engineering, design and analysis methods and tools, and engineering science. Second-year courses emphasize environmental engineering fundamentals, microbiological principles, fluid mechanics, graphic communications, mathematics, statistical analyses, and engineering science courses. During the third year, students gain exposure and knowledge in sustainable design, unit operations and processes, fate, and transport of pollutants, soil mechanics, environmental chemistry, ethics, water resources, physics, and three hours of technical electives. The senior year focuses on specialized courses in air pollution, solid and hazardous waste management, water and wastewater treatment and design, hydrology, a one-year capstone senior design experience, and nine hours of technical electives. The technical electives allow the student to take additional courses in those areas of environmental engineering/science in which she or he intends to practice professionally.

FACULTY

The department has well-qualified and dedicated faculty members. They are nationally and internationally recognized experts, with the knowledge and experience to prepare graduates for successful careers. All faculty members in the department have a doctoral degree. Many of them are licensed as a Professional Engineer (PE) or Certified Professional Contractor (CPC). In addition, the department has many adjunct faculty members who worked or are currently working in the industry.

FACILITIES

The department has excellent laboratory facilities for undergraduate education across all civil, environmental, and construction areas, including teaching laboratories for civil engineering materials, construction management and engineering, environmental engineering, geotechnical engineering, structural engineering, transportation engineering, and water resources engineering. Students also have access to computer clusters and many state-of-the-art research laboratories.

STUDENT ORGANIZATIONS

Students participate in many professional student organizations in the department, which helps them develop leadership and teamwork skills. The major student organizations include the American Railway Engineering and Maintenance-of-Way Association (AREMA), the American Society of Civil Engineers (ASCE), the American Water Works Association (AWWA, Associated General Contractors (AGC), the Institute of Transportation Engineers (ITE), Materials Research Society (MRS), National Association of Homebuilders (NAHB), Sigma Lambda Chi, and Water Environment Federation (WEF), as well as Steel Bridge, Concrete Canoe, Associated Schools of Construction, Residential Construction Management, GeoWall, and Quiz Bowl competition teams. Students may also participate in several student organizations within the College of Engineering, including the American Indian Science and Engineering Society (AISES), Engineers Without Borders (EWB), Grand Challenge Scholars of NDSU, Habitat for Humanity, National Society of Black Engineers (NSBE), Society of Women Engineers (SWE). The student organizations have won several national and regional awards.

PREPARATION

High school students who wish to prepare for college engineering should attempt to complete the following high school credits: one unit of physics, four units of math, and one unit of chemistry. Nationally, incoming first-year students who come prepared to enroll in calculus frequently complete their environmental engineering degree in 4 years. Students who have studied two years of pre-engineering at another institution can normally complete the environmental engineering degree in two additional years.

SCHOLARSHIPS AND FINANCIAL AID

The department awards numerous scholarships each year, which mostly range from $500 to $10,000. Students should check with the department for more information. Other forms of financial aid are available through the Office of Financial Aid and Scholarships.

CAREER OPPORTUNITIES

NDSU environmental engineering students will be highly sought for internships and co-ops, with most students having completed multiple work experiences. Graduates from the program will be widely regarded as hands-on, can-do, project-ready professionals, who will be very successful in finding excellent jobs. Most students will have selected a job before graduation and others within a few weeks of graduation. The work varies with the type of activity and location. Environmental engineers can work in the office, in the field, or a combination of the two. They can work primarily with several intricate designs or with people in management or sales. Environmental engineering graduates normally go to work at consulting firms, governmental (state and federal) agencies, nonprofits/NGOs, or industry. The academic curriculum also prepares environmental engineering graduates for graduate school, law school, and/or an MBA program.

Since this degree program began in the fall semester of 2020, job placement data are not currently available. The median pay for environmental engineers in the US is $96,530 per year (2022). The U.S. Bureau of Labor Statistics projects a 6-percent growth in employment for environmental engineers from 2022 to 2032 which is above the average growth rate for all occupations (3 percent).

Required Courses		
ANSC 165	Animals and Human Health	3
ANSC 260	Introduction to Equine Studies	2
ANSC 260L	Equine Care and Management Practicum	1
ANSC 261	Basic Equitation & Horsemanship	1
ANSC 265L	Principles of Equine Assisted Services Lab	2
ANSC 361	Intermediate Horsemanship	1
ANSC 365	Equine Assisted Services Practicum I	1
ANSC 465	Equine Assisted Services Practicum II	1
Electives: Select 6 credits from the following (Please note some courses below require a prerequisite that may not be listed):		**6**
HDFS 230	Life Span Development	
HDFS 320	Prenatal, Infant and Toddler Development	
HDFS 330	Child Development	
HDFS 340	Adolescent Development	
HDFS 360	Adult Development and Aging	
PSYC 211	Introduction To Behavior Modification	
PSYC 212	Psychological Aspects of Drug Use and Abuse	
PSYC 214	Social Interaction	
PSYC 250	Developmental Psychology	
PSYC 270	Abnormal Psychology	

BIOL 220	Human Anatomy and Physiology I
BIOL 221	Human Anatomy and Physiology II
First Aid & CPR Certification *	
American Heart Association or American Red Cross First Aid and CPR Certification	
Total Credits	**18**

*

Students must earn their First Aid and CPR certification and present their current cards to the department of Animal Science for verification of this certification. Once verified by the department, the department will submit a waiver form to the Office of Registration and Records as proof of certification completion.

Minor Requirements and Notes:

- A minimum of 8 credits must be taken at NDSU.
- Students must earn a 2.0 minimum GPA for the minor requirements.

Equine Science

Department Information

- **Department Web Site:**
  www.ndsu.edu/agriculture/academics/academic-units/animal-sciences (http://www.ndsu.edu/agriculture/academics/academic-units/animal-sciences/)
- **Credential Offered:**
  B.S.; minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/equine-science/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/equine-science/)

Equine Science continues to grow, contributing approximately $177 billion to the U.S. economy. Careers in the U.S. horse industry support the equivalent of approximately 2.2 million jobs directly and indirectly. There are approximately 6.6 million horses in the U.S. with over 1.5 million people owning horses and an additional 39 million people identifying as horse enthusiasts.

THE PROGRAM

The Equine Science program provides a well-rounded, science-based education encompassing both classroom and experiential learning opportunities. For individuals interested in pursuing their education beyond a Bachelor of Science degree, the Equine Science curriculum can be tailored to meet the requirements for veterinary schools and graduate programs.

THE CURRICULUM

The Equine Science major is designed to provide a strong overall background with supporting course work in the sciences, humanities and general education. Program classes include anatomy, physiology, nutrition, health, production management, evaluation, horsemanship and equitation. Additionally, the curriculum requires students to complete an internship, study abroad or research experience. Experiential learning opportunities are a priority in the program with 70% of the equine courses providing students with hands-on learning. These unique experiences provide students with valuable knowledge about the equine industry both inside and outside the classroom.

An Equine Science minor allows students to explore several equine-related courses and gain general horse industry knowledge. This minor pairs well with any major offered at NDSU.

THE FACULTY

The Equine Science Program has outstanding faculty members with diverse backgrounds in the equine industry who are ready to help students learn and thrive at NDSU. Our faculty have taught internationally, earned multiple teaching and advising awards, and maintain active research programs.

Equine Science faculty expertise is complemented by other faculty within the Department of Animal Sciences and across the university. The overall quality of the faculty at North Dakota State University has been recognized through numerous awards for teaching and research excellence.

CAREER OPPORTUNITIES

Our graduates find exciting careers in diverse areas including sales representatives for nutrition, pharmaceutical and equipment products; marketing specialists; barn and facility managers; equine event and show managers; working with breed and industry associations; equine reproduction; extension educators; and riding instructors. In addition to career opportunities following graduation, many students choose to continue their education in veterinary schools or graduate programs.

EXTRA-CURRICULAR ACTIVITIES

The NDSU Horsemen's Association provides a variety of equine-related outreach activities. The club supports the Intercollegiate Horse Show teams (western and hunt seat), sponsors collegiate horse shows, and conducts several youth educational events.

The NDSU Rodeo Club provides students the opportunity to gain experience and knowledge of the sport of rodeo. The club supports the Intercollegiate Rodeo Team and hosts a variety of rodeo related events and activities for the public.

FINANCIAL AID AND SCHOLARSHIPS

Part-time work and work-study programs are available at the equine center, in several different livestock units, and in animal science laboratories within the department. Over $80,000 in departmental scholarships are awarded to Equine Science, Animal Science and Veterinary Technology students annually. In addition, the College of Agriculture, Food Systems, and Natural Resources awards scholarships each year to incoming freshman and current NDSU students. Contact the Office of the Dean, College of Agriculture, Food Systems, and Natural Resources, for more information on college scholarships https://www.ag.ndsu.edu/academics/scholarships (https://www.ag.ndsu.edu/academics/scholarships/).

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

BIOL 111 and 100L are recommended, but students can substitute BIOL 150 and 150L

**
CHEM 117 and 117L are recommended, but students can substitute CHEM 121 and 121L

Equine Science

Department Information

- **Department Web Site:**
  www.ndsu.edu/agriculture/academics/academic-units/animal-sciences (http://www.ndsu.edu/agriculture/academics/academic-units/animal-sciences/)
- **Credential Offered:**
  B.S.; Minor
- **Sample Program Guide:**
  catalog.ndsu.edu/programs-study/undergraduate/equine-science/#planofstudytext (http://catalog.ndsu.edu/programs-study/undergraduate/equine-science/#planofstudytext)

Major Requirements

Major: Equine Science

Degree Type: B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	

Upper Division Writing †	
Category R: Quantitative Reasoning †	**3**
Category S: Science and Technology †	**10**
Category A: Humanities and Fine Arts †	**6**
Category B: Social and Behavioral Sciences †	**6**
Category W: Wellness †	**2**
Category D: Cultural Diversity *†	
Category G: Global Perspectives *†	
Total Credits	**39**

*
Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†
General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Code	Title	Credits
Required Core Courses for Equine Science		
ANSC 218	Anatomy and Physiology of Domestic Animals	3
ANSC 223	Introduction to Animal Nutrition	2
ANSC 235	Equine Evaluation	2
ANSC 260	Introduction to Equine Studies	2
ANSC 260L	Equine Care and Management Practicum	1
ANSC 261	Basic Equitation & Horsemanship	1
ANSC 357	Animal Genetics	3
or ANSC 358		
ANSC 360	Equine Nutrition	3
ANSC 364	Equine Anatomy and Physiology	3
ANSC 370	Fundamentals/Animal Disease	3
or ANSC 371	Fundamentals of Animal Disease II	
ANSC 480	Equine Industry and Production Systems	3
ANSC 478	Research and Issues in Animal Agriculture	3
ANSC 393	Undergraduate Research	2
or ANSC 396	Field Experience	
ANSC 463	Physiology of Reproduction	3
ANSC 463L	Physiology of Reproduction Laboratory	1
Animal Science Electives	Select 9 credits of ANSC prefix courses	9
Select one of the following:		1
ANSC 101	Student Success Techniques - Animal and Equine Science	
ANSC 102	Student Success Techniques - Animal Sciences with Pre-Veterinary Medicine Emphasis	
ANSC 201	Student Success Techniques - Nontraditional & Transfer Students	
VETS 101	Student Success Techniques: Veterinary Technology	
Select one pair from the following:		4
BIOL 111 & BIOL 100L	Concepts of Biology and Non-Majors Biology Lab	
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	
Select one of the following:		3
MATH 103	College Algebra	
MATH 105	Trigonometry	
MATH 107	Precalculus	
MATH 146	Applied Calculus I	

AGEC 242	Introduction to Agricultural Management	3
AGEC 244	Agricultural Marketing	3
BIOC 260	Elements of Biochemistry	4
CHEM 117 & 117L	Chemical Concepts and Applications and Chem Concepts and Applications Lab (May satisfy general education category S)	4
ECON 201	Principles of Microeconomics (May satisfy general education category B)	3
MICR 202 & 202L	Introductory Microbiology and Introductory Microbiology Lab (May satisfy general education category S)	3
PLSC 315	Genetics (May satisfy general education category S)	3
STAT 330	Introductory Statistics (May satisfy general education category R)	3
Choose from any level PLSC, NRM, or RNG		3
Total Credits		**81**

Degree Requirements and Notes:

- Students must earn at least a 2.00 GPA that is based on the courses that are used to satisfy major requirements.
- Transfer grades of 'C' or better to count towards major requirements.

Minor Requirements

Minor: Equine Science

Required Credits: 16

Minor Requirements

Code	Title	Credits
Required Courses		
ANSC 223	Introduction to Animal Nutrition	2
ANSC 260	Introduction to Equine Studies	2
ANSC 260L	Equine Care and Management Practicum	1
or ANSC 261	Basic Equitation & Horsemanship	
ANSC 360	Equine Nutrition *	3
or ANSC 364	Equine Anatomy and Physiology	
Elective Courses: Select a minimum of 8 credits from the following:		**8**
ANSC 235	Equine Evaluation	
ANSC 300	Domestic Animal Behavior and Management	
ANSC 357	Animal Genetics	
ANSC 360	Equine Nutrition *	
ANSC 361	Intermediate Horsemanship	
ANSC 362	Colts in Training	
ANSC 364	Equine Anatomy and Physiology *	
ANSC 371	Fundamentals of Animal Disease II	
ANSC 461	Advanced Horsemanship and Equitation	
ANSC 463	Physiology of Reproduction	
ANSC 480	Equine Industry and Production Systems	
ANSC 496	Field Experience	

*

If both courses are completed successfully, the second course will apply towards Elective Courses category.

Minor Requirements and Notes:

- A minimum of 8 credits must be taken at NDSU.
- Students must earn a minimum 2.00 GPA for the minor requirements.

Event Management

Department Information

- **Department Web Site:**
  www.ndsu.edu/business/ (http://www.ndsu.edu/business/)
- **Credential Offered:**
  UG Certificate
- **Sample Program Guide:**
  catalog.ndsu.edu/programs-study/undergraduate/event-management/ (http://catalog.ndsu.edu/programs-study/undergraduate/event-management/)

The Event Management Certificate Program offers students a high-quality, hands-on educational experience to prepare them for a career in the event and meeting industry. It equips students with the knowledge and experience needed to successfully plan, budget, market, and implement conventions, meetings, and special events.

Exercise Science

Department Information

- **Department Web Site:**
  www.ndsu.edu/hnes/ (http://www.ndsu.edu/hnes/)
- **Credential Offered:**
  B.S.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/exercise-science/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/exercise-science/)

Large corporations, hospitals, colleges, small businesses, resorts and hotels are incorporating more health promotion services than ever before. The exercise science (ES) major at North Dakota State University prepares students to meet this growing demand. The exercise science major is accredited by the Commission on Accreditation of Allied Health Education Programs adopted by the American College of Sports Medicine (ACSM). This curriculum covers the knowledge, skills and abilities expected of an ACSM Certified Exercise Physiologist.

Exercise Science Major Overview

The ES major is designed to prepare students for entry-level positions in any of the four health-fitness settings: commercial, community, corporate or clinical. Completion of the ES major may act as a stepping stone to prepare the exceptional student for graduate education in exercise physiology/science, cardiac rehabilitation, physical therapy, occupational therapy, sports medicine, biomechanics or other allied health disciplines.

The ES major includes everything from the study of physical activity and the associated acute and chronic physiological responses and adaptations resulting from it, to health-fitness business management principles found in facilities worldwide. Students are strongly encouraged to select a minor in business or other appropriate area depending on their interests. Several field experience courses during the four-year program, as well as a capstone experience involving a semester-long internship required at the end of the ES major, afford students the opportunity to select an area of specialization in the field at sites available throughout the country.

Academic Program Learning Outcomes

Students in the exercise science program at NDSU engage in both didactic and experiential learning. Students will gain knowledge in several areas, including anatomy, kinesiology, biomechanics, behavior modification, physiology of exercise, cardiovascular and resistance training, and exercise testing and assessment.

Students graduating with an exercise science bachelor's degree should be able to:

- Properly determine and implement appropriate screening and assessment protocols for cardiovascular, muscular strength, muscular endurance, flexibility, and body composition analysis.
- Determine and implement safe and effective exercise programs for all components of health-related fitness for various populations including, but not limited to, those with cardiovascular, pulmonary, metabolic, orthopedic, and musculoskeletal conditions.
- Optimize exercise adoption and adherence through a variety of a professional skills including effective communication and motivational strategies.
- Complete comprehensive risk management, injury prevention, and emergency planning for health and fitness settings.

Career Options

The following list is not all-inclusive, but does identify some of the most common career and job opportunities in the four health-fitness settings. Exercise science graduates from NDSU (approximately 40 to 50 per year) are employed in these different settings across the country, especially in metropolitan areas. In the past few years, over 90% of exercise science students have either been enrolled in graduate school or have a professional job arranged at the time of graduation.

Commercial Setting – The greatest proportion of jobs can be found in for-profit, commercially run health-fitness facilities. The commercial environment is for someone interested in the marketing and sales of health-fitness services and products. This is also a good place for broad exposure to management in the health-fitness industry.

Community Setting – Many organizations and agencies serve clients in community settings, including voluntary, not-for-profit entities, as well as public parks and recreation agencies, schools and universities, hotels, country clubs and residential health-fitness developments. Many community-based facilities and programs offer exposure to health-fitness programming coupled with a social and recreational focus.

Corporate Setting – In-house health-fitness facilities and services found in large and small-scale businesses are expanding rapidly. The objectives of these facilities may include reductions in employee absenteeism, turnover rates and health care costs, while improving employee wellness, morale and enthusiasm in the workplace.

Clinical Setting – Hospital-based health-fitness facilities can be found in one out of every four hospitals, with a forecasted growth to almost one out of every two hospitals expected within the next decade. Most of these facilities are closely associated with outpatient services, such as physical therapy, sports medicine and cardiac rehabilitation, and frequently provide both types of programs in the same facility.

With an undergraduate degree and no experience, a starting salary averages $38,000 to $48,000 per year. However, the starting salary for health-fitness professionals is difficult to predict because of such factors as experience, geographic location, employment setting and market demand. It also may depend on licensure and certification. An advanced degree may pay more.

Pre-Exercise Science and Full Status Tracks

Admission to the pre-exercise science emphasis in ES occurs when the student applies to NDSU and declares an ES major. The pre-exercise science emphasis encompasses the first three semesters; transfer students are placed in the pre-exercise science emphasis upon acceptance. Entrance into the full status emphasis occurs through application at the end of the first semester of sophomore year or as transfer students complete the requirements below. The following requirements must be met before beginning the full status course of study:

1. Successful completion of courses with a grade of B or better:
   a. BIOL 220/220 L
   b. CHEM 121/121L

c. HNES 170
d. MATH 103,104 or higher
2. Minimum grade point average of 3.0
3. Completion of application to full status

Application guidelines are provided during classes (HNES 170) and advising sessions, and are also available on the department website.

High School Preparation

While in high school, a student should choose courses that provide a solid background in science, mathematics, business and communication. Individual commitment to lifetime fitness and personal health and well#being is very important. Volunteer work at a health-fitness facility and participation in local health fairs may provide valuable experiences in health-fitness programming.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

MATH 103 is a pre-requisite for STAT 330. MATH 105 is a pre-requisite for PHYS 211. If not needed due to placement scores or transfer, student will need the equivalent amount of credits in free electives.

**
Consult your advisor for suggested electives for certain Graduate and Professional programs.

***
Students apply for the Exercise Science Major during fall semester of sophomore year.
Application guidelines are provided during HNES 170 Introduction to Exercise Science and during advising sessions with freshmen, as well as on the Exercise Science (https://www.ndsu.edu/hnes/undergraduate_programs/exercise_science/program_information/) website. The following requirements must be met before beginning the major course (sophomore, junior and senior level courses with prefix HNES) of study:

1. Successful completion of HNES 170 Introduction to Exercise Science with a grade of 'B' or better
2. Successful completion of BIOL 220 Human Anatomy and Physiology I/BIOL 220L Human Anatomy and Physiology I Laboratory with a grade of 'B' or better
3. Successful completion of MATH 103 College Algebra or MATH 104 Finite Mathematics or higher with a grade of 'B' or better
4. Successful completion of CHEM 121 General Chemistry I/CHEM 121L General Chemistry I Laboratory with a grade if 'B' or better
5. Minimum NDSU cumulative GPA of 3.00 or higher

1

Requires a grade of 'B' or better.

2

Students approved for the accelerated program take the graduate courses in place of the undergraduate courses.

Degree Requirements and Notes

- A cumulative GPA of 3.00 is required for graduation. No grades of 'D' or 'F' may be used to satisfy Exercise Science major courses.
- With the exception of field experiences, seminar, and internship, courses under the Exercise Science requirements may not be taken Pass/Fail.

Accelerated Undergraduate to Master's Degree Program

- Students may participate in an accelerated program in the following area:
  - B.S. Exercise Science to M.A. Trg. Master of Athletic Training
    - Program information and application process are found here (https://catalog.ndsu.edu/programs-study/graduate/athletic-training/).
- Undergraduate students must have completed a minimum of 60 undergraduate credits with a cumulative GPA of 3.00 or higher.
- Students are required submit an application to the Graduate School and an *Accelerated Degree Program Declaration* form prior to any graduate work.

Extension Education

The Extension Education Minor provides educational background and presentation skills for individuals who seek careers associated with Extension. This minor is offered to all student across the University pursuing any degree program. The minor is appropriate for many majors across the university including Human Development and Family Science, as well as majors within the College of Agriculture, Food Systems, and Natural Resources.

If you seek the preparation to utilize your primary major toward helping people in all parts of our communities by extending the knowledge of NDSU to benefit them, the Extension Education Minor is a perfect addition to your undergraduate studies. Along with foundational courses in Extension Education and teaching & learning, you will engage in a required internship experience through an Extension system office. Giving you the hands-on, real-world experience, you need for success! The Extension Education Minor can be added to any plan of study.

Extension Education

Minor Requirements

Minor: Extension Education

Required Credits: 17-18

Code	Title	Credits
Required Courses		
H&CE 445	Designing and Delivering Nonformal Education Programs	3
or NRM 421	Environmental Outreach Methods	
or H&CE 468	Foundations of Family and Consumer Sciences Education	
or H&CE 481	Methods of Teaching Agriculture	
H&CE 446	Extension Education (Required)	3
EDUC 322	Educational Psychology	3
or HDFS 230	Life Span Development	
Select one from the following:		3
H&CE 480	Science, Technology, Engineering & Mathematics Teaching Methods in Agricultural Education	
HDFS 462	Methods of Family Life Education	
ENGL 459	Researching and Writing Grants and Proposal	
PLSC 312	Expanding the Boundaries of Learning with Service	
H&CE 496	Field Experience (Internship) *	5-6
Total Credits		**17-18**

*
Additional Field Experience credit may be warranted if additional time in the internship experience is required.

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- Discuss options of courses with either Dr. Mari Borr or Dr. Adam Marx depending upon your intended Extension direction.

Family and Consumer Sciences Education

Department Information

- **Department Web Site:**
  www.ndsu.edu/education/ (http://www.ndsu.edu/education/)
- **Credential Offered:**
  B.S.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/family-consumer-sciences-education/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/family-consumer-sciences-education/)

The Program

Candidates in the Family and Consumer Sciences (FACS) Education major are prepared to guide a variety of teaching and learning experiences for students in grades 5-12, in occupational or non-occupational programs, adult programs, or to serve as an Extension educator. Hands-on experience is provided throughout the program to develop the teaching skills learned in classes.

The Family and Consumer Sciences (FACS) Education major has two pathways to prepare future educators:

1. **Teacher Licensure Pathway**- prepares candidates to teach at the middle, secondary, post-secondary and adult levels in FACS education programs. North Dakota State University is designated by the State Board of Career and Technical Education as the recognized institution for preparing teachers of Family and Consumer Sciences Education.
2. **Training and Development Pathway** - prepares candidates to develop and deliver educational programming in corporate training settings, Extension, and non-profit organizations. Students will learn to work with youth and adults in diverse educational environments. This pathway and program is unique to North Dakota State University.

Courses from all areas of Family and Consumer Sciences including individuals and families, nutrition and wellness, apparel, and consumer decision making are included in the program. This contributes to the versatility of the major since the broad range of knowledge may be applied to a wide variety of settings as an educator and/or a family and consumer scientist.

professional education courses

The FACS Education Teacher Licensure program is a collaboratively delivered program between the Department of Youth Development, Family, and Agricultural Education in the College of Agriculture, Food, Systems, and Natural Resources as well as the School of Education in the College of Arts and Sciences. Teacher candidates may enroll in the 200 and 300-level professional education courses (H&CE and EDUC) before being formally admitted to School of Education (SOE) coursework. Prior to enrolling in the 400-level EDUC courses, teacher candidates must complete the application for admission to the SOE. Requirements for admission can be found at the **NDSU Teacher Education** website.

Internship Capstones

Each of the pathways in the FACS Education major require an internship as the capstone experience to the degree. In the Teacher Licensure Pathway, that internship is Student Teaching. During Student Teaching, teacher candidates apply the knowledge and skills acquired in their college courses to real-world classrooms under the supervision of experienced agricultural educators in middle or secondary schools.

In the Training and Development Pathway, the internship is typically within the corporate setting, educational organization setting, or within an Extension setting. These candidates will also apply content and teaching and learning skills in their respective setting. They will develop and evaluate educational programming in a real-world setting, impacting the lives of others.

Student Advisement

An academic advisor works individually with family and consumer sciences teacher candidates to plan their programs of study and to advise and assist them as they progress to degree completion. Students are encouraged to seek their advisor's help whenever needed.

Licensure

Upon completing this program, teacher candidates are eligible for teacher licensure in family and consumer sciences in most states. Our program is accredited by the Council for the Accreditation of Educator Preparation (CAEP) and approved by the North Dakota Education and Standards Practices Board (ESPB).

Career Opportunities

FACS teachers continue to be in high demand around the country. Graduates pursuing a career in teaching become employed in both traditional and nontraditional teaching situations. Settings include teaching in middle and secondary schools and vocational centers. Other career options include employment as consultants in teaching family and consumer sciences at the elementary school level or serving as family and consumer sciences teachers for special education students. Teachers of adult programs work with various agencies and local school districts offering adult enrichment, continuing education, evening and summer classes, and programs for special groups such as parents, senior citizens and migrant workers.

Financial Aid and Scholarships

Information about various loans, grants, general scholarships and employment is available through the Office of Financial Aid and Scholarships or One Stop. Scholarships ranging from $500 to $1,000+ are offered to FACS students through the College of Agriculture, Food Systems, and Natural Resources. Annually, more than $30,000 is available to support NDSU FACS Education students at all levels.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Family & Consumer Sciences Education

Degree Type: B.S.
Minimum Degree Credits to Graduate: 124

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

Degree Requirements and Notes

- A grade of 'C' or better is required in all Professional Education Requirement courses.

- To be placed in student teaching, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required.
- To exit the program, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required as well as completing the Praxis Subject test and the Principles of Learning and Teaching test.
- See School of Education (https://www.ndsu.edu/education/) for admission requirements.

Family Financial Planning

Department Information

- **Department Web Site:**
  www.ndsu.edu/hdfs/ (http://www.ndsu.edu/hdfs/)
- **Credential Offered:**
  UG Certificate
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/family-financial-planning/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/family-financial-planning/)

The Family Financial Planning undergraduate certificate is designed for students who want to help individuals and families with financial challenges work toward long-term financial well-being. Required courses give students experience in consumer issues, personal and family financial planning, and financial counseling, and are grounded in real-world, hands-on learning opportunities. Students will learn foundational information as well as how to apply it in practice with both individuals and families. Completion of the certificate makes students eligible to take the Accredited Financial Counseling exam, the first step in becoming an Accredited Financial Counselor (AFC) ©.

  www.ndsu.edu/business/ (http://www.ndsu.edu/business/)
- **Credential Offered:**
  B.S.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/finance/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/finance/)

As a finance major, you will learn the fundamental concepts and tools to make informed and responsible financial decisions using data and creativity. Finance students know how to estimate economic value and evaluate the riskiness of a project or a financial asset, to advise firms about paying for projects, and to appraise a firm's performance on the stock market. We successfully place our graduates in business, industry and non-profit organizations.

Background Information

AACSB International, The Association to Advance Collegiate Schools of Business, accredits the undergraduate and graduate programs in the College of Business at North Dakota State University. The College of Business is one of only two accredited schools of business in North Dakota.

AACSB International is one of higher education's most prestigious and rigorous accrediting bodies, stressing academic excellence and a commitment to continuous improvement. Less than 10 percent of business programs worldwide have this accreditation.

The Program

Business students take core courses that cover all of the functional areas of a business, from marketing to management and accounting. Finance courses build on this foundation to help students understand the way that businesses operate in a global economy. Courses cover corporate finance, international finance, investments, portfolio management and more. The finance program is approved as a CFA Institute University Affiliation Program which positions students well to obtain the Chartered Financial Analyst® designation, the most respected and recognized investment credential in the world. Your assignments might be project-driven or include group presentations so that you can practice what you learn in class. In addition to a thorough knowledge of finance, you'll learn teamwork, effective written and oral communication skills, and leadership.

CERTIFICATE

Any student (degree-seeking or non-degree seeking) can enhance their employability by adding a Certificate in Finance to their major or credentials. The minimum number of credits is nine (9). Finance Certificate-seeking students must take Finance 320—Principles of Finance and then select two additional courses from the available course list.

HANDS-ON EXPERIENCE

Business students can join the Bison Fund (Student Managed Investment Fund) to get a chance to manage a real-money investment fund worth more than $2.5 million using state-of-the-art Bloomberg terminals in the Commodities Trading Lab. The Bison Fund brings financial theory and investment practice together while providing students access to the same data used by Wall Street analysts.

Selective Admission

Students who wish to study finance at NDSU enroll as pre-finance majors in the College of Business for the first semester of their freshman year. Pre-finance majors then apply for admission to the major after completing the pre-major courses required for major admission, including ENGL 120, COMM 110, MATH 144, ECON 201 or 202, and PSYC 111 or SOC 110. Transfer students with appropriate course work may also apply. Please see a College of Business professional academic advisor for more information.

Admission to the major is based upon the successful completion of the pre-major course requirements and a minimum cumulative grade point average (GPA) of 2.50.

The Faculty

In order to provide a rigorous and timely educational experience, we have recruited and attracted faculty who are highly qualified to teach finance. Dedicated to student learning, our faculty have often been recognized for their teaching excellence by students and colleagues. The faculty employ a wide variety of instructional techniques and are considered especially strong in approaches to the study of organizations and management decision making. They remain current in their sub-fields of finance by actively engaging in research and constantly assisting firms in identifying and solving business problems.

The Practicum

Finance majors are encouraged to complete a three-credit practicum. The practicum is designed to enable students to relate finance concepts learned in the classroom to actual business situations and to give them a competitive edge in job placement.

Career Opportunities

Graduates with a finance major have opportunities in business, industry, government service, and the non-profit sector, both regionally and globally. Job opportunities for finance majors are found in corporate finance and the financial services industries, such as banking, insurance, brokerage, investment banking and financial planning. Median salary for finance majors is currently $67,800.

The College

The College of Business also offers majors in accounting, business administration, management, marketing, management information systems, and global business (second major only), as well as Master of Business Administration and Master of Accountancy degrees.

High School Preparation

It is recommended that high school students interested in studying finance at the university level take mathematics courses at least through pre-calculus. High school electives in the social sciences, English and communication would also be of benefit. Please speak with a professional advisor for more information.

Sample Program Guide

1

Denotes Common Body of Knowledge (CBK) course.

2

Grades must be a C or better for all courses used to satisfy this requirement.

Degree Requirements and Notes:

- A minimum 2.5 cumulative GPA is required for admission to the major, to enroll in 300-400 level courses, and to graduate.
- Students follow the published curricula for the finance program of study from the semester/year of entrance in the College of Business to graduation provided enrollment at NDSU has not been discontinued for more than one year. Students who change their major are subject to meeting the curricular requirements in effect at the time the new major is declared.

- For admission to the finance major, students must submit an online application to the CoB.
- A letter grade must be earned in any course that fulfills a major requirement (with the exception of some practicum options).
- Students must be accepted to the finance major prior to the completion of the last 30 credits in 300 and 400 level CoB courses.
- A Business Administration minor cannot be taken with this major.

Certificate Requirements

Certificate: Finance

Minimum Required Credits: 9

Code	Title	Credits
FIN 320	Principles of Finance	3
Select 2 courses from the following:		6
FIN 410	Investment Analysis and Management	
FIN 420	Options, Futures, and Other Derivatives	
FIN 430	Management of Financial Institutions	
FIN 440	International Finance	
FIN 450	Advanced Bank Management	
FIN 451	Credit Analysis	
FIN 460	Corporate Finance	
FIN 470	Analysis of Fixed-Income Securities	
FIN 480	Applied Portfolio Management	
Total Credits		**9**

Degree Notes:

- Students must earn a 2.50 cumulative GPA in the courses used to satisfy the certificate requirements.
- Courses may not be taken Pass/Fail.
- Required courses for the certificate may require prerequisites.

Food Science

Department Information

- **Department Web Site:**
  www.ag.ndsu.edu/plantsciences/ (http://www.ag.ndsu.edu/plantsciences/)
- **Credential Offered:**
  B.S.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/food-science/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/food-science/)

Food science deals with the transformation of raw agricultural goods into food products acceptable for human consumption. This field of applied science involves studying diverse scientific disciplines such as chemistry, engineering, microbiology, biochemistry, toxicology and management as they relate to food, and effectively applying the industrial and practical aspects to product development, food processing, preservation and marketing.

The Faculty and Facilities

Food science is a four-year curriculum offered by the College of Agriculture, Food Systems, and Natural Resources through the Department of Plant Sciences. The program draws on the expertise of faculty members in several departments at North Dakota State University who have expertise in both teaching and research. Many have industry experience with numerous connections in the food industry.

The Peltier Complex at NDSU houses laboratories and teaching facilities where many of the food science courses are taught. Extensive facilities are available for teaching and food processing research.

The Curriculum

The program includes courses in food chemistry, food analysis, food microbiology, food fermentation, food processing, biological materials processing, meat science, nutrition science and cereal technology, in addition to basic courses in mathematics, the sciences, humanities and social sciences. Most of the applied courses in food science are taken after the basic courses have laid the groundwork for the student.

The program allows flexibility in selecting suitable electives to direct one's career goal. Areas of emphasis include food safety, microbiology, sciences, business and management, engineering, nutrition and processing.

The curriculum for food science is approved by the Institute of Food Technologists (IFT) (https://www.ift.org/community/students/undergraduate-programs/). The four-year undergraduate program leads to a Bachelor of Science degree in food science. The program enables graduates to recognize, critically analyze and solve problems realistically in both industrial and academic environments. It provides the opportunity to gain industrial experience during undergraduate study by means of industry internships.

A great way to continue higher education for students currently enrolled in Food Science at North Dakota State University is to consider the Accelerated Master of Science in Cereal Science program, where fifteen of the didactic credits (600/700 level) can be used to meet the requirement for the B.S. degree. Please, see the Cereal Science Accelerated M.S. page (https://catalog.ndsu.edu/programs-study/graduate/cereal-science/#acceleratedtext) for more details. There are additional opportunities for students majoring in other disciplines to learn more about Food Science - students can opt for minor in Food Science and Technology (https://catalog.ndsu.edu/programs-study/undergraduate/food-science-technology/).

Career Opportunities

Challenging and rewarding entry-level positions in the food industry are plentiful for food science graduates. Potential employers include large and small food corporations and government agencies. Career opportunities include positions in food science and technology, food chemistry, food microbiology, product development, quality control, food production and processing, food inspection, packaging, sales and marketing. The median salary for a food professional in US is $110,000 and an individual with a B.S. degree in food science is $98,163 according to the Institute of Food Technologists' 2022 Salary Survey.

Food scientists study food to improve existing products or create new ones. They also analyze the structure and composition of food and the changes that occur during processing and storage. They determine how processing affects flavor, texture, appearance and nutritional value, and explore new ways to protect and stabilize food through packaging.

The food industry is the largest industry in the world. The challenges of food scientists are to provide wholesome, tasty and nutritious foods for the consumer.

Industry Internships

Internships offered through NDSU's food science department and Cooperative Education programs provide opportunities for industry experience at companies such as Ardent Mills, Cargill, 8th Avenue Pasta, Hormel, Jennie-O, SunOpta, and others.

Financial Aid and Scholarships

Loans, scholarships, grants and work-study are made available through the Office of Financial Aid and Scholarships. A number of scholarships are awarded each year to students enrolled in the College of Agriculture, Food Systems, and Natural Resources. Please see: CAFSNR scholarships (https://www.ndsu.edu/agriculture/academics/scholarships/) for more information. Departmental (Food Science program) scholarships also are available. Information may be obtained by contacting the coordinator of the food science program. A number of laboratory assistant jobs are available for students majoring in food science.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Food Science

Degree Type: B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.

3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**

BIOC 260	Elements of Biochemistry	

BIOC 460 & 460L	Foundations of Biochemistry and Molecular Biology I and	
BIOL 150	General Biology I	3
BIOL 151	General Biology II	3
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory (May satisfy general education category S)	4
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory (May satisfy general education category S)	4
CHEM 341 & 341L	Organic Chemistry I and Organic Chemistry I Laboratory	4
CSCI 114	Computer Applications (May satisfy general education category S)	3
or TL 116	Business Software Applications	
ECON 201	Principles of Microeconomics (May satisfy general education category B and G)	3
HNES 250	Nutrition Science (May satisfy general education category W)	3
MATH 146	Applied Calculus I (May satisfy general education category R)	4
or MATH 165	Calculus I	
MICR 350 & 350L	General Microbiology and General Microbiology Lab	5
PHYS 211 & 211L	College Physics I and College Physics I Laboratory (May satisfy general education category S)	4
STAT 330	Introductory Statistics (May satisfy general education category R)	3
Total Credits		**84-85**

1

PLSC189 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take PLSC189.

Degree Requirements and Notes:

- A 2.00 cumulative GPA is required for graduation and to remain in program.
- The department would highly recommend students consider taking CFS 462 Food Ingredient Technology and CFS 472 Cereal and Food Fermentation as electives courses for the degree.

Minor Requirements and Notes:

- A minimum of 8 credits must be taken at NDSU.
- Only grades of "C" or better accepted for minor courses.

Forensic Science

Department Information

- **Department Web Site:**
  https://www.ndsu.edu/programs/undergraduate/criminal-justice
- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/forensic-science/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/forensic-science/)

The minor in forensic science is an interdisciplinary program that offers students a comprehensive understanding of the key concepts and methodologies used in the field of forensic science. This minor combines courses from criminal justice, chemistry, biology, psychology, and philosophy to provide students with a foundation in forensic science investigations. In addition to learning the basic principles and techniques used in forensic analysis, in these courses, students will also learn about the legal framework and procedures relevant to forensic investigations; analytical chemistry techniques used in forensic analysis; DNA analysis, genetic profiling, and its applications; crime scene management, evidence collection, and analysis; and offender profiling, eyewitness testimony, and the psychology of criminal behavior.

1

Complete the matching lecture/lab combination (BIOL 111/110L; BIOL 150/150L; CHEM 117/117L; CHEM 121/121L; CHEM 150/160)

Fraud Investigation

Department Information

- **Department Web Site:**
  www.ndsu.edu/business/ (http://www.ndsu.edu/business/)
- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/fraud-investigation/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/fraud-investigation/)

The Department of Accounting and Information Systems, in collaboration with the Department of Criminal Justice, offers a minor in Fraud Investigation. Students will study the causes of fraud, as well as the detection, investigation, and prevention of fraud. Students learn about the criminal justice system including law making, criminality, and prosecution of fraud and other types of crime. This minor will prepare students for possible careers in crime investigation, litigation support, or forensic accounting.

Fraud Investigation

Department Information

1

A grade of C or better is required in all courses required for this minor.

2

ACCT 410 Fraud Examination may be substituted if the student has taken ACCT 610 Fraud Examination and formally requests the course be applied to undergraduate degree requirements.

3

ACCT 411 Advanced Fraud Examination via Data Analytics may be substituted if the student has taken ACCT 611 Advanced Fraud Examination via Data Analytics and formally requests the course be applied to undergraduate degree requirements.

Minor Requirements and Notes

- Students must maintain a minimum institutional cumulative GPA of 2.50. Courses may not be taken pass/fail.
- A minimum of 8 credits must be taken at NDSU.

Fundamentals of Computing & Security

Department Information

- **Department Web Site:**
  www.ndsu.edu/cs/ (http://www.ndsu.edu/cs/)
- **Credential Offered:**
  UG Certificate
- **Official Program Curriculum:**

catalog.ndsu.edu/undergraduate/program-curriculum/fundamentals-computing-security/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/fundamentals-computing-security/)

The Fundamentals of Computing and Security certificate provides an easy entry point for students who are interested in computing and security and may lack prerequisites for our more theoretical computer science courses. CSCI 227 Computing Fundamentals in Python I is the first course in a two-course Python-based computing sequence that satisfies programming requirements in our Computer Science and Cybersecurity programs.

The student and adviser will complete a substitution form with the courses to be used for the discipline groups. This form will also require the signature of the department chairperson before being submitted to the Office of Registration and Records for verification of minor program completion.

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- Students must earn a minimum 2.00 GPA for the minor requirements.
- This minor will not be available for view in the Student Advisement/Requirement Report in Campus Connection until the substitution form has been received and processed.

Gerontology

Department Information

- **Department Web Site:**
  www.ndsu.edu/hdfs/ (http://www.ndsu.edu/hdfs/)
- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/gerontology/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/gerontology/)

A minor in Gerontology provides students with an integrated understanding of the process of aging, aging services, and older adults in America. The minor can benefit students interested in a variety of careers that involve work with the older adult population. Students from a variety of majors such as human development and family science, sociology, psychology, nursing, pharmacy, interior design, and education can benefit from training in gerontology.

Career Opportunities

Career interests available would depend on the major or other training but include designer/architect of housing facilities, adult day services, older adult volunteer services, mental health services for older adults, geriatric nursing, social service programs for older adults, long-term care administration, corporate health planning or market research. Explore more careers here. (https://www.ndsu.edu/hdfs/student_resources/career_planning/careers_in_aging/)

Global Business

Department Information

- **Department Web Site:**
  www.ndsu.edu/business/ (http://www.ndsu.edu/business/)
- **Credential Offered:**
  Major (secondary major only)
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/global-business/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/global-business/)

Global Business is offered as a second major program of study only. This second major combines global business courses with language training and a study abroad experience to qualify students for management positions in the diverse, multicultural, and global environment they will encounter in the future. A second major in Global Business serves as a competence and skill amplifier for business students, complimenting their primary business major (i.e., accounting, business administration, finance, management, marketing, management information systems, and supply chain management). Students with this second major distinguish themselves in ways that they develop functional competencies from their primary business major and are prepared to lead and perform in multicultural and global business contexts through their second major. The Global Business major enhances students' ability to operate in global business environments, appreciation for different cultures, and business knowledge pertaining to international arenas.

BACKGROUND INFORMATION

The Association to Advance Collegiate Schools of Business (AACSB International) accredits the undergraduate and graduate programs in the College of Business at North Dakota State University. Our College of Business is one of only two AACSB-accredited schools of business in North Dakota.

AACSB International is one of higher education's most prestigious and rigorous accrediting bodies, emphasizing a commitment to continuous improvement, innovation, engagement, and impact in business education. Less than 10 percent of business programs worldwide have this accreditation, highlighting the academic excellence of our College of Business at NDSU.

THE PROGRAM

Global Business is a second major, which may only be added to a primary major from the College of Business (i.e., accounting, business administration, finance, management, marketing, management information systems, or supply chain management). The curriculum of this major is designed to prepare students to survive and thrive in today's global and multicultural work environment. This is achieved through global learning, both in the domestic classroom and through study abroad opportunities around the world. The focus is to help develop more globally minded students who can communicate effectively across cultures, who are more open to diversity, who become more inter-culturally proficient, and who are aware of business issues in the international arena. The global business second major requires students to have at least 3 credits of study abroad and 2nd–year language proficiency in addition to a group of internationally oriented business electives. To complete the program requirements of Global Business as a second major, students need to complete the requirements of both the global business major and their primary business major.

SELECTIVE ADMISSION

Students who wish to study global business at NDSU enroll as pre-major students of their primary major in the College of Business for the first semester of their first year. Admission to the major requires the successful completion of the pre-major course requirements (ENGL 120, COMM 110, MATH 144, ECON 201 or 202, and PSYC 111 or SOC 110) and a minimum cumulative grade point average (GPA) of 2.50, and declare Global Business as their second major. Transfer students may also be eligible for immediate admission in the major. Contact a College of Business professional advisor for more information.

THE FACULTY

To provide a rigorous and relevant educational experience to our students, faculty in our program are highly qualified to teach in their respective areas of expertise. Our faculty have been recognized for their teaching excellence by their students and colleagues and for their outstanding research by their peers. They employ a wide variety of instructional techniques and embed both classical and cutting-edge knowledge into their classes. They remain current in their fields by actively engaging in research and/or with firms and business professionals regarding their business practice, challenges, and issues.

THE PRACTICUM

Students are encouraged to complete practicum experiences, ideally at the end of sophomore and junior years. The practicum is designed to enable our students to connect business concepts learned in the classroom with live business situations and to broaden their horizons beyond the classroom setting. The practicum also gives students a competitive edge in job placement.

CAREER OPPORTUNITIES

Graduates with a second major in global business, in addition to their primary business major (i.e., accounting, business administration, finance, management, marketing, management information systems, or supply chain management), have career opportunities in business, industry, government service, and the non-profit sector, both regionally and globally. Initial employment opportunities are likely tied to their primary business major with global business competencies serving as their distinctive career enhancer.

THE COLLEGE

In addition to the global business major, the College of Business offers undergraduate majors in accounting, business administration, finance, management, marketing, management information systems, and supply chain management, as well as several minor and certificate opportunities. Full details about minors and certificate programs can be found at https://www.ndsu.edu/business/programs/undergraduate/. The College of Business also offers six graduate programs including Master of Business Administration, MBA in Agribusiness, Master of Accountancy, Master of Science in Business Analytics, Master of Supply Chain Management, and a Doctorate in Transportation and Logistics, as well as several graduate certificate programs. Full details about graduate certificate programs can be found at https://www.ndsu.edu/business/programs/graduate/graduate_certificates/.

HIGH SCHOOL PREPARATION

It is recommended that high school students interested in studying global business at the university level take mathematics courses at least through pre-calculus. High school electives in the social sciences, communication, foreign languages, and English also would be beneficial. Students who have satisfactorily completed Advanced Placement courses in Calculus, Economics, English, Communication, and Psychology or Sociology may directly apply for admission to the major. Please speak with a professional advisor in the College of Business for more information.

Global Business

Department Information

- **Department Web Site:**
  www.ndsu.edu/business/ (http://www.ndsu.edu/business/)
- **Credential Offered:**
  Major (secondary major only)
- **Program Overview:**
  catalog.ndsu.edu/programs-study/undergraduate/global-business/ (http://catalog.ndsu.edu/programs-study/undergraduate/global-business/)

Secondary Major Requirements

Major: Global Business

Required Credits: 40

I. Primary Major Requirement

Global Business is offered as a second major only. Students may pursue Global Business after declaring and being admitted into one of the College of Business' primary major programs of Accounting, Business Administration, Finance, Management, Management Information Systems, or Marketing (see admission requirements (https://www.ndsu.edu/business/) for *all* College of Business majors).

II. Core Requirement

Code	Title	Credits
I. Core Requirement		
FIN 320	Principles of Finance	3
MGMT 320	Foundations of Management	3
MRKT 320	Foundations of Marketing	3
MIS 320	Management Information Systems	3
BUSN 430	Legal and Social Environment of Business	3
BUSN 340	International Business	3
BUSN 489	Strategic Management	3
Complete 3 courses from the following:		9

MRKT 372	Global Retailing	
MGMT 440	International Management	
FIN 440	International Finance	
MRKT 440	International Marketing	
BUSN 440	International Business Law	
ENTR 440	International Entrepreneurship	
AGEC 371	Export Management	
II. Language Proficiency Requirement [1]		3-14
III. Study Abroad Requirement [2 & 3]		
BUSN 341	Global Business Environment	3
or BUSN 379	Global Seminar	
or BUSN 394	Individual Study	
or BUSN 492	Global Practicum: Study Abroad	
or UNIV 492		
Total Credits		**36-47**

1

A second year, college-level language proficiency is required. Completion of any 300 or 400 level language course with a grade of B or higher will also fulfill this requirement. For non-native English speakers, completion of any 300 or 400 level ENGL course (this includes ENGL 320) with a grade of B or higher will fulfill this requirement.
The second year, college-level language proficiency courses include:
(Prefix) 101: First Year Language I
(Prefix) 102: First Year Language II
(Prefix) 201: Second Year Language I
(Prefix) 202: Second Year Language II

2

The intent of BUSN 341 is to ensure that students participate in a study abroad experience that includes an academic component related to the country where the study abroad takes place. In addition to BUSN 341, a student may take a Study Tour (Prefix 379) which is an NDSU faculty directed experience or field study in a foreign country, or BUSN 394: Individual Study (Global Business Environment) or BUSN or UNIV 492. If students complete a BUSN/UNIV 492 study abroad experience, which requires the student to study abroad for at least 12 weeks at an international institution, as part of this experience, at least one course must be approved by business faculty to satisfy 3 credits. A substitution form will be necessary to file the study abroad credit with the Office of Registration and Records.

3

International students who are enrolled at NDSU will not be required to complete a study abroad experience. Instead, students must complete one of the following North American history courses: HIST 382, 421, 422, 423, 424, 425, 429, 431, 434, 436, 437, or 476. This history course will substitute for the BUSN 341 "Global Business Environment or equivalent study abroad course" in the program requirement.

Degree notes:

Course Suggestions: While not required, students are encouraged to take either ANTH 111 (Introduction to Anthropology) or COMM 216 (Intercultural Communication) as a general education cultural diversity requirement option. Students will also benefit from taking GEOG 161 (World Regional Geography) as an elective.

Global Studies

Department Information

- **Department Web Site:**
  www.ndsu.edu/spanish_globalstudies/ (http://www.ndsu.edu/spanish_globalstudies/)
- **Credential Offered:**
  Major; Minor; UG Certificate
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/global-studies/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/global-studies/)

In NDSU's Global Studies program, students engage critically with global issues and hone intercultural communication skills essential to navigating a global marketplace. This interdisciplinary major combines a set of required core courses and a flexible range of electives from disciplines such as

economics, geography, anthropology, history, philosophy, English, Spanish, political science, religion, and sociology. These electives are designed to educate students in the complexity of the numerous cultural, political, social, and economical interactions that comprise our modern world.

Major

The Global Studies major can be a primary or secondary major. Students seeking the Global Studies major are required to take courses that have a global focus. These include a 15-credit core and 12 credits of electives that will be chosen with the help of the student's adviser. Work, internships, or study abroad experience, as well as an integrative senior project that ties international study to the primary degree is also required.

Minor

The Global Studies minor provides students the opportunity to globalize their major as well, but on a less intensive level. It requires 18 credits of study.

Certificate

A certificate in Global Studies provides students a path to complete general education courses for humanities and social studies. It requires 10 credits of study.

Languages

For the Global Studies major, students must complete two courses at any level of any foreign language. This requirement may be completed at NDSU or while completing the study abroad requirement. Foreign language credits are optional for the Global Studies minor.

Experience Abroad

An important part of the Global Studies major is participation in a study, work, internship, or research experience abroad for at least 8 consecutive weeks in duration. The experience abroad must be pre-approved by the Global Studies adviser. Assistance with finding an overseas study program is available in the Office of International Programs (https://www.ndsu.edu/international/). Study abroad is optional for the Global Studies minor.

Admission

To be eligible to participate in the Global Studies major, students must have a minimum cumulative grade-point average of 2.0. Additional information about the Global Studies major and curriculum requirements are available through the Spanish and Global Studies webpage :https://www.ndsu.edu/spanish_globalstudies/

Global Studies

Major Requirements

Major: Global Studies

Minimum Required Credits: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**
Category W: Wellness †		**2**
Category D: Cultural Diversity *†		
Category G: Global Perspectives *†		
Total Credits		**39**

*****

Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†

General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Code	Title	Credits
Global Studies Core Requirements

Health Education

Department Information

- **Department Web Site:**
  www.ndsu.edu/education/ (http://www.ndsu.edu/education/)
- **Credential Offered:**
  B.S.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/health-education/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/health-education/)

The health education major is designed to prepare students for careers in the field of school health education through the development of dispositions, knowledge and skills. The program integrates classroom and experiential community-based learning throughout its courses.

The Program

The health education program emphasizes a student-centered approach to teaching health, emphasizing skills-based learning to promote health literacy for all individual students.

Upon completion of the health education major, teacher candidates will be knowledgeable with planning, implementing, administering all ten components of the Whole School, Whole Community, Whole Child Model. Health education teacher candidates will learn how to evaluate and assess needs for health education, plan and implement quality curriculum and lessons and communicate and advocate for health and health education through all ten content components. Candidates in the health education major are prepared to teach health to students in grades 5-12 and 7-12 with creativity and confidence.

Professional Education Courses

Students may enroll in the 300-level professional education courses before being formally admitted to the School of Education (SOE). Prior to enrolling in the 400-level courses, students must complete the application for admission to the SOE; attain a minimum of a 2.75 grade point average overall in their course work and education courses; and pass the Praxis Core Academic Skills for Educators test or meet minimum scores on the ACT+. Requirements for admission can be found on the School of Education website (https://www.ndsu.edu/education/).

Student Teaching

Student teaching (clinical practice) is the culmination of the teaching program. During In the clinical practice, teacher candidates apply the knowledge and skills acquired in their college courses to real-world classrooms under the supervision of experienced health teachers in middle or high schools. Faculty members from NDSU conduct regular on-site visits to support, encourage, and evaluate teacher candidates student teachers so that they gain the confidence and ability to join the teaching profession after graduation.

Student Advisement

An academic advisor works individually with health education teacher candidates to plan their programs of study and to advise and assist them as they progress to degree completion. Students are encouraged to seek their advisor's help whenever needed.

Licensure

Upon completing this program, teacher candidates are eligible for teacher licensure in health in most states. Our program is accredited by the Council for the Accreditation of Educator Preparation (CAEP) and approved by the North Dakota Education Standards and Practices Board (ESPB)

Career Opportunities

Graduates in health education find career opportunities teaching health education in a variety of public and private educational settings, including K-12 schools, community programming, nonprofit organizations and private businesses.

Double Major – It is recommended that health education teacher candidates obtain a degree enhancement through a minor or double major. The health education curriculum has been structured to allow teacher candidates to obtain a physical education major during the same four-year time frame. Advisors can provide additional information about other complementary majors or minors.

Physical Education Major – For further information about the physical education major, please refer to: https://catalog.ndsu.edu/programs-study/undergraduate/physical-education/.

Sample Program Guide - HE Major

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Health Education

Degree Type: B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.

3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

Degree Requirements and Notes

- To be placed in student teaching, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required.
- To exit the program, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required as well as completing the Praxis Subject test and the Principles of Learning and Teaching test.
- Courses taken *Pass/Fail* will not be used to satisfy any requirements other than total credits.
- See School of Education (https://www.ndsu.edu/education/) for admission requirements.

Health Services

Department Information

- **Department Web Site:**
  www.ndsu.edu/publichealth/ (http://www.ndsu.edu/publichealth/)
- **Credential Offered:**
  B.S.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/health-services/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/health-services/)

The Bachelor of Science in Health Services (BSHS) includes a mix of academic and experiential training that meets the needs of public health and healthcare-related employers. The degree is designed to provide an efficient and flexible four-year degree, which allows students to pursue entry-level employment in health-related settings and/or prepare for graduate/advanced professional-level training programs.

The Program

The BSHS program has broad requirements, and allows students flexibility to tailor their plan of study to meet their unique career interests. The core courses provide students an introduction to medical terminology, human disease, public health, the US healthcare system, health services research, and professional ethics. In addition to core courses, BSHS students are required to declare a public health minor, a business administration minor, or be admitted to an accelerated BS-MPH program.

Students are required to meet with their academic advisor to create a plan of study that addresses all program requirements. The plan must be approved by the BSHS Academic Coordinator.

Experiential Training

A core element of the BSHS degree is that students gain hands on learning experiences that prepare them for their own, unique health care career. Students must complete at least 10 credits of approved field experience, although students are highly encouraged to complete additional experiential credits. These experiences may be based in research, clinical work, or general internships. Students may complete field experience credits through NDSU or local health and public health settings.

While students have tremendous flexibility in selecting their field experience, each site may have additional requirements to complete those credits. Students must meet with their academic advisor to ensure that all academic prerequisites and professional requirements necessary to enroll in their intended field experience credits courses are met.

Transferring Credits

View NDSU equivalencies of transfer courses at: www.ndsu.edu/transfer/equivalencies (http://www.ndsu.edu/transfer/equivalencies/)

1

A grade of C or better is required in all coursework for the BS in Health Services.

2

All core courses must be completed before a student will be eligible to register for Field Experience.

3

Students in the MPH accelerated program must also maintain a cumulative GPA of 3.0.

History

Department Information

- **Department Web Site:**
  www.ndsu.edu/history/ (http://www.ndsu.edu/history/)
- **Credential Offered:**
  B.A.; B.S.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/history/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/history/)

The formal study of history dates to ancient Greece, yet the discipline has never been more relevant. Understanding the modern world requires a clear understanding of what has come before, especially in today's fractured and turbulent era. Studying history provides students with the critical thinking, analytical, and research skills to evaluate sources of information, engage in civil debate, make persuasive arguments, and contribute as productive citizens of their nation and the world. An undergraduate degree in History prepares students for careers in government, the law, public service, teaching, and business, as well as providing a foundation for graduate study in any number of fields.

The Program

Students can earn a BA, BS, or Minor in History at NDSU. There are also opportunities to major in Public History (https://www.ndsu.edu/history/history/public_history/), History Education (https://www.ndsu.edu/programs/undergraduate/history-education/), and Social Science Education (https://www.ndsu.edu/programs/undergraduate/social-science-education/).

History major students take 39 credits in History courses in addition to University and College General Education requirements. 9 credits are devoted to foundational courses at the 100- or 200-level, which introduce students to basic content in a variety of historical sub-fields, as well as skills such as analyzing primary and secondary sources, asking informed questions about the past, and engaging in informed discussion and debate with their classmates. Students then take 18 credits of 300- or 400-level courses, distributed among North American History, European History, and Widening Horizons categories. These courses expose students to cutting-edge historical scholarship in each of these fields, while building writing, research, and discussion skills.

In their sophomore or junior year, students take Historical Research and Writing, which trains them to write persuasive, evidence-based, and clear arguments about the past. As a capstone experience, in their senior year History major students apply these skills in a semester-long writing seminar, where they produce an original research paper on a topic of their choice. The remaining 6 credits are electives that allow students to follow their own intellectual interests within the History curriculum. A listing of regularly offered courses can be found here (https://catalog.ndsu.edu/course-catalog/descriptions/hist/).

History Minors (https://catalog.ndsu.edu/undergraduate/program-curriculum/history/#minortext) take 9 History credits at the 100- or 200-level and 9 credits at the 300- or 400-level.

Learning Outcomes

Upon completion of the History major, students will be able to:

1) Employ historical thinking and empathy as central to engaged citizenship;

2) Analyze multiple viewpoints and perspectives about the past;

3) Explain and analyze the complexity of human experiences outside the western world in time and space;

4) Ask questions about the past, mindful of historical contexts; and

5) Craft a historical narrative and an argument that is reasoned and based on historical evidence in appropriate primary and secondary sources.

Faculty

The NDSU history faculty consists of internationally-recognized researchers and teachers, several of whom have won national and University awards for their research and pedagogy. Areas of strength include North American History from the colonial period through the 20th Century, the Great Plains,

Public History, Women's History, 20th-Century Southeast Asia, Medieval and Early Modern Europe, the Cold War in Eastern Europe, Colonial Latin America, and the History of Religion. Each faculty member has published at least one scholarly book in their area of expertise, and all regularly publish articles and present research papers at professional conferences. The department also regularly hosts regional and national history conferences and participates in colloquia and public-facing events. Find more on faculty teaching, research, and outreach activities here (https://www.ndsu.edu/history/faculty_and_staff/).

Study Abroad

The history faculty regularly lead study-abroad courses and are committed to expanding students' horizons at the international level. Recent and upcoming courses and destinations include the Hapsburg Empire in Vienna, European Religious Traditions in Rome, World War II in London and Paris, Japanese History and Culture in Japan, and the Early Modern Spanish Empire in Spain.

Cultural Diversity

The department is strongly committed to helping students understand the diversity of human experience. History classes help students understand how differences in race, gender, ethnicity, and social and economic class have affected people's lives and influenced the modern world. Department faculty are also active in numerous efforts to promote understanding of diversity.

Public History

In 1982, NDSU launched the first public history program in the Upper Midwest. Public History is a vibrant field of study that trains students to work in archives, museums, historical societies and sites, historic preservation, historical editing, digital history and documentary film-making, and areas of the Federal Government such as the National Park Service. Public History is a professional major that can be easily combined with a History major or minor. More information can be found here (https://www.ndsu.edu/history/history/public_history/#:~:text=At%20NDSU%20a%20BA%20or,public%20history%20are%20also%20required).

Institute for Regional Studies

The North Dakota Institute for Regional Studies (https://www.ndsu.edu/ahss/about/nd_institute_for_regional_studies/) has close connections with the History program. The Institute collects, organizes and preserves materials on our region's historical heritage.

Humanities North Dakota

History faculty are active in programs sponsored and funded by Humanities North Dakota (https://www.humanitiesnd.org/). In recent years, faculty have conducted grant-supported research, written books and articles, and delivered public presentations on North Dakota women's participation in the National Women's Conference of 1977, genocide in Bosnia, suicide and divorce in the Civil War South, the Dakota War of 1862, and French Colonial policies in Indochina.

Phi Alpha Theta

The NDSU History faculty sponsor a local chapter of Phi Alpha Theta (https://phialphatheta.org/), the History Honors Society, and NDSU students regularly present research papers at the Society's regional and national conferences. The department holds an annual initiation ceremony in April and several social events throughout the year for PAT members. Students with at least 12 credit hours in history with a History GPA of 3.1 or above are eligible to apply for membership.

Career Opportunities

History is a versatile degree, and students regularly go on to careers in government, education, journalism, editing and publishing, public service, the law, and business. The skills fostered by historical study - persuasive argumentation, critical thinking, analysis of information sources, and research, to name a few - are well-suited to any number of careers, as evidenced by the number of history majors helming Fortune 500 companies, serving in government agencies, and making contributions in the fields of journalism, entertainment, law, and politics. Indeed, more US presidents -- including George W. Bush and Joe Biden -- have been history majors than any other undergraduate field of study.

The American Historical Association has compiled more detailed information on career paths for history majors, including profiles of recent graduates, here (https://www.historians.org/jobs-and-professional-development/career-resources/careers-for-students-of-history/).

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. Total Credits		**39**

*

The prerequisite for HIST 489 Capstone is HIST 390.

Degree Requirements and Notes:

- Twenty-four (24) credits must be taken at the 300-400 level and of these 24, twenty (20) credits must be taken in residence at NDSU for a history major.

Minor Requirements

Minor: History

Required Credits: 18

Code	Title	Credits
Electives		
HIST	100-200 level courses	9
HIST	300-400 level courses	9
Total Credits		**18**

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.

Horticulture and Urban Agriculture

Department Information

- **Department Web Site:**
  www.ag.ndsu.edu/plantsciences (http://www.ag.ndsu.edu/plantsciences/)
- **Credential Offered:**
  B.S.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/horticulture/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/horticulture/)

Horticulture is the art and science of producing, improving, marketing, and using fruits, vegetables, flowers, and landscape plants. It differs from botany and other plant sciences in that horticulture incorporates both science and art. Horticulture is an art as old as the ancient gardens and a science as new as today's genetic engineering. Horticulture is an entrepreneurial industry, profession, business, vocation and avocation. Production and consumption of high quality fruits and vegetables allows us to maintain a healthy, balanced daily diet. Flowers and ornamental plants enrich our homes and communities, and contribute to our sense of well-being. Horticulture impacts our lives on a daily basis by providing nutritious fruits and vegetables, offering visual enjoyment, and promoting recreational activities. Horticulture is a multibillion dollar industry made up of small businesses as well as large publicly traded enterprises.

The Program

The Department of Plant Sciences offers a four-year curriculum in horticulture leading to the Bachelor of Science degree. There are six horticulture options: horticulture science, landscape design, landscape management, production-business, sports and urban turfgrass management, and urban forestry and parks.

HORTICULTURE MINOR

The horticulture program offers a minor and is open to students in any major. The horticulture minor is geared toward students who want to learn more about plants and their many uses.

Career Opportunities

Production – producers of horticultural food crops for fresh consumption or processing; nursery and greenhouse production of food and ornamental crops; field positions for processing, marketing and seed companies; and plant propagation/tissue culture specialists. Salaries range from $45,000 - $80,000

Landscaping – planners, designers and installers of residential, commercial, public and recreational landscapes (both exterior and interior), employment with nurseries, landscape management and maintenance firms or private consultants. Salaries range from $45,000 - $80,000

Arborist or Urban Park Forester – selection, planting and management of woody plants in urban environments. Salaries range from $45,000 - $80,000

Park Management and Maintenance – positions in national, state and local park systems, botanic gardens and arboreta

Golf Course Superintendent – professional manager who manages the labor, time, materials and financial resources needed to care for the turfgrass and landscaped grounds on a golf course. Starting as an assistant, it is possible for a graduate to become a full-fledged golf course superintendent in three to five years. Starting salaries range from $28,000 to $35,000, with the national average of head superintendents reaching more than $80,000

Sports Turf Management – professional manager that is entrusted with the operation and management of sports fields and facilities. Sports fields include baseball, football, soccer, lacrosse, rugby, lawn bowling and cricket. Salaries average around $44,000.

Lawn Care Operator – professional manager responsible for the cultivation and care of the landscaping and grounds surrounding a business or building. Lawn care operators comprise the largest single group of potential career opportunities for the graduate with more than 6,000 companies in the United States servicing millions of American lawns at the residential, commercial and institutional levels. Salaries range from $45,000 - $80,000

Facility Managers – professional manager that maintains the buildings and grounds of an organization, directing staff and overseeing the upkeep of equipment and supplies. Facilities managers make sure the buildings and grounds are maintained, which entails daily and weekly reduction improvements and safety inspections

Marketing – positions in the retail/wholesale distribution of horticultural products and buying, selling and distribution of supplies and products used by the horticultural industries

Industry – management and sales positions in horticulture or allied firms for fertilizers, seed, food and ornamental crops, pesticides, equipment, processing and packaging

Inspection – field diagnosticians and inspectors for fresh and processed products in federal or private agencies

Research – positions at public and private institutions as technicians in field and laboratory research. Areas of research include horticultural plant breeding, pesticide evaluation, crop physiology, product testing and quality control, plant propagation and biotechnology

Communication – writers/editors for television, radio, magazines and newspapers

Teaching and Extension – extension personnel who assist growers, industry and the public through education and outreach

Financial Aid and Scholarships

Loans, scholarships, grants and the work-study program are available through the Office of Financial Aid and Scholarships. Students requiring financial assistance may contact the Office of Financial Aid and Scholarships or One Stop.

The Department of Plant Sciences awards 15 horticultural scholarships for use during the freshman, sophomore, junior and senior years. The Horticulture and Forestry Club awards three scholarships each year as well. Additionally, scholarships are awarded to freshmen students by the College of Agriculture, Food Systems, and Natural Resources prior to enrollment. Scholarships also are available to students continuing a major in the College. Applications for all college and departmental scholarships may be applied for online between December 1 and March 1, annually. Also, many undergraduate students are employed part-time during the school year and full-time during the summer months as research or teaching assistants.

Extra-Curricular Activities

Horticulture & Forestry Club – an opportunity for students who enjoy plants to come together and participate in fun plant related events including: collegiate contests, field trips and networking opportunities. The club meets at least monthly. Collegiate contests and exhibits provide educational and leadership opportunities. Field trips are made annually, exposing students to a diversity of horticultural enterprises and potential job opportunities. Club members propagate, grow and sell flowers and ornamental plants to finance social events, field trips and scholarships. Majors and non-majors are welcome!

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Horticulture and Urban Agriculture

Department Information

- **Department Web Site:**
  www.ndsu.edu/agriculture/academics/academic-units/plant-sciences (http://www.ndsu.edu/agriculture/academics/academic-units/plant-sciences/)
- **Credential Offered:**
  B.S.
- **Sample Program Guide:**
  catalog.ndsu.edu/programs-study/undergraduate/horticulture/#planofstudytext (http://catalog.ndsu.edu/programs-study/undergraduate/horticulture/#planofstudytext)

Major Requirements

Major: Horticulture and Urban Agriculture

Degree Type: B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**
Category W: Wellness †		**2**
Category D: Cultural Diversity *†		
Category G: Global Perspectives *†		
Total Credits		**39**

*****

Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†

General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Code	Title	Credits
Required Core Courses for Horticulture		
PLSC 189	Skills for Academic Success [1]	1
CSCI 114	Computer Applications	3
or TL 116	Business Software Applications	
CHEM 117 & 117L	Chemical Concepts and Applications and Chem Concepts and Applications Lab	4
or CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory	
ECON 105	Elements of Economics	3
or ECON 201	Principles of Microeconomics	
or ECON 202	Principles of Macroeconomics	
ENT 350	General Entomology	3
MATH 104	Finite Mathematics	3
or MATH 103	College Algebra	
PLSC 210	Horticulture Science	3
PLSC 211	Horticulture Science Lab	1

PLSC 215	Weed Identification	1
PLSC 355	Woody Landscape Plants	3
PLSC 365	Herbaceous Landscape Plants	2
PLSC 380	Principles of Plant Physiology	3
PLSC 457	Horticulture and Turfgrass Systems (Capstone)	3
PLSC 491	Seminar	1
PLSC 496	Field Experience	2
or PLSC 493	Undergraduate Research	
or PLSC 494	Individual Study	
PPTH 324	Introductory Plant Pathology	3
SOIL 210	Introduction to Soil Science	3
Option: Students select one of the six options listed below.		
Option information: Students must select one of the options listed below to complete the major. The standard option is Production Business; if students wish to complete one of the other options availalbe they must officially declare their option with the Office of Registration and Records.		34
Total Credits		**76**

Production-Business Option (Standard) - 34 Credits

Code	Title	Credits
ENT 431	Principles of Insect Pest Management [2]	3

SOIL 322	Soil Fertility and Fertilizers	
Total Credits		**34**

1

PLSC 189 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take this course.

2

Students who are approved to complete the accelerated program in the Master of Science in Horticulture and Urban Agriculture are eligible to complete the 600 level course with graduate supervisor approval. Students are allowed to take 15 graduate credits and apply the graduate credit to these undergraduate program requirements. Students are required to complete the Accelerated Degree Student Declaration form and make formal application to the NDSU Graduate School.

Minor Requirements

As the nation's number one retail employer, the hospitality and tourism industry employs millions of people. The demand for managers continues to grow as the demand for services grows. Along with this demand for services is an increasing emphasis on comfort, convenience and personalized attention. All of these factors increase the need for effective and efficient professionals to manage hospitality operations and lead teams of people.

Human Development and Family Science

Department Information

- **Department Web Site:**
  www.ndsu.edu/hdfs/ (http://www.ndsu.edu/hdfs/)
- **Credential Offered:**
  B.S.; B.A.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/human-development-family-science/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/human-development-family-science/)

Human Development and Family Science (HDFS) provides a program of study for students interested in a variety of careers that involve work with children, adults and/or families. Students majoring in HDFS may obtain a bachelor's degree.

CAREER OPPORTUNITIES

Career directions through HDFS can be divided into two general areas:

Direct Service to Children, Adults and Families – child life specialist, human services professional, child protection service professional, outreach worker, parent and family life educator, gerontology outreach, extension agent, or financial counselor, mental health therapist or counselor (with graduate degree).

Support Service to Children, Adults and Families – program director for nursing or retirement facility, child care director, consultant in human development, hospital-related services, researcher, child advocate.

Some of the listed careers require a planned minor or a double major. Other careers require preparations beyond the bachelor's degree level. An HDFS degree is excellent preparation for students considering graduate work in counseling, family therapy, child development, gerontology, and developmental science. Study in HDFS provides course work for students interested in careers involving human relations.

Graduates from HDFS are currently employed in a variety of careers. These include extension agent, Head Start program director, child care director, home visitor for Head Start, crisis family counselor, hospital child life specialist, family life educator, developmental disabilities worker, volunteer coordinator, parent support specialist, parent educator, financial counselor and financial planner.

The Program

The major emphasis in HDFS programs is family and human development over the life span. Students gain an understanding of the development of children and adults and their interaction in the family within society.

Students majoring in HDFS have three options: adult development and aging; child and adolescent development; and family science. Each of these options can be completed by itself or can be paired with another degree in one of our dual degree programs. Child development can be paired with elementary education, and family science and adult development and aging can be paired with social work. Information on these dual degree programs is on a separate fact sheet. Each of these options can also be combined with a master's degree program in one of our combined/accelerated master's programs. Child and adolescent development can be combined with the master's program in youth development; family science can be

combined with the master's program in family financial planning; and adult development and aging can be combined with the master's program in gerontology. Information on these combined/accelerated degree programs is on a separate sheet.

Courses in the program include:

- Adolescent Development
- Adult Development and Aging
- Child Development
- Diversity and Multiculturalism in Individual and Family Life
- Children, Families, and Public Policy
- Personal and Family Finance
- Issues in Human Sexuality
- Life Span Human Development
- Parent-Child Relations
- Family Dynamics of Aging
- Couples, Marriages, and Families

Students majoring in HDFS enroll for credit in field experience as a critical part of their program of study. The department offers opportunities to work with children, youth, adolescents, older adults and families in various settings.

The Facilities

Facilities for the Department of Human Development and Family Science are housed in Evelyn Morrow Lebedeff Hall and the Family Life Center. Included in these buildings are classrooms, conference rooms, research labs, and a child development center serving young children and their families.

Community Setting

The Fargo-Moorhead metropolitan area offers a conducive setting for study. Students have the opportunity to work in a number of community institutions serving children and families. Professionals working with older adults, child care programs, mental health centers, chemical dependency treatment centers, medical facilities and welfare agencies visit classes and conduct tours to explain their programs for children and families.

Extra-Curricular Opportunities

Students may enhance their involvement in the HDFS area by participating in groups such as the HDFS Club, the North Dakota Association for the Education of Young Children, and the North Dakota Family and Consumer Sciences Association.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Human Development and Family Science

Department Information

- **Department Web Site:**
  www.ndsu.edu/hdfs/ (http://www.ndsu.edu/hdfs/)
- **Credential Offered:**
  B.S.; B.A.; Minor
- **Sample Program Guide:**
  catalog.ndsu.edu/programs-study/undergraduate/human-development-family-science/ (http://catalog.ndsu.edu/programs-study/undergraduate/human-development-family-science/)

Major Requirements

Major: Human Development & Family Science

Degree Type: B.A. or B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**

Category A: Humanities and Fine Arts [†]	**6**
Category B: Social and Behavioral Sciences [†]	**6**
Category W: Wellness [†]	**2**
Category D: Cultural Diversity [*†]	
Category G: Global Perspectives [*†]	
Total Credits	**39**

*
Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†
General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Code	Title	Credits
Human Development & Family Science Core Requirements		
HDFS 230	Life Span Development	3
HDFS 242	Couples, Marriages and Families	3
HDFS 250	Introduction to Research Methods in Human Development and Family Sciences	3
HDFS 275	Diversity and Multiculturalism in Individual and Family Life	3
HDFS 353	Children, Families and Public Policy	3
HDFS 389	Pre-Field Experience	2
HDFS 390	Career Development	1
HDFS 496	Field Experience [1]	3
PSYC 111	Introduction to Psychology	3
SOC 110	Introduction to Sociology	3
STAT 330	Introductory Statistics	3
Select one of the following:		3
ENGL 320	Business and Professional Writing	
ENGL 325	Writing in the Health Professions	
ENGL 358	Writing in the Humanities and Social Sciences	
ENGL 459	Researching and Writing Grants and Proposal	
Option Selection		
Select one option from the three listed below: Adult Development & Aging; Child & Adolescent Development; Family Science		21
Minor Plan of Study		
A minor plan of study is required outside of the HDFS department for all options.		16
Total Credits		**70**

Adult Development and Aging Option

Code	Title	Credits
HDFS 357	Personal and Family Finance	3
HDFS 360	Adult Development and Aging	3
HDFS 480	Community Resources of Later Life	3
HDFS 482	Family Dynamics of Aging	3
HDFS 300-400 Level	Major Electives (can include up to 3 credits of HDFS 496 or HDFS 491)	9
Total Credits		**21**

Child and Adolescent Development Option

Code	Title	Credits
HDFS 320	Prenatal, Infant and Toddler Development	3
HDFS 330	Child Development	3
HDFS 340	Adolescent Development	3
Select one of the following:		3

HDFS 424	Observation and Assessment of Children	
HDFS 483	Best Practices, Play and Activities from Birth Through Adolescence	
HDFS 300-400 Level	Major Electives (can include up to 3 credits of HDFS 496 or HDFS 491)	9
Total Credits		**21**

Family Science Option

Code	Title	Credits
HDFS 341	Parent-Child Relations	3
HDFS 357	Personal and Family Finance	3
HDFS 448	Issues In Sexuality	3
HDFS 462	Methods of Family Life Education	3
HDFS 300-400 Level	Major Electives (can include up to 3 credits of HDFS 496 or HDFS 491)	9
Total Credits		**21**

1

In the semester prior to taking field experience credits, students are required to take HDFS 389 Pre-Field Experience. Note: HDFS 491 Senior Thesis may be completed as elective.

Degree Requirements and Notes

- A grade of C or better is required for all HDFS courses, regardless of whether they are used for the major core, major electives, general education, or free electives.
- A 2.50 cumulative GPA is required in major courses for graduation.
- Courses taken *Pass/Fail* will not be used to satisfy any requirement other than total credits.

Accelerated Program in HDFS

- A combined/accelerated program will allow high-achieving students to complete both a bachelor's and master's degree in HDFS in five years.
- Only students with a cumulative undergraduate GPA of at least 3.0 and who have completed at least 60 credits are eligible to apply. Interested students should speak with an HDFS advisor about how to proceed.
- 15 credits at the master's level may be used to meet the requirements for a bachelor's degree.
- The programs will map as follows:
  - BS-HDFS program with an option in Adult Development and Aging may enter the master's option Gerontology.
  - BS-HDFS program with an option in Child and Adolescent Development may enter the master's option in Youth Development.
  - BS-HDFS program with an option in Family Science may enter the master's option in Family Financial Planning

Minor Requirements

Minor: Human Development & Family Science

Required Credits: 18

Code	Title	Credits
Required Courses		
HDFS 230	Life Span Development	3
HDFS 242	Couples, Marriages and Families	3
Elective Courses [1]		
HDFS	Any Level Elective	12
Total Credits		**18**

1

No more than 3 credits may be a field experience, practicum, or student teaching.

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.

Industrial Engineering and Management

Department Information

- **Department Web Site:**
  www.ndsu.edu/ime/ (http://www.ndsu.edu/ime/)
- **Credential Offered:**
  B.S.I.E.Mgt.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/industrial-engineering-management/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/industrial-engineering-management/)

Industrial engineering students have the opportunity to design systems and processes that improve the quality and productivity of an organization's business activities. They employ a strong foundation in fundamental engineering and management skills to effectively integrate people and resources to create positive change. Simply put, students will design and implement the best way to get work done.

THE PROFESSION

The field of industrial engineering is inherently interdisciplinary and spans across various industries, including manufacturing, healthcare, hospitality, banking and finance, food processing, chemical and oil, distribution and logistics, and more. Industrial engineers play a crucial role in designing, enhancing, and installing integrated systems involving people, materials, information equipment and energy. Their responsibilities often encompass improving productivity, optimizing supply chains, project management, and conducting feasibility studies for new technologies, lean and just-in-time implementation, health care management and logistics, and systems integration and engineering solutions. Whether it involves reducing wait times in a rollercoaster line, streamlining an operating room, overseeing a global supply chain, developing high-performance automobiles, or resolving complex logistics issues, industrial engineers are at the forefront of driving efficiency and innovation.

THE PROGRAM

The Department of Industrial and Manufacturing Engineering (IME) at North Dakota State University provides two programs that culminate in a Bachelor of Science degree. Students can pursue a degree in either Industrial Engineering and Management or Manufacturing Engineering. Notably, NDSU has the only Industrial Engineering and Management program in North Dakota. The Bachelor of Science in Industrial Engineering and Management program is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org, under the commission's General Criteria and Program Criteria for Industrial and Similarly Named Engineering Programs. This accreditation reflects the program's commitment to maintaining high educational standards and ensuring its graduates are well-prepared for the engineering profession.

Motivated undergraduate students within the program have the opportunity to explore two options for accelerated master's degrees:

1. Accelerated MBA: The IE&M/MBA accelerated program is offered by the IME Department in collaboration with the College of Business. This program enables students to earn their MBA within one additional year.
2. Accelerated Master of Engineering: The advantage of the Master of Engineering program lies in the application of pre-established coursework at the 600 level to be applied to both degrees, offering a streamlined educational experience. This degree program offers a non-thesis option for those wishing to earn a graduate degree. The program consists of a minimum of 30 credits of study and a written examination and only requires one additional year of study beyond the undergraduate degree.

To be eligible for admission to the graduate school and pursue either the IE&M/MBA or Master of Engineering accelerated programs, students must have completed a minimum of 60 credits and maintained a cumulative GPA of 3.0 or higher.

THE FACULTY AND FACILITIES

The IME department is currently housed in the Engineering Building, which is part of an eight-building engineering complex. The department has seven laboratories well equipped for teaching and research, offering valuable support for students' educational and research needs. These specialized laboratories cover a range of areas, including computer simulation, human factors, automation and robotics, additive manufacturing and biomanufacturing, computational modeling, bioinformatics and operations research, PLC's, manufacturing processes, rapid prototyping, CNC machining, and microfabrication, as well as welding and precision manufacturing. In the fall of 2026, NDSU's College of Engineering is set to open the new Richard Offerdahl '65 Engineering Complex. This cutting-edge facility will feature state-of-the-art research and learning spaces, equipping future engineers to meet the ever-changing demands of both the University and industry for generations to come.

The faculty and staff within the IME department have extensive experience in industrial and manufacturing specialties. They prioritize a personalized learning environment, dedicated to personally knowing each student, recognizing their strengths, understanding potential challenges, and providing support whenever necessary. Upon completion of a degree at NDSU, students will leave not only with a strong foundation for career success but also the confidence and capability for lifelong personal growth. Additionally, they will have established a network of both friends and professional colleagues.

CAREER OPPORTUNITIES

Graduates of the IME programs at NDSU are employed in a diverse array of industries across the United States and globally. Industries seek individuals with a high level of education, adept problem-solving skills, and effective communication abilities. IME graduates are well-equipped to meet these demands, presenting them an endless number of opportunities for career choices and geographic locations, as well as fast-paced career growth. Graduates of the IME programs have become a source of talent working in industries such as health care, manufacturing, consulting, food, transportation and distribution, and information systems. Recent IME graduates command starting salaries in the top rank of engineering disciplines.

According to the U.S. Bureau of Labor Statistics, the national median salary for industrial engineers is $96,350 (**https://www.bls.gov/ooh/architecture-and-engineering/industrial-engineers.htm**).

TRANSFER ADMISSION

Students who transfer with an AA or AS degree will have lower division general ed credits satisfied.

SCHOLARSHIP AND FINANCIAL AID

The Department awards several scholarships annually. Scholarships are available for incoming freshman, transfer students, and currently enrolled students. Other forms of financial aid are available through the Office of Financial Aid and Scholarships.

SELECTIVE ADMISSION

Transfer students must have a minimum cumulative grade point average of 2.3.

INDUSTRIAL ENGINEERING AND MANAGEMENT MINOR

Students pursuing a major in any engineering discipline have the option to elect a minor in Industrial Engineering and Management. This elective path provides engineering students the opportunity to add important career-enhancing skills to their technological competencies. The elected courses in an IE&M minor add skills for integrating technology and resources within the complex framework of people, technology, machinery and information that constitutes a successful modern business enterprise. Students completing this minor will achieve a better understanding of organizational and management processes and will be better prepared to work in the multi-functional teams crucial to success in industry. The total requirement for this minor is 18 credits (6 credits are required courses and 12 credits of approved electives), 9 of which must be unique and not count towards the major.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Degree Notes:

- Grades less than 'C' will not be accepted for required courses in CHEM, MATH, and PHYS.
- Students may request approval for other 300-400 level engineering or related courses to be approved as technical electives. To request approval, a student should submit a request to the IME Department indicating the course of interest and why the course should be approved as a technical elective. This request will be reviewed by the IME Department Chair for approval.
- 300-400 level BUSN courses require at least junior standing and a minimum 2.50 cumulative GPA.

Industrial Engineering and Management

Department Information

- **Department Web Site:**
  www.ndsu.edu/ime/ (http://www.ndsu.edu/ime/)
- **Credential Offered:**
  B.S.I.E.Mgt.; Minor
- **Sample Program Guide:**
  catalog.ndsu.edu/programs-study/undergraduate/industrial-engineering-management/#planofstudytext (http://catalog.ndsu.edu/programs-study/undergraduate/industrial-engineering-management/#planofstudytext)

Major Requirements

Major: Industrial Engineering & Management

Degree Type: B.S.I.E.Mgt.
Minimum Degree Credits to Graduate: 130

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.

7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**
Category W: Wellness †		**2**
Category D: Cultural Diversity *†		
Category G: Global Perspectives *†		
Total Credits		**39**

*****

Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†

General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Code	Title	Credits
Industrial Engineering & Management Core Requirements		
IME 111	Introduction to Industrial and Manufacturing Engineering	3
IME 311	Work/Station Design and Measurement	3
IME 330	Manufacturing Processes	3
IME 440	Engineering Economy	3
IME 450	Systems Engineering and Management	3
IME 456	Program and Project Management	3
IME 460	Evaluation of Engineering Data	3
IME 461	Quality Assurance and Control	3
IME 470	Operations Research I	3
IME 472	Simulation of Business and Industrial Systems	3
IME 480	Production and Inventory Control	3
IME 482	Automated Manufacturing Systems	3
IME 485	Industrial and Manufacturing Facility Design	3
IME 489	Industrial and Manufacturing Engineering Capstone	3
MATH 129	Basic Linear Algebra	3
MATH 165	Calculus I (May satisfy general education category R)	4
MATH 166	Calculus II	4
MATH 259	Multivariate Calculus	3
MATH 266	Introduction to Differential Equations	3
ME 212	Fundamentals of Visual Communication for Engineers	3
ME 221	Engineering Mechanics I	3
ME 222	Engineering Mechanics II	3

CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory (May satisfy general education category S)	4
CHEM 122	General Chemistry II (May satisfy general education category S)	3
ENGL 321	Writing in the Technical Professions (May satisfy general education category C)	3
ENGR 327	Ethics, Engineering, and Technology	3
PHYS 252 & 252L	University Physics II and University Physics II Laboratory (May satisfy general education category S)	5
Industrial Engineering and Management Electives		
Computer Science Electives: Select one of the following:		3
CSCI 122	Visual BASIC	
CSCI 159	Computer Science Problem Solving	
CSCI 160	Computer Science I	
CSCI 227	Computing Fundamentals in Python I	
ECE 173	Introduction to Computing	
Programming Language: Any programming language course must be approved by your adviser.		
Engineering Science Electives: Select 12 credits from the following:		
CE 309	Fluid Mechanics	3
ME 223	Mechanics of Materials	3
ME 350	Thermodynamics and Heat Transfer	3
Select one of the following:		3-4
EE 206	Circuit Analysis I	
ECE 275	Digital Design	
ECE 301	Electrical Engineering I	
Technical Electives: Select 9 credits from the following:		9
IME 335	Welding Technology	
IME 380	CAD/CAM for Manufacturing	
IME 411	Human Factors Engineering	
IME 427	Packaging for Electronics	
IME 430	Process Engineering	
IME 431	Production Engineering	
IME 432	Composite Materials Manufacturing	
IME 437	Methods for Precision Manufacturing	
IME 433	Additive Manufacturing	
IME 435	Plastics and Polymer Processing in Manufacturing	
IME 451	Logistics Engineering and Management	
IME 453	Hospital Management Engineering	
IME 462	Total Quality In Industrial Management	
IME 463	Reliability Engineering	
IME 464	Reliability Analysis	
IME 465	Introduction to Machine Learning	
Only one of the following 5 courses may be counted as a technical elective.		
BUSN 340	International Business	
BUSN 431	Business Law I-Contracts, Property and Torts	
MGMT 320	Foundations of Management	
MRKT 320	Foundations of Marketing	
MIS 320	Management Information Systems	
Total Credits		**110-111**

Degree Requirements and Notes

- Grades less than 'C' will not be accepted for required courses in CHEM, MATH, and PHYS.
- Students may request approval for other 300-400 level engineering or related courses to be approved as technical electives. To request approval, a student should submit a memo to the IME Department indicating the course of interest and why the course should be approved as a technical elective. This memo will be reviewed by the IME Department Chair for approval.
- 300-400 level BUSN courses require at least junior standing and a minimum 2.50 cumulative GPA.

Accelerated subplan:

Code	Title	Credits
ACCT 200 & ACCT 201	Elements of Accounting I and Elements of Accounting II	3 or 6
or ACCT 102	Fundamentals of Accounting	
ECON 201 & ECON 202	Principles of Microeconomics and Principles of Macroeconomics	3 or 6
or ECON 105	Elements of Economics	
FIN 320	Principles of Finance	3
IME 640	Engineering Economy (in place of IME 440; cannot take as 4 credits)	3
IME 656	Program and Project Management (in place of IME 456)	3
IME 670	Operations Research I (in place of IME 470)	3
IME 672	Simulation of Business and Industrial Systems (in place of IME 472)	3
IME 680	Production and Inventory Control (in place of IME 480)	3
MGMT 320	Foundations of Management (take as tech elective for IE&M major)	3
MRKT 320	Foundations of Marketing (take as tech elective for IE&M major)	3
STAT 330	Introductory Statistics (or IME 460)	3
Total Credits		**33-39**

Degree Requirements and notes

- To be eligible for the accelerated program, students must complete 60 credits and have a GPA of 3.0 or higher to apply to the graduate school.

Minor Requirements

Minor: Industrial Engineering & Management

Required Credits: 18

Code	Title	Credits
Required Courses		
IME 111	Introduction to Industrial and Manufacturing Engineering	3
IME 311	Work/Station Design and Measurement	3
Electives: Select 12 credits from the following:		**12**
IME 450	Systems Engineering and Management	
IME 451	Logistics Engineering and Management	
IME 453	Hospital Management Engineering	
IME 456	Program and Project Management	
IME 461	Quality Assurance and Control	
IME 462	Total Quality In Industrial Management	
IME 463	Reliability Engineering	
IME 465	Introduction to Machine Learning	
IME 470	Operations Research I	
IME 472	Simulation of Business and Industrial Systems	
IME 480	Production and Inventory Control	
IME 482	Automated Manufacturing Systems	

IME 485	Industrial and Manufacturing Facility Design	
Total Credits		**18**

Minor Requirements and Notes

- A minimum of 9 credits must be taken at NDSU.
- 9 of the 18 credits for this minor must be unique and cannot count toward requirements in the student's engineering major.
- Only students majoring in an engineering discipline or with department permission agricultural or physical science majors may elect a minor in Industrial Engineering & Management.

Information Technology

Department Information

- **Department Web Site:**
  www.ndsu.edu/cs/ (http://www.ndsu.edu/cs/)
- **Credential Offered:**
  B.S.
- **Official Program Curriculum:**
  /undergraduate/program-curriculum/information-technology/ (http://catalog.ndsu.edu/programs-study/undergraduate/information-technology/ http:///undergraduate/program-curriculum/information-technology/)

Information Technology is rapidly becoming the basis of most aspects of society. Working with practical systems while understanding underlying principles enables confident problem solving in this fast-changing environment. Systems, both cloud and physical systems, and applications together shape the information technology landscape.

THE PROGRAM

The Information Technology program bridges the technical and the theoretical side of computing. It is designed to provide the technical understanding that enables graduates to succeed in a world of rapidly advancing technology. At the same time, it includes the foundational knowledge that grounds applications in principles that remain important over time. System and application technologies are both considered.

CAREER OPPORTUNITIES

Technologists are needed in most businesses. The breadth and practical relevance of the information technology program makes graduates of this program particularly flexible in their choice of career path. The move to cloud technology has softened the historical division between system and applications experts and increased the need for those who have expertise in both areas. Graduates of the Information Technology program are in an excellent position to help advance technological innovation.

HIGH SCHOOL PREPARATION

The program does not explicitly require specific high school preparation. Taking IT, programming, networking or security content can be helpful but is not required. Likewise, it is useful, but not required, to take algebra and trigonometry in high school.

THE FACILITIES

The NDSU computer science department has a 40-seat Linux lab, extensive cloud resources, a cluster of remotely assessable Linux workstations, a number of virtual machines, and Hadoop and Spark analytic systems. Research labs support Windows, Macs, and Linux computers along with various peripheral equipment such as a cyber range, drones, and 3D printers. The department and the University have assumed a leadership role in computer networking through the acquisition and implementation of high-bandwidth network switches. The University also has entered into a six-state consortium for extremely high-level networking in the Upper Midwest. The high-performance Center for Computationally Assisted Science and Technology (CCAST) is available for distributed research projects. We are also a charter member of Internet2 and have connectivity to the national vBNS research network. The department maintains numerous web servers for class assignments and other information, which are accessed by thousands of users each day.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

First Year

Interior Design

Department Information

- **Department Web Site:**
  www.ndsu.edu/adhm/interior_design/overview/ (http://www.ndsu.edu/adhm/interior_design/overview/)
- **Credential Offered:**
  B.A.; B.S.
- **Official Program Curriculum:**
  http://catalog.ndsu.edu/undergraduate/program-curriculum/interior-design/

A professional interior designer is one who is qualified by education, examination, and experience to identify, research and creatively solve problems relative to the function and quality of people's interior environments. The course of study in interior design leads to a first professional degree.

Background Information

The program focuses on improving the quality of life and protecting human health and safety through design of the interior environment. Students study design fundamentals, theory, process, communication, research, and technology to identify and solve problems for a wide range of physical interior environments for all individuals.

The Program

The Department of Architecture offers an accredited undergraduate degree program in interior design. The first two years of the program introduce the fundamentals of design, visual and technical communication techniques (including drafting, model building, rendering, computer-aided design), and theoretical and practical applications (including anthropometrics, ergonomics, inclusive design, interior design technology, and color theory). Each student becomes aware that the interior design profession is exceedingly complex, and collaborating with design professionals and related disciplines in a team approach to problem-solving is routine practice.

Beginning their first year through their final semester, students interact with professionals during industry tours, critiques, and guest speaking events, providing a direct connection to the interior design profession. Upper-division course work is focused on a series of integrated studio experiences and supporting courses including history, evidence-based design, interior materials, professional practice, building information modeling and interior systems. The studio experience culminates in a senior capstone project. Studio experiences require that each student be exposed to a variety of projects at several different levels of complexity and different client project goals.

Field Experience

North Dakota State University interior design students are required to complete a field experience between the third and fourth year of the program. Students accept a variety of positions throughout the United States and abroad. Students have completed field experiences in places such as Los Angeles, Minneapolis, Denver, Florida, New York and Ireland.

Selective Admission

Admission into the second year professional program comes at the conclusion of the first year of the pre-professional program and is based upon demonstrated professional interest and involvement, a 3.0 institutional cumulative GPA, a minimum grade of C in all major core requirements, and a student portfolio. Students must maintain the 3.0 minimum cumulative GPA requirement and a grade of C or better in all major core requirements throughout the remainder of the program.

COMPUTER REQUIREMENTS

All students are required to purchase a laptop computer prior to starting the program. Students **must be in compliance** with the computer requirements posted on the program website. Computers failing to be in compliance will not be supported.

Accreditation

The interior design program at NDSU is accredited by the Council for Interior Design Accreditation (CIDA) and received re-accreditation in 2024. The program is also accredited by the National Association of Schools of Art and Design (NSAD).

Career Opportunities

Three main career paths are typically chosen by the design professional include residential, commercial, and specialized design. Residential design includes kitchen and bath design, renovation for physically challenged, model homes or historical restoration. Commercial design includes corporate and executive offices, healthcare, retail facilities, institutional transportation, and hospitality and entertainment venues. Other areas of specialty design include lighting, codes, universal design, adaptive reuse, product design or product representation.

Opportunities for NDSU graduates vary according to the geographic area of practice and the responsibilities of specific positions. Recent graduates have accepted entry-level positions with starting salaries as high as $50,000 (Minneapolis).

Extra-Curricular Opportunities

NDSU students participate locally in the student chapter of the American Society of Interior Designers (ASID). Students also have the opportunity to participate in the North Dakota Interior Designers (NDID) organization. A number of professionals visit campus each year to present programs and informational seminars to students. Trips are planned to design studios, architectural firms and product markets to supplement course work. NDSU interior design students are encouraged to enter design competitions and have experienced a very high success rate.

The Facilities

NDSU facilities and instructional amenities are among the finest in the Upper-Midwest. The Interior Design Resource Center is well equipped with current samples and a virtual product library. Studios provide individual workstations and tools necessary to complete successful design solutions.

The Faculty

NDSU faculty hold terminal degrees in interior design or related fields and have been selected because of their individual and collective experience as interior designers and their commitment to teaching. All hold memberships in professional design-related organizations.

Introductory Curriculum

A suggested curriculum is provided. Other general education combinations are possible, but the eight sequential semesters beginning with the fall term of interior design courses cannot vary from this plan. Students who plan to transfer to NDSU should contact the Interior Design Program Coordinator for guidance in selecting courses before or during the first-year sequence.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

One of the following minors is required: Art; Business; Apparel, Retail Merchandising and Design; Foreign Language (French, German, Spanish); History; Gerontology; Emergency Mangement; Psychology, Natural Resource Managment; other minor options may be approved by interior design faculty. (Total credits required to complete minors will vary).		16
Total Credits		**83**

Degree Requirements and Notes

- Course taken *Pass/Fail* will not be used to satisfy any requirements other than total credits.

Journalism

Department Information

- **Department Web Site:**
  www.ndsu.edu/communication/ (http://www.ndsu.edu/communication/)
- **Credential Offered:**
  B.S.; B.A.; Minor

- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/journalism/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/journalism/)

Journalism is one of four majors offered by the Department of Communication. Students are trained in both print and broadcast journalism. The program has a strong emphasis on cross-platform reporting and multi-media storytelling.

Why Choose a Major in the Department of Communication?

Our students pursue degrees in Communication because they are interested in fast-paced careers where every day brings something new. They want to make a difference in the world while doing something they love – whether that's reporting breaking news, designing advertisements, running social media campaigns, promoting organizations, or leading others in the workplace.

As a Journalism major, you will get:

- **More time to explore your interests.** We give you the first year to explore your options, making it possible to switch between **four different COMM majors** without extending your graduation timeline.
- **Guidance on choosing a career.** In COMM 101: Majors and Careers in Communication, you will meet others in your major, learn more about possible careers, and find campus resources that help you achieve your professional goals.
- **Hands-on learning.** You'll have multiple ways to apply what you are learning through course projects, consulting for local organizations, and participating in national competitions.
- **Built-in communities.** You can connect with other students - while building your resume - through the **eight student organizations** affiliated with our department.
- **Professional experience.** We help you find and benefit from internships in your field through our relationships with local and regional employers.

Journalism Major

Students majoring in journalism may earn a Bachelor of Arts degree (with intermediate-level language proficiency) or a Bachelor of Science degree (with recommended minor or certificate).

Admission to the Major

Students are admitted to the journalism major after completing 18 credits of pre-communication courses: COMM 110, COMM 112, COMM 114, COMM 212, COMM 220, and ENGL 120.

Internship Requirement

Internships offer practical experience for journalism students. Three credits (120 hours) of field experience are required for the major, and many students complete more than one internship. Students have interned with a variety of media companies in the Fargo-Moorhead area and beyond. Internships often lead to jobs.

Career Opportunities

Coursework in the journalism major prepares students for careers in news reporting, media writing, broadcast writing, and broadcast production. The courses emphasize written and oral communication skills and prepare students to communicate in meaningful and effective ways with a variety of audiences.

Extra-Curricular Activities

Students majoring in journalism are encouraged to gain additional experience by working with the Bison Information Network (television), KNDS-96.9 (radio), or The Spectrum (print). NDSU has two honoraries for top students majoring in a degree program offered by the Department of Communication. Pi Kappa Delta is a national honor fraternity for students involved in human communication activities. Lambda Pi Eta is a national honorary for communication majors with high academic achievement.

High School Preparation

A well-rounded high school education with experiences in high school music, forensics, theater, newspaper, or yearbook serves as good preparation for a major in journalism. Students with interests in science and art, business and service, and publicity and promotion will find a major in this department to be a good fit.

Scholarships

The Department of Communication awards a number of scholarships to students who excel in academics and who have demonstrated career potential. Applications are due by March 1. Visit **the department website** for details.

The Faculty

Faculty members in the Department of Communication are dedicated teachers, scholars, and practitioners who are committed to providing high-quality courses, hands-on learning experiences, and opportunities for undergraduate research.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Journalism

Degree Type: B.A. or B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/landscape-architecture/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/landscape-architecture/)

The landscape architecture minor is a project-based course of study introducing students to designing outdoor spaces. The core courses cover topics from architectural drawing fundamentals, the history of Landscape Architecture, digital tools, and an intensive design studio where you apply this knowledge to a garden or park project. This minor aligns most closely with horticulture, interior design, and architecture but is open to all majors.

1

Must be approved by department advisor.

Minor Requirements and Notes:

- A minimum of 8 credits must be taken at NDSU.
- Students must earn a minimum 2.00 GPA for the minor requirements.
- This minor can only be earned by students pursuing a Veterinary Technology major.

Management

Department Information

- **Department Web Site:**
  www.ndsu.edu/business/ (http://www.ndsu.edu/business/)
- **Credential Offered:**
  B.S.

- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/management/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/management/)

The management curriculum has been carefully designed to inspire and enable students to meet the demand of today's business and organizational landscapes. Management is an exciting and ever-developing field, and our students are supported by curriculum that fosters critical thinking, interpersonal and communication skills, leadership, analytic skills, and global awareness. A success measure of our management program is the successful placement of our graduates in business, industry, and non-profit organizations, in tandem with their enhanced abilities to plan, organize, work as a team, and make sound decisions.

Background Information

The Association to Advance Collegiate Schools of Business (AACSB International) accredits the undergraduate and graduate programs in the College of Business at North Dakota State University (NDSU). Our College of Business is one of only two AACSB-accredited schools of business in North Dakota.

AACSB International is one of higher education's most prestigious and rigorous accrediting bodies, emphasizing a commitment to continuous improvement, innovation, engagement, and impact in business education. Less than 10 percent of business programs worldwide have this accreditation, highlighting the academic excellence of our College of Business at NDSU.

The Program

The Management major is a four-year program with a curricular blend of general education, pre-major course work, fundamental business knowledge (accounting, finance, management, marketing, and information systems), international exposure, and in-depth management-specific courses. Students pursuing a Management major can also choose the Human Resource Management track or Supply Chain Management track to advance their field-specific skills and knowledge. The program nurtures important business skills and managerial competencies including planning, organizing, problem-solving, analytical ability, communication, teamwork, and leadership. Management students are thus prepared to lead and perform in evolving landscapes of business enterprises and non-profit organizations.

Selective Admission

Students who wish to study management at NDSU enroll as pre-management students in the College of Business for the first semester of their freshman year. Admission to the major requires the successful completion of the pre-major course requirements (ENGL 120, COMM 110, MATH 144, ECON 201 or 202, and PSYC 111 or SOC 110) and a minimum cumulative grade point average (GPA) of 2.50. Transfer students may also be eligible for immediate admission in the major. Contact a College of Business professional advisor for more information.

The Faculty

To provide a rigorous and relevant educational experience to our students, faculty in our program are highly qualified in their respective areas of expertise. Our faculty have been recognized for their teaching excellence by their students and colleagues and for their outstanding research by their peers. They employ a wide variety of instructional techniques and embed both classical and cutting-edge knowledge into their classes. They remain current in their fields by actively engaging in research and/or with firms and business professionals regarding their management practice, business challenges and issues.

The Practicum/Internship

Management majors are encouraged to complete practicum experiences, ideally at the end of sophomore and junior years. The practicum is designed to enable our students to connect management concepts learned in the classroom with live business situations and to broaden their horizons beyond the classroom setting. The practicum also gives students a competitive edge in job placement.

Career Opportunities

Graduates with a management major have career opportunities in business, industry, government service, and the non-profit sector, both regionally and globally. Employment opportunities for management majors are significant as the management function exists in every type of business and organization, whether manufacturing or service, small- or large-sized, for-profit or not-for-profit. Major job categories include human resources, supply chain/operations, project management, product/service management, and general management.

The College

In addition to the management major, the College of Business offers undergraduate majors in accounting, business administration, finance, global business (second major only), marketing, management information systems, and supply chain management, as well as several minors and certificates. Full details about minors and certificates can be found at https://www.ndsu.edu/business/programs/undergraduate/. The College of Business also offers six graduate programs including Master of Business Administration, MBA in Agribusiness, Master of Accountancy, Master of Science in Business Analytics, Master of Supply Chain Management, and a Doctorate in Transportation and Logistics, as well as several graduate certificates. Full details about graduate certificate programs can be found at https://www.ndsu.edu/business/programs/graduate/graduate_certificates/.

High School Preparation

It is recommended that high school students interested in studying management at the university level take mathematics courses at least through pre-calculus. High school electives in the social sciences, communication, and English also would be beneficial. Students who have satisfactorily completed Advanced Placement courses in Calculus, Economics, English, Communication, and Psychology or Sociology may be immediately eligible for admission to the major. Please speak with a professional advisor in the College of Business for more information.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

MGMT 440	International Management	
MRKT 440	International Marketing	
Total Credits		**93**

1

Take the other course not taken for the pre-major requirement.

2

Denotes Common Body of Knowledge (CBK) course.

Degree Requirements and NoteS

- Students follow the published curricula for the management program of study from the semester/year of entrance in the College of Business (CoB) to graduation provided enrollment at NDSU has not been discontinued for more than one year. Students who change their major are subject to meeting the curricular requirements in effect at the time the new major is declared.
- The CoB accepts a maximum of up to (but not including) 50% of upper-division (300-level and 400-level) business courses[1] required for degree completion, with a minimum grade of C[2]. All transfer courses are subject to approval by the course discipline chair or designated representative.
  a. Defined as courses with the following prefixes: ACCT, BUSN, ENTR, FIN, MGMT, MIS, MRKT, SCM
  b. Credits that do not qualify for degree completion will still be accepted as general credits toward graduation, within the restrictions defined by university transfer policy.
- A grade of 'C' or better is required in transfer courses accepted for all accounting, business administration, finance, management, management information systems, and marketing courses.
- No courses for the major may be taken with Pass/Fail grading.
- Of the credits completed in residence at least 30 credits must be in 300-400 level CoB courses.
- Students must be accepted to the Management major prior to the completion of the last 30 credits in 300 and 400 level CoB courses.
- A Business Administration minor is NOT offered with this major.
- For multiple majors within the CoB, at least 15 unique credits of 300-400 level CoB courses must exist between the majors.
- Internship and cooperative education credits may be applied toward the total credits required for graduation as non-major electives or 300-400 level electives not used in pre-major categories.
- Student may choose to take the Human Resource Management Track or the Supply Chain Management Track within the Management major:

Human Resources Management Track

Code	Title	Credits
MGMT 452	Compensation Management	3
Select two of the following:		6

Management Communication

Department Information

- **Department Web Site:**
  www.ndsu.edu/communication/ (http://www.ndsu.edu/communication/)
- **Credential Offered:**
  B.S.; B.A.; Minor
- **Official Program Curriculum:**

catalog.ndsu.edu/undergraduate/program-curriculum/management-communication/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/management-communication/)

Management Communication is one of four majors offered by the Department of Communication. Students study various communication techniques necessary for success in the workplace, including organizational communication, risk and crisis communication, leadership communication, team-based communication, and conflict communication.

Why Choose a Major in the Department of Communication?

Our students pursue degrees in Communication because they are interested in fast-paced careers where every day brings something new. They want to make a difference in the world while doing something they love – whether that's reporting breaking news, designing advertisements, running social media campaigns, promoting organizations, or leading others in the workplace.

As a Management Communication major, you will get:

- **More time to explore your interests.** We give you the first year to explore your options, making it possible to switch between **four different COMM majors** without extending your graduation timeline.
- **Guidance on choosing a career.** In COMM 101: Majors and Careers in Communication, you will meet others in your major, learn more about possible careers, and find campus resources that help you achieve your professional goals.
- **Hands-on learning.** You'll have multiple ways to apply what you are learning through course projects, consulting for local organizations, and participating in national competitions.
- **Built-in communities.** You can connect with other students - while building your resume - through the **eight student organizations** affiliated with our department.
- **Professional experience.** We help you find and benefit from internships in your field through our relationships with local and regional employers.

Management Communication Major

A major in management communication trains students to be effective managers and leaders in corporate or non-profit environments. Students will complete an applied capstone course in their final semester. Students majoring in management communication may earn a Bachelor of Arts degree (with intermediate-level language proficiency) or a Bachelor of Science degree (with recommended minor or certificate).

ADMISSION TO THE MAJOR

Students are admitted to the management communication major after completing 18 credits of pre-communication courses: COMM 110, COMM 112, COMM 114, COMM 212, COMM 220, and ENGL 120.

Internship Requirement

Internships offer practical experience for management communication students. Three credits (120 hours) of field experience are required for the major, and many students complete more than one internship. Students have interned with a variety of private companies, non-profit organizations, and government agencies. Internships often lead to jobs.

Career Opportunities

Coursework in the management communication major prepares students for careers in college admissions, corporate training, consulting, human resource administration, organizational communication, and project management. The coursework emphasizes written and oral communication skills and prepares students to communicate in meaningful and effective ways with a variety of audiences.

Extra-Curricular Activities

Students majoring in management communication are encouraged to join the Management Communication Club for undergraduate research and consulting opportunities. They may also be interested in joining the department's chapter of the Public Relations Student Society of America (PRSSA). NDSU has two honoraries for top students majoring in a degree program offered by the Department of Communication. Pi Kappa Delta is a national honor fraternity for students involved in human communication activities. Lambda Pi Eta is a national honorary for communication majors with high academic achievement.

High School Preparation

A well-rounded high school education with experiences in high school music, forensics, theatre, journalism, student government, or scouting serves as good preparation for the management communication major. Students with interests in science and art, business and service, and publicity and promotion will find a major in this department to be a good fit.

Scholarships

The Department of Communication awards a number of scholarships to students who excel in academics and who have demonstrated career potential. Applications are due by March 1. Visit **the department website** for details.

The Faculty

Faculty members in the Department of Communication are dedicated teachers, scholars, and practitioners who are committed to providing high-quality courses, hands-on learning experiences, and opportunities for undergraduate research.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Management Communication

Degree Type: B.A. or B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits

Minor Requirements and Notes

- A minimum of 9 credits must be taken at NDSU.

Management Information Systems

Department Information

- **Department Web Site:**
  www.ndsu.edu/business/ (http://www.ndsu.edu/business/)
- **Credential Offered:**
  B.S.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/management-information-systems/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/management-information-systems/)

The management information systems (MIS) program is designed for those students who wish to prepare themselves for professional careers in information processing or information systems in business and government. The program develops technical skills and administrative insights required for the design, analysis, development, implementation, maintenance, and management of organizational information systems.

Background Information

MIS emphasizes the collection, organization, analysis, and dissemination of information for the planning and control of organizational operations. The program prepares graduates to manage various forms of information technology that are used at all levels of operations. The student learns how to analyze, design, implement, and manage information technology and computer systems in innovative ways to increase the effectiveness and efficiency of an organization.

Another objective of the program is to provide students with both theoretical knowledge and hands-on experience. The program requires a practicum. Practical experience enables graduates to become productive in any setting more quickly. Further, hands-on experience provides excellent motivation and concrete models for advanced course work. Graduates of the program find employment in a wide variety of settings.

The Program

North Dakota State University's MIS program is a unique collaborative effort by the faculty of two distinct disciplines: business administration and computer science. The Bachelor of Science degree provides sufficient background and skills to support a successful career in technical computing (e.g., as a programmer, systems analyst, systems designer, etc.), systems or network administration, database administration, information technology management, sales or technical sales support.

Selective Admission

Students who wish to study MIS at NDSU enroll as pre-MIS majors in the College of Business for the first semester of their freshman year. Pre-MIS majors are then admitted into the major after completing the pre-major courses (i.e., ENGL 120, COMM 110, MATH 144, ECON 201 or ECON 202, and PSYC 111 or SOC 110) with at least a C or higher and earning a cumulative GPA of at least 2.50. Transfer students with appropriate course work may be admitted directly into the major. Contact a professional advisor in the College of Business for more information.

Computing Facilities

The computer facilities at NDSU are among the best in the country. The Quentin Burdick Building (QBB) houses the academic host server for the North Dakota University System's 11 colleges and universities and their 48,000 students. Faculty, staff and students may use a variety of computing systems ranging from multi-user host systems to microcomputers, all connected on a 100 MB, full-duplex, fiber-optic high-speed campus network, a high-speed statewide network and then onto the Internet. The campus network is the largest network in the state, consisting of over 6,500 data ports in 35 buildings. Wireless access is available in most campus buildings, including residence halls, and in two outdoor green spaces.

Open access microcomputer labs are located in 26 buildings on the campus. These labs house 495 PCs and 65 Macintosh computers along with printers and scanners. Some of these labs are open 24 hours a day. The computers are equipped with the most commonly used software, e.g., Microsoft Office, Adobe Photoshop, AutoCad, SPSS, etc. Students can use these computers as stand-alone workstations, to access host systems, or to communicate via the Internet with other students and professionals throughout the world. These labs are open to all students at NDSU. All

residence halls are wired to the campus network, making it easy for students with computers to access remote information for course work and various investigations.

In addition to the open access microcomputer labs, the MIS program and the computer science department maintain two special-purpose labs housing approximately 170 computers for use by the students in their respective programs. These labs include a computer structures and networking laboratory, and a network and server laboratory.

NDSU has assumed a leadership role in computer networking as part of a six-state consortium for extremely high-level networking in the Upper Midwest and connectivity to the National Science Foundation supercomputer centers. NDSU is a charter member of Internet 2 and has connectivity with the national vBNS research network.

NDSU also houses a Center for High Performance Computing (CHPC) that provides access to secure, advanced scientific computing resources. The CHPC is a member of the Coalition of Academic Scientific Computation, a nonprofit organization of supercomputing centers and research universities that offer leading edge hardware, software, and expertise in high performance computing resources.

Career Opportunities

MIS professionals play a key role in an organization by managing various types of technology and information systems to increase the effectiveness and efficiency of the organization. As an MIS specialist, one might choose a job in business, education, research, agriculture, or government. This work may be in the technology-oriented areas such as systems analysis, database management, telecommunications/networks, and design and development of new computer systems, or in the business analytics areas such as data science and business data analysis. The Federal Bureau of Labor Statistics expects job opportunities in information systems to be a very attractive career path in the foreseeable future.

High School Preparation

It is recommended that high school students interested in studying MIS at the university level take the maximum number of math courses offered at the high school level. High school electives in the social sciences, English and communication also would be of benefit. Please speak with a professional advisor in the College of Business for more information.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. Denotes Common Body of Knowledge (CBK) course.

[2]

Students will complete one economics course for the pre-major and the other economics course once admitted to the major.

Degree Requirements and Notes

- All courses for the pre-major and major require a grade of C or better.
- Students follow the published curricula for the Management Information Systems program of study from the semester/year of entrance in the College of Business to graduation provided enrollment at NDSU has not been discontinued for more than one year. Students who change their major are subject to meeting the curricular requirements in effect at the time the new major is declared.
- The CoB accepts a maximum of up to (but not including) 50% of upper-division business courses* required for degree completion, with a minimum grade of C**. All transfer courses are subject to approval by the course discipline chair or designated representative.
  - * Defined as courses with the following prefixes: ACCT, BUSN, ENTR, FIN, MGMT, MIS, MRKT, SCM
  - ** Credits that do not qualify for degree completion will still be accepted as general credits towards graduation, within the restrictions defined by university policy.
- Students must earn a 2.50 institutional GPA to graduate.
- Admission to the MIS major is required to enroll in the advanced 300 or 400 level courses in the CoB.
- A letter grade must be earned in any course that fulfills a major requirement (with the exception of some practicum options).
- Of the credits completed in residence at least 30 credits must be in 300-400 level CoB courses.
- Students must be accepted to the MIS major prior to the completion of the last 30 credits in 300 and 400 level CoB courses.
- Students are not eligible for a Business Administration minor with this major.
- For multiple majors within the CoB, at least 15 unique credits of 300-400 level CoB courses must exist between the majors.
- Prerequisite for Management Information Systems Practicum: MIS 320 with a grade of C or better.

Minor Requirements

Minor: Management Information Systems

Required Credits: 18

Code	Title	Credits
Requirements		
TL 116	Business Software Applications	3

MIS 320	Management Information Systems	3
MIS 315	System Analysis and Design	3
MIS 375	Database Design for Business Application	3
or CSCI 366	Database Systems	
MIS 376	Data and Telecommunications Administration	3
or CSCI 459	Foundations of Computer Networks	
Select any 300-400 level MIS course or one of the following:		3
ACCT 420	Accounting Information Systems	
CSCI 122	Visual BASIC	
CSCI 160	Computer Science I	
CSCI 161	Computer Science II	
CSCI 172	Intermediate Visual BASIC	
CSCI 213	Modern Software Development	
CSCI 227	Computing Fundamentals in Python I	
CSCI 228	Computing Fundamentals in Python II	
CSCI 312	Survey of Programming Languages	
Total Credits		**18**

Minor Requirements and Notes

- Students should refer to www.ndsu.edu/business (https://www.ndsu.edu/business/) for information on declaring the minor with the College of Business (CoB).
- To be accepted into the minor program, students must have a 2.50 institutional cumulative GPA. To complete a minor, students must earn at least a 2.50 GPA that is based on the courses used to satisfy the minor requirements. Courses may not be taken pass/fail.
- If the cumulative GPA falls below the 2.50 after acceptance into the program, the student will not be allowed to register for the CoB courses until the cumulative GPA returns to 2.50 or above.
- Students are subject to the minor requirements in effect during the year in which the minor was approved.
- Minors must satisfy all course prerequisites.
- Approval for a minor does not guarantee enrollment in specific courses.
- Graduation with a minor in Management Information Systems requires a grade of 'C' or better in all courses required for the minor.

Managerial Psychology

Department Information

- **Department Web Site:**
  www.ndsu.edu/psychology/ (http://www.ndsu.edu/psychology/)
- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/managerial-psychology/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/managerial-psychology/)

The Department of Psychology offers a managerial psychology minor that fills the need of many students who want essential training in behavior relevant to management in organizations which would help them in their professional careers as well as personal lives. The minor follows a number of themes important for NDSU students' in their future working lives: (1) managerial behavior derived from learning self-management, (2) managerial behavior derived from knowing and understanding others, and their diversity, (3) learning the broad implications of psychology for working with others, (4) recognizing the judgment, problem solving, and decision making foundation of managerial behavior, and (5) developing an understanding of the intrapersonal, interpersonal and organizational contexts of managerial behavior.

Mangerial Psychology

Required Credits: 18

Code	Title	Credits
PSYC 111	Introduction to Psychology	3
PSYC 211	Introduction To Behavior Modification	3
or PSYC 311	Behavior Management and Change	
PSYC/SOC 214	Social Interaction	3
or PSYC 216	Cultural Psychology	
PSYC 221	Psychology Applied to Work	3
PSYC 322	Judgment & Decision-Making	3
PSYC 453	Organizational Psychology	3
or PSYC 457	Managing Work Motivation and Morale	
Total Credits		**18**

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.

Manufacturing Engineering

Department Information

- **Department Web Site:**
  www.ndsu.edu/ime/ (http://www.ndsu.edu/ime/)
- **Credential Offered:**
  B.S.Mfg.E.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/manufacturing-engineering/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/manufacturing-engineering/)

Manufacturing engineers play a vital role in shaping the world around us, as their work is intrinsically linked to the production of goods. In the routines of daily life, whether at home, work, or during moments of recreation, nearly every item encountered is a result of manufacturing. Defined professionally, manufacturing occurs when the shape, form, or properties of a material are altered in a way that adds value. Manufactured goods are everywhere: aircraft structures, machinery, electronics, medical devices, automobile parts, household products, toys, textiles and clothing, cans and bottles, among others. In essence, manufactured goods permeate every facet of daily existence.

The Profession

In the modern landscape, where everything relied upon is manufactured, businesses turn to manufacturing engineers for the design, direction, and coordination of processes that bring products to fruition. As industries try to improve products and lower costs, manufacturing engineers are at the forefront, applying scientific principles to enhance the productions of goods. They are key team members across diverse sectors, from automobiles and electronics to food products and recreational equipment, and more. In all cases, manufacturing engineers design the processes and systems to make products with the required functionality, to high quality standards, available when and where customers prefer, at the best possible price and in ways that are environmentally friendly.

The Program

Manufacturing engineering is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org, under the commission's General Criteria and Program Criteria for Manufacturing and Similarly Named Engineering Programs. As graduates of the Manufacturing Engineering Program, individuals acquire the skills to design systems and processes that improve the quality and productivity of an organization's operations. Armed with a solid foundation in fundamental engineering and management principles, they effectively integrate people, technology, machines, and financial resources to create positive change, ensuring the optimal production of goods.

Motivated undergraduate students within the program have the opportunity to explore an accelerated degree path. The IME department offers an accelerated Master of Engineering program. The advantage to this non-thesis, project-based degree option lies in the application of pre-established

coursework at the 600 level to be applied to both degrees, offering a graduate degree in only one additional year beyond the undergraduate degree. The program includes 30 credits of graduate classes in addition to a written examination. To be eligible for admission to the graduate school and pursue the Master of Engineering accelerated program, students must have completed a minimum of 60 credits and maintained a cumulative GPA of 3.0 or higher.

Faculty and Facilities

Currently housed in the Engineering Building, part of an eight-building engineering complex, the department is equipped with seven laboratories designed for both teaching and research, catering to the diverse educational and research requirements of students. These specialized laboratories cover a range of areas including computer simulation, human factors, automation and robotics, additive manufacturing and biomanufacturing, computational modeling, bioinformatics and operations research, PLC's, manufacturing/fabrication processes, rapid prototyping, CNC machining, and microfabrication, as well as welding and precision manufacturing. In the fall of 2026, NDSU's College of Engineering is set to open the new Richard Offerdahl '65 Engineering Complex. This cutting-edge facility will feature state-of-the-art research and learning spaces, equipping future engineers to meet the ever-changing demands of both the University and industry for generations to come.

The IME faculty and staff members in the department have extensive experience in industrial and manufacturing specialties. The IME faculty and staff are dedicated to personally knowing each student, recognizing their strengths, understanding potential challenges, and providing support whenever necessary. Upon graduation from NDSU, students will have developed excellent capabilities for career success, the confident ability for lifelong personal growth, and a network of friends and professional colleagues.

Career Opportunities

The IME programs at NDSU open doors to diverse career opportunities or to seek advanced degrees at NDSU or another institution. The IME programs help students develop a strong base in general education and engineering fundamentals, providing the foundation for a wide range of career options and facilitate lifelong growth. These programs also equip students with industry-standard skills, opening doors to many career opportunities with financial rewards and professional success. Manufacturing engineering graduates have become a source of talent working in industries that produce such products as biomedical devices, transportation and construction equipment, and aircraft and spacecraft. Recent IME graduates earn starting salaries in the top rank of engineering disciplines. According to Payscale.com, the current national average starting salary for manufacturing engineers is $76, 452. (https://www.payscale.com/research/US/Job=Manufacturing_Engineer/Salary (https://www.payscale.com/research/US/Job=Manufacturing_Engineer/Salary/)).

Transfer Admission

Students who transfer with an AA or AS degree have lower-division general education credits satisfied.

Scholarship and Financial Aid

The Department of Industrial and Manufacturing Engineering offers several scholarships annually. Scholarships are available for incoming freshman, transfer students, and currently enrolled students. Other forms of financial aid are available through the Office of Financial Aid and Scholarships.

Selective Admission

Transfer students are required to have a minimum grade point average of 2.3.

MANUFACTURING Engineering Minor

Students majoring in any engineering discipline may elect a minor in Manufacturing Engineering. These optional studies offer engineering students the opportunity to add important career-enhancing skills to their technological competencies. The total requirement for the minor is 18 credits (12 credits are required courses and 6 credits are approved electives).

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

DEGREE NOTES:

- Grades less than 'C' will not be accepted for required courses in CHEM, MATH, and PHYS.
- Students may request approval for other 300-400 level engineering or related courses to be approved as technical electives. To request approval, a student should submit a request to the IME Department indicating the course of interest and why the course should be approved as a technical elective. This request will be reviewed by the IME Department Chair for approval.
- 300-400 level BUSN courses require at least junior standing and a minimum 2.50 cumulative GPA.

Manufacturing Engineering

Department Information

- **Department Web Site:**
  www.ndsu.edu/ime/ (http://www.ndsu.edu/ime/)
- **Credential Offered:**
  B.S.Mfg.E.; Minor

- **Sample Program Guide:**
  catalog.ndsu.edu/programs-study/undergraduate/manufacturing-engineering/#planofstudytext (http://catalog.ndsu.edu/programs-study/undergraduate/manufacturing-engineering/#planofstudytext)

Major Requirements

Major: Manufacturing Engineering

Degree Type: B.S.Mfg.E.
Minimum Degree Credits to Graduate: 129

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

CHEM 122	General Chemistry II (May satisfy general education category S)	3
ENGL 321	Writing in the Technical Professions (May satisfy general education category C)	3
ENGR 327	Ethics, Engineering, and Technology	3
PHYS 252 & 252L	University Physics II and University Physics II Laboratory (May satisfy general education category S)	5
Manufacturing Electives		
Computer Science Electives: Select 3 credits from the following:		3
CSCI 122	Visual BASIC	
CSCI 159	Computer Science Problem Solving	
CSCI 160	Computer Science I	
CSCI 227	Computing Fundamentals in Python I	
ECE 173	Introduction to Computing	
Engineering and Science Electives: Select a minimum of 9 credits from the following:		
CE 309	Fluid Mechanics	3
ME 350	Thermodynamics and Heat Transfer	3
Select one of the following:		3-4
EE 206	Circuit Analysis I	
ECE 275	Digital Design	
ECE 301	Electrical Engineering I	
Technical Electives: Select 9 credits from the following:		**9**
IME 335	Welding Technology	
IME 411	Human Factors Engineering	
IME 427	Packaging for Electronics	
IME 432	Composite Materials Manufacturing	
IME 433	Additive Manufacturing	
IME 435	Plastics and Polymer Processing in Manufacturing	
IME 437	Methods for Precision Manufacturing	
IME 450	Systems Engineering and Management	
IME 451	Logistics Engineering and Management	
IME 453	Hospital Management Engineering	
IME 462	Total Quality In Industrial Management	
IME 463	Reliability Engineering	
IME 464	Reliability Analysis	

IME 465	Introduction to Machine Learning
IME 470	Operations Research I
IME 472	Simulation of Business and Industrial Systems
IME 485	Industrial and Manufacturing Facility Design
Only one of the following five courses may be counted as technical electives.	
BUSN 340	International Business
BUSN 431	Business Law I-Contracts, Property and Torts
MGMT 320	Foundations of Management
MRKT 320	Foundations of Marketing
MIS 320	Management Information Systems
Total Credits	**109-110**

Degree Requirements and Notes

- Grades less than 'C' will not be accepted for required courses in CHEM, MATH, and PHYS.
- Students may request approval for other 300-400 level engineering or related courses to be approved as technical electives. To request approval, a student should submit a memo to the IME Department indicating the course of interest and why the course should be approved as a technical elective. This memo will be reviewed by the IME Department Chair for approval.
- 300-400 level BUSN courses require at least junior standing and a minimum 2.50 cumulative GPA.

Minor Requirements

Minor: Manufacturing Engineering

Required Credits: 18

Code	Title	Credits
Required Courses		
IME 330	Manufacturing Processes	3
IME 380	CAD/CAM for Manufacturing	3
IME 430	Process Engineering	3
IME 431	Production Engineering	3
Electives: Select 6 credits from the following:		**6**
IME 335	Welding Technology	
IME 427	Packaging for Electronics	
IME 432	Composite Materials Manufacturing	
IME 433	Additive Manufacturing	
IME 435	Plastics and Polymer Processing in Manufacturing	
IME 437	Methods for Precision Manufacturing	
IME 461	Quality Assurance and Control	
IME 465	Introduction to Machine Learning	
IME 482	Automated Manufacturing Systems	
Total Credits		**18**

Minor Requirements and Notes

- A minimum of 9 credits must be taken at NDSU.
- Only students majoring in an engineering discipline or with department permission agricultural or physical science majors may elect a minor in Manufacturing Engineering.

Marketing

Department Information

- **Department Web Site:**
  www.ndsu.edu/business/ (http://www.ndsu.edu/business/)
- **Credential Offered:**
  B.S.

- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/marketing/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/marketing/)

Marketing is a primary function of organizations to ensure the needs of customers and external constituents are met. The marketing curriculum is carefully designed to ensure students have understanding of how to successfully manage products, price, place and promotion, and have analytical and interpersonal skills. A success measure of our marketing program is the successful placement of our graduates in business, industry, and non-profit organizations, in tandem with their enhanced abilities to manage marketing mix, analyze markets, work as a team, and make sound decisions.

Background Information

The Association to Advance Collegiate Schools of Business (AACSB International) accredits the undergraduate and graduate programs in the College of Business at North Dakota State University. Our College of Business is one of only two AACSB-accredited schools of business in North Dakota.

AACSB International is one of higher education's most prestigious and rigorous accrediting bodies, emphasizing a commitment to continuous improvement, innovation, engagement, and impact in business education. Less than 10 percent of business programs worldwide have this accreditation, highlighting the academic excellence of our College of Business at NDSU.

The Program

The Marketing major is a four-year program available in a traditional face-to-face format or fully online. It comprises a curricular blend of general education, pre-major course work, fundamental business knowledge (accounting, finance, management, marketing, and information systems), international exposure, and in-depth marketing-specific courses. Students in the Marketing major can also choose the Supply Chain Management track or pursue the Certificate in Professional Selling to advance their field-specific skills and knowledge. The program nurtures important business skills and marketing competencies including managing marketing mix (price, product, promotion, and place), analytical ability, interpersonal skills, and teamwork. Marketing students are thus prepared to perform the marketing function and activities in business enterprises and non-profit organizations.

Selective Admission

Students who wish to study marketing at NDSU enroll as pre-marketing students in the College of Business for the first semester of their freshman year. Admission to the major requires the successful completion of the pre-major course requirements (ENGL 120, COMM 110, MATH 144, ECON 201 or 202, and PSYC 111 or SOC 110) and a minimum cumulative grade point average (GPA) of 2.50. Transfer students may also be eligible for immediate admission in the major. Contact a College of Business professional advisor for more information.

The Faculty

To provide a rigorous and relevant educational experience to our students, faculty in our program are highly qualified in their respective areas of expertise. Our faculty have been recognized for their teaching excellence by their students and colleagues and for their outstanding research by their peers. They employ a wide variety of instructional techniques and embed both classical and cutting-edge knowledge into their classes. They remain current in their fields by actively engaging in research and/or with firms and business professionals regarding their marketing practice, business challenges and issues.

The Practicum/Internship

Marketing majors are encouraged to complete practicum experiences, ideally at the end of sophomore and junior years. The practicum is designed to enable our students to connect marketing concepts learned in the classroom with live business situations and to broaden their horizons beyond the classroom setting. The practicum also gives students a competitive edge in job placement.

Career Opportunities

Graduates with a marketing major have career opportunities in business, industry, government service, and the non-profit sector, both regionally and globally. Employment opportunities for marketing majors are significant as the marketing function exists in every type of business and organization, whether for-profit or not-for-profit. Major job categories include sales, retailing, product/service management, advertising and promotion, and market research.

High School Preparation

It is recommended that high school students interested in studying marketing at the university level take mathematics courses at least through pre-calculus. High school electives in the social sciences, communication, and English also would be beneficial. Students who have satisfactorily completed Advanced Placement courses in Calculus, Economics, English, Communication, and Psychology or Sociology may directly apply for admission to the major. Please speak with a professional advisor in the College of Business for more information.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†
General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Code	Title	Credits
All courses taken for the Marketing Major require a grade of C or better. A minimum 2.5 cumulative GPA is required for admission to the major program, to enroll in 300-400 level courses, and to graduate.		
Pre-Major Requirements		
COMM 110	Fundamentals of Public Speaking	3
ECON 201	Principles of Microeconomics [1]	3
or ECON 202	Principles of Macroeconomics	
ENGL 120	College Composition II	3
MATH 144	Mathematics for Business	4
PSYC 111	Introduction to Psychology [1]	3
or SOC 110	Introduction to Sociology	

Marketing Major Requirements		
ACCT 200	Elements of Accounting I	3
ACCT 201	Elements of Accounting II	3
TL 116	Business Software Applications	3
PHIL 216	Business Ethics	3
STAT 330	Introductory Statistics	3
STAT 331	Regression Analysis	2
ECON 201	Principles of Microeconomics [1]	3
or ECON 202	Principles of Macroeconomics	
PSYC 111	Introduction to Psychology [1]	3
or SOC 110	Introduction to Sociology	
ENGL 320	Business and Professional Writing	3
Admission to the major program required prior to taking the following courses:		
FIN 320	Principles of Finance [2]	3
MGMT 320	Foundations of Management [2]	3
MRKT 320	Foundations of Marketing [2]	3
MIS 320	Management Information Systems [2]	3
BUSN 430	Legal and Social Environment of Business [2]	3
BUSN 489	Strategic Management (Capstone Course) [2]	3
MRKT 410	Consumer Behavior	3
MRKT 450	Marketing Research	3
MRKT 460	Marketing Strategy	3
Marketing Elective Courses		
A. Select 300-400 level courses from current MRKT prefix courses. [3]		12
B. Select 300-400 level courses from within the CoB, Prefixes of BUSN, MGMT, FIN, ACCT, MIS, ENTR (includes courses cross-listed with CoB courses) as well as SCM 320, SCM 460, and SCM 462. [3]		9
C. This 300-400 level elective can be external to the CoB and must be satisfied with a single 3-credit 300-400 level course (includes courses cross-listed with CoB courses). It cannot be used to satisfy other requirements. [3]		3
3: At least one of the following international courses must be included in the plan of study and can count in one of the marketing 300-400 level elective areas:		
BUSN 340	International Business	
BUSN 341	Global Business Environment	
ENTR 440	International Entrepreneurship (Prereq: ENTR 201 or MGMT 470)	
FIN 440	International Finance	
MGMT 440	International Management	
MRKT 440	International Marketing	
Total Credits		**93**

1

Take the other course not taken for admission to pre-major program.

2

Denotes Common Body of Knowledge (CBK) course.

Degree Requirements and Notes:

- Students follow the published curricula for the marketing program of study from the semester/year of entrance in the College of Business (COB) to graduation provided enrollment at NDSU has not been discontinued for more than one year. Students who change their major are subject to meeting the curricular requirements in effect at the time the new major is declared.
- The CoB accepts a maximum of up to (but not including) 50% of upper-division (300-level and 400-level) business courses[1] required for degree completion, with a minimum grade of C[2]. All transfer courses are subject to approval by the course discipline chair or designated representative.
  a. Defined as courses with the following prefixes: ACCT, BUSN, ENTR, FIN, MGMT, MIS, MRKT, SCM.
  b. Credits that do not qualify for degree completion will still be accepted as general credits toward graduation, within the restrictions defined by university transfer policy.
- Admission to the marketing major is required to enroll in the advanced 300 or 400 level courses in the CoB.

- A grade of 'C' or better is required in transfer courses accepted for all accounting, business administration, finance, management, management information systems, and marketing courses.
- No courses for the major may be taken with Pass/Fail grading.
- Requirements for graduation are those in existence at the time of admission to the marketing major.
- Students must earn a 2.50 institutional GPA to graduate.
- Of the credits completed in residence at least 30 credits must be in 300-400 level CoB courses.
- Students must be accepted to the marketing major prior to the completion of the last 30 credits in 300 and 400 level CoB courses.
- A Business Administration minor is NOT offered with this major.
- For multiple majors within the CoB, at least 15 unique credits of 300-400 level CoB courses must exist between the majors.
- Internship and cooperative education credits may be applied toward the total credits required for graduation as non-major electives or 300-400 level electives not used in pre-major categories.
- Student may choose to take the Supply Chain Management Track within the Marketing major.

Supply Chain Management Track

Code	Title	Credits
SCM 320	Integrated Supply Chain Management	3
SCM 462	Modeling the Supply Chain	3
Select one of the following:		3
AGEC 378	Introduction to Transportation & Logistics	
MGMT 451	Negotiations	
MRKT 430	Sales and Personal Selling	
MRKT 438	Customer Relationship Management (CRM) and Sales Technology	
MRKT 460	Marketing Strategy	
SCM 460	Production & Operations Management	
Total Credits		**9**

- **Credential Offered:**
  B.A.; B.S.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/mathematics/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/mathematics/)

Mathematics is the language of science and technology. Its explosive development during the 20th Century and its history as the oldest and most highly developed discipline make math one of the most exciting and rewarding areas of study for the 21st Century.

Background Information

In the past few years, a tremendous increase has occurred in the need for mathematics and mathematicians. In such fields as actuarial science, computer science, statistics, engineering, economics and commerce, mathematical training is in high demand.

If you enjoy mathematics and are good at it, you will find both challenges and opportunities in the Department of Mathematics at North Dakota State University. Your advisor, a faculty member in the department, will provide you with information concerning courses, curricula and the many exciting and rewarding careers open to mathematics graduates. The Cooperative Education Program offers the possibility of academic credit for on-the-job training. The student mathematics organization, Math Club, brings in both academic and nonacademic speakers who explore career possibilities and fascinating topics in mathematics at club meetings. Opportunities for paper grading and tutoring are available and allow students to deepen their understanding by assisting others in learning mathematics.

Our faculty members contribute research findings in a variety of areas in theoretical and applied mathematics to internationally known journals. This wide variety of areas of specialization and expertise of faculty members in the department means that you will probably find someone both interested and knowledgeable in any area of mathematics that might fascinate you.

The Program

The Department of Mathematics offers a broad and balanced curriculum of courses taught by a faculty of 15. A student may choose to major in mathematics or mathematics education. Minors in related areas are encouraged. These choices may be made immediately or deferred until the basic course work is completed. In addition to the Bachelor of Science degree, the department offers master's and doctorate degrees.

Career Opportunities

Our students have been very successful in finding employment. Graduates are working in a wide variety of corporations, agencies, universities and school systems. A number continue on for advanced degrees.

The Curriculum

For a mathematics major, 57 credits of mathematics courses are required. The mathematics education major requires 37 credits and emphasizes those areas of mathematics and related disciplines that have proven most useful for secondary school teachers. In addition, there are cooperative double majors in mathematics and computer science, mathematics and physics, and mathematics and statistics, which take advantage of the overlap of requirements and give the student a broader background, thus opening a wider range of career possibilities. Advisors in the Department of Mathematics can furnish details about these and other programs, such as an emphasis in actuarial mathematics.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Mathematics

Degree Type: B.A. or B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**
Category W: Wellness †		**2**
Category D: Cultural Diversity *†		

Category G: Global Perspectives [*†]	
Total Credits	**39**

*

Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†

General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Code	Title	Credits
Required Mathematics Courses		
MATH 129	Basic Linear Algebra	3
MATH 165	Calculus I	4
MATH 166	Calculus II	4
MATH 265	Calculus III	4
MATH 266	Introduction to Differential Equations	3
MATH 270	Introduction to Abstract Mathematics	3

MATH 452	Complex Analysis [1]	3
or MATH 652	Complex Analysis	
MATH 483	Partial Differential Equations [1]	3
or MATH 683	Partial Differential Equations	
MATH 491	Seminar	2
Mathematics Electives [1]		
MATH prefix courses numbered 300 or higher, not including those listed above. Students who also major in Math Education may use EDUC 487 (student teaching) towards this requirement. Students approved for the accelerated program should refer to the footnote.		16
Related Required Courses		
A minor or second major in any other program or 15 credits of coursework that includes at least two 300-level (or higher) courses in another discipline.		15
Total Credits		**72**

1

Accelerated Program: Students approved for the accelerated program may complete MATH prefix courses numbered 600-689 toward this math elective section of the major. No more than 15 graduate credits will be applied to the undergraduate math degree.

Program Notes

- Except for courses offered only as pass/fail grading, no course may be taken Pass/Fail.
- A grade of 'C' or better is required in all MATH prefix courses.

Minor Requirements

Minor: Mathematics

Required Credits: 20

Code	Title	Credits
Required Courses		
MATH 165	Calculus I	4
MATH 166	Calculus II	4
MATH 265	Calculus III	3-4
or MATH 266	Introduction to Differential Equations	

Mathematics Concentration: Select one from the following:		**3**
MATH 270	Introduction to Abstract Mathematics	
MATH 329	Intermediate Linear Algebra	
MATH 346	Metric Space Topology	
MATH Prefix Electives		**6**
Electives must be MATH courses numbered 266 or higher (only one of the above may be used here: MATH 266, 270, 329, 346).		
Total Credits		**20-21**

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- A grade of 'C' or better is required in all courses used toward this minor.

Mathematics Education

Department Information

- **Department Web Site:**
  www.ndsu.edu/education/ (http://www.ndsu.edu/education/)
- **Credential Offered:**
  B.A.; B.S.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/mathematics-education/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/mathematics-education/)

The Program

Candidates in the mathematics education major are prepared to teach a broad curriculum to a diverse student population in grades 5-12 with creativity and confidence. Mathematics is the language of science and technology, and its history as the oldest and most highly developed discipline making math one of the most exciting and rewarding areas of study for the 21st Century.The mathematics teacher candidate should work closely with an advisor to be sure that the general education courses taken will provide a strong foundation for the advanced courses in the major.

Professional Education Courses

Teacher candidates may enroll in the 300-level professional education courses before being formally admitted to the School of Education (SOE). Prior to enrolling in the 400-level courses, teacher candidates must complete the application for admission to the SOE; attain a minimum of a 2.75 grade point average overall in their course work and education courses and pass the Core Academic Skills for Educators test or meet minimum scores on the ACT+. Requirements for admission can be found on the School of Education website (https://www.ndsu.edu/education/).

Student Teaching

Student teaching (clinical practice) is the culmination of the teaching program. During In the clinical practice, teacher candidates apply the knowledge and skills acquired in their college courses to real-world classrooms under the supervision of experienced mathematics teachers in middle or high schools. Faculty members from NDSU conduct regular on-site visits to support, encourage, and evaluate teacher candidates so that they gain the confidence and ability to join the teaching profession after graduation.

Student Advisement

Students will be assigned individual advisors who will work closely with them in program planning. Students are encouraged to meet with their advisor(s) at least once a semester.

Licensure

Upon completing this program, teacher candidates are eligible for certification to teach mathematics in most states. Our program is accredited by the Council for the Accreditation of Educator Preparation (CAEP) and approved by the North Dakota Education and Standards and Practices Board (ESPB)

Career Opportunities

Mathematics education is also valued by a wide range of employers in government and industry. Mathematics teachers may also choose to pursue graduate degrees after building classroom experience. Those masters and doctoral degrees could lead to post-secondary academic positions and leadership roles in state and national educational organizations.

Major Requirements

Major: Mathematics & Physics

Degree Type: B.A. or B.S.
Minimum Degree Credits to Graduate: 122

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**

Category B: Social and Behavioral Sciences †	**6**
Category W: Wellness †	**2**
Category D: Cultural Diversity *†	
Category G: Global Perspectives *†	
Total Credits	**39**

*
Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†
General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

A grade of 'C' or better is required for all MATH, PHYS, and AST prefix courses.

Code	Title	Credits
Mathematics Major Requirements		
MATH 129	Basic Linear Algebra	3
MATH 165	Calculus I (May satisfy general education category R)	4
MATH 166	Calculus II	4
MATH 265	Calculus III	4
MATH 266	Introduction to Differential Equations	3
MATH 270	Introduction to Abstract Mathematics	3
MATH 329	Intermediate Linear Algebra	3
MATH 346	Metric Space Topology	3
Select any two of the following:		6
MATH 420	Abstract Algebra I	
MATH 450	Real Analysis I	
MATH 452	Complex Analysis	
MATH 483	Partial Differential Equations	
MATH 491	Seminar	2
Physics Major Requirements		
PHYS 171	Introductory Projects in Physics	1
PHYS 251 & 251L	University Physics I and University Physics I Laboratory (May satisfy general education category S)	5
PHYS 252 & 252L	University Physics II and University Physics II Laboratory (May satisfy general education category S)	5
PHYS 350	Modern Physics	3
PHYS 355	(or PHY 330: Intermediate Mechanics at MSUM)	3
PHYS 360	Modern Physics II	3
PHYS 361	Electromagnetic Theory (or PHY 370: Electromagnetic Theory at MSUM)	3
PHYS 370	Introduction to Computational Physics	3
PHYS 462	Thermal and Statistical Physics	3
PHYS 485	Quantum Mechanics I	3
PHYS 486	Quantum Mechanics II	3
PHYS 488	Senior Project I	1
PHYS 489	Senior Project II	2
Physics Electives: Select 3 of the following:		9
PHYS 215	Research For Undergraduates	
PHYS 411	Optics for Scientists & Engineers	
PHYS 413	Lasers for Scientists and Engineers	
PHYS 415	Elements of Photonics	
PHYS 481	Materials Physics	
MSUM AST	Astronomy courses (300/400-level) with departmental pemission	

Related Required Courses		
Computer Science:		
CSCI 160	Computer Science I	4
Chemistry: Select one of the following (150/160 recommended):		4
CHEM 150 & CHEM 160	Principles of Chemistry I and Principles of Chemistry Laboratory I	
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory	
Select one of the following (151/161 recommended):		4
CHEM 151 & CHEM 161	Principles of Chemistry II and Principles of Chemistry Laboratory II	
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory	
Total Credits		**94**

Pre-Actuarial Science Option

Actuarial Science is the study of the evaluation and measurement of risk. The Actuary Science option is a pre-professional program designed to provide the background needed to enter the field. Entrance into the profession is regulated under a system of examinations run by actuarial professional societies. The curriculum for this option is designed to prepare the student to pass several of these examinations.

The nature of the actuarial profession requires its practitioners to have a broad knowledge of finance, law, mathematics, management, and statistics. This option leads to a double major in Mathematics and Statistics with either a minor in Economics or additional courses in business. Students selecting this option are requested to visit with the actuarial advisers in both the Departments of Mathematics (https://www.ndsu.edu/math/) and Department of Statistics (https://www.ndsu.edu/statistics/) early and often to confirm their progress and to inform themselves of changes in the examination curriculum.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Mechanical Engineering

Department Information

- **Department Web Site:**
  www.ndsu.edu/me/ (http://www.ndsu.edu/me/)
- **Credential Offered:**
  B.S.M.E.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/mechanical-engineering/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/mechanical-engineering/)

The mechanical engineer deals with the broad areas of heat, energy, force and motion, and their effects on a multitude of products. Mechanical engineers may be involved in the design of large industrial machinery, power plants, automobiles and aircraft, robots, biomedical devices and equipment, precision measurement and data acquisition equipment, nanotechnology and new materials, among others. Within these areas, the mechanical engineer enjoys considerable professional flexibility.

The Program

The demand for mechanical engineers with a good technical education has been high for many years. The Department of Mechanical Engineering at North Dakota State University offers an education that enables its graduates to take their places in all facets of the profession. Since inception, the department has graduated thousands of mechanical engineers who have worked throughout the United States and many other parts of the world. The Bachelor of Science in Mechanical Engineering program is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org, under the commission's General Criteria and Program Criteria for Mechanical and Similarly Named Engineering Programs.

Curriculum

The standard curriculum allows students flexibility in choosing courses that reflect their interests within the broad areas of mechanical engineering. These include mechanics, materials and nanotechnology, biomedical engineering, alternative energy, fluid dynamics, robotics and more. ME students also have the opportunity to pursue minors in coatings and polymeric materials, biomedical engineering, and robotics, among others, which can enhance their educational experience.

Undergraduate students who excel in our program may consider advancing towards a master's degree by applying for our Accelerated Master's Program. This option gives the student a jump-start on the Master of Science curriculum requirements while they finish their Bachelor of Science degree by allowing 6 credits of coursework to be applied to both degrees.

The Faculty and Facilities

The Department of Mechanical Engineering is housed in Dolve Hall, which is part of an eight-building engineering complex. Laboratories and classrooms are well-suited and equipped for teaching and research. Students have access to PC computer clusters and facilities located in Dolve Hall to assist them in their laboratory and class work. The faculty offers a variety of expertise and extensive experience in teaching and research.

High School Preparation

To enroll in the mechanical engineering curriculum for the freshman year, students should have two years of high school algebra and one year of trigonometry, as well as a year in chemistry and physics. Students without these courses may take them at NDSU to better prepare academically for a specific engineering curriculum.

Selective Admission

The Department of Mechanical Engineering has minimum admission requirements for new freshmen and transfer students.

New freshmen must have a minimum high school grade point average (GPA) of 3.0 or have a minimum math ACT of 26 or SAT math sub score of 590.

Transfer students must have a minimum cumulative grade point average (GPA) of 2.7.

All new students who meet mechanical engineering admission requirements are initially admitted to the basic program in mechanical engineering. After completing the first two years of the curriculum with a minimum GPA of 2.5, minimum engineering GPA of 2.7 and no grade below a C, students are eligible for admission to the professional program. The engineering GPA is calculated based on specific core engineering courses.

Students who do not meet the minimum admission criteria will be placed in mechanical engineering under the advisement of a general engineering advisor until minimum admission criteria have been met.

Career Opportunities

Recent graduates have found employment in companies throughout the United States. The average starting salary is approximately $68,000. A sampling of companies hiring NDSU graduates includes: 3M, American Crystal Sugar, Angus Palm, Applied Engineering, Arctic Cat Inc., Black and Veatch, Bobcat, Boeing, Cargill, Caterpillar, CNH Industrial, Daktronics, Horsch Anderson, Integrity Windows, John Deere, Montana Dakota Utilities, Parker-Hannifin, Polaris, Puget Sound Naval Shipyard and Xcel Energy.

Cooperative Education Program

Students in mechanical engineering are encouraged to participate in the Cooperative Education Program at NDSU. It consists of one or more four-month sessions of work experience after completion of the sophomore year. This optional industry experience provides students with hands-on opportunities not available in the classroom and makes students more marketable to employers after graduation. Students who complete an internship or co-op may be eligible to apply those credits towards graduation as technical elective coursework.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Technical Electives: Select 15 credits from the following:		15

ME 332	Engineering Materials II
ME 353	Thermodynamics II
ME 435	Plastics and Polymer Processing in Manufacturing
or IME 635	Plastics and Injection Molding Manufacturing
ME 436	Biopolymers and Biocomposites
ME 437	Engineering Ceramics
ME 468	Introduction to Biomechanics
ME 469	Energy Storage Technology
ME 470	Renewable Energy Technology
ME 471	Experimental Stress Analysis
ME 472	Fatigue and Fracture of Metals
ME 473	Engineering with Polymeric Materials
ME 474	Mechanics of Composite Materials
ME 475	Automatic Controls
ME 476	Mechatronics
ME 477	ME Finite Element Analysis
ME 478	Advanced Flow Diagnostics
ME 479	Fluid Power Systems Design
or ABEN 479	Fluid Power Systems Design
ME 480	Biofluid Mechanics
ME 481	Fundamentals of Energy Conversion
ME 482	Fuel Cell Science and Engineering
ME 483	Introduction to Computational Fluid Dynamics
ME 484	Gas Turbines
ME 485	Heating, Ventilation and Air Conditioning
ME 486	Nanotechnology and Nanomaterials
or CE 686	Nanotechnology and Nanomaterials
ME 487	Internal Combustion Engines
ME 488	Introduction to Aerodynamics
ME 489	Vehicle Dynamics
Approved technical electives from other departments - no more than 3 courses from the following:	
ABEN 456	Biobased Energy
CPM 473	Polymer Synthesis
CPM 474	Applied Polymer Science
CPM 475	Coatings' Materials Science
CPM 486	Corrosion and Materials
CSCI 485	Autonomous Command and Artificial Intelligence for Robots and Other Cyber-Physical Systems
ECE 463	Modern Control
ECE 461	Control Systems I
ECE 485	Biomedical Engineering
ECE 487	Cardiovascular Engineering
ECE 488	Cardiovascular Engineering II
ENGR 310	Entrepreneurship for Engineers and Scientists
ENGR 321	Introduction to Robotics
ENGR 379	Global Seminar
IME 380	CAD/CAM for Manufacturing
IME 430	Process Engineering
IME 431	Production Engineering
IME 432	Composite Materials Manufacturing
IME 433	Additive Manufacturing
IME 440	Engineering Economy
IME 450	Systems Engineering and Management

IME 460	Evaluation of Engineering Data
IME 465	Introduction to Machine Learning
IME 485	Industrial and Manufacturing Facility Design
PHYS 350	Modern Physics
PHYS 355	
PHYS 361	Electromagnetic Theory
PHYS 485	Quantum Mechanics I
Total Credits	**110**

*
Students who transfer any 30 or more credits into the program are not required to take ME 111.

*
Students who have completed ABEN 110 or ENGR 111 are not required to take ME 111.

Degree Requirements and Notes

- No grades less than 'C' will be accepted to fulfill a degree requirement.
- No more than nine credits of approved technical electives may be taken outside the ME department.
- Admission to the Mechanical Engineering Professional program requires a minimum 2.70 engineering GPA and a minimum 2.50 cumulative GPA.
- A 2.50 cumulative GPA is required for graduation requirements.

Mechanical Engineering and Physics

Department Information

- **Department Web Site:**
  www.ndsu.edu/me/ (http://www.ndsu.edu/me/)
- **Credential Offered:**
  B.S.M.E.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/mechanical-engineering-physics/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/mechanical-engineering-physics/)

Engineering and physics are closely related disciplines. Mechanical engineering combines engineering physics and applied mathematics with materials science to design mechanical systems and novel materials. It requires knowledge of core areas of physics, such as mechanics, thermodynamics, theory of elasticity, electricity and magnetism. Modern materials science requires understanding of quantum physics. Therefore, the demand is growing for engineers with multidisciplinary training that includes both fundamental knowledge of physics and practical problem-solving skills.

The Mechanical Engineering and Physics double major program is designed to allow students to complete the core requirements of both majors in a four-year degree. Graduates of the program will have a unique background qualifying them to work in industry or to pursue graduate studies in engineering, physics or related fields of science and technology. One degree is awarded for this major but both mechanical engineering and physics majors are listed under the Bachelor of Mechanical Engineering Degree (B.S.M.E) on the transcript.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

  B.S.M.E
- **Sample Program Guide:**

catalog.ndsu.edu/programs-study/undergraduate/mechanical-engineering-physics/ (http://catalog.ndsu.edu/programs-study/undergraduate/mechanical-engineering-physics/)

Major Requirements

Major: Mechanical Engineering & Physics

Degree Type: B.S.M.E.
Minimum Degree Credits to Graduate: 136

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**

Mechanical engineering technical electives

2

Students who transfer any 30 or more credits into the program are not required to take ME 111.

3

Students who have completed ABEN 110 or ENGR 111 are not required to take ME 111.

Degree Notes:

- No grade less than 'C' is accepted to fulfill any of the degree requirements.
- Admission to the dual major requires a minimum 2.70 GPA
- A 2.50 cumulative GPA is required for graduation.

Medical Laboratory Science

Department Information

- **Department Web Site:**
  www.ndsu.edu/alliedsciences/ (http://www.ndsu.edu/alliedsciences/)

- **Credential Offered:**
  B.S.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/medical-laboratory-science/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/medical-laboratory-science/)

Medical laboratory scientists use analytical procedures and complex instruments to perform tests on blood and body fluids that assist physicians in patient diagnosis and treatment, disease monitoring and prevention. Because the tests performed are so vital in medical treatment, the medical laboratory scientist must know how to perform these tests with scientific precision and accuracy, but also be well educated in the underlying scientific principles and clinical significance of the results.

Background Information

Laboratory work plays a vital role in the daily routine of the medical laboratory scientist and, while usually not having direct contact with patients, the MLS enjoys being a vital member of the health care team. Clinical chemistry, hematology, microbiology, urinalysis, immunohematology and immunology are the principal areas of practice in the medical laboratory. In addition to laboratory testing and analysis, a medical laboratory scientist may also monitor test quality, supervise personnel, conduct research and develop new tests and methodologies.

Career Opportunities

Certified medical laboratory scientists may readily find employment throughout the country in hospitals, medical and diagnostic laboratories, and other healthcare services. According to the U.S. Department of Labor Bureau of Labor Statistics (https://www.bls.gov/ooh/healthcare/medical-and-clinical-laboratory-technologists-and-technicians.htm), employment of clinical laboratory workers is expected to grow faster than average for all occupations through 2026. This increase is attributed to growth in the aging population leading to a greater need to diagnose medical conditions through laboratory procedures, as well as prenatal testing for various genetic conditions which has become increasingly common. Mean annual wages for medical laboratory scientists/technologists was $57,380 in 2022 (Clinical Laboratory Technologists and Technicians : Occupational Outlook Handbook: : U.S. Bureau of Labor Statistics (bls.gov) (https://www.bls.gov/ooh/healthcare/clinical-laboratory-technologists-and-technicians.htm))

The Program

North Dakota State University's Bachelor of Science degree, with a major in medical laboratory science, includes three years of academic courses on campus followed by an 11-to-12-month full-time professional-level internship in an affiliated hospital-based school of medical laboratory science. Graduates are eligible to take a national certification exam administered by the American Society for Clinical Pathology Board of Certification (https://www.ascp.org/content/Board-of-Certification/). NDSU graduates have enjoyed excellent employment opportunities and pass rates on the ASCP BOC exam. To remain certified, medical laboratory scientists must earn continuing education credits.

Students interested in pursuing medical laboratory science should have an interest and aptitude in the sciences, particularly chemistry and biology. College courses include college algebra, biological sciences, microbiology, general chemistry, organic chemistry, biochemistry and statistics, along with general education courses. Transfer students need to successfully complete a minimum of 20 resident credits at NDSU prior to beginning an internship. The full-time internship consists of classroom and clinical bench instruction in clinical chemistry, hematology, immunohematology, microscopy/urinalysis, microbiology, serology, phlebotomy, education, management, and research methods.

Internship Admission

Internship application occurs annually in the fall. Pre-MLS students who will have completed all courses on campus by start of the internship and meet grade and grade point average (GPA) requirements may be eligible to apply for the professional-level internship. This internship occurs onsite within an affiliated hospital-based MLS program. NDSU maintains affiliation with four medical laboratory science programs. These include: Sanford Medical Center (Fargo, ND), Mercy College of Health Sciences (Des Moines, IA), Methodist Hospital (Omaha, NE), and Colorado Center for Medical Laboratory Science (Aurora, CO). All affiliated programs are accredited by the National Accrediting Agency for Clinical Laboratory Science. (https://naacls.org/Students.aspx)

Internship admission is selective. Admission criteria are established by each hospital program and generally includes the student's cumulative and science GPA (a minimum of 2.50-3.00 is required and varies by hospital program), courses completed, related experience, references and an interview. In addition, students must comply with criminal background and student conduct requirements. In order to participate in an MLS internship, students must be able to comply with program-designated essential functions or request reasonable accommodations to meet these essential functions. Requirements include sound intellect, good motor skills, eye-hand coordination and dexterity, effective communication skills, visual acuity to perform macroscopic and microscopic analyses, or read procedures and graphs, and behavioral skills such as organization, time management and good judgment, even in emergency situations.

It is highly recommended that students interested in the MLS major meet with a medical laboratory science advisor to discuss degree and major requirements, internship admission, and create an individualized plan of study at least one year prior to their anticipated internship application. Information about the profession, curriculum, internship, and advising contacts are available from the NDSU Department of Allied Sciences (https://www.ndsu.edu/alliedsciences/).

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

First Year

Major Requirements

Medical Laboratory Science

Degree Type: B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**

MICR 463	Clinical Parasitology	2
MICR 460 & 460L	Microbial Pathogenesis and Microbial Pathogenesis Laboratory	5
MICR 470	Basic Immunology	3
MICR 471	Immunology and Serology Laboratory	2
STAT 330	Introductory Statistics (May satisfy a general education category R)	3
Select one group of the following:		**6-7**
Group One:		
CHEM 341 & 341L	Organic Chemistry I and Organic Chemistry I Laboratory	
CHEM 342	Organic Chemistry II	
Group Two:		
CHEM 240	Survey of Organic Chemistry	
BIOC 461	Foundations of Biochemistry and Molecular Biology II	
Total Credits		**99-100**

Degree Requirements and Notes

- All required courses must be completed with a grade of 'C' or above. All students must maintain a semester GPA of 2.0 or above for each semester in the College. A student who fails to meet this standard for two successive or three non-successive semesters may be terminated from enrollment in the College.

- Completion of the prerequisites does not guarantee a student internship. Selection of interns is competitive. Please consult your MLS advisor for more information.

Microbiology

Department Information

- **Department Web Site:**
  www.ndsu.edu/microbiology/ (http://www.ndsu.edu/microbiology/)
- **Credential Offered:**
  B.S.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/microbiology/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/microbiology/)

Microbiology is a fundamental biological science concerned with bacteria, viruses, and other microbes. Microbiologists have made some of the most important scientific discoveries. Since 1910, approximately one-third of the Nobel Prizes in medicine and physiology have been awarded to microbiologists. The discipline covers a wide spectrum of specialized interest areas that show how microbes affect human and animal health, agriculture, our environment, food technology and safety, and the biotechnology industry. Microbiology prepares students for a wide range of important career opportunities.

In recent years, microbiology has had a major impact on virtually all other scientific disciplines. For this reason, students who choose to major in microbiology often minor in biotechnology, chemistry, or food safety. Students who choose to major in other fields may find it advantageous to minor in microbiology.

CAREER OPPORTUNITIES

Graduates may seek employment in the health sciences, biomedical industries, biotechnology, agricultural biosystems, food industries, pharmaceutical industries, and government agencies. Our graduates work in public health, hospital laboratories, quality control laboratories to ensure a safe food supply, academic, government, or private research laboratories, biotechnology production laboratories, and even breweries. Many microbiologists are teachers and professors, and many of our graduates attend graduate or professional school to continue their career development. Microbiologists work in government agencies such as state public health units, the National Institutes of Health (NIH), the Centers for Disease Control (CDC), the United States Department of Agriculture (USDA), and the Environmental Protection Agency (EPA).

Scholarship Opportunities

Students who major in microbiology can apply for part of ~$12,000 in scholarships that are dedicated funds for our major and ~$7500 in scholarships for Microbiology Majors planning to apply for veterinary school. Visit the website (https://www.ndsu.edu/agriculture/academics/academic-units/microbiological-sciences/microbiology-scholarships/) for microbiology specific scholarships.

High School Preparation

Courses in science and mathematics, such as algebra, biology, physics, and chemistry, will help students prepare for a major in microbiology.

Transfer student PREPARATION

Transfer students are strongly advised to take transferable intro biology and chemistry courses in preparation for upper-level science courses at NDSU.

The Curriculum

During the first year, students in microbiology take basic college courses in English, chemistry, biology, and mathematics. The curriculum over the next three years includes advanced microbiology and life sciences courses. These courses include microbial physiology, microbial genetics, virology, immunology, and microbial ecology. Students majoring in microbiology can enhance their understanding of applied microbiology and infectious disease by taking courses such as pathogenic microbiology, clinical parasitology, food microbiology, and microbial genomics. Students may choose to minor in programs such as biotechnology, public health, and food safety.

Program Outcomes

1. Demonstrate a familiarity with professional and ethical behavior in microbiology.
2. Identify and explain microbiology discipline-specific knowledge and concepts.
3. Describe the process of scholarly inquiry in microbiology
4. Perform classical and modern microbiological techniques with consistency.
5. Communicate scientific results and scientific understanding to a chosen audience.

6. Participates effectively as a team member in collaborative work.
7. Exhibit professional skills and personal effectiveness to enter the job market.
8. Describe their role and begin participating in being civically responsible, contributing citizens, and creating inclusive environments.

Pathways to Success

The department of Microbiological Sciences offers several “Pathways to Success.” Depending on your career goals, you may find that one of these pathways will enhance your education to meet those goals. We currently have Pathways to Success inGeneral Microbiology, Pre-Health Careers, Pre-Veterinary careers, Biotechnology (Double Major), and Accelerated Master’s (Public Health or Microbiology).

STUDENT ORGANIZATIONS

We have an active Biotechnology and Microbiology Club that tours local businesses related to biotechnology and microbiology, hosts guest speakers currently working in the fields of microbiology and biotechnology, and meets for social events throughout the year.

The Faculty

The teaching faculty offers expertise and experience in a variety of microbiology areas. Additionally, faculty members are active researchers and devoted research mentors. Our undergraduates have opportunities to perform cutting-edge research in nationally funded laboratories.

The FACILITIES

The Department of Microbiological Sciences in Van Es Hall has well-equipped teaching and research laboratories, including our Biotechnology Innovation Core. Several courses are taught in the dedicated STEM education building, A. Glenn Hill Center.

Post Graduate Opportunities

Professional School Preparation. The microbiology major is excellent preparation for professional school, including medical, veterinary, dental, optometry, and physician assistant programs.

Graduate School. The microbiology major emphasizes experiential learning in coursework and research laboratories that provide the foundation to be successful in graduate school. We even offer an accelerated master's program to help students optimize their timeline to completing their graduate degree while finishing their bachelor's degree.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Total Credits: 120

*****

Only required for first-time, first-year students.

1

Select from PHIL 111, PHIL 210, PHIL 215, PHIL 216, PHIL 225 or PHIL 327

2

Or higher level math

3

BIOC 474 or MICR 445 or MICR 460L or MICR 471

4

MICR 493 or MICR 494 or MICR 496 or MICR 497 (must be a minimum of 2 credits)

Microbiology

Department Information

- **Department Web Site:**
  www.ndsu.edu/microbiology/ (http://www.ndsu.edu/microbiology/)
- **Credential Offered:**
  B.S.; Minor
- **Sample Program Guide:**
  catalog.ndsu.edu/programs-study/undergraduate/microbiology/#planofstudytext (http://catalog.ndsu.edu/programs-study/undergraduate/microbiology/#planofstudytext)

Major Requirements

Major: Microbiology

Degree Type: B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**
Category W: Wellness †		**2**
Category D: Cultural Diversity *†		
Category G: Global Perspectives *†		
Total Credits		**39**

*****

Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†

General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Code	Title	Credits
Microbiology Core Courses		
MICR 189	Skills for Academic Success [1, 2]	1
MICR 350 & 350L	General Microbiology and General Microbiology Lab [2]	5
MICR 352 & 352L	Critical Skills in Microbiology and Critical Skills in Microbiology Laboratory Research [2]	5
MICR 452	Microbial Ecology [2,3]	3
MICR 470	Basic Immunology [2,3]	3
MICR 475	Virology [2,3]	3
MICR 480	Microbial Physiology [2,3]	3
MICR 482	Microbial Genetics [2,3]	3
MICR 485	Capstone Experience I: Reflecting and Planning [2]	1
MICR 486	Capstone Experience II: Reflection and Dissemination [2]	1
Laboratory Course [3]		
Select one from the following:		2-3
BIOC 474	Methods of Recombinant DNA Technology [2,3]	

MICR 445	Animal Cell Culture Techniques [2,3]	
MICR 460L	Microbial Pathogenesis Laboratory [2,3]	
MICR 471	Immunology and Serology Laboratory [2,3]	
Capstone Experience [3]		
Capstone Experience must include a minimum of 2 credits from the following:		2
MICR 493	Undergraduate Research	
MICR 496	Field Experience	
MICR 497	FE/Coop Ed/Internship	
Microbiology Electives [2,3]		
Select from the following:		8
MICR 379	Global Seminar (No more than 3 credits) [2]	
or MICR 492	Global Practicum: Study Abroad	
MICR 394	Individual Study (No more than 3 credits) [2]	
MICR 453	Food Microbiology [2,3]	
MICR 453L	Food Microbiology Laboratory [2]	
MICR 455	Microbial Biotechnology [2,3]	
MICR 460	Microbial Pathogenesis [2,3]	
MICR 463	Clinical Parasitology [2,3]	
MICR 481	Microbial Genomics with Computational Laboratory [2,3]	
MICR 491	Seminar (No more than 3 credits) [2]	
ANSC 475	One Health [2,3]	
BIOC 483	Cellular Signal Transduction Processes and Metabolic Regulations [2,3]	
BIOC 487	Molecular Biology of Gene Expression [2,3]	
BIOL 359	Evolution [2,3]	
BIOL 370	Cell Biology [2,3]	
BIOL 401	Science Communication [2,3]	
BIOL 483	Cellular Mechanisms of Diseases [2,3]	
MLS 435	Hematology [2,3]	
PH 474	Epidemiology [2,3]	
PLSC 307	History and Evolution of Wine in America [2,3]	
PLSC 431	Intermediate Genetics [2,3]	
PPTH 454	Diseases Of Field and Forage Crops [2,3]	
PPTH 460	Fungal Biology [2,3]	
SOIL 351	Soil Ecology [2,3]	
BIOC 461	Foundations of Biochemistry and Molecular Biology II	3
BIOC 460	Foundations of Biochemistry and Molecular Biology I	3
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	4
BIOL 151 & 151L	General Biology II and General Biology II Laboratory	4
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory	4
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory	4
CHEM 341 & 341L	Organic Chemistry I and Organic Chemistry I Laboratory	4
CHEM 342	Organic Chemistry II	3
PHYS 211 & 211L	College Physics I and College Physics I Laboratory	4
PHYS 212 & 212L	College Physics II and College Physics II Laboratory	4
PLSC 315 & 315L	Genetics and Genetics Laboratory	4

STAT 330	Introductory Statistics	3
Select one philosophy course from the following:		3
PHIL 111	Professional Responsibility and Ethics	
PHIL 210	Ethics	
PHIL 215	Contemporary Moral Issues	
PHIL 216	Business Ethics	
PHIL 225	Environmental Ethics	
PHIL 327	Ethics, Engineering, and Technology	
Select one math course from the following:		3-4
MATH 105	Trigonometry	
MATH 107	Precalculus	
MATH 146	Applied Calculus I	
MATH 165	Calculus I	
Total Credits		**90-91**

1

MICR189 is only required for first-time, first-year students - A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take MICR 189.

2

Course requires a grade of C or better.

3

Courses offered at the 600 level can be used in the B.S./M.S. accelerated program. The 600 level courses have additional outcomes/requirements for graduate level students. When students complete and submit the Accelerated Declaration form, the courses must be identified and no more than 15 credits of graduate coursework can be counted toward the B.S. degree.

Accelerated Undergraduate to Master's Degree Programs

- Students may participate in an accelerated program in the following areas:
  - B.S. Microbiology to Master of Science in Microbiology
  - B.S. Microbiology to Master of Public Health
- A 3.0 GPA is required for the B.S./M.S. accelerated programs
- Instructions to apply are found here (https://www.ndsu.edu/onestop/accelerated-degrees-undergraduate-graduate-programs/).
- A sample 5-year plan for interested students can be found on the department website (https://www.ndsu.edu/agriculture/academics/academic-units/microbiological-sciences/undergraduate-programs/pathways-success/).
- Students may complete a thesis-based or comprehensive study-based masters program. Outcomes of these master's programs can be found here (https://catalog.ndsu.edu/programs-study/graduate/microbiology/#degreerequirementstext).

Minor Requirements

Minor: Microbiology

Required Credits: 16

Code	Title	Credits
Required Courses		
MICR 350 & 350L	General Microbiology and General Microbiology Lab	5
Minor Electives - Select eleven (11) credits from the following:		11
MICR 352	Critical Skills in Microbiology	
MICR 352L	Critical Skills in Microbiology Laboratory Research	
MICR 379	Global Seminar (Global Seminar)	
MICR 445	Animal Cell Culture Techniques	
MICR 452	Microbial Ecology	
MICR 453	Food Microbiology	
MICR 455	Microbial Biotechnology	
MICR 460	Microbial Pathogenesis	

MICR 460L	Microbial Pathogenesis Laboratory	
MICR 463	Clinical Parasitology	
MICR 470	Basic Immunology	
MICR 471	Immunology and Serology Laboratory	
PH 474	Epidemiology	
MICR 475	Virology	
MICR 480	Microbial Physiology	
MICR 481	Microbial Genomics with Computational Laboratory	
MICR 482	Microbial Genetics	
MICR 491	Seminar (Seminar in Microbiology) *	
MICR 493	Undergraduate Research (Research Experience in Microbiology) *	
MICR 494	Individual Study (Teaching Experience in Microbiology) *	
MICR 496	Field Experience (Field Experience in Microbiology) *	
MICR 497	FE/Coop Ed/Internship (Internship in Microbiology) *	
Total Credits		**16**

*
No more than 3 credits of minor elective credit may come from courses numbered 491-499 to fulfill this requirement.

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- Students must earn a grade of 'C' or better in the courses used to satisfy the minor requirements.

Military Science

Department Information

- **Department Web Site:**
  www.ndsuarmyrotc.com (http://www.ndsuarmyrotc.com)
- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/military-science/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/military-science/)

The North Dakota State University Army Reserve Officers' Training Corps (ROTC) program provides college-trained officers for the Army, Army Reserve and Army National Guard. Army ROTC enhances a student's education. It provides unique educational opportunities by combining leadership and management theory with actual hands-on experience. Army ROTC helps the student to develop leadership skills to include self-discipline, physical stamina and advanced life skills — the qualities basic to success in any worthwhile career.

Career Opportunities

Students who complete the Army ROTC program may pursue careers as officers in the Army National Guard, Army Reserve, or the active Army. Students selected for active duty will receive a generous salary in excess of $55,000 per year, with housing and medical benefits, and will have opportunities to travel to assignments throughout the world. Students selected for reserve components receive more than $10,00 per year and amazing health insurance for attending for drills and annual training while pursuing their civilian careers. More importantly, the professional experience in management and leadership will enhance the student's marketability in any profession, civilian or military.

Program Description

The Army ROTC program consists of a two-year Basic Course and a two-year Advanced Course. The Basic Course is normally taken during the freshman and sophomore years. During these two years there is no military obligation for non-contracted cadets, and a student may withdraw at any time. Students who have taken Junior ROTC, have active duty military experience, or are currently a member of a Reserve/National Guard unit may receive placement credit for the Basic Course.

Military Science

Department Information

Select one of the following history Courses:		**3**
NDSU Courses:		
HIST 103	U.S. to 1877	
HIST 104	U.S. Since 1877	
HIST 422	American Civil War and Reconstruction	
HIST 424	U.S. History 1917-1960	
Concordia Courses:		
HIST 111	United States in Perspective to 1865 (Concordia College)	
HIST 112	United States in Perspective since 1865 (Concordia College)	
HIST 314	U.S. Foreign Policy (3)	
HIST 338	Hitler's Germany (3)	
HIST 365	Global Issues (3)	
MSUM Courses:		
HIST 121	U.S. History I (3)	
HIST 122	U.S. History II (3)	
Total Credits		**25**

Minor Requirements and Notes

- This minor must be officially declared: see Office of Registration and Records.
- A minimum of 8 credits must be taken at NDSU.
- The following classes may be substituted for required classes after consultation with Military Science Dept Advisor - MS 110 Army ROTC Physical Fitness and MS 194 Individual Study.

Music

Department Information

- **Department Web Site:**
  www.ndsu.edu/performingarts/music/ (http://www.ndsu.edu/performingarts/music/)

- **Credential Offered:**
  B.A.; B.S.; B.Mus.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/music/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/music/)

North Dakota State University offers the most comprehensive degree programs for music majors in the region and provides outstanding musical opportunities for all NDSU students.

The Program

The NDSU Challey School of Music features excellent students, faculty, staff and facilities. The program has been continuously accredited by the National Association of Schools of Music since 1970 and has a strong tradition of excellence in ensembles dating back to 1904. Faculty and staff members are committed to providing outstanding musical opportunities for all NDSU students—whether they aspire to be professional musicians or only wish to take advantage of NDSU's many musical opportunities.

The Faculty

NDSU music faculty members have international credentials in performance, music education and academic studies. All full time faculty members have doctorates in music; adjunct faculty members and graduate students provide additional instruction to achieve a well-balanced program.

The Degrees

NDSU's Challey School of Music offers the largest variety of degree programs in the region, from liberal arts degrees with emphases in music to professional music degrees at the bachelor's, master's and doctoral levels.

Undergraduate music majors take courses in music theory, music literature, music history, and conducting; receive private lessons on a selected instrument and/or in voice; and participate in a major ensemble. Other courses are selected within chosen areas of concentration. In all programs, applied instrumental or vocal studies develop musicianship and performance ability. Students are accepted for private lessons depending upon demonstrated musical ability and available staff resources.

The Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) in music are liberal arts degrees with an emphasis in music. In addition to a general education core and the music concentration, students complete either a two-year competency in a foreign language or a complementary minor degree. Students take a minimum of 15 credits in music electives.

The Bachelor of Music (B.Mus.) with an option in music education leads to K-12 vocal and instrumental certification for North Dakota public schools, and satisfies basic agreements in the primary area for Minnesota certifications.

The B.Mus. in performance leads to professional performing careers or preparation for graduate school. Students select a concentration in instrumental, vocal or piano studies.

The B.Mus in composition leads to professional careers or preparation for graduate school.

NDSU also offers the Master of Music and the Doctor of Musical Arts degrees.

Further, the School of Music offers a minor in music consisting of 20 credit hours of music classes, including applied study, ensembles, academic studies and electives.

Career Opportunities

Degree programs in music education prepare students for opportunities as elementary, high school or college teachers, while performance degree students usually seek performing or conducting careers. Graduates often choose careers as professional teachers, instrumentalists or vocalists, and conductors. There are also more general opportunities in various music industries.

Music Performance Opportunities

All music ensembles are open to any NDSU student without regard to major and provide course credit (generally one semester hour for each group listed). Ensembles are some of the most rewarding experiences in college, and all students with musical interests are encouraged to participate.

The **Gold Star Marching Band** plays for all home NDSU football games and marches in special events during fall semester. The group rehearses three days per week and is open to all students.

The **Concert Choir** meets five days per week, both fall and spring semesters. Open by audition, the group tours regionally or nationally on an annual basis and to European countries every three years.

The **NDSU Wind Symphony** is NDSU's large concert ensemble for wind and percussion instruments. Members meet both fall and spring semesters and tour annually. Open by audition.

A smaller ensemble, **Madrigal Singers,** performs repertoire from the renaissance through contemporary periods. This auditioned group meets three days per week fall and spring semesters and produces the annual Madrigal Dinners in December and tours with the Concert Choir. Members are auditioned from Concert Choir.

The **Jazz Ensembles** are two jazz big bands, generally of about 20 musicians each. Ensembles meet two times per week fall and spring semesters. Open by audition.

In **Opera Theatre,** opera scenes are rehearsed and produced each semester. This auditioned group meets three times per week. The School of Music traditionally produces a fully staged opera or musical every year in the spring semester.

A second concert band, **University Band** is open to all students by audition for section placement. University Band meets three times per week and has two concerts each semester. The **University Symphony Orchestra** performs 2 concerts each semester.

The **University Chamber Singers** is an auditioned mixed choir of students from many different majors and disciplines. They perform a wide variety of music and sing in at least two concerts each semester. There is an audition for this ensemble.

Cantemus performs SA literature from all periods and meets two times per week**. NDSU Statesmen** performs TB literature from all periods and meets two times per week. Both choirs perform at least two concerts each semester**.** There is no audition for these ensembles.

Chamber ensembles include the percussion ensemble, brass ensemble, brass chamber ensembles, woodwind chamber ensembles (including flute quartets, clarinet ensembles, saxophone quartets and mixed woodwinds), vocal chamber ensembles, piano chamber ensembles and jazz combos.

The Curricula

Music degree programs vary because of the numerous options available. All music degrees, however, feature a general core of music classes that includes applied lessons, ensembles, supportive music courses, academic music studies and electives. Curriculum guides are available online and from the School of Music.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

1

MUSC 189 is only required for first-time, first-year students. A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take MUSC 189.

2

3

Vocal needs 2 credits; Instrumental needs 6 credits

Degree Requirements and Notes

- Music majors may not declare a music minor.
- A grade of 'C' or better is required in all MUSC prefix courses.
- Arts, Humanities and Social Sciences College Requirements: An additional 9 credits are required by the College of Arts, Humanities and Social Sciences for all Bachelor of Science and Bachelor of Arts degree programs of study, except the Bachelor of Fine Arts degree, the Bachelor of Music degree, Bachelor of Landscape Architecture degree, and the Bachelor of Science in Architecture degree
- Bachelor of Science (B.S) Degree - The completion of a minor program of study, a second major, or a second degree is required.
- Bachelor of Arts (B.A.) Degree - Second year language proficiency at college level required.
- MUSC 189 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take MUSC 189.
- B.A./B.S. Recital Capstone or Individual Study Capstone is fulfilled by registration in MUSC 380 (https://bulletin.ndsu.edu/search/?P=MUSC%20380) Recital, MUSC 480 (https://bulletin.ndsu.edu/search/?P=MUSC%20480) Recital, or MUSC 494 (https://bulletin.ndsu.edu/search/?P=MUSC%20494) Individual Study. The MUSC 494 (https://bulletin.ndsu.edu/search/?P=MUSC%20494) Individual Study registration is approved by the music faculty and supervised by the adviser. Possibilities include:
  - Half (MUSC 380 (https://bulletin.ndsu.edu/search/?P=MUSC%20380) Recital) or full (MUSC 480 (https://bulletin.ndsu.edu/search/?P=MUSC%20480) Recital) recital with program notes.

- Approved research project on a topic related to music; requires a formal written document (MUSC 494 (https://bulletin.ndsu.edu/search/?P=MUSC%20494) Individual Study).
- Approved internship, such as directing an ensemble (e.g. church choir), teaching at the NDSU Academy, observed regularly by the advisor, with a formal written document of the experience (MUSC 494 (https://bulletin.ndsu.edu/search/?P=MUSC%20494) Individual Study).
- Approved "lecture recital" with a formal presentation. Lecture recital should be at least the same length as a half recital (MUSC 494 (https://bulletin.ndsu.edu/search/?P=MUSC%20494) Individual Study)
- Performance or major opera role or a major solo with ensemble in a formal concert, accompanied by a summary document (MUSC 494 (https://bulletin.ndsu.edu/search/?P=MUSC%20494) Individual Study)

Sample Program Guide

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

MUSC 189 is only required for first-time, first-year students. A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take MUSC 189.

Music

Department Information

- **Department Web Site:**
  www.ndsu.edu/performingarts/music/ (http://www.ndsu.edu/performingarts/music/)
- **Credential Offered:**
  B.S.; B.A.; B.Mus.; Minor
- **Sample Program Guide:**
  catalog.ndsu.edu/programs-study/undergraduate/music/ (http://catalog.ndsu.edu/programs-study/undergraduate/music/)

Major Requirements

Major: Music

Degree Type: B.A. or B.S.
Minimum Degree Credits to Graduate: 122

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits

1

MUSC 189 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take MUSC 189.

2

B.A./B.S. Recital Capstone or Individual Study Capstone is fulfilled by registration in MUSC 380 Recital, MUSC 480 Recital, or MUSC 494 Individual Study. The MUSC 494 Individual Study registration is approved by the music faculty and supervised by the adviser. Possibilities include:

- Half (MUSC 380 Recital) or full (MUSC 480 Recital) recital with program notes.
- Approved research project on a topic related to music; requires a formal written document (MUSC 494 Individual Study).
- Approved internship, such as directing an ensemble (e.g. church choir), teaching at the NDSU Academy, observed regularly by the advisor, with a formal written document of the experience (MUSC 494 Individual Study).
- Approved “lecture recital” with a formal presentation. Lecture recital should be at least the same length as a half recital (MUSC 494 Individual Study)
- Performance or major opera role or a major solo with ensemble in a formal concert, accompanied by a summary document (MUSC 494 Individual Study)

Degree Requirements and Notes

- Music majors may not declare a music minor.

Major Requirements

Major: Music - Instrumental Performance

Degree Type: B.Mus.
Minimum Degree Credits to Graduate: 128

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†

General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Code	Title	Credits
Music Core Requirements		
MUSC 103	Introduction to Music History	3
MUSC 130	Theory and Analysis I	3
MUSC 131	Theory and Analysis II	3
MUSC 132	Ear Training & Sight Singing I	1
MUSC 133	Ear Training & Sight Singing II	1

MUSC 233	Ear Training & Sight Singing IV	1
MUSC 340	Music History I	3
MUSC 341	Music History II	3
MUSC 385	Music Entrepreneurship	3
MUSC 480	Recital	1
MUSC 494	Individual Study	1
Applied Music - Select 6 credits from one of the following applied music disciplines:		**6**
Applied Piano		
MUSC 165	Applied Piano	
MUSC 265	Applied Piano	
MUSC 365	Applied Piano	
MUSC 465	Applied Piano	
Applied Voice		
MUSC 167	Applied Voice	
MUSC 267	Applied Voice	
MUSC 367	Applied Voice	
MUSC 467	Applied Voice	
Applied Wind Instruments		
MUSC 168	Applied Wind Instruments	
MUSC 268	Applied Wind Instruments	
MUSC 368	Applied Wind Instruments	
MUSC 468	Applied Wind Instruments	
Applied Percussion Instruments		
MUSC 169	Applied Percussion Instruments	
MUSC 269	Applied Percussion Instruments	
MUSC 369	Applied Percussion Instruments	
MUSC 469	Applied Percussion Instruments	
Applied Upper Strings		
MUSC 170	Applied Upper Strings	
MUSC 270	Applied Upper Strings	
MUSC 370	Applied Upper Strings	
MUSC 470	Applied Upper Strings	
Applied Lower Strings		
MUSC 171	Applied Lower Strings	
MUSC 271	Applied Lower Strings	
MUSC 371	Applied Lower Strings	
MUSC 471	Applied Lower Strings	
Applied Guitar		
MUSC 172	Applied Guitar	
MUSC 272	Applied Guitar	
MUSC 372	Applied Guitar	

MUSC 472	Applied Guitar	
Major Ensembles - Select 6 credits from the following:		**6**
MUSC 111	Marching Band	
MUSC 112	University Band	
MUSC 116	Cantemus	
MUSC 117	Statesmen of NDSU	
MUSC 215	University Chamber Singers	
MUSC 303	Wind Symphony	
MUSC 304	University Symphony Orchestra	
MUSC 306	Concert Choir	
Minor Ensembles - Select 4 credits from the following:		**4**
MUSC 312	Percussion Ensemble	
MUSC 314	Brass Chamber Ensemble	
MUSC 315	Woodwind Chamber Ensemble	
MUSC 316	String Chamber Ensemble	
MUSC 317	Madrigal Singers	
MUSC 318	Mixed Chamber Ensemble	
MUSC 320	Vocal Chamber Ensemble	
MUSC 321	Piano Chamber Music	
MUSC 322	Jazz Combo	
Piano Classes		
MUSC 160	Piano Class I	1
MUSC 161	Piano Class II	1
MUSC 260	Piano Class III	1
MUSC 261	Piano Class IV	1
Composition Core		
MUSC 331	Instrumental Arranging	2
MUSC 351	Instrumental Conducting & Literature	2
or MUSC 352	Choral Conducting & Literature	
MUSC 430	Counterpoint	3
Applied Composition - Select 13 credits from the following (one semester of 100 level, 2 semesters each of 200 level, 300 level, and 400 level)		
MUSC 166	Applied Composition	1
MUSC 266	Applied Composition (Enroll two times but in different semesters)	2
MUSC 273	Supplementary Applied Study (Enroll two times but in different semesters)	2
MUSC 366	Applied Composition (Enroll two times but in different semesters)	2
MUSC 373	Supplementary Applied Study (Enroll two times but in different semesters)	2
MUSC 466	Applied Composition (Enroll two times but in different semesters)	2
MUSC 473	Supplementary Applied Study (Enroll two times but in different semesters)	2
Upper Division Theory - Select from the following:		**3**
MUSC 411	Form and Analysis	
MUSC 431	Contemporary Harmonic Techniques	
MUSC 434	Analytical Techniques	
Major electives determined in consultation with Advisor		**10**
(Substitution form with course selections must be submitted to the Office of Registration and Records to receive credit for the electives.)		
Total Credits		**84**

[1]

MUSC 189 is only required for first-time, first-year students. A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take MUSC 189.

Minor Requirements

Minor: Music

Required Credits: 20

Code	Title	Credits
Required Courses		
MUSC 103	Introduction to Music History	3
MUSC 130	Theory and Analysis I	3
MUSC 131	Theory and Analysis II	3
MUSC 132	Ear Training & Sight Singing I	1
MUSC 133	Ear Training & Sight Singing II	1
Applied Study Electives		**2**
Major Ensemble Electives		**2**
Electives		**5**
Total Credits		**20**

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.

Music Education

Department Information

- **Department Web Site:**
  www.ndsu.edu/performingarts/music/ (http://www.ndsu.edu/performingarts/music/)
- **Credential Offered:**
  B.Mus.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/music-education/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/music-education/)

The **Bachelor of Music in Music Education** (B.Mus.) includes licensure requirements for teacher candidates to teach music in North Dakota's public schools. Teacher candidates will be certified to teach K-12 after completing all requirements from the music education curriculum. Though the degree contains comprehensive preparation, students generally elect a principal area in either instrumental or voice/choral.

Licensure in Music Education

Teacher candidates must complete the School of Education (https://www.ndsu.edu/education/) requirements, complete the common core music requirements, complete either the vocal or instrumental emphasis and pass a piano proficiency examination prior to student teaching. Piano credit requirements may be waived in whole or in part upon successful completion of the piano proficiency examinations. Specific general education requirements, School of Education requirements, and other information may be obtained from the Division of Performing Arts (https://www.ndsu.edu/performingarts/) office.

Ensembles

The NDSU Challey School of Music sponsors a large variety of ensembles including the NDSU Wind Symphony, Concert Choir, University Symphony Orchestra, Madrigal Singers, two large Jazz Ensembles, Jazz Combos, the Gold Star Marching Band, Brass Ensemble, University Chamber Singers, NDSU Statesmen, Cantemus, University Band, Bison Pep Bands, NDSU Opera Theatre, and chamber ensembles in typical instrumental and vocal combinations. The Concert Choir, Wind Symphony, Jazz Ensemble, Madrigal Singers and several other groups have touring programs, some of which are national or international in scope. Participation in these ensembles is open to all students, some by audition and some as open-enrollment ensembles.

Music Curricula

Requirements are grouped by degree. Please refer also to graduation requirements listed in the Academic Policies (p. 28) section of this publication. The information in this Bulletin may be superseded by information updated regularly and provided by the Challey School of Music.

  B.Mus.; Minor
- **Sample Program Guide:**
  catalog.ndsu.edu/programs-study/undergraduate/music-education/ (http://catalog.ndsu.edu/programs-study/undergraduate/music-education/)

Major Requirements

Major: Music Education - Instrumental Music Track

Degree Type: B.Mus

Minimum Degree Credits to Graduate: 143

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**

MUSC 189 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take MUSC 189.

Proficiency Waiver

- Piano proficiency exam must be completed before student teaching.
- Piano credit requirements listed may be waived in whole or in part for successful completion of the piano proficiency.
- Piano majors may fulfill this requirement by accompanying or performance on a secondary medium according to the discretion of the student's applied instructor/adviser.

Degree Requirements and Notes

- Music majors may not declare a music minor.
- A grade of 'C' or better is required in all MUSC and EDUC prefix courses.
- To be placed in student teaching, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required.
- To exit the program, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required as well as completing the Praxis Subject test and the Principles of Learning and Teaching test.
- See School of Education (https://www.ndsu.edu/education/) for admission requirements.

Major Requirements

Major: Music Education - Vocal Music Track

Degree Type: B.Mus
Minimum Degree Credits to Graduate: 151

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing [†]		
Category R: Quantitative Reasoning [†]		**3**

Category S: Science and Technology †	**10**
Category A: Humanities and Fine Arts †	**6**

Category W: Wellness †	**2**
Category D: Cultural Diversity *†	
Category G: Global Perspectives *†	
Total Credits	**39**

*
Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†
General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Code	Title	Credits
Music Core Requirements for Education Majors		
PSYC 111	Introduction to Psychology	3
HDFS 230	Life Span Development	3
or PSYC 250	Developmental Psychology	
MUSC 103	Introduction to Music History	3
MUSC 130	Theory and Analysis I	3
MUSC 131	Theory and Analysis II	3
MUSC 132	Ear Training & Sight Singing I	1
MUSC 133	Ear Training & Sight Singing II	1
MUSC 174	Pronunciation for Singers I	1
MUSC 175	Pronunciation for Singers II	1
MUSC 189	Skills for Academic Success [1]	1
MUSC 230	Theory and Analysis III	3
MUSC 231	Theory and Analysis IV	3
MUSC 232	Ear Training & Sight Singing III	1
MUSC 233	Ear Training & Sight Singing IV	1
MUSC 340	Music History I	3
MUSC 341	Music History II	3
MUSC 349	Vocal Methods & Pedagogy I	2
MUSC 351	Instrumental Conducting & Literature	2
MUSC 352	Choral Conducting & Literature	2
MUSC 353	Woodwind Methods I	2
MUSC 355	Brass Methods	2
MUSC 359	Percussion Methods	2
MUSC 380	Recital	1
or MUSC 480	Recital	
MUSC 385	Music Entrepreneurship	3
MUSC 481	Instrumental Music Methods	2
MUSC 482	Choral Music Methods	2
MUSC 483	Elementary Music Methods	2
Professional Education Requirements		
EDUC 321	Introduction to Teaching	3
EDUC 322	Educational Psychology	3
EDUC 451	Instructional Planning, Methods and Assessment	3
EDUC 485	Student Teaching Seminar	1
EDUC 486	Classroom Management for Diverse Learners	3
EDUC 487	Student Teaching	9

EDUC 488	Applied Student Teaching	3
EDUC 489	Teaching Students of Diverse Backgrounds	3
Vocal Track Requirements		
Major Choral Ensemble: Must be taken in 7 different semesters. Select from the following in consultation with adviser:		7
MUSC 116	Cantemus	
MUSC 117	Statesmen of NDSU	
MUSC 306	Concert Choir	
Minor Choral/Vocal Ensemble: Must be taken in 2 different semesters. Select two credits from the following in consultation with adviser:		2
MUSC 215	University Chamber Singers	
MUSC 317	Madrigal Singers	
MUSC 319	Opera Workshop	
Major Instrumental Ensemble: Must be taken in 2 different semesters. Select two credits from the following in consultation with adviser:		2
MUSC 111	Marching Band	
MUSC 112	University Band	
MUSC 303	Wind Symphony	
MUSC 304	University Symphony Orchestra	
MUSC 311	Jazz Ensemble	
Applied Voice: Must enroll in the following as indicated:		7
MUSC 167	Applied Voice (for 2 semesters)	
MUSC 267	Applied Voice (for 2 semesters)	
MUSC 367	Applied Voice (for 2 semesters)	
MUSC 467	Applied Voice (for 1 semester)	
Students enrolled in applied instruction must participate in a major ensemble specific to applied area.		
Applied Piano: Private (MUSC 165) or class (MUSC 160; MUSC 161; MUSC 260; MUSC 261)		4
MUSC 160	Piano Class I (Up to 2 semesters of MUSC 165 with permission)	
or MUSC 165	Applied Piano	
MUSC 161	Piano Class II	
MUSC 260	Piano Class III	
MUSC 261	Piano Class IV	
Total Credits		**106**

[1]

MUSC 189 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take MUSC 189.

Proficiency Waiver

- Piano proficiency exam must be completed before student teaching.
- Piano credit requirements listed may be waived in whole or in part for successful completion of the piano proficiency.
- Piano majors may fulfill this requirement by accompanying or performance on a secondary medium according to the discretion of the student's applied instructor/adviser.

Degree Notes

- Music majors may not declare a music minor.
- A grade of 'C' or better is required in all EDUC and MUSC prefix courses.
- To be placed in student teaching, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required.
- To exit the program, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required as well as completing the Praxis Subject test and the Principles of Learning and Teaching test.
- See School of Education (https://www.ndsu.edu/education/) for admission requirements.

Minor Requirements

Total Credits		**20**

Natural Resources Management

Department Information

- **Department Web Site:**
  www.ndsu.edu/snrs/ (http://www.ndsu.edu/snrs/)
- **Credential Offered:**
  B.S., Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/natural-resources-management/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/natural-resources-management/)

With increasing human pressure and a growing need to balance competing demands, we need new and better ways to manage our natural resources. The natural resources management (NRM) undergraduate program gives students flexible and powerful options to pursue their studies. Core courses provide a broad foundation in the biological and physical/earth sciences. Students then choose one of six emphases to further their skills and prepare for a variety of careers.

THE PROGRAM

The NRM undergraduate program is offered by the School of Natural Resource Sciences (SNRS) at North Dakota State University (NDSU). We are an interdisciplinary program that focuses on the science and management of natural resources. The program draws upon courses and resources across SNRS, including Entomology, Natural Resource Management, Range Science, and Soil Science, as well as additional programs and colleges across NDSU.

Students in NRM acquire a broad background in natural resources as well as an in-depth study in an area of interest. This exposure to multiple disciplines helps prepare students to find solutions to complex environmental problems. The undergraduate program curriculum is divided into core classes required of all students and an emphasis selected by the individual student from six areas of interest.

NRM Core – This group of courses provides each student a broad foundation while satisfying NDSU's General Education requirements.

NRM Emphasis –NRM offers six emphasis areas, each with their own combination of course requirements and electives. The emphases allow students to choose courses from a diverse group of approved electives.

- **Entomology -** Entomology is the study of insects and how they interact with people and with the environment. This emphasis area provides a strong scientific foundation with a focus on insects, how they are studied, and their management.
- **Environmental Sustainability, Outreach, and Policy -** Focuses on how to deal with environmental and social changes in a sustainable way. The emphasis area prepares students to work on environmental policy and public outreach combined with strategic thinking to predict sustainable paths on pressing environmental issues.
- **Rangeland Ecology -** Focuses on the broad study of native, non-forested ecosystems that cover more than 50% of the earth's land. These areas are managed as natural ecosystems to provide services that can benefit society. This emphasis area will prepare students by covering a variety of ecological topics including wildlife management, grassland restoration, and fire ecology.

- **Rangeland Livestock Production -** Focuses on the management of rangelands and grasslands for optimum livestock production and environmental benefits for society. Students will cover land management fields, the work of agencies and the private sector, as well as ranching operations.
- **Soil Science -** Soil Science is the study of the soil as a component of natural and man-made systems. It is the key factor in food production and is at the forefront of environmental and natural resource issues such as land use, soil contamination, ground water quality and waste disposal.
- **Water, Habitat, and Environmental Management -** Focuses in an interdisciplinary way on the environmental management of ecosystems. This emphasis area teaches basic and hands-on principles in the management of water, habitat (animals and plants), and the environment as a whole.

THE FACULTY

Our faculty come from across the School of Natural Resource Sciences and are dedicated to providing quality instruction and advising.

CAREER OPPORTUNITIES

NRM graduates are prepared with the skills and knowledge for facing complex problems in natural resources, agriculture, and the environment. Common career options include natural resources jobs with government agencies at the federal, state, or local level; agricultural, conservation and environmental non-profit organizations, extension and outreach positions, and private sector employment, including consulting in addition to preparation for advanced degrees.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Natural Resources Management

Degree Type: B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**

Category W: Wellness [†]	**2**
Category D: Cultural Diversity [*†]	
Category G: Global Perspectives [*†]	
Total Credits	**39**

*
Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†
General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

MAJOR REQUIREMENTS

Code	Title	Credits
Required Core Courses for Natural Resources Management:		
BIOL 150 & 150L	General Biology I and General Biology I Laboratory	4
BIOL 151 & 151L	General Biology II and General Biology II Laboratory	4
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory	4
ECON 201	Principles of Microeconomics (May satisfy general education category B and G)	3
ENGL 321	Writing in the Technical Professions	3
or ENGL 324	Writing in the Sciences	
or ENGL 459	Researching and Writing Grants and Proposal	
ENT 210	Insects, Humans and the Environment	3
PHIL 215	Contemporary Moral Issues (May satisfy general education category A)	3
or PHIL 225	Environmental Ethics	
MATH 103	College Algebra	3
NRM 150	Natural Resource Management Orientation	1
NRM 225	Natural Resources & Agrosystems	3
NRM 421	Environmental Outreach Methods	3
NRM/RNG/SOIL 462	Natural Resource and Rangeland Planning	3
RNG 136	Introduction to Range Management	3
RNG 213	Rangeland Sampling Techniques	3
RNG 452	Managing Natural and Rangeland Resources using GIS	3
EMGT, POLS, or SOC Elective		3
SOIL 210	Introduction to Soil Science	3
STAT 330	Introductory Statistics	3
Emphasis: Students must select one of the NRM emphasis areas listed below to complete the major requirements.		45-50
Total Credits		**100-105**

NATURAL RESOURCES MANAGEMENT EMPHASIS AREAS

- Declaring an Emphasis- Students should formally declare an emphasis area with the **Office of Registration & Records** no later than the beginning of their junior year. The emphasis area is recorded on the academic transcript with the degree.

Water, Habitat, and Environmental Management Emphasis

Code	Title	Credits
BIOL 364	General Ecology	3
BIOL 475	Conservation Biology	3
or BIOL 476	Wildlife Ecology and Management	
ECON 481	Natural Resource Economics	3
NRM 264	Natural Resource Management Systems	3
NRM 402	River and Stream Resource Management	3

or NRM 454	Wetland Resources Management	
or SOIL 410	Soils and Land Use	
NRM 431	National Environmental Policy Act and Environmental Impact Assessment	3
NRM 453	Rangeland Resources Watershed Management	3
Select a minimum of 29 credits from the approved electives below:		29
BIOL 359	Evolution	
BIOL 414	Plant Systematics	
BIOL 450	Invertebrate Zoology	
BIOL 452	Ichthyology	
BIOL 454	Herpetology	
BIOL 456	Ornithology	
BIOL 458	Mammalogy	
BIOL 460	Animal Physiology	
BIOL 461	Plant Ecology	
BIOL 462	Physiological Ecology	
BIOL 463	Animal Behavior	
BIOL 472	Structure and Diversity of Plants and Fungi	
BIOL 477	Wildlife and Fisheries Management Techniques	
BIOL 480	Ecotoxicology	
BIOL 481	Wetland Science	
ENT 350	General Entomology	
MICR 202 & 202L	Introductory Microbiology and Introductory Microbiology Lab	
NRM 401	Urban-Ecosystem Management	
NRM 420	Sustainable Scenarios in Natural Resources Management	
PLSC 219	Introduction to Prairie & Community Forestry	
PLSC 315	Genetics	
PLSC 315L	Genetics Laboratory	
PLSC 323	Principles of Weed Science	
PLSC 355	Woody Landscape Plants	
RNG 451	Ecology of Fire-Dependent Ecosystems	
RNG 456	Ecological Restoration	
RNG 458	Grazing Ecology	
RNG 450	Range Plants	
SOIL 217	Introduction to Meteorology & Climatology	
SOIL 351	Soil Ecology	
SOIL 410	Soils and Land Use	
SOIL 433	Soil Ecohydrology and Physics	
SOIL 444	Soil Genesis and Survey	
Total Credits		**50**

Environmental Sustainability, Outreach, and Policy Emphasis

Code	Title	Credits
BIOL 364	General Ecology	3

SOIL 351	Soil Ecology	3
SOIL 410	Soils and Land Use	3
SOIL 433	Soil Ecohydrology and Physics	3
SOIL 444	Soil Genesis and Survey	3
SOIL/NRM 454	Wetland Resources Management	3
Select a minimum of 6 additional credits of 300 or 400 level classes from PLSC, RNG, NRM, ENT, PPTH, ABEN, or ASM		6
Total Credits		**50**

Entomology Emphasis

Code	Title	Credits
BIOL 364	General Ecology	3
RNG 450	Range Plants	3
or BIOL 461	Plant Ecology	
or PLSC 380	Principles of Plant Physiology	
BIOL 450	Invertebrate Zoology	3
BIOL 475	Conservation Biology	3
ENT 350	General Entomology	3
ENT 431	Principles of Insect Pest Management	3
ENT 470	Insect Ecology	3
PLSC 110	World Food Crops	3
Select a minimum of 6 credits of approved electives from below:		6
PLSC 210	Horticulture Science	
PLSC 219	Introduction to Prairie & Community Forestry	
PLSC 315	Genetics	
PLSC 323	Principles of Weed Science	
PLSC 350	Sugarbeet Production	
PLSC 355	Woody Landscape Plants	
PLSC 365	Herbaceous Landscape Plants	
PLSC 370	Landscape Management	
PLSC 375	Turfgrass Management	
PLSC 412	Nursery Production and Management	
PLSC 415	Vegetable Crop Production	
PLSC 416	Fruit Crop Production	
PLSC 422	Greenhouse Production and Management	
PLSC 425	Potato Science	
PLSC 431	Intermediate Genetics	
PLSC 433	Weed Biology and Ecology	
PLSC 455	Cropping Systems:An Integrated Approach	
SOIL 351	Soil Ecology	
Select a minimum of 15 credits from the approved electives listed below:		15
BIOL 359	Evolution	
BIOL 463	Animal Behavior	
BIOL 476	Wildlife Ecology and Management	
MICR 202	Introductory Microbiology	
MICR 452	Microbial Ecology	
MICR 463	Clinical Parasitology	
NRM 401	Urban-Ecosystem Management	

NRM 402	River and Stream Resource Management
NRM 420	Sustainable Scenarios in Natural Resources Management
NRM 431	National Environmental Policy Act and Environmental Impact Assessment
NRM 453	Rangeland Resources Watershed Management
NRM 454	Wetland Resources Management
PLSC 315	Genetics
PPTH 324	Introductory Plant Pathology
PPTH 454	Diseases Of Field and Forage Crops
PPTH 455	Plant Disease Management
PPTH 457	Landscape Plant Pathology
PPTH 460	Fungal Biology
RNG 450	Range Plants
SOIL 410	Soils and Land Use
Total Credits	**45**

Accelerated Program in Natural resource Management

Code	Title	Credits
NRM 621	Environmental Outreach Methods	3
NRM 652	Managing Natural and Rangeland Resources using GIS	3
NRM 662	Natural Resource and Rangeland Planning	3
600 Level Electives	NRM/RNG/SOIL/ENT [1]	6
Total Credits		15

1

Accelerated Electives must be advisor approved and the specific courses are to be identified on the Accelerated Declaration form.

Degree Requirements and Notes:

- **Acceptable Substitutions**: For the Water, Habitat, and Environmental Management; Environmental Sustainability, Outreach, and Policy; and Entomology emphasis areas there is a list of recommended emphasis electives: All other substitutions require advisor approval and a substitution form to be completed and submitted to the Office of Registration and Records (https://www.ndsu.edu/registrar/). Emphasis area courses may not be double-counted with the NRM core classes; a maximum of 3 credits of Field Experience (396/496) or Co-op Ed (397/497) may be counted as emphasis electives.
- **Accelerated Program in NRM Notes:**
  - If a student is interested in this option, they should speak with their Undergraduate Advisor. Students intending to pursue the Accelerated option will need a 3.0 overall GPA, as well as 60 completed credits (in-progress courses do not count). Students will be required to complete a ***Combined/Accelerated Program Declaration Form*** and apply to the Graduate School. Taking the GRE is not required.

Minor Requirements

Minor: Natural Resources Management

Required Credits: 18

Code	Title	Credits
Core Course		
NRM 225	Natural Resources & Agrosystems	3
Interdisciplinary Courses: Select 5 of the following:		15
BIOL 364	General Ecology	
BIOL 476	Wildlife Ecology and Management	
ECON 481	Natural Resource Economics	
EMGT 261		
EMGT 262		
ENT 350	General Entomology	
GEOL 105	Physical Geology	
GEOL 300	Environmental Geology	
HIST 434	Environmental History	

HIST 435	World Environmental History
NRM 264	Natural Resource Management Systems
NRM 401	Urban-Ecosystem Management
NRM 402	River and Stream Resource Management
NRM 420	Sustainable Scenarios in Natural Resources Management
NRM 421	Environmental Outreach Methods
NRM 431	National Environmental Policy Act and Environmental Impact Assessment
NRM/RNG 453	Rangeland Resources Watershed Management
NRM 454	Wetland Resources Management
NRM 456	Ecological Restoration
RNG 136	Introduction to Range Management
RNG 450	Range Plants
RNG 451	Ecology of Fire-Dependent Ecosystems
RNG 458	Grazing Ecology
SOC 405	Community Development
SOC 431	Environmental Sociology
SOIL 210	Introduction to Soil Science
SOIL 351	Soil Ecology
SOIL 410	Soils and Land Use
SOIL 433	Soil Ecohydrology and Physics
Total Credits	**18**

Minor Requirements and Notes:

- Students must earn a 2.00 minimum GPA in the courses used to satisfy the minor requirements.
- A minimum of 8 credits must be taken at NDSU.

Neuroscience

Department Information

- **Department Web Site:**
  www.ndsu.edu/psychology/ (http://www.ndsu.edu/psychology/)
- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/neuroscience/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/neuroscience/)

Neuroscience is a rapidly expanding field and an undergraduate minor will benefit students studying in many scientific disciplines (e.g., biology; zoology; psychology; chemistry), pre-professional and professional areas (e.g., exercise science; nursing; pharmacy), as well as in the humanities and social sciences. Students learn how the brain and nervous system receives and processes information to generate and guide a variety of conscious and unconscious behaviors. Moreover, with an inherent emphasis on critical thinking, a neuroscience minor provides a valuable basis for thinking about the human condition in terms of measurable data. The neuroscience minor may increase students' opportunities to attend graduate school or to find positions in their professional field.

Courses taken for a Psychology major cannot be used toward a Neuroscience minor. Be sure to officially declare your minor with the Office of Registration and Records (https://www.ndsu.edu/registrar/) by completing the Minor/Advisor Change Form (https://www.ndsu.edu/registrar/forms/) which is found online.

Neuroscience

Minor Requirements

Minor: Neuroscience

Required Credits: 17

Code	Title	Credits
Required Courses		
PSYC 260	Introduction to Neuroscience	3
Electives: Select 14 credits from the following:		14
BIOL 220	Human Anatomy and Physiology I	
BIOL 220L	Human Anatomy and Physiology I Laboratory	
PSYC 322	Judgment & Decision-Making	
PSYC 450	Computational Methods in Experimental Psychology	
PSYC 460	Sensation & Perception	
PSYC 461	Memory And Knowledge	
PSYC 464	Attention & Thinking	
PSYC 465	Psychobiology	
PSYC 481	Health Psychology	
PSYC 486	Neuropsychology	
PSYC 493	Undergraduate Research (no more than 6 credits)	
Total Credits		**17**

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- Psychology Majors: Classes taken for the psychology major cannot be double-counted with the neuroscience minor. The credits must be unique from courses used to fulfill the psychology major.

Nutrition Science

Department Information

- **Department Web Site:**
  www.ndsu.edu/hnes/ (http://www.ndsu.edu/hnes/)
- **Credential Offered:**
  B.S.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/nutrition-science/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/nutrition-science/)

Background Information

NDSU has a long-standing history in food and nutrition. Since 1925, NDSU has educated nutrition experts who are active nationwide in the profession of nutrition and dietetics and leaders in professional organizations.

Program Information

NDSU offers two tracks for those interested in studying nutrition science. The first is an accredited BS/MS Accelerated Coordinated Program in Nutrition Science and Dietetics (CPD) to become a Registered Dietitian Nutritionist (RDN). An RDN is a nutrition expert and is a nationally recognized credential that is required for most employment in the healthcare industry and preferred for many other employment opportunities in the area of food and nutrition. The BS/MS Accelerated Coordinated Program in Nutrition Science and Dietetics combines the required 1,000 hours of supervised practice with a Bachelor of Science in Nutrition Science and Master of Science in Exercise and Nutrition Science. Students graduate at the end of five years with the necessary preparation to take the Commission on Dietetic Registration exam to become an RDN. Please see the **CPD website** for more information.

The second track is a four-year BS in Nutrition Science. This is a non-accredited program that provides students a background in nutrition but also serves as a pathway for advanced degrees in other health professions such as Pre-Physician Assistant, Athletic Trainer, or Accelerated (Post-

Baccalaureate) BSN to become a licensed Registered Nurse. It also serves as a pathway to become a Certified Dietary Manager (CDM). This degree path allows flexibility in courses to ensure students are able to meet prerequisite course requirements for other degrees they may pursue in the future.

Career Opportunities

Dietitians are employed in facilities such as hospitals, clinics and long-term care, providing nutrition therapy as well as foodservice administration. Dietitians work in various fields including high school, college, and professional sports, in business as sales or educational professionals, for commercial and government establishments, or in community or clinical settings and public health. Some registered dietitian nutritionists work for food commodity groups such as the Dairy Council or Wheat Commission. Dietitians work in education by teaching dietetics, nutrition and foodservice management in colleges, universities, medical schools and public school systems. In community settings, dietitians provide counseling and nutritional services for city and county health departments, older American feeding programs, childcare centers, school foodservice programs, and in retail settings like grocery stores. Dietitians also work in wellness centers, hospitals, and consulting positions as part of the health promotion team.

The practice of dietetics is continuously changing as more research is conducted on foods and on the role of food in human health. Many dietitians work in hospital settings, either in clinical management or nutrition therapy as clinical dietitians. Clinical dietitians who work in nutrition therapy assess the nutritional needs of patients, plan menus, recommend or prescribe diets and nutritional support for patients, consult with physicians and direct educational programs on nutrition and special diets. They are members of the interdisciplinary team both in healthcare and wellness facilities.

Career Outlook

Placement surveys conducted in the Department of Health, Nutrition, and Exercise Sciences at NDSU show that more than 90 percent of graduates from the Coordinated Program in Nutrition Science and Dietetics are employed or enrolled in graduate training within 12 months of graduation. In recent study, it was projected there will be a continued demand for dietitians in both traditional and nontraditional areas for years to come. During college, many opportunities are available for students to obtain experience in the field. Some of these opportunities are offered through healthcare facilities such as acute care hospitals and long-term care facilities, foodservice in a variety of venues, and public health service.

Academic Advisement

The Department of Health, Nutrition, and Exercise Sciences prides itself on giving individual attention and advisement to each student. A faculty advisor is assigned to each nutrition science major. The academic advisor helps students set goals for their college work, helps them choose courses and encourages them to seek community work experience during their college career. In addition to the academic advisor, each incoming freshman and transfer student is assigned a student advisor to help with routine questions and to give assistance in adjusting to college life.

High School Preparation

Students interested in nutrition science should have a background in the natural sciences and mathematics. Strong communication skills, both oral and written, is an advantage to students considering nutrition science.

Scholarships

Numerous scholarships are available through the College of Health and Human Sciences and the Academy of Nutrition and Dietetics. Contact the department for more information or visit: Scholarships | College of Health and Human Sciences | NDSU (https://www.ndsu.edu/healthhumansciences/current_students/scholarships/)

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Total Credits: 142-148

1

MATH 103 is a pre-requisite for STAT 330. If not needed due to placement scores or transfer, student will need 3 credits of free electives.

2

Plan A students will take HNES 798; Plan B students will take HNES 797; Plan C students will take either HNES 793, HNES 794, or HNES 795.

3

Plan A requires a total of 30 graduate credits including 6 credits of HNES 798 and 6 credits of elective; Plan B requires a total of 30 graduate credits including 3 credits of HNES 797 and 9 credits of elective; Plan C requires a total of 30 graduate credits including 3 credits of HNES 793, HNES 794, or HNES 795 and 9 credits of elective.

Nutrition Science

Department Information

- **Department Web Site:**
  www.ndsu.edu/hnes/ (http://www.ndsu.edu/hnes/)
- **Credential Offered:**
  B.S.
- **Official Program Curriculum:**
  catalog.ndsu.edu/programs-study/undergraduate/nutrition-science/ (http://catalog.ndsu.edu/programs-study/undergraduate/nutrition-science/)

Degree Requirements

Major: Nutrition Science

Degree Type: B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**
Category W: Wellness †		**2**
Category D: Cultural Diversity *†		
Category G: Global Perspectives *†		
Total Credits		**39**

*

Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†
General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Code	Title	Credits
Nutrition Science Core Requirements		
BIOC 260	Elements of Biochemistry	4
BIOL 220 & 220L	Human Anatomy and Physiology I and Human Anatomy and Physiology I Laboratory	4
BIOL 221 & 221L	Human Anatomy and Physiology II and Human Anatomy and Physiology II Laboratory	4
CHEM 117	Chemical Concepts and Applications	3
CSCI 114	Computer Applications	3
HNES 250	Nutrition Science	3
HNES 251	Nutrition, Growth and Development	3
HNES 260	Athletic Training Medical Terminology	1
HNES 261 & 261L	Food Selection and Preparation Principles and Food Selection and Preparation Principles Laboratory	5
HNES 291	Seminar Introduction to Nutrition Science Careers	1
HNES 351	Metabolic Basis of Nutrition	4
HNES 354	Introduction to Medical Nutrition Therapy	4
HNES 499	Special Topics (Interprofessional Health Care Practice) [1]	1
MICR 202 & 202L	Introductory Microbiology and Introductory Microbiology Lab	3
PSYC 111	Introduction to Psychology	3
PSYC 211	Introduction To Behavior Modification	3
STAT 330	Introductory Statistics	3
Select Standard or Coordinated Program Option		
To complete the major, students must complete either the Standard Option or the Coordinated Program Option. Requirements are outlined below.		16-35
Total Credits		**68-87**

1
Interprofessional Health Care Practice course currently taught as HNES 499; a permanent number will be chosen for 2025-2026 academic year.

Standard Option

Code	Title	Credits
Minor Program of Study		
Students in the standard option must declare and complete a minor program of study. Minors must be declared with the assistance of an academic advisor. Minor forms must be officially submitted to the Office of Registration and Records.		16

Coordinated Program Option

Code	Title	Credits
Coordinated Program Option in Nutrition Science (B.S. to M.S. or M.P.H. accelerated option)		
HNES 354L	Introduction to Medical Nutrition Therapy Laboratory	2
HNES 361	Foodservice Systems Management I	3
HNES 361L	Foodservice Systems Management I Laboratory	3
HNES 442	Community Health and Nutrition Education	3
HNES 658	Advanced Medical Nutrition Therapy	4
HNES 458L	Advanced Medical Nutrition Therapy Laboratory	3
HNES 480	Dietetics Practicum (Capstone Experience)	12
HNES 668	Foodservice Systems Management II	1
HNES 468L	Foodservice Systems Management II Laboratory	1

MGMT 320	Foundations of Management	3
Total Credits		**35**

The following program notes apply to students admitted into the coordinated program and plan to complete the accelerated option.

- Students planning to engage in an accelerated program must complete the Coordinated Program subplan. Students who elect to complete the standard Nutrition Science program are not eligible for an accelerated program.
- A grade of 'C' or better is required for transfer courses in nutrition science.
- A grade of 'C' or better is required in all HNES prefix courses.
- Minimum GPA requirements must be met for acceptance into the program (3.0 overall and 2.75 in sciences including BIOC 260, BIOL 220/L, BIOL 221/L, CHEM 117, HNES 250, and MICR 202/L).
- A grade of 'C' or better is required for all required science courses (BIOC 260, BIOL 220/L, BIOL 221/L, CHEM 117, MICR 202/L).
- A grade of 'B' or better is required for HNES 250 - Nutrition Science.
- Students interested in this option should speak with the Undergraduate Advisor for Nutrition Science in the College of Health and Human Sciences Academic Advising Center located in EML 270.
- Students intending to pursue the Accelerated option must maintain a 3.0 overall GPA.
- Students will also be required to complete a Combined/Accelerated Degree Program Declaration Form during the summer or fall after semester 4 and then apply to the Graduate School during semester 5.
- GRE is not required.

Nursing

Department Information

- **Department Web Site:**
  www.ndsu.edu/nursing/ (http://www.ndsu.edu/nursing/)
- **Credential Offered:**
  B.S.N.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/nursing/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/nursing/)

North Dakota State University offers a Bachelor of Science in Nursing (BSN) degree. The professional program is offered at the NDSU Fargo site and NDSU Nursing at Sanford Health in Bismarck. Graduates are eligible to apply for the national licensing examination (NCLEX) to become a registered nurse (RN). The program is fully accredited by the Commission of Collegiate Nursing Education and approved by the North Dakota Board of Nursing.

The Program

The mission of the School of Nursing is to advance nursing knowledge and develop dynamic nurse leaders who improve the health of all people, emphasizing underserved, rural, and diverse populations. The nursing curriculum prepares professional nurses by providing a sound educational base for practice, graduate study, professional development, and professional and civic responsibility. The nursing program serves as a resource for society through consultation, collaboration, advocacy, and scholarship.

Career Opportunities

Rapid changes in health care and technology require the nursing profession to continually expand its role. Employment forecasts predict an increasing demand for professional nurses. Career opportunities for a nurse with a BSN include positions in hospitals, schools, community agencies, the military, insurance companies, nursing homes, clinics, businesses, and research settings. Graduates are prepared to work in a variety of settings that demand critical thinking, autonomy, collaboration, and accountability. A BSN degree offers an array of career options and opportunities for career advancement.

Extra-Curricular Activities

Numerous active student organizations are available at NDSU, including Student Nurses Association chapters in Bismarck and Fargo. Nursing students are strongly encouraged to participate in campus activities because they provide opportunities for teamwork, leadership, service, and enjoyment.

Scholarships

Information on scholarships for students admitted to the major is available from the Office of Financial Aid and Scholarships and the School of Nursing. Information on first year or transfer student scholarships is available from the Office of Admission.

The Faculty and Facilities

The NDSU BSN program is offered at two locations: the NDSU Fargo site and NDSU Nursing at Sanford Health in Bismarck. At the NDSU Fargo site, students will find faculty offices and state-of-the art, hands-on nursing education labs in the six-story Aldevron Tower. Additional classrooms are found in Sudro Hall, connected to Aldevron Tower. In Bismarck, the School of Nursing is conveniently located across the street from Sanford Medical Center. The School houses faculty offices, classrooms, and fully equipped skills and health assessment labs, as well as an advanced simulation center to enhance student learning. The Fargo-Moorhead and Bismarck communities provide a rich source of health care facilities, which are utilized by the nursing program. The faculty members are experts in specialized clinical practice areas and assist students with learning in the classroom, laboratory, and clinical settings.

Advising

The School of Nursing is part of the College of Health and Human Sciences. Pre-nursing advising is available for all students prior to acceptance into the professional program. Each nursing student admitted to the professional program is assigned a nursing faculty advisor who is available for academic guidance, assistance, and career planning. Students are strongly encouraged to seek the assistance of their advisor early in their plan of study and maintain contact on a regular basis.

Transfer

The pre-professional courses may be completed at NDSU or at another regionally accredited college or university. Transfer students are encouraged to contact a pre-nursing advisor early to discuss course selection and transferability. All of the professional nursing classes are completed in sequence and cannot be accelerated due to clinical placements. The pre-licensure professional program takes three years to complete. The LPN-BSN and RN-BSN program both take two years to complete. The Accelerated (Post-Baccalaureate) is just over fourteen months in length.

Admission to the Pre-Licensure Program

Direct Admission

Direct admission is offered to high school seniors who have demonstrated exemplary academic performance. Direct admission is available at both the Bismarck and Fargo sites. Applications are due December 15. If offered direct admission, students will complete the freshman year prerequisite courses. Students must maintain established progression criteria during their first year of coursework. If program criteria are met, students begin the professional nursing program in their second year. Students not admitted through direct admission, or who do not maintain progression requirements, can apply through the standard admission process. Additional information as well as the admission application can be found at https://www.ndsu.edu/nursing/degrees/pre_licensure_bsn_track/direct_admin/.

Standard Admission

The School of Nursing in Bismarck accepts applications and admits students for both fall and spring semesters. On the Fargo site, applications are accepted once per year for students starting the program in both fall and spring. To be eligible for application, students must meet the following requirements: 1) a minimum cumulative grade point average (GPA) of 2.75* on all college level work, and 2) completion of the prerequisite courses with a grade of "C" or higher. The application deadlines and online application are posted on the School of Nursing website (https://www.ndsu.edu/nursing/degrees/pre_licensure_bsn_track/admission/). Admission is competitive and involves a holistic review process. The holistic review considers a student's life experiences, personal qualities, and attributes, as well as traditional measures such as GPA. Students are encouraged to consult with the pre-nursing advisor at their preferred site prior to the application deadline. **Because of limitations on class size, the typical student admitted to the nursing program has a selective GPA higher than 2.75.*

Selected Prerequisite Courses

The selected GPA is calculated based on grades in the following prerequisite courses. (Applicants may have prerequisite courses in progress at the time of application.)

- Communication 110: Fundamentals of Public Speaking
- English 120: College Composition II
- Psychology 111: Introduction to Psychology
- Sociology 110: Introduction to Sociology *or* Anthropology 111: Introduction to Anthropology

A minimum of 8 credits in the science category (preference will be given to those students who have completed 11 credits or more.)

- Biology 220/220L: Human Anatomy and Physiology I/Lab
- Biology 221/ 221L: Human Anatomy and Physiology II/Lab
- Biochemistry 260: Elements of Biochemistry (An equivalent course is Chem 116: Introduction to Organic and Biochemistry)
- Chemistry 117/117L: Chemistry Concepts and Applications/Lab (An equivalent course is Chem 115/115L: Introductory Chemistry and Lab)
- Microbiology 202/202L: Introductory Microbiology/Lab

Note:

- Students should consult their faculty advisor for electives to enhance their program of study and to meet graduation requirements.
- Computer proficiency is expected before beginning the nursing major.
- Disclaimer: The recommended curriculum is subject to change based on nursing program development. Students must consult with their nursing advisor to facilitate progression in the program.

Advancing to a BSN from an LPN or RN

NDSU offers two tracks for nurses who are licensed as either a licensed practical nurse (LPN) or a registered nurse (RN).

The NDSU School of Nursing offers individual, personalized advising to all students prior to and once accepted in the professional programs. NDSU accepts courses from Regional Accredited Colleges and Universities.

LPN to BSN

The LPN to BSN program is designed for a licensed practical nurse (LPN) seeking to obtain a Bachelor of Science in Nursing. Graduates are then eligible to apply for the National Council Licensure Examination (NCLEX) to become a Registered Nurse (RN). Coursework in the professional program is completed on a part-time basis (approx. 6 nursing credits a semester) over the length of two years (including summers). Courses are delivered online with clinical work completed in a variety of Fargo locations during the summer semesters. The curriculum builds on students' prior knowledge to develop critical thinking, theoretical knowledge, leadership, and growth in the RN professional role.

Admission Requirements for LPN-BSN

1. Completion of the NLN NACE (RN-BSN) Exams are required prior to applying to the professional program.
2. Admission to NDSU (it is recommended the application be submitted by Sept. 1st for spring start). Note: Admission to NDSU is not required to complete the validation exams (NACE exams).
3. Completed Application, which is sent to students after passing the NACE exams. Application deadline: Oct. 15th.
4. Professional Nursing Program Requirements
    a. NLN NACE exams must be completed with passing score prior to applying to the professional program.
    b. Graduate with a Diploma or Certificate in Nursing or an Associate of Applied Science in Nursing.
    c. Cumulative GPA of a 2.75 or greater and a Nursing GPA of 3.0 or greater.
    d. The completion of the following courses with a "C" or higher:
        - Biology 220/2201 & 221/2211: Anatomy and Physiology I and II with lab
        - Microbiology 202/202L: Introduction to Microbiology
        - English 120: College Composition II
        - Communications 110: Fundamentals of Public Speaking
        - Psychology 250: Developmental Psychology
        - Sociology 110: Introduction to Sociology
5. Current unencumbered nursing license as a Licensed Practical Nurse or must be able to obtain license by May and will be admitted on probation pending licensure.

RN TO BSN

The RN to BSN program is designed for registered nurses who want to advance to a Bachelor of Science in Nursing. The two-year one hundred percent online program is geared for part-time students. Coursework focuses on the current health care system/environment, quality and safety, evidence-based practice, population-focused nursing, leadership and chronic health issues. The program is intended to educate nurses to practice with a transformed perspective, having a better understanding of themselves and the complex environment in which nurse's work.

Admission Requirements for RN-BSN

1. Admission to NDSU.
2. Completion of an associate of science in nursing or an associate of applied science in nursing.
3. Current unencumbered nurse license (RN).
4. Cumulative GPA of 2.75.
5. Transcripts from all post-secondary schools attended.
6. Completed School of Nursing application including personal statement and background check.
7. Interview upon request.

Demonstrated Competency Credits for RN-BSN

- 18 demonstrated competency credits will be awarded upon completion of the first semester to students who have earned an Associates of Applied Science Degree.

- 25 demonstrated competency credits will be awarded upon completion of the first semester to students who have earned an Associates of Science Degree.

The NDSU Online/Blended Accelerated (Post-Baccalaureate) BSN Nursing Program offers an opportunity to quickly build a path to a nursing degree. The Accelerated (Post-Baccalaureate) BSN Program is offered through the NDSU School of Nursing at Sanford Health site in Bismarck, North Dakota. Through this program, students build upon their prior bachelor's or graduate degree to accelerate into an in-demand opportunity in nursing.

The program will prepare students to become highly-skilled, compassionate nurses, and assist in meeting statewide healthcare workforce needs. The blended program includes in-person classes, with some online classes. Students are expected to attend all lab and clinical experiences in person.

Admission Requirements for Accelerated (Post Baccalaureate) BSN

1. Apply and be admitted to North Dakota State University (NDSU) or currently be an NDSU student.
2. Have a baccalaureate or graduate degree in a non-nursing major from a U.S. regionally accredited college or university. The degree must be completed and verified via official transcript(s) prior to enrollment in the program.
3. Cumulative GPA of a 2.75 or greater.
4. Complete the Accelerated (Post-Baccalaureate) BSN application.
5. Complete a Criminal Background Check (See College of Health Professions Policy 3.08).
   a. Fee paid by applicant via the school designated vendor.

For more information go to: https://www.ndsu.edu/nursing/degrees/accelerated_bsn/standard_accel_admit/

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Department Information

- **Department Web Site:**
  www.ndsu.edu/nursing/ (http://www.ndsu.edu/nursing/)
- **Credential Offered:**
  B.S.N.
- **Sample Program Guide:**
  catalog.ndsu.edu/programs-study/undergraduate/nursing/ (http://catalog.ndsu.edu/programs-study/undergraduate/nursing/)

Degree Requirements

Major: Nursing - Pre-Licensure Track

Degree Type: B.S.N.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**

or ANTH 111	Introduction to Anthropology	
Total Credits		**98**

1
NURS 150 is required for students with fewer than 24 earned transfer credits.

2

Will be used in the selective GPA calculation for admission to the Nursing program. Grades for three of the five sciences (lecture/lab) will be used for selective GPA.

Degree Requirements and Notes

- Students must maintain a semester GPA of 2.0 or above for each semester in the College of Health and Human Sciences. A student who fails to meet this standard for two successive or three non-successive semesters may be terminated from enrollment in the College.
- Would also accept the following course sequence in place of CHEM 117 Chemical Concepts and Applications/CHEM 117L Chem Concepts and Applications Lab: CHEM 121 General Chemistry I/CHEM 121L General Chemistry I Laboratory, CHEM 122 General Chemistry II/CHEM 122L General Chemistry II Laboratory or CHEM 121 General Chemistry I/CHEM 121L General Chemistry I Laboratory and CHEM 140 Organic Chemical Concepts and Applications.

Major Requirements

Major: Nursing - LPN to BSN Track

- 30 credits must be earned in residence at NDSU.
- 18 demonstrated competency credits will be awarded upon completion of the first semester to students who have earned an Associates of Applied Science Degree.
- 25 demonstrated competency credits will be awarded upon completion of the first semester to students who have earned an Associates of Science Degree.

Major Requirements

Major: Nursing - Post Baccalaureate Track

Degree Type: B.S.N.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	

ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**
Category W: Wellness †		**2**
Category D: Cultural Diversity *†		
Category G: Global Perspectives *†		
Total Credits		**39**

*****
Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†
General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Code	Title	Credits
Students in the post-baccalaureate track have already completed a bachelor's egree.

Organizational Leadership

Department Information

- **Department Web Site:**
  www.ndsu.edu/business/ (http://www.ndsu.edu/business/)
- **Credential Offered:**
  UG Certificate
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/organizational-leadership/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/organizational-leadership/)

The program is an undergraduate certificate in Organizational Leadership and is available to all students regardless of major. Students earning the certificate will learn contemporary leadership concepts and practices that will empower them to be leaders within their organizations and communities. Students will be exposed to modern leadership concepts, learn their personal leadership style, and expand their leadership skills to meet the demands of the modern organization. The program will provide students the knowledge and skills to lead teams and organizations entrepreneurially, virtually and ethically.

Pharmacy

Department Information

- **Department Web Site:**
  www.ndsu.edu/pharmacy/ (http://www.ndsu.edu/pharmacy/)
- **Credential Offered:**
  B.S.; Pharm.D.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/pharmacy/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/pharmacy/)

The Pharmacy program (PharmD) encompasses both the basic and clinical sciences and is designed to provide you with the knowledge, skills, and attitudes essential to the practice of pharmacy. Pharmacists work in concert with the patient and other health care providers to promote health and prevent diseases. This is achieved by assessing, monitoring, initiating and modifying patients' medication therapy to achieve optimal therapeutic outcomes.

The current entry-level PharmD curriculum is designed to give you the professional competencies necessary to enter pharmacy practice in any setting to ensure optimal medication therapy outcomes and patient safety, and to satisfy the educational requirements for licensure as a pharmacist.

The PharmD degree prepares you to accept positions in community, hospital, managed care, clinical, and industrial pharmacy. Other potential opportunities include administrative positions in pharmaceutical companies and associations. Also, teaching and research positions in universities and the pharmaceutical industry are excellent opportunities for those with advanced training in pharmacy.

There are four routes to pursue admission to NDSU's PharmD program.

Option 1: The Early Admission Pathway (https://www.ndsu.edu/pharmacy/degrees_and_programs/pharmacy_program/eap/)

The Early Admission Pathway (EAP) to NDSU's PharmD program is designed for academically qualified high school students who want an affordable, expedited path to a PharmD degree. If you are interested in EAP, you would apply during your senior year in high school.

Option 2: The Traditional Admissions Pathway (https://www.ndsu.edu/pharmacy/degrees_and_programs/pharmacy_program/traditional_pathway/)

The Traditional Admissions Pathway involves you entering the program as an undergraduate in pre-pharmacy upon meeting general admission standards of the university. Once all required pre-pharmacy coursework is satisfied, you can apply to the PharmD program. The pre-pharmacy course work may be completed at other institutions and NDSU reviews transfer records submitted and determine if equivalent to NDSU requirements.

You are admitted to the final four professional years on a competitive basis after meeting specific admission requirements of the college which can be found on the Traditional Pathway page (https://www.ndsu.edu/pharmacy/degrees_and_programs/pharmacy_program/traditional_pathway/). Students attending other institutions must maintain frequent contact with the college to determine appropriate course work.

The college is a member of the American Association of Colleges of Pharmacy, and is accredited by the Accreditation Council for Pharmacy Education (ACPE).

Option 3: The Post-Baccalaureate Pathway (https://www.ndsu.edu/pharmacy/degrees_and_programs/pharmacy_program/post_bac/)

Students who will hold a four-year bachelor degree in a health or STEM field on or before May 2025 are eligible to apply for admission to NDSU's PharmD program through a new, streamlined pathway. The pathway has fewer requirements because many of our admission requirements are implicitly met by students who have completed a bachelor degree in a health or STEM field. If an applicant holds a bachelor degree in a health or STEM field and is missing key pre-requisites, we offer a means to complete those courses in the summer before starting the PharmD program.

Note: the NDSU Pharmacy Program encourages applicants holding a four-year bachelor degree in an array of health or STEM fields, from any accredited college or university that offers four-year bachelor programs.

Option 4: Pharmacy Technician Pathway (https://www.ndsu.edu/pharmacy/degrees_and_programs/pharmacy_program/pharmtech_pharmd/)

Are you a pharmacy technician who is eligible for pharmacy technician licensure in North Dakota, and who is interested in becoming a pharmacist? If so, this new pathway is designed to provide you with a streamlined pathway to meet the NDSU Pharmacy Program's admission requirements. If you completed a pharmacy technician program at a college or university and received academic credit for your program, all of those credits will count towards meeting our admission requirements.

Differential Tuition

Students in the pharmacy professional program (i.e, the final five years of study for students on the **early admission path**, and the final four years for students on the **traditional admission path**) are assessed a different tuition rate. This differential tuition is assessed to cover the higher costs associated with the program.

Current Curriculum

The curriculum leading to the Pharm.D. degree requires a minimum of six years of study. Approximately 77 semester hours are required in the pre-professional curriculum. The vast majority of required pre-professional courses (listed by name and number) must be completed by the end of spring term prior to admission to the professional program for traditional path students, or for early admission students, the final four years of the professional program. A maximum of six elective credits may be taken during the summer prior to entrance in the professional program.

The four-year professional program is divided into three years of didactic education on campus and one year (40 weeks) of experiential training (advanced pharmacy practice experience) with qualified preceptors at various practice sites. Additional introductory experiential training occurs during the summer sessions following the first and second years of the professional program, as well as during the third professional academic year. A wide variety of experiential rotation offerings are available to students. Students should plan to travel outside the Fargo-Moorhead area to fulfill their experiential program requirements.

Our pharmacy program partners with PioneerRx *(*http://www.pioneerrx.com*/), a pharmacy management system, to simulate the functions of today's pharmacies.*

Pre-Pharmacy Traditional Pathway

All students interested in NDSU's Doctor of Pharmacy program must be accepted to study a major at NDSU. A formal NDSU application for admission must be submitted through the Office of Admission website (https://www.ndsu.edu/admission/) by all applicants, with exception of current or former NDSU students. Former students must apply for readmission to NDSU through the NDSU readmission page (https://www.ndsu.edu/admission/how_to_apply/readmission/).

In addition, students interested in pharmacy must apply to the professional pharmacy program. All applicants to the NDSU Doctor of Pharmacy program must apply using the through the link below.

A cumulative grade point average of 3.0 or higher is required before an applicant will be evaluated. Applicants who are NOT currently NDSU students must submit official transcripts of previous academic work to the University's Admissions Office and one set to the NDSU School of Pharmacy.

- PharmD Technical Standards. Students must meet ALL of these technical standards to be eligible for admission to the NDSU Doctor of Pharmacy program. Please reviews these standards before applying.

Sample Program Guide - Pre-Pharmacy Traditional Path

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should

utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

PRE-PHARMACY PROGRAM REQUIREMENTS

Plan follows most closely with Traditional 3-year pathway plan with allows room for a minor of study, other pathways may differ slightly

Selected core courses will be used for selection criteria to determine GPA in calculation for admission to the professional program.

1

Course can be taken fall semester if student tests out of ENGL 110

2

Minor not required but plan built to allow

Pre-Pharmacy EAP Pathway

The Early Admission Pathway (EAP) to NDSU's PharmD program is an early assurance program designed for academically qualified high school students who want an affordable, expedited path to a PharmD degree. If you are interested in EAP, you would apply during your senior year in high school. Acceptance into the EAP programs means that you are conditionally accepted to the PharmD program. As long as you successfully complete all requirements to maintain your spot, we assure you a seat in the final four years of the PharmD program. Thus if you meet program requirements, it

is a six-year path (saves up to 2 years of time in college). Sophomore EAP (P.5) students pay differential tuition and are considered professional-level students.

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

PRE-PHARMACY EAP PROGRAM REQUIREMENTS

Plan follows most closely with EAP 2-year pathway plan, other pathways may differ slightly. Differential tuition applies to second year of coursework.

1
Curricular plan based on traditional admissions path or early acceptance path. Consult adviser for additional information.

Selected Core Courses

Selected core courses will be used for selection criteria to determine GPA used in calculation for admission to the professional program. These courses must show evidence of letter grade, or other means of demonstrating acceptable competency (i.e. AP – CEEB) and MUST be completed by the end of fall semester prior to the admissions deadline to apply to the pharmacy program. Remaining courses, which are required and listed in

the pre-pharmacy curriculum, MUST be completed by the end of spring term. The only exception to this is that up to six credits of electives may be completed during the summer term.

Pre-Professional Pharmacy Requirements and Notes

- **All courses listed for pre-pharmacy must be complete in order to apply for the professional program in the last spring semester in which pre-requisite courses are taken.**

Degree Requirements and Notes

- All required courses must be completed with a grade of 'C' or above.
- All students must maintain a semester GPA of 2.0 or above for each semester in the College. A student who fails to meet this standard for two successive or three non-successive semesters may be terminated from enrollment in the College of Health Professions.

Major Requirements

Major: Doctor of Pharmacy

Degree Type: Pharm.D.
Minimum Degree Credits to Graduate: 156

Professional Pharm.D. Requirements

The following Pharm.D. requirements included here are subject to change per department. Students follow the curricula developed by the School of Pharmacy and any changes that occur while in the program will be communicated to the students by the School of Pharmacy. All courses must be completed with a grade of "C" or higher or "P" if a pass/fail course.

In addition to curriculum listed below, 6 credits of Professional Elective MUST be completed PRIOR to P4 year. Other changes to curriculum will be conveyed to students as they are approved.

2

List of professional electives in handbook/Blackboard. Must be completed before P4 year.

Students applying to the Doctor of Pharmacy Program

- Applicants who are NOT currently NDSU students must submit official transcripts of all previous academic work to the University's Admissions Office.
- Students not previously enrolled at NDSU must apply both to NDSU and to the School of Pharmacy within College of Health and Human Sciences. Visit NDSU's application page (https://www.ndsu.edu/apply/) to apply.

Philosophy, Ethics, and Applied Humanities

Department Information

- **Department Web Site:**
  www.ndsu.edu/history/philosophy/ (http://www.ndsu.edu/history/philosophy/)
- **Credential Offered:**
  B.A.; B.S.; Minor
- **Official Program Curriculum:**

catalog.ndsu.edu/undergraduate/program-curriculum/philosophy-ethics/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/philosophy-ethics/)

The Program

People have always had fundamental questions about the world in which they live, such as what is truth, knowledge, morality, goodness, or life's meaning? By means of dialogue, logic, critical reasoning, and creative thought, philosophers have trailblazed pathways to practical wisdom and an understanding of the human condition, which not only helps our students live more fulfilled lives but makes them more competitive in their careers.

The Faculty

- Dennis Cooley
- Anthony Flood
- Bradley Morris
- Adam Taylor

The Major

The Philosophy, Ethics, and Applied Humanities major consists of 32 semester credits: 15 required and 17 elective credits, which can be independent studies, complete the major.

The Minor

The Philosophy, Ethics, and Applied Humanities minor consists of 21 semester credits: 12 required and 9 elective credits, which can be independent studies, complete the minor.

Independent Study

Independent study along the lines of Oxford tutorials may be pursued by students wanting to read on a special philosophical topic (e.g., aesthetics) or read the work of a particular philosopher. To initiate independent study, students must contact a philosophy faculty member.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Philosophy, Ethics, and Applied Humanities

Degree Type: B.A. or B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	

Upper Division Writing †	
Category R: Quantitative Reasoning †	**3**
Category S: Science and Technology †	**10**

Course may be taken as an elective if not taken as part of the core requirements.

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.

Physical Education

Department Information

- **Department Web Site:**
  www.ndsu.edu/education/ (http://www.ndsu.edu/education/)
- **Credential Offered:**
  B.S.; B.A.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/physical-education/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/physical-education/)

The Physical Education (https://www.ndsu.edu/hpe/undergraduate_programs/physical_education/) program provides opportunities for students to become critical thinkers, creative planners and effective practitioners in various physical activity contexts. To be successful in this field, one must a) develop foundational knowledge within the physical, biological and social sciences and be able to apply this knowledge through best practices; b) be able to plan and facilitate physically and emotionally safe activities, and c) have a professional disposition committed to ethical behavior, respecting individual differences, and helping individuals learn and grow.

Physical Education Program Options

Option One: K-12 Teacher Licensure

The licensure program prepares students with the skills and techniques necessary to begin a successful teaching career in K-12 physical education. The program is aligned with both the Society of Health and Physical Educators of America Initial Physical Education Teacher Education Standards (https://www.shapeamerica.org/accreditation/peteacherprep.aspx) and the Physical Education standards set forth by the North Dakota Education Standards and Practices Board (ESPB). Courses are strategically structured to be sequential in nature. Teacher candidates develop their teaching skills and confidence through a variety of hands-on teaching experiences prior to student teaching. These experiences include our unique NDSU Let's Move in Homeschool physical education program held on campus each fall and spring as well as Adopt-a-School service-learning program.

Students take courses in both the Health, Physical Education, and Recreation (HPER) and the School of Education (SOE). Students are fully admitted into the program when they have met the admission requirements established by the SOE. Coursework concludes with a culminating semester-long student teaching experience and graduates of this option meet the requirements for K-12 physical education licensure.

Teacher candidates in this option may enroll in the 300-level professional education courses before being formally admitted to the SOE. Prior to enrolling in the 400-level EDUC courses, teacher candidates must complete the application for admission to the SOE; earn required grades in all core physical education courses (as specified in the handbook); maintain at least a 2.75 cumulative grade point average in their course work and education courses; and pass the Core Academic Skills for Educators test or meet minimum scores on the ACT+. Requirements for admission can be found on the **School of Education website**.

STUDENT TEACHING

Student teaching (clinical practice) is the culmination of the teaching program. During the clinical practice, teacher candidates apply the knowledge and skills acquired in their college courses to real-world classrooms under the supervision of experienced physical education teachers in elementary, middle and high schools. Faculty members from NDSU conduct regular on-site visits to support, encourage, and evaluate teacher candidates so that they gain the confidence and ability to join the teaching profession after graduation.

DOUBLE MAJOR

It is recommended that physical education majors obtain a degree enhancement through licensing, certification or a double major. The physical education curriculum has been structured to allow students to also complete a health education major during the same four-year time frame. The acquisition of additional credentials helps to prepare future professionals, giving them a broader area of expertise and making them more marketable. For further information about school health education, please refer to the Health Education (https://www.ndsu.edu/hpe/undergraduate_programs/health_education/)website.

CERTIFICATION

Upon completing this program, teacher candidates are eligible for teacher licensure in physical education in most states. Our PETE program is accredited by the Council for the Accreditation of Educator Preparation (CAEP) and approved by the North Dakota Education Standards and Practices Board (ESPB).

Option Two: Coaching and Physical Activity Leadership

This option prepares students for careers in coaching, recreation, and youth physical activity programming. The program is aligned with the Society of Health and Physical Educators of America (SHAPE) National Standards for Sports Coaches (https://www.shapeamerica.org/standards/coaching/) and promotes best practices in physical activity settings. Coursework focuses on youth development, injury care and prevention, planning and facilitation of physical activity programming, and instructional strategies for physical activity settings. Students have opportunities to engage in various field experiences prior to the culminating semester-long internship experience . Students must maintain a 2.75 cumulative grade point average in order to graduate.

TECHNOLOGY

Physical education majors at North Dakota State University are taught how to use and apply a variety of technologies and software to analyze physical activity skills and strategies, assess student/athlete progress towards meeting standards and outcomes/goals, and reflect on both their teaching/coaching effectiveness and student/athlete progress.

CAREER OPPORTUNITIES

Graduates in physical education find career opportunities teaching in both public and private educational settings, coaching within the community, athletic programs including college athletics, community sports positions with parks and recreation facilities, and/or local recreation organizations such as the YMCA. If interested in coaching at higher education institutions, students are encouraged to maintain a 3.0 GPA to increase their likelihood of acceptance into graduate school to pursue the necessary master's degree required to coach at this level.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. Students must earn a grade of "B" or better for the K-12 Teacher Licensure Option

2

Students must earn a "C" or better for the K-12 Teacher Licensure Option

3

Students may only earn one "C" among these three courses for the K-12 Teacher Licensure Option

4

Students must earn a "B" or better (Both Options)

Degree Requirements and Notes

- K-12 Teacher Licensure Option
  - To be placed in student teaching, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required.
  - To exit the program, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required as well as completing the Praxis Subject test and the Principles of Learning and Teaching test.
  - Courses taken *Pass/Fail* will not be used to satisfy any requirements other than total credits.
  - See School of Education (https://www.ndsu.edu/education/) for admission requirements.
- Coaching and Physical Activity Leadership Option
  - A GPA of 2.75 or better is required to exit from the program.
  - Courses taken *Pass/Fail* will not be used to satisfy any requirements other than total credits.

Physics

Department Information

- **Department Web Site:**
  www.ndsu.edu/physics/ (http://www.ndsu.edu/physics/)
- **Credential Offered:**
  B.S.; B.A.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/physics/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/physics/)

Physics is the most fundamental and exact of the physical sciences. Its laws are basic to deep understanding in all of technology, and in many fields of study, such as astronomy, chemistry, engineering, materials science, photonics, biology, medicine, geology, and environmental science. Physicists often end up in a wide range of leadership positions.

Background Information

The Department of Physics has growing undergraduate and graduate programs. Yet, its size remains comparatively small, allowing personalized interactions between students with all of its 11 faculty members. Not only do students participate in research projects early on, they often become authors in peer-reviewed publications and present their results in the regional and national conferences and workshops. In addition, our students are highly engaged; they regularly participate successfully in the University Physics Competition and contribute actively to various outreach activities.

The Department of Physics has a strong research focus on three fields: materials (especially soft materials), computational physics, and physics education research. While this represents only a small subset of all existing physics fields, our focus makes us competitive and successful on the national level and beyond. Students can choose among a number of curricular options that prepare them for industrial, governmental, and academic careers. The Fargo/Moorhead urban area contains three colleges with a physics program. See https://www.ndsu.edu/onestop/registration/tricollege (https://www.ndsu.edu/onestop/registration/tricollege/) for information about the Tri-College system.

High School Preparation

A prospective physics major is generally expected to have taken physics, chemistry, and mathematics courses. Computer courses can also be useful. Incoming students should normally be ready to start learning calculus. Some of our incoming students have already taken AP courses in physics or mathematics. Note, however, that deficiencies in any of these subjects may be remedied in the freshman or later years at the University.

Curriculum Options

The most popular curricular option in the Department of Physics is the standard physics major. Also popular are our two dual major programs in Physics and Mathematics as well as in Physics and Computer Science. Also, we offer dual majors in Electrical Engineering and Physics, and in Mechanical Engineering and Physics. All these programs allow well-prepared students to complete the requirements for both majors in four years by taking advantage of the close connections between physics, mathematics, computer science, and engineering. In addition, the department offers a physics major with a focus on optical science and engineering. The optical science and engineering option, which is the only regional program of this type, includes an interdisciplinary optics/photonics sequence of courses taught by the Department of Physics and the Department of Electrical and Computer Engineering using a state-of-the-art optics teaching laboratory. Finally, highly qualified students can earn both a Bachelor's and Master's degree in physics by enrolling into the Accelerated Masters program in their junior year.

All of our physics majors (including the dual majors and physics majors with the optical science and engineering option) take introductory courses in classical mechanics, computational physics, electricity and magnetism, optics, thermodynamics, quantum mechanics, and modern physics, as well as selected specialized courses such as photonics, lasers, or condensed matter physics. In addition, physics majors can get involved in research projects with faculty, typically in fields like materials (including bio- and polymer physics), computational physics, and physics education research. A dedicated course allows students to receive credit for their research efforts. Any of our curriculum options prepares students for graduate work in physics or related fields and subsequent employment in industry, government, or academia. Physics graduates have excellent job perspectives because they are widely valued as creative and persistent problem solvers who are often able to step into leadership positions.

Career Opportunities

A great variety of employment opportunities exist for physics majors who wish to pursue careers after obtaining a bachelor's degree. Some find positions in industry or government. Many technical industries seek physics graduates for work in software development, engineering, science and lab technician positions, management and sales. According to the results of the National Association of Colleges and Employers Winter 2024 Salary Survey, physics majors were expected to receive an average starting salary of $75,753.

As technology continues to develop, there will be a need for skilled people to make new discoveries in the basic sciences. Because of this, talented physics majors are encouraged to pursue the doctoral degree. Outstanding doctoral graduates in physics find research and teaching positions in universities or employment in government laboratories and research-oriented industries.

An education in physics is so fundamental that it provides an excellent preparation for graduate education in nearly every technical field, including engineering. Additionally, North Dakota State University graduates in physics have entered medical schools and have studied law. One past graduate received a doctorate in biophysics and now works at the University of Minnesota Medical School; another is at the Mayo Clinic in Rochester, MN. Some of our recent graduates worked on advanced degrees in biomedical engineering, chemical physics, electrical engineering, solid-state physics, meteorology and radiological science. A number of recent graduates have pursued graduate studies at schools such as Cornell University, the University of Minnesota, Carnegie Mellon University, Ohio State University, University of Illinois at Chicago, State University of New York Stony Brook, Rutgers University and Northwestern University.

Financial Aid

Financial aid at NDSU is available in the form of loans, grants, scholarships, and work-study. Students who qualify for federal college work-study may be paid for work on department research projects. Highly qualified students may be hired through the Department of Physics or the College of Arts and Sciences as undergraduate Research Assistants (RA) or Learning Assistants (LA).

Internships

The Cooperative Education Program provides students the opportunity to earn money and gain valuable experience by spending one or more semesters working in industrial or government laboratories. Internship opportunities include Sanford Medical Center in Fargo and NASA. Students may also apply to participate in research projects through the Department of Physics or Research Experience for Undergraduates program at NDSU or other institutions.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Freshman				
Fall	**Credits**		**Spring**	**Credits**

Total Credits: 120

1

Students who place into a math course lower than MATH 165 may need to extend their time to degree completion by up to a year.

Physics

Department Information

- **Department Web Site:**
  www/ndsu.edu/physics/ (http://www/ndsu.edu/physics/)

- **Credential Offered:**
  B.S.; B.A.; Minor
- **Sample Program Guide:**
  catalog.ndsu.edu/programs-study/undergraduate/physics/#planofstudytext (http://catalog.ndsu.edu/programs-study/undergraduate/physics/#planofstudytext)

Major Requirements

Major: Physics (Standard & Optical Science and Engineering Options)

Degree Type: B.A. or B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**
Category W: Wellness †		**2**
Category D: Cultural Diversity *†		
Category G: Global Perspectives *†		
Total Credits		**39**

*****
Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†
General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Physics Major Requirements

A grade of 'C' or better is required for all PHYS and AST prefix courses.

Code	Title	Credits
Major Core Requirements		
PHYS 171	Introductory Projects in Physics	1
PHYS 251 & 251L	University Physics I and University Physics I Laboratory (May satisfy general education category S)	5

PHYS 252 & 252L	University Physics II and University Physics II Laboratory (May satisfy general education category S)	5
PHYS 350	Modern Physics	3
PHYS 355		3
PHYS 360	Modern Physics II	3
PHYS 361	Electromagnetic Theory (or PHY 370: Electromagnetic Theory from MSUM)	3
PHYS 370	Introduction to Computational Physics	3
PHYS 411 & 411L	Optics for Scientists & Engineers and Optics for Scientists and Engineers Lab	4
PHYS 462	Thermal and Statistical Physics	3
PHYS 485	Quantum Mechanics I	3
PHYS 486	Quantum Mechanics II	3
PHYS 488	Senior Project I	1
PHYS 489	Senior Project II	2
CSCI 160	Computer Science I	4
or ECE 173	Introduction to Computing	
MATH 129	Basic Linear Algebra	3
or MATH 329	Intermediate Linear Algebra	
MATH 165	Calculus I (May satisfy general education category R)	4
MATH 166	Calculus II	4
MATH 265	Calculus III	4
MATH 266	Introduction to Differential Equations	3
MATH Electives - Select 6 credits from the following:		6
MATH 270	Introduction to Abstract Mathematics	
MATH 400 Level		
Select one of the following chemistry sequences (150/160 is recommended):		4
CHEM 150 & CHEM 160	Principles of Chemistry I and Principles of Chemistry Laboratory I	
CHEM 121 & 121L	General Chemistry I and General Chemistry I Laboratory	
Select one of the following chemistry sequences (151/161 recommended):		4
CHEM 151 & CHEM 161	Principles of Chemistry II and Principles of Chemistry Laboratory II	
CHEM 122 & 122L	General Chemistry II and General Chemistry II Laboratory	
Option Requirement		
Select either the Standard option or the Optical Science & Engineering option to complete this major (requirements below).		10
Total Credits		**88**

Code	Title	Credits
STANDARD OPTION		
CSCI 161	Computer Science II	4
Physics Electives: Select two courses from the following:		6
PHYS 215	Research For Undergraduates	
PHYS 413	Lasers for Scientists and Engineers	
PHYS 415	Elements of Photonics	
PHYS 481	Materials Physics	
MSUM AST	Astronomy courses (300/400 level) with departmental approval	
PHYS 357	Concordia College Astrophysics	
PHYS 419	Concordia College Introduction to General Relativity	
Total Credits		**10**

Code	Title	Credits
OPTICAL SCIENCE AND ENGINEERING OPTION		
PHYS 413	Lasers for Scientists and Engineers	3
PHYS 415	Elements of Photonics	3
EE 206	Circuit Analysis I	4
Total Credits		**10**

Program Notes

- Except for courses offered only as pass/fail grading, no course may be taken Pass/Fail.

Minor Requirements

Minor: Physics

Required Credits: 19

Code	Title	Credits
Required Courses		
PHYS 251	University Physics I	4
PHYS 252	University Physics II	4
PHYS 252L	University Physics II Laboratory	1
PHYS 350	Modern Physics	3
Electives: Select 7 credits from the following:		7
PHYS 171	Introductory Projects in Physics	
PHYS 251L	University Physics I Laboratory	
PHYS 215	Research For Undergraduates	
Any 300-400 level Physics course		
ME 221 and ME 222 may be substituted for PHYS 251 and PHYS 251L		
Total Credits		**19**

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.

Physics Education

Department Information

- **Department Web Site:**
  www.ndsu.edu/education/ (http://www.ndsu.edu/education/)
- **Credential Offered:**
  B.S.; B.A.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/physics-education/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/physics-education/)

Physics is the most fundamental and exact of the physical sciences. Its laws are basic to deep understanding in all of technology, and in many fields of study, such as astronomy, chemistry, engineering, materials science, photonics, biology, medicine, geology, and environmental science. Teaching physics in secondary schools requires deep knowledge of (a) science content, (b) current theories of adolescent development, and (c) current best practices in instruction. Accordingly, the physics education major combines coursework in physics and related sciences with professional education courses on teaching and learning.

The Program

Candidates in physics education are prepared to teach students in grades 5-12 with skill and confidence. The program is designed to develop science content knowledge as well as proficiency in a range of science-related skills and laboratory practices. Our professional education courses prepare teacher candidates to incorporate active learning strategies, create effective methods for assessment, and adjust instruction to accommodate diverse learners. Teacher candidates also apply their knowledge and build their teaching skills during multiple clinical experiences in local schools.

Professional Education Courses

Teacher candidates may enroll in the 300-level professional education courses before being formally admitted to the School of Education (SOE). Prior to enrolling in the 400-level courses, teacher candidates must complete the application for admission to the SOE; attain a minimum of a 2.75 grade point average overall in their course work and education courses; and pass the Praxis Core Academic Skills test or meet minimum scores on the ACT+. Requirements for admission can be found on the School of Education website (https://www.ndsu.edu/education/).

Student Teaching

Student teaching (clinical practice) is the culmination of the teacher preparation program. During the clinical practice, teacher candidates apply the knowledge and skills acquired in their college courses to real-world classrooms under the supervision of experienced science teachers in middle or high schools. Faculty members from NDSU conduct regular on-site visits to support, encourage, and evaluate student teachers so that they gain the confidence and ability to join the teaching profession after graduation.

Student Advisement

Physics education teacher candidates are assigned to academic advisors who work closely with them to plan their programs of study and to advise and assist them as they progress to degree completion. Students are encouraged to meet with their advisor at least once every semester, as well as whenever needed.

Licensure

Upon completing this program, teacher candidates are eligible for teacher licensure in physics in most states. Teacher candidates who take the Praxis Subject Assessment exam for Physics will be licensed to teach Physics and related courses, as well as middle school sciences. Teacher candidates who choose to take the Praxis Subject Assessment exam for General Science will be licensed to teach all areas of middle school and high school science. Our program is accredited by the Council for the Accreditation of Educator Preparation (CAEP) and approved by the North Dakota Education Standards and Practices Board (ESPB).

Career Opportunities

Science teachers are in high demand across the country, so our graduates usually obtain full-time employment in school districts shortly after graduation. Notably, by completing 6 additional credit hours, physics education majors can become licensed to teach mathematics as well. See your academic advisor for specific course requirements.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Degree Requirements and Notes

- See School of Education (https://www.ndsu.edu/education/) for admission requirements.
- Courses taken P/F may not be used to satisfy any requirements.
- A grade of 'C' or better is required in all professional education courses.
- To be placed in student teaching, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required.
- To exit the program, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required as well as completing the Praxis Subject test and the Principles of Learning and Teaching test.
- Adding Mathematics as an additional teacher licensure area can be accomplished with 6 additional credit hours. See your academic advisor for details.

Political Science

Department Information

- **Department Web Site:**
  www.ndsu.edu/politicalscience/ (http://www.ndsu.edu/politicalscience/)
- **Credential Offered:**
  B.S.; B.A.; Minor
- **Official Program Curriculum:**

catalog.ndsu.edu/undergraduate/program-curriculum/political-science/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/political-science/)

Political Science is the study of politics, policy, and social forces from domestic, international, and comparative perspectives. It is the ongoing examination of social behavior, public and private institutions, international relations, domestic and international law, public policy, and the many varieties of political ideologies. Political Science coursework provides students with an understanding of how government affects their everyday lives while simultaneously developing their communication, critical thinking, and analytic skills.

THE PROGRAM

Political Science prepares you for careers in public service, the legal professions, non-profit organizations, and the private sector. We offer:

- Flexible course loads: Students in our major can focus on those aspects of politics and policy that interests them most
- In-demand skills: Our programs build such skills as written and spoken communications, data analysis, policy evaluation, and legal reasoning.
- Hands-on learning: Our internship program (https://www.ndsu.edu/politicalscience/careers/political_science_internships/), undergraduate research opportunities, and study abroad programs provide students with multiple ways of acquiring skills and knowledge outside the classroom.
- Community: Student organizations such as the Pre-Law Club (https://www.ndsu.edu/politicalscience/student_experience/pre_law_club/) and Pi Sigma Alpha (https://www.ndsu.edu/politicalscience/student_experience/pi_sigma_alpha/) help students to connect with peers, build professional networks, and prepare for post-college life.

Experience

Political science offers annual study abroad experiences with recent visits to the British Parliament, the Hague, Italy, and the European Commission. Political science internships provide real-world experiences in government, political parties and campaigns, legal affairs, and public policy. The Upper Midwest Center on Public Policy (https://www.ndsu.edu/centers/publicpolicy/) offers students opportunities to conduct research on politics and public policy.

Career Opportunities

Careers for political science graduates can be found in such areas as law, policy analysis, civil service, interest groups and associations, program administration, local and state government, non-profit organizations, diplomatic service, communications, business, and other critical fields.

Many political science students go on to attend law school and pursue a legal profession. NDSU students have graduated from such law schools as the University of North Dakota, the University of Minnesota, the University of Michigan, the University of Washington, Northwestern University, Duke, and George Washington University. Other students have pursued graduate studies in public administration and public policy and gone on to careers in public administration, regional planning, non-profit management, consulting, and academia.

Scholarships

There are a number of scholarships available to students within the Political Science program. Visit the department website (https://www.ndsu.edu/politicalscience/) for information.

Extra-Curricular Activities

The Department of Political Science & Public Policy works closely with the Pre-Law Club, a student organization for students interested in attending law school. The Club holds regular events, invites lawyers and law school administrators to discuss careers, and provides information about law schools, entrance examinations, and career opportunities.

Accelerated mpp

The Department of Political Science & Public Policy is proud to offer an accelerated Master of Public Policy (https://www.ndsu.edu/politicalscience/academics/graduate_program/#:~:text=Master%20of%20Public%20Policy&text=NDSUs%20Master%20of%20Public%20Policy,policy%20design%20and%20program%20evaluation) (MPP) option that allows students to complete a BA/BS in Political Science and an MPP in as little as 5 years.

The Faculty

Faculty in the Department of Political Science and Public Policy have expertise in such areas as state and local governance, law and judicial politics, crime-related policy, international law, the modern digital society, research methodology, and policy analysis. They provide a practice-informed education for NDSU students. We encourage students who want to learn more about the Pre-Law Minor to reach out via email or schedule an appointment using Bison Advise (https://career-advising.ndsu.edu/about-bison-advise/).

Faculty members include:

Dr. Thomas Ambrosio, Professor, Ph.D., 2000, University of Virginia.

Dr. Nicholas Bauroth, Professor, Ph.D., 2003, Loyola University Chicago

Dr. Sarah Boonstoppel, Assistant Professor, Ph.D., 2014, University of Maryland

Dr. Steven Briggs, Associate Professor, Ph.D., 2007, University of Nebraska at Omaha.

Dr. Elizabeth Carlson, Associate Professor, Ph.D., 2011, University of California Los Angeles

Dr. Kjersten Nelson, Professor, Ph.D., 2009, University of Minnesota.

Dr. Daniel Pemstein, Professor, Ph.D., 2010, University of Illinois.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

First Year			
Fall	**Credits**	**Spring**	**Credits**

Total Credits: 120

1

Select a minimum of five courses from at least three of the four areas (Areas 1-4)

Political Science

Department Information

- **Department Web Site:**
  www.ndsu.edu/politicalscience/ (http://www.ndsu.edu/politicalscience/)
- **Credential Offered:**
  B.S.; B.A.; Minor
- **Sample Program Guide:**
  catalog.ndsu.edu/programs-study/undergraduate/political-science/#planofstudystandardtext (http://catalog.ndsu.edu/programs-study/undergraduate/political-science/#planofstudystandardtext)

Major Requirements

Major: Political Science

Degree Type: B.A. or B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**
Category W: Wellness †		**2**
Category D: Cultural Diversity *†		
Category G: Global Perspectives *†		
Total Credits		**39**

*****
Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†
General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Code	Title	Credits
Core Requirements		
POLS 110	Introduction to Political Science (May satisfy general education category B)	3
or POLS 115	American Government	
POLS 220	International Politics	3
or POLS 225	Comparative Politics	
POLS 240	Political Ideologies	3
POLS 325	Applied Research Methods	3
POLS 470	Quantitative Methods for Political Science and Public Policy	3
Select a minimum of five courses from at least three of the four areas listed below (Area 1-4):		15
Area 1:		
POLS 351	Women and Politics	
POLS 420	Political Behavior-Executive-Legislative Process	
POLS 421	Political Behavior-Political Parties	
POLS 422	State and Local Politics	
POLS 423	Public Policy Analysis	
POLS 424	Inequality and Public Policy	
Area 2:		
POLS 424	Inequality and Public Policy	
POLS 430	Constitutional Law-Civil Liberties	
POLS 431	Constitutional Law-Criminal Justice	
POLS 432	Crime and Public Policy	
POLS 433	Law and Public Policy	
POLS 447	U.S. National Security Law	
Area 3:		
POLS 442	Global Policy Issues	
POLS 444	International Law	
POLS 445	Ethnic Conflicts	
POLS 453	Environmental Policy and Politics	
POLS 446	International Criminal Law	
POLS 447	U.S. National Security Law	
Area 4:		
POLS 442	Global Policy Issues	
POLS 450	Politics of the Developing Countries	
POLS 451	Politics of the Industrialized Countries	
POLS 452	Comparative Political Economy	
POLS 453	Environmental Policy and Politics	
POLS 454	Comparative Democratic Institutions	
Political Science Electives		9
Any POLS prefix class (except POLS 397) and no more than 3 credits of POLS 494 and POLS 496.		
Total Credits		**39**

Degree Notes:

- An optional accelerated program in the B.S./B.A. in Political Science degree and the Masters in Public Policy (MPP) is available.
  - Students may apply for admission to the accelerated undergraduate political science program after completing a minimum of 60 undergraduate credits.
  - Students must have a minimum 3.5 cumulative GPA for admission to the MPP graduate program. The GRE is not required for admission to the MPP program in this accelerated option.
  - Students admitted to the MPP program must complete a ***Accelerated Degree Program Declaration Form*** upon admission.
  - Students admitted in the accelerated program may count up to 15 graduate credits toward the undergraduate degree. These 15 credits must come from 600 and 700 level classes that fulfill requirements in the MPP program.

Code	Title	Credits
POLS 623	Public Policy Analysis (Use for Area I)	3
POLS 710	Global Public Policy (Use for Area IV)	3
POLS 705	Policy Design and Evaluation (Use for POLS elective)	3
POLS 724	Public Budgeting and Finance (Use for Area I)	3
POLS 726	Harm Reduction for Policymakers (Use for POLS elective)	3
POLS 670	Quantitative Methods for Political Science and Public Policy (Use for POLS elective)	3

Minor Requirements

Minor: Political Science

Required Credits: 21

Code	Title	Credits
Required Courses		
POLS 110	Introduction to Political Science	3
or POLS 115	American Government	
POLS 220	International Politics	3
or POLS 225	Comparative Politics	
POLS 240	Political Ideologies	3
Electives		**12**
Any POLS prefix classes with no more than 3 credits of POLS 494 and POLS 496. Minimum of 6 credits must be at or above 300 level.		
Total Credits		**21**

Precision Agriculture Technology & Management

Department Information

- **Department Web Site:**
  www.ndsu.edu/aben/ (http://www.ndsu.edu/aben/)
- **Credential Offered:**
  B.S.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/precision-agriculture/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/precision-agriculture/)

The Program

The Precision Agricultural Technology & Management (PATM) program combines an understanding of farming, agricultural economics, business and sciences, managerial and technical skills. This understanding of agricultural science, technology, and related practices, including unmanned aerial systems (drones), remote sensing, artificial intelligence, machine learning, sensors, robotic applications, cloud computing, big data management, and site-specific resources management is a crucial component of modern agriculture. Students will learn how to use the applications that are commonly needed to produce and process food, feed, fiber and fuel, as well as how to market, conduct sales and distribute agricultural products and services. Graduates enter the job market ready to meet the needs of their employer and clients that need help managing precision agricultural technology.

The Precision Agricultural Technology & Management (PATM) program in the Department of Agricultural and Biosystems Engineering has two emphasis areas:

- Precision Agriculture (PAG)
- Agricultural Technology (ATM)

Both emphasis areas lead to a Bachelor of Science degree in Precision Agricultural Technology and Management.

internships

The curriculum requires at least one internship, but students are highly encouraged to take advantage of as many internship opportunities as they wish, especially co-operative education experiences (paid internships). These are great opportunities for students to gain hands-on experience working with precision agriculture technologies. In addition, internship experiences allow students to make more informed decisions regarding their major, to make better selection of elective courses, and open doors for employment upon graduation.

Career opportunities

Opportunities for PATM graduates are many and diverse. Graduates may, for example, be employed by companies providing equipment and technical services related to precision agriculture, such as Titan Machinery, RDO Equipment, FarmersEdge, InteligentAg, and John Deere. The adoption of aerial remote sensing and artificial intelligence is on the rise in both private and public sectors, which creates new employment opportunities for PAG graduates. In addition, one always can start his/her own business as a private consultant on precision agriculture. Graduates in our Agriculture Technology option find successes with companies such as Pioneer, ADM, RDO Equipment, and Titan Machinery as Business Managers, Elevator Majors, and Agronomist.

Scholarships

Several scholarships are available through the department. These scholarships range from $500 to $4,500. Students also may be eligible for scholarships from the College of Agriculture, Food Systems, and Natural Resources.

A well equipped teaching facility

The PATM degree program is housed in Ladd Hall and the NDSU Pilot Plant West which includes offices, classrooms and laboratories. Laboratories are furnished with equipment typical of that used in industry and research, such as personal computers with software used to manipulate and to write prescriptions to field equipment, several models of unmanned aerial systems (drones), a variety of sensors/cameras (RGB, multispectral, and hyperspectral) mounted to drones and to benches in the lab, tractors, engines, surveying equipment, etc. Faculty expertise varies across a wide and diverse range of specialties related to agricultural and biological systems.

Common Job Outcomes - PAG

- Drone Operator
- Engineering Technician
- Agricultural Crop Consultant
- Technical Support Specialist
- Sales Manager

Common Job Outcomes - ATM

- Farm Owner/Manager
- Plant Manager
- Agricultural Sales
- Grain Cooperative Manager
- Grain Merchandiser
- Engineering Technician
- Irrigation Manager
- Production Supervisor
- Agricultural Crop Consultant
- Technical Support Specialist
- Sales Manager
- Farm Credit Analyst

ME 311	Introduction To Aviation
ME 312	Introduction to Flight
ME 313	Commercial Instrument Ground School
PAG 115L	Introduction to Precision Agriculture Lab
PAG 315	Electronic Systems in Precision Ag
PAG 455	Applications of Big Data in Precision Agriculture
PAG 475	Precision Ag Systems Capstone
PLSC 225	Principles of Crop Production
NRM 453	Rangeland Resources Watershed Management
SOIL 217	Introduction to Meteorology & Climatology
SOIL 322	Soil Fertility and Fertilizers
Total Credits	**17**

Minor Requirements and Notes:

- A minimum of 8 credits must be taken at NDSU.
- Students must earn a minimum 2.00 GPA for the minor requirements.

Pre-Law

Department Information

- **Department Web Site:**
  www.ndsu.edu/politicalscience/ (http://www.ndsu.edu/politicalscience/)
- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/pre-law/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/pre-law/)

The Pre-Law Minor provides students with an understanding of the American judicial system, US Constitutional law, international law, ethics, and national security issues. The interdisciplinary coursework promotes critical thinking, rigorous analysis, effective oral and written communications, and other skills necessary to succeed in law school and beyond.

The Pre-Law Minor is open to all majors.

EXTRA-CURRICULAR ACTIVITIES

Students interested in a law career are urged to join the Pre-Law Club. The Pre-Law Club is a student organization at NDSU that provides information about law schools, entrance examinations, and career opportunities. The Pre-Law Club organizes Law School Admission Test (LSAT) preparation and practice events, meetings with prominent attorneys and jurists, and field trips to courts and law schools in the region. It's also a great opportunity to socialize with other students who are preparing for law school.

THE FACULTY

Faculty in the Department of Political Science and Public Policy have expertise in such areas as state and local governance, law and judicial politics, crime-related policy, international law, the modern digital society, research methodology, and policy analysis. They provide a practice-informed education for NDSU students. We encourage students who want to learn more about the Pre-Law Minor to reach out via email or schedule an appointment using Bison Advise (https://career-advising.ndsu.edu/bisonadvise/).

Can take as an elective if not used in the core or in the case law area.

Program Notes:

- All course pre-requisites apply.
- Political Science Majors: Courses completed for this minor cannot be double-counted with the Political Science major.

Private Enterprise

Department Information

- **Department Web Site:**
  www.ndsu.edu/agecon/ (http://www.ndsu.edu/agecon/)
- **Credential Offered:**
  UG Certificate
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/private-enterprise/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/private-enterprise/)

The private enterprise certificate introduces students to the fundamentals of business and it gives students an appreciation for the differences between different economic systems (e.g. socialism and capitalism) and their implications. The certificate also gives students an appreciation for the positive role that entrepreneurs and businesses can play in society, and engages students in discussion and critical thinking surrounding important societal issues.

- **Credential Offered:**
  Minor; UG Certificate
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/professional-ethics/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/professional-ethics/)

Professional Ethics is a high demand area, especially if combined with compliance training. Many different professions require annual ethics training, passing ethics exams to certify professionals, and compliance with state and federal laws affecting human participant research, animal research, information, engineering, science, technology, etc.

Recognized education in Professional Ethics is a wise investment for students to make. It gives them an advantage with future employers, makes them more able to act ethically in their professions and personal lives, and provides them the skills to be ethics leaders for their employers, business community, and public communities.

Professional Selling

Department Information

- **Department Web Site:**
  www.ndsu.edu/business/ (http://www.ndsu.edu/business/)
- **Credential Offered:**
  UG Certificate
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/professional-selling/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/professional-selling/)

The certificate or minor in Professional Selling develops student knowledge and competencies related to the sales profession, with particular emphasis on key interpersonal and selling skills. The program focuses on concepts and tools that are consistent with current professional practice.

The certificate and minor in Professional Selling is powered by the center for Professional Selling and Sales Technologies and enhance students' preparedness for careers in sales, business development, and marketing. The certificate and minor are open to students of all majors and aim to enhance the professional skills of students regardless of majors.

Students declare a minor or certificate by completing the minor change form. Please speak with a College of Business professional advisor for assistance or to answer any questions.

Program Notes:

- To complete a minor, students must earn a grade of C or better in all courses and earn a minimum 2.50 GPA that is based on the courses used to satisfy the minor requirement.
- If the minor or institutional GPA falls below the 2.50 GPA after acceptance into the program, the student will not be allowed to register for the College of Business courses until the cumulative GPA returns to 2.50 or above.
- Minor students must satisfy all course pre-requisites.

Professional Writing

Department Information

- **Department Web Site:**
  www.ndsu.edu/english/ (http://www.ndsu.edu/english/)
- **Credential Offered:**
  UG Certificate
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/professional-writing/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/professional-writing/)

The English department offers an undergraduate certificate in professional writing that is open to students enrolled in an undergraduate degree programs at NDSU. The certificate in professional writing offers students the opportunity to develop their written, oral, and digital communication skills in workplace, public, and/or online contexts.

The professional writing certificate promotes competencies such as written communication, visual communication, project planning, interpersonal communication, teamwork, content development and management, and reviewing and editing that can be tailored to students' academic majors and professional goals. As a professional credential, the certificate is suited for those interested in distinguishing themselves through developing their writing skills across a variety of careers, from professional writers to professionals who write, including technical writing, publishing and editing, grant writing, business and management, healthcare, marketing, education, and research.

Total Credits	**9**

[1]

A course not listed in the third category may be allowed but is subject to approval by the certificate Coordinator based on relevancy to the certificate and its learning outcomes. Only one substitution is allowed. The official Substitution Form must be completed and submitted to the Office of Registration and Records during the semester the course is taken.

Psychology

Department Information

- **Department Web Site:**
  www.ndsu.edu/psychology/ (http://www.ndsu.edu/psychology/)
- **Credential Offered:**
  B.S.; B.A.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/psychology/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/psychology/)

Whether you're interested in psychology as a helping profession or as the science of mind and behavior, the Department of Psychology at North Dakota State University is an exciting place to be. For the last several years, our programs have grown to build on our strengths in health psychology and cognitive neuroscience. Our expanded faculty and graduate programs mean that our undergraduate majors have ample opportunities for participating in cutting-edge research and course work.

Background Information

Psychologists study a broad range of thought and behavior, from normal to abnormal, in both individuals and social groups. What distinguishes psychology from other fields is its strong research orientation. Because psychology is relevant to virtually all professions, students who plan to enter professions such as medicine, law, business management, social work, education or counseling often elect to major or minor in psychology.

Career Opportunities

Most professional positions for psychologists require a master's or doctoral degree. In addition to pursuing graduate work in psychology, recent graduates have entered professional programs in medicine, counseling and guidance, business, special education, social work, law, dentistry, ministry and optometry.

Many of our students seek employment immediately after completing their bachelor's degree. Employers seek out psychology majors for their combination of people and research skills. Some of our graduates have entered positions directly related to psychological services (e.g., mental health aide, psychological testing technician, behavior analyst, or medical research assistant). Others have taken positions not directly concerned with psychological services but related to psychology (e.g., sales, management, law enforcement, corrections, advertising, market research and statistical consulting).

Alumni surveys by the NDSU Career Center have consistently shown that our graduates are very successful in obtaining good jobs or going on to graduate or professional school.

The Program

Undergraduate students can either major or minor in psychology at NDSU. Students majoring in psychology may pursue either a Bachelor of Arts (B.A.) or a Bachelor of Science (B.S.). The primary difference between the two degree programs is that the B.A. degree requires competency at the second-year level of a foreign language while the B.S. requires an approved minor or additional course work in either the natural sciences or the social sciences instead of a language. Both the major and minor requirements within psychology allow each student to select the courses most relevant to his or her own interests.

Advising

Freshman and transfer students receive introductory academic advising from the department's professional advisor in conjunction with NDSU's Career and Advising Center. This preparatory advising continues until students are assigned to a faculty advisor to start their junior year. In addition to these professional and faculty advisors, students can use our web-based advising center to obtain information about the psychology curriculum and career planning. Printed handouts with this information are also available from the department.

One helpful feature is the Career Orientation OverLay (COOL), which has been developed to aid students in selecting courses relevant to their career goals. COOLs are available for behavioral neuroscience (e.g., medicine, medical research), industrial psychology (e.g., business, industry), human services (e.g., clinical psychology, social work), and experimental psychology (e.g., academic and research careers).

Research and Computing Facilities

Students and faculty at NDSU are engaged in research on a wide variety of topics in psychology. Research laboratories include experimental rooms for human research, sound-attenuated chambers, a group lab suite, a virtual reality display system and a driving simulator. Laboratory facilities include advanced equipment for studying human perception, brain function, information processing and social interaction.

Because the program at NDSU emphasizes the scientific approach to the study of behavior, student research is strongly encouraged. Undergraduate students often serve as research assistants working closely with faculty and graduate students. Current research includes projects on health, vision, virtual reality/multi-sensory integration, information processing, behavior modification, emotion, depression, history of psychology, and group processes.

Field Experience

The department maintains excellent relations with a number of service agencies in the Fargo-Moorhead community. Through these contacts, psychology majors can gain field experience in human service settings. At the same time, they earn college credit and gain an understanding of the applications of psychological principles in community service agencies.

Financial Aid

Research and teaching assistantships are sometimes available to advanced undergraduate students. Students can also receive support for work in the department through the NDSU work-study program. In addition, the Psychology Research Award Fund provides money to undergraduates for research projects and travel to professional conferences.

Some scholarships are available for undergraduates. For example, the Patricia Beatty Scholarships provide funding for one to two junior and senior psychology students each year. Students are invited to apply for these scholarships, which are awarded based on grade point average and involvement in department research and activities. Many of our students also have participated in campus-wide programs that sponsor students to do research with faculty mentors (for example, the McNair Scholars program).

High School Preparation

Basic college preparatory courses in high school are sufficient for NDSU psychology majors. Since research and writing skills are particularly important, students should be well-grounded in English, science, social science, and mathematics. Do not be concerned if you have not had psychology in high school—you will get plenty of courses here. In fact, we generally prefer that students take their introductory psychology course at NDSU rather than Advanced Placement Psychology in high school.

Psychology Minors

A total of 18 credits are required in psychology and must include PSYC 111 (Introduction to Psychology) and one 300 or 400-level course. In addition to general psychology minors, more specialized minors are available in neuroscience and managerial psychology.

B.S. in Behavioral Statistics

This interdisciplinary major is the result of a joint effort between the Departments of Psychology and Statistics. (Note: students in this major also complete the requirements for a degree in psychology.) Graduates of this program will have skills in collecting and analyzing data on human behavior, and would be employable in firms that deal with medical or Medicare data, consumer activity, market research, etc. See the psychology web site, your advisor or the *NDSU Bulletin* for detailed information.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Psychology

Degree Type: B.A. or B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Track: Social Science		
14 additional credits in social sciences (excluding PSYC prefix courses). Prefixes accepted include: ANTH, CJ, ECON, POLS, SOC or HDFS general education courses or courses that include an HDFS general education prerequisite. Courses selected for this track cannot count for general education.		14
Other courses accepted include:		
COMM 114	Human Communication	
COMM 212	Interpersonal Communication	
COMM 216	Intercultural Communication	
COMM 260	Introduction to Web Design	

COMM 271	
COMM 301	Rhetorical Traditions
COMM 402	
COMM 435	Critical Approaches to Popular Culture
COMM 436	
COMM 450	Issues in Communication
COMM 480	
BUSN 487	Managerial Economics
MGMT 320	Foundations of Management
MGMT 330	Foundations of Organizational Behavior
GEOG 151	Human Geography
GEOG 161	World Regional Geography
GEOG 262	Geography of North America

Code	Title	Credits
Track: Minor Program of Study		
A minor in an approved area of study.	Student must official declare the minor with the Office of Registration and Records.	16+

Code	Title	Credits
Track: Accelerated (Master of Public Health Coursework)		
PH 700	Preventing and Managing Chronic Illness	3
PH 704	Public Health Management and Policy	3
PH 706	Essentials of Epidemiology	3
PH 720	Environmental Health	2
PH 725	Promoting Health through Policy, System and Environment	3
Total Credits		**14**

[1]

PSYC 189 is only required for first-time, first-year students--A first-time, first-year student is defined as a student who has not yet completed a college course as a college student. Students that are not first-time, first-year students that either transfer into the university or change their major are not required to take PSYC 189.

Program Notes

- Students earning a Bachelor of Arts degree must complete the Modern Foreign Language proficiency (3-14 credits).
- Except for courses offered only as pass/fail grading, no course may be taken Pass/Fail.
- When a student selects psychology as a second major, the student will not have to complete the track elective.
- Students interested in the accelerated track must make application to the Graduate School and submit the Accelerated Declaration form prior to enrollment in any 700 level classes.

Minor Requirements

Minor: Psychology

Required Credits: 18

Code	Title	Credits
Required Courses		
PSYC 111	Introduction to Psychology	3
PSYC Electives	At least one course must be a 300-400 level course	15
Total Credits		**18**

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- Courses cannot be taken P/F.

Public Health

Department Information

- **Department Web Site:**
  www.ndsu.edu/publichealth/ (http://www.ndsu.edu/publichealth/)
- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/public-health/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/public-health/)

The public health minor engages students in the history and philosophy of public health as well as its core values, concepts and functions across the globe and in society. The minor includes understanding of the socioeconomic, behavioral, and biological factors that impact human health and contribute to health disparities. Communication skills will be emphasized through writing, critical thinking, and other methods of oral and visual/electronic communication. The minor compliments many majors such as Health Services, Emergency Management, Sociology, Microbiology, Exercise Science, Nutrition, and Psychology and is a compliment to pre-health majors. Completing a minor in public health is also a great introduction for students thinking about graduate school to attain a Master of Public Health (MPH).

The field of public health is growing and there is increasing demand for public health professionals as well as other professionals in health-related fields as identified by the U.S. Bureau of Labor Statistics. More specifically, employment in the areas of health education, epidemiology, and statistics are identified as having a growing employment need.

Public History

Department Information

- **Department Web Site:**
  www.ndsu.edu/history/ (http://www.ndsu.edu/history/)
- **Credential Offered:**
  B.S.; B.A.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/public-history/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/public-history/)

Do you like to study history but wonder what you can do with a history degree? If so, the public history program at North Dakota State University may be for you. Public history is an umbrella field that encompasses archival work, museum studies, collections management, historic preservation, cultural resource management, and many other public facing historical professions. This innovative program trains and educates undergraduates in a variety of applied history fields. It provides students with the opportunity to explore a variety of careers and prepares them for employment or graduate school in the expanding field of public history. Examples of opportunities for public history majors include employment in historical societies, museums, archives, historic preservation, corporations, municipalities, labor and farm organizations, and state and federal government agencies.

THE PROGRAM

The core of the major is 51 credits, which consists of a well-integrated combination of courses designed to provide students with training in history and in the specific field of public history. The goal of the program is to provide a structured framework of courses and allowance for some flexibility to reflect personal interests. The public history major provides students with a solid foundation in history content and methodology and introduces them to the sub-fields of public history. A crucial part of the program is an approved internship of nine credit hours at a historical agency, often at local museums such as Bonanzaville in West Fargo or the Historical and Cultural Society of Clay County at the Hjemkomst Center in Moorhead, Minnesota. The internship is an opportunity for practical, on-the-job experience in public history.

CAREER OPPORTUNITIES

Recent graduates in public history are employed at the State Historical Society of North Dakota, the National Park Service, and at regional county museums and historic sites. Currently, the U.S. Department of Labor predicts that openings at public history sites is “projected to grow 9 percent from 2018 to 2028, faster than the average for all occupations.” Further information on career opportunities can be found in the *Occupational Outlook Handbook* published by the U.S. Department of Labor. Some students decide to pursue further graduate study after completing a public history degree at NDSU. Several of our recent graduates have been admitted to leading graduate public history programs such as the Cooperstown Museum Studies Program and Middle Tennessee State University.

THE CURRICULUM

Students begin with 9 to 15 credits at the 100-200 level to provide a foundation for their later work. Public history courses at the 200 level may be used to meet this requirement. Year-long survey courses in U.S. history and Western Civilization are provided to give students a basic knowledge of the history of the United States and of the wider cultural heritage of the western world. After completing 100-200 level courses, students complete a course on historical research and writing. At the junior or senior level, students take a sequence of courses in American, European, and World history. These courses provide students with in-depth historical content. Courses in museum collections management, digital history, and public memory and memorialization are also required. The resources of the North Dakota Institute for Regional Studies at the NDSU Archives are used in these classes. Three to nine more credits of history at the junior or senior level are required to gain further historical knowledge; these courses are chosen after consultation with an advisor. A three-credit senior seminar is required of all history majors as a capstone experience.

Courses such as introduction to public history, museum studies, collections management, and digital history are designed to instill knowledge of specific areas in public history. The introduction to public history course provides an overview of the field and an opportunity to create a public history project. The museum studies course familiarizes students with the theory and practice of museum work and provides experience creating an exhibit. The collections management course focuses on the care and management of museum collections. These courses and the required historical content courses provide students with an understanding of cultural, political, social and economic changes through time and teach students how to craft an interpretation of those changes.

Finally, a nine-credit internship provides practical experience in the field of public history. The State Historical Society of North Dakota (and other local and regional historical agencies) provide opportunities in areas such as collections management, archival work, historical editing, historical preservation, and interpretation of historic sites.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Public History

Department Information

- **Department Web Site:**
  www.ndsu.edu/history/ (http://www.ndsu.edu/history/)
- **Credential Offered:**
  B.S.; B.A.
- **Sample Program Guide:**

catalog.ndsu.edu/programs-study/undergraduate/public-history/#planofstudytext (http://catalog.ndsu.edu/programs-study/undergraduate/public-history/#planofstudytext)

Major Requirements

Major: Public History

Degree Type: B.A. or B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**
Category W: Wellness †		**2**
Category D: Cultural Diversity *†		
Category G: Global Perspectives *†		
Total Credits		**39**

*****
Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†
General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Thirty-three (33) credits of the major must be taken in residence at NDSU.

Code	Title	Credits
Core Requirements		
Select one history survey course from the following:		3
HIST 101	Western Civilization I	
HIST 102	Western Civilization II	
HIST 103	U.S. to 1877	
HIST 104	U.S. Since 1877

HIST 477	Slavery in the Atlantic World	
HIST 480	History of Modern China from 1600	
HIST 481	History of Japan	
HIST 482	Vietnam: 125 Years of Conflict	
HIST 484	Cultures and Civilizations of the Pre-modern World	
HIST 485	Cultural Exchange and the Making of the Modern World	
Total Credits		**51**

Public Policy

Department Information

- **Department Web Site:**
  www.ndsu.edu/politicalscience/ (http://www.ndsu.edu/politicalscience/)
- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/public-policy/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/public-policy/)

The Public Policy Minor introduces students to the theory and practice of policy analysis. The interdisciplinary coursework teaches students to identify problems, consider possible solutions, design effective programs, and evaluate whether established policies meet their intended goals. Individuals with backgrounds in public policy go on to work in government agencies, non-profits, think tanks, and political advocacy organizations as well as the private sector. In addition, the minor is a great introduction for students thinking about graduate school to attain a Master of Public Policy (MPP) which is also offered by the Department of Political Science and Public Policy. The Public Policy Minor is open to all majors.

THE FACULTY

Faculty in the Department of Political Science and Public Policy have expertise in areas ranging from local and state governance to global policy and international relations as well as law, the judicial system, and the dawning digital society. Our faculty draw upon their experiences as program evaluators and consultants for government, private firms, and non-profits to provide a cutting edge and practice-informed education to NDSU students. We encourage students who want to learn more about the Public Policy Minor to reach out through email or schedule an appointment via Bison Advise (https://career-advising.ndsu.edu/bison-advise-for-students/).

Program Notes:

- Political Science majors: Courses completed for this minor cannot be double-counted with the Political Science major.

Publishing

Department Information

- **Department Web Site:**
  ndsupress.org/ (http://ndsupress.org/)
- **Credential Offered:**
  UG Certificate
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/publishing/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/publishing/)

The certificate in publishing prepares students to work within the unique framework of the publishing industry while gaining experience in the top skills employers seek among college graduates: communication, problem solving, ability to work in a team, and project management. The certificate in publishing delivers an educational experience that allows students to learn about the history, business, and practice of publishing scholarly and literary works. The courses offer in-depth, experiential learning with a decades-old publishing house, applying current methods and customs of scholarly and literary publishing, all while meeting real-time production deadlines and schedules in preparation for national distribution of North Dakota State University Press books. The key topics for the certificate in publishing focus on the process of managing the creation, publication, and distribution of print and electronic books and other text products, and preparing individuals to manage the editorial, technical, and business aspects of publishing operations. The certificate in publishing includes instruction in product planning and design, editing, author and public relations, business and copyright law, publishing industry operations, contracting and purchasing, product marketing, electronic publishing and commerce, the history of publishing, and professional standards and ethics.

Additional Requirement *		3
Total Credits		**12**

*

Additional requirement coursework to be determined in collaboration with a student's goals and the program coordinator. Experiences related to the field of publishing, such as contemporary literature, graphic design, marketing & publicity, bookkeeping, editing, digital history, etc. The department will need to submit a substitution form to the Office of Registration and Records in order for it to apply to this certificate since it is an undefined additional requirement.

Radiologic Sciences

Department Information

- **Department Web Site:**
  www.ndsu.edu/alliedsciences/ (http://www.ndsu.edu/alliedsciences/)
- **Credential Offered:**
  B.S.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/radiologic-sciences/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/radiologic-sciences/)

Radiologic Sciences at North Dakota State University combines foundational science, math, and general education courses on campus with applied imaging classroom, lab, and clinical education during a two-year full-time internship within an affiliated hospital. Three unique and specialized internships available to RS majors are radiography, diagnostic medical sonography, and echocardiography.

Background Information

Radiographers, also known as **radiologic technologists**, perform diagnostic imaging examinations, accurately position patients, obtain quality diagnostic images, and adhere to radiation protection regulations for themselves, their patients, and coworkers. They work closely with radiologists, the physicians who interpret medical images, to diagnose or rule out disease or injury. Radiologic technologists are educated in anatomy, patient positioning, examination techniques, equipment protocols, radiation safety, radiation protection and basic patient care. To become a registered radiologic technologist, RT(R), students must complete an accredited educational program, earn an academic degree, and pass a national certification examination. To remain registered, they must earn continuing education credits.

Radiologic technologists work in hospitals, physician offices and clinics, or diagnostic imaging centers. Multi-skilled RT(R)s who are educated and credentialed in more than one type of imaging technique are most marketable. With experience and additional training, general radiographers may become specialists in CT, magnetic resonance imaging, mammography, interventional radiography, or advance into management or education. Radiation therapy, sonography, and nuclear medicine typically require additional specialized formal education in a dedicated training program. Currently there are job openings throughout the country. According to the U.S. Department of Labor Bureau of Labor Statistics (https://www.bls.gov/ooh/healthcare/radiologic-technologists.htm), employment of radiologic technologists is expected to grow faster than average for all occupations through 2026. An increase in medical conditions among the aging baby-boom population will require imaging as a tool to making diagnoses. Mean annual earnings for radiologic technologists in 2022 was $ 70,240 (Radiologic and MRI Technologists : Occupational Outlook Handbook: : U.S. Bureau of Labor Statistics (bls.gov) (https://www.bls.gov/oes/current/oes292034.htm)

Sonographers use special equipment and high frequency sound waves (ultrasound) to obtain images of internal body structures and organs. They have a high level of patient interaction and play a vital role in providing the physician with quality images to interpret, assess, and diagnose medical conditions or conduct surgical procedures. Two options for NDSU students interested in sonography are echocardiography and diagnostic medical sonography. **Echocardiographers**, also known as cardiac sonographers, evaluate the anatomy and hemodynamics (blood flow) of the heart, its chambers and valves, and related blood vessels. **Diagnostic medical sonographers** evaluate abdominal structures like the kidney, liver, and spleen, breast tissue, the reproductive system, blood vessels, fetal development, and musculoskeletal structures like tendons and joints. Sonographers are educated in anatomy and pathophysiology, patient positioning, examination techniques, equipment protocols, and basic patient care and safety. To become registered, students must complete an accredited educational program and pass national certifying examinations. To remain registered, they must earn continuing education credits.

Sonographers work in hospitals, physician offices, and medical and diagnostic laboratories. Currently there are job openings throughout the country. According to the U.S. Department of Labor Bureau of Labor Statistics (https://www.bls.gov/ooh/healthcare/diagnostic-medical-sonographers.htm), the demand for sonographers will continue to grow much faster than average for all occupations through 2026. This demand is attributed to the likelihood that the need to diagnose medical conditions within an aging baby-boom population will increase, as well as the continued

need for ultrasound as an alternative to imaging that involves radiation. Mean annual wages for diagnostic medical sonographers in 2022 was $78,210 (Diagnostic Medical Sonographers and Cardiovascular Technologists and Technicians, Including Vascular Technologists : Occupational Outlook Handbook: : U.S. Bureau of Labor Statistics (bls.gov) (https://www.bls.gov/ooh/healthcare/diagnostic-medical-sonographers.htm)

The Program

A Bachelor of Science degree, major in Radiologic Sciences, includes two or more years of rigorous academic courses on campus followed by a two-year full-time professional-level internship in an affiliated hospital-based program. RS students must have an interest and aptitude in the sciences and math and a strong desire to work directly with patients. Academic courses include chemistry, physics, anatomy and physiology, microbiology, trigonometry, psychology, statistics, and computer sciences, in addition to general education courses. Students pursuing any one of the three specializations in radiography, echocardiography, or diagnostic medical sonography will complete the same pre-radiologic sciences college courses. Transfer students must complete a minimum of 12-20 resident credits at NDSU prior to start of the internship. Residency requirements vary by RS specialization. During their final year of courses on campus, qualified students will apply for the two-year internship. The internship class and clinical education prepares the graduate to work in their respective area of specialization in radiography, diagnostic medical sonography, or echocardiography. College courses and the internship classes, lab, and clinical education constitute the four-year degree awarded by NDSU. Radiography graduates are eligible to take the national certifying exam administered by the American Registry of Radiologic Technologists (https://www.arrt.org/) to earn the RT(R) credential. Sonography graduates are eligible to take national certifying exams appropriate to their specialization and administered by the American Registry for Diagnostic Medical Sonography (http://www.ardms.org/Pages/default.aspx).

Internship Application and Admission

The internship application process begins annually in the fall. Internship admission is competitive. Admission criteria are established in collaboration with affiliated hospital programs and generally includes successful completion of all college courses on campus with a minimum grade of C, grade point averages (a minimum of 2.50-3.00 is required and varies by hospital program), references, related experience, interview and ability to meet program-designated technical standards, or request accommodations to execute those skills. Technical standards include a sound intellect and emotional health to exercise good judgement even in emergencies, visual and hearing acuity, physical abilities to lift and position patients, pull, push, carry equipment, enter data, stand and walk for extended periods of times and communicate effectively. In addition, students must also comply with criminal background and student conduct requirements.

Radiography. Pre-RS students who apply and are accepted into the radiography internship will complete their applied classroom and clinical education in one of the following affiliated hospital-based radiologic technology programs: Avera McKennan Hospital (Sioux Falls, SD), Mercy/St Luke's Hospitals (Cedar Rapids, IA), Sanford Medical Center (Bismarck and Fargo, ND, Sioux Falls, SD), St. Cloud Hospital (St. Cloud, MN), St. Luke's College (Sioux City, IA), UnityPoint Health (Des Moines, IA), and the Veteran Affairs Medical Center (Minneapolis, MN). Affiliated hospital programs maintain programmatic accreditation through the Joint Review Committee on Education in Radiologic Technology (https://www.jrcert.org/). Internship classes and clinical experience will focus on patient care, anatomy and physiology, radiation physics and protection, imaging principles, positioning, radiobiology, and pathology.

Sonography. Pre-RS students who apply and are accepted into one of the sonography specializations will complete the 21-month internship offered by Sanford Medical Center Fargo. Internship classes, scanning labs, and clinical experience for echocardiography will focus on adult echocardiography with rotations in pediatric and stress echo. Internship classes, scanning labs, and clinical experience in diagnostic medical sonography will focus on abdomen, OB/GYN, small parts, and vascular sonography. SMCF's sonography programs are accredited by the Commission on Accreditation of Allied Health Education Programs (https://www.caahep.org/).

It is highly recommended that students interested in an RS major meet with the RS advisor at least one year prior to anticipated internship application to discuss areas of specialization, internship admission, and create a plan of study for successful completion of degree requirements. Information about the RS professions and specializations, curriculum, internship, and advising contacts are available from the NDSU Department of Allied Sciences (https://www.ndsu.edu/alliedsciences/).

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

First Year			
Fall	**Credits**	**Spring**	**Credits**
CHEM 117	3	BIOC 260	4

Fall	**Credits**	**Spring**	**Credits**	**Summer**	**Credits**
RS 496**	12	RS 496**	12	RS 496**	1-6
	12		**12**		**1-6**

Total Credits: 127-140

*
All students are required to successfully earn credit for Engl 110 and Engl 120. Enrollment is based on English Placement. Upon completion of Engl 120 with a "C" grade or higher, students will be awarded placement credit (4) for Engl 110.

**
RS 496 classroom, lab, and clinical education (internship) takes place within an affiliated hospital. The internship is full-time for 21-24 months, including summer. RS 496 courses and credits vary by radiography, echocardiography, or diagnostic medical sonography specialization.

Radiologic Sciences

Department Information

- **Department Web Site:**
  www.ndsu.edu/alliedsciences/ (http://www.ndsu.edu/alliedsciences/)
- **Credential Offered:**
  B.S.
- **Sample Program Guide:**
  catalog.ndsu.edu/programs-study/undergraduate/radiologic-sciences/#planofstudytext (http://catalog.ndsu.edu/programs-study/undergraduate/radiologic-sciences/#planofstudytext)

Major Requirements

Radiologic Sciences Major

Degree Type: B.S.

Minimum Degree Credits to Graduate: 122

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**
Category W: Wellness †		**2**
Category D: Cultural Diversity *†		
Category G: Global Perspectives *†		
Total Credits		**39**

*****

Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†

General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Code	Title	Credits
Radiologic Science Major Requirements		
CHP 190		3
RS 200	Introduction to Radiologic Sciences	1
RS 496	Field Experience	60
Internship	Professional education (internship) within an accredited affiliated school of radiologic technology includes the capstone experience.	
BIOC 260	Elements of Biochemistry	4
or BIOC 460	Foundations of Biochemistry and Molecular Biology I	
BIOL 220 & 220L	Human Anatomy and Physiology I and Human Anatomy and Physiology I Laboratory	4
BIOL 221 & 221L	Human Anatomy and Physiology II and Human Anatomy and Physiology II Laboratory	4
CHEM 117 & 117L	Chemical Concepts and Applications and Chem Concepts and Applications Lab	4

CSCI 114	Computer Applications	3
or TL 116	Business Software Applications	
MATH 105	Trigonometry (or higher level)	3
CHP 125	Medical Terminology for Health Professionals	1
PHRM 170	Common Diseases, Prevention, and Treatment	2
PHYS 211 & 211L	College Physics I and College Physics I Laboratory	4
PHYS 212 & 212L	College Physics II and College Physics II Laboratory	4
PSYC 111	Introduction to Psychology	3
STAT 330	Introductory Statistics	3
Select one microbiology course and lab from the following:		3-5
MICR 202 & 202L	Introductory Microbiology and Introductory Microbiology Lab	
MICR 350 & 350L	General Microbiology and General Microbiology Lab	
Major Elective: Select one of the following		3
ANTH 332	Medical Anthropology	
PHIL 210	Ethics	
SOC 417	Sociology of the Family	
SOC 440	Sociology of Aging	
SOC 441	Death and Dying	
COMM 308	Business and Professional Speaking	
COMM 315	Small Group Communication	
COMM 380	Health Communication I	
COMM 381		
COMM 383	Organizational Communication I	
CHP 400	Interprofessional Health Care Practice	
Total Credits		**109-111**

Degree Requirements and Notes

- All required courses must be completed with a grade of 'C' or above. All students must maintain a semester GPA of 2.0 or above for each semester in the College. A student who fails to meet this standard for two successive or three non-successive semesters may be terminated from enrollment in the College.
- Completion of the prerequisites does not guarantee a student internship. Selection of interns is competitive. Please consult your Radiologic Sciences advisor for more information.

Range Science

Department Information

- **Department Web Site:**
  https://www.ndsu.edu/snrs/
- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/range-science/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/range-science/)

Range Science is a unique program that blends ecology and management for the purpose of sustaining rangelands. Rangelands are important for the diverse array of products and services they provide, including livestock production, wildlife habitat, clean air and water, and recreation to name a few. Rangeland ecosystems comprise over 40% of the earth's land and include grasslands, savannahs, shrublands, deserts, alpine meadows, marshes, and wetlands. Rangelands are comprised mainly of native grasses, forbs, and shrubs which are extremely productive and rich in biodiversity. A minor in Range Science will further broaden your environmental education and offer unique hands-on experiences. Range science is offered as a minor program of study only.

Range Science

Department Information

Required Credits: 16

Code	Title	Credits
Required Courses		
RNG 136	Introduction to Range Management	3
RNG 225	Natural Resource & Agro-Ecosystems	3
RNG 450	Range Plants	3
Select one of the following:		3
RNG 452	Managing Natural and Rangeland Resources using GIS	
RNG 453	Rangeland Resources Watershed Management	
RNG 460		
RNG 456	Ecological Restoration	3
or RNG 458	Grazing Ecology	
Elective Course: Seminar may be used to fulfill this elective.		**1**
Total Credits		**16**

Minor Requirements and Notes:

- A minimum of 8 credits must be taken at NDSU.
- Students must earn a minimum 2.00 GPA for the minor requirements.

Real Estate Valuation

Department Information

- **Department Web Site:**
  https://www.ndsu.edu/business/
- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  /undergraduate/program-curriculum/real-estate-valuation/ (http://catalog.ndsu.edu/programs-study/undergraduate/real-estate-valuation/http:///undergraduate/program-curriculum/real-estate-valuation/)

Real estate valuation serves as the foundation for informed decision-making by investors, lenders, and homeowners in the real estate industry. It focuses on determining the market value of a property through various quantitative and qualitative methods. The real estate field offers a diverse range of career opportunities, from residential appraisers and commercial property valuers to valuation analysts and consultants. According to O*Net.com, the field for property appraisers and assessors has a bright outlook with projected annual job openings of 6,900 from 2022-2032. According to the US Bureau of Labor Statistics, the median annual wage for property appraisers and assessors was $61,630 in May 2023. Professionals with expertise in real estate valuation are in high demand, particularly in urban and rapidly growing suburban areas.

Religion

Department Information

- **Department Web Site:**
  www.ndsu.edu/history/ (http://www.ndsu.edu/history/)
- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/religious-studies/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/religious-studies/)

The objectives for the minor in religion include:

- Cultivate foundational knowledge of the history, rituals, scriptures, and beliefs of major world religions.
- Critically interpret representations of religious movements and religious conflict found in popular culture, the arts, and news media.
- Analyze the complex historical, political, and cultural backgrounds of global and historical religious movements and conflicts.
- Designed for students to comprehend how religion can foment both social justice and acts of violence, complacency and rebellion, liberation movements and imperialism, compassion and tyranny.
- Apply historical, anthropological, sociological, and literary methods to religious phenomena, including texts, images, material objects, institutions, theologies, and movements.
- Respectfully debate the role of religion in public life and politics.

Religion

Code	Title	Credits
Required Minor Courses		
RELS 100	World Religions	3
RELS	300-400 level electives	9
RELS	Additional electives	6
Total Credits		**18**

Minor Requirements and Notes

- A minimum of 9 credits must be taken at NDSU.
- For advice on the distribution of electives consult with religious studies faculty members.

Respiratory Care

Department Information

- **Department Web Site:**
  www.ndsu.edu/alliedsciences/ (http://www.ndsu.edu/alliedsciences/)
- **Credential Offered:**
  B.S.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/respiratory-care/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/respiratory-care/)

Respiratory Care is an allied health profession that specializes in the evaluation, treatment, and education of patients with cardiopulmonary (heart-lung) disorders. Respiratory therapists (RTs) work closely with patients, physicians, nurses and other healthcare team members in critical care, emergency rooms, nurseries and pediatrics, medical units and home care. RTs' diverse responsibilities include patient assessment, medical gas therapy, pulmonary hygiene, diagnostic testing, mechanical ventilatory and cardiovascular support, rehabilitation activities, and consulting with physicians to develop treatment plans.

Background Information

The practice of respiratory care encompasses activities in diagnostic evaluation, therapy, and education of the patient, family and public. Diagnostic activities include obtaining and analyzing sputum and blood specimens, performing breathing studies to determine if lung function is impaired, performing sleep disorder studies and interpreting the data obtained from these. Therapy includes administering medical gases and respiratory medications to alleviate breathing problems, initiating and managing mechanical ventilators, establishing and maintaining artificial airways, performing pulmonary hygiene procedures and cardiopulmonary rehabilitation activities. Education of the patient, family and public promotes knowledge of disease processes, therapy and wellness. These essential functions of the RT are practiced under qualified medical direction.

Career Opportunities

Graduates of the respiratory care program are eligible to complete a series of national examinations administered by the National Board of Respiratory Care that lead to the Registered Respiratory Therapist (RRT) credential. NDSU graduates have enjoyed excellent pass rates on these certifying exams. Most states require a license to practice respiratory care and use these examinations or verification of credentials for state licensing. To remain licensed, RTs may also be required to obtain continuing education credit. Graduates readily find employment in hospital, clinic and home care settings throughout the country. Additional career opportunities exist in management, education, sleep medicine, research, sales and public health. According to the U.S. Department of Labor Bureau of Labor Statistics (https://www.bls.gov/ooh/healthcare/respiratory-therapists.htm), employment of respiratory therapists is expected to grow much faster than the average for all occupations through the year 2026. This increased demand is attributed to growth in the middle-aged and elderly populations that will increase the incidence of respiratory conditions, advances in preventing and detecting disease, and improved medications and sophisticated treatments. Mean annual wages (https://www.bls.gov/oes/2018/may/oes291126.htm) for respiratory therapists in 2022 was $70,540 (Respiratory Therapists : Occupational Outlook Handbook: : U.S. Bureau of Labor Statistics (bls.gov) (https://www.bls.gov/ooh/healthcare/respiratory-therapists.htm).

The NDSU/Sanford Respiratory Care Program

A Bachelor of Science degree with a major in respiratory care from North Dakota State University includes two to three years of academic courses and a 15-month professional-level internship at Sanford Medical Center Fargo. The NDSU/Sanford Respiratory Care program is accredited by the Commission on Accreditation for Respiratory Care.

Academic courses include college algebra, chemistry, physics, anatomy and physiology, microbiology, psychology and computer science, in addition to general education courses. Transfer students need to successfully complete a minimum of 8 resident credits at NDSU prior to starting the internship. The full-time internship consists of lecture, lab and clinical education, which prepares the student to enter the profession of respiratory care.

Near the end of the internship, students design a specialty proposal for a focused clinical experience (RC 494, Individual Study). Common specialty areas include: neonatal/pediatric general or intensive care, adult general or intensive care, cardiopulmonary diagnostics, pulmonary rehabilitation or home care, education, and management.

Internship Admission

Admission to the internship is selective. Qualified students apply during the spring of the academic year during which they will complete all courses on campus. Admission is based upon successful completion of all internship prerequisites (8 resident credits at NDSU), cumulative and core course grade point averages (a minimum of 2.50 is required; the maximum number of core course attempts is two), related experience, references, an interview, and compliance with criminal background and student conduct requirements. In addition, students admitted to the NDSU/Sanford Respiratory Care Program must possess the ability to complete the entire curriculum which requires that the student meet designated technical standards, or request accommodations to execute these skills. Technical standards include cognitive, physical, motor and tactile abilities, visual acuity, and speaking, hearing and interactive requirements. Internship applications are available from the NDSU Department of Allied Sciences. Deadline for receipt of completed applications is March 1. An admission committee selects the interns.

It is highly recommended that students interested in the RC major meet with the respiratory care advisor to discuss degree requirements, internship admission, and create an individualized plan of study at least one year in advance of applying for the internship. Information about the profession, curriculum, internship, technical standards, and advising contacts are available from the Department of Allied Sciences. (https://www.ndsu.edu/alliedsciences/)

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Respiratory Care

Degree Type: B.S.
Minimum Degree Credits to Graduate: 126

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/robotics/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/robotics/)

Robotics is a branch of engineering that combines mechanical engineering, electronics engineering, manufacturing engineering, computer science and other fields of engineering at different degrees. A minor in Robotics equips students with skills required for designing and construction of robot mechanisms; designing and development of electronic control systems using sensory feedback and information processing to generate robotic motions by various actuators; and programming and application of robots for carrying out tasks that would be regarded as dirty, dull and dangerous (DDD) to a human being.

IME 482	Automated Manufacturing Systems
PAG 115	Introduction to Precision Agriculture
PAG 315	Electronic Systems in Precision Ag
PAG 454	Applications of Precision Agriculture
CE 425	Bridge Evaluation and Rehabilitation
CE 452	Fundamentals of Oil & Gas Pipeline: Design, Operation, Inspection & Maintenance
Total Credits	**18**

[1]

Courses are grouped by interest area but the 9 credits can be from any of the areas.

Program Notes

- Any course used to satisfy *Part One: Core Courses* may not use that course to satisfy any of the nine credits for *Part Two: Approved Courses*.

Social Studies Education

Department Information

- **Department Web Site:**
  www.ndsu.edu/education/ (http://www.ndsu.edu/education/)
- **Credential Offered:**
  B.S.; B.A.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/social-science-education/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/social-science-education/)

Social studies involves the study of people and their interactions with each other, with their social and political institutions and with their environments. Accordingly, the social studies education major includes a broad range of courses and subjects. Teacher candidates are expected to demonstrate both breadth and depth of understanding in the academic disciplines that make up the social sciences.

The Program

Candidates in the social studies education major are prepared to teach a diverse curriculum to a diverse student population. The social studies education teacher candidate should work closely with an advisor to be sure that the general education courses taken will provide a strong foundation for the advanced courses in the major.

Professional Education Courses

Teacher candidates may enroll in the 300-level professional education courses before being formally admitted to the School of Education (SOE). Prior to enrolling in the 400-level courses, teacher candidates must complete the application for admission to the SOE; attain a minimum of a 2.75 grade point average overall in their course work and education courses; and pass the Praxis Core Academic Skills for Educators exam or meet minimum scores on the ACT+. Requirements for admission can be found on the School of Education website (https://www.ndsu.edu/education/).

Student Teaching

Student teaching (clinical practice) is the culmination of the teaching program. During the clinical practice, teacher candidates apply the knowledge and skills acquired in their college courses to real-world classrooms under the supervision of experienced social science teachers in middle or high schools. Faculty members from NDSU conduct regular on-site visits to support, encourage, and evaluate teacher candidates so that they gain the confidence and ability to join the teaching profession after graduation.

Student Advisement

An academic advisor works individually with social science education majors to plan their programs of study and to advise and assist them as they progress to degree completion. Students are encouraged to seek their advisor's help whenever needed.

LICENSURE

Upon completing this program, teacher candidates are eligible for teacher licensure in social science in most states. Our program is accredited by the Council for the Accreditation of Educator Preparation (CAEP) and approved by the North Dakota Education Standards and Practices Board (ESPB).

Career Opportunities

There has been a surplus of social science teachers across the country for the past several years. It has been predicted that the surplus will continue. Students who elect to major in social science education should consider obtaining a second major or a teachable minor to enhance their employment prospects. In addition, students in social science education are encouraged to seek volunteer and employment experiences that complement their education. Summer or after-school work with special needs students, high school or middle school student activities, or other human service activities can provide the candidate valuable experience with children and adolescents.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Social Studies Education

Degree Type: B.A. or B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

None of these courses can be double counted with another history requirement.

Degree Requirements and Notes

- A grade of 'C' or better is required in all Professional Education Requirement courses.
- To be placed in student teaching, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required.
- To exit the program, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required as well as completing the Praxis Subject test and the Principles of Learning and Teaching test.
- Course taken *Pass/Fail* will not be used to satisfy any requirements other than total credits.
- See School of Education (https://www.ndsu.edu/education/) for admission requirements.

Social Work & Human Development and Family Science

Department Information

- **Department Web Site:**
  www.ndsu.edu/hdfs/ (http://www.ndsu.edu/hdfs/)
- **Credential Offered:**
  B.S.; B.A.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/social-work-human-development-family-science/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/social-work-human-development-family-science/)

The dual-degree program in human development and family science and social work offers students an integrated knowledge of children, adolescents, adults and families across the life span that will prepare them for careers in the helping professions. Students will gain a broad range of knowledge and skills that will equip them to address the needs and aspirations of people living in a changing world and be eligible for North Dakota licensure as social workers.

The Program

Students are concurrently enrolled in the **family science** or **adult development and aging** option of human development and family science (HDFS) at North Dakota State University and the social work major through Minot State University (MiSU). The culmination of these requirements leads to a Bachelor of Science from NDSU as well as a Bachelor of Social Work from MiSU.

Under a cooperative agreement, students remain on the NDSU campus to complete all course work for the dual degree. The courses specific to the social work major are offered on the NDSU campus by MiSU faculty or offered through interactive video.

Together the HDFS degree and the social work degree complement and strengthen the knowledge and skills that students will possess upon completion of this dual degree program. The curriculum combines course work in human development and family science with course work in social work. The curriculum includes a strong liberal arts base, studies in human development, family science, social work practice, social welfare, human behavior and research, and additional course work in economics, psychology, sociology and political science.

Selective Admission

Admission to the dual degree program consists of two separate university applications:

1. Application for admission to NDSU for the human development and family science/social work dual degree prior to beginning the program,
2. After admission and enrollment at NDSU and after meeting with an advisor, application for admission to Minot State University, and
3. Upon completion of specific requirements, application for admission to MiSU social work program.

Field Education

Students are required to complete 400 hours of direct practice with either a public or private human service agency. This supervised field practice enables students to gain valuable hands-on experience working with clients.

The social work program does not give academic credit for life experience or work experience, nor does the program allow such experience to be substituted for field education.

Financial Aid and Scholarships

The Office of Financial Aid and Scholarships at NDSU makes available grants, loans, scholarships and work-study employment. Scholarships also are available through the College of Health and Human Sciences. For more information visit Scholarships (https://www.ndsu.edu/onestop/scholarships-grants-and-tuition-waivers/) on the One Stop website.

The Facilities

Facilities for the dual degree program are housed in Evelyn Morrow Lebedeff Hall and the Family Life Center.

Extra-Curricular Opportunities

Students may enhance their involvement by participating in groups such as the HDFS Club and/or the Student Social Work Organization.

Community Setting

The Fargo-Moorhead metropolitan area offers a setting conducive to study. Students have the opportunity to work in a number of community institutions serving children and families.

Accrediting Agency

The social work program is accredited by: Council on Social Work Education, 1701 Duke Street, Suite 200, Alexandria, VA 22314-3457.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. No substitutions allowed.

Degree Requirements and Notes

- A grade of C or better is required for all HDFS and SWK prefix courses, regardless of whether they are used for the major core, major electives, general education, or free electives.
- A 2.50 cumulative GPA is required in major courses for graduation.
- Course taken *Pass/Fail* cannot be used to satisfy any requirements other than total credits.

Sociology

Department Information

- **Department Web Site:**
  www.ndsu.edu/socanth/ (http://www.ndsu.edu/socanth/)
- **Credential Offered:**
  B.S.; B.A.; Minor

- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/sociology/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/sociology/)

Sociology is the study of human social interaction and social organizations. Sociologists study social change, diverse communities and their interactions, and use scientific methods to find empirical answers to complex social questions. Studying sociology fosters creativity, innovation, critical thinking, analytic problem solving, and communication skills. Sociology majors are employed in a variety of business, nonprofit, and government jobs.

The Program

Sociologists attempt to develop a better understanding of the way society works. They examine social relationships in institutions like the family, religion, the economy, health care, media, education and government. Sociology majors develop applied research and analytical skills and a perspective that prepares them to address social concerns. Courses are offered on campus and online. North Dakota State University offers graduate work leading to a master's degree and frequently has students who pursue doctorates at other universities.

Faculty and Facilities

The faculty in sociology have varying research interests and areas of specialization. The sociology faculty provide expertise in areas such as gender, research methods, social psychology, education, social inequality, religion, and community development. They employ survey, ethnographic, and experimental design methods. The department contains two social research laboratories.

Career Opportunities

Sociological expertise can be useful in careers that involve community service, research analysis, non-profit organizations, human and social services, urban and regional planning, population analysis, economic or marketing studies, health-related industries, agricultural and rural life advocacy, government administration, and policy research. For more information on sociology employment, refer to the North Dakota State University Sociology website or visit the American Sociological Association website at https://www.asanet.org.

Internship Program

Students in sociology may apply for the internship program. Students typically complete internships during their junior or senior year. Internship opportunities exist in many agencies in North Dakota and Minnesota and can be done any time during the calendar year. Students who complete internships are able to combine the theoretical and applied aspects of professional preparation. Our students have worked in a variety of settings including human and social services, volunteer agencies, community development, business and industry.

The Curriculum

Sociology students explore their interests within the program, including social psychology, social inequality, community development, applied sociology, environmental sociology, gerontology, and gender issues, by taking classes in the areas of their choice.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Sociology

Department Information

- **Department Web Site:**
  www.ndsu.edu/socanth/ (http://www.ndsu.edu/socanth/)
- **Credential Offered:**
  B.S.; B.A.; Minor
- **Sample Program Guide:**
  catalog.ndsu.edu/programs-study/undergraduate/sociology/#planofstudytext (http://catalog.ndsu.edu/programs-study/undergraduate/sociology/#planofstudytext)

Major Requirements

Major: Sociology

Degree Type: B.A. or B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.

7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**
Category W: Wellness †		**2**
Category D: Cultural Diversity *†		
Category G: Global Perspectives *†		
Total Credits		**39**

*****

Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†

General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

Code	Title	Credits
Sociology Core Requirements		
ANTH 111	Introduction to Anthropology *	3
or ANTH 206	Introduction to Cultural Anthropology: Peoples of the World	
SOC 110	Introduction to Sociology *	3
or SOC 115	Social Problems	
or SOC 116	Global Social Problems	
SOC 214	Social Interaction *	3
SOC 298	Professional Seminar	1
SOC 340	Social Research Methods *	3
SOC 410	Social Inequality *	3
SOC 422	Development Of Social Theory *	3
SOC 470	Social Data Analysis *	3
SOC 494	Individual Study *	1
or SOC 496	Field Experience	
Major Electives		
Select an additional 12 credits from the electives listed below:		12
SOC 233	Sociology of Organizations and Work	
SOC 235	Cultural Diversity	
SOC 240	Gender and Popular Culture	
SOC 401	Sociology of Religion	
SOC 405	Community Development	
SOC 407	Deviant Behavior	
SOC 412	Sociology of Gender	

SOC 416	Sociology Through Literature
SOC 417	Sociology of the Family
SOC 418	Social Psychology
SOC 424	Feminist Theory and Discourse
SOC 425	Sociology of Culture
SOC 426	Sociology of Medicine
SOC 431	Environmental Sociology
SOC 439	Social Change
SOC 440	Sociology of Aging
SOC 441	Death and Dying
Total Credits	**35**

*
A grade of 'C' or better is required in all of the Core Requirements for the major.

Minor Requirements

Minor: Sociology

Required Credits: 18

Code	Title	Credits
Core Courses		
ANTH 111	Introduction to Anthropology	3
or ANTH 206	Introduction to Cultural Anthropology: Peoples of the World	
SOC 110	Introduction to Sociology	3
or SOC 115	Social Problems	
or SOC 116	Global Social Problems	
Select two of the following:		6
SOC 214	Social Interaction	
SOC 233	Sociology of Organizations and Work	
SOC 340	Social Research Methods	
SOC 410	Social Inequality	
SOC 422	Development Of Social Theory	
SOC 470	Social Data Analysis (This course is going through approvals and should be officially listed soon.)	
Minor Electives: Select any two SOC prefix courses at the 300-400 level		6
Total Credits		**18**

Minor Requirements and Notes

- A minimum of 8 credits must be taken at NDSU.
- Emergency Management majors who wish to complete this minor must complete 9 unique sociology credits (i.e. courses that were not completed for the major of EM).

Soil Science

Department Information

- **Department Web Site:**
  www.ndsu.edu/snrs/ (http://www.ndsu.edu/snrs/)
- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/soil-science/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/soil-science/)

Soil Science is the study of the soil as a component of natural and man-made systems. It is the key factor in food production and is at the forefront of environmental and natural resource issues such as land use, soil contamination, ground water quality, and waste disposal. Offered as a minor program of study only.

Soil Science

Department Information

Minor Requirements

Minor: Soil Science

Required Credits: 18

Code	Title	Credits
Required Courses		
SOIL 210	Introduction to Soil Science	3
SOIL 322	Soil Fertility and Fertilizers	3
SOIL 444	Soil Genesis and Survey	3
Elective Courses		
Select three of the following:		9
SOIL 264	Natural Resource Management Systems	
SOIL 351	Soil Ecology	
SOIL 410	Soils and Land Use	
SOIL 433	Soil Ecohydrology and Physics	
SOIL 447	Microclimatology	
SOIL/NRM/RNG 454	Wetland Resources Management	
SOIL 465	Soil And Plant Analysis	
Total Credits		**18**

Minor Requirements and Notes:

- A minimum of 8 credits must be taken at NDSU.
- Students must earn a minimum 2.00 GPA for the minor requirements.

Software Development

Department Information

- **Department Web Site:**
  www.ndsu.edu/cs/ (http://www.ndsu.edu/cs/)
- **Credential Offered:**
  UG Certificate
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/software-development/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/software-development/)

The Software Development certificate is intended for students who wish to build their development expertise. This certificate can be useful for students in other majors who are interested in a software development career. It is also suitable for students who previously completed a degree in a different major and wish to apply to our graduate programs but do not yet have software development experience. Programming knowledge equivalent to the Computer Science Foundations certificate is expected.

Software Development

Software Development

Required Credits: 9

Required Courses

Code	Title	Credits
CSCI 213	Modern Software Development	3
CSCI 313	Software Development with Frameworks	3
CSCI 371	Web Scripting Languages	3
or CSCI 412	Mobile Software Engineering	
Total Credits		**9**

Software Engineering

Department Information

- **Department Web Site:**
  www.ndsu.edu/cs/ (http://www.ndsu.edu/cs/)
- **Credential Offered:**
  B.S.; UG Certificate
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/software-engineering/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/software-engineering/)

Students interested in working as software engineers must have a sound foundation of math, physics, software, circuit theory, and engineering design principles to function effectively. A bachelor of science (B.S.) degree with a major in software engineering is focused on preparing individuals to work with other IT professional and apply engineering principles to design, test, implement, and evaluate software. Software engineers are an integral part of the accelerating growth of technology, are knowledgeable on the ever-increasing complexity of the IT sector, and are meeting the growing demands of customer and innovative website and mobile applications, and the continuous need to update code due to its limited lifespan. Software Engineering is offered jointly by the Computer Science department and the Electrical & Computer Engineering department in the College of Engineering.

For students with substantial computer science training, the Computer Science Department offers a certificate with focus on software engineering. The certificate draws from the set of courses that are specific to the B.S. in Software Engineering and the Software Engineering track of our B.S. in Computer Science degree. It can be of interest to professionals with computer science degrees who wish to expand their expertise in the area of software engineering. It is also targeted at current students who complete a different track or program and wish to cover more than one specialization.

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Spanish

Department Information

- **Department Web Site:**
  www.ndsu.edu/modernlanguages/ (http://www.ndsu.edu/modernlanguages/)
- **Credential Offered:**
  B.S.; B.A.; Minor

- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/spanish/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/spanish/)

Spanish is spoken in 28 countries by over 740 million people, and the US is now the second largest Spanish-speaking country in the world. In today's global economy, learning to speak Spanish is an extremely valuable skill, both in the United States and abroad. In this program, you will learn to effectively speak, read, and write in Spanish, with courses in conversation, reading comprehension, Spanish for business, Spanish for the healthcare professions, culture, and literature. Our curriculum will also help you develop what employers call desirable "soft skills" such as creativity, mental flexibility, critical thinking, and intercultural communication strategies. The Spanish major can easily pair with another major, a number of minors, or teaching certification.

Career Directions

Today's interconnected world generates the need to be able to communicate in more than one language. As networks of international cooperation and exchange grow in complexity, particularly among governments and businesses, those who possess foreign language competence become increasingly valuable. Moreover, it has been shown that learning a second language can improve one's overall writing and speaking ability.

Students who declare a Spanish major or minor find it to be incredibly useful when combined with preparation in another professional field. Examples include healthcare, public relations, journalism, TV and radio broadcasting, hotel management, publishing and editing, government service, banking, and management. One of the more promising occupational fields for language students has been international business. Individuals with Spanish language skills are finding increased opportunities with multinational corporations, especially in management and marketing. Regardless of their specific majors, students are encouraged to contact the Spanish Program for information and advice on career application of Spanish.

Students wishing to prepare for high school teaching should make this intention known to the School of Education and to the Spanish Program to make certain that the requirements for state certification are met. Competitiveness and flexibility in the job market tend to be greater if certification can be obtained in two or more different areas.

SPAN 301	Spanish for Business	
SPAN 303	Spanish for Health Care	
SPAN 332	Introduction to Hispanic Cinema	
SPAN 403	Advanced Spanish for Health Care	
Total Credits		**18**

Minor Requirements and Notes

- A minimum of 9 credits for the minor must be taken at NDSU and through Tri-College or while studying abroad.

Spanish Education

Department Information

- **Department Web Site:**
  www.ndsu.edu/education/ (http://www.ndsu.edu/education/)
- **Credential Offered:**
  B.S.; B.A.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/spanish-education/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/spanish-education/)

Spanish Education involves learning about Spanish language and culture, while simultaneously developing knowledge and skills related to teaching. Your classes will be a blend of content courses related to the language, as well as teaching courses.

The Program

Candidates in the Spanish education major are prepared for a language teaching career by getting the best of both worlds: content courses with faculty in the Department of Modern Languages and professional education courses from faculty in the School of Education (SOE). In addition to required courses, Spanish education teacher candidates need to study abroad where the target language is spoken. A degree in Spanish education will prepare teacher candidates to teach Spanish at the 5-12 level.

Professional Education Courses

Teacher candidates may enroll in the 300-level professional education courses before being formally admitted to the SOE. Prior to enrolling in the 400-level courses, teacher candidates must complete the application for admission to the SOE; attain a minimum of a 2.75 grade point average overall in their course work and education courses; and pass the Praxis Core Academic Skills for Educators test or meet minimum scores on the ACT+. A minimum grade of "B" is required in the SPAN teaching specialty courses. Requirements for admission can be found on the School of Education website (https://www.ndsu.edu/education/).

Student Teaching

Student teaching (clinical practice) is the culmination of the teaching program. During In the clinical practice, teacher candidates apply the knowledge and skills acquired in their college courses to real-world classrooms under the supervision of experienced Spanish teachers in middle or high schools. Faculty members from NDSU conduct regular on-site visits to support, encourage, and evaluate teacher candidates so that they gain the confidence and ability to join the teaching profession after graduation.

Student Advisement

Students will be assigned individual advisors who will work closely in program planning and in other ways to advise and assist them. Students are encouraged to seek advising from both Modern Languages and the School of Education whenever needed.

Licensure

Upon completing this program, teacher candidates are eligible for certification to teach Spanish in most states. Upon completing this program, teacher candidates are eligible for teacher licensure in certification to teach Spanish in most states. Our program is accredited by the Council for the Accreditation of Educator Preparation (CAEP) and approved by the North Dakota Education Standards and Practices Board (ESPB).

Career Opportunities

The demand for language teachers continues to be great. In general, "employment of high school teachers is projected to grow 8 percent from 2016-2026, about as fast as the average for all occupations. Rising student enrollment should increase demand for high school teachers, but employment growth will vary by region" (https://www.bls.gov/ooh/education-training-and-library/high-school-teachers.htm)

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Major Requirements

Major: Spanish Education

Degree Type: B.A. or B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Total Credits		**66-80**

Degree Requirements and Notes

- A grade of 'C' or better is required in all Professional Education Requirement courses.
- A grade of 'B' or better is required in all SPAN teaching specialty courses.
- To be placed in student teaching, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required.
- To exit the program, a 2.75 cumulative GPA and a 2.75 GPA in professional education coursework is required as well as completing the Praxis Subject test and the Principles of Learning and Teaching test.
- Of the 31 credits of Spanish Language courses (SPAN) required for the Spanish major, 18 must be NDSU resident credits in addition to the capstone (i.e. cannot be taken Tri-College or study abroad).
- Courses taken *Pass/Fail* will not be used to satisfy any requirement other than total credits for graduation.
- See School of Education (https://www.ndsu.edu/education/) for admission requirements.

Spanish Studies

Department Information

- **Department Web Site:**
  www.ndsu.edu/modernlanguages/ (http://www.ndsu.edu/modernlanguages/)
- **Credential Offered:**
  Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/spanish-studies/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/spanish-studies/)

Broader in scope than the traditional minor which emphasizes linguistic competence, the Spanish Studies minor combines systematic language study with courses in geography, history, civilization, and politics to enhance students' understanding of the global context of the language they have chosen to study. A languages studies minor requires 18 approved semester credits, including nine credits of language and civilization study beyond the intermediate level (SPAN 311, SPAN 312 and a civilization course in the language), a six-credit sequence in history, and an approved three-credit elective in Anthropology, Geography, or Political Science; study abroad is strongly encouraged.

  www.ndsu.edu/hnes/ (http://www.ndsu.edu/hnes/)
- **Credential Offered:**
  B.S.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/sport-management/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/sport-management/)

The sport management (SM) major is a four-year, full-time program of study that is designed to prepare students to excel in the sport industry. SM students are guided through coursework and hands-on experiences within the sport industry that allow each student to focus on the ever-changing intricacies of the sport environment from multiple contexts. Within the curriculum, students are encouraged to explore the area(s) of sport they are most interested in, ranging anywhere from local non-profits to national and international professional franchises.

The Program

The SM degree is designed to prepare students for employment in local, state, regional, national or international level sporting and recreation organizations. The curriculum covers 75 credit hours in total and includes a Minor in Business Administration (24 credits) to enhance the employment prospect for each student.

Career Preparation

NDSU SM graduates are employed in a variety of sport and recreation occupations. Graduates should expect to work in local, state, regional, national or international level organizations, business, and nonprofits. Additionally, with the opening of the new eSports lab on campus, we have worked closely to ensure students with an interest with eSports are able to explore the industry with professionally-outfitted equipment and through educational opportunities.

In light of the interdisciplinary nature of our program study options, career opportunities beyond the sport management or recreation management fields are feasible.

Sport Management Association

The Sport Management Association (SMA) provides students with an opportunity to build relationships with peers and industry leaders in sport and recreation. Organization members can take part in sports-oriented community projects, learn about different sport and recreation careers from area professionals and become further prepared for a career in the industry. The SMA holds meetings regularly, with dues-paying members eligible for the many planned activities, adventures, and feasts scheduled by the association.

Academic Requirements

The 100- and 200-level sport management courses (usually taken during the freshman and sophomore years) are designed to prepare students for additional undergraduate work in the subsequent sport management courses during their junior and senior years (see the Sample Program Guide). It is highly recommended all students review the student handbook and all communications from the SM program coordinator and academic advisors regarding the sport management academic requirements.

To be eligible to take upper-division sport management classes (with the exception of HNES 303 and HNES 323), a student must:

- Have reached 50 credits in total,
- Have a grade of B or better in HNES 190,
- Complete one passing credit of HNES 192,
- Successfully complete ECON 105 and ACCT 102 with a collective GPA of 2.5 or higher across both classes (a student CANNOT receive a D in either course),
- Earn a minimum cumulative GPA of 2.75 for all classes by the end of the sophomore year (reaching 50 credits minimum).

Internship

The SM internship is the capstone course for all SM majors. Students participating in an internship will complete 12 credits, with each credit requiring 43 hours of documented work at an internship site (totaling 516 hours of on-the-job experience). The internship can be repeated at various sites/organizations at their advisor's discretion. Securing a host organization outside North Dakota or the United States is not only possible but encouraged.

Students have completed internship hours in several areas across sport, including but not limited to: Air Force Academy Athletics, Arizona State University Athletics, Bismarck Larks, Fargo and West Fargo Parks and recreation departments, Fargo-Moorhead RedHawks, Fargo Youth Hockey, Great Rides Fargo, Iowa Cubs, Minnesota Twins, Minnesota Vikings, NDSU Athletics, Oklahoma State University Athletics, Saint Paul Saints, Scheels Arena, Southern Texas PGA, US Olympic Committee, Vanderbilt University athletics, Washington Spirit, and the YMCA of Cass & Clay Counties.

Sequencing Courses for the Major

Courses in the SM major are laid out to ensure students are heavily involved with sport-related materials during their junior and senior years. Our students are also educated on the general aspects of the business world as they complete their Minor in Business Administration. After all, sport is a business.

HNES 190 is our introductory course that provides students with a detailed overview of the sport industry and provides students an opportunity to better understand what is expected of professionals in sport and recreation management. HNES 192 is a practicum class that gives students preliminary experience working in the sport industry. Future classes provide students a more detailed view of the many imperative elements that are part of the successful sport managers' toolkit. The degree is capped with the student obtaining 516 hours of on-the-job internship experience working alongside experts and influencers within the sport industry.

ACCELERATED graduate PROGRAM

Students interested in continuing their education in sport management beyond their bachelor's degree have the option to begin their graduate studies in sport management in their senior year. With successful admission into the graduate program (and advisor approval), undergraduates can complete up to 9 credits of graduate-level coursework during their senior year that will be applied to their completion of a Master of Science in Sport Management (MSM). Details for the accelerated program can be found on the MSM catalog page.

Sample Program Guide

Required Minor - Business Administration		
Minor application form is required to be completed with the College of Business. The business minor requires a 2.50 GPA in minor courses which cannot be taken pass/fail.		24
Total Credits		**73**

1

Requires a grade of 'B' or better.

2

Requires a grade of 'C' or higher.

Degree Requirements and Notes

- An NDSU cumulative GPA of 2.75 or higher must be maintained and the student must earn a grade of C or better in the HNES major requirement courses (other than HNES 190) to remain in the sport management program.
- Course taken *Pass/Fail* will not be used to satisfy any requirements other than total credits (other than HNES 192).
- Students who have specific career goals in mind may elect to complete additional minor(s) by choosing focused electives. Examples of other minors that compliment Sport Management include: Accounting, Community Development, Hospitality & Tourism Management, Human Development and Family Science, Journalism, Public Relations & Advertising, and Management Communication.

In order to enroll in 300-400 level sport management courses (with the exception of HNES 303), students must:

- Complete at least 50 credits with a GPA of 2.75 or higher.
- Obtain a B or higher in HNES 190 as indicated in the footnote.
- Complete one credit in HNES 192.
- Earn a 2.5 GPA within ACCT 102 and ECON 105 without receiving a grade of D in either course.
- Maintain active participation in Sport Management Association.

Statistics

Department Information

- **Department Web Site:**
  www.ndsu.edu/statistics/ (http://www.ndsu.edu/statistics/)
- **Credential Offered:**
  B.S.; B.A.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/statistics/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/statistics/)

Today, most professional statistical training is received at the undergraduate, as well as at the graduate level. A major in statistics and a minor in any of the other related areas, such as mathematics, computer science, agriculture, biological sciences or social sciences provide a good blend of training suitable for many jobs in industry, government and academic institutions. It is becoming increasingly important for those in other disciplines to have good familiarity with basic statistical techniques and inference procedures.

The Program

The Department of Statistics offers a major leading to bachelor's, master's and doctoral degrees. Two undergraduate minors are offered, one in applied statistics and the second in statistics. Graduate certificates in Statistics and Big Data Applied Statistical Analysis are also available. A mathematics and statistics double major, the pre-actuarial science option and a degree in behavioral statistics are offered at the undergraduate level.

The department provides opportunities to study both applied and theoretical aspects of statistics. Computers are extensively used in statistics instruction, and statistical software packages and programs are utilized in various courses. Data analysis is an important aspect in applied statistics courses.

Career Opportunities

There are excellent opportunities in statistics. Major corporations and most government agencies continually look for talented individuals with this type of education. Since even greater job opportunities are open to those with advanced statistical training, many undergraduates proceed directly to graduate work in statistics. Many students combine statistics with areas such as business, education, economics or biology.

Career opportunities are varied. A statistician may:

- consult in the design and analysis of clinical studies, evaluating new pharmaceutical agents;
- design experiments for agricultural, ecological, environmental or energy-related studies;
- determine mortality, morbidity and accident rates for an insurance company;
- serve as an opinion pollster for a public relations firm or a television network;
- develop theories of learning and behavior in conjunction with psychologists;
- determine optimal combinations and evaluate performance of various chemicals in industrial setups;
- conduct reliability and quality control studies in various industries; or
- develop econometrics, time series and forecasting models for determining the cause and effects of various socio-economic variables on society.

Statisticians work closely with other scientists and researchers to develop new statistical techniques, adapt existing techniques, design experiments and direct analyses of surveys and retrospective studies.

Statisticians are ranked number one in best STEM jobs in 2022 according to U.S. News and World Report.

The Facilities

The campus has several computer clusters connected to the campus network and the Internet. SAS, SPSS, JMP, and R are among the statistical packages available. Computer consultants are available to assist students if programming help is needed.

Statistics Curriculum

For a statistics major, 15 to 18 credits in mathematics, four to seven credits in computer science and 21 to 27 credits in statistics are required. A minor in one of the following areas is also required: social science, physical science, biological sciences, business, mathematics or computer science.

Students interested in biostatistics may minor in biological sciences.

A student interested in business statistics may minor in business administration.

Pre-Actuarial Option

A joint degree with mathematics with a pre-actuarial science option is also available.

Behavioral Statistics Requirements

The behavioral statistics degree is a joint effort between the Department of Statistics and the Department of Psychology. Students wishing to obtain a degree in behavioral statistics should consult with an advisor in both departments. Employment opportunities include working with medical or Medicare data. Graduates of this program are expected to have good quantitative reasoning skills and strong people skills.

The Faculty

Rhonda C. Magel, Ph.D., Professor, Chair, University of Missouri, 1982; Field: Nonparametrics, Inference Under Order Restrictions, Regression

Megan Orr, Ph.D., Associate Professor, Iowa State University, 2012; Field: Gene Expression Analysis, High-Dimensional Data Analysis, Multiple Testing

Gang Shen, Ph.D., Associate Professor, Purdue University, 2009; Field: Mathematical Statistics, Asymptotic Theory, Bayesian Analysis, Change-Point Problem

Ronald Degges, Ph.D., Associate Professor of Practice, North Dakota State University, 2011; Field: Survival Analysis, Nonparametrics and Regression

Bong-Jin Choi, Ph.D., Assistant Professor, University of South Florida, 2014; Field: Computational Statistics, Machine Learning, Biostatistics, Public Health Research, Big Data Analysis

Mingao Yuan, Ph.D., Assistant Professor, Purdue University, 2018; Field: Network Analysis, Big Data Analysis, Statistical Machine Learning

Andrew Lexvold, M.S., Lecturer, North Dakota State University, 2016; Field: Biostatistics, Bayesian and Spatial Analyses Applied to Election Forecasting

Sample Program Guide

IMPORTANT DISCLAIMER: This guide is not an official curriculum. This guide is a sample four-year degree plan of how students might plan this major with other degree requirements to complete their education in four years.Student plans will vary from this sample due to a variety of factors, such as, but not limited to, start year, education goals, transfer credit, and course availability. To ensure proper degree completion, enrolled students should utilize Degree Map (https://www.ndsu.edu/registrar/degreemap/) and Schedule Planner (https://www.ndsu.edu/onestop/degree-map-and-planning/) in Campus Connection and consult regularly with academic advisors to ensure graduation requirements are being met.

Department Information

- **Department Web Site:**
  www.ndsu.edu/statistics (http://www.ndsu.edu/statistics/)
- **Credential Offered:**
  B.S.; B.A.; Minor
- **Sample Program Guide:**
  catalog.ndsu.edu/programs-study/undergraduate/statistics/ (http://catalog.ndsu.edu/programs-study/undergraduate/statistics/)

Major Requirements

Major: Statistics

Degree Type: B.A. or B.S.
Minimum Degree Credits to Graduate: 120

University Degree Requirements

1. Satisfactory completion of all requirements of the curriculum in which one is enrolled.
2. Earn a minimum total of 120 credits in approved coursework. Some academic programs exceed this minimum.
3. Satisfactory completion of the general education requirements as specified by the university.
4. A minimum institutional GPA of 2.00 based on work taken at NDSU.
5. At least 30 credits must be NDSU resident credits. Resident credits include credits registered and paid for at NDSU.
6. At least 36 credits presented for graduation must be in courses numbered 300 or higher.
7. Students presenting transfer credit must meet the NDSU residence credits and the minimum upper level credit. Of the 30 credits earned in residence, a minimum of 15 semester credits must be in courses numbered 300 or above, and 15 semester credits must be in the student's curricula for their declared major.

For complete information, please refer to the Degree and Graduation Requirements (p. 66) section of this Bulletin.

University General Education Requirements

A list of university approved general education courses and administrative policies are available here (p. 58).

Code	Title	Credits
Category C: Communication		**12**
ENGL 110	College Composition I	
ENGL 120	College Composition II	
COMM 110	Fundamentals of Public Speaking	
Upper Division Writing †		
Category R: Quantitative Reasoning †		**3**
Category S: Science and Technology †		**10**
Category A: Humanities and Fine Arts †		**6**
Category B: Social and Behavioral Sciences †		**6**
Category W: Wellness †		**2**
Category D: Cultural Diversity *†		

Category G: Global Perspectives [*†]	
Total Credits	**39**

*
Courses for category D & G are satisfied by completing D & G designated courses in another general education category.

†
General education courses may be used to satisfy requirements for both general education and the major, minor, and program emphases, where applicable. Students should carefully review major requirements to determine if specific courses can also satisfy these general education categories.

Major Requirements

A grade of 'C' or better is required in ALL courses used toward the major.

Code	Title	Credits
Statistics Major Requirements		
CSCI 160	Computer Science I	4
CSCI 222	Discrete Mathematics	3
or MATH 270	Introduction to Abstract Mathematics	
MATH 129	Basic Linear Algebra	3
MATH 165	Calculus I (May satisfy general education category R)	4
MATH 166	Calculus II	4
MATH 265	Calculus III	4
STAT 367	Probability	3
STAT 368	Statistics	3
STAT 461	Applied Regression Models	3
STAT 462	Introduction to Experimental Design (Capstone)	3
Electives: Select 15 credits from the following (can choose only one CSCI course):		**15**
CSCI 161	Computer Science II	
CSCI 438	Simulation Models	
MATH 329	Intermediate Linear Algebra	
STAT 460	Applied Survey Sampling

Strategic Communication

Department Information

- **Department Web Site:**
  www.ndsu.edu/communication/ (http://www.ndsu.edu/communication/)
- **Credential Offered:**
  B.S.; B.A.; Minor
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/strategic-communication/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/strategic-communication/)

Strategic Communication is one of four majors offered by the Department of Communication. Students may choose from professional emphases in advertising or public relations.

Why Choose a Major in the Department of Communication?

Our students pursue degrees in Communication because they are interested in fast-paced careers where every day brings something new. They want to make a difference in the world while doing something they love – whether that's reporting breaking news, designing advertisements, running social media campaigns, promoting organizations, or leading others in the workplace.

As a Strategic Communication major, you will get:

- **More time to explore your interests.** We give you the first year to explore your options, making it possible to switch between **four different COMM majors** without extending your graduation timeline.
- **Guidance on choosing a career.** In COMM 101: Majors and Careers in Communication, you will meet others in your major, learn more about possible careers, and find campus resources that help you achieve your professional goals.
- **Hands-on learning.** You'll have multiple ways to apply what you are learning through course projects, consulting for local organizations, and participating in national competitions.
- **Built-in communities.** You can connect with other students - while building your resume - through the **eight student organizations** affiliated with our department.
- **Professional experience.** We help you find and benefit from internships in your field through our relationships with local and regional employers.

Strategic Communication Major

A public relations emphasis will orient students to the principles and practices of public relations, an advertising emphasis to the principles and practices of advertising. Students will complete an applied capstone course in their final semester. Students majoring in strategic communication may earn a Bachelor of Arts degree (with intermediate-level language proficiency) or a Bachelor of Science degree (with recommended minor or certificate).

ADMISSION TO THE MAJOR

Students are admitted to the strategic communication major after completing 18 credits of pre-communication courses: COMM 110, COMM 112, COMM 114, COMM 212, COMM 220, and ENGL 120.

Internship Requirement

Internships offer practical experience for strategic communication students. Three credits (120 hours) of field experience are required for the major, and many students complete more than one internship. Students have interned with advertising/marketing firms, non-profits, and media companies in the Fargo-Moorhead area and beyond. Internships often lead to jobs.

Career Opportunities

Coursework in the strategic communication major prepares students for careers that include graphic design, copy writing/editing, client services, event planning, promotion, evaluation, publicity and media relations, creative design, professional business consulting, and corporate training. The courses in each emphasis area promote written and oral communication skills and prepare students to communicate in meaningful and effective ways with a variety of audiences.

Extra-Curricular Activities

Students majoring in strategic communication are encouraged to gain experience by joining the Advertising Club or the department's chapter of the Public Relations Student Society of America (PRSSA). NDSU has two honoraries for top students majoring in a degree program offered by the Department of Communication. Pi Kappa Delta is a national honor fraternity for students involved in human communication activities. Lambda Pi Eta is a national honorary for communication majors with high academic achievement.

High School Preparation

A well-rounded high school education with experiences in high school music, forensics, theater, journalism, FFA, or scouting serves as good preparation for the strategic communication major. Students with interests in science and art, business and service, and publicity and promotion will find a major in this department to be a good fit.

Scholarships

The Department of Communication awards a number of scholarships to students who excel in academics and who have demonstrated career potential. Applications are due by March 1. Visit **the department website** for details.

The Faculty

Faculty members in the Department of Communication are dedicated teachers, scholars, and practitioners who are committed to providing high-quality courses, hands-on learning experiences, and opportunities for undergraduate research.

COMM 472	Public Relations Campaigns	
COMM 476	Advertising Campaign Practicum	
COMM 485	Risk and Crisis Communication	
Total Credits		**21**

Minor Requirements and Notes

- A minimum of 9 credits must be taken at NDSU.

Supply Chain Management

Department Information

- **Department Web Site:**
  www.ndsu.edu/business/ (http://www.ndsu.edu/business/)
- **Credential Offered:**
  B.S.
- **Official Program Curriculum:**
  catalog.ndsu.edu/undergraduate/program-curriculum/supply-chain-management/ (http://catalog.ndsu.edu/undergraduate/program-curriculum/supply-chain-management/)

As a supply chain management major, you will learn the fundamental concepts and tools to make informed and responsible decisions about purchasing, inventory control, warehousing and distribution, and the dynamic system that supply chain represents. Supply chain students know how to model different components of the supply chain system and learn how to use supply chain technology to enhance the system. They come to understand and manage the hub of the system by learning about the production and operation processes. The Supply Chain Management major is the

only Science, Technology, Engineering, and Mathematics (STEM) designed major in the College of Business. We successfully place our graduates in organizations where their supply chain management expertise is valued and rewarded.

Background Information

AACSB International, The Association to Advance Collegiate Schools of Business, accredits the undergraduate and graduate programs in the College of Business at North Dakota State University. The College of Business is one of only two accredited schools of business in North Dakota.

AACSB International is one of higher education's most prestigious and rigorous accrediting bodies, stressing academic excellence and a commitment to continuous improvement. Less than 10 percent of business programs worldwide have this accreditation.

The Program

Business students take core courses that cover all of the functional areas of a business, from marketing to management and accounting. Supply chain management courses build on this foundation to help students understand the way supply chain impacts the global economy. Courses cover integrate supply chain management, managing inventory and materials, supplier and customer relations, international supply chain management, scheduling in supply chain management, and more. The major provides you with an electronic portfolio to document your work which can be used during the job search process. Your assignments might be the use of a simulation to model a specific supply chain or a problem-based experience with a real supply chain organization. In addition to a thorough knowledge of the supply chain, you'll learn problem-solving competencies, teamwork, effective written and oral communication competencies, how to manage your career, and both management and leadership competencies.

HANDS-ON EXPERIENCE
